## A. A. MACDONELL.

## INTRODUCTION.

1. General Scope of this Work .- Vedic grammar has never till now been treated separately and as a whole. Both in India and in the West the subject has hitherto been handled only in connexion with Classical Sanskrit. Hundreds of Pāṇini's Sūtras deal with the language of the Vedas; but the account they give of it is anything but comprehensive. In the West, Benfey was the first, more than half a century ago (1852), to combine a description of the linguistic peculiarities of the Vedas with an account of the traditional matter of Panini; but as Vedic studies were at that time still in their infancy, only the Samavedar and about one-fourth of the Rgveda2 having as yet been published, the Vedic material utilized in his large grammar<sup>3</sup> was necessarily very limited in extent. In Whitney's work the language of the Vedas, which is much more fully represented, is treated in its historical connexion with Classical Sanskrit. Partly for this reason, his work does not supply a definite account of the grammar of the Samhitas as compared with that of the later phases of the language; thus what is peculiar to the Brāhmaņas or to a particular Samhitā is often not apparent. Professor WACKERNAGEL'S grammar<sup>5</sup>, which when finished will present the ancient language of India more completely than any other work on the subject, deals with the combined Vedic and post-Vedic material from the point of view of Comparative Philology. Different sections or individual points of Vedic grammar have been the subject of separately published treatises or of special articles scattered in various Oriental and philological journals or other works of a miscellaneous character. It is advisable that all this as well as additional material<sup>6</sup> should now be brought together so as to afford a general survey of the subject.

In view of the prominent position occupied by the Indo-Aryan branch in Comparative Philology and of the fact that the language of the Vedas

lation and glossary, Leipzig 1848.

6 Such additional material is supplied in this work from collections made for me by 3 Vollständige Grammatik der Sanskrit-rache, Leipzig 1852. 4 A Sanskrit Grammar, Leipzig 1879; 3<sup>rd</sup> my pupils Prof. H. C. NORMAN (Benares) from the Vājasaneyi Saṃhitā, and Mr. A. B. KEITH from the Taittirīya Saṃhitā, the Mantras in the Aitareya Aranyaka, and the

<sup>&</sup>lt;sup>2</sup> Vol. I edited by MAX MÜLLER, London 1849, vol. VI 1875; 2nd ed. London 1890-92; edited by AUFRECHT, Berlin 1861 and 1863 (vols. VI and VII of Indische Studien), 2<sup>nd</sup> ed. Bonn 1877. 3 Vollständige Grammatik der Sanskrit-

represents the foundation of the subsequent strata, it seems important for the sake of clearness and definiteness that the earliest phase should be treated as a whole independently of later developments. The present work will therefore deal with the grammar of only the Mantra portions of the Samhitas; that is to say, it will embrace the whole of the Rgveda, the Atharvaveda, the Sāmaveda<sup>2</sup>, and the Vājasaneyi Samhitā<sup>3</sup>, but will exclude those portions of the Taittirīya Samhitā4, the Maitrāyanī Samhitā5 and the Kāthaka6 which have the character of Brāhmaṇas?. Reference will also be made to Mantra material not found in the canonical texts of the Samhitas, that is, to the Khilas<sup>8</sup> of the Rgveda and the occasional Mantras of this type occurring in the Brāhmanas and Sūtras. As the linguistic material of the Rgveda is more ancient, extensive and authentic than that of the other Samhitas, all of which borrow largely from that text 10, it is taken as the basis of the present work. Hence all forms stated without comment belong to the Rgveda, though they may occur in other Samhitas as well. From the other Vedas, such matter only is added as occurs in their independent parts or, if borrowed from the Rgveda, appears in an altered form, the source being in such cases indicated by an abbreviation in parentheses (as VS., TS., AV.). The addition of the abbreviation 'RV.' means that the form in question occurs in the Rgveda only.

2. Verbal Authenticity of the Texts .- In dealing with the linguistic material of the Samhitas the question of the authenticity of the forms which it embraces is of great importance. What guarantees then do we possess that the original form of the texts handed down by tradition has not in the course of ages undergone modification and modernization in respect to vocabulary, phonetics, and grammatical forms? This question must first be applied to the Rgveda, the oldest of the Samhitas, which forms the very foundation of Vedic tradition. The evidence of the Sarvānukramaņī12, which states the number of stanzas, the metre, and the deity for every hymn of the RV., shows that in general extent, form, and matter, this Samhitā was in the Sūtra period the same as now. The Prātiśākhya 13 demonstrates that its phonetic character was also the same. Yāska's commentary 14 proves that,

as regards the limited number of stanzas explained by him, his text was verbally identical with ours. The frequent statements of the Brāhmaṇas concerning the number of verses contained in a hymn or liturgical group agree with the extant text of the Rgveda. The explanatory discussions of the Brāhmaṇas further indicate that the text of the Rgveda must have been regarded as immutably fixed by that time. Thus the Satapatha Brāhmaṇa, while speaking of the possibility of varying some of the formulas of the Yajurveda, rejects as impossible the notion of changing the text of a certain verse of the Rgveda as proposed by some teachers.

Probably soon after the completion of the actual Brāhmaṇas the hymns of the Rgveda were fixed in the phonetic form of the Samhitā text; and after no long interval, in order to guard that text from the possibility of any change or loss, the Pada text was constituted by Sākalya, whom the Āraṇyakas or appendixes to the Brāhmaṇas, the Nirukta, and the Rgveda Prātiśākhya presuppose<sup>2</sup>. By this analysis of the Saṃhitā text, its every word, stated in a separate form as unaffected by the rules of euphonic combination, has

come down to us without change for about 2,500 years.

The Samhita text itself, however, only represented the close of a long period in which the hymns, as originally composed by the seers, were handed down by oral tradition. For the condition of the text even in this earlier period we possess a large body of evidence corresponding to that of Mss. for other literary monuments. It was then that the text of the other Vedas, each of which borrowed extensively from the Rgveda, was constituted. With each of them came into being a new and separate tradition in which the borrowed matter furnishes a body of various readings for the Rgveda. The comparison of these variants, about 1200 in number, has shown that the text of the Rgveda already existed, with comparatively few exceptions, in its present form when the text of the other Vedas was established. The number of instances is infinitely small in which the Rgveda exhibits corruptions not appearing in the others. We have thus good reason for believing that the fixity of the text and the verbal integrity of the Rgveda go several centuries further back than the date at which the Samhita text came into existence. As handed down exclusively by oral tradition, the text could hardly have been preserved in perfectly authentic form from the time of the composers themselves; and research has shown that there are some undeniable corruptions in detail attributable to this earliest period. But apart from these, the Samhitā text, when the original metre has been restored by the removal of phonetic combinations which did not prevail in the time of the poets themselves, nearly always contains the very words, as represented by the Pada text, actually used by the seers. The modernization of the ancient text appearing in the Samhita form is only partial and is inconsistently applied. It has preserved the smallest minutiae of detail most liable to corruption and the slightest differences in the matter of accent and alternative forms which might have been removed with the greatest ease. We are thus justified in assuming that the accents and grammatical forms of the Rgveda, when divested of the euphonic rules applied in the Samhita text, have come down to us, in the vast majority of cases, as they were uttered by the poets themselves.

Though the tradition of nearly all the later Samhitās has in a general way been guarded by Anukramanīs, Prātiśākhyas, and Pada texts, its value is clearly inferior to that of the Rgveda. This is only natural in the case

of Durga), Calcutta 1882—91 (Bibliotheca Indica).

See Oldenberg, op. cit., 352.See Oldenberg, op. cit., 380 f.

of collections in which the matter was largely borrowed and arbitrarily cut up into groups of verses or into single verses solely with a view to meet new liturgical wants. Representing a later linguistic stage, these collections start from a modernized text in the material borrowed from the Rgveda, as is unmistakable when that material is compared with the original passages. The text of the Samaveda is almost entirely secondary, containing only seventy-five stanzas not derived from the Rgveda. Its variants are due in part to inferiority of tradition and in part to arbitrary alterations made for the purpose of adapting verses removed from their context to new ritual uses r. An indication that the tradition of the Yajur and Atharva Vedas is less trustworthy than that of the Rgveda is the great metrical irregularity which is characteristic of those texts2. Of all these the Vajasaneyi Samhita is the best preserved, being not only guarded by an Anukramanī, a Prātiśākhya, and a Pada text, but partially incorporated in the Satapatha Brāhmaṇa, where the first 18 books are quoted word for word besides being commented on. The Taittirīya Samhitā has also been carefully handed down, being protected by an Anukramanī, a Prātiśākhya, and a good Pada text3. The Maitrāyanī Samhitā is not so well authenticated, having no Pratisakhya and only an inferior Pada text, of which but a single somewhat incorrect Ms. is known4. Least trustworthy of all is the tradition of the Kāṭhaka which lacks both a Prātiśākhya and a Pada text. Moreover only one complete Ms. of this Samhitā is known5. As that Ms. is unaccented, it has only been possible to mark the accent in small portions of that part of the text which has as yet been published (Books I-XVIII). As, however, the texts of the Black Yajurveda often agree even verbally, and the Maitrāyaṇī Saṃhitā is closely connected with the Kāthaka, the readings of the latter can to some extent be checked by those of the cognate Samhitas.

The inferiority of tradition in the Atharvaveda was increased by the lateness of its recognition as a canonical text. It contains many corrupt and uncertain forms, especially in Book XIX, which is a later addition formed text is guarded by Anukramanīs, a Prātiśākhya, and a Padapāṭha?. The latter, however, contains serious errors both in regard to accentuation and the division of compound verbal forms, as well as in other respects. The Padapāṭha of Book XIX, which is different in origin from that of the earlier books is full of grave blunders. The critical and exegetical notes contained in Whitney's Translation of the Atharvaveda accordingly furnish important aid in estimating the value of the readings in the Saunakīya recension of the Atharvaveda. The Paippalāda recension is known in only a single corrupt Ms., which has been reproduced in facsimile by Professors Garbe and Bloomfield. About one-eighth or one-ninth of this recension is original, being found neither in the Saunakīya text of the Atharvaveda nor in any other known collection of Mantras 11. The various readings of this recension, in the

material common to both recensions, are given in the critical notes of WHITNEY'S Translation. The variations range from slight differences to complete change of sense, and exact textual agreement between parallel stanzas is comparatively rare . The text of this recension has not yet been critically edited except Book T2.

## I. PHONOLOGY.

Rgveda Prātišākhya, ed. with German translation by MAX MÜLLER, Leipzig 1856-69; with UVATA's Commentary, Benares Sanskrit Series, 1894. — Atharvaveda Prātiśākhya, ed. WHITNEY, JAOS. vols. VII and X. — Taittirīya Prātišākhya, ed. WHITNEY, JAOS. vol. IX, 1871. — Vājasaneyi Prātišākhya, ed. Weber, IS. vol. IV, 1858; with UVATA's Commentary, Benares Sanskrit Series, 1888. - Riktantravyākarana (= Prātisākhva of the SV.), ed. and transl. by BURNELL, Mangalore 1879.

BENFEY, Vollständige Grammatik p. 1-70. - WHITNEY, Sanskrit Grammar p. 1-87. -

WACKERNAGEL, Altindische Grammatik. I. Lautlehre (very full bibliography).

- 3. Ancient Pronunciation. Evidence throwing light on the phonetic character of the language of the Samhitas is furnished not only by the pronunciation of its sounds by the Brahmans of to-day, who still recite those texts, but also by the transcription of Sanskrit words in foreign languages, particularly Greek, in ancient times; by the summary information contained in the works of the old Sanskrit grammarians, Pāṇini and his successors; and more especially by the detailed statements of the Prātiśākhyas and the Śikṣās. From these sources we derive a sufficiently exact knowledge of the pronunciation prevailing about 500 B. C. This pronunciation, however, need not necessarily have coincided in every particular with that of the Samhitas, which date from many centuries earlier. Nevertheless, judging by the internal evidence supplied by the phonetic changes and analogical formations occurring in the language of the texts themselves and by the external evidence of comparative philology, we are justified in concluding that the pronunciation, with the possible exception of a very few doubtful points, was practically the same.
- 4. The Sounds of the Vedic Language. There are altogether 52 sounds, 13 of which are vocalic and 39 consonantal. They are the following:

## A. Vocalic sounds.

- 1. Nine simple vowels:  $a \bar{a} i \bar{\imath} u \bar{u} r \bar{r} l$ .
- 2. Four diphthongs: e o3 ai au4.

## B. Consonantal sounds.

- 1. Twenty-two mutes, divided into five classes, each of which has its class nasal, making a group of twenty-seven:
  - a) five gutturals:  $k \, kh \, g \, gh \, \dot{n}$ , b) five palatals:  $c \, ch \, j \, jh \, \tilde{n}$ ,
  - c) seven cerebrals: t th d and l5 dh and lh5 n,
  - d) five dentals: t th d dh n,
  - e) five labials: p ph b bh m.

cp. WHITNEY'S Translation of the Atharvaveda p. 1013-23.

I On the readings of the Paippalada recension, see Lanman's Introduction p.LXXIX-

2 The Kashmirian Atharva Veda, Book One. Edited with critical notes by LEROY CARR BARRET, in JAOS. 26, 197-295.

- 3 These are really simple long vowels,
- being diphthongs only in origin (= ŭi, ŭu).

  4 Pronounced ŭi, ŭu (see Whitney on APr. I. 40 and TPr. II. 29), but derived from diphthongs with a long first element.
- 5 These sounds take the place of d dh respectively between vowels; e. g. ile (but idya), mīlhúse (but mīdhván).

2. Four semivowels: y r l v.

3. Three sibilants: s' (palatal), s (cerebral), s (dental).

4. One aspiration: h.

5. One pure nasal: m (m) called Anusvara ('after-sound').

6. Three voiceless spirants: A (Visarjanīya), A (Jihvāmūlīya), A (Upadhmānīya).

5. Losses, changes, additions.—In order that the phonetic status of the Vedic language may be understood historically, the losses, changes, and additions which have taken place in it as compared with earlier linguistic stages, must be pointed out.

a. It has lost the IE. 1) short vowels ĕ ŏ and Θ; 2) long vowels ē ō;
3) diphthongs ĕi ŏi, ĕu ŏu; āi ēi ōi, āu ĕu ōu; 4) sonant nasals; 5) voiced

spirant z.

b. It has replaced a number of IE. sounds by others: 1) the short vowels  $\vec{e}$   $\vec{o}$  by  $\vec{a}$ ,  $\vec{e}$  by  $\vec{i}$ ; 2) the long vowels  $\vec{e}$   $\vec{o}$  by  $\vec{a}$ ; 3) the diphthongs  $\vec{e}$   $\vec{o}$  is  $\vec{i}$  by  $\vec{e}$ ,  $\vec{e}$   $\vec{u}$   $\vec{o}$   $\vec{u}$  by  $\vec{o}$ ; also  $\vec{a}$   $\vec{e}$   $\vec{e}$   $\vec{o}$  by  $\vec{e}$   $\vec{o}$ ; 4)  $\vec{f}$  by  $\vec{i}$   $\vec{f}$  ( $\vec{u}$   $\vec{f}$ ),  $\vec{f}$  by  $\vec{f}$ ; 5)  $\vec{a}$   $\vec{i}$   $\vec{e}$   $\vec{i}$   $\vec{o}$   $\vec{i}$  by  $\vec{a}$   $\vec{u}$ ,  $\vec{o}$   $\vec{u}$   $\vec{v}$   $\vec{o}$   $\vec{u}$ ; 6)  $\vec{f}$ , when followed by a nasal, has become  $\vec{f}$ ; 7) gutturals (velars) have, under certain conditions, become palatals  $\vec{i}$ ; 8) a palatal mute has become the palatal spirant  $\vec{s}$ .

c. It has added the whole series of eight cerebrals (including the

spirant s).

The above innovations are specifically Indian, excepting (1) the loss of the vowels  $\tilde{e}$   $\tilde{o}$  2, together with the diphthongs formed with them; (2) the loss of the sonant nasals; and (3) the addition of the spirants s and s. These the Avesta shares with the Vedas.

# 1. The simple vowels.

6. The vowel a.—This is by far the commonest vowel, being much more than twice as frequent as  $\bar{a}$ ; while these two a-vowels combined occur as often as all the rest (including diphthongs) taken together3. According to the modern Indian pronunciation, a has the sound of a very short close neutral vowel like the English u in but. That such was its character as early as the time of Pāṇini appears from his last Sūtra, according to which a is not the short sound corresponding to  $\bar{a}$ . To the same effect are the statements of the Prātiśākhyas4, which describe a as a 'close' (samvṛta) sound. This pronunciation is borne out by the reproduction of Indian words in Greek, where the vowel, though usually represented by  $\alpha$ , appears as  $\check{c}$  or  $\check{o}$  also; on the other hand, the frequent reproduction of the Greek a by the Indian  $\bar{a}$  indicates that, to the Indian ear, that vowel was both longer and had more distinctively the sound of a. Similarly, Hindus of the present day make the observation that the English pronunciation of  $\check{a}$  in Sanskrit words sounds long  $(d\bar{\imath} r g h a)$  to them. As the ancient Iranian languages have the normal  $\check{a}$ throughout, the close pronunciation must be an Indian innovation. But whether it already prevailed in the period when the Samhitas were composed is uncertain. The fact, however, that in the RV. the metre hardly ever admits. of the  $\ddot{a}$  being elided after e or o, though the written text drops it in about 75 per cent of its occurrences, seems to indicate that when the hymns of the RV. were composed, the pronunciation of  $\ddot{a}$  was still open, but that at

<sup>&</sup>lt;sup>1</sup> Cp. Brugmann, Kurze vergleichende Grammatik der indogermanischen Sprachen 1902, 1, 244.

<sup>&</sup>lt;sup>2</sup> Op. cit. 233.

<sup>3</sup> Cp. WHITNEY, 22 and 75. 4 APr. 1. 36; VPr. 1. 72.

the time when the Samhitā text was constituted, the close pronunciation was already becoming general.

a. Though a ordinarily represents IE. ă ĕ ŏ¹, it also often replaces an original sonant nasal² representing the reduced form of the unaccented Vedic syllables a+nasal: 1) an in derivative and inflexional syllables; e. g. sat·á beside the stem sánt-'being'; núhv-ati 'they sacrifice' (suffix otherwise -anti); 2) a+nasal in radical syllables; e. g. ta-tá-'stretched': Vtan-; ga-tá-'gone': Vgam-; das-má-'wondrous': Vdams-; stem pathi- 'path', beside pánthā-; 3) in words as shown by comparative philology; e. g. śatá-m 'hundred' (Lat. centum), dáśa 'ten' (Lat. decem)3.

Very rarely a is a Prakritic representative of r, as in vi-kata-4 'monstrous', beside

vi-krta- 'deformed'.

- 7. The vowel  $\bar{a}$ .—This sound represents both a simple long vowel<sup>5</sup> and a contraction; e. g.  $\hat{d}$ -sth $\bar{a}$ -t 'he has stood';  $\hat{a}$ sam 'I was' (=  $\hat{d}$ -as-am), bhár $\bar{a}$ ti 'may he bear' (= bhára-a-ti).
- a. Like a, the long vowel  $\bar{a}$  frequently corresponds to or is derived from a syllable containing a nasal; e. g.  $kh\bar{a}$ - $t\acute{a}$ -'dug': Vkhan-;  $\bar{a}$ - $tm\acute{a}n$ -'soul': an-'breathe'. In very rare instances the nasal is retained in the RV.:  $jlgh\bar{a}nsati$  'desires to strike': Vhan-;  $sr\bar{a}nt\acute{a}$ -'wearied': Vsram-;  $srant\acute{a}$ -'dark': Vdhvan-; there are six or eight more instances in the later Samhitās 6. Here the reappearance of the nasal in a weak radical syllable is an innovation due to the influence of other forms with nasals?
- 8. The vowel i.— This sound in the first place is an original vowel; e. g. div-i in heaven'. It also frequently represents the low grade of e and ya both in roots and suffixes; e. g. vid-ma we know', beside  $v\acute{e}d$ -a 'I know';  $n\acute{e}v$ -istha- 'newest', beside  $n\acute{e}v$ -yas- 'newer'. It further appears as the low grade of  $\bar{a}$  in roots containing that vowel: e. g.  $s\acute{e}dhyati$  'succeeds', beside  $s\acute{e}dhati$ ;  $s\acute{e}s\acute{e}t$  'taught', beside  $s\acute{e}s\acute{e}t$  'teaches'; especially when the vowel is final, as in sthi-tá- 'stood':  $\sqrt{sth\bar{a}}$ -. From the latter use it came to assume the function of a 'connecting' vowel; e. g. jan-i-tf- 'begetter':  $\sqrt{jan}$ -; after heavy syllables also in the ending -ire of 3 pl. pf. mid. vavand-ire (beside  $nunudr\acute{e}t$ ). In  $s\acute{e}t$  'loose' i would be a Prakritic representative of r, if the word is derived from  $\sqrt{srath}$ -9.

<sup>&</sup>lt;sup>1</sup> Cp. Brugmann, KG. 92, 104, 116.

<sup>&</sup>lt;sup>2</sup> Cp. Brugmann 184.

<sup>3</sup> See WACKERNAGEL I, 7 (p. 7-10).

<sup>4</sup> Cp. Wackernagel I, 146. 5 It represents IE.  $\bar{a}$   $\bar{e}$   $\bar{o}$ : cp. Brugmann, KG. 98, 110, 122. It also appears for IE.  $\check{o}$  before single consonants: cp. Wacker-

<sup>6</sup> See below, past passive participles 574,

<sup>7</sup> See WACKERNAGEL I, 13.

<sup>8</sup> This term will be retained in the present

work in its conventional sense (cp. Brug-Mann, KG. 365), and 'roots' will be quoted in the usually low grade form in which they appear in Sanskrit grammar. The term 'base' will be used to designate the phonetic unit which is the starting point of vowel gradation (cp. Brugmann, KG. 2II). Thus bhāva- or bhavi- is a 'base', bhūis a 'root'.

<sup>9</sup> Cp. WACKERNAGEL I, 16 (p. 19, note).

<sup>10</sup> Cp. Brugmann, KG. 73. 11 See Wackernagel I, 18.

10. The vowel u.— This sound is an original vowel; e. g. ''pa' 'up to'; duhitr'- 'daughter'; mádhu- 'sweetness'. It also represents the low grade of o or va both in roots and suffixes; e. g. yugá- m. n. 'yoke', beside yóga- m. 'yoking'; suptá- (AV.) 'asleep': svápna- m. 'sleep'; kṛṇu-: kṛṇó- present base of kṛ- 'make'.

rr. The vowel  $\bar{u}$ .— This sound is an original vowel; e. g.  $bhr\bar{u}$ - 'brow';  $shr\bar{u}$ - 'hero'. It is also the low grade for avi, au,  $v\bar{a}$ ; e. g. bhhr-t' 'has become': bhavi-sydti 'will become';  $dh\bar{u}th$ -'shaken': dhauth- $r\bar{r}$ -, f. 'shaking';

 $s\bar{u}d$ - 'sweeten' :  $sv\bar{a}d$ - 'enjoy'.

12. The vowel r.—The vowel  $r^1$  is at the present day usually pronounced as ri; and that this pronunciation is old is shown by the confusion of the two sounds in inscriptions and Mss., as well as by the reproduction of r by ri in the Tibetan script  $^2$ . But r was originally pronounced as vocalic r. The Prātiśākhyas of the RV., VS., AV. $^3$  describe it as containing an r, which according to the RPr. is in the middle. According to the commentator on the VPr. this medial r constitutes one-half of the sound, the first and last quarter being  $\check{a}^4$ . This agrees with ara, the equivalent of r in the Avesta.

Except in the acc. and gen. plur. of r-stems (where  $\bar{r}$  is written), the long vowel is in the RV. represented by the sign for r: always in forms of the verb  $mrd^{-5}$  'be gracious', in the past participles  $tr/h\dot{a}$ - 'crushed',  $dr/h\dot{a}$ - 'firm', in the gen.  $nrn\dot{a}m$ , and in the one occurrence of the gen.  $tisrn\dot{a}m^6$ . In the later Samhitās, the vowel in these instances was pronounced short; and it was doubtless for this reason that r came to be erroneously written for

 $\bar{r}$  in the text of the RV.

13. The vowel  $\bar{r}^8$ .—This long vowel, according to RPr. and APr.9, contains an r in its first half only. It appears only in the acc. and gen. plur. masc. fem. of r-stems; e. g.  $pit\bar{r}n$ ,  $m\bar{a}t\bar{r}s$ ;  $pit\bar{r}n\bar{a}m$ ,  $sv\dot{a}s\bar{r}n\bar{a}m$ . Thus the  $\bar{r}$  was written only where a-i-u-stems showed analogous forms with  $\bar{a}$   $\bar{\imath}$   $\bar{\imath}$ ; and prosodical evidence proves that, in the RV.,  $\bar{r}$  is required even in the two genitives in which r is written  $(nrn\bar{a}m$  and  $tisrn\bar{a}m)^{10}$ . In the TS., however, all these genitives plur. have  $r^{11}$  (that is,  $pitrn\bar{a}m$  as well as  $nrn\bar{a}m$ ,  $tisrn\bar{a}m$ ).

14. The vowel !.—This sound, though pronounced as *lri* at the present day, was originally a vocalic *l*. Its description in the Prātisākhyas 12 is analogous to that of *r*. It is found only in a few forms or derivatives of the verb *klp*- 'be in order': cāklpre', 3 pl. perf.; ciklpāti, 3 sing. aor. subj.; klpti- (VS.)

'arrangement'. In the RV. r appears beside it in krp- 'form' 13.

# 2. The diphthongs.

15. The diphthongs e and o.—At the present day these sounds are pronounced in India as long monophthongs like  $\bar{e}$  and  $\bar{o}$  in most European

<sup>2</sup> See Wackernagel 1, 28.

In several instances r appears to represent an IE. I sound. Cp. WACKERNAGEL I. p. 33.

<sup>3</sup> RPr. VIII. 14; VPr. IV. 145; APr. I. 37,71. 4 Cp. Benfey, Vedica und Verwandtes I, 18.

<sup>5</sup> Except possibly RV. vII. 56'7 where the vowel is metrically short; cp. op. cit. I, 6; ARNOLD, Vedic Metre, p. 143.

<sup>6</sup> RV. v. 692.

<sup>7</sup> In the AV. the vowel is still metrically long in some of these instances: OLDEN-EERG, Prolegomena 477.

<sup>&</sup>lt;sup>8</sup> The  $\bar{r}$  of the gen. pl. is an Indian innovation; cp. 5, b 6 and 17. On the other hand, IE.  $\bar{r}$ - is represented by  $\bar{i}r$  and (after labials)  $\bar{i}r$ ; e. g. from  $k\bar{r}$ - 'commemorate',  $k\bar{r}$ -th- 'fame';  $p\bar{r}$ - 'fill': $p\bar{n}r$ -th-, "reward'; as low grade of  $r\bar{a}$  in  $d\bar{r}gh$ -h- (long', beside  $dr\bar{a}gh$ - $\bar{t}yas$ - 'longer'. Cp. Wackernagel 1, 22.

<sup>9</sup> RPr. XIII. 14; APr. 1. 38.

<sup>10</sup> See above, 5, b 6.

<sup>12</sup> RPr. XIII. 14; VPr. IV. 145. 13 Cp. WACKERNAGEL I, 31.

languages. That they already had this character at the time of the Prātiśākhyas t and of Pāṇini's successors Kātyāyana² and Patañjali³, appears from the accounts given by those authorities, who at the same time recognize these two sounds to be in many instances the result of the euphonic combination (sandhi, Sandhi) of a+i and a+u respectively. This evidence is borne out by the reproduction of Indian words by the Greeks 4 and of Greek words by the Indians 5 from about 300 B. C. onwards.

a. These two sounds as a rule represent earlier diphthongs of which the second element was i or u respectively.  $\bar{u}$ . This is most evidently so when they are produced in Sandhi by the coalescence of  $\bar{u}$  with  $\bar{i}$  and  $\bar{u}$ . As the result of such a combination they are explicable only on the assumption of an earlier pronunciation of these sounds as the genuine diphthongs  $\check{a}i$  and  $\check{a}u$ . — 2. They are further based on prehistoric contractions within words in declension and conjugation; e. g. loc. sing. of áśva- 'horse': áśve (cp. nāv-i- 'in the ship'); nom acc. du. neut. of padá- 'step' : padé (cp. vácas-ī 'two words'); 3. sing. pot. mid. bháveta 'should become' (cp. ās-īta 'would sit'); maghón- weak stem (= magha-un) of maghávan- 'bountiful'; á-voc-at 3. sing. aor. of vac- 'speak' (= á-vauc-at)6. — 3. These two sounds also represent the high grade corresponding to the weak grade vowels i and u; e. g. sécati 'pours', beside sik-tá- 'poured'; bhoj-am, beside bhúj-am, aor. of bhuj- 'enjoy' 7.

b. 1. In a small number of words e 10 represents Indo-Iranian az (still preserved in the Avesta) before d dh and h (= dh): dehi 'give', and dhehi 'set' (Av. dazdi); e-dhi 'be', beside ás-ti; néd-tyas- 'very near', néd-istha- 'nearest' (Av. nazdyo, nazdišta-); medhā- 'insight' (Av. mazdā); miyédha- 'meat-juice' (Av. myazda-); vedhás- 'adorer' (Av. vazdanh-); sed-8 weak perf. of sad- 'sit' (Av. hazd- for Indo-Iranian sazd-)9. — 2. Similarly o 10 represents az in stems ending in as before the bh of case-endings, e.g. from dves-as-n. hatred', inst. pl. dveso-bhis; and before secondary suffixes beginning with y or v: anho-yú'distressing' (but apas-yú-'active'); duvo-yú- 'wishing to give' (beside duvas-yú-); sáho-van(AV.) 'mighty', beside sáhas-vant- (RV.). In derivatives of sás- 'six', and of vah- 'carry',
o represents az before d or dh, which it cerebralizes: só-dasa (VS.) 'sixteen'; so-dhā 'sixfold'; vô-dhum 'to carry'.

- 16. The diphthongs ai and au. These sounds are pronounced at the present day in India as diphthongs in which the first element is short. Even at the time of the Prātiśākhyas they had the value of  $\check{a}i$  and  $\check{a}u^{\text{II}}$ . But that they are the etymological representatives of  $\bar{a}i$  and  $\bar{a}u$  is shown by their becoming  $\bar{a}y$  and  $\bar{a}v$  respectively before vowels both in Sandhi<sup>12</sup> and within words; e. g. gáv-as 'kine', beside gáu-s 'cow' 13. That such was their original value is also indicated by the fact that in Sandhi a contracts with  $e^{14}$  to ai, and with o to  $au^{15}$ .
- 17. Lengthening of vowels.—1. Before n, vowels are lengthened only (except r in the gen. pl.) in the acc. pl. in  $-\bar{a}n$ ,  $-\bar{i}n$ ,  $-\bar{u}n$ ,  $-\bar{r}n^{16}$ , where the long vowel is doubtless pre-Indian 17.
- 2. Before suffixal y, i and u are phonetically lengthened: a) as finals of roots; e. g. kṣī-yate 'is destroyed' (V kṣi-); sū-yate 'is pressed' (V su-); srū-yās 'may he hear' (Vsru-); b) as finals of nouns in denominatives formed with -vá and their derivatives; e. g. janī-yánt- 'desiring a wife' (jáni-); valgū-

<sup>16</sup> For original a i u r + ns.

<sup>17</sup> As the s which caused the length by position had already for the most part dis-9 Cp. WACKERNAGEL I, 34 a.

10 These e and o are not distinguished in appeared in the Vedic language.

yáti 'treats kindly' (ralgh-); gātū-yáti 'desires free course' (gāth-; but also gātuváti) 1. The AV.2 has a few exceptions: arāti-yáti 'is hostile'; jani-yáti as well as  $jan\bar{\imath}-ya'ti^3$ ; c) i in the suffix  $-\bar{\imath}-ya$  and in the comparative suffix  $-\bar{\imath}yas$ .

- 3. Before r, if radical, i and u seem to be lengthened when a consonant follows; e. g. gīr-bhis beside gir-as (gir-'song of praise'); pīīr-sii beside piir-as (piir-'fort'), but  $\bar{\imath}r$  and  $\bar{\imath}r$  here represent IE.  $\bar{r}^{\dagger}$ . In a few instances this is extended by analogy to words in which the r is not radical: āśir 'blessing'  $(\bar{a}s's-)$ ; sajūr 'together'  $(\sqrt{jus-})^5$ .
- 4. Before v, the vowels a i u are lengthened: a) in some instances the augment:  $\bar{a}vidhyat$  'he wounded' ( $\sqrt{vyadh}$ -)6; b) once before the primary suffix  $-v\bar{a}ms$  of the perfect participle:  $jig\bar{\imath}-v\dot{a}ms$ - 'having conquered' (Vji-); c) often before the secondary suffixes -van, -vana, -vant, -vala, -vin; e. g. rtá-van- 'observing order'; kárṣṣ-vana- (AV.) 'ploughman'; yá-vant- 'how great'; śvásī-vant- (RV'.) 'snorting' (V śvas-); -krṣī-vala- 'ploughman'; dvayā-vin-'dishonest'; d) often before the second member of a compound; e. g. gūrtāz'asu- 'whose treasures are welcome'7.
- 5. Before IIr. z and z, when followed by one or more consonants, vowels are lengthened by way of compensation for the loss of the z or  $z^8$ ; a)  $\bar{a}$ (=az) in  $t\bar{a}dhi$  'hew' (Vtaks-);  $b\bar{a}dhd$ - 'firm' (Vbamh-);  $s\dot{a}dhr$ - 'conquering',  $\dot{a}$ - $s\bar{a}dha$ - 'invincible' ( $\sqrt{sah}$ -); b)  $\bar{\iota}=i\bar{\iota}$  in  $\bar{\iota}d$ - 'adore' ( $\sqrt{yaj}$ - 'sacrifice', or  $\sqrt{is}$ -'wish'); nīḍá- 'nest'; pīḍ- 'press'; mīḍhá- 'reward'; mīḍhvāms- 'bounteous';  $r\bar{t}dhd$ - 'licked' ( $\sqrt{rih}$ -);  $v\bar{t}dh$ - 'swift';  $s\bar{t}dati$  (= sizdati) 'sits';  $h\bar{t}d$ - 'be angry' (cp. hims- 'injure'). c)  $\bar{u} = u\bar{z}$  in  $\bar{u}dh\dot{a}$ - 'borne' ( $\sqrt{vah}$ -);  $g\bar{u}dh\dot{a}$ - 'concealed'  $(Vguh-)^9$ .
- 6. Vowels also appear lengthened under conditions other than those enumerated above (1-5).
- a. Final  $\alpha$  i u are very frequently lengthened in the Samhitas before a single consonant owing to rhythmical predilections; from this use the lengthening of the vowels is extended to syllables which are reduplicative or precede suffixes 10.
- b. For metrical reasons the length is in a few words shifted to another syllable. Thus didīhi often appears instead of the regular dīdihi; and in virā-ṣāṭ 'ruling men', virā-11 stands for vīra-. A similar explanation perhaps applies to carátha-'moving', beside carátha-; and máhīna- 'gladsome', beside máhina-.
- c. The long vowel beside the short in the same stem appears in some instances to be due to vowel gradation; as in tvát-pitūras (TS.) 'having thee as a father', beside pitaras; prthu-jāghana- 'broad-hipped', beside jaghana-

sometimes lengthened, but probably not verse'. phonetically; see below 6 d.

<sup>&</sup>lt;sup>2</sup> See Whitney on APr. III. 18.

<sup>3</sup> No lengthening takes place in the (Vric-), follows this analogy. optative present of verbs of the 5th or 8th class, e. g. śrnu-yāma (śru- 'hear'); nor in adverbs formed with ya from u-stems; e.g. āśu-yā 'swiftly'; amu-yā 'thus'.

<sup>4</sup> See above on  $\bar{r}$ , p. 8, note 8.

<sup>5</sup> Cp. WACKERNAGEL I, 23. When ir stands for suffixal -is, it remains unchanged; e. g. havirbhis 'with oblations' (hav-is-), krivir-dat-ī 'saw-toothed'; -ur, with genuine u, remains short in urvárā- 'field', urví- 'wide', urvivá 'widely' (uru- 'wide'), urv-ásī- 'desire', dur-

<sup>&</sup>lt;sup>1</sup> Before this -yá, the final of a-stems is | (for dus-) e. g. in dur-gá- 'hard to tra-

<sup>6</sup> The lengthening of the augment in āyunak, āyukta (Vyuj-) and āriņak, āraik

<sup>7</sup> The lengthening here probably started from that in Sandhi: cp. WACKERNAGEL.

<sup>8</sup> This appears to be the only kind of compensatory lengthening in the Vedic language. Cp. 17, 1.

<sup>9</sup> On e and o for az az, see above, 15, a, b, and cp. WACKERNAGEL I, 40.

<sup>10</sup> See Wackernagel I, 43.

<sup>11</sup> Metrical shortening of a long syllable

'hip'; anu-sák 'in continuous order', beside ánu-'along' as first member of a

compound.

d. The lengthening of the vowel in a certain number of instances appears to be due to analogy; thus the denominatives in  $-\bar{a}y\dot{a}$  beside  $-ay\dot{a}$  from a-stems (e. g. rtāyá- 'observe order', beside rtayá-)1, seem to follow the model of those in -īyáti and -ūváti, which would account for the fluctuation in quantity. Tikṣṇá- 'sharp' (beside tigmá-: tij- 'be sharp') and hálīkṣṇa- (TS.) beside haliksna- (VS.), a kind of animal, appear to owe their ī to the influence of desideratives which in several instances have  $\bar{\imath}$  (partly for older i) before  $k_{\bar{\imath}}$ . The reason for the  $\bar{u}$  in  $t\bar{u}sn\bar{t}m$  'silently' (tus- 'become quiet'), and in sūmná- (VS.), otherwise sumná- 'favour', is, however, obscure.

18. Loss of vowels.—Vowels are very rarely dropped in the language of the Samhitas. Medial loss is almost entirely restricted to the isolated disappearance of u before v and m. That vowel is dropped at the end of the first member of a compound in anvartiti (RV<sup>1</sup>.) 'wooer' (= anu-vartiti); anvartisye (AV.) 'I shall follow'3; cār-vadana- (AV. Paipp.) 'of lovely aspect' (= cāru-vadana-) and cār-vāc- (AV. Paipp.) 'speaking pleasantly'4. The only example of the loss of  $\vec{a}$  in this position seems to be til-pi $\vec{n}$ ja- (AV<sup>I</sup>.) a kind of plant, beside  $tila-pi\tilde{n}ji$ - (AV<sup>I</sup>.). The vowel u is further dropped before the m of the 1 pers. pl. pres. ending of the 5<sup>th</sup> (-nu-) class, when the u is preceded

by only one consonant, in krn-mahe and krn-masi (AV.)5 'we do'. Initial vowels also occasionally disappear. The only vowel that is lost with any frequency is  $\ddot{a}$ , which is dropped in Sandhi after e and o, according to the evidence of metre, in about one per cent of its occurrences in the RV. and about twenty per cent in the AV. and the metrical portions of the YV.6 In a few words its disappearance is prehistoric: in vi- 'bird'? (Lat. avi-), possibly in ni- 'in' (Greek  $\xi vi$ )<sup>8</sup>, in  $p\bar{i}d$ - 'press'<sup>9</sup>, bhi- $s\acute{a}j$ -<sup>10</sup> 'healer'.  $\bar{a}$  is lost in tmán-, beside  $\bar{a}$ -tmán-, but the reason has not been satisfactorily explained ii. In va 'like', beside iva, the loss of i is probably only apparent: cp.  $v\bar{x}$  'like' (Lat.  $v\bar{e}$  'or') 12. Initial u seems to be lost, if the reading is not corrupt, in śmasi (RV. 11. 316) beside uśmási 'we desire' (\(\nabla vaś-).

rg. Contraction. - Long vowels and diphthongs are often the result of contraction in Sandhi<sup>13</sup>. They have frequently a similar origin in the interior

of words 14.

a. Contractions of  $\alpha$  with a vowel or diphthong are the following:

1.  $\bar{a}$  often stands for a + a,  $\bar{a} + a$ , or  $a + \bar{a}$ ; e. g.  $\hat{a}j$ -at, augmented imperfect (=  $\dot{a}$ -aj-at);  $\dot{a}d$ -a, red. perf. (= a-ad-a);  $bh\dot{a}r\bar{a}ti$ , pres. subj. (=  $bh\dot{a}ra$ ati);  $ukth\dot{a}^{i5}$ , inst. sing. (=  $ukth\dot{a}$ -a);  $\dot{a}\dot{s}v\bar{a}s$  'mares', nom. pl. (=  $\dot{a}\dot{s}v\bar{a}$ -as);  $\dot{a}\dot{a}ti$ , aor. subj. (=  $d\bar{a}$ -ati);  $dev\bar{a}m$ , gen. pl. (=  $dev\hat{a}$ - $\bar{a}m$ ).

2. e stands for  $a + \overline{i}$  and  $\overline{a} + \overline{i}$ ; e. g. áśve, loc. sing. (= áśva-i); padé,

(at the end of a tristubh-line), without inter- BERG, ZDMG. 44, 321 ff. (Der Abhinihita change of quantity, appears in sirásu, loc. plur. of sīn-ā- 'stream'.

- <sup>11</sup> Op. cit. I, p. 61 (top).

  <sup>12</sup> Cp. op. cit. I, 53 c, note; ARNOLD,
- 13 See below 69, 70.

14 See above 15, a 2. 15 The original inst. ending -a under the influence of this contracted form became -a; nom. acc. du. neut. (= padá-ī); bháves, opt. pres. (= bháva-īs); yamé 'twin sisters', nom. acc. du. fem. (=  $yam\dot{a}-\bar{\imath}$ ).

3. o stands for a+u; e. g. ávocam, aor. of vac- 'speak' (=  $\acute{a}va$ -uc-am).

4. ai stands for  $\tilde{a} + e$  and, in augmented forms,  $a + \tilde{t}$ ; e. g. tdsmai 'to him', dat. sing. masc. (= tásma-e); devyái, dat. sing. fem. (= devyá-e); áicchat, 3. sing. impf.  $(= \acute{a}$ -icchat);  $\acute{a}$ irata, 3. pl. impf.  $(= \acute{a}$ - $\bar{\imath}$ rata) 'set in motion'.

5. au stands for  $a+\check{u}$  in augmented forms; e. g. ducchat, 3. sing. impf. of vas- 'shine' (=  $\dot{a}$ -ucchat); auhat, 3. sing. impf. of  $\bar{u}h$ - 'remove' (= a- $\bar{u}h$ -at).

b. Contractions of i with i or  $\bar{a}$  are the following:

I.  $\bar{\imath}$  stands for i+i in the nom. acc. pl. neut. of *i*-stems; e. g. tri 'three' (= tri-i).

2.  $\bar{z}$  stands for i+i in weak forms of the perfect, when the reduplicative vowel is immediately followed by i (either original or reduced from ya); e. g.  $\bar{\imath}_s$ -i'r (= i-is-i'r from is- 'speed');  $\bar{\imath}_j$ -é (= i-ij-e' from yaj- 'sacrifice').

3.  $\bar{\imath}$  stands for  $i + \bar{\alpha}$  in the inst. sing. fem. and the nom. acc. du. masc. fem. of stems in -i; e. g. mati (= mati- $\bar{a}$ ) 'by thought';  $p\dot{a}t\bar{t}$  'the two lords' (=  $p\dot{a}ti$ - $\bar{a}$ , cp.  $rtvij-\bar{a}$ ),  $siic-\bar{\iota}$ , du. fem. 'the two bright ones' (=  $siici-\bar{a}$ ).

4.  $\bar{\imath}$  stands for  $i+\bar{a}$  in compounds of dvi- 'two', ni 'down', práti 'against', with the low grade of dp- 'water':  $dv\bar{\imath}p$ -d- 'island';  $n\bar{\imath}p$ -d- 'low-lying' (K.) ';

pratīpám 'against the stream'?.

5.  $\bar{\imath}$  stands for  $i+\bar{\alpha}$  when reduplicative i is followed by the low grade form of a root beginning with  $\bar{a}: \dot{t}psa-ti$  (AV.), desiderative of  $\bar{a}p$ - 'obtain'  $(= i - i \rho - s \alpha -)^3$ . A similar contraction takes place when initial radical  $\alpha$  is long by position, in the ate 'sees' (cp. aks-i 'eye') and the avait 'swings' (cp. pariankháyāte 'may he embrace'). In źj-ate 'drives', beside áj-ati 'drives', the contraction to  $\bar{\imath}$  of  $i + \tilde{\alpha}$  is perhaps due to analogy<sup>4</sup>.

c. Contractions of u with u or  $\bar{a}$  are the following:

I.  $\bar{u}$  stands for u+u in weak forms of the perfect when the reduplicative vowel is immediately followed by u (either original or reduced from va); e. g.  $\bar{u}c$ -e, 3 sing. mid. (= u-uc-e) from uc- 'like';  $\bar{u}c$ -ur (= u-uc-ur) from vac-'speak'.

2.  $\bar{u}$  stands for  $u+\bar{a}$  in the compound formed with anu 'along' and the low grade of  $\alpha p$ - 'water':  $an \bar{u} p - \alpha^{-4}$  'pond'.

3.  $\bar{u}$  stands for  $u + \bar{a}$  in the nom. acc. du. masc. fem. of u-stems; e. g.  $b\bar{a}h\dot{u}$ 'the two arms' ( =  $b\bar{a}h\dot{u}-\bar{a}$ ).

4.  $\bar{u}$  seems to stand for u+i in the nom. acc. pl. neuter of u-stems; e. g.  $v\acute{a}s\vec{u}$  (=  $v\acute{a}su$ -i), from  $v\acute{a}su$ -igood'; but the vowel may possibly be lengthened by analogy<sup>5</sup>, for the Pada text always has  $\nu$ .

20. Hiatus.—a. In the written text of the Samhitas, hiatus is, as a rule, tolerated in diphthongs only, vowels being otherwise separated by consonants. It nevertheless appears:

**I.** in Sandhi, when a final s y or v has been dropped before a following vowel; when final  $\bar{\imath}$   $\bar{\imath}$  e of dual endings are followed by vowels; when aremains after final e and o; and in some other instances<sup>6</sup>;

2. in compounds, when the final s of the first member has disappeared before a vowel; e. g. áyo-agra- 'iron-pointed' (áyas- 'iron'); pura-etý- 'leader' (purás 'before'); and when, by a Prakritism, y is lost in prá-uga- 'fore-part of the shaft' (=  $pr\acute{a}$ -yuga-);

<sup>\*</sup> Cp. nip-ya- (VS.), 'lying at the bottom'.

<sup>4</sup> Cp. Wackernagel 1, 90 c, p. 104. <sup>2</sup> Cp. ánīka- and prátīka- 'face'. 5 That is, of the a and i stems; e. g. 3 Cp. Samprasāraņa ī and ū for yā and bhadra, trī. 6 See below, Sandhi 69-73.

3. in the simple word titaü-1 'sieve' (probably from tans- 'shake'), by a loss of s, due most likely to borrowing from an Iranian dialect (where medial s would have become h, which then disappeared).

b. 1. Though not written, hiatus is common elsewhere also in the Samhitas<sup>2</sup>. The evidence of metre shows that y and v must often be pronounced as i and u, and that a long vowel or a diphthong has frequently the value of two vowels. When the long vowel or diphthong is the result of contraction, the two original vowels must often be restored, within a word as well as in Sandhi. Thus pắnti 'they protect', may have to be read as  $p \mathring{a}$ -anti (=  $p \mathring{a}$ -anti)3,  $\tilde{a}\tilde{n}jan$  'they anointed' as  $\hat{a}$ -a $\tilde{n}jan$ ; jyestha- 'mightiest' as jya-istha- (= jya-isthafrom  $jy\bar{a}$ - 'be mighty'); áicchas as á-icchas 'thou didst wish'; aurnos as a- $\bar{u}$ rnos 'thou didst open'4.

2. Hiatus is further produced by distraction of long vowels 5 which, as the metre shows, are in the Rgveda often to be pronounced as two short vowels. This distraction was doubtless originally due partly to a slurred accentuation which practically divided a syllable into two halves, and partly to the resolution of etymological contraction. From such instances distraction spread to long vowels in which it was not historically justified. It appears most often in  $\bar{a}$ , especially in the gen. pl. in  $-\bar{a}m$ , also in the abl. sing. in  $-\bar{a}t$ , the nom. acc. pl. in  $-\bar{a}s$ ,  $-\bar{a}sas$  of a-stems, in the acc. sing. in  $-\bar{a}m$  of such words as abjām 'born in the water'; and in many individual words 6. Distraction is further found in the diphthongs of words in which it is not etymologically justified; as in the genitives vés 'of a bird', gús 'of a cow', in tredhá 'threefold', nêtr- 'leader', rêknas- 'property', śrêni- 'row'; and in other words7.

21. Svarabhakti. — When a consonant is in conjunction with r or a nasal, a very short vocalic sound tends to be developed between them, and the evidence of metre shows that a vowel must often be pronounced between them. It is the general view of the Prātiśākhyas<sup>8</sup> that when an r precedes another consonant a vowel is sounded after it; according to some of them this also takes place after I or even after any voiced consonant. They call it svarabhakti or 'vowel-part', which they describe as equal to 1/8, 1/4, or 1/2 mora in length and generally as equivalent to a or e (probably  $= \check{e}$ ) in sound.

a. The metre of the RV. shows that an additional syllable is frequently required in words in which r either precedes or follows another consonant; e. g. darśatá- 'worthy to be seen' (quadrisyllabic); indra-10, name of a god (very often trisyllabic); prá 'forth' (dissyllabic) 11.

<sup>1</sup> Cp. Wackernagel I, 37 b, note.

3 As a rule, one vowel (including e and o) is shortened before another: see OLDEN-

BERG, op. cit., 465 ff.; 447 ff. 4 WACKERNAGEL I, 46 b.

5 See Oldenberg, op. cit., 163 ff. (Vocale

mit zweisilbiger Geltung).

6 See Wackernagel I, 44. This is a very old phenomenon, as it is found in the Avesta in the gen. pl. and in other forms: OLDEN-

BERG 181; WACKERNAGEL I, p. 50.
7 WACKERNAGEL I, 46. This distraction of diphthongs is also pre-Vedic, parallels being found in the Avesta. Its use gradually decreases in the RV. and is lacking in the than loká- 'world', has not yet been satislater Samhitas, doubtless owing to the dis- factorily explained; cp. op. cit. 1, 52 d.

appearance of slurred accentuation: WACKER-NAGEL I, 47.

8 RPr. vi. 13f., VPr. iv. 16; TPr. XXI.

15f.; APr. I. 101ff.

9 The vowel which has to be restored in the gen.loc.du. termination -tros, which must always be read as a dissyllable, is not to be explained as Svarabhakti, since -taros is the original ending.

10 Cp. OLDENBERG, ZDMG. 60, 711-745 (Die Messung von indra, rudrá u. a.).

11 There seem to be a few instances of a Svarabhakti vowel being actually written: tarásantī, beside tras- 'tremble'; the secondary derivative śvaitárīm, beside śvitrá- (AV.) 'white'; púrusa- and púrusa- 'man', probably for \*pūrṣa- (WACKERNAGEL I, 51, cp. 52). The initial vowel of uloká-, which is commoner

<sup>&</sup>lt;sup>2</sup> See Oldenberg, Prolegomena 434ff.: 'Hiatus und Contraction'; ARNOLD, Vedic Metre, chapter IV, p. 70 ff. (Sandhi), chapter V, p. 81 ff. (Syllabic Restoration).

b. When a consonant is followed by  $\tilde{n}$ , n, or m, the same parasitic vowel often appears; e. g.  $yaj\vec{n}\vec{a}$ - (=  $yaj^an\vec{a}$ -) 'sacrifice';  $gn\vec{a}$ - (=  $g^an\vec{a}$ -) 'woman'. It is, however, here frequent only as representing the second syllable after the caesura in tristubh and jagatī verses; it rarely occurs at the beginning of such verses, and never at the end.

### VOWEL GRADATION.

## I. The Guna series: e o ar.

22. A. Low grade: i u r.—In the same root or stem the simple vowels i url are found to interchange with the respective high grade forms e o ar al3 called Guna ('secondary form'?) by the native grammarians, according to the conditions under which the formative elements are attached. Beside these appear, but much less frequently, the long grade forms ai au ār called Vrddhi ('increase') by the same authorities. The latter regarded the simple vowels as the fundamental grade, which, from the Indian point of view, these vowels often evidently represent: thus from urnavábhi- (SB.) 'spider', we have the derivative formation aurnavābhá-'sprung from a spider'+. Comparative grammar has, however, shown that in such forms we have only a secondary application of an old habit of gradation derived from the IE. period, and that Guna 5 represents the normal stage from which the low grade form, with reduced or altogether lacking vowel<sup>6</sup>, arose in less accented syllables. This theory alone can satisfactorily explain the parallel treatment of Guna gradation (e o ar beside i u r) and Samprasāraņa gradation (ya va ra beside i u r), as in dis-tá-, di-dés-a (dis-'point out') and is-tá-, iyáj-a (yaj-'sacrifice'). In other words, i u r can easily be explained as reduced forms of both Guna and Samprasāraņa syllables (as ending or beginning with i u r), while the divergent 'strengthening' of i u r, under the same conditions, to e o ar or ya va ra cannot be accounted for?.

The interchange of Guna and simple vowel is generally accompanied by a shift of accent: Guna appears in the syllable which bears the accent. but is replaced by the simple vowel when the accent is transferred to the following syllable. This shows itself most clearly in inflexional forms; e. g. é-mi 'I go', but i-más 'we go'; āp-nó-mi (AV.) 'I obtain', but āp-nu-más 'we obtain'; várdhāya, but vrdhāya 'to further'. Hence it is highly probable that change of accent was the cause of the gradation8.

a. Long grade or Vrddhi: ai, au, ar. Vrddhi is far more restricted in use than Guna, and as it nearly always appears where Guna is to be expected, it may be regarded as a lengthened variety of it9 dating back to the IE. period.

<sup>2</sup> This interchange was already noticed NAGEL I, 55 b. by Yāska; see Nirukta x. 17.

5 Both a and a represent the Guna or 9 Dehnstufe'; cp. WACKERNAGEL I, 61.

<sup>3</sup> The only root in which the gradation al: l is found is klp-, cp. 14. It is employed in word-formation much in the same way as in verbal and nominal inflexion.

<sup>4</sup> See below a, 3 and cp. 25 B2; WACKER-NAGEL I, 55, p. 62, note (top).

r See Oldenberg, Prolegomena, 374, normal stage in the gradation of the avowels in many roots: see 24; WACKER-

<sup>&</sup>lt;sup>6</sup> The vowel sometimes disappears in the low grade of the a-series ('Schwundstufe') see 24.

<sup>7</sup> Cp. WACKERNAGEL I, 55.

<sup>8</sup> Occasional exceptions, such as vika-'wolf', are capable of explanation: cp. WACKERNAGEL I, 57.

It is to be found 1) in strong forms of a few monosyllabic substantives. in the nom. sing. of sákhi- 'friend' and of stems in -r. and in the loc. sing. of stems in i and u: su-hard-'good-hearted' (from hrd-'heart'), dydu-s 'heaven' (from dyil-), gáu-s 'cow' (from gó-); sákhā¹, pitá²; agná³ (from agn!- 'fire'), aktáu (from aktú- 'night'); 2) before the primary nominal suffixes -a, -i, -ti, -tna, -man, -vana; e. g.  $sp\bar{x}rh$ - $\dot{a}$ - 'desirable' ( $\sqrt{sprh}$ -);  $\hbar \dot{x}rd$ -i- 'heart' (from  $\hbar \dot{r}d$ -); kārs-i-(VS.) 'drawing' (Vkrs-); śráus-tī 'obedient' (Vśrus-); cyau-tnú-'stimulating' (Vcyu-); bharman- 'board' (Vbhr-); kars-ī-vana- (AV.) 'ploughman'; 3) in secondary nominal derivation, generally to form patronymics or adjectives expressive of connexion or relation; e.g. gairiksitá-'descended from giri-ksít': auśijá- 'son of Uś/j'; śrautrá- 'relating to the ear' (śrótra-); hairanyá- 'golden' (hiranya-'gold'); 4) in the singular pres, of a few verbs of the second class and in the active s-agrist of roots ending in yowels: ksnau-mi 'I sharpen'  $(\sqrt{ksnu}); m\bar{\alpha}rs-i^{5}$  'he wipes'  $(\sqrt{mri}); \nu\dot{\alpha}u-mi$  (AV.) 'I unite'  $(\sqrt{vu}); a-iai-sam$ 'I have conquered' (Vii-); váu-s, 2 sing. 'ward off' (Vyu-); a-bhār-sam 'I have borne' (1/bhr-).

B. Low grade:  $\bar{l}$   $\bar{u}$   $\bar{l}r$ .—The same Guna and Vrddhi forms as a rule correspond to these long vowels as to their short forms i u r. Thus bhī-'fear': bi- $bh\acute{a}y$ -a and bi- $bh\bar{a}y$ -a;  $h\bar{u}$ - 'call': ju- $h\acute{a}v$ -a;  $t\bar{r}$ - 'cross': ta- $t\bar{a}r$ -a, beside tir-dte and -tīr-na- (just like śri- 'resort': śi-śrāy-a; śru- 'hear': śu-śrāy-a; kr- 'do': ca-ka-a-a. Before consonants the roots  $pr\bar{\imath}$ - 'love',  $z\bar{\imath}$ - 'desire',  $z\bar{\imath}$ -'impel', st-'lie', nt-'lead', bht-'fear', have Guna forms in e, the last two also Vṛddhi forms in ai; but roots in  $\bar{u}$  and  $\bar{r}$  have  $avi^6$  and ari as Guṇa,  $\bar{a}vi$ and āri as Vrddhi, respectively; e. g. pū- 'purify', aor. pavi-sta and apāvisur;  $k\bar{r}$ - 'scatter', aor, subj.  $k\bar{a}ri$ -sat'.

a. z and z instead of Guna. In a few verbs and some other words  $\overline{\iota}$  and  $\overline{\iota}$  are the old weak grade yowels (almost invariably medial) of e and o. the length of which has been preserved by the accent shifting to them (while when not thus protected they have been shortened to i and i, and which as thus accented, sometimes appear instead of the Guna vowels. Thus  $\bar{\imath}$  is found in ris-ant- 'injuring' (= \*rīs-ant-), beside resa-, the low grade form of the radical syllable otherwise becoming ris-8. Similary ghhati 'hides' appears beside góh-a- 'hiding-place', the root being also shortened in guh-yate, etc.; dūs-dyati 'spoils', beside dos-a- and dosas- (AV.) 'evening', also dis-ti- (AV.) 'destruction'; thati 'removes', beside oh-a- 'gift'; nti 'now', nti-tana- 'new', nū-nám 'now', beside náva- 'new', also nú 'now' (never at the beginning of a sentence); mús- 'mouse', beside mosatha 'ye rob', also musitá- 'stolen'; yúpa-'post', beside yuyópa 'has infringed', also yupitá- (AV.) 'smoothed'; stú-pa- 'tuft', beside sto-ká- 'drop', also stu-pá- (VS.) 'tuft'9.

b. In a few roots ending in  $v^{10}$ , the radical vowel  $\bar{\iota}$  represents the low

vá is probably to be explained similarly in feminines like kadrū-s (TS. B.) 'brown' (masc. kádru-m, TS. B.); shortened to u in voc., e. g. bábhru; cp. WACKERNAGEL I, 82.

To That is, the original form would have been in- or in- according as a vowel or a consonant followed.

With loss of the final element, which however, remains in datives like tasmai, probably because the diphthong was here pronounced with a slurred accent: cp. WACKERNAGEL I, 93.

<sup>&</sup>lt;sup>2</sup> With loss of r, the preceding vowel having compensatory IE. lengthening (cp. WACKERNAGEL I, 61 c). In a few instances, the Vrddhi of the nom. sing. spread to other cases (cp. 25 B b 1); e. g. tar-as, nom. pl., from old nom. sing. \*st ir (beside str-bhis).

<sup>3</sup> Also agnáu, like the u-stems.

<sup>4</sup> See below 191.

<sup>5</sup> From the present the ar spread to other forms, e. g. perf. mamārja (AV.).

<sup>6</sup> They have o in the intensive reduplication only; e. g. sosii-: Vsii-.

<sup>7</sup> Cp. WACKERNAGEL I, 76.
8 The accentuation of  $\bar{i}$ , the low grade of yā, is probably to be explained similarly in feminines like napti-s (masc. nápāt-); shortened to *nápti* in voc.; cp. 19 b 3 and 29. 9 The accentuation of  $\bar{n}$ , the low grade of

grade, but early began to supplant e; thus from dīv- 'play', beside didéva (AV.), dév-ana- 'game of dice', occur div-yati, dīv-é and dīv-l dat. and loc. of div-'game of dice'; from srīv- 'fail', beside śreváyant-, srīvayati (AV.); but from mīv-'push', only mīv-ati etc.; from sīv-'sew', only sīv-yati etc. It is a peculiarity of these roots that  $\bar{\imath}v$  appears before vowels and y only, becoming  $y\bar{\imath}\bar{\imath}$  or  $\bar{\imath}\bar{\imath}$ before other consonants; thus dyū-tá- (AV.) 'play'; -mū-ta- 'impelled', mū-rá-'dull', mū-tra- (AV. VS.) 'urine'; syū-tá- 'fastened', sū-ct- 'needle', sū-tra- (AV.) 'thread': srá- 'lead ball' 1.

## II. The Samprasarana 2 series.

#### a. Gradation of ya va ra.

23. Low grade: i u r<sup>3</sup>.—In place of the accented syllables ya va ra (corresponding to the Guna vowels e o ar) appear the low grade vowels i u r4 when the accent shifts to the following syllable in some fourteen roots, viz. yaj- 'sacrifice', vyac- 'extend', vyadh- 'pierce', vac- 'speak', vad-'speak', vap- 'strew', vas- 'be eager', vas- 'dwell', vas- 'shine', vah- 'carry'; svap- 'sleep', grabh- and grah- 'seize', pracch- (properly pras-) 'ask', vrasc- 'hew'; e. g. is-tá-: yás-tave; uś-mási: váṣ-ṭi; suṣup-vāṃs-: suṣvápa.

a. Besides these, a good many other roots, in occasional verbal forms or nominal derivatives, show the same gradation in the radical syllable.

**1.** i appears in mimiksúr: mimyáksa perf. of V myaks-; vithúra- 'wavering',

vithuryáti 'wavers', beside vyáth-ate 'wavers'.

- 2. u in ilksant- 'growing': vaváksa 'has grown'; sus-ant-: svas-iti 'breathes'; ju-hur-as: hvár-ati 'is crooked'; ur-ú- 'broad': comp. vár-Tyas-, superl. vár-iṣṭha-; dur-: dvar- 'door'; dhun-i- 'resounding': dhvan-i- (AV.) 'sound'.
- 3. r in krpate 'laments': aor. akrapista; grnatti (AV.): grath-itá- 'tied'; -śrth-ita-: śrath-nāti 'becomes loose'; rj-ú- 'straight': ráj-iṣtha- 'straightest'; rbh-ú-'adroit': rábh-ate 'grasps'; drh-ya 'be firm' (impv.): drah-yát 'firmly'; prth-ú-'broad': práth-ati 'spreads out'; bhṛm-á- 'error': bhram-á- 'whirling flame'; á-ni-bhrṣ-ṭa- 'undefeated': bhraś-at aor., bhraṣ-ṭá- (AV.) 'fallen'; mrd-ú- 'soft': mrada 'soften' (impv.), 'irna-mradas- 'soft as wool'; sýk-van-: srák-va- 'corner of the mouth'.
- b. This gradation also appears in the stems of a few nouns and in certain nominal suffixes: dyú-bhis: dyáv-i loc., dyáu-s nom. 'heaven'; śún-: śvá-, śván-'dog'; yin- (= yii-un-): yiva-, yivān- 'youth'; catir-: catvār- 'four'; the superlative and comparative suffixes -is-tha and -yas; the perf. part. suffix -us: -vat, -vāins 5.

## b. Gradation of ya va ra.

24. Low grade:  $\bar{l}$   $\bar{u}$   $\bar{l}r$ .—Corresponding to the reduction of the short syllables ya va ra to the short vowels i u r, the long syllables  $y\bar{a}$   $v\bar{a}$   $r\bar{a}$ appear as  $\bar{\imath}$   $\bar{\imath}\bar{\imath}$  (= IE.  $\bar{r}$ ).

ever, doubtful. Cp. WACKERNAGEL I, SI.

<sup>2</sup> In the terminology of the native grammarians Samprasāraņa ('distraction') designates the change of the semi-vowel only to the corresponding vowel (but see also Panini VI. 1, 108). Here we use the word to express Cp. PEDERSEN, IF. 2, 323, note. the reduction of the entire syllables va va ra to the corresponding vowels i u r.

3 Though r seems invariably to have resulted from the reduction of Guna or cp. also Nirukta II. 2 and Mahabhasya I, II2. Samprasāraņa syllables, there is no reason | 5 See WACKERNAGEL I, 63.

<sup>1</sup> The etymology of this word is, how- to suppose that every i and u has a similar origin. On the contrary, it is more likely that IE. i and u have been preserved by the side of the reduced vowels and that the Guna grade has in many instances been subsequently added to original i and u.

4 This reduction goes back to the IE. pretonic syncope of ĕ ŏ: cp. WACKERNAGEL I, 62 (p. 69, mid.). — On the two forms of the roots

- a.  $\bar{\imath}$  is found thus both in radical and suffixal syllables: 1. in  $j\bar{\imath}$ -tá-(AV.) jī-yáte (AV.) and ji-yate: -jyá- 'might', jyá-yas- 'stronger', ji-jyā-sant- 'desiring to overcome'; 2. in the fem. suffix -ī: kan-ī-nām (for kanī-nām) from kan-yā-'girl'; in nom. acc., e. g. devi, devim, devis, beside  $-y\bar{a}$ - in dat. abl. gen. loc. sing.  $devy\acute{a}i$  (=  $devy\acute{a}-e$ ),  $devy\acute{a}s$  (=  $devy\acute{a}-as$ ),  $devy\acute{a}m$  (=  $devy\acute{a}-am$ ); 3. in the optative, either before or after the accented syllable, beside -yā-; e. g. bruv-ī-tá and  $bh\acute{a}ret \ (=bh\acute{a}ra-\bar{\imath}-t)$ , but  $i-v\acute{a}-t$ .
- b.  $\overline{u}$  is found: r. in forms of  $s\overline{u}d$  'put in order' (= 'make palatable'), e. g. sú-sūd-ati, sūd-áyati, sam-sūd-á- (TS.) 'gum', beside forms and derivatives of svād-'enjoy', 'taste', e. g. svāda-te, svāttá-, svād-i/- 'sweet'; 2. in fem. nouns in -ū beside -vā in dat. abl. gen. loc. sing.; e. g. śναśτά- 'mother-in-law', dat. śvaśr-vái (AV., = śvaśr-vá-e), gen. śvaśr-vás (AV., = śvaśr-vá-as), loc.  $\dot{s}va\dot{s}r-v\dot{a}m \ (=\dot{s}va\dot{s}r-v\dot{a}-am).$
- c.  $\bar{\imath}r (= \bar{r})$  is found in  $d\bar{\imath}rgh$ - $\dot{a}$  'long', beside  $dr\dot{a}gh$ - $\bar{\imath}yas$  'longer',  $dr\dot{a}gh$ istha- 'longest', drāgh-mán- 'length'.

## III. The a-series.

#### a. Gradation of $\alpha$ .

- 25. A. Low grade:  $\alpha$  or  $\neg$ . Many roots and formatives have  $\alpha$  in the Guna or normal stage. The reduction of r from ar or ra indicates that in low grade syllables this  $\alpha$  would normally disappear. As a rule, however, it remains, doubtless because its loss would in most cases have led to unpronounceable or obscure forms2. At the same time, the syncope takes place in a considerable number of instances:
- I. in verbal forms: ad-'eat': d-ánt- (= old pres. part.) 'tooth'; as-'be': s-ánti, s-yát, s-ánt-, beside ás-ti 'is'; gam- 'go': ja-gm-úr; ghas- 'eat': a-kṣ-an, 3. pl. impf., g-dha (= ghs-ta), 3. sing. impf. mid.,  $ja-ks-\bar{\imath}yat$ , perf. opt., beside ghas-a-t'may he eat'; pat-'fall': pa-pt-ima, pa-pt-ier, pa-pt-ivitius-, perf., a-pa-pt-at, aor., beside pát-anti; pad-'go': pí-bd-a-māna-, red. pres. part., pi-bd-aná-'standing firm', beside pád-yate 'goes'; bhas- 'chew': ba-ps-ati, 3 pl. pres., bd-ps-at-, pres. part., beside bhás-a-t 'may he chew'; sac- 'follow': sá-śc-ati, 3. pl. red. pres., sa-śc-ata, 3. pl. impf. mid., sa-śc-iré, 3. pl. perf. mid., beside sac-ante 'they accompany'; sad-'sit': std-ati (= si-zd-ati), 3. sing. pres., sed-ur (= sa-zd-ur), 3. pl. perf., beside *d-sad-at* 'he sat'; han-strike': ghn-ánti, 3. pl. pres., beside hán-ti 3. sing.
- 2. in nominal derivatives: ghas- 'eat': a-g-dhād- (TS.) 'eating what is uneaten' (= a-ghs-ta-ad-), sá-g-dhi (VS.) 'joint meal' (= sa-ghs-ti-); bhas-'chew': á-ps-u- 'foodless'; pad- 'walk': upa-bd-á-, upa-bd-í- 'noise' (lit. 'tread');  $tur-\dot{t}ya$ - 'fourth' (= \*ktur- $\dot{t}ya$ -) :  $cat\dot{u}r$ - 'four';  $napt-\dot{t}$ - 'granddaughter' :  $n\dot{\alpha}p\bar{a}t$ -'grandson'.
- 3. in suffixes: -s- for -as- in bhī-ṣ-ā, inst. sing.: bhiy-ás-ā 'through fear';  $\dot{sir}$ - $\dot{s}$ - $\dot{ir}$ - $\dot{s}$ - $\dot{ir}$ -as- 'head'; -s for -as in the abl. gen. sing. ending of stems in  $i \ u \ o$ : e. g. agné-s, vísno-s, gú-s.
- **B.** Long grade:  $\bar{a}$ .—The Vrddhi corresponding to the a which represents the Guna stage is  $\bar{a}$ . It appears:
  - a. in the root:
  - I. in primary nominal derivation: thus  $p\bar{a}d$  'foot': pad-, bd- 'walk';  $r\bar{a}j$ -

<sup>&</sup>lt;sup>1</sup> See Wackernagel 1, 70. When a is followed by n or m, the  $|n\dot{a}-man-|$ , inst. pl.  $n\dot{a}ma-bhis$ . The a in such syllables an and am, if preceded by a con- low grade syllables is generally regarded as sonant, usually lose the nasal before mutes; historically representing the sonant nasal n: e. g. han- strike': ha-thás 2. du. pres.; gam- cp. WACKERNAGEL I, 66.

<sup>&#</sup>x27;go': ga-tá-; dyu-mánt-, inst. sing. dyu-mát-ā;

'king': raj-, rj- 'direct'; vác- 'voice': vac-, uc- 'speak'; kṣās, nom., kṣām, acc., 'earth': ksam-, ksm-;  $n\dot{a}bh$ - 'well':  $n\dot{a}bh$ -as, abh-ra- (abh- = nbh-) 'cloud'. Also before primary suffixes: ap-as 'work'; vas-as 'garment': vas-, us-'wear'; vāh-as 'offering': vah-, uh- 'convey'; vās-tu 'abode': vas-, us- 'dwell'. Perhaps also pāth-as 'place': path- 'path' '.

2. in secondary nominal derivation; e. g. kānvá- 'descended from Kanva';

 $v\bar{a}pus-\dot{a}$ - 'marvellous' :  $v\acute{a}p$ -us- 'marvel'.

- 3. in the active of the s-aorist: thus a-cchānt-s-ur: chand-, chad- (= chnd-)'appear';  $a-y\bar{a}m-s-am$ , 1. sing.: yam-, ya- (= ym-) 'stretch';  $s\bar{a}k-s-\bar{a}ma$ , also mid.  $s\bar{a}k$ -s-i,  $s\bar{a}k$ -s-ate: sah- 'overcome'<sup>2</sup>.
  - b. in the suffix of nominal stems:
- r. in the nom. sing. masc. of stems in -mant and -vant, and throughout the strong cases of stems in -an, of mahát-'great', and of nápāt- 'grandson': thus dyu-mán 'brilliant': dyu-mánt-, dyu-mát- (= -mnt-); re-ván 'rich': re-vánt-,  $re-vát-(=vnt-)^3$ ;  $rij-\bar{a}$ , acc.  $rij-\bar{a}n-am$  'king': rij-an-,  $rij-\bar{a}-$ , rij-a- (=  $r\bar{a}j-n-$ ); mah-ān, acc. mah-ānt-am; nápāt, acc. nápāt-am.
- 2. in the nom. acc. pl. neuter of stems in -an and -as and of one in -ant; thus nāmā 4 'names': nāman, nāma- (= nāmp-); mānāms-i 'minds': mān-as: sānt-i: s-ánt- 'being'.
- c. in  $\bar{a}nu$  as first member of a compound in  $\bar{a}nu$ - $s\dot{a}k$  and  $\bar{a}n\bar{u}k\dot{a}m$ 'continuously': otherwise anu-.

#### b. Gradation of $\bar{a}$ .

26. Low grade: i.— The vowel  $\bar{a}$  is not always the long grade vowel: in a number of roots it represents Guna. The low grade of this a is normally i; it sometimes, however, appears as  $\bar{\imath}$ , owing to analogy<sup>5</sup>, and, especially with a secondary accent, as a. Thus sthi-ta-: stha-s 'thou hast stood'; dhi-tá-: dá-dhā-ti 'places'; pu-nī-hi: pu-nā-ti, from pū-'purify'; gáh-ana-'depth', gáh-vara- (AV.) 'hiding-place' : gáh-ate 'plunges'.

a. The low grade vowel disappears: I. in roots ending in  $\bar{a}$  before vowel terminations; in the weak forms of the reduplicated present base of dā- 'give' and dhā- 'put', before all terminations;' and in the weak form of the suffix -nā- in the ninth class before vowel terminations; thus in the perf. of dā-: dad-áthur, dad-atur; dad-á, dad-úr; dad-é; in the pres. of dhā-: dadhmási; beside pu-ná-ti 'he purifies', pu-n-ánti 'they purify'. Similarly from hā-

'forsake' occurs, in the opt. pres., the form  $jah-y\bar{a}t$  (AV.).

2. in the final member of compounds formed with the perf. part. passive of  $d\bar{a}$ - 'give', and  $d\bar{a}$ - 'cut', or with a substantive in -ti- from  $d\bar{a}$ - 'give': devá-tta-, a name ('given by the gods'); áva-tta- (VS.) 'cut off'; párī-tta- (VS.) 'given up'; á-pratī-tta- (AV.) 'not given back'; bhága-tti- 'gift of fortune'; maghá-tti- 'gift of presents'; vásu-tti- 'gift of wealth' (beside vásu-dhiti- 'bestowal of wealth':  $dh\bar{z}$ -). Also in agni-dh-6 'fire-placer', a kind of priest7.

<sup>2</sup> Op. cit. I, 72 b δ (p. 80).

from gai- 'sing', pres. gav-ati; cp. 27 a.

6 Cp. agm-dhana- 'fire-place'; in VS.

(from idh- 'kindle').

<sup>&</sup>lt;sup>1</sup> Cp. Aufrecht, BB. 14, 33; Wacker-NAGEL I, 72 (p. 79, bottom).

<sup>3</sup> The long vowel in these nominatives is to be accounted for by IE. compensatory lengthening (-mān = mant-s, etc.); in the agnidh- appears instead, as if 'fire-kindler' following examples it has spread from the nominative to other cases.

ably feminine singular collectives: cp. BRUG- in the final member of compounds, see MANN, KG. 481; WACKERNAGEL I, 73 and 95. WACKERNAGEL I, p. 82 (mid.).

<sup>5</sup> That is, under the influence of  $\bar{i}$  as low grade of ai which before consonants . appears as  $\bar{a}$ , as in  $g\bar{i}$ - $t\acute{a}$ - beside  $g\bar{a}$ - $th\acute{a}$ -,

<sup>7</sup> For a few other examples (which are 4 Such neuter plurals were in origin prob- doubtful) of the loss of the low grade vowel

#### IV. The ai and au series.

### a. Gradation of ai.

- 27. Low grade: i.—As the final of roots and in suffixes i is graded with ai (as with  $y\bar{a}^{T}$ ), which appears as  $\bar{a}y$ - before vowels and as  $\bar{a}$ - before consonants2. The roots in which this gradation is found are stated by the Indian grammarians in five different forms. They are:
- a. I. roots given with -ai (because their present base appears as  $-\bar{\alpha}y$ - $\alpha$ ): gai- 'sing' : gī-tá-, gī-yá-māna-, beside gấy-ati 'sings', -gấy-as 'song', and gā-s-i, 1. sing. aor. mid., gā-thá- 'song'; pyai- 'swell' : pī-nά-, beside pyάy-ate; śrai- 'boil':  $\dot{s}r\bar{\imath}-\dot{n}\dot{a}-ti$ ,  $\dot{s}r\bar{\imath}-t\dot{a}-$ , beside  $\dot{s}r\dot{a}y-ati$ ,  $\dot{s}r\bar{a}-t\dot{a}-$ . — 2. with  $-\bar{a}y-$ :  $c\bar{a}y-$  'observe':  $cik\bar{\imath}-hi$ (AV.), beside cάγ-amāna-, cāγ-ú- 'respectful'.— 3. with -e-: dhe- 'suck': dhī-tá-, beside dhāy-as 'drink', dhāy-ú- 'thirsty', and dhā-tave 'to suck', dhā-rú- (AV.) 'sucking'.—4. with -ā-: pā- 'drink' : pī-tá-, pī-tí- 'drink', beside pāy-áyati, caus.,  $p\bar{a}y$ -ána- 'causing to drink', and á- $p\bar{a}$ -t, aor.,  $p\dot{a}$ -tave;  $r\bar{a}$ - 'give': ra- $r\bar{i}$ -th $\bar{a}s$ , 2. sing. injv., beside  $r\bar{\alpha}y-\hat{\alpha}$  'with wealth', and  $r\hat{\alpha}$ -sva, impv.,  $r\hat{\alpha}$ -m, acc. — 5. with  $-\bar{z}$ -:  $n\bar{\imath}$ - 'lead':  $n\bar{\imath}$ -tá-, beside  $n\bar{a}y$ -á- 'leader', and  $-n\bar{\imath}$ -thá- (AV.) 'help';  $p\bar{\imath}$ - 'revile': pt-yati, pt-ya-tnu- and pt-y-u- 'reviler', beside pty-u- (VS.) 'anus'; prt- 'love': prī-nā-ti, prī-tā-, beside prāy-as-e3; sī-4 'lie'; -si-van- 'lying', beside a-sāy-ata, 3. sing. 5
- b. This gradation also occurs in the final of dissyllabic bases: thus grabhī-sta, a-grabhī-t, grbhī-tá-, beside grbhāy-áti 'seizes'6; and in the base of the ninth class: grbhnī-ta, 2. pl., beside grbhnā-ti.
- c. It is also found in the suffixes -ethe -ete and -ethām -etām of the 2. 3. du. mid. of the  $\alpha$ -conjugation, which can only be explained as containing Tthe Tte and Ttham Ttam, with weak grade T corresponding to the accented a of athe ate and atham atam of the non-thematic conjugation (and parallel to the  $-\bar{z}$ - of the optative beside  $-y\bar{a}$ - $\bar{\gamma}$ ).

#### b. Gradation of au.

28. Low grade:  $\bar{u}$ .—As the final of roots  $\bar{u}$  is graded with au (parallel with  $v\bar{\alpha}^8$ ), much in the same way as  $\bar{z}$  with  $\alpha i$ , appearing as  $\bar{\alpha}v$  before vowels.  $\bar{a}$  before consonants<sup>9</sup>; but the certain examples are few. Thus  $dh\bar{u}$ - $n\hat{\jmath}$ -ti'shakes', dh'ī-ti- 'shaker', dhū-má- 'smoke', beside dhīv-ati 'runs', dhī-rā-'stream'; dhū-tá- 'washed', beside dhāv-ati 'washes'. But here au appears before consonants as well as  $\bar{a}$ ; thus dhau-tárī- 'shaking', beside dhū- 'shake'; and dhau-ti- 'spring', dhau-ta- (SV.), beside dhav-ati 'washes'. Similarly ga-m

3 Occurs RV. IV. 217 (Pp. prá áyase (and is explained by Böhtlingk (pw.) as = práyase. 6 Cp. WACKERNAGEL 1, 79 b (p. 89).

7 Op. cit. 1, 79 c (p. 89).

8 See above 24 b.

I See above 24.

forms like á-jai-s-ma, from ji- 'conquer'.

<sup>4</sup> Perhaps also in sī-'fall': sīyate (AV.), beside sātá-yati 'cuts off', which may be a denominative from \*sā-tá- 'fallen'. Cp. of aṣtáu 'eight' normally appears as āv before

missile', beside say-aka. It is, perhaps, due WACKERNAGEL 1, 94, 95.

to this e that ay- sometimes appears instead <sup>2</sup> ai appears only in the s-aor., as nai-s-ta, of ay- in some of the above verbs; as 2. pl., nī- 'lead', owing to the analogy of práy-as- 'enjoyment', from \pri-; ray-i- 'wealth', from Vrā-; say-e, 3. sing., from sī- 'lie'.

<sup>9</sup> Similarly in the RV. the -au of duals and denominative from \*sā-ta- 'tallen'. Cp. of aṣṭāu 'eight' normally appears as āv before WHITNEY, Roots, under Vsat- and VI sī-; vowels and ā before consonants in Sandhi. The nominatives in ā of -r stems and -an stems, e. g. mātā, śvā 'dog', are probably instead of ā before consonants; e. g. ct-ru- due originally to the loss of the final r and 'devout', beside rāy-án-; dhe-nú- 'milch cow', becoming the regular form everywhere. dhe-nā- id.; st-ra- (thief', beside stāy-tu-, conversely aṣṭāu has become the only inbeside nāy-án-; ste-nā- 'thief', beside stāy-tu-, conversely aṣṭāu has become the only inbeside nāy-án- (AV.) 'furtive'; st-nā- only as first member of a compound. Cp. WACKENNAGEL I. 94. 05.

and  $g(\bar{a}-s)$ , acc., beside  $g(\bar{a}v-as)$ , nom. pl., but  $g(\bar{a}u-s)$ , nom. sing., 'cow'; and  $dy(\bar{a}-m)$ , acc. sing., beside dyáv-as, nom. pl., but dyáu-s, nom. sing., 'heaven'.

## V. Secondary shortening of $\bar{i}$ $\bar{u}$ $\hat{r}$ .

29. Low grade: i u r.— Owing to the shift of the accent from its normal position in a word to its beginning, the low grade vowels  $\bar{\imath} \ \bar{\imath} \ \bar{\imath}$ are often further shortened to i u r in compounds and reduplicated forms. A pre-tonic syllable thus acquires a post-tonic position, where the force of the accent is weakest. It is the same cause which shortens final weak grade ī and  $\bar{u}$  in the vocative singular; e. g. dévi, nom. devī; śváśru, nom. śvaśrús. This shortening often appears in:

## a. compounds<sup>2</sup>:

- I. those in which the final member is derived with -ta- and -ti-, the accent being regularly thrown back on the first member3: thus á-ni-śi-ta-'restless', ni-si-tā- (TS. B.) 'night', from sī 'lie'; prā-si-ti- 'onset', beside sāy-aka-'missile'4; sú-su-ti- 'easy birth', beside súti-kā- (AV.) 'lying-in woman'; á-str-ta-'unconquered', á-ni-str-ta- 'not overthrown', beside stīr-ná-, from str- 'strew'; i-huti- 'invocation', otherwise -hū-ti- in sá-hūti- 'joint invocation', devá-hūti-'invocation of the gods', and other compounds.
- 2. those in which the final member is a root in  $\bar{z}^6$  or  $\bar{z}$  with or without the suffix -t; e. g. dhī-jil- 'thought inspiring', beside jil- 'hastening', jū-tá- 'impelled'; very often -bhu-, beside bhū-, as in á-pra-bhu- 'powerless', vi-bhú- 'mighty'; ni-yú-t- 'team', beside yū- 'unite' (as in yū-thá- 'herd').
- 3. those in which the final member is formed with other suffixes; thus madhyán-di-na- 'midday', su-di-na- 'bright', beside dī- 'shine'; su-su-mánt-'very stimulating', beside sū-tú- 'impelled'; also in tuzi-gr-á- and tuzi-gr-í-'much devouring', beside sam-gir-á- (AV.) 'devouring', as r here  $= r^7$ .
- 4. some Bahuvrīhis (in which the first member is normally accented) 8; thus brhád-ri-9 'possessing much wealth' (rái-); try-udh-án- 'having three udders', beside údh-an- 'udder'.
- b. reduplicated forms 10 in which accentuation of the reduplicative syllable, especially in the third class and one form of the aorist, counteracts the normal accent of the verb; thus from dī- 'shine', are formed dī-di-hi, 2. sing.impv.,  $d\bar{\imath}$ -di- $v\bar{a}$  ins-, perf. part.,  $d\hat{\imath}$ -di-vi- 'shining', beside  $d\bar{\imath}$ -paya- (causative)

because the phonetically shortened vowel in later texts. has found its way into accented final have remained unchanged, even when the I, 83 b. accent has shifted, because of the influence of the uncompounded word; e. g. sú-sūta-'wellbegotten', prá-sūta- 'impelled'; ä-kūti- 'intention'; rtá-dhīti- 'truly adored'; prá-tūrti-'onset'.

<sup>3</sup> That this is the cause of the shortening is shown by the fact that the ī of the inst. sing. of derivatives in -ti appears as i only when such words are compounded: e. g. frá-yukti 'with the team'. Cp. WACKERNAGEL 1, 84.

<sup>4</sup> Cp. 27, note 5.

<sup>5</sup> The secondarily shortened form of the <sup>2</sup> The application of this shortening pro- past part. str-ta- is not found as an incess becomes obscured, on the one hand dependent word in the RV.; it first appears

<sup>&</sup>lt;sup>6</sup> An example of the shortening of  $\bar{i}$  is members of compounds as being character- perhaps adhi-kṣi-t- 'ruler', kṣī- being according istic of the end of a compound; while, on the to J. SCHMIDT, Pluralbildung 419, the original other hand,  $\bar{\imath} \, \bar{u} \, \bar{v} \, \bar{u} r \, (=\bar{r})$  for the most part weak form of the root; cp. WACKERNAGEL

<sup>7</sup> Cp. Kretschmer, KZ. 31, 397; Wacker-NAGEL I, 83 c.

<sup>8</sup> See accentuation of compounds, 90. 9 Occurring only in the dat. sing. brhadraye, beside ray-é, dat. of rái- 'wealth'.

<sup>10</sup> On the shortening of the radical syllable in some verbs of the fifth and the ninth classes, ji-nó-si, beside ji-rá- 'lively', du-no-ti 'burns', beside dū-ná- (AV.); ju-nā-ti 'impels', beside jū-tá-; pu-nā-ti 'purifies', beside pū-tá-, see Wackernagel I, 85, note (bottom).

'kindle'; from dhī- 'think', dī-dhi-ma, 1. pl. perf., dī-dhi-ti- 'devotion', beside dhī-ti- 'thought'; from kr- 'commemorate', cár-kr-se, intv., car-kr-ti- 'praise', beside kīr-tl-'praise'; from pṛ- fill', pi-pṛ-tām, 3. du., beside pūr-ṇā- and pūr-tā-. Such shortening often occurs in red. aor., e. g. bī-bhiṣ-a-thās, 2. sing. mid., beside vi-bhis-ana- 'terrifying'. It is also found in a few nouns; e. g. śi-śi-ra-(AV.) 'coolness', beside sī-tá- 'cold'; tū-tu-má- beside tū-ya- 'strong' r.

#### The Consonants.

30. Doubling of consonants. — All consonants, except r h l, Anusvāra, and Visarjanīya, can be doubled, and the distinction between double and single consonants is known to the Prātiśākhyas as well as to Pāṇini. Aspirates are, however, nearly always written double by giving the first in the unaspirated form. A double consonant2 is pronounced by the organs of speech dwelling longer on it than on the single sound. Within words 3 a double consonant appears:

r. as the result of the contact of the same consonants or the assimilation 4 of different ones; e. g. cit-tá- 'perceived' (= cit-ta-); uc-cá- 'high' (= ud-ca-);

bhet-tr-'breaker' (= bhed-tr-);  $\dot{a}$ n-na-'food' (= ad-na-).

2. in a few onomatopoetic words: akhkhalī-kŕtyā 'shouting'; cicciká- a kind of bird; kukkutá- (VS.) 'cock'; tittíri- (VS.) and tittiri- (TS. B.) 'quail'; pippakā-(VS.) a kind of bird.

- 3. in the case of the palatal aspirate, which regularly appears as cch between vowels (though often written as ch in the Mss.), for it always makes the preceding vowel long by position and is derived from an original conjunct consonants. Some forms of khid- 'press down', are doubled after a vowel in the TS. (akkhidat, á-kkhidra-; ā-kkhidaté, pari-kkhidaté). In the TS.6 bh appears doubled in pári bbhuja. In a school of the White Yajurveda initial v was regularly doubled?.
- 4. when final n is doubled after a short vowel if followed by any vowel sound 8.
- a. In the Mss., when double consonants are preceded or followed by another consonant9, one of them is frequently dropped, because in such consonantal groups there was no difference in pronunciation between single and double consonants. Hence the VPr. (VI. 27) prescribes a single t in kşattrá-'dominion' (= kṣad-tra-), and in sattrá-'sacrificial session' (= sad-tra-). Such shortening is further presupposed by the analysis of the Pada texts in hr(d)-dyotáh (AV. I. 22<sup>1</sup>) and '. (1-1) (AV. V. 20<sup>12</sup>) as hr-dyotáh and hr-dyotah,; in td(d)dyām (AV. IV. 19<sup>6</sup>) as (1-1) (1 suggestion is right 10. In some instances this reduction is IE., as in satrá- (IE. setlo-)11.

6 See TPr. xiv. 8.

 $i \ u \ r \ \text{and} \ \vec{i} \ \vec{u} \ \vec{r} \ \text{in some other words see}$ WACKERNAGEL I, 86.

<sup>&</sup>lt;sup>2</sup> Sometimes a single s represents the double sound, as in ási 'thou art' (= as-si); apásu (RV. VIII. 414), loc. pl. of apás- 'active'; amhasu (AV.), loc. pl. of amhas- 'distress'; jó-si 'thou shalt taste' (jus-); probably also in ghó-si (from ghus- 'sound'), in us-ás, gen. sing., acc. pl. of us-, weak stem of us-as- 'dawn' (for \*uss-as), possibly in usr- 'dawn' (for \*uss-r-). As the single s in such forms is shown by cognate languages also, it seems here to be pre-Vedic, and the double ss in forms like rájas-su, loc. pl., is probably an Indian innovation. The change of ss to ks,

<sup>&</sup>lt;sup>1</sup> On variations in cognate forms between as in a vikṣat (AV.) = \*dviṣ-ṣat, aor. of dviṣ-'hate', is also an Indian innovation. 3 On double consonants in Sandhi, see

<sup>4</sup> The evidence of the Avestan form vərəākashows that the double consonant in zykká-(AV. VS.) 'kidney' is due to assimilation.

<sup>5</sup> See below 40; WACKERNAGEL I, 133.

<sup>7</sup> See Weber, Abh. d. Berliner Ak. d. Wiss. 1871, p. 83 f.

<sup>8</sup> See below 46; cp. WACKERNAGEL I, 279 a.

<sup>9</sup> Cp. ROTH in ZDMG. 48, 102 f. 10 See his Lexicon, s. v. upástha-. 11 See WACKERNAGEL I, 98 b, note.

#### Mutes.

31. Modes of articulation. There are 20 mutes (or 22 counting 1 lh among the cerebrals), which comprise a tenuis, an aspirate tenuis, a media, and an aspirate media in each of the five groups of gutturals, palatals, cerebrals, dentals, and labials (4). These four modes of articulation are initially and medially liable to but little variation except when they come into contact with other mutes or with following sibilants.

I. The tenues regularly represent IE. tenues; e. g. cakrá- 'wheel', Gk. .

κύκλο-ς; pitr- 'father', Gk. πατήρ, Lat. pater.

- 2. The mediae regularly represent IE. mediae; e. g. gácchati, Gk. βάσκει; rāj- 'king', Lat. rēg-; mád-ati 'is drunk', Lat. mad-et. There are a few instances in which a media appears in place of an older tenuis: gulphá- (AV.): kulphá- 'ancle'; árbhaga- 'youthful': arbhaká- 'little'; túj-: túc-, toká- 'offspring'; án-ava-prgna- 'undivided': prc- 'mix'; giriká- (MS.): kiriká- (VS.) a kind of demon. These examples may be due to popular dialects, in which tenues largely became mediae<sup>2</sup>. In a few derivatives the media g appears instead of k before the n m v of suffixes owing to the influence of Sandhi: e.g. vag-nil-'sound', from vac- 'speak', but rék-nas- 'wealth', from ric-; sag-má- 'helpful', from sak-, but ruk-má- 'gold', from ruc- 'shine'; vāg-vín- (AV.) 'eloquent', from  $v\acute{a}k$  'speech', but tak- $v\acute{a}$ - 'swift', from tak- 'hasten'.
- 3. The evidence of cognate languages shows that the Vedic aspirate tenuis in a large number of instances is original, and it is highly probable that it is the regular representative of IE. aspirate tenuis. The following are examples in which mutes of this character are inherited3:

a. khan- 'dig'; khā- 'spring'; khād-ati 'chews'; nakhā- 'nail'; makhā- 'lively'; mikha- 'mouth'; sankhá- (AV.) 'shell'; sákhi- 'companion'.

b. ch = IE. skh, e.g. in chid-'split'; = IE. sk in inchoative gácchati 'goes', uccháti 'shines'.

**c.** th = th in sas-thá- (VS. AV.) 'sixth'; sthīv-ati (AV.) 'spits'.

d. th4 in átha 'then'; atharí- 'tip'; átharvan- 'fire-priest'; ártha- 'use'; granth- 'knot'; path- 'way'; prth-u- 'broad'; práth-as 'breadth'; próthat- 'snorting'; math-'stir'; mith-'alternate'; yá-thā 'as'; rátha-'car'; vyathate 'wavers'; śnath-'pierce'. Further in the various suffixes -tha: forming primary nouns; e.g. uk-thá- 'praise', gā-thá- f. gā-thá- 'song'; as -atha in śvas-átha- 'hissing'; forming ordinals: catur-thá- (AV.) 'fourth'; saptá-tha- 'seventh'; forming 2. sing. perf.: dadā-tha 'thou gavest', vét-tha 'thou knowest'; forming 2. pl. pres.: bhavatha 'ye are'; also in -thās of 2. sing. mid., e. g. a-sthi-thās 'thou hast stood'.

e. ph in phála- 'fruit'; phála- 'ploughshare'; sphar- and sphur- 'jerk';

 $sph\bar{a}(y)$ - 'grow fat'.

- 4. The aspirate media, which represents the same IE. sound, is a media combined with  $\lambda$ . This is proved by the express statements of the Prātiśākhyas; by the fact that lh = dh is written with the separate letters l and h; and by the change of h following a media to an aspirate media (as tád dhí for tád hí).
- a. In two or three words an aspirate media interchanges with an aspirate tenuis: nādhamāna- 'praying', nādhitá- 'distressed', beside nāthitá- 'distressed' (where th is probably due to the influence of -nathá- 'help'); ádha and átha 'then' 6; nişangádhi- (VS.) and nisangáthi- (TS.) 'scabbard'.

5 RPr. xIII. 2. 5; TPr. II. 9.

ZUBATY in KZ. 31, 1-9.

4 A complete list of Vedic and Sanskrit

I For some doubtful instances of media sprachliche tenuis aspirata dentalis im arirepresenting IE. tenuis, see WACKERNAGEL schen, griechischen und lateinischen' by I, 100 b, p. 117, note. <sup>2</sup> l. c. 3 Op. cit. 101.

<sup>6</sup> There seem to have been a few IE. words containing th in his article 'Die ur- doublets of this kind: see WACKERNAGELI, 103.

32. Loss of aspiration. — Aspiration is lost when there is another aspirate in the same syllable or at the beginning of the next in roots. Hence

a. initial aspiration is lost: 1. in the reduplicative syllable: e. g. jaghán-a (han-, ghan- 'strike'); ca-cchand-a (chand- 'please'); da-dhá-ti (dhā- 'put'); par-phar-at (phar-'scatter'?). But when the reduplication consists of two syllables, the rule does not apply; e. g. gháni-ghan-at, intv. part. of han-(beside ján-ghn-at), ghan ī-ghan-á- 'fond of striking'; bhári-bhr-at, intv. part. of bhr- 'bear'. Loss of aspiration, however, began, even in the RV.2, to spread from monosyllabic to dissyllabic reduplication; thus a-pánī-phan-at, intv. part. of phan- 'bound'. - 2. in the following words, according to the evidence of cognate languages: kumbhá- 'pot' 3; gadh- 'attach'; gábhas-ti- 'arm'; guh- 'conceal'; grdh- 'be greedy'; grhá- 'house'; grabh- 'seize'; jámhas 'gait'; jánghā- 'leg'; jaghána- 'buttock'; dabh- 'harm'; dah- 'burn'; dih- 'besmear'; duh- 'milk'; duhiti- 'daughter'; drahyát 'strongly'; druh- 'injure'; bandh- 'bind'; babhri- 'brown'; badh- 'distress'; bahi- 'arm'; budh- 'awake'; budhná- 'bottom'; brh- 'be great'. It is probable also in dagh- 'reach': banh- 'be firm'; badhirá-'deaf'; bahú-, bahulá- 'much'; bradhná- 'pale red'; bráhman- 'devotion'.

b. Final aspiration is often lost<sup>4</sup>. I. When this occurs before suffixal s, orignal initial aspiration is lost in some cases; thus from guh- 'hide', desid. 3. du. ju-guk-sa-tas; grdh- 'be eager': grtsú- 'dexterous'; dabh- 'harm': desid. dip-sa-ti, dip-sil- 'intending to hurt'; dah- 'burn': impv. dak-si, aor. part. dáksat-, ddksu- and daksus- 'flaming'; duh- 'milk': aor. a-duksat, duksás, etc., des. part. dúdukṣan5; bhas- 'chew': bap-sati, part. báps-at-; ghas- 'eat' : jak-ṣīyát, perf. opt.;

has- 'laugh': part. jákṣ-at-; also in the word drap-sá- 'drop'6.

But in some of the above and in analogous forms with s, the original initial aspirate remains; thus from guh-, aor. aghukṣat; dah-: dhakṣi, part. dháksat-, fut. part. dhaksyán; duh-: aor. ádhuksat, dhuksán, etc. 2. impv. dhuk-sva; bādh- 'distress': bī-bhat-sú- 'loathing'; budh- 'awake': aor. á-bhut-s-i.

- 2. When the loss of final radical aspiration is due to any other cause than suffixal s, the original initial aspirate regularly remains; thus from dah-, aor. a-dhāk; budh- 'waken': nom. -bhut 'waking'; dhā- 'put': dhat', 3. sing., dhat-thas, d-dhat-tam, etc.; and in the latter verb always before s also: dhat-se, dhat-sva, desid. dhit-sati.
- c. On the other hand, there is no loss of aspiration in the root if an aspirate follows which belongs to a suffix or second member of a compound; e. g. vibhil-bhis 'with the Vibhus'; proth-atha- 'snorting'; dhéstha- 'giving most' (dhā-istha-); ahi-hán- 'serpent-slaying'; garbha-dhi- 'breeding-place'. The only exceptions 8 are the two imperatives bo-dhi 'be' (for \*bho-dhi 9 instead of \*bhudhi) and ja-hi (for \*jha-hi) from han- 'strike' 10.

<sup>2</sup> Later this became the rule.

4 This may also be the case in the roots bhuj-'bend', chid-'split', chad-'cover', dhraj-

'sweep': op. cit I, 105 b, note.

7 For dhadh-t.

Except when the second aspirate belongs to a suffix or second member of a compound, see below c.

also in sākhā- 'branch', and in the roots stigh- 'mount', and stambh- 'make firm'. Cp. WACKERNAGEL I, 105 a.

<sup>6</sup> IE. dhrebh- 'coagulate'.

<sup>8</sup> Forms like bud-dha- for budh-ta can hardly be regarded as exceptions since 3 Initial aspiration has perhaps been lost the aspiration is assumed by the suffix instead of reappearing in the initial of the root.

<sup>9</sup> Here bho- is a Prakritic contraction for bhava-.

<sup>10</sup> Also vidátha- 'feast', if correctly derived from vidh- 'worship'; on this word see MAX 5 These forms from dah- and duh- almost MULLER, SBE. 32, 350; Foy, KZ. 34, always appear in the Pada text with dh, 226; BLOOMFIELD, JAOS. 19, 2, 12 ff.; doubtless because from the time of the GELDNER, ZDMG. 52, 730-61; WACKER-Brāhmaṇas this initial aspiration had become the rule; cp. Benfey, GGA. 1873, p. 18f. ples might be exceptions: garda-bhá- 'ass'

d. There are a few cognate words in which an aspirate is found beside the corresponding media or tenuis: máj-man- 'greatness': máh- 'great'; vispulinga-ká- 'scattering sparks': sphur-áti 'darts'.

e. In a few isolated words a media seems, according to the evidence of cognate languages, to stand for an IE. aspirate: gmå- 'earth', gen. gmás; imá- 'earth', gen. jmás, inst. jmá; dvár-, dur-2 'door'; majján- marrow'.

33. Aspirates in contact with other mutes. — Of two mutes in juxtaposition (of which both must be voiced or both voiceless3), the second only can be aspirated. In such case either

- I. the second represents an original aspirate, the first an aspirate or not: e. g. dhat-thás = \*dhadh-thás (dhā- 'put'); ran(d)-dhi = \*randh-dhi (randh-'make subject'), uk-thá- 'song' = uk-thá- (vac- 'speak'); vét-tha = \*véd-tha (vid- 'know'); s'ag-dhi 'help' = \*s'ak-dhi (s'ak- 'be strong'); or
- 2. the first represents an aspirate media<sup>4</sup>, the second a dental tenuis<sup>5</sup> which assumes the mode of articulation of the first; e. g. dág-dhr- 'one who burns' (acc.) = \*ddgh-tr-(dah-'burn'); -vid-dha-'pierced' = \*vidh-ta-(vyadh-); -lab-dha- 'taken' = \*labh-ta- (labh-). An intervening sibilant (z = s) did not prevent the same result: jag-dhá-, jag-dhváya, jag-dhvá (AV.), a-g-dha (TS.) from ghas- 'eat', gdh representing gzdh- for gzh-t- from gh(a)s-t-.

a. When the first is h representing an old palatal aspirate  $(=zh, \text{IE. } \hat{g}h)^6$ , it disappears after cerebralizing the dental and lengthening the preceding vowel;

e. g.  $\bar{u}dh\dot{a}$ - = \*uz- $dh\dot{a}$ - for uzh- $t\dot{a}$ - from vah- $t\dot{a}$ -7.

b. In a few instances the t does not become dh owing to the influence of cognate forms: thus dhaktam (instead of \*dagdham = \*dhagh-tám) according to 2. 3. sing. dhak (= \*dhagh-t) from dagh- 'reach'; dhat-tám etc. (instead of \*dad-dham for \*dhadh-tam) according to 3. sing. dhat (= \*dhadh-t), 2. sing. mid.  $dh\acute{a}t$ -se, etc. (= \* $dh\acute{a}dh$ -se) 8.

#### The Five Classes of Mutes.

34. The gutturals. — These mutes, by the Indian phoneticians called kanthya ('produced from the throat'), are minutely described in the Prātiśākhyas as formed at the 'root of the tongue' (jihvā-mūla) and at the 'root of the jaw' (hanu-mūla)9. They are therefore yelar10 sounds and, as the evidence

(if from grdh- 'be greedy'), bárjaha- 'udder' (if from brh-'be great'), sabar-dúgha-, sabardhú-, sabar-dhúk, epithet of cows (if sabar-= Gk. αφαρ: BARTHOLOMAE, BB. 15, 18): cp. WACKERNAGEL I, 108, note, 217b; ZDMG. 43, 667 f.; 46, 292 (bárjaha-).

<sup>1</sup> A few doubtful examples discussed by (= \*dadh-thás). WACKERNAGEL I, p. 129 bottom.

<sup>2</sup> Op. cit. 1, 109, note (mid.); according to BLOOMFIELD, Album Kern, p. 193 f., the media is due to the influence of the numeral dva- 'two'.

3 This was often due to assimilation, the mode of the articulation of the second generally prevailing; e.g. át-ti = \*ad-ti (ad-'eat'); vét-tha = \*véd-tha; sag-dhí = \*sakdhi; the articulation of the first prevails in 33, 2.

4 An aspirate tenuis loses its aspiration 1, 113. in these circumstances; thus grnatti (AV.) for \*grnath-ti, if this form is derived from

grath- 'tie'.

- 5 There seems to be no example of any other tenuis in contact with a preceding aspirate media within a word, but the result would probably have been the same. There is no example of th becoming voiced in this combination; it remains in dhat-thás
- 6 See below 58. 7 According to this rule us-tra- buffalo', could not be derived from vah- 'carry' (as in that case it would have become \$\bar{u}dhra-\$):

cp. WACKERNAGEL I, III b, note.

8 Before sibilants, all aspirates as well as mediae become tenues; but according to TPr. xiv. 12, APr. II. 6 (cp. RPr. vi. 15) a tenuis in such a position may be pronounced as an aspirate; see WACKERNAGEL

9 See APr. 1. 20 and WHITNEY's note. 10 That is, pronounced with the velum or

soft palate.

of cognate languages shows, derived from IE. velars. Gutturals are found interchanging to some extent with sounds of the four other classes.

- r. Under certain conditions they interchange with the new palatals (c j h) which are derived from them<sup>2</sup>; with the old palatal s'<sup>3</sup> (also old j and h) only when followed by s (which then becomes s)4. Between this ks = s'-sand ks = k-s it is possible to distinguish by the aid of Iranian, where the two are represented by different sounds 5; and the original value of the & can thus be determined even in words in which no form without the sibilant This evidence shows that, in the following words, ks represents.
- a. ś-s: ákṣi-'eye'; rkṣa-'bear'; kákṣa-'armpit'; kukṣi- 'belly'; kṣi-'dwell'; kṣidh- 'hunger'; cakṣ- 'see'; takṣ- 'fashion'; dákṣiṇa- 'right'; pákṣman- (VS.) 'eyelash'; makṣtī 'quickly'; rakṣ- (AV.) 'injure'; rákṣ-as- 'injury';

b. k-s: kṣatrā- 'dominion'; kṣāp- 'night'; kṣi- 'rule'; kṣip- 'throw'; kṣīrā-'milk'; kṣud- 'shake', kṣód-as- 'rush of water', kṣudrá- 'small' (VS.), n. 'minute

particle'; ksúbh- 'swift motion'; tvaks- 'be strong'; vṛkṣá- 'tree'.

- 2. In a few instances k stands for a medial t: in vrkkáu (AV.) 'kidneys', for \*vrtkáu<sup>7</sup>; prksú (SV.) = prtsú 'in battles'. In these two forms the substitution is due to Prakritic influence; this is probably also the case in skambhbeside stambh- 'prop'8. The guttural only seems to stand for a dental in ásiknī- beside ásita- 'black', páliknī- beside palitá- 'grey', and háriknikā- (AV.) beside hárita- 'yellow', as there is no etymological connexion between -knīand -ta-9.
- 3. In a few words a guttural interchanges with a labial medially: kakárdu- beside kaparda- 'braid of hair'; kulikā (VS.): pulikā (MS.) a kind of bird; kulīkáya- (TS.): pulīkáya- (MS.), kulīpáya- (VS.): purīkáya 10 (AV.) a kind of aquatic animal; nicunkuná- (TS.): nicumpuná- 'flood'; and in the TS. (B.) tristilgbhis and anustilgbhyas occur beside tristilb-bhis and anustilbbhyas 11.
- 4. In a few verbal forms from three roots k stands for s before suffixal  $s^{12}$ , though this & never made its way into the loc. pl. (where only -s-su- or -½-su, -t-su occur). The only example in the RV. is pinak (for pinak-s) 2. sing. impf. of pinas-ti (pis- 'crush'). In the AV. occur dvik-s-at, dvik-s-ata, aorof dvis- 'hate'; sisliksate, -sisliksu-, desid. of slis- 'embrace'. Other possible examples from the RV. are -rkṣará- 'thorn' (if from rs- 'prick'); ririkṣa-ti and ririksil-, desid. (if from ris- 'injure'); viveksi (if from vis- 'work') 13.
- 35. The palatals.—These are pronounced in India at the present day as a close combination of a t-sound followed by a palatal spirant s. The evidence of the Greek reproduction of Indian words 14 points in the same

5 That is, s-s by s and k-s by ks; thus vaksi, from vas- = vaši; vaksyā-mi, from vak- (for vac-) =  $vah \dot{s} y \bar{a}$ .

That is, the q-sounds; some, however, are derived from IE. labio-velars or  $q_{\mu}^{u}$ -sounds; see Brugmann, KG. I, 244 and 254; WACKERNAGEL I, 115.

<sup>&</sup>lt;sup>2</sup> See Brugmann, op. cit. 244.

<sup>3</sup> Op. cit. 233. 4 See below 56.

<sup>6</sup> The two components of ks cannot yet have coalesced when s dropped out between two mutes in abhakta, for abhak-s-ta (aor. of bhaj-), and atasta for atak-s-ta- from taks-(Av. taš-) 'fashion'; otherwise the two different original sounds could not have been kept apart in these two forms.

<sup>7</sup> See above 30, note 4.

<sup>8</sup> Cp. WACKERNAGEL I, p. 136, note (top). 9 Cp. J. SCHMIDT, Pluralbildung 398.

<sup>&</sup>lt;sup>10</sup> See ZDMG. 33, 193. <sup>11</sup> See Weber, IS. 8, 40. 54; 13, 109.

<sup>12</sup> This probably started from the parallelism of the 3. sing. of roots in s and s: thus dves-ti from Vdvis-, and vas-ti from Vvas-; then the 2. sing. dvek-si for dves-si, followed

<sup>13</sup> The relation of the k in dadhrk 'firmly', to dadhrsá-, dadhrs-váni- 'bold', is uncertain. Cp. WACKERNAGEL I, 118, note (end).

<sup>14</sup> Thus τζάνδανον = candana- 'sandalwood'; Τιαστάνης = castana-, Ν.; Παζάλαι = pañcāla-, N. of a people; Σανδρόκυπτο; = candragupta-, N.; 'Octivn = ujjayini- (Prakrit

direction. It is therefore likely that they were thus pronounced in Vedic times I. Prosodically, however, they have the value of a single consonant (excepting ch<sup>2</sup>). They date from the Indo-Iranian period only; but in order to understand their place in the Vedic language, especially in relation to the gutturals, we must go back to their ultimate origin. The evidence of comparative grammar shows that two distinct series of palatals, the later and the earlier, must be distinguished. This evidence alone can explain how the same Vedic palatal sound (j or h) is, under certain conditions, treated differently.

36. The new palatals (c, i, h) are derived from gutturals (velars), being interchangeable, in most roots and formatives, with gutturals, and being in most cognate languages represented by the same sounds as represent original gutturals. Thus from the root suc- 'shine' come verbal forms such as socati, beside the nominal derivatives śóka-, śúkvan-, śukrá-, śuklá- (AV.); from yuj-'yoke', yuje 1. sing. mid., etc., beside yugá-, yíga-, yuktá-, yúgvan-; from druh-'injure', dudroha, 3. sing. perf., etc., beside druhyú-, a name, and drógha-

'deceitful'.

The (Indo-Iranian) change from gutturals to palatals was regularly produced before the palatal sounds i v y3; e. g. cittá- 'noticed', beside kéta-'will', from cit- 'perceive'; 'ojīyas- 'stronger', beside ugrá- 'strong'; druhyúbeside drigha. This change invariably takes place in Iranian, while the exceptions in Vedic appear only before vowels which were not originally

palatal.

a. Gutturals thus appear instead of palatals before ir(il) and  $\bar{i}r$ (= IE. rr- and  $\vec{r}$ )+, which were not yet pronounced with an *i*-sound in the Indo-Iranian period<sup>5</sup>: thus *ángiras*-, a name; *girí-*<sup>6</sup> 'mountain'; *kiráti*, 3. sing., kirána- 'dust', from kr- 'scatter'; carkirāma, carkiran, kīrti- 'fame', from kr-'commemorate'; g/r- 'lauding', from gr- 'praise'; giráti (ÁV.), 3. sing., -gila- (ÁV.) 'devouring', from  $g\hat{r}$ - 'swallow'. Before i (= IE.  $\partial$ ) k appears in ok-i-vams-, part. from uc- 'be pleased', and g in tigitá-8 'sharp', beside tejate, téjas-'brilliance', and other derivatives, from tij- 'be sharp'.

Otherwise a guttural followed by a palatal vowel is due to the influence

of cognate forms. This is the case

I. in the initial of roots  $\alpha$ ) in  $g\bar{\imath}$ , the weak stem of gai: 'sing', beside  $g\bar{a}y$ -,  $g\bar{a}$ -;  $\beta$ ) in reduplicated forms with cik-, jig-, due to forms like  $cik\dot{a}ya$ , jigáya- (where the guttural is in accordance with phonetic law) and to the frequency of palatal reduplication of guttural initial; thus perf. ciky-ur, part. cíky-at-, desid. cikīsate, impv. cikīhi (AV.), from ci- 'perceive'; intv. cékit-; cikit-, desid. cikits-, from cit- 'perceive'; perf. jigy-ur, desid. jigīsate, jigyú- 'victorious',

<sup>1</sup> Cp. WHITNEY on APr. 1. 21.

ujjenī), N. of a city;  $\Delta$ ιαμούνα = yamunā-, | I, 121 (p. 140, top). The palatal aspirate N. of a river. Cp. WACKERNAGEL I, 119.

<sup>&</sup>lt;sup>2</sup> Cp. above 30, 3; 31, 3 b; and below 40. <sup>3</sup> The sphere of the palatals has been extended by analogy at the expense of the gutturals and vice versa. The aspirate guttural kh appears where the other gutturals are replaced by palatals; thus before the y in a pure palatal in IIr. khyā- 'see' (but jyā-) 'overpower'; before and notably in sákhi- 'friend': dat. sákhye, (duh- 'milk'). pl. sákhibyas (IIr. sachi-): cp. WACKERNAGEL

in fact never represents a guttural aspirate, but only an IE. palatal, or sibilant and palatal.

<sup>4</sup> Cp. WACKERNAGEL I, 24. 25.

<sup>5</sup> Cp. WACKERNAGEL I, 123 a α.

<sup>6</sup> In Av. gairi-.

<sup>7</sup> This sound had probably not yet become

<sup>8</sup> Otherwise the palatal regularly appears the thematic a of the present: rikhati before this i in perfect forms; e. g. saścirć 'sits' (but dahati); before the -ayati of the (sac- 'accompany'); bhejiré (bhaj- 'divide'); Causative: īnkhayati 'swings' (but arcáyati); uvócitha, ūcise (uc- 'be pleased'); dudóhitha

from ji- 'conquer'; γ) in the pronominal forms kis, kim, kīm, kiyat, kīvant-, kīdr's'-, beside the enclitic cid, because owing to the influence of the frequent forms kd-s, kd-d, etc., k appeared to be characteristic of the interrogative pronoun 1.

2. in the final of roots in which guttural forms predominate, before the y of the optative and the gerund; thus dagh-yās, from dagh- 'reach'; śak-yām, from śak- 'be able'; sagh-yāsam (TS.), from sagh- 'be equal to'. It also appears very often before the suffixes -i, -ī, -in, -ya forming derivatives from nouns the last consonant of which is a guttural: e. g. playogi- 'descendant of Playoga'; vṛk-i- 'she-wolf' (vṛka-); śāk-in- 'powerful' (śāká-); śṛig-in- 'horned' (śṛṅga-); upa-vāk-yà- 'to be praised' (beside upavācya-) from upavāká- 'praise'. Similarly dragh-īyas- 'longer', dragh-iṣṭha- 'longest' (beside dīrghá- 'long', drāgh-mán- 'length'); sphig-i- 'buttock', with g from the nom. sphik of sphij-, which occurs in the post-Vedic language only.

3. in a certain number of abnormal words, almost invariably at the beginning:

- a) words which may be suspected of foreign origin owing to meaning or phonetic form: kiṃśuká-, kiyāmbu- plant names; kimīdin-, ktkata-, kirāta-(VS.), śva-kişkin- (AV.) names of foreigners or demons; kija- a kind of utensil; kilbiṣa- 'guilt' (contains the rare letter b), kīstá- 'singer' (st instead of st);  $\beta$ ) onomatopoetic words:  $kikid\bar{t}vl$ - 'blue jay';  $kikir\dot{a}-kr$ - 'tear to tatters'; kikkiţû (TS.) an interjection;  $\gamma$ ) some words of doubtful origin: kikasā-'vertebra'; kīnāra- 'ploughman' (?); kīnāśa- 'ploughman'; kīlāla- 'sweet draught'; kirmirá- (VS.) 'variegated'; kiśorá- (AV.) 'foal'; kīśmīla- (AV. Paipp.) a kind of disease.
- 37. New palatals as radical initials.—a. Before a,  $\bar{a}$ , and diphthongs, both palatals and gutturals are very frequent in Vedic and Iranian. Comparative grammar shows that the palatals occur before a vowel or diphthong representing IE.  $\check{e}$   $\check{e}$  or a diphthong beginning with  $\check{e}$   $\check{e}^2$ ; but gutturals before IE. α o or sonant nasal. According to this evidence the palatal has come into being in the following words: ca 'and'; cakrá- 'wheel'; catváras 'four'; caramá- 'last'; carú- 'pot'; cáru- 'agreeable'; páñca 'five'; jaṭhára- 'belly'; jánī-, -jāni- 'woman'; jāmi- 'akin'; háras- 'flame'.

On the other hand, the original guttural has remained in kakiid-'peak'; kákṣa- 'armpit'; kārú- 'poet'; kéta- 'will'; gáus 'cow'; gharmá- 'hot'; ghorá-'terrible'; and in the roots kās- (AV.) 'cough'; gadh- 'clasp'; gā- 'go'; gāh-'plunge'; gai- 'sing'3.

b. Among the roots with  $\ddot{u} \ddot{r} / as$  low grade vowels, the only one in which the regular phonetic interchange of palatal and guttural takes place, is  $jar : g\bar{r}$ - 'call'; g appearing before r ir ar (= IE.  $\check{o}r$ ), j before ar (= IE.  $\check{e}r$ ) preceding the thematic -a- of the present or the suffix -tr-; thus gr-nāti, gir-, -gará- (VS.), beside járate, jarádhyai, jaritŕ-. In other roots either the guttural or the palatal appears throughout; mostly the guttural, because the forms with  $\tilde{u} \tilde{r} l$  and o ar al (= IE.  $\tilde{o}u \tilde{o}r \tilde{o}l$ ), which required the guttural, were more numerous than those with o ar al (= IE.  $\check{c}_{\mu}\check{c}_{r}\check{c}_{l}$ ); thus from  $k_{l}$ -'do', ákar aor. 'has done', kartír- 'agent', kárman- 'action', retain the guttural, though the palatal would be phonetic (as ar here = IE. er), through the influence of forms with kr- and of  $k\acute{a}rana$ - 'deed' (where  $ar = IE. \ \delta r$ ).

<sup>&</sup>lt;sup>1</sup> Cp. Wackernagel I, 128 a (p. 150,

which palatalize before e as well as i.

<sup>3</sup> In the IE. vowel gradation of these roots only  $\ddot{a}$  and  $\ddot{o}$  appear. In other roots <sup>2</sup> Cp. Italian and the Balto-Slavic languages in the IE. vowel gradation of which z is found, an initial palatal would be expected

On the other hand, the palatal appears in cud-1, códati 'impel'; ścut-, s'cotati 'drip', because here forms with u, which required a guttural, were rare; in car-, carati 'move', where the palatal is almost invariably phonetic in RV. (but AV. has cacāra); in crt- 'bind', the palatal has fixed itself in spite of many forms with r; while beside harsate 'rejoices', harsant-, part., both h and gh occur in weak forms: hṛṣitá-, ghṛṣu- 'lively', ghṛṣvi- 'gladdening'.

c. Among roots in -an and am, survivals of the regular interchange are found in kan- 'be pleased', and han- 'strike'. The former has the palatal. (= IE. kĕ-) in the aor. canistam, in the superl. cánistha-, and in cánas- 'favour', but otherwise the guttural. In han-, h appears before an (= IE. en) and, by analogy, also before an = nn and a = n; but gh before n and  $\tilde{a} = IE$ .  $\delta$ ; thus hán-ti, inf. hán-tave; han-mas, han-yāma; ha-thás, -ha-tá, and with j in impv. jahí (= \*jhahi), but perf. jaghána, and ghaná- 'striker', ghanāghaná-'found of striking'. In the intv. janghan-, gh stands for h before  $\alpha = IE$ .  $\check{c}$ owing to the influence of the weak stem janghn. In gam- 'go', ga- = gm-(e. g. in gácchati, ga-tá-) has led to the use of gam- = \*jam-, as in gám-anti<sup>2</sup>.

d. In the remaining verbs, that is, those with a (25) or e (22) as high grade vowel, there appears chiefly the palatal throughout; thus caks-: cacáksa (for \*cakáksa). The phonetic guttural is, however, preserved in some forms of the three verbs ci- 'observe' (perf. cikáya); cit- 'observe' (perf. cikéta; kéta- 'will'; ketíl-3 'appearance'); and ji- 'conquer' (perf. jigāya; gáya- 'household'). A guttural not phonetically justified appears before  $\alpha$  (= IE.  $\check{e}$ ) only in ghas- 'eat' (aor. ághas, subj. ghas-a-t) and in gal- 'drop' (gal-

galīti VS.).

e. In reduplicative syllables containing  $\alpha$  of roots having initial guttural or palatal, the palatal always appears in the perfect, pluperfect, or reduplicated aorist; thus kṛ- 'make': cakāra; khād- 'chew': cakhāda; gam-'go' : jagáma; ghas- 'eat' : jaghása; cakṣ- 'see' : cacákṣa; pluperf. of kr- : acakrat; red. aor. of jas- 'be exhausted': jajas-tám. The palatal is here historically phonetic, as the IE. reduplicative vowel was  $\tilde{e}$ .

In the intensive, however, the palatal is invariable only when the reduplication is monosyllabic4; e. g. kram- 'stride': can-kramata; gr-: jā-gr-'awake'; han- 'strike': jan-ghanti. But when the reduplication is dissyllabic, the guttural 5 predominates; thus kṛ-, part.kári-kr-at-; krand-'roar': káni-kra(n)d-; gam-'go': gani-gan-, gani-gm-; han-'strike': ghani-ghn-(cp.ghanāghaná-); skand-

'leap': both káni-skand- and cani-skadat subj.

38. New palatals as radical finals. a. Verbal forms.—Before the thematic verbal endings (including those of the  $\alpha$ -aorist and the reduplicated aorist) the final of roots regularly appears as a palatal which, though phonetic 6 only in about the same degree as the guttural, has prevailed. Gutturals are

in certain forms; but few traces of this remain, malized.

4 In the post-Vedic language, the palatal is invariable even in dissyllabic redupli-

6 Phonetically we should have \*pákāmi (IE. ŏ), pác-asi and pác-ati (IE. ĕ).

I If kiitsa- N. is derived from cud-, and carşanı- 'active', from kr-, the initial consonant has not been affected by the normalizing influence of the roots, because these words have been isolated.

<sup>&</sup>lt;sup>2</sup> The correct phonetic interchange appears in jángahe 'kicks', and jámhas- 'course', if these forms are connected, as BR. think. WHITNEY, Roots, however, considers the former an intensive of  $g\bar{a}h$ - 'plunge'.

<sup>3</sup> Beside céru- 'devout', keru- appears in as the forms of each verb have been nor- the compound máhi-keru- 'very devout'; cp. WACKERNAGEL 21, p. 101 (43 b).

<sup>5</sup> But if the initial of the root is a palatal, the reduplicative consonant is of course always a palatal; thus cand- 'shine': cániścad-; car- 'move' : carācará-; cal- 'move' : calācalá-'ever moving'. Cp. 32 a.

rare at the end of the root, appearing only in sak- 'be able'; 2. sing. sak-as; sagh-'be equal to': 3. sing. sagh-at; dagh-'reach': dagh-at (TS.); in these roots the guttural prevails throughout owing to the influence of the present stem sak-nu-, sagh-nu-2. Even in the non-thematic presents and in the perfect the palatal carried the day, though phonetic in still fewer forms; thus the guttural alone would be historically justified in the forms yunájā, yuñje; yuyója 3. The palatal further regularly appears before the causative 4 suffix -áya-, where • it is phonetic (= IE. éje); e. g. arc-áya-ti from arc- 'praise'.

b. As shown by the appearance, in cognate forms, of a guttural before other consonants than s, the final of the following verbs is a new palatal: añj- 'anoint'; ej- 'stir'; tij- 'sharpen'; tuj- 'beat'; tyaj- 'forsake'; nij- 'wash'; bhaj- 'divide'; bhañj- 'break'; bhuj- 'bend'; yuj- 'yoke'; rañj- 'colour'; ruj-'break'; vij- 'shoot up'; vrj- 'turn'; siñj- 'sound'; sañj- 'attach'; svañj- 'embrace';

also in the noun sráj- 'garland'.

c. Apart from being the result of the Sandhi of d+j, jj is shown by the evidence of cognate languages to be derived from a sibilant + guttural (= IE. zg) and thus to belong to the series of new palatals in majjan-'marrow'; rájju- 'rope'; bhrjjáti 'roasts'; majjati 'dives', from which is derived madgil-

(VS.) 'diver' (a bird).

d. Nominal derivatives. 1. Before the suffix -a, the final of the root >is mostly guttural, because the a in nearly all the cases of the noun represents IE. ŏ. The rule in the RV. is that the guttural appears before both unaccented -a and accented -a, but the palatal before accented -a only ; e. g. abhidroh-á-, druh-á- 'injury' : drógh-a- 'injuring'; bhoj-á- 'liberal' : bhóg-a- 'enjoyment'; a-yuj-á- 'companionless'; yúg-a- 'yoking'; ruj-á- 'breaking': rúg-a- (AV.) 'disease'; vevij-á- 'swift': vég-a- (AV.) 'speed'; śuc-á- 'bright': śók-a- 'flame'; ruc-á- (VS.) and roc-á- (AV.) 'shining': rók-a- and rok-ú- 'light'7.

2. Before the suffix -as, the palatal generally appears, as it is for the most part phonetically required; e. g. *ij-as-* 'force': ug-ni- 'mighty'. guttural, however, prevailed in ánk-as- 'bend'; ág-as- 'offence'; -ny-ogh-as-'streaming'; bhárg-as- 'brilliance'; as there were no corresponding verbs with palatal beside these words; it also prevailed in ók-as- 'ease' and ny-òkascomfortable, as well as -śok-as- 'flaming', though there are such verbs (uc-

'be pleased', and suc- 'shine').

3. Before other suffixes beginning with a, the final of the root is generally palatal; thus before -ana (= IE. -eno-), vac-aná- 'speaking'; téj-ana- 'act of sharpening'; manh-ána- 'gift's; before -ant, -āna (under the influence of

3 This normalization of the palatal is probably Indo-Iranian, see J. SCHMIDT, KZ.

4 The denominatives in -ayá- (IE. cjé and oié) follow the noun from which they are derived; e.g. from aghá- 'evil', aghāyáti 'wishes to injure'.

(VS.)

8 The gh of jaghána-'buttock', is phonetic

(Gk. κοχώνη).

Apart from roots ending in kh, see 35, note 3. <sup>2</sup> In ni-mėgha-māna- 'drenching oneself', the gh seems to be phonetic (as -amāna = -ŏmenŏ). In válgate (AV.) 'springs', the guttural is perhaps due to the preceding 4, as neither ly nor le is ever found to occur.

<sup>5</sup> The causative ingáyati of éjati 'stirs' is probably due to an old present base \*inag-, ing- formed according to the 7th class; the phonetic form -injayati is found in the BAU. VI. 4, 23.

<sup>6</sup> The fluctuation of words in -a- probably x arose from some cases in oxytones having had IE. č, others č; hence in some words the palatal prevailed throughout, in others the guttural. The agent-nouns, being mostly oxytone, show a preference for the palatal, which originally appeared in oxytones only. Cp. WACKERNAGEL I, 128 a (p. 150, note,

<sup>7</sup> A palatal before an unaccented -a first appears in doh-a- (RV. x. 122), otherwise dogha-'milking'; moh-a-(AV.) 'delusion', beside mogh-a- 'vain'; kriinc-a- (VS.) 'curlew', is probably only an extension of krunc-

verbal forms), e. g.  $dih-\bar{a}na$  and  $duduh-\bar{a}na^{\mathrm{r}}$ ; before -ata (= IE.  $-\check{e}t\delta$ ), e. g. pac-atá- 'cooked'2; before -an in majj-án- 'marrow'3.

- 4. Nouns formed without suffix (including infinitives and gerunds) have the palatal of the corresponding verb; e. g. pic-as, nom. pl. 'food'; a-pic-as and a-pric-e 'to satisfy'; tuj-áye 'to procreate'. A guttural of course appears where the verb has a guttural only; e. g. pra-tink-am (AV.) 'gliding' (tak-'run').
- 5. The suffix -ka is treated analogously to the final guttural of roots 4. The guttural regularly appears except when the suffix, being attached to unaccented prepositions, is itself accented; thus asmá-ka-'our'; yuṣmá-ka-'your'; άρα-ka- 'coming from afar'; abhί-ka- 'collision'; and even with the suffix accented in locatives such as upā-ké, upā-kúyos 'in the vicinity' and in the abl. parā-kát 'from a distance'; but uc-cá and uc-cáis 'above'; parā-cáis 'aside'; paś-cá and paś-cát 'behind'; prā-cáis 'forwards'.
- 39. Irregular palatalization.—Before  $\tilde{u}$  r and consonants (except v). the gutturals were not originally palatalized. Hence roots which regularly have palatals before a and diphthongs, usually retain the guttural before u r and consonants. Thus from ric- 'leave', are formed, rék-u- 'empty', rék-n-as- 'property'. perf. part. ririk-váms-; 3. sing. pres. rinák-ti, 2. sing. perf. mid. ririk-se (but opt. riric-vāt); ug-rá- 'mighty', beside ój-as- 'strength'; ghn- beside han- 'strike'). Nevertheless palatals appear by analogy before u, r, n, m, r, v:

a. initially: I. in the roots ścut- 'drip', crt- 'bind', hrs- 'rejoice', in which the unphonetic palatal before the low grade vowel5 is due to the phonetic palatal before the high grade vowels o (= IE.  $\check{e}u$ ) and ar (= IE.  $\check{e}r$ ).

2. in the reduplicative syllables  $cu^{-6}$  and ju- of the perfect and agrist (in RV. occurring only in cyu- 'shake', gup- 'guard', gur- 'praise') for older

\*ca-\*ja-( $a = \tilde{e}$ , the IE. reduplicative vowel).

b. finally: i. in verbal inflexion, the palatal which appears before a and diphthongs always appears also before u, and nearly always before mand r (instead of the phonetic guttural); thus sisic-ur beside sisic-atur, sisic-e, from sic- 'pour'; bubhuj-mahe beside bhunaj-amahe, from bhuj- 'enjoy'; añj-mas beside añj-ánti, anáj-an from añj- 'anoint'; riric-ré beside riric-é, from ric-'leave'; d-yuj-ran, yuyuj-ré beside yuyuj-é, from yuj- 'yoke'; duh-ré, duh-rate, duduh-ré, duh-rám and duh-ratām (AV.) beside duh-é, from duh- 'milk'.

The guttural, however, regularly remains before the -nu of the 5th class: śak-nu- 'be able', sagh-nu- 'be equal to', spreading thence to other forms?. Phonetic k remains before m in vivak-mi from vac- 'speak'; and before r in vāvak-re beside vac-yáte, váñc-ati (AV. VS.) from vañc- 'move crookedly'.

2. in nominal derivation the guttural as a rule remains 8: e.g. rug-ná-'broken', from ruj- 'break'; ruk-má- 'brilliant', from ruc- 'shine'; śuk-rá-, śuk-lá-(AV.) 'bright', from śuc- 'shine'; pak-vá- 'ripe', from pac- 'cook'. The perf. part. for the most part follows this rule: e. g. ru-ruk-vāms-, from ruc- 'shine';

<sup>2</sup> The k in sik-atā- (AV. VS.) 'sand', is

phonetic (IE. -nta-).

āna- 'milking'; also vāgh-át- (IE. -nt-) 'institutor of a sacrifice'.

<sup>3</sup> Beside yák-rt (AV.) 'liver', and śák-rt'dung', the k is found in the stems yak-an-, sak-an-, but only in weak forms before n or a(= n): yak-nás, yak-nā (VS.); śak-nā (VS.); śak-nás (AV.); śáka-bhis (TS.)

<sup>4</sup> See above 38 d, 1; WACKERNAGEL 1, 129. 5 The phonetic guttural, however, appears in ghṛṣ-ú-'lively', ghṛṣvi- 'gladdening'; while KZ. 25, 70 f.

I Strictly phonetic (but rarer) is dight on the other hand the palatal appears unphonetically before u in the intv. part. carcūryá-māṇa- from car- 'move'.

<sup>6</sup> Otherwise cu- occurs only in the onomatopoetic ni-cumpuná- 'swell' - and in a few words suggestive of foreign origin: cúmuri-, N. of a demon; cu-punīkā-, N. of a krttikā (TS.).

<sup>7</sup> Also dagh-nu- 'reach', in a Brāhmana passage of the Kāthaka, and stigh-nu-'mount', in a similar one of the TS.

<sup>8</sup> COLLITZ, BB. 3, 230 f.; J. SCHMIDT,

vi-vik-vāms-, from vic- 'divide'; ok-i-vāms- (36 a), from uc- 'find pleasure' (but dat. sing. ūc-ús-e).

The following are, however, exceptions: *'j-man-'* 'might'; *bhuj-mán-*'fruitful'; milh-ur 'suddenly'; druh-il- (AV.) 'injurer'; yāc-ñy:i- (AV.) 'request'.

- 40. The old palatals (ch, j, s, h). The aspirate ch. This sound is, in pronunciation, the aspirate of  $c^2$  and is therefore represented in reduplication by c. But in origin ch has nothing to do with c. The fact •that after a mute it takes the place of s' in Sandhi shows that it is allied to s. In fact, unlike j and h, it belongs exclusively to the old series of palatals; for it does not interchange with a guttural kh3. In the Avesta ch is regularly represented by s and in cognate European languages by a conjunct consonant beginning with s and standing for IE. skh (that is, s + palatal mute aspirate); e. g. chid- 'cut off', Gk. σχιδ-. This in Indo-Iranian probably became ssh, which differentiated into Avestic s and Vedic ch. In the inchoative suffix -cha (gácchati, Gk.  $\beta$ á $\sigma$  $\kappa\omega$ ) this palatal aspirate seems to represent IE.  $s\hat{k}$ , a conclusion which is supported by the old inchoative verb rapsate 'is full' = rap(s) sate, where after the s has been dropped between two consonants 4, s' = IE. & remained. Thus ch represents a double sound and metrically lengthens a preceding short vowel. Hence the RPr. (VI. 1) prescribes the doubling of ch (that is c-ch) between vowels. Though the Vedic Mss. almost invariably write ch5 and Aufrecht's edition of the RV. and v. Schroeder's edition of the MS.6 follow this practice, the spelling cch is to be preferred.
- a. In sakhī- 'branch', the initial s probably stands for ch owing to the law by which two aspirates in the same syllable are avoided 7.
- b. In a few instances ch is a Prakritic representative of ks and ps: -rccharā- (AV.) beside rksálī- (VS.)8, part of an animal's leg; krechrá- 'distress', perhaps for \*krpsrá-, and allied to krpate 'laments', and krpana- 'misery' 9.
- 41. The old palatal j.—This j is the media of s' (while as a new palatal it is the media of c). It is recognizable as an old palatal by the following indications:
- **r.** when there are parallel forms with s before t, th, or a cerebral appears either as final or before mutes; e. g. beside yáj-ati 'sacrifices', yáṣ-ṭṛ- 'sacrificer', is- $t\acute{a}$ - 'sacrificed', a- $y\bar{a}t$  'has sacrificed'; similarly in the roots  $bhr\bar{a}j$ - 'shine'; mṛj- 'wipe off'; rāj- 'rule'; rej- 'tremble'(?); vraj- 'wander'; sṛj- 'send forth'; possibly also in bhrajj- 'roast'10.
- 2. when in the form in question or in cognate forms, sounds follow which do not palatalize gutturals ", that is, u r n m r v; such are: áj-ra-'plain'; áj-ma(n)- 'course'; árjuna- 'white', rj-ní- 'reddish'; rj-ní- 'straight', rj-īyas-

and oj-istha- 'strongest', such nouns in -manbeing often closely connected with comparatives and superlatives.

<sup>2</sup> In the Kathaka ch is spelt sch, which is probably only a provincial assibilation, and not the survival of an older sound; cp.

J. SCHMIDT, KZ. 27, 332.

3 mūrkhá- 'dull', occurring in a B. passage of the TS., is probably a new formation or three words, see WHI:NEV, JAOS. 12, analogous to śoká- (AV.) from śócati. Some 92. 175. scholars hold that there is an etymological connection between chand- 'appear', chand-as-'song', and skándatí 'leaps'; between chid-'cut off' and khid-'press'; between chā- (AV.) 'cut off' and khā-(khan-) 'dig'. Cp. WACKER-NAGEL I, 131, note, bottom.

4 Cp. above p. 25 note 6; cp. here  $cch = t + \dot{s}$ 

\* Under the influence of 65-17/as- 'stronger' | in Sandhi and ducchina- for \*dus-sun x- 'misfortune'.

> 5 Except those of the Kathaka, which write śch (cp. note 2).

> 6 Also Roth's ed. of the Nirukta and MACDONELL's ed. of the Brhaddevatā; cp. Aufrecht, RV2, p. vi.

7 Cp. 32. 8 On AV. Ms. spelling ch for ks in two

9 On the origin of ch, cp. Brugmann, KG. 240; on the sound as a whole, WACKER. NAGEL I, 133 f.

10 But ep. 38 c, and WACKERNAGEL I, 139. 11 Apart of course from the exceptions

due to analogy: see 39.

'straighter', ráj-iṣtha- 'straightest'; jánu- 'knee' beside jñu-; jṛmbh- 'yawn''; jñā- 'know'; jmā-, gen. jm-ás 'earth'; jri- 'go'; -jvārá- 'suffering'; paj-rá- 'fat'; maj-mán- 'greatness'; váj-ra- 'thunderbolt'; juráti, júryati, jujur-váṃs-, jūr-ná-, from jṛ- 'grow old'.

3. when in inflexional forms, in which roots with a new palatal show a guttural, the j remains; e. g. jajāna from jan- 'beget'; jajāsa (AV.) from jas- 'be exhausted'; jujúṣa from juṣ- 'like'; jujur-vāṃs-, jajāra (AV.), from

ir- 'grow old' 2.

4. when j is the reduplication of an old palatal j or h; e. g. jajana,

jajāra (AV.), juhsti.

5. when it is shown to be an old palatal by the evidence of the cognate languages; thus in ajā- 'he-goat', ajā-'goat'; ajīna- (AV.) 'skin'; ūrj-'nourishment'; jāmhas- 'course'; jānghā- 'leg'; jambh- 'chew up'; jāmātr- 'son-in-law'; dhraj- 'sweep'; bhiṣaj- 'heal'; rajatā- 'silvery'; vāja- 'swiftness'; rjipyā-'going straight'.

a. It is uncertain whether j represents an old or a new palatal in the

following words:

1. because the comparative evidence is conflicting: vi-jāman- 'related';

iū- 'hasten'; jyā-, jināti 'overpower'3.

2. because the Vedic and comparative evidence is insufficient: ubj-'coerce'; kūj- (AV.) 'hum'; jáñjat-ī-, pres. part., of uncertain meaning (ά. λ.); járate 'approaches'; jéhamāna- 'panting'; jihmá- 'transverse'; dhváj-, dhvajá- 'banner'; paj- 'be rigid' (in ápa... pápaje 'started back'); -pūjana- 'honouring'; bajá- a kind of plant; bíja- 'seed'; múñja- 'sedge'.

- b. Irregular j.—I. As the two kinds of j were indistinguishable in pronunciation, a guttural sometimes intruded among the old palatals owing to the analogy of the new palatals; thus from bhiṣaj- 'heal', bhiṣák-tama-, spv., bhiṣák-ti, 3. sing. pres., a-bhiṣṇak, 3. sing. impf. (like anak-ti from añj- 'anoint'); from mṛj- 'wipe': ni-mṛg-ra- 'attached', apā-mārgá- (AV.) a kind of plant, vi-mṛg-varī- (AV.) 'cleanly'; from sṛj- 'discharge', asṛg-ram, asṣṛgran, ásaṣṣgram, saṣṣgmāhe (SV.) beside saṣṣṛmāhe; from jṛ- 'grow old', jāgāra (AV.) beside iajāra (AV.).
- 2. The guttural beside the palatal may be due to IE. dialectic variety in gnā-'woman' beside jan-'beget'; gm-ás beside jm-ás 'of the earth'; bhārgas-'splendour', bhīgu- a name, beside bhrāj- 'shine'.

3. In jyótis- 'light', jy seems, by an old Prakritism, to represent dy, as the word is probably derived from dyut- 'shine'.

4. The media aspirate jh<sup>4</sup> occurs only in one form, jájhjhat-ī- (RV.<sup>1</sup>), a pres. part. probably meaning 'laughing' as an epithet of lightning (a metaphor connected with lightning elsewhere also in the RV.); it appears to be derived, by an old Prakritism, from has- 'laugh': jhjh probably for jjh<sup>5</sup> here = IE. ĝzh, which otherwise would become kṣ-, as in jákṣ-at-, part., 'laughing'.

42. The cerebrals.—The designation given to these sounds by the native phoneticians<sup>6</sup>, mūrdhanya 'produced in the head', indicates that they were pronounced at the highest point in the mouth nearest the (upper part

6 See RPr. I. 19; APr. I. 32; TPr. I. 37.

The which only forms with r occur; cp., however, Hübschmann, KZ. 23, 393.

The only instance of a new palatal  $(c \ j \ h = k \ g \ g h)$  before ur (= IE. r) is care ur g in g in

<sup>3</sup> Op. cit. I, 137 e, note.

<sup>4</sup> The other two old palatals  $\beta$  and  $\hbar$  will be dealt with below in their alphabetical order: 54, 58.

<sup>(</sup>c j h = k g gh) before  $\bar{u}r$  (= IE.  $\bar{r}$ ) is carcuryá-māṇa- (RV. x). For some more or less doubtful examples of old palatal j, see LOWITZ, WZKM. 21, 86.

of the) head. They are described by the Pratisakhyas as pronounced by turning the tip of the tongue up to the roof of the mouth and bending it backwards. They were therefore pronounced farther back in the mouth than the palatals. This is also their pronunciation at the present day in India. An indication that it was such even in Vedic times is the fact that d is sometimes found in the later Samhitās interchanging, between vowels, with  $\ell^{\perp}$  (which itself interchanges with r), and that in the RV. itself d dh become ! Ih between vowels. It is also to be noted that the Greeks reproduced  $\rho$  not only with  $\delta$ , but also with  $\rho^2$ . The cerebrals, however, were a specifically Indian product, being unknown in the Indo-Iranian period<sup>3</sup>. They are still rare in the RV., where they occur medially and finally only. According to most scholars, they are due to aboriginal, especially Dravidian, influence4. As a rule, they have arisen immediately after s or an r sound from dentals. But before consonants and finally they may represent the old palatals is h.

a. The voiceless cerebrals t th take the place of the dentals t th after s (= s, s or j); e. g. vrs-ti- 'rain' (suffix -ti); dus-tára- 'invincible' (= dus-tára-);  $n\acute{a}kis$  te (=  $n\acute{a}kis$  te);  $v\acute{a}s$ -ti 'wishes' (=  $v\acute{a}s$ -ti); mrs- $t\acute{a}$ - 'cleansed' (= mrj- $t\acute{a}$ -)<sup>5</sup>. Similarly the voiced cerebrals d dh take the place of the dentals d dh after \*z (= s or old palatal j, h), which has disappeared 6; e. g.  $n\bar{\iota}d\dot{a}$ - 'nest'  $(= IE. nizd\acute{b}-); d\vec{u}-dh\acute{t}-$  'ill-disposed'  $(= dus-dh\acute{t}-); \vec{\iota}d-\acute{e}$  'I worship' (\*iz-d-=ij-dfor vaj-d-);  $drdh\acute{a}$ - 'firm' (= drh- $t\acute{a}$ -). The preceding voiced sibilant \*z (= s' and s) has (instead of disappearing) itself become d in didid-dhi (from dis-'show') and vivid-dhi (from vis- 'be active').

a. When the dental here was immediately followed by an r sound, the cerebralization seems originally to have been stopped. Hence drdhrá- (= drh-tra-), beside drdhá-(= drh-ta-) 'firm'; and though str occurs several times in the RV.8, the r seems to have been dropped in pronunciation, as the only stems ending in -stra- which show a caseform with n, do not cerebralize it: ústrānām and rāstrānām, as if no r preceded. In TS. 1. 2. 52, r is actually dropped after st in tvástīmatī- 'accompanied by Tvastrī'.

b. In several instances a cerebral appears by an evident Prakritism, in place of a dental originally preceded by an r (or l) sound; thus vi-kata-'monstrous', beside kṛ-tá- 'made'; kāṭá- 'depth', beside kartá-9 'pit'; avaṭá-(SV. VS.) 'pit', beside avár<sup>10</sup> 'down'<sup>11</sup>; and as shown by comparative evidence, káṭuka-'sharp'; kūḍayati 'singes'; kévaṭa-'pit'; jáḍhu-'dull'; kūṭá- (AV.TS.) 'hornless'. In the following words, though cognate languages show liz, the cerebral is similarly based on Indian r or  $r^{13}$  + dental: khta- 'frontal bone'; jathára-'belly'; tadit-'contiguous', tāda-(AV.) 'blow'; pinda-'lump'; kānda-(AV.) 'piece' 14.

c. Cerebrals have in some instances supplanted dentals owing to the

<sup>12</sup> IE. / by rhotacism became r in IIr.

<sup>13</sup> MS. II. 47 has the reading jinva rāvát for that of TS. II. 4. 71 jinvár āvýt and K. XI. 9 jinva ravat. Cp. below p. 70, note 4. 14 The cerebral could be similarly accounted

for in kúta-(RV1) 'house'(?), if it is related to kula-(pa-) 'family', and kulaya- (AV.) 'nest'. In dandá- 'staff' if identical with Gk. δένδρον (J. SCHMIDT, KZ. 25, 52, note 1) we seem to have an instance of a cerebral for a dental + following r, but such a change seems not to be in accordance with the phonetic laws of either Vedic (cp. drdhrá-, above a, a) or Prakrit. On two other ri Perhaps also renúka-kāṭa- 'stirring dust', examples of this supposed change, ānḍá-

analogy of similar words with phonetic cerebral. In pailbhis 'with feet', and perhaps pád-grbhi-, N., it is due to padbhis, inst. pl. of both pás- 'look', and of páś- 'cord', and to pádbīśa-, pádvīśa (VS.) 'fetter', which is derived from páś- 'cord' i. Vásat and śráusat, sacrificial calls, probably for váksat and \*srosat (3. sing. aor. subj. of vah- 'convey', and sru- 'hear'), seem to owe their cerebral to the influence of the sacrificial call vat (VS.), vat (TS.), 3. sing. aor. of \(\frac{1}{vah}\). The \(d\) of \(purod\alpha'\)sacrificial cake' (from \(d\alpha'\)s' 'worship'), is perhaps due to  $d\bar{u}$ - $d\hat{a}\hat{s}$ - 'impious' (for duz- $d\bar{a}\hat{s}$ -)<sup>2</sup>.

d. In a few instances a cerebral t or o appears in place of the cerebral sibilant s. The phonetic representative of the latter before bh would be d (parallel to d for IE. z before bh)3, where it appears in vipriud-bhis (VS.) 'with drops'. From here the cerebral spread to the nom. sing., where it appears in vi-prilt (AV.) 'drop', from prus- 'sprinkle', and in edhamana-dvit 'hating the arrogant' (from dvis- 'hate').

The cerebral d also appears before the -dhi of the 2. sing. impv. for s in aviddhi (= avi-s-dhi) aor. of av- 'favour', and in vividdhi (= vivis-dhi), red. aor, of vis- 'be active'. The phonetic form here would be  $\bar{z}_i dh = iz - dh$ , instead of which iddh appears under the influence, perhaps, of the cognate

verbal forms with the short vowel (avistu, avistám etc.).

43. Cerebrals in many instances represent the old palatals j s h.

They are found thus:

a. as final: I. in nom. sing. m. f.:  $bhr\dot{a}t$  'lustre'  $(bhr\dot{a}j-)$ ;  $r\dot{a}t$  'ruler'  $(r\dot{a}j-)$ ; vipāt, N. of a river (vipās-); vit 'settlement' (vis-), spát 'spying' (spás-); sát 'overcoming'  $(s\tilde{a}h-)$ ;  $-v\tilde{a}t$  'conducting'  $(-v\tilde{a}h-)$ ,  $pasthav\tilde{a}t$  (VS.),  $-v\tilde{a}t$  (TS.). The guttural & would have been phonetic in this case, as the nom. sing. originally ended in  $s^5$ , and even the old palatals became k before s; the cerebral must here therefore be due to the influence of forms in which it was phonetic.

2. in nom. acc.  $s\acute{at}$ , from  $s\acute{as}$ - 'six'. As k might have been expected (IE. sveks), the cerebral is doubtless due to forms containing sas-, as sasti-'sixty', sasthá- (AV. VS.) 'sixth'.

3. in the first member of a compound, where the final of the nom. sing.

appears, in  $s\acute{a}t$ - 'six', and  $p\acute{a}d$ - (from  $p\acute{a}s$ - 'cord', in  $p\acute{a}d$ - $b\bar{\imath}s\acute{a}$ -).

4. in 2. 3. sing aor. for the radical palatal after the endings have been dropped: thus \(\alpha - bhr\bar{a}t\) (\(bhr\bar{a}j - '\shine'\); \(yaj - '\sacrifice'\); \(r\bar{a}t\) (\(raj - '\shine'\); nat, á-nat (naś- 'reach'); á-prāt (praś- 'ask' in praś-ná- 'question'); á-vāt (vah-'convey'). Here t is phonetic in the 3 pers. only, standing for s-t (= IE. k-t). It has been transferred to the 2. sing., where k would be phonetic (standing

<sup>1</sup> Op. cit. 1, 148 a (p. 172, top).

ment' (tirj-); dik (AV.) 'region' (dis-). For -drk, the later Samhitas have -drn also. In <sup>2</sup> The form vy-ávāt in MS. iii. 49 (B.) the n. nom. the m. f. form appears: -dfk, -sprk; but as there was no s here, it must be assumed that the cerebral was originally used in these neuter forms. In bhisáj- 'healer', the k has spread from the nom. to other cases, where it is not phonetic (cp. WACKERNAGEL I, 138). The original value of the palatal in usij- 'desiring', usnih-(AV. VS.), a kind of metre, which have & in the nom. is uncertain. The k in the nom. nák 'night' is probably not based on an old palatal s (cp. WACKERNAGEL I, 149 a α, note).

<sup>&#</sup>x27;egg', and mandûka- 'frog', see WACKER- | rtvik 'sacrificer' (//yaj-); ûrk (VS.) 'nourish-NAGEL I, 147, note.

beside vy-àvāt, AV. VIII. 121, from vi-vas-'shine forth', is probably due to the influence of a- $v\bar{a}t$ , aor. of  $\sqrt{vah}$ -; but cp. Bartholomae, Studien I, 24, note. On the cerebral in avatá-(SV. VS.), beside avatá-, nadá- 'reed', beside nadá-, and in kīṭá- (AV.), markáṭa- (VS.) cp. WACKERNAGEL I, 148 b, note.

<sup>3</sup> See below 44 a, 3.

<sup>4</sup> Cp. above 17, 5.
5 This phonetic & for an old palatal is preserved in the nominatives -drk 'seeing' (drś-), -sprk 'touching' (sprś-), sprk 'desiring' (sprh-), an-ák 'eyeless' (-akṣ-: aṣ- 'penetrate');

for k-s = IE. ks. The reverse transference of k to the 3 sing. has taken place in prá nak beside á-nat (naś- 'reach') and in á-srāk (from srj- 'discharge').

b. before consonant suffixes:

1. the phonetic cerebral appears before case-endings beginning with bh in pad-bhis, from pás-'look' and 'cord'; vid-bhis from vis-'settlement'; sarádbhyas 'for the bees' (probably from \*saráh-); sad-bhis 1. In anadud-bhyas (AV.), from anad-váh- 'bull', d appears for d by dissimilation; while the guttural of the nom. instead of the phonetic d appears in susamdig-bhis (from dris-'see') 'fair to see' and in dig-bhyás (AV.) from dis- 'region'.

2. before the -su of the loc. pl. k is phonetic, and appears in vik-sú. from vis-, in spite of the unphonetic t of the nom. vit. But owing to the influence of the other cases the unphonetic cerebral (in the form of t

dissimilated for t) appears in anadit-su.

3. before the dhi of the 2. sing. impv. the cerebral is phonetic in dididdhi, from  $dis'^2$ ; also in z = s, which after cerebralizing the dh is dropped, leaving a compensating length, in tādhi from taks- 'hew' (= IE. tegzdhi); also in so-dhā 'sixfold' (for sas-dhā : as-, like as-, becoming o before a voiced mute)3.

- c. The cerebrals in the following words have not been satisfactorily explained: āghātí- and ā-ghātá- (AV.) 'striker', beside -ā-ghāta- (VS.); āndá-'egg'; itánt- (x. 1711) 'wandering'(?), kúta- 'house'(?); kúta- 'frontal bone'; kŕpīta- 'fuel'(?); mandūka- 'frog'; iţa- (AV.) 'reed'; rarāṭa- (VS.), lalāṭa- (AV.) 'forehead'. Some others, mostly containing b, may be suspected of non-Aryan origin: bát, badá, interjections; batūrin- 'broad'(?), bīrita- 'troop'(?); bekanāta-'usurer'; āḍámbara- (VS). 'drum'; khadgá- (VS. MS.) 'rhinoceros'; cānḍālá- (VS.) 'outcast'; markáta- (VS.) 'ape'.
- 44. The dentals.—The dentals are at the present day pronounced as interdentals in India, but according to the Prātiśākhyas they were post-dental, being produced at the root of the teeth (dantamūla). They represent IE. dentals, corresponding to similar sounds in the cognate languages. When two IE. dentals met, there seems to have been a tendency to change the first to a sibilant<sup>5</sup>. A survival of this appears in some Vedic combinations of d or dh with dh, which point to an earlier zdh, viz. in de-hi, beside daddhí 'give'; dhe-hí (for \*dhadh-dhí) 'put'; kiye-dhá 'containing much', in all of which examples e is based on IIr.  $az^6$ .
- a. Change of s to t. The dental sibilant as the final of roots or nominal stems becomes  $t^7$ :
- 1. before the s of verbal suffixes (future, aorist, desiderative) in the three verbs vas- 'dwell', vas- 'shine', and ghas- 'eat'8: thus avatsīs (AV.) 'thou hast dwelt'; vát-syati (MS.) 'will shine'; jighat-sati (AV.) 'desires to eat', and jighat-sú- (AV.) 'hungry'.

<sup>2</sup> It is not phonetic in aviddhi and vividdhi (see above, 42 d). Cp. WACKERNAGEL I, 149 c

(end).
3 The cerebral which in this paragraph represents (except before s) the old palatals, is based on an IIr. sh- sound s z (as with connecting vowel i. shown by the Avesta having š ž in the

From this phonetic change of s to d corresponding forms). This sibilant, Indian s, before bh is to be explained the stem id- first became the cerebral mute d before the 'refreshment', beside is- (which occurs before bh-suffixes (as dental s became dental d) when vowel endings only): id-bhis etc. would have it first spread to the nom., and lastly to the loc. pl.

4 See RPr. I. 19; TPr. II. 38.

5 For example, Gk. foισθα, Av. voistā, beside vét-tha 'thou knowest'. Cp. WACKER-NAGEL I, 152 b.

6 Loc. cit., also note.

7 See discussion of attempted explanations in Wackernagel I, 153, note.

8 All the other roots in s add the suffix

led to the formation of id- $\dot{a}$ , etc. (inst. sing.), which then gave rise to id-a- as an extension of id-; cp. also idáyata (RV. 1. 1916 MM., iláyata, Aufrecht): iláyati (AV.) be quiet.

- 2. before the t of the 3. sing. of a past tense: thus  $vy-\lambda v\bar{a}t$  (AV.) 'has shone forth', from vi-vas. This is, however, probably not a phonetic change, but is rather due to the influence of the 3. sing. of other preterites with -t;  $*d-v\bar{a}s-t$  having thus, instead of  $*d-v\bar{a}s$ , become  $d-v\bar{a}t$ .
- 3. before case-terminations beginning with bh, and when final (in nom. acc. sing. neut.), in the perf. part. and in four other words: thus jāgr-vád-bhis, inst. pl., 'having awakened', tatan-vát, acc. n., 'having stretched'; usád-bhis, from usás- 'dawn'; mād-bhis, mād-bhyás (AV.), from más- 'month'; svá-tavad-bhyas (VS.), from svá-tavas- 'self-strong'. The change of s to t began before the bh endings (like that of s to t or d) and was extended to the nom. acc. sing. neut. in the RV., but not till later before the -su of the loc. pl.3

a. Allied to the change of final s of roots and stems to t, is the apparent change of the medial dental sibilant to d in madgú- (VS.) 'diver', from majj- 'dive' (jj = IE. zg)'.

β. The substitution of dentals for other mutes is extremely rare. In consequence of dissimilation, a dental replaces a cerebral in anaditsu and anaditabhyas (AV.), from anadvāh- 'bull'; in dṛdhrá- 'firm', beside dṛḍhá-5; in paṣṭhavāt (TS.) 'four year old bull', beside paṣṭhavāt (VS.).

A dental seems to take the place of a labial in ad-bhis, ad-ligiés, beside apwater': but this is probably due to the analogy of \*nadbhis, naclingue, beside napat-

'grandson' 6.

- 45. The labials.— These sounds as a rule represent IE. labials; e. g. piti-, Gk.  $\pi\alpha\tau\dot{\eta}\rho$ ;  $bh\dot{a}ra$  bear', Gk.  $\phi\dot{\epsilon}\rho\varepsilon$ . But owing to the great rarity of IE. b, there are very few Vedic examples of inherited b; e. g. rambate hangs down', Lat.  $l\bar{a}b\bar{t}$  'glide'.
- a. The number of words containing **b** has been greatly increased by new formations. I. Thus b replaces p or bh before other voiced mutes: e. g. pi-bd-aná- 'firm', beside pad-á- 'place'; rab-dhá-, beside rabhante 'they take'.—2. It is the regular substitute for bh in reduplicative syllables or when initial aspiration is lost owing to a following aspirate; e. g. ba-bháva from bhū- 'be', bāhú- 'arm', bandh- 'bind'8.—3. In a few examples it takes the place of or interchanges with v9; thus pádbīśa- (RV.), beside pádvīśa- (VS.); bāná- beside vāná- 'arrow'; -balśa- (AV.) beside -valśa- 'twig'; bāná- (AV.) 'music' beside vāná-; -blīna- (AV.) 'crushed', beside vlīna- (B.)¹o.—4. It further occurs in some new onomatopoetic words; budbudá- 'bubble'; bál (AV.) interj. 'dash!'; bata interj. 'alas!' and batá- 'weakling'.—5. In one instance b seems to stand for m before r, in brū- 'speak', for \*mrū-¹¹, originally appearing most likely after a pause or after a final consonant¹².

b. In many words the origin of  $\vec{b}$  is obscure. Most of these probably come from a foreign source: I. owing to their meaning:  $arbud\acute{a}$ - and  $\acute{a}rbud\acute{a}$ -,  $balb\bar{u}th\acute{a}$ -,  $s\acute{a}mbara$ -,  $s\acute{r}binda$ -, names of foes of Indra and of the Aryans;  $brb\acute{u}$ -, a proper name;  $ba\acute{a}$ - (AV.),  $b\acute{a}lbaja$ - (AV.),  $bilv\acute{a}$ - (AV.), names of plants;  $b\acute{a}kura$ - and  $b\~{a}kur\acute{a}$ -, a musical instrument.—2. owing to their phonetic form:  $k\acute{l}lbisa$ - 'sin';  $b\acute{s}a$ - 'root-fibre';  $bus\acute{a}$ - 'vapour';  $b\acute{a}t$  and  $bad\acute{a}$ , interjections;

<sup>&</sup>lt;sup>1</sup> Cp. Wackernagel i, 154.

<sup>&</sup>lt;sup>2</sup> See 42 d (p. 34).

<sup>3</sup> Cp. WACKERNAGEL I, 155 a, note.

<sup>4</sup> Op. cit. I, 155 b, note.

<sup>5</sup> See 42 a α (p. 33).

<sup>&</sup>lt;sup>6</sup> The name *in-d-ra* and *nánān-dr*- 'husband's sister', are explained by some scholars as containing a Prakritic d. See WACKERNAGEL I, 157, note.

<sup>7</sup> On some words (sabar-, batá-, bála-, balbūthá-) in which b is regarded as IE. by

different scholars, see WACKERNAGEL I, 158 b, note.

<sup>8</sup> See above 32 a, 1, 2.

<sup>9</sup> There is some confusion between forms of brh- 'be great', and vrh- 'tear'.

<sup>10</sup> On some doubtful or wrong explanations of b for v (ni-brh-'crush', bála-, bálbaja-, bát, sábála-, sámba-), seeWackernageli, 161, note.

<sup>11</sup> Cp. Gk. βροτός for \*μροτός. 12 See WACKERNAGEL I, 159.

bandá-(AV.) 'crippled'; bársva-(VS.) 'socket'; baskáya-'yearling'; báskiha-(VS.) 'decrepit'; bila- 'cave', bilma- 'chip'; birita- 'troop'(?); bekanáta- 'usurer'. — 3. for both reasons: ilībisa- and bṛṣaya-, names of demons; alabu- (AV.) 'bottle gourd'.—4. Other words which if not of foreign origin, are as yet insufficiently explained: bárjaha- 'udder'; bastá- 'he-goat'; básri 'quickly'; -bāra- 'aperture'; bija- 'seed'; bundá- 'arrow'; brbád-uktha-, an epithet of Indra; chibuka- 'chin'; śabála- 'brindled'; śámba-, a weapon of Indra; balása- (VS. AV.), a disease; bleska- (K.) 'noose'."

46. The nasals.—There are five nasals corresponding, in regard to place of articulation, to the five classes of mutes. Each of them can only appear before a mute of its own class<sup>2</sup>. Before sibilants and h the nasals do not appear<sup>3</sup>; before l only m is found;  $\tilde{n}$  does not appear finally any more than the palatal mutes.

a. The guttural nasal ni regularly appears before gutturals: e. g. anká-'hook'; ankháya- 'embrace'; ánga- 'limb'; jánghā- 'leg'. Before other consonants or as a final, it appears only when a following k or g has been dropped, as in stems ending with -ñc- or -ñj- and in those compounded with -df's-; e. g. pratyán, nom. sing. of pratyánc- 'facing'; yundhi (= yunj-dhi), 2. sing. impv. of yuj- 'join'; kī-dýi, nom. sing. of kī-dýs- 'of what kind?'.

b. The palatal nasal  $\tilde{n}$  is found only before and after c or j, and before ch; e. g. váñcati (AV.) 'wavers'; yajñá- 'sacrifice'; vāñchantu 'let them

desire'.

- c. The labial masal m as a rule represents IE. m; e. g.  $m\bar{a}t/-$  'mother', Lat. māter; náman- 'name', Lat. nōmen. It is by far the most common labial sound4, its frequency being greater than that of the four labial mutes taken together 5. By some scholars m is regarded as representing an original n or vin certain instances 6.
- d. The dental nasal n as a rule represents IE. n; e. g. ná 'not', Lat. -ně; mánas- 'mind', Gk. μένος. It is the commonest of the nasals, being more frequent than m, and about three times as frequent as the other three taken together?. The dental nasal also appears instead of dental mutes and of
- a. It appears in place of d before the nominal suffix -na, and of t, as well as d, before the m of secondary suffixes; e. g. án-na-'food' (ad-'eat'); chin-ná- 'cut off' (chid-); vidyún-mant- 'gleaming' (vidyút- 'lightning'); mṛn-maya-'earthen' (m/d- VS. 'earth'). This substitution is in imitation of Sandhi, as dn tm dm otherwise occur within words; e. g. udná (from udán- 'water'), ātmán- 'breath', vid-má 'we know'.
- $\beta$ . dental *n* regularly appears in place of m: I. before t; e. g. from yam-'restrain': yan-tir- and yan-ti- 'guide', yan-trá- 'rein'; from śram- 'exert oneself': śrāntá- 'wearied'; 2. before suffixal m or v; e.g. from gam- 'go': á-gan-ma, gan-vahi, jagan-váms-8; 3. when radically final, originally followed by suffixal s or t; e. g. from gam-'go', á-gan, 2. 3. sing. aor.  $(= \acute{a}$ -gam-s,  $\acute{a}$ -gam-t); from yam-'restrain', a-yān, 3. sing. aor. (= a-yām-s-t); from dám-'house', gen. (pátir) dán<sup>9</sup>

mute has been dropped, as in zwiidhi = yungdhi (see a).

<sup>3</sup> Excepting in a few instances  $\dot{n}$  or nbefore the -su of the loc. pl.

<sup>4</sup> Excluding the semivowel v.

<sup>5</sup> Cp. WHITNEY 50 and 75.

<sup>6</sup> Cp. WACKERNAGEL I, 177, note.

<sup>7</sup> WHITNEY 75.

TOP. cit. I, 162.

8 This change of m to n may be due
Excepting in a few instances when a to the influence of the cognate forms in which m phonetically becomes n when final (below 3).

<sup>9</sup> On this explanation of dán (denied by Pischel, VS. 2, 307 ff.) see especially BARTHOLOMAE, IF. 8, in 'Arica' 229-249; also Richter, KZ. 36, 111-123, on dámpati-.

'of the house' (= dam - s). Here the change of m to n was evidently due (as in 1) to the dental s or t which originally followed.

- 47. The cerebral n.—This nasal, like the cerebral mutes, is an Indian innovation. It is for the most part the result of a regular phonetic development, but is also in a number of words due to Prakritic influence.
- A. Besides regularly appearing before cerebral mutes, e. g. in dandá-'staff', the cerebral n phonetically takes the place of dental n after  $r r s^2$ , either immediately preceding, e. g. nrnam 'of men', várna- 'colour', usná-'hot'; or when only vowels 3, guttural or labial mutes 4 or nasals, y v or h, intervene; e. g. krpána- 'misery'; krámana- 'step'; ksóbhana- 'exciting'. This rule is followed throughout within a word even when a s which it contains is produced by Sandhi<sup>5</sup>; thus not only trpnóti (trp-'be satisfied') and grbhnáti (grbh- 'seize'), but also u suvānáh (for suvānáh, IX. 1078). In su-sumná-'very gracious' (where the s is produced by internal Sandhi), the dental n remains probably owing to the influence of the simple word sumná-.
- a. The cerebralization of dental n takes place almost as regularly in verbs compounded with the prepositions prá 'before', párā 'away', pári 'round', nir (for nis) 'out'; as well as in nominal derivatives of these combinations. But the r does not cerebralize n when there is tmesis or any other preposition but  $\bar{a}$  intervenes<sup>6</sup>. The cerebralization takes place:
- I. in the initial of roots; e. g. práṇak (naś- 'reach'); parāṇúde (nud-'thrust); pra-neti- 'guide' ( $n\bar{\imath}$ - 'lead'). But n remains if r or ks follows; hence pránrtyat (AV.) from nrt- 'dance', and pári naksati 'encompasses' (naks- 'reach'). The cerebralization is also absent, without this dissimilating cause, in abhi prá nonu- (SV.) beside abhí prá nonu- 'shout towards', and in prá-nabh-8 (AV.) 'burst'.
- 2. medially or finally in the roots hnu- 'hide', an- 'breathe', han-'strike' (though not in forms with ghn); thus pári-hņutā (AV.) 'denied'; prániti 'breathes'; nir hanyāt (AV.), but abhi-pra-ghnánti.
- 3. in suffixal n the cerebralization fluctuates: it always takes place in the n of the 1. sing. subj., e. g. nír gamāni; not always in the pres. base of hi-'impel'; e. g. prá hinomi, etc., but pari-hinomi<sup>9</sup>; never in that of mináti 'diminishes' or of minóti 'establishes'; it is also absent in yáju skannám (X. 1813) 10; but -trnna- (VS.), from trd- 'pierce'.
- b. In nominal compounds cerebralization takes place less regularly when there is r r or s in the first member, and n in the second:
- 1. an initial n is here nearly always cerebralized in the RV.: e. g. dur-náman- 'ill-named'; prá-napāt- 'great-grandson'; also dur-nása- (AV.) 'un-

I The dental n may stand for l in carmamná- 'tanner' (cp. cármāṇi mlātāni): BR. hiatus in declension, e. g. kavi-n-ā; and in ksepnú- 'springing'. the perf. red. syllable an-, e. g. in anreur; cp. WACKERNAGEL I, 175 c, note.

<sup>2</sup> The cerebral mutes and nasal not only do not cerebralize a n separated from them by a vowel, but even stop the influence of a preceding r r s; thus in reduplication only the first n is cerebralized; e. g. pranināya (nī- 'lead'); cp. maninā inst. of mani-'pearl' (B.b.). This arises from a disinclination to pronounce cerebral mutes and nasals in successive syllables.

3 On the absence of cerebralization in XIII. 12. ústrānām and rāstrānām, see above 42 a, α.

5 In one curious instance, sám ... pinák (beside pinasti, from pis-'crush'), the cerebral lost at the end of a syllable has transferred its cerebral character to the beginning of the syllable.

6 The preposition ni following another containing r is mostly cerebralized.

 7 Cp. above 42 a, α.
 8 Cp. tri-nabhi- 'three-naved', and vṛṣanābhi- 'strong-naved'.

9 Cp. VPr. 111. 87; APr. 111. 88; IV. 95; TPr.

10 Cp. WACKERNAGEL I, 167 b &.

<sup>4</sup> In some instances where the mute immediately precedes the n, the cerebrali-According to BENFEY, it is used to fill the zation does not take place; e. g. vrtra-ghné;

attainable', dur-nihita- (AV.) 'ill-preserved'; but (because a r r or s follows) not in -nrmna- 'manhood', -niṣṭhā- 'eminent'; -niṣṣṭdh- 'gift'; -nirṇij- 'adornment'; nor (owing to the intervening gh and m) in  $d\bar{\imath}rgh\acute{a}-n\bar{\imath}tha$ , N.,  $yusm\acute{a}-n\bar{\imath}ta$ -'led by you'. The cerebralization is further absent, without any preventing cause, in akṣā-náh- 'tied to the axle' (beside parī-ṇáh- 'enclosure'); tri-nāká- 'third heaven'; tri-nābhi- 'three-naved', and vṛṣa-nābhi- 'great-naved'; pinar-nava-'renewing itself' (but AV. punar-nava-); dur-niyantu- 'hard to restrain'.

2. it is less frequent medially; e. g. pūrvāhná- forenoon'; aparāhná- (AV.) 'afternoon'; nr-vāhaṇa- 'conveying men'; pra-vāhaṇa- (VS.) 'carrying off'; purīṣavāhaņa- (VS.) beside purīṣa-vāhana- (TS. K.) 'removing rubbish'; nṛ-maṇas-'kind to men', vfsa-manas- 'manly-spirited', but fsi-manas- 'of far-seeing mind'; dru-ghaná- 'wooden club', but vrtra-ghné, dat., 'Vrtra-slaying'; su-sumná- 'very gracious'; su-pra-pāná- 'good drinking place'; nṛ-pāṇa- 'giving drink to men'; but pari-pāna- 'drink', pari-pāna- (AV.) 'protection'; pary-uhyamāṇa- (VS.) beside  $pary-uhyam\bar{a}na-(\sqrt{vah}-)$ .

c. Even in a closely connected following word cerebralization may

take place after r r s in the preceding one.

I. This is frequently the case with initial n, most usually in nas 'us', rarely in other monosyllables such as nú 'now', nú 'like' 2; e. g. sahó sú nah (VIII.  $7^{3^2}$ ). Initial *n* occasionally appears thus in other words also; e.g. pári netá .. visat (IX. 1034); srnga-vrso napāt (SV., napāt, RV.); asthūri nau (VS., no RV. TS.); (gómad) ū sú nāsatyā (VS.) prá nāmāni (TS.); púnar nayāmasi (AV.); suhār nah (MS.) = suhārd nah; vār nāma (TS. v. 6.13).

2. Medial " also occurs thus, most often in the enclitic pronoun ena-'this'; e. g. indra enam. It occasionally appears in accented words also after final r: gór ohéna (1. 1805); nír énasah (AV.); nfbhir yemānáh (SV., yemānáh, RV.); panibhir  $v\bar{v}y\dot{a}m\bar{a}nah$  (TS.)<sup>3</sup>. A final n is treated as medial and cerebralized thus in trn imán (MS.) and akṣāṇ áva (MS.).

**B.** In a number of words n has a Prakritic origin.

a. It is due to a preceding r or r which has been replaced by a i uor has disappeared through assimilation. This is indicated to be the case by the appearance beside them of cognate words containing r or l sounds: I. in Vedic itself: thus āni- 'pin of the axle'; kāná- 'one-eyed', beside karná-4 'crop-eared' (MS.); kána- (AV.) 'particle': kalá- 'small part'; jañjaṇā-bhávan 'glittering' : jūrni- 'glow' (-jan- probably = jṛn- from old pres. \*jṛnāti); puṇya-'auspicious': pr- 'fill'; phan- 'bound' (= \*phrn-, \*pharn-) cp. parpharat 'may he scatter'; dhānikā- 'cunnus': dhārakā- (VS.), id.—2. in allied languages: gaṇá- 'crowd'; paṇ- (VS.) 'purchase'; vaṇij- 'merchant'5; áṇu- 'minute'; kiṇāru-'having a withered arm'; pāni- 'hand'; sthāni- 'stump'6.

b. Owing to the predilection for cerebrals in Prakrit, which substituted n for n throughout between vowels, even without the influence of neighbouring cerebrals, one or two words with such n seem to have made their way into Vedic: mani- 'pearl' (Lat. monile); amnáh (MS.) 'at once': amnáh

(AV.), id.7.

c. The exact explanation of the n in the following words (some of which may be of foreign origin) is uncertain: kánva-, N.; kalyāṇa- 'fair';

kānuká-, of doubtful meaning; nicumpuná-, of doubtful meaning; niník 'secretly', ninyá-i 'inner'; pani-, a kind of demon; bāná-'arrow'; vāná-'udder', 'arrow', 'music'; vānī- 'music'; vānīcī-, a kind of musical instrument; śóna- 'red'; ilgana-(SV. VS.), of doubtful meaning; kúnapa- (AV.) 'corpse'; guṇá- 'division' (AV.); cupunīkā-(TS.), N.; nicankuņá-(TS.) and nicunkuņá-(TS.), of doubtful meaning; venú- (AV.) 'reed'; śánu- (AV.) 'hemp' 2.

- 48. The semivowels.—The semivowels y, r, l, v have the peculiarity that each has a vowel corresponding to it, viz. i r l u respectively. They are called anta(h)sthā in the Prātisākhyas3, the term doubtless meaning 'intermediate', that is, standing midway between vowels and consonants.
- a.  $\nu$  and  $\nu$  regularly represent the final i and  $\nu$  of diphthongs before vowels, e and ai becoming ay and  $\bar{a}y$ , o and au av and  $\bar{a}v$ . But while y and vare regularly written for i and u before vowels, they were often pronounced as iv and uv. This is shown by the fact that:
- 1. iv and uv are frequently written, beside y and v, in the inflexion of  $\bar{z}$ - and  $\bar{u}$ -stems. Thus from  $dh\bar{z}$ - 'thought', there are several compounds, in some of which the stem is written with iy before vowels, as itthadhiy- 'very devout', in others with y, as adhy-'longing'. Similarly jū- 'hastening', regularly appears as -juv-; but-pū-'purifying', -sū-'swelling', -sū-'bringing forth', always as -pv-, -sv-, -sv-4. In the same way, the suffix -ya is often written -iya; e. g. ágr-iya- 'first', beside ágr-ya- (VS.); ŕtv-iya- and ŕtv-ya- 'regular'; urv-iyá and urv-ya (VS. TS.) 'widely'. This spelling is characteristic of the TS. Here iy is generally written where more than one consonant precede, almost invariably so in the inflexion of stems in i and ī; e. g. indrāgniy-ós of Indra and Agni', lakşmiyá 'by Lakşmī'; very often also in the suffix -ya; e. g. áśviya- beside áśr-ya- (RV.) 'relating to horses' 5. Similarly uv appears here for v in súvar- and suvargá- 'heaven', beside svàr (RV.) and svargá- (RV.); in the inflexion of tanú-'body', in some forms of vāyú-'wind', bāhú-'arm', ūrú-'thigh'6. In the SV. and MS.7 there are two or three other examples of iv and uv for y and  $v^8$ .
- 2. according to metrical evidence, y and v (though written as pronounced in classical Sanskrit) have a syllabic value in a large number of examples in the Vedic hymns 9. This was recognized to be the case by the Prātiśākhyas 10.
- 3. r appears instead of r before the suffix -ya; e. g. in pitr-ya- 'paternal', from pity- 'father'.
- 4. ay āy ey appear before the suffix -ya 11; e. g. saha-séy-yāya, dat., 'for lying together'. Here yy is always to be read as y-iy in the RV. (except in Book x and dak s d y y a- in 1. 129<sup>2</sup>)<sup>12</sup>.

GGA. 1858, p. 1627.

<sup>&</sup>lt;sup>2</sup> On these words see Wackernagel I,

<sup>174</sup> b and 173 d, note.
3 RPr. 1. 2; VPr. IV. 101; also Nirukta II. 2. Cp. WHITNEY on APr. I. 30.

<sup>4</sup> Cp. WACKERNAGEL I, 181 a, note.

<sup>5</sup> Several other examples, loc. cit.

<sup>6</sup> Cp. WHITNEY on TPr. II. 25.

<sup>7</sup> See Wackernagel 1, 181 a, note (p. 201,

<sup>8</sup> On the other hand there are some isolated instances of y and v in the Vedas as compared with iy and uv in classical Sanskrit; see WACKERNAGEL I, p. 201, bottom.

<sup>9</sup> In certain words and formatives y and  $v \mid 4$  and 5. are regularly consonantal: in the relative  $y\acute{a}$ -;

Perhaps from \*nirnaya-, see BENFEY, the present suffix -ya; the comp. suffix -yas; the gen. ending -sya, and the fut. suffix -sya; the initial v of suffixes; the nv- of the 5th class; in ásva-'horse' and tvásty-, N. On the other hand the syllabic pronunciation is sometimes used artificially by the poets, as is apparent from the isolation of such occurrences. In some individual words the written iy and uv have to be pronounced as consonantal  $\nu$  and  $\nu$ : always in suvāná-. pres. part. of su-'press'; occasionally in bhiyás- 'fear', hiyāná- 'impelled'. Cp. WACKERNAGEL 1, 181 b, note,

<sup>10</sup> RPr. VIII. 22; XVII. 14.

II See Grassmann, Wb. 1711, columns

<sup>12</sup> WACKERNAGEL I, 181 c y.

That this syllabic pronunciation was not simply i and u (with hiatus), but iy and uv, is rendered probable not only by the spelling iy uv beside yv, but by the consideration that y and v are respectively the natural transition from i and u to a following dissimilar vowel.

b. In the RV. y and v are pronounced with a syllabic value under the following conditions:

I. almost invariably after a group of consonants and generally after a single consonant if preceded by a long vowel. Thus the ending -bhyas and the suffix -tya are regularly pronounced as dissyllables after a long vowel, but as monosyllables after a short vowel. Hence, too, v is pronounced as well as written in the forms davidhv-át, suṣv-ati, suṣv-āṇá-, juhv--l, juhv-ati-.

2. after a single initial consonant at the beginning of a verse, or, within a verse, if the preceding syllable is heavy, in some half dozen words. Thus  $ty\acute{a}$ - 'that', and  $tv\acute{a}m$  'thou' are nearly always pronounced as they are written after a short vowel, but  $tiy\acute{a}$ - and  $tuv\acute{a}m$  at the beginning of a Pāda or after a long vowel. The y is pronounced as iy in  $jy\acute{a}$ - and  $jy\bar{a}k\acute{a}$ - 'bowstring' only at the beginning of a verse or after a long vowel, in  $jy\acute{a}yas$ -'mightier' only after a long vowel. Finally tva- 'many', must generally be read as tuva- after a long vowel, but almost invariably tva- after a short vowel.

3. in the inflexion of the nouns in  $\overline{\tau}$  (nom. sing.  $-\overline{\iota}$ -s) and  $\overline{\iota}^2$ , where the stem has (with only six exceptions) to be pronounced with iy and  $\iota\iota\iota\tau$ .

Thus the transition from iy and uv to y and v began in the RV., the traditional text writing for the iy and uv which was pronounced by the poets of that Veda, sometimes iy and uv, sometimes y and v.

a. This semivowel sometimes appears without etymological justification: I. after roots in -ā before vowel suffixes; e. g. dā-y-i, 3. sing. aor. (dā- 'give'), á-dhā-y-i (dhā- 'put'), á-jñā-y-i (jñā- 'know'); upa-sthā-y-am, abs. 'approaching'; ṛṣabha-dā-y-in- (AV.) 'bestowing bulls'. This is probably due to the influence of roots in -ai (27 a), which have ā- before consonants, but āy- before vowels; e. g. pai- 'drink': pā-tave, á-pāy-i, pāy-ána-.—2. owing to the influence of closely allied words or formations, in: yū-y-ám 'you' (for "yūṣam, Av. yūžem, cp. yuṣ-má-, stem of other cases) because of vay-ám 'we'; bhā-y-iṣtha- 'most' because of bhā-yas- 'more'; bhāve-y-am, I. sing. opt. (for "bhāvayam) because of bhāves, bhāvet, etc.

b. very rarely in the later Samhitās after palatals: tiraścyć (AV. xv. 35) var. lect. for tiraścó, dat., 'transverse'; śnyáptra- (TS. 1. 2. 133): śnáptra- (VS.) 'corner of the mouth'.

c. interchanging (after the manner of Prakrit) occasionally with  $v^6$  in

<sup>\*</sup> On vyūrņv-án, vy-ūrņv-atī-beside aporņuvántas, see Wackernagel I, 182 a α, note.

<sup>&</sup>lt;sup>2</sup> See below 375, 382 a.

<sup>3</sup> For various explanations of this see WACKERNAGEL I. 182 a  $\gamma$ , note (p. 205).

<sup>4</sup> See Brugmann, KG. 1, 302.

<sup>5</sup> Cp. WACKERNAGEL I, 86 c; 187, note.

<sup>6</sup> In  $khy\bar{a}$ - 'tell', y seems at first sight to be interchanged with the s of  $ks\bar{a}$ -, which occurs in the K. and the MS. (cp. v. SCHROEDER'S ed., I, p. NLIII, 7); but the two verbs, though synonymous, have probably a different origin. Cp. WACKERNAGEL I, 188 c, note.

the Samhitās of the YV.; e. g. ātatāyin- (VS.) beside ātatāvin- (TS.) having one's how drawn'r.

- 50. The semivowel v.— This sound was, at the time of the Prāti-sākhyas², a voiced labio-dental spirant like the English v or the German w. Within Vedic it is very frequently derived from  $u^3$ . It seems otherwise always to be based on IE. u; there is no evidence that it is ever derived from an IE. spirant v which was not interchangeable with  $u^4$ .
- a. This semivowel is sometimes found interchanging with  $b^5$ , with  $y^6$ , and according to some scholars, with  $m^7$ .
- b. In two roots in which v is followed by r, an interchange of sonantal and consonantal pronunciation, together with metathesis takes place, vr becoming ru: hence from dhvr-'bend' are derived both -dhvr-t- and -dhru-, -dhru-t-, -dhru-t-; from hvr-'go crooked', -hvr-t-, -hvr-ta-, -hvr-t- and hru-u-u-t-t-, -hv-t-t-, -hru-t-t-. The root rudh- 'grow', may be a similar variation of vrdh- 'grow'.
- 51. The semivowel r.— The liquid sound r must originally have been a cerebral, as is shown by its phonetic effect on a following dental n (47 A). By the time of the Prātiśākhyas<sup>9</sup>, it was, however, pronounced in other phonetic positions also. Being the consonantal sound corresponding to r before vowels (like y v to i u), it is in that position correspondingly graded with  $\tilde{a}r$ ; e. g.  $\hat{a}$ -kr-an,  $\hat{a}$ -kr-ata, beside  $\hat{a}$ -kr- $th\bar{a}s$ :  $\hat{a}$ -kar-am, aor. of kr- 'do'; dr-u-:  $d\hat{a}r$ -u- 'wood'.
- a. r generally corresponds to r in the cognate languages, but not infrequently to l also; and where these languages agree in having l, the latter may in these instances be assumed to be the original sound. As old Iranian here invariably has r, there seems to have been a tendency to rhotacism in the Indo-Iranian period l0. Words in which Vedic r thus represents IE. l1 are the following:
- I. initially: raks- 'protect'; ragh-ú- 'swift'; ranhate 'speeds'; rabh- 'grasp'; ramb- 'hang down'; rā- 'bark'; ric- 'leave', rip- 'smear'; rih- 'lick'; ruc- 'shine', ruy- 'break'; rudh- and ruh- 'grow'.
- 2. medially: ángāra- 'coal'; ajirá- 'agile'; aratní- 'elbow'; arh- 'be worthy'; iyárti 'sets in motion'; īr- 'set in motion'; īrnā- 'wool'; īrmi- 'wave'; garitmant-, a celestial bird; gardabhá- 'ass'; gárbha- 'womb'; cakrá- 'wheel'; car- 'move'; caramá- 'last'; cirá- 'long'; chardis- 'protection'; dhāri- (AV.) 'sucking'; parash- 'axe'; piparti 'fills'; phr- 'fort'; purh- 'much'; prath- 'spread out'; -prh-t- 'swimming', -prha- part. 'floating', pravate 'waves'; márdhati 'neglects'; -marsana- (AV.) 'touching'; mūrdhán- 'head'; vará- 'suitor', and various forms of vr- 'choose'; várcas- 'light'; saraná- 'protecting'; sárman- 'protection'; sárkara- 'gravel'; sísira- (AV.) 'cold season'; sri- 'lean'; sru- 'hear'; srni- 'buttock'; sar- in forms of sr- 'run', and sarirá- (VS.) 'flood'; sarpís- 'clarified butter'; sahásra- 'thousand'; svàr- 'heaven'; sárya- 'sun'; harít- and hárita- 'yellow'; híranya- 'gold'; hrādini- 'hail' 'I.

<sup>&</sup>lt;sup>1</sup> Cp. Benfey, GGA. 1852, 114f.; Weber, IS. 2, 28; Wackernagel I, 188 c.

<sup>&</sup>lt;sup>2</sup> See Whitney on APr. I. 26.

<sup>3</sup> See above 48 a.

<sup>4</sup> Cp. WACKERNAGEL I, 196; BRUGMANN, KG. I, 148 and 155.

<sup>5</sup> See 45 a, 3.

<sup>6 49</sup> c. 7 46 c.

<sup>8</sup> For some other possible instances see WACKERNAGEL I, 18; b, note.

<sup>9</sup> See WHITNEY on APr. I. 20, 28.

To It seems as if the Vedic relation of r to l could only be accounted for by assuming a mixture of dialects; one dialect having preserved the IE. distinction of r and l; in another IE. l becoming r (the Vedic dialect); in a third r becoming l throughout (the later  $M\bar{s}gadh\bar{t}$ ). See Brug-Mann, K.G. 1, 175, note.

- b. r appears in place of phonetic d = z, IIr.  $\dot{z}$ ) as final of stems in -is and -us, before endings which begin with bh-; e. g. havir-bhis and vápur-bhis. This substitution is due to the influence of Sandhi, where is, us would become ir, ur. r also takes the place of d in  $lr\bar{d}$ - beside  $id\bar{d}$ - refreshing draught'. In urubjá- 'wide open' r apparently takes the place of dental d  $(=*ud-ubj\acute{a}-)$ , perhaps under the influence of the numerous compounds beginning with uru-'wide', e. g. uru-jri-'wide-striding'2.
- c. Metathesis of r takes place when dr would be followed by s or h + consonant. Under these conditions it appears to be phonetic, being due to the Svarabhakti after r being twice as great before h and sibilants as before other consonants<sup>3</sup>: when a vowel followed the sibilant or h (e.g. darśatá-)4, the Svarabhakti was pronounced; but if a consonant followed,  $r\ddot{a}$  took the place of  $\ddot{a}r$  + double Svarabhakti. This metathesis appears in forms of  $dr\dot{s}$ - 'see' and  $sr\dot{j}$ - 'send forth':  $dr\dot{a}stum$  (AV.),  $drast\dot{r}$ - (AV.) 'one who sees';  $s\acute{a}m$ -srastr-'one who engages in battle', 2. sing. aor.  $sr\bar{a}s$  (= \* $sr\bar{a}k$ )<sup>5</sup>; also in prás-ti- 'side-horse', beside párs-u- and prsti- 'rib'; moreover in brahmán-'priest', bráhman- 'devotion', beside barhis- 'sacrificial litter' (from brh- or barh- 'make big'); perhaps also drahyát 'strongly' (drh- 'be firm'). The same metathesis occurs, being, however, very rare and fluctuating, before ks-: thus tuvi-mraksá- 'injuring greatly', mraksa-kŕtvan- 'rubbing to pieces' (from mrj- 'wipe', or mrś- 'stroke'), but tárksya-, N.6.
- 52. The semivowel /. The liquid sound / is the semivowel corresponding to the vowel ! (which however occurs only in some half dozen perfect and agrist forms of the root klp- 'be adapted'). It is pronounced at the present day in India as an interdental; but it must have had a postdental sound at the time of the Prātišākhyas?, by which it is described as being pronounced in the same position as the dentals8.
- a. It represents IE. /9 and, in a few instances, IE. r. It is rarer in Vedic than in any cognate language except old Iranian (where it does not occur at all)  $^{10}$ . It is much rarer than r, which is seven times as frequent  $^{12}$ . The gradual increase of l, chiefly at the cost of r, but partly also owing to the appearance of new words, is unmistakable. Thus in the tenth Book of the RV. appear the verbs mluc- and labh-, and the nouns lóman-, lohitá-, but in the earlier books only mruc- 'sink', rabh- 'seize', róman- 'hair', rohitá-'red'; similarly dasangulá- 'length of ten fingers', hladaka- and hladika-vant-'refreshing', beside sv-anguri- 'fair-fingered', hradá- 'pond'. Moreover, while in the oldest parts of the RV. l occurs 12 in a few words only, it is eight times as common in the latest parts. Again, in the AV. it is seven times as common as in the RV.<sup>13</sup>; thus for rap- 'chatter', rikh- 'scratch', a-śrīrá-'ugly', appear in the AV. lap-, likh- (also VS.), aślīlá-. The various texts

<sup>&</sup>lt;sup>2</sup> On a supposed parasitic r in chardis-'fence', yájatra- 'adorable', vibhrtra- 'to be borne hither and thither', see WACKERNAGEL I, 189, note γ.

<sup>3</sup> According to the APr. I. JOI.

<sup>5</sup> Cp. v. NEGELEIN, Zur Sprachgeschichte

<sup>6</sup> On the interchange of ra and ar in raj- 'colour', rajatá- 'silvery', rāj- 'shine', and árjuna- 'bright'; bhrāj- 'shine', and bhárgas-'brilliance'; bhraty- 'brother', and bharty- 'husband'; see Wackernagel I, 190 e, note 18, 2, p. 258f.; Vedic Metre p. 37, 3- (end). In vrajá- 'fold', vratá- 'ordinance', 13 Cp. Wackernagel I, 191 c.

sráj- 'wreath', ra- does not stand for ar, WACKERNAGEL I, 190 d, note.

<sup>7</sup> Cp. PISCHEL, BB. 3, 264. An indication that it was not a cerebral is the fact that Is never occurs (while rs is common).

<sup>8</sup> See 44.

<sup>9</sup> Which, however, is largely represented by r also: cp. 51 a. 10 Loc. cit.

<sup>11</sup> See WHITNEY, JAOS. 11, p. XLff.

<sup>12</sup> See ARNOLD, 'L in the Rigveda', in Festgruss an Rudolf von Roth, 1893, p. 145 -148; Historical Vedic Grammar, JAOS.

of the YV. also show an increased number of words with l as compared with the RV.; thus babhluśá- (VS.) 'brownish' beside babhrú- 'brown'; kúlāla- (VS.) 'potter' beside carú- 'pot'. The MS. has a special predilection for  $l^{\tau}$ ; thus pulītát 'pericardium' beside purītát (AV. VS.). The SV. has pāṃsulá- 'dusty', for pāṃsurá- in the corresponding passage of the RV.

In a certain number of words r interchanges with l in the same period: thus puril- and pulil- 'much'; misrá- and -misla- 'mixed'; jargur- and jalgul-, intv. of  $g\bar{r}$ - 'swallow'; in the AV.: -girá- and -gilá- 'swallowing', ksudré-

and ksullaká- (= \*ksudla-ka) 'small', tiryà- and tilá- 'sesamum'.

The above considerations render it probable that the Vedic dialect was descended from an Indo-Iranian one in which rhotacism had removed every  $\ell$ . But since the oldest parts of the RV. contain some words with IE.  $\ell$ , and in its later parts as well as in the other Samhitās  $\ell$  predominantly interchanges with r representing IE.  $\ell$ , there must have been another Vedic dialect in which IE. r and  $\ell$  were kept distinct; from the latter  $\ell$  must have found its way into the literary language to an increasing extent<sup>2</sup>.

b. In the oldest parts of the RV. there are no verbal forms which preserve IE. I, and only a few nouns, viz. (u)loká-'free space', ślóka-'call', and -miśla-'mixed'. A few other words containing I have no IE. cognates and may therefore be of foreign origin: nila-'dark-coloured', jálāṣa-'healing',

tilvila- 'fertile', and the denominative tilvilāyáte.

In the latest parts of the RV. / represents IE. / in: r. verbal forms and primary derivatives: lebhāra, lebhāna, from labh- 'grasp', layantām, from lī- 'cling'; alipsata, aor. of lip- 'anoint'; lobhayantī- part. from lubh- 'desire'; calā-calā-, -cācall- 'swaying' (also puṃs-calī- 'whore', AV. VS.), from cal- 'move'; plavate, plavā- 'boat', from plu- 'swim'.

2. the following nouns:  $log\acute{a}$ - 'clod';  $ill\bar{u}ka$ - 'owl';  $ulk\acute{a}$ - 'meteor'; illba'membrane';  $kal\acute{a}\acute{s}a$ - 'jar';  $kal\acute{a}$ - 'small portion';  $k\acute{a}la$ - 'time';  $kaly\acute{a}na$ - 'fair'; killa'family';  $g\acute{a}ld\ddot{a}$ - 'trickling' (VS. gal- 'drop');  $palit\acute{a}$ - 'grey'; pulu- (in compounds)
'much';  $phalgv\grave{a}$ - 'weakly';  $b\acute{a}la$ - 'strength'³; ball- 'tax';  $m\acute{a}la$ - 'dirty garment';  $salil\acute{a}$ - 'surging';  $hl\acute{a}daka$ - and  $hl\acute{a}dik\bar{a}vant$ - 'refreshing'; also words with the suffix -la4, especially with diminutive sense; e.g.  $vrs\acute{a}$ - $l\acute{a}$ - 'little man',  $s\acute{s}s\acute{a}$ -la- 'little child' <sup>5</sup>.

a. In the later Samhitās l represents IE. l in the following words: -kulva- (VS.) 'bald'; klóman- (AV. VS.) 'lung'; gláhana- (AV.) 'dicing'; gláu- (AV. VS.) 'excrescence'; tulā- (VS.) 'balance'; palāva- (AV.) 'chaff'; pula-sti- (VS.) 'smooth-haired'; plīhān- (AV. VS.) 'spleen'; phalgi- (VS.) 'reddish'; laghi- (AV.) 'light'; lap- (AV.) 'prate' (= rap- RV.).

c. On the other hand, / to some extent represents IE. r also 6.

I. In the RV. this value of l is rare and occurs only in the neighbourhood of labial sounds (u, o, p, m, v):  $ul\acute{u}khala$ - 'mortar' beside  $ur\acute{u}$ - 'broad'; jalgul-, intv. of  $g\bar{r}$ - 'swallow';  $pl\acute{u}s\dot{r}$ -, a kind of insect, beside prus- 'squirt';  $kl\acute{u}s\dot{r}$ - 'call' beside  $kr\acute{u}sant$ - 'calling',  $krosan\acute{u}$ - 'crying';  $-lohit\acute{u}$ - 'red',  $lodh\acute{u}$ -, a kind of red animal, beside  $roh\acute{t}$ -,  $rohit\acute{u}$ - 'red';  $lop\bar{u}s\acute{u}$ - 'jackal', lup- (AV.) 'break', beside rup- 'break'; lipala- 'upper millstone' beside  $up\acute{u}ri$  'above';  $j\acute{u}l\acute{v}$ - 'muttering'; plppala- 'berry';  $ml\bar{u}$ - 'fade' beside mr- 'die';  $val\acute{u}$ - 'cave' beside  $v\acute{u}rate$  'encloses'.

2. In the later Samhitās the use of this l = IE. r extends further than in the RV.; thus  $\hat{a}lam(AV.)$  'enough':  $\hat{a}ram$ ;  $\hat{l}i\acute{s}$ - (VS.) 'tear':  $ri\acute{s}$ -;  $-lu\~nc\acute{a}$ - (VS.)

L. v. Schroeder, ZDMG. 33, 196.

<sup>&</sup>lt;sup>2</sup> See WACKERNAGEL I, 192 b, and cp. above p. 42, note <sup>10</sup>.

<sup>3</sup> Cp. above p. 36, note 10.

<sup>4</sup> See ARNOLD, Festgruss an Roth 147.

<sup>5</sup> See WACKERNAGEL I, p. 218.

<sup>6</sup> Cp. above 51 a.

'tearing out'; babhluśá- (VS.) 'brownish': babhrú- 'brown'; sthūlá- (AV. VS.) 'gross': sthūrá-1.

3. In a few instances l represents IE. r by dissimilation; thus álarsi álarti, intv. of r- 'go' (= arar-); prá tilāmi (VS.) = prá tirāmi 'I promote'2.

d. In the later Samhitas / occasionally appears in place of phonetic d3 between vowels; and that this change could easily arise, is shown by the fact that l regularly appears instead of d between vowels<sup>4</sup>. This substitution is regularly found in the Kanva recension of the VS.; e. g. ile = ide (RV. ile);  $ds\bar{a}lh\bar{a} = ds\bar{a}dh\bar{a}$  (RV.  $ds\bar{a}lh\bar{a}$ ). Other instances are ildyati (AV.) 'stands still', for \*idáyati (RV. ilayati) 5 from id- 'refreshment'; ilā- (MS.) 'refreshment', byform of ida- (RV. ila-); mīl- (AV.) 'close the eyes'6, connected with mis-'wink'.

In the later Samhitas 1 is also found for d between vowels when the final of a word (like l in RV.): thus turāṣāl áyuktāsah (VS.) for turāṣāţ 'overpowering quickly'; phál iti (AV.) for phát (AV.); probably also in śál iti (AV.) and bál íti (AV. TS.), cp. RV. bál itthá.

e. In at least one word l stands for dental d: ksulla-ká- (AV.) 'small'. for \*ksudlá-, byform of ksudrá- (VS.) 'small'.

f. Sometimes I has an independent Indian origin in onomatopoetic words;

thus alala-bhávant- 'sounding cheerfully'.

- g. On the other hand there are many words in which a foreign origin may be suspected; such are, besides those already mentioned in 45 b, the following: kaulitará-, N.; álina- and bhalānás-, names of tribes: libuja- 'creeper'; lavaná- (AV.) 'salt'.
- 53. The sibilants. The three sibilants, the palatal s, the cerebral s, and the dental s, are all voiceless. Even apart from the regular phonetic change of s or s to s, and of s to s, both the palatal and the dental are further liable, in many words and forms, to be substituted for each of the other two.
  - a. Assimilation of s is liable to occur
- **1.** initially, when s' or s appear at the end of the same or the beginning of the next syllable. This is the case in śváśura- 'father-in-law'; śvaśrú-'mother-in-law'; smásru- and -smasaru- 'beard'; sásvant- 'ever-recurring'; in sás- 'six' (Lat. sex), and its various derivatives, sas-ti- 'sixty', sodhá (= \*saz $dh\bar{a}$ ) 'sixfold', and others7.
- initially s in the RV. almost invariably becomes s in sah-'overcoming', when the final  $h (= IIr. \dot{z})$ , with or without a following dental, becomes cerebral: nom. sing. sat victorious, and the compounds jana-sat, turasát, purā-sát, pṛtanā-ṣát, vīrā-ṣát, vṛthā-ṣát, ṛtā-ṣát (VS.), viśvā-ṣát (TS. AV.); also á-sādha- 'invincible'. The only exceptions are sādhā, nom. sing. of sādhy-'conqueror', and the perf. part. pass. sādhá- (AV.)8. The s of the nom. has been transferred to forms with -sah-, when compounded with prtana-, though

In B. passages of the TS. and MS. are found intv. forms of  $l\bar{\iota}$  'sway': álelāyat, pf. lelāya, also the adv. lelāyā 'quiveringly'. In similar passages the prepositions prá and párā are affected: plenkhá- (TS.) = prenkháswing'; plākṣārayan (MS. III. 102) 'they caused to flow' (Vksar-), palā-y-ata (TS.) 'fled' (parā-i-). Some uncertain or wrong explanations of alātṛṇá- 'miserly', uloká- 'wide space', gal-'drop', with l = IE. r, are discussed by (1.83). WACKERNAGEL I, p. 221, top.

<sup>3</sup> See above 51 b.

<sup>4</sup> See above p. 5, note 5.
5 According to Böhtlingk, iláyati is wrong for iláyati. Cp. above p. 35, note 1. 6 A form with the original d is found in

mīdam (K.) 'in a low tone'. 7 Cp. WACKERNAGEL I, 197 a, note.

<sup>8</sup> Â B. passage of the MS. has sāḍhyái

there is no phonetic justification for the cerebral (as the s is preceded by  $\bar{a}$ ): thus  $prtan\bar{a}$ - $s\bar{a}ham$ , gen.  $prtan\bar{a}$ -sahas,  $prtan\bar{a}$ -saham (SV.). When compounded with  $dyumn\bar{a}$ -,  $dhanv\bar{a}$ -,  $rath\bar{a}$ -,  $vibhv\bar{a}$ -,  $sad\bar{a}$ -, the phonetic form  $-s\bar{a}h$ - remains  $\bar{a}$ .

3. Medial s has been assimilated to initial s' in s'asiá- 'hare' (IE. kasó-2).

- b. Without assimilation<sup>3</sup>, s or s has been changed to s, mostly under the influence of allied words, in the following: kéśa- 'hair': késara-(AV. VS.); śákṛt⁴ 'excrement'; śubh- 'adorn' (probably owing to śudh- 'purify'); śúṣka- 'dry' (IIr. suška-), śúṣyati 'dries'; śru- 'flow', śrávas- 'stream': sru-, srávas-; śvas-, śuṣ- 'breathe'; śvátra-, śvátrya- 'dainty': svad- 'taste'<sup>5</sup>; pyāśiṣīmahi (AV.): pyāsiṣīmahi (VS.), aor. (534) of pyā- 'swell'; ośiṣṭha-hán- (VS. TS.) 'striking very swiftly' beside oṣiṣṭha-dávan- (TS.) 'giving very rapidly' (from oṣám 'quickly', lit. 'burningly'), owing to áśiṣṭha- 'very swift'; kóśa- 'receptacle' (in the later language often also koṣa-); kūśmá- (VS.) beside kūṣmá- (MS.), a kind of demon; ruśati- (AV.) 'angry', beside ruṣ- 'be angry', probably owing to rúśant- 'shining'.
- a. On the other hand, s occasionally appears in the later Saṃhitās, chiefly AV., for  $\dot{s}$ : thus asyate (AV. v. 19²):  $a\dot{s}$  'eat';  $v\dot{a}\dot{s}\bar{i}$  (AV.) 'pointed knife':  $v\dot{a}\dot{s}\bar{i}$ -;  $s\dot{a}ru$  (AV.) 'arrow':  $\dot{s}\dot{a}ru$ -; arus-srāṇa- (AV.), a kind of wound preparation:  $\dot{s}r\bar{a}$  'boil'; saspiñjara- (TS.) 'ruddy like young grass', owing to  $sas\dot{a}$  'grass', for  $\dot{s}as$ -piñjara- (VS. MS.) =  $\dot{s}as[pa]$  piñjara-6.
- 54. The palatal  $\dot{s}$ .—This sibilant is a palatal both in origin (= IIr.  $\dot{s}$ ), as indicated by cognate languages, and in employment, as its combination with other consonants shows. Thus it represents an old palatal in satam 'a hundred', aśva-'horse', śván-'dog', śru-'hear'. In external Sandhi it regularly appears before voiceless palatal mutes, e. g. indras ca. At the present day the pronunciation of  $\dot{s}$  in India varies between a sh sound (not always distinguished from  $\dot{s}$ ) and a  $\dot{s}$  sound followed by  $\dot{y}$ . It is to some extent confused with the other two sibilants even in the Samhitās, but it is to be noted that here it interchanges much oftener with  $\dot{s}$  than with  $\dot{s}$ .

a. In external Sandhi s regularly appears for s before the palatals c, ch,  $s'^{12}$ . It also stands for s internally in paścát and paścátāt 'behind'  $^{13}$ , and

in vršcáti 'hews' beside -vraská- 'lopping'.

b. Before s the palatal sibilant when medial is regularly replaced by k, and sometimes also when final; e. g. dfk-sase and -dfk, from dfs-'see'. Otherwise s' very rarely interchanges with k or c; thus rusant-'brilliant', beside ruc-'shine'; perhaps kárna-'ear': sru-'hear'14. There are also a few words

WACKERNAGEL I, 197 b.

5 Op. cit. p. 226, top.

8 See above 53, 3.

<sup>&</sup>lt;sup>2</sup> See, however, op. cit. I, 197 c, note.

<sup>3</sup> For s and s are strictly distinguished in the RV.; cp. op. cit. 1, 197 d  $\alpha$ , note (end).

<sup>4</sup> Cp., however, op. cit. I, 197 d  $\alpha$ .

<sup>6</sup> See op. cit., p.  $226\beta$ ; and below 64, 1 a. 7 On the relation of s to the corresponding

sounds in cognate languages, see Wacker-Nagel I, 200 a; Brugmann, KG. I, 233.

<sup>9</sup> Cp. above 40.

<sup>10</sup> The fact that s before s regularly becomes k and sometimes also when final, seems to favour the assumption of the guttural pronunciation.

<sup>&</sup>lt;sup>11</sup> Cp. Wackernagel 1, 200 b.

<sup>12</sup> See below, Sandhi, 78.
13 Cp. Av. paskāt and pasca.

<sup>14</sup> For some words in which such an assumption is doubtful or wrong, see WACKER-NAGEL I, 201 a.

with s' to which k corresponds in the satem languages; such are krus'- 'cry'; áśman- 'stone' 1.

55. The dental s.— This sound as a rule represents IE. dental s; e. g. sa 'he', Gothic sa; ásva-s 'horse', Lat. equo-s; ásti, Gk. έστι. In the combinations ts and ps, when they stand for etymological dhs and bhs, the s represents IE. zh; as in girtsa- 'adroit' (from grdh- 'be eager') and dipsa-, 'wish to injure' (from dabh- 'injure'), where the final aspirate of the root would have been thrown forward on the suffix, as in bud-dhá- from V budh-, and -rab-dha-, from  $\sqrt{rabh^{-2}}$ .

The dental s is in Sandhi frequently changed to the palatal s', and still more frequently to the cerebral s4.

56. The cerebral s. — The cerebral sibilant is altogether of a secondary nature, since it always represents either an original palatal or an original dental sibilant.

The cerebral s stands for a palatal before cerebral tenues (themselves

produced by this s from dental tenues) in the following two ways:

a. for the palatal s' (= IIr. s') and j (= IIr. s'); e. g. nas-ta'-, from nas'-'be lost'; mṛṣ-ṭa, 3.sing.mid., from mṛj- 'wipe'; pṛṣ-ṭá- 'asked', práṣ-ṭum 'to ask', from pras- 'ask' in pras-ná- 'question' (present stem prechá-5 with inchoative suffix -chá). In some instances it is shown by the evidence of cognate words to represent s; thus astau 'eight' beside astti- 'eighty'; prsti- 'rib', prasti-'side-horse', beside párśu- 'rib'; ástrā- 'goad', beside aśáni- 'thunderbolt'; possibly also apāsthá-6 'barb', beside ásman- 'bolt'.

b. for the combination ks, which in origin is  $s' + s^7$ ; e. g. cás-te, a-casta, from cakṣ-8 'see'; a-taṣ-ṭa, taṣ-ṭá-, táṣ-ṭṛ-9, beside takṣ- 'hew'; n/r-aṣ-ṭa-'emasculated' beside nir-akṣ-ṇu-hi (AV.) 'emasculate'; also aorist forms like á-yaṣ-ṭa, 3. sing. mid. from yaj- 'sacrifice', beside 3. sing. subj. yákṣ-at; á-sṛṣ-ṭa, 3. sing. mid., beside d-srks-ata, 3. pl. mid. from srj- 'emit'. As in all these instances ks = s' + s or j = s' + s or jthe remaining s' or j combining with the following t as usual to  $st^{11}$ . A similar origin of s is indicated by the evidence of cognate languages in sas-thá- (AV.) 'sixth', where the final s has been dropped (as in Gk.  $\tilde{s}\kappa$ - $\tau o s$ ), while retained in Lat. sex-tus; also in sas-ti- 'sixty', sodhā 'sixfold', sodasā- (AV.) 'sixteenth'. It has possibly the same origin in asthīvánt- 'knee' 12.

57. The cerebral s stands for dental s after vowels other than  $\alpha$  or  $\bar{\alpha}$ , and after the consonants k, r, s.

r. Medially this change regularly  $^{13}$  takes place, both when the s is radical — e. g. ti-sthati, from stha- 'stand'; su-sup-ur, 3. pl. perf. from svap-

the IE. pronunciation; cp. WACKERNAGEL I, 201 b.

<sup>&</sup>lt;sup>2</sup> See Wackernagel 1, 210.

<sup>3</sup> Cp. above 54 a, and below 78, 2.

<sup>4</sup> See below 56.

<sup>5</sup> Cp. 40.

<sup>6</sup> Cp. WACKERNAGEL I, 202 b; and below p. 48, note γ.

<sup>7</sup> Cp. op. cit. 1, 116 b.

<sup>8</sup> Cp. Av. cašman-.

<sup>9</sup> On the origin of tvástr- = \*tvarstr-, see WACKERNAGEL I, 202 c, note.

<sup>10</sup> Though ks is regularly based on a palatal or a guttural+s in the Vedic language, there are some words of IE. origin in which sisies (III. 3215), sisieur (II. 241), beside sisieatur. the s appears to represent not s but a dental

This seems to point to fluctuation in spirant tenuis (1) or media (1). In a few words, ksip-, kşu-, kşubh-, kşurá-, the sibilant comes first in the cognate languages: see Wackernagel 1, 209.

II Similarly, when ks = guttural + s is followed by t, the s disappears and the guttural combines with the t; thus from ghas- 'eat', -gdha- (= ghz-ta-); from jakṣ- 'eat', jagdhá-(= jaghz-ta-), jagdhvāya (= jaghz-tvāya); from bhaj- 'share', aor. á-bhak-ta (=abhaj-s-ta), beside á-bhak-s-i.

<sup>12</sup> Cp. BARTHOLOMAE, Studien zur indogermanischen Sprachgeschichte 2, 103.

<sup>13</sup> The change does not take place in some forms of the perfect of sic- 'pour':

'sleep'; us-and, part, from vas- 'wear'; rsa-bhd- 'bull'; uksdn- 'ox'; varsd- 'rain' — and when the s is suffixal; as in the superlative suffix -istha; in the loc. pl. suffix -su, e. g. agni-su, aktil-su, nf-su, vik-sil, gir-sil, havis-su; in the s-suffix of the aorist, e. g. ydk-s-at, from yaj- 'sacrifice'.

The change is phonetic even when Anusvāra intervenes between  $\check{\imath}$   $\check{\imath}$   $\check{\imath}$  and s; e. g. pimsánti from pis- 'crush'; havimsi 'offerings' from havis-; cáksūmsi 'eyes' from cáksus-. The s, however, remains in forms of hims- 'injure', nims- 'kiss', and pums- 'man', being probably transferred from the strong forms hinásti, půmāmsam, etc.

- a. The s, however, remains when immediately followed by r or r, owing to a distaste for a succession of cerebrals 1; e. g. tisrás, tisrbhis, tisrpām, f. of tri- 'three'; usrás gen, usri and usrām, loc. (beside uṣar, voc.), usrá- 'matutinal'; usrá- 'bull'; sarīsrpā- 'creeping'. Owing to the influence of forms with sr, the s further remains in the syllable sar, instead of ṣar, as in sisarsi, sisarti (beside sisrate, sisrat-, sarsré etc.). In késara- (AV. VS.) 'hair', the retention may be due to the r having originally followed the s immediately 2. The s also remains unchanged in the combinations stir, stūr, spar, spr, sphūr; e. g. tistiré, from stṛ- 'strew'; pispṛsas, from spṛ- 'touch'3. It remains in the second of three successive syllables in which s-ṣ-s would be expected; thus yāsisīṣṭhās, beside ayāsiṣam, from yā- 'go'; sisakṣi, beside siṣakti, from sac- 'follow'.
- β. Words in which s otherwise follows r or any vowel but α, must be of foreign origin; such as bisa- 'root fibre'; busá- 'vapour'; bṛˈsaya-, a demon; ṛˈbɪɪ̄sa- 'cleft'; kīstá- 'praiser'; bársvá- (VS.) 'socket'; kushla- (AV.), a kind of demon; músala- (AV.) 'pestle' (for músra-?); sɪ̄sa- (AV. VS.) 'lead'4.
- γ. The cerebral s is sometimes found even after α, representing an early Prakritic change in which as, is based on rs and αs on arss. Instances of this are kaṣati (AV.) 'scratches'; μαṣṭhαταĥ- (VS. TS.) 'young bull' (lit. 'carrying on the back') and μαṣṭhαταĥ- 'young cow', beside pṛṣṭhά- 'back'; μᾱṣγὰ- ' 'stone'; bhaṣά-8 (VS.) 'barking'9. There are besides several unexplained instances, doubtless due to foreign influence or origin; such are ἀṣatara- 'more accessible'; kaváṣa-, N.; αấṣa- 'blue jay'; caṣāla- 'knob'; jálāṣa- 'remedy'; baṣkāŋa- 'yearling'; baṣkiha- (VS.) 'decrepit'; māṣa- 'bean' (AV. VS.); śáṣpa- (VS.) 'young grass' 10.
  - 2. Initially 11 the change regularly takes place, in the RV.:
- a. in verbal compounds after prepositions ending in *i* or *u*, and in nominal derivatives from such compound verbs; also after the preposition nis 'out'; e. g. ni sīda (x. 984); ánu stuvanti (VIII. 38); niḥ-sáhamāṇaḥ (I. 1273).
- a. But (as when it is medial) the s remains unchanged when followed by r (even when t or p intervenes) or r (even though a intervene, with an additional m or v in the roots smar- and svar-); e. g. vi srja 'let flow', vi-sṛṣṭi- 'creation'; vi stṛṇtām 'let him extend'; ni-spṛṣte 'to caress' (but á-ni-sṛṭta- 'unchecked'); prāri-sṛnta- 'flowed round'; vi-saryā- 'end', vi-sārjana- 'extension' (owing to the influence of the forms with sr from sṛṭ-); vi-sarmān- 'dissolving', vi-sārā- 'extent', and even vi sasre (owing to the influence of forms with sr from sṛ- 'flow'); prāti smarethām 'may ye two remember' (Vsmṛ-); abhi-svāranti 'praise', abhi-svār- 'invocation', abhi-svare', loc., 'behind', abhi-svareṭ- 'invoker'. But st sp sph are changed according to the general rule, when ār ir ur follow; e. g. prāti sphura 'repel'. In roots which contain no r, the initial s rarely remains; thus in forms of as- 'be': abhi santi, piri santu, pāri santi (beside pāri ṣanti), abhi syāma (beside abhi-ṣyāma); and owing to dislike of repeated s: anu-sēṣidhat (sidh- 'drive off'); ānu-spaṣṭa- 'noticed' (spaś- 'see'); pāri sani-ṣvaṇat (svan- 'sound').

<sup>2</sup> See Wackernagel 1, 50.

<sup>&</sup>lt;sup>1</sup> Cp. above 42 a,  $\alpha$  and p. 38, note <sup>2</sup>.

<sup>3</sup> The combination sr is found only where sr would be quite isolated amid cognate forms with ss; thus ajus-ran, from jus-be satisfied', since all the other very numerous forms of this verb have ss.

<sup>4</sup> See Wackernagel I, 203 e, note.

<sup>5</sup> Sometimes representing also IE. & and &; cp. WACKERNAGEL 1, 208 b α.

<sup>&</sup>lt;sup>6</sup> Cp. Bartholomae, KZ. 29, 579; Windisch, KZ. 27, 169.

<sup>7</sup> Cp. FORTUNATOV, BB. 6, 217; J. SCHMIDT, KZ. 32, 387.

<sup>8</sup> FORTUNATOV, l. c.

<sup>9</sup> On doubtful instances like kāṣṭhā-'goal', aṣṭhīvántau 'knees', apāṣṭhá- 'barb', cp. WACKERNAGEL I, 208 b α, note; b β, note.

<sup>&</sup>lt;sup>10</sup> Cp. Wackernagel 1, 208 b  $\beta$ .

II Finally, s stands for s in the first

β. In the later Samhitās initial s is similarly changed to s; but its retention is in some instances somewhat less restricted; thus abhi sphūrjati (AV.) 'sounds towards'; á.hi skanda (AV.) and abhi-skándam<sup>1</sup>, beside pari-skandá- (AV., VS.), from sland- 'leap'; prati-spāšana- (AV.) 'lying in wait', prati-spāša- (TS.) 'spying'; ánu sthana (TS. V. 6. 1³), from as- 'be'; owing to the following s also in abhi susyade (AV., from syand- 'run'.

γ. The divergence between the later Samhitās and the RV. is much greater when the augment intervenes between a preposition ending in i and the initial s of a root. In the RV, the s regularly remains unchanged (as ny-ásīdat, vy-ásīdāt, etc.) except in pary ásasvajat 'embraced' (under the influence of pár sasvaje). In the other Samhitās, however, the s here regularly becomes s; thus abhy-áṣiñcan (TS.), abhy-ásscyanta (AV.) from sic-'sprinkle'; vy-àṣahanta (AV.)², from sah-'overcome'; ádhy-aṣṭhīm (AV.), ádhy-aṣṭhīt (AV.), abhy-àṣṭhīm (AV.) from sthīt-'stand'. In the root ṣṭhīv-'spit', which first occurs in the AV., the initial s has been displaced by s throughout. The form fraty áṣṭhīwan indicates the transition which led to the change.

Similarly when a reduplicative syllable containing  $\ddot{a}$  intervenes between a preposition ending in i and an initial radical s, the latter always remains unchanged in the RV.; thus  $f \dot{a}ri sasvaje$ ; ni-sas $\dot{a}tth\ddot{a}$  (VIII. 489); ati-tasth $\dot{a}u$  (X. 603); but the AV. has vi-tasth $\dot{a}r\dot{c}$ ,

vi tasthe (owing to vi tisthate, vi-sthita-), but also ádhi tasthur.

b. Initially in the second member of other than verbal compounds s is more common than s when preceded by vowels other than d. But s even in the RV. the is not infrequently retained; not only when r or r follows as in hrdi-sprs- 'touching the heart', su-sartu-, N., rsi-svara- 'sung by seers', but also when there is no such cause to prevent the change; thus gd-sakhi- beside gd-sakhi- 'possessing cattle'; go-sani- (AV. VS.) beside go-sani- 'winning cattle'; rayi-sthan- beside rayi-sthan- (AV.) 'possessing wealth'; tri-sapta- beside tri-sapta- (AV.) 'twenty-one'; su-samiddha- beside su-samiddha- (SV.) 'well-kindled'; apake-stha- (AV.) 'standing in the oven' beside su-stha- in other compounds after -e-; prthivi-sad- (VS.) beside prthivi-sad- (AV.) 'seated on the earth'; su-samrdaha- (AV.) 'quite perfect'. After r the s becomes s in svar-sa- 'light-winning', svar-sa- 'obtainment of light'; after s, probably only in su-sama- (TS.) 'resembling a su-sa- beside su-sama- (VS.).

a. In Avyayībhāvas s seems to appear in the RV. only; thus anusvadhám 'according to wish'; anu-satyám 'according to truth'; anu-svápam

'sleepily'.

β. In some compounds s appears where it is not phonetically justifiable, owing to the influence of cognate words; thus upa-stit, adv., 'at one's call' (because of the frequency of -stu- after i and u), beside upa-stut- 'invocation'; sa-stilbh- (TS.), a metre, owing to anu-stubh-, tri-stilbh-; savya-sthá- (AV.), owing to compounds in -e-stha-.

7. In Amredita compounds, however, the s regularly remains unchanged because of the desire to leave the repeated word unaltered; thus suté-sute and somé-some 'at every Soma draught'; also in stuhí stuhí 'praise on'3.

3. Initially in external Sandhi s frequently becomes s after a final i and u in the RV. This change chiefly takes place in monosyllabic pronouns and particles, such as  $s\dot{\alpha}(s)$ ,  $s\dot{\alpha}$ ,  $sy\dot{\alpha}(s)$ ,  $s\bar{\imath}m$ , sma, svid, and particularly  $s\dot{n}$ . It also appears in verbal forms like stha sthas sthana, santu,  $sy\bar{\alpha}m$ ,  $sy\bar{\alpha}ma$  (from as- 'be');  $s\bar{\imath}dati$ , satsat, satsi (from sad- 'sit');  $si\tilde{n}ca$ ,  $si\tilde{n}cata$  (from sic- 'pour');  $stav\bar{\alpha}ma$ , stave, stuhi (from stu- 'praise'); in participles like  $s\dot{\alpha}n$ ,  $sat\dot{\alpha}s$  (from as- 'be');  $s\dot{\imath}dan$  (from sad 'sit');  $suv\bar{\alpha}n\dot{\alpha}s$  (su- 'press');  $sit\dot{\alpha}m$  (si- 'bind');  $stut\dot{\alpha}s$  (stu- 'praise');  $skann\dot{\alpha}m$  (skand- 'leap'). In other words the change

member of the compound and often in 3 This is not treated as an Amredita external Sandhi; see below 78.

1 Cp. APr. II. 104.

1 This is not treated as an Amredita compound in the Padapātha (VIII. 13°): stuhi stuhi it; but pibā-piba (II. 1111) is

<sup>2</sup> Cp. Whitney's Translation of the AV. analyzed as piba-piba it...
1, p. LXIV (mid.).

Indo-arische Philologie I, 4.

rarely takes place; e. g. ánu rājati stúp (IX. 9618); trī ṣadhásthā (III. 565);

nih sadhásthāt1 (v. 319); nú sthirám (i. 6415); ádhi snúnā (ix. 9716).

The s usually follows short words such as u, ti, ni, si, hi, and occurs where there is a close syntactical connection of two words; e. g. rajahsu sidan (VII.  $34^{16}$ ); vansu sidati (IX.  $57^3$ ); divi san (VII.  $2^6$ ); divi santu (V.  $2^{10}$ ); rcchánti sma (X.  $102^6$ ). In no word, however, even when these conditions are fulfilled, is the change of initial s to s invariably made.

a. In the later Samhitās, apart from passages adopted from the RV. thisform of external Sandhi is very rare except in the combination u sú. Examples are ád u stenám (AV. IV. 34); máhi sád dyumán námah (TS. III. 2. 82)2.

58. The breathing h.—The sound h is, at the present day, pronounced as a breathing in India, and this was its character at the period when Greek and Indian words were interchanged, as is shown e. g. by ώρα being reproduced by hora. It is already recognised as a breathing by the TPr. (II. 9), which identifies it with the second element of voiced aspirates (g-h, d-h, b-h). This is borne out by the spelling  $\overline{a} \in l-h$  (=dh) beside  $\overline{a} \in l$ (=d). The TPr. further (II. 47) assigns to it, on the authority of some, the same place of articulation as the following vowel, this being still characteristic of the pronunciation of h at the present day in India<sup>3</sup>. The breathing is, moreover, stated by the Prātiśākhyas to have been voiced. This pronunciation is proved by the evidence of the Samhitas themselves; for h is here often derived from a voiced aspirate, e. g. hitá- from dhā- 'put'; it is occasionally replaced by a voiced aspirate, e. g. jaghána from han- 'strike'; and in Sandhi initial h after a final mute regularly becomes a voiced aspirate, e. g. tád dhí for tád hí. It is in fact clear that whatever its origin (even when = IIr. £h)5, h was always pronounced as a voiced breathing in the Samhitas.

As h cannot be final owing to its phonetic character<sup>6</sup>, it is represented in that position by sounds connected with its origin<sup>7</sup>. It appears in combination with voiced sounds only; being preceded only by vowels, Anusvāra, or the semivowels r and  $\ell^8$  (in Sandhi also by the nasals  $\dot{n}$  and n), and followed

only by vowels, the nasals n, n, m, or the semivowels y, r, l, v.

The breathing h as a rule represents a voiced aspirate, regularly a palatal aspirate, occasionally the dental dh and the labial bh. It usually represents a new palatal (= IIr. jh, Av.  $j^9$ ), appearing beside gh, e. g. druhyih: drugha-, as j beside g, e. g. druhyih-: But in many words it also stands (like j for d) for the old palatal d, the voiced aspirate of d, being recognizable as such in the same way as d<sup>10</sup>.

ra. h represents the palatalization (= IIr. jh) of gh when, in cognate forms, gh (or g) is found before other sounds than s; e. g. hán-ti 'strikes': ghn-ánti, jaghāna;  $\acute{a}rhati$  'is worthy':  $argh\acute{a}$ - 'price';  $rh-\acute{a}nt$ - 'weak':  $ragh-\acute{a}$ - 'light';  $j\acute{a}mh-as$ - 'gait':  $j\acute{a}ngh\bar{a}$ - 'leg';  $d\acute{a}hati$  'burns':  $dag-dh\acute{a}$ - 'burnt';  $d\acute{b}hate$  'milks':  $digh\bar{a}na$ - 'milking',  $dug-dh\acute{a}$ - 'milked';  $dudr\acute{b}ha$  'have injured':  $drug-dh\acute{a}$ - 'injured',  $dr\acute{g}ha$ - 'injurious';  $m\acute{a}mhate$  'presents':  $magh\acute{a}$ - 'gift';  $m\acute{h}$ - 'mist':

r ih and uh produce the same effect as simple i and u, as they were originally pronounced as is and us (cp. Sandhi, p. 71, e 2); e. g. agni(s) stave; yaju(s) skannam.

<sup>&</sup>lt;sup>2</sup> Cp. Wackernagel i. 207 b. <sup>3</sup> Cp. Whitney on APr. i. 13 and TPr. 1. 47.

<sup>4</sup> See RPr. I. 12; XII. 2; APr. I. 13.

<sup>5</sup> See below 1 b.

<sup>6</sup> See below, Sandhi, 66.

<sup>7</sup> Ibid. b 6, 8.

<sup>&</sup>lt;sup>8</sup> The combination *lh* is rare; it is found in *upa-valh*- (VS.) 'test by riddles'; *vihálha*-(AV.), of unknown meaning; and in the Kāṇva recension of the VS. as representing *dh* 

<sup>9</sup> Cp. 36. This h being related to gh as j is to g, it must represent IE. gh. This survives, with loss of the aspiration, in jahi (= IIr. jha-dhi), 2. sing. impv. of han-'strike'. 10 Cp. 41.

meghá- 'cloud'; múhyati 'is perplexed': mugdhá- 'gone astray', múgha- 'vain'; rámhi- 'speed': raghú- 'swift'; háras- and gharmá- 'heat'; harmye-sthá- and gharmye-sthā- 'dwelling in the house'; hṛṣitá- 'glad': ghṛṣu- 'joyful', ghṛṣui-'gladdening'. In ahi- 'serpent' and duhit'- 'daughter' the guttural origin of h is shown by cognate languages t.

b. h represents the old palatal aspirate (=  $IIr. \frac{2}{3}h$ ):

a. when, either as a final or before t, it is replaced by a cerebral (like the old palatals s' and j = IIr. s'; e. g. vah- 'carry': a'-vat, 3. sing. aor. guh- 'conceal' : gūdhá-2 'concealed'; trháti 'crushes' : trdhá-3; dṛmhati 'makes; firm', drhyati 'is firm': drdhá- 'firm'; bahh- 'abundant': bādhá- 'aloud'; mih-'make water' : médhra- (AV.) 'penis'; riháti 'licks' : rédhi 'licks', rīḍha- 'licked'; váhati 'carries': vódhum 'to carry', ūdhá- 'carried'; sáhate 'overcomes': sádhr-'victor'.

β. when it is followed by sounds which do not palatalize gutturals. before which dh and bh do not become h, and before which the other old palatals s' and j'(=s') appear; thus amhas- and amhati- 'distress' because of anhi- 'narrow'; áhan- 'day', because of áhnām, g. pl., and pūrvāhņá-'forenoon' (not ghn as in ghnanti from han-); jehamāna-5 'panting', because of jihmá- 'oblique'; bāhú- 'arm'; bráhman- n. 'devotion', brahmán- 'one who prays'; rāhú- (AV.), demon of eclipse; yahvá-, yahvánt- 'ever young', because of vahú-, id. This applies to all words beginning with hū-, hr-, hr-, hr-, hv-; e. g. hu- 'pour'; hrd- and hfdaya- 'heart'; -hraya- 'ashamed'; -hvū-, hū-'call'; hvr- 'be crooked'.

y. when the 'satem' languages have a corresponding voiced spirant  $(z \text{ or } z)^6$ ; thus ahám 'I'; ehá- (AV.) 'desirous'; garhate 'complains of'; dih-'besmear'; plīhán- (AV. VS.) 'spleen'; barhís- 'sacrificial straw'; mah- 'great'; varāhá- 'boar'; sahásra- 'thousand'; sinhá- 'lion'; sprh- 'desire'; hamsá- 'goose'; hánu- 'jaw'; hi- 'impel'; hemán- 'zeal', heti- 'weapon'; háya- 'steed'; hári- and hárita- 'tawny'; háryati 'likes'; hásta- 'hand'; hā- 'forsake'; hāyaná- (AV.) 'year'; hí 'for'; himá- 'cold'; híranya- 'gold'; hirá- (AV. VS.) 'vein'; hims-'injure'; hesas- 'wound'; hy- 'take'; hyas 'yesterday'?.

 $\delta$ . h according to the evidence of cognate languages, represents other palatals in some words. Thus in h/d-'heart', s' = IE. k would be expected; and  $j={
m IE.}~\hat{g}~{
m in}~ah\acute{a}m$  'I',  $mah\acute{a}nt$ - 'great',  $h\acute{a}nu$ - 'jaw',  $h\acute{a}sta$ - 'hand',  $hv\bar{a}$ -,  $h\bar{u}$ -'call'. These irregularities are probably due to IE. dialectic variations8.

2. h also represents dh and bh not infrequently, and dh at least once.

a. It takes the place of dh in four or five roots (with nominal derivatives) and in a few nominal and verbal suffixes. Thus it appears initially in hitá-, -hiti-, beside -dhita-, dhiti-, from dhā- 'put'. Medially it is found in gāhate 'plunges' (with the derivatives gāhá- 'depth', gáhana- 'deep', dur-gáha-'impassable place') beside gādhá- 'ford'; rɔˈhati 'rises', 'grows' (with the derivatives ri/h- 'growth', rɔˈhana- 'means of ascending', rɔˈhas- 'elevation') beside rúdhati 'grows' (with the derivatives vī-rúdh- 'creeper', -rúdha- 'growing', ródhas- 'bank', ā-ródhana- 'ascent'); derivatives of \*rudh- 'be red': rohit-, róhita-,

<sup>&</sup>lt;sup>1</sup> Cp. Wackernagel i, 214 b.

for gugh-tá-), the cerebral z disappearing but also nah- 'bind'- in spite of nad-dhá-. In leaving the vowel long.

<sup>3</sup> Cp. 12 and 17, 5. 4 See above 41, 2.

<sup>5</sup> See WHITNEY, Roots, under jeh; and

cp. 41 a, 2.

6 This includes several examples given under  $\alpha$  and  $\beta$ .

<sup>7</sup> Perhaps also in has- 'laugh' and ha-<sup>2</sup> That is for \*guzdhá (through guzh-tá- 'go', as these verbs have no forms with gh; several words the origin of the h is uncertain, e. g. jángahe 'struggles', as the evidence is doubtful.

<sup>8</sup> See WACKERNAGEL I, 216 b; for a few doubtful examples, ibid. 216 a, note.

-lohitá- 'red', beside lodhá- 'reddish animal', rudhirá- (AV.) 'red'; also rauhinábeside rudhikrá-, names of demons; the evidence of cognate languages further shows that h represents dh in grhá-'house'r.

h moreover represents dh in the adverbial suffix -ha in viśvá-ha beside viśvá-dha 'always'; in sahá 'together', beside sadha- in compounds; in ihá 'here', as shown by the Prakrit idha; and doubtless also in sama-ha 'somehow'. though there is no direct evidence. The evidence of cognate languages, moreover, shows that in the endings of the 1. du. -vahe, -vahi, -vahai and the 1. pl. -mahe, -mahi, -mahai h represents dh (cp. Gk. - $\mu$ s $\ni$ a, etc.)<sup>2</sup>.

b. h takes the place of bh in the verb grah-, grh- 'seize' (with its derivatives gráha- 'ladleful', gráhi- 'demoness', grāhy'i- 'to be grasped', grhá-'servant', hasta-gi-hya 'having take the hand') beside grabh-, grbh- (with the derivatives grábha- 'taking possession of', grābhá- 'handful'); and in the nouns kakuhá- 'high', beside kak'ibh- 'height', kakubhá- (VS. TS.) 'high', m. (AV.) a kind of demon; bali-hrt- 'paying tax' (beside bhr- 'bear'); probably bariaha-'udder'(?), if formed with suffix -ha = -bha (in rṣa-bhá-, etc.) 3.

c. h takes the place of dh in bárbrhi, 2. sing. impv. of the intv. bárbrhof the root brh- 'make strong', for \*barbrdhi (= \*barbrzdhi, with the cerebral dropped after lengthening the preceding r in pronunciation)4.

d. The rule is that h appears for dh, dh, bh, only between vowels5, the first of which is unaccented; e. g. ihá, kakuhá-, gṛhá- bárjaha-, bali-hṛtrauhiná-, sahá. Similarly in grabh- 'seize', h alone appears after unaccented r in RV.I-IX6; while on the other hand, in the 2. sing. impv. of graded roots, -dhi regularly appears after strong and therefore originally accented vowels; e.g. bodh! (from bhū- 'be'), yidhi (from yu- 'yoke'), yuyodh! (from yu- 'separate'); śiśādhi, but śiśīhi (śā- 'sharpen'). Again, in rudh- 'rise', the unaccented form of the root is regularly ruh-, while when it is accented, forms such as ridhati appear beside rihati, and in nominal derivatives dh predominates in accented radical syllables, the RV. having  $r \beta dha$ - and  $\bar{a}$ -rodhana- only, but the AV. ríha- and āríhana-1.

a. At the same time dh and bh remain in a good many instances after an unaccented vowel; thus in the 2. sing. impv. kṛ dhi, ṣadhi, ṣrudhi; in adhas 'below', adhamá- 'lowest', abhí 'towards'; pbhú- 'deft'; mīḍhá- 'reward'; medhá- 'wisdom'; vidháti 'adores'; vidhú- 'solitary'; vidhávī- 'widow'; vadhú- 'bride'; sīdhú- 'right'; rudhirá- (AV.) 'red'; derivatives formed with -dhi-, -bhi-, etc. The retention of the dh and bh here is partly to be explained as an archaism, and partly as due to borrowing from a dialect in which these aspirates did not become h, and the existence of which is indicated by the Prakrit form idha beside the Vedic ihá 'here'. The guttural aspirate media is probably to be similarly explained in meghá- 'cloud' and arhá- 'sinful'.

<sup>1</sup> Cp. Wackernagel 1, 217 a.

6 In RV. x, however, gráha- and gráhi-

7 Exceptions like rôhita-, viśváha and WACKERNAGEL I, 217 a, note, where several inflected forms such as gahate, are due to

in spite of naddhá-; nah- rather stands for followed by a vowel. IIr. naźh- (cp. Lat. necto); the pp. instead of \*nādhá-, became naddhá- through the in- occur; cp. above, 2 b. fluence of baddhá- from bandh- bind'. Cp. other wrong explanations of h = dh are normalization. discussed.

h is explained as =bh are discussed in WACKERNAGEL I, 217 b, note.

<sup>4</sup> Cp. 12 and 17, 5.

<sup>5</sup> It appears initially in hitá- = -dhita-, but originally it was doutbless preceded in Cp. WACKERNAGEL I, 219 a. this position by a final vowel. That h

appears, though a vowel does not follow, <sup>2</sup> The h in the perf. aha, ahur, may in grhuatu (1v. 57) and hasta-grhya, is due represent dh; not, however, in náhyati binds, to other forms of grabh in which h is

<sup>8</sup> Where the RV. fluctuates between h and 3 Some erroneous etymologies in which dh bh (above 2, a, b), h appears throughout in the later Samhitas; thus always -hi, after vowels in imperatives except edhi 'be'; thus for *sprnudhī* (RV. vIII. 843), SV. has *sprnuhī*. But a new h of this kind hardly occurs.

- 3. The various origins of h led to some confusion in the groups of forms belonging to roots which contain h.
- a. roots in which h represents an original guttural (IIr. jh) show some forms which would presuppose an old palatal (IIr. 5h). Thus from muh- be confused', phonetic derivatives of which are mugdhi-, migha-, are formed mūdhá- (AV.) 'bewildered' and mühur 'suddenly'.
- b. roots in which h represents an old palatal (IIr. 2h) show forms with a guttural before vowels and dentals; thus from dih- 'besmear' is formed digdhá- (AV.) 'owing to the influence of dah- 'burn', and duh- 'milk'. Similarly, from \*saráh- 'bee', beside saráubhyas, is formed sāraghá- (AV. VS.) 'derived from the bee'.
- c. the root ruh-, though =  $r_h dh$  'ascend', is treated as if the h represented (as in vah-) an old palatal (Hr. zh); hence aor. áruksat, des. rúruksati, pp. -rūdha- (AV.), ger. rūdhvá (AV.).
- 59. The cerebral /. This sound, as distinguished from the ordinary dental l, is a cerebral l2. It appears in our (Sākala) recension of the RV. as a substitute, between vowels, for the cerebral d and, with the appended sign for h, for the cerebral aspirate  $dh^3$ ; e. g.  $d\bar{a}$  'refreshment';  $d\bar{a}$ 'invincible'. It also appears in Sandhi when final before an initial vowel; e. g. turāṣāļ abhibhūtyojāḥ (III. 43<sup>4</sup>). In the written Samhitā text, however, it does not appear if followed by a semivowel which must be pronounced as a vowel; e. g. vīdr-ànga- 'firm-limbed', to be pronounced as vīlú-anga- and analysed thus by the Padapātha. In one passage of the RV. the readings fluctuate between l and l in nilarat or nilavat (VII. 976)4.
- 60. Anusvāra and Anunāsika. Anusvāra, 'after-sound', is a pure nasal sound which differs from the five class nasals; for it appears after vowels only, and its proper use is not before mutes, but before sibilants or h(which have no class nasal). But it resembled the class nasals in being pronounced, according to the Prātiśākhyas of the RV. and the VS.5, after the vowel. The vowel itself might, however, be nasalized, forming a single combined sound. The Prātiśākhya of the AV.6, recognizes this nasal vowel, called Anunasika, 'accompanied by a nasal', alone, ignoring Anusvara, which with the preceding vowel represents two distinct successive sounds. Whitney 7, however, denies the existence of any distinction between Anunasika and Anusvāra. In any case, the Vedic Mss. have only the one sign ' (placed either above or after the vowel) for both<sup>8</sup>, employing the simple dot - where neither Anusvāra nor Anunāsika is allowable. The latter sign is used in the TS. for final m before y v, and in both the TS. and MS. before mutes instead of the class nasal9, a practice arising from carelessness or the desire to save trouble. There is thus no ground for the prevalent opinion that o represents Anunasika and - Anusvara 10. Throughout the present work m with a dot (m) will be used for both, except if they appear before a vowel, when m with the older sign (m) will be employed.

The root sagh- 'take upon oneself', has no connexion with suh- 'overcome'; note. See also WHITNEY on APr. 1. 29. nor vāghát- institutor of a sacrifice', with vah- 'convey'. The relation of go-nyoghas-'streaming among milk', to vah- is uncertain; cp. WACKERNAGEL I, 220 b,

<sup>&</sup>lt;sup>2</sup> Cp. above 42.

<sup>3</sup> This practice is followed by the Mss. of secondary texts of the RV.

<sup>4</sup> Cp. Benfey, Gött. Abhandl. 19, 138,

<sup>5</sup> See RPr. XIII. 13; VS. 1. 74 f., 147 f.

<sup>6</sup> See WHITNEY on APr. I. II.

<sup>7</sup> On TPr. II. 30; JAOS. 10, LXXXVII.

<sup>8</sup> Cp. WHITNEY on TPr. II. 30.

<sup>9</sup> ln the MS. also when -am is written for

<sup>10</sup> See WHITNEY, JAOS. 7, 92, note.

Anusyāra and Anunāsika are commonest when final. As in that position they belong to the sphere of Sandhi, the conditions under which they then appear, will be stated below . Medially Anusvara and Anunasika are found under the following conditions:

a. regularly before sibilants and h; e. g. vamśá- 'reed'; havimsi 'offerings'; māmsá- 'flesh': simhá- 'lion'. This is generally recognized as the sphere of Anusvāra, except by the APr.2; but māmścatú- 'light yellow', is stated3 to have Anunāsika, while pumścali- (AV. VS.) is said to have both Anunāsika and Anusvāra4. The Anusvāra usually appears before s, and all forms with ms are shown to be based on original ns or ms by the evidence of cognate forms corroborated by that of allied languages 5; thus mánisate, 3. sing. subj. aor. of man- 'think'; jighāmsati, des. from han- 'strike'; piņīsanti beside pinásti, from pis-'crush'; the neuter plurals in -āmsi, -īmsi, -ūmsi from stems in -as, -is, -us, with nasal after the analogy of -anti, nom. acc. pl. from neuters in -nt; stems in -yāms, -vāms beside nom. sing. in -yān, -vān; kramsyáte (AV.) from kram- 'stride'. When Anusvara appears before s' and h derived from an IE. palatal or guttural, it represents the corresponding class nasal. The reduction of these old nasals to Anusvara is probably IIr. after long vowels  $(\bar{a}m, -\bar{t}mr, -\bar{u}mr)$ ; probably later after short vowels, for it does not appear in forms like áhan (for áhans), though s was not dropped after an in the IIr. period; but the s must have been dropped early in the Indian period, before -ans became -ams<sup>6</sup>. Anusvāra before h (= Av. nj) must have arisen in the Indian period.

b. before any consonant in the intensive reduplicative syllable, the final of which is treated like that of the prior member of a compound; e.g. námnam*īti* (v. 83<sup>5</sup>)<sup>7</sup> from *nam*- 'bend'.

c. before any consonant which is the initial of secondary suffixes; thus from  $\delta am$ - 'blessing', is formed  $\delta am$ - $\nu \dot{u}$ - 'beneficent';  $\delta \dot{a}m$ - $t\bar{a}ti$ - or  $\delta \dot{a}nt\bar{x}ti$ -

'blessing'.

61. Voiceless Spirants.—a. The sound called Visarjanīya<sup>8</sup> in the Prātišākhyas<sup>9</sup>, must in their time have been pronounced as a voiceless breathing, since they describe it as an ūsman, the common term for breathings and sibilants. This conclusion is borne out by the fact that, in the RPr., Jihvāmūlīya and Upadhmānīya, the sounds which are most nearly related to and may be replaced by Visarjaniya, are regarded as forming the second half of the voiceless aspirates kh and ph respectively, just as h forms the second half of the voiced aspirates gh, bh, etc. At the present day Visarjanīya is still pronounced in India as a voiceless breathing, which is, however, followed by a weak echo of the preceding vowel. According to the TPr. 10, Visarjanīya has the same place of articulation as the end of the preceding vowel. The proper function of this sound is to represent final s and r in pausa; it may, however, also appear before certain voiceless initial sounds, viz. k, kh, p, ph, and the sibilants (occasionally also in compounds) II.

b. Beside and instead of Visarjanīya, the Prātiśākhyas recognise two voiceless breathings as appropriate before initial voiceless gutturals (k, kh)12

<sup>5</sup> Cp. WACKERNAGEL I, 224 a.

<sup>6</sup> Loc. cit.; cp. Brugmann, KG. 354, 17. 7 In Aufrecht's edition printed nánnamīti.

<sup>8</sup> The term visarga is not found in the Prātiśākhyas (nor in Pāṇini).

<sup>9</sup> RPr. 1. 5 etc., VPr. 1. 41 etc.; APr. 1. 5 etc.; TPr. 1. 12 etc.

<sup>10</sup> See WHITNEY on TPr. II. 48.

II See below, Sandhi, 78, 79.

<sup>12</sup> See RPr. 1. 8; VPr. 111. 11 etc.

and labials  $(p, ph)^T$  respectively. The former (h) called Jihvāmūlīya, or sound 'formed at the root of the tongue', is the guttural spirant y; the latter (h). called Upadhmānīya, or 'on-breathing', is the bilabial spirant f<sup>2</sup>. In Mss. they are regularly employed in the Kaśmirian Sarada character.

62. Loss of Consonants. — Consonants have been lost almost exclusively when they have been in conjunction with others. The loss of a single consonant which is not in conjunction with another is restricted to the disappearance of v before u, and much more rarely of y before i. The vthus disappears finally in the Sandhi of dv before u in the RV. and VS.<sup>3</sup> Initially, v is lost before dr derived from a r vowel; thus in dr and úrā- 'sheep'; úras- 'breast'; ur-āṇá-, mid. part. (vṛ- 'choose'); úrṛ- 'vigour'; úrṇā-'wool'; ūrnóti 'covers' (vy-'cover'); ūrdhvá- 'high'; ūrmí- 'wave'. Such loss of z' before  $\tilde{u}r$  also occurs after an initial consonant in  $t\tilde{u}rt\hat{u}'$  'quick' (= IIr. tvṛtá-); dhūrvati, ádhūrsata, dhūrtí-, from dhvr- 'cause to fall'; hūrva-, juhūrthās; juhur, from hvr- 'go crookedly'  $^{+}$ . Before simple u the v has disappeared at the beginning of the reduplicative syllable u- (= \*zu- for original va-), in u-vác-a from vac- 'speak'; u-vása from vas- 'shine'; u-váh-a from vah-'convey'.

Similarly initial  $\gamma$  has disappeared from the reduplicative syllable  $i-=*\gamma i$ in the desiderative *i-vak-sati*, *i-vak-samāna-*, from *vaj-* 'sacrifice' 5.

- r. When a group of consonants is final, the last element or elements are regularly lost (the first only, as a rule, remaining) in pausa and in Sandhi<sup>6</sup>.
- 2. When a group of consonants is initial, the first element is frequently lost. The only certain example of an initial mute having disappeared seems to be tur-tya- 'fourth', from \*ktur-, the low grade form of cattler- 'four', because the Vedic language did not tolerate initial conjunct mutes?. An initial sibilant is, however, often lost before a mute or nasal. This loss was originally doubtless caused by the group being preceded by a final consonant. There are a few survivals of this in the Vedas; thus cit kámbhanena (x. 1115), otherwise skámbhana- 'support'; and the roots stambh- 'support', and sthā-'stand', lose there s after ud-; e. g. út-thita-, út-tabhita-. On the other hand the sibilant is preserved after a final vowel, in compounds or in Sandhi, in á-skṛdhoyu- 'uncurtailed', beside kṛdhú- 'shortened'; ścandrá- 'brilliant', in áśvaścandra- 'brilliant with horses'9, ádhi ścandrám (VIII. 6511), also in the intens. pres. part. cáni-ścad-at 'shining brightly', otherwise candrá- 'shining', and only candrá-mas- 'moon'. In derivatives from four other roots, forms with and without the sibilant 10 are used indiscriminately, without regard to the preceding

<sup>&</sup>lt;sup>1</sup> See VPr. 1. 41.

<sup>&</sup>lt;sup>2</sup> Cp. EBEL, KZ. 13, 277 f. 3 See below, Sandhi, 73.

restored before such ur and ur in hoty-vurya-

<sup>5</sup> The evidence of cognate languages seems to point to the loss of initial d in ásru- 'tear' (Lat. dacruma, Gk. δάκρυ). It is, however, probable that there were two different but synonymous IE. words akru and dakru. On some doubtful etymologies based on loss of initial consonants, see WACKERNAGEL 1, 228 c, 'scandrá-.

<sup>6</sup> See below, Sandhi, 65.

<sup>7</sup> There are some words in which an initial mute seems to have been lost in the IE. period; thus t in  $\delta at \delta m$  'hundred' (= IE. 4 The v has either remained or been thutim); d perhaps in vimitati- 'twenty' and stored before such ur and ur in holy-vurya- vi- 'between'; l perhaps in yakrt- 'liver'. An 'election of the invoker'; in the opt. vurīda, initial mute seems to have been lost before from vr- 'choose'; and in the 3. pl. perfect a sibilant (originally perhaps after a final babhū-vur, jūhu-vur, suṣu-vur, tuṣṭu-vur. consonant) in stána- 'breast', svid- 'sweat'; sas- 'six' (KZ. 31, 415 ff.).

<sup>8</sup> Dissimilation may also have played some part in the loss of the sibilant in the reduplicative syllable of roots with initial sk(h)st(h), sp(h), as caskánda, tisthāmi, paspárša.

<sup>9</sup> See GRASSMANN'S Wörterbuch sub verbo

<sup>10</sup> The verb kṛ- 'do', after pári and sam, shows an initial s; e. g. pariskr nvanti, pári-

sound; from stan- 'thunder', stanayitnú-, beside tanayitnú- 'thunder', tanyatí-(also AV.) 'thunder', tanyú- 'thundering', tanyati 'resounds'; stená- 'thief', stāy-ánt- (AV.) 'stealing', stāyú- (VS.) 'thief', stúya- 'theft', beside tāyú- 'thief'; stí-, beside tí- 'star'; spáś- 'spy' and spaś- 'see' in verbal forms á-spaṣ-ta aor., paspaś- perf., spāśáyati caus., -spaṣṭa- part., 'seen', beside páśyati 'sees' i.

The loss of initial s may be inferred in the following words from the evidence of cognate languages in which it has been preserved: tij- 'sharpen'; tuj- 'strike'; tud- 'beat'; narmá- (VS.) 'jest'; nrt- 'dance'; parná- 'wing'; piká- (VS.) 'Indian cuckoo'; plīhán- (VS. AV.) 'spleen'; phéna- 'foam'; mrd- 'crush',

mṛdú- (VS.) 'soft'; vip- 'tremble'; supti- 'shoulder'.

A few examples occur of the loss of the semivowels y or  $v^2$  as the last element of an initial consonant group. Thus y disappears in derivatives of roots in  $\overline{\imath}v$  formed with suffixes beginning with consonats:  $-m\overline{\imath}ta$ - 'moved',  $m\overline{\imath}-ra$ - 'impetuous',  $m\overline{\imath}-ta$ - (AV. VS.) 'urine', from  $m\overline{\imath}v$ - 'push';  $s\overline{\imath}ac\hat{\imath}$ - 'needle',  $s\overline{\imath}-na$ - 'plaited basket', sa-ta- (AV.) 'thread', beside sya-ma- 'thong',  $sy\overline{\imath}-ta$ - 'sewn', from  $s\overline{\imath}v$ - 'sew'. Loss of v seems to have taken place in siti- 'white' (only at the beginning of compounds), beside svit- 'be bright', svity- $a\overline{\imath}c$ - 'brilliant', svitx-(AV.) 'white', svitxy-a, perhaps 'white'; and, on the evidence of the Avesta, in sip- 'throw' (Av. siv-sa- (Av. siv-sa-).

3. When the group is medial, the loss usually taken takes place between single consonants. a. The sibilants s and s thus regularly disappear between mutes; e. g. á-bhak-ta, 3. sing. aor., for \*ábhak-s-ta beside á-bhak-ṣ-i, from bhaj-, 'share'; caṣ-te for cakṣ-te (= original \*cas'-s-te)<sup>3</sup>. Similarly a-gdha- (TS.) 'un-

eaten', for \*a-ghs-ta-, from ghas- 'eat'4.

b. The dental t has disappeared between a sibilant and c in pas-ca and pas-ca to behind' (= IE.  $post-q\dot{c}$ ,  $post-q\dot{c}t$ ); and between p and s in \*nap-su which must have been the loc. pl. (AV. nafsu), from \*napt-, 'weak stem of ndpat-, beside the dat. ndd-bhyas 'to the grandsons', for napt-bhyas, where on the other hand the p has been dropped.

c. A mute may disappear between a nasal and a mute; e. g. panti- for pankti-, yundhi for yungdhi. This spelling is common in Vedic Mss.; it is

prescribed in APr. 11. 20, and, as regards the mediae, in VPr. vi. 30.

4. The only example of the loss of an initial 5 mute in a medial group of consonants seems to be that of b before dbh in  $n\acute{a}dbhyas$  for \*nabdbhyas from napt- for  $n\acute{a}p\bar{a}t$ -. The semivowel r seems to be lost before a consonant when another r follows in  $cakr-\acute{a}t$  (Pp.  $cakr\acute{a}n$ ) and  $cakr-iy\bar{a}s^6$  for \*carkr- beside carkar-mi, from kr- 'commemorate'; and, on the evidence of the Avesta, in tváṣṭṛ- (cp. pwarəs 'cut', pwaršta- 'created'),

4 On ápnas- 'property', dámpati- 'lord of the house', see WACKERNAGEL I, 233 c, note.

6 But see GELDNER, VS. I, 279.

skyta, sám-skyta; also after nis in nir askyta (Pp. akyta), perhaps owing to Sandhi forms with sk such as niskuru (AV.). There can be little doubt that the s here was not original but was due to analogy; cp. WACKERNAGEL I, 230 a,  $\beta$ , note.

T WACKERNAGEL I, 230 a γ, note, discusses several uncertain or erroneous etymologies based on loss of initial s (including maryās interpreted as 2. sing. opt. of smγ-). The evidence of Prakṛit seems to point to the loss of initial s in sépa- 'tail', krāḍ- 'leap', kruś- 'cry', paraṣṅ- 'axe', paruṣḍ- 'knotty'; cp. WACKERNAGEL I, 230 b.

<sup>&</sup>lt;sup>2</sup> On the possible loss of r in bhañj-(Lat. frango) and of k in savyá-(Lat. scaevus), see WACKERNAGEL I, 232 c, note.

<sup>3</sup> See above 56, b.

<sup>5</sup> The guttural mute only seems to be lost when ks+t becomes st: see above, 56, 6. The loss of m in the inst. sing.  $-n\bar{a}$  of nouns in -man is only a seeming one; for  $d\bar{a}nd$ ,  $pr\bar{a}nd$ ,  $bh\bar{a}nd$ , mahind, varind (TS.) appear beside the stems  $d\bar{s}man$ -etc., because some of them had a stem in -n without m, so that  $-n\bar{a}$  seemed an alternative from of -mn\bar{a}: see Benfey, GGA. 1846, 702. 880; Göttinger Abhandlungen 19, 234; Bloom-Field, JAOS. 17, 3; cp. 1F. 8, Anzeiger, p. 17.

probably starting from forms like tvásírā (AV.) in which the r immediately followed 1

But the loss of a spirant (IIr. s, z,  $\stackrel{\circ}{z}$ ,  $\stackrel{\circ}{z}h$ ) at the beginning of a medial group is common.

a. The sibilant s2 has thus been lost before & followed by a consonant in varyktam, vrkná-, vrktví, vrksi (TS.), from vraše- 'lop' (cp. -vraská-).

- b. The voiced form (IIr. z) of dental s has disappeared; before voiced dentals, without leaving any trace, in the roots as-'sit', and sas-'order'; thus  $\tilde{a}$ -dhvam, śaśā-dhi. But when  $\tilde{a}$  preceded the z, the disappearance of the sibilant is indicated by e taking the place of az before d, dh, h = dh; thus e-dhi, from as- 'be'; sed-+, perfect stem of sad- 'sit' (for sazd-, like sascfrom sac-). This e also replaces az with loss of the sibilant in de-hi 'give'; dhe-hi 'put'; kive-dhā- 'containing much'; néd-īvas- and nid-istha- 'very much'; ped-ú-5 N.; medati 'is fat'; medhá- and medhás- 'wisdom'; mídha- 'juice' o.
- c. When a vowel other than  $\tilde{a}$  preceded, the z was cerebralized (like s before a voiceless dental) and disappeared after cerebralizing the following dental and lengthening the preceding vowel; thus a-sto-ahram? (= \displai-stoz-dhvam for a-stos-dhvam) 2. pl. aor., beside a-sto-s-ta, 3. sing., from stu- 'praise'. Thus also are to be explained  $n\bar{\imath}_i/a$ - 'nest' (=  $ni\bar{\imath}_i/a$ - for ni-sd-a-);  $p\bar{\imath}_i/a$ - 'press' (=pizd- for pi-sd- or pi-sd-);  $m\bar{\iota}_{l}lh\dot{a}$ - 'reward' (Gk.  $\mu\iota\sigma\theta\dot{o}\varsigma$ );  $\iota\bar{\iota}_{l}l$ -i- 'strong', vīdáyati 'is strong' (from vis- 'work' +-d)8; hīd-9 'be angry', and its Guṇa forms, e. g. hid-as- 'anger'; mṛdáti 'be gracious', mṛdīká- 'gracious' (for mrs-d- from mrs- 'forget') with vowel pronounced long (12), d-red-ant- (TS.) 'not deceiving' (= a-rezd-ant-), from ris- 'injure'.
- d. Similarly the old voiced palatal spirant (IIr. 5) disappeared after cerebralizing a following d or dh and lengthening the preceding vowel; thus tā-dhi for \*taź-dhi (= tak-s-dhi) from taks- 'fashion'; so-dha for \*sas-dha  $(= sak-s-dh\bar{a})$ , beside  $sas-th\hat{a}$ - (AV.) 'sixth'. A similar loss is to be assumed in  $\mathcal{L}d$ - 'praise' (=  $i\dot{z}$ -d for  $ya\dot{j}$ -+d) 10.
- e. This loss is specially frequent in the case of the old voiced palatal aspirated spirant (IIr.  $\dot{z}h$ ) represented by h, which was dropped after cerebralizing and aspirating a followed t and lengthening the preceding vowel; thus  $b\bar{a}dh\dot{a}$ -

1 In a few forms of the AV. the semivowel y seems to be lost at the end of the medial group ksy: mekṣāmi. yokse, vidhakṣān, sākse. But these forms may be due to errors

<sup>2</sup> In ch = IE. skh, the original s was lost

in a pre-Indian period.

3 Before voiced mutes other than dentals, z became d, as in madgú- (44, 3 a) 'diver'; similarly z became d, as in fadbhis, from pás- 'look' or 'cord'; and in vi-frúd-bhis from viprus- 'drop'.

4 The loss of the voiced sibilant (2) must lant, is obscure. be older than the original text of the RV., as the e of sed- has been transferred to other stems which contain no sibilant, as in bhej-iré, from bhaj- 'divide'. Similarly the regarded as a primitive  $\bar{\imath}$  in the form  $\acute{aj\bar{\imath}}hidat$  | 48, 519.

edh-'thrive', miyédha-'broth', vedhás-'virtuous',

see Wackernagel I, 237 c. 6 In stems in as before case terminations Oldenberg, SBE. 30, 2. beginning with bh, and before secondary

suffixes beginning with m, y or v, the sibilant is lost (instead of becoming d in the former circumstances, or remaining in the latter) owing to the influence of Sandhi; e. g. dvéso-l'his from dvés-as- 'hate'. An original sibilant has perhaps been lost in makisá-, sāhvāms-, jāhuṣá, hrādúni-, jas- 'be exhausted'; cp. WACKERNAGEL I, 237 a β, note.

7 The origin of krodá- (AV. VS.) 'breast' (Av. hraoždra- 'hard') and of many words with d or ch preceded by a long vowel, and with no collateral forms containing a sibi-

8 Cp. Hübschmann, KZ. 24, 408. In sīda- (= sizda-) from sad- 'sit', the d has been retained owing to the influence of other forms of the verb sad-. See, however, vowel of had, though derived from iz, is Rozwadowski, BB. 21, 147, and cp. ZDMG.

(AV.): cp. Wackernagel I, p. 272 (mid.).

5 Cp. Bartholomae, KZ. 27, 361. On fig- 'crush; cp. Wackernagel I, 146, d. 9 Pinda- perhaps stands for \*pinzda-, from

10 On krād-, cp. Wackernagel I, 238 b, note; Pischel, BB. 23, 253 ff. On ād-, cp.

'strong', ni-bīḍha- 'dense' (= baṣḍhá- for bah-tá-) from baṃh- 'be strong';  $s\dot{a}dhr$ - 'conqueror',  $\dot{a}$ - $s\bar{a}dha$ - 'invincible', from sah-;  $r\bar{\iota}dh\dot{a}$ - (=  $rizdh\dot{a}$ -), from rih- 'lick'; ū.lhá- (= uzdhá-) from vah- 'carry'; gūdhá- 'concealed', from guh-'hide'; trdhá-, trdhvā (AV.), from trh- 'crush'; drdhá- 'firm', from drh- 'be strong'. Here e also appears for az in trnedhu (AV.) from trh- (= trnazdhu); and o in rodhám (= vazdham), 2. du. aor. of vah- 'carry'. We also find e as Guna of i in  $m\acute{e}dhra$ - (AV.), from mih- 'mingere' (= mezdhra-).

63. Metathesis. — Apart from the few examples of ra before s and h (51 c), there are probably no certain instances of metathesis in the RV.1. In the later Samhitas, however, a few other forms of metathesis are to be found. Thus -valh- seems to be a transposition of hval- 'go deviously' in upa-valh-(VS.) 'propound a riddle to'2. In valmika- (VS.) 'anthill', m appears transposed beside vamri- and vamra- 'ant', vamra-ka- 'little ant'. Metathesis of quantity occurs in as-thas for \*as-thas, 2. sing. mid. aor. of as-'throw'. This is analogous to the shortening, in the RV., of the radical vowel of dx- 'give', in the forms ádam, ádas, ádat, where the verb is compounded with the verbal

prefix  $\bar{a}^3$ , while otherwise the forms  $d\bar{a}m$ ,  $d\bar{a}s$ ,  $d\bar{a}t$  alone appear.

64. Syllable.—The notion of the syllable is already known to the late hymns of the Rgveda, though the word (a-ksára-) is there generally used as an adjective meaning 'imperishable'. Thus akṣáreṇa mimate saptá vắnth means 'with the syllable they measure the seven metres'. The vowel being according to the Prātiśākhyas4 the essential element of the syllable, the word aksara-5 is used by them in the sense of 'vowel' also. Initially, a vowel, or a consonant and the following vowel form a syllable. Medially, a simple consonant begins a syllable, e. g. ta-pas; when there is a group of consonants, the last begins the syllable, e. g. tap-ta-, and if the last is a sibilant or semivowel, the penultimate also belongs to the following syllable<sup>6</sup>, e. g. astām-psīt, antya. A final consonant in pausa belongs to the preceding vowel, e.g. i-dam.

By the process called haplology one of two identical or similar syllables in juxtaposition is dropped. Syllable is here to be taken in the sense not only of a consonant with a following vowel, but of a vowel with a following consonant.

1. The first of the two syllables is dropped within a word in tuvī-rά[va]vān roaring mightily', beside tuvī-ráva-; madh[ya]yā'in the middle', from mádhya-(like āsa-yā, nakta-yā); vṛ[ta]thā 'at will', from vṛtá- 'willed' (like rtu-thā 'according to rtu-'); svapatyái for svapat vá vai, dat. sing. f. of sv-apatyá- 'having' good offspring'; perhaps also yós, beside yáyos, gen. loc. du. of yá-8. Examples of a vowel with following consonant being dropped are: ir adh adhyai, inf. of iradh-'seek to win'; cak[an]anta, r[an]anta, v[an]anta9; perhaps sád[as]as-pátibeside sádasas-páti- 'lord of the seat' 10.

a. The final syllable of the first member of a compound is sometimes dropped in this way; thus se[za]-vāra- 'treasury'; se[va]-vrdha- 'dear'; madugha- (AV.),

<sup>2</sup> Cp. WACKERNAGEL I, 212 b, note, and 239 b.

4 RPr. XVIII. 17; VPr. 1, 99.

<sup>\*</sup>skotá-, from ścut- 'drip-, under the influence in Panini. of stúkā- 'tuft'.

<sup>3</sup> These forms are not resolved in the Pada text, i. e. they are treated as if they did not contain the verbal prefix  $\dot{a}$ .

<sup>5</sup> Though known to Kātyāyana and Patañjali as well as to the Pratisakhyas, aksara-

r Perhaps stoká- 'drop', may stand for as the designation of syllable is not found

<sup>6</sup> See TPr. xxi. 7, 9. On the division of syllables cp. further RPr. 1. 15; VPr. 1. 100ff.; APr. 1. 55 ff.; TPr. XXI. 1 ff.; and WHITNEY on TPr. XXI. 5.

<sup>7</sup> Cp. Bartholomae, KZ. 29, 527, 562.

<sup>8</sup> Cp., however, en-os for ena-yos.

<sup>9</sup> See KZ. 20, 70 f.

<sup>10</sup> See BLOOMFIELD, JAOS. 16, XXXV.

N. of a plant yielding honey, beside madhu-digha- 'shedding sweetness';

śas pa]-piñjara- (VS.) 'tawny like young grass' 1.

2. The second syllable is dropped in the datives paumsya [ya], ratnadhiya [ya], sakhyā[ya], and abhikhyā beside abhikhyāya; also in  $z = k i t [\bar{a}t]i$  'destruction', beside vykátāt- and devá-tāti-; and at the beginning of the second member of a compound in sīrṣa-[sa]kti- (AV.) 'headache'2.

a. A following syllable is sometimes dropped in spite of a different one intervening; thus in the dative maryada [ya] 'boundary'; and somewhat peculiarly in avarīv[ar]ur, 3. pl. impf. beside the 3. sing. a varīvar and 3. sing. pres. á varīvarti.

## II. EUPHONIC COMBINATION (SANDHI).

Benfey, Vollständige Grammatik p. 21-70. - Whitney, Sanskrit Grammar p. 34-87. — WACKERNAGEL, Altindische Grammatik I, 301-343. — ARNOLD, Vedic Metre p. 70-So.

- 65. The nature of Vedic Sandhi.—The sentence is naturally the unit of speech which forms an unbroken chain of syllables euphonically combined. It is, however, strictly so only in the prose portion of the AV.3 and the prose Mantras of the YV. As the great bulk of the Vedas is metrical, the RV. and the SV. being entirely so, the editors of the Samhita text treat the hemistich (consisting generally of two Pādas or verses)4 as the euphonic unit, applying the rules of Sandhi with special stringency between the Padas or metrical units which form the hemistich. The evidence of metre, however, shows that, in the original form of the text, Sandhi at the end of an internal Pāda is all but unknown<sup>5</sup>. The verse, therefore, is the true euphonic unit<sup>6</sup>. The final of a word appears either at the end of this unit in pausā (avasāne), or within it as modified by contact with a following initial. The form which the final of a word assumes in pausa, being regarded as the normal ending, is generally the basis of the modification appearing within the verse. It will therefore conduce to clearness if the rules relating to absolute finals are first stated.
- 66. Finals in pausa.—a. Vowels 8 in this position undergo no change other than occasional nasalization.
- I. In all the Samhitas  $\tilde{a}$   $\tilde{i}$   $\tilde{u}$  are frequently nasalized when prolated; e. g. vindati > m | =  $vindati (x. 146^{\circ}); babh \bar{u}v\bar{u} > m$  | =  $babh \bar{u}va (AV. x. 2^{28});$ viveśā3m | = viveśa (VS. XXIII. 49);  $mam\dot{a}3m$  | =  $mam\dot{a}$  (TS. VII.  $4^{20}$ ).
- 2. In the Samhitā text of the RV. there survive, at the end of a verse within a hemistich, from the period when such end also was accounted a pause, several instances of nasalized a, preserved to avoid hiatus and con-

for n[h]loká- (cp. Brugmann, Grundriss I, 624, p. 471); susmayá- (TS.) for susma- o The sentence within a Pada, as well as máya-; bhīmalá- (VS.) 'terrible', for bhīma- the Pāda itself, is the unit of accent; cp. mala; improbable in rujānās for rujānā-nās, below, S3. 'with broken nose' (BLOOMFIELD, JAOS. 16,

second hemistich.

This explanation is doubtful in uloká-; 5 The only probable exception is RV. IX.

<sup>7</sup> Cp. RPr. 1. 3; VI. 5; X. 5; XI. 30. 8 Final ? never occurs in the RV., its 2 Cp. WHITNEY, Translation of AV. I, 123.
3 See Bloomfield, The Atharvaveda, in e. g. sthātûr 'standing' (cp. WACKERNAGEL, this Encyclopedia, § I (beginning) and note I. KZ. 25, 287 f.); but the TS. already has 4 In the Gāyatrī metre, in which there janayitf and bhartf (B?), WACKERNAGEL I, are three Pādas, the third alone constitutes the second hemistich; in the Pankti, which has five Pādas, the last three constitute the second hemistich.

traction. Thus a appears as am before e and o; e. g. ghanénam ékas (1. 334); ā appears ām before e o r; e. g. yām rnan.caye (v. 3014); while the prepositions ά 'near', and sάcā 'together', are nasalized before any vowel; e.g. sácām'udyán. The vowel a once appears as am before r in vipanyúm rtásya (IV. 112), following the regular rule that unnasalized  $\bar{a}$  is shortened before r in the RV.

b. Consonants are liable to change of mode of articulation and, to

some extent, of place of articulation.

1. Final mutes, whether tenuis, media, or aspirate, are without distinction represented by the corresponding tenuis; e. g.  $d\bar{u}r\dot{a}t$  (III. 593) =  $d\bar{u}r\dot{a}d$  'from

afar'; usar-bhút (1. 659) = usar-bhídh 'waking at dawn'.

2. The palatals c and j revert to the original guttural, becoming k; thus arvak (i. 1182) = arvac 'coming hither'; su-yik = su-yij 'well yoked'. The old palatal j, however, becomes t, e.g. rat (I. 1213), m.f. 'king', 'queen', = rāj; in rtvik, however, it becomes the guttural, = rtvij 'priest' (from yaj-'sacrifice') 3.

3. The ritual exclamations vásat (x. 1159) and śráusat (1. 1391), which are probably modified forms of the 3. sing. aor. subj. of vah- 'carry', and sru-'hear' +, have t for t owing to the analogy of the exclamations vat (VS.), vat

(TS.), 3. sing. aor. of Vvah-5.

4. The nasals occurring as finals,  $\dot{n}$ , n,  $m^6$ , remain unchanged. Of these, n and m are very common; but  $\vec{n}$  is found very rarely and only secondarily after the loss of a following & (representing an original palatal; e. g.  $pr\acute{a}n$  for \* $pr\acute{a}nk$ , from  $pr\acute{a}nc$ -). Probably no instance of final n can be found in Vedic Mantras. The palatal  $\tilde{n}$  never occurs, since final palatals become guttural (b, 2).

a. In the rare instances in which a radical m becomes final after dropping a following -t or -s, it appears as n owing to the influence of the dental; thus  $d\acute{a}n$  (= \*dam-s) 'of the house'  $(dam-)^7$ ;  $\acute{a}$ -kran (= \* $\acute{a}$ -kram-t), 3. sing. aor. Of kram- 'stride';  $\acute{a}$ -gan (= \*a-gam-s, \*a-gam-t), 2. 3. sing. aor., a-jagan (= \*ajagam-t), 3. sing. plup., aganīgan (VS.), 3. sing. intv. of gam-'go';  $\dot{a}$ - $y\bar{a}n$  (= \*a- $y\bar{a}m$ -s-t), 3. sing. aor. of  $y\bar{a}m$ - 'reach' 8.

5. The semivowels  $y v l^9$  do not occur as finals. r is represented by

Visarga; thus púnar 'again', is written púnah10.

6. The sibilants and h are all changed when final.

a. The dental s, which is by far the commonest of final sibilants, becomes Visarga; e. g. ketiis is written ketiih (III. 613).

 $\beta$ . The cerebral s, which is very rare as a final, becomes cerebral t in sát 'six', for sás; -dvít 'hating', for -dvís; vi-prílt (AV.) 'sprinkling',

10 When h stands for etymological r, this is indicated by an added iti in the Pada-

<sup>&</sup>lt;sup>1</sup> The ritual interjection ôm (VS.) may be due to the nasalization of an original o prolated (cp. RPr. xv. 3). Thus the JUB. I. 24. 3 ff., mentions the pronunciations o as well as om, both of which it rejects in favour

<sup>&</sup>lt;sup>2</sup> Cp. RPr. I. 13; WHITNEY on APr. I. 43.

<sup>3</sup> Cp. Wackernagel 1, 149 a α.

<sup>4</sup> Cp. above 42 c (p. 34).

<sup>5</sup> Loc. cit.

<sup>&</sup>lt;sup>6</sup> Final m is often incorrectly written as Anusvāra in Mss. (as conversely in Prakrit Mss. m is often written as m under Sanskrit influence: cp. Pischel, Grammatik der Prakrit-Sprachen, in this Encyclopedia, 339, 348), and their example is sometimes followed in pātha; e. g. punar iti (x. 8518). printed editions.

<sup>7</sup> In the K. also occurs the form  $a-n\bar{a}n$ = \*-nām-s-t, from nam- 'bend'. The SB. has prasan 'painless', = \*pra-sam-s.

<sup>8</sup> See 46 d, β.

<sup>9</sup> Final 1 is spoken of as occurring rarely (WACKERNAGEL 1, 260 c), or as very rare (WHITNEY 144), but I have been unable to find a single example in the Vedas (or even in post-Vedic Sanskrit). But though no etymologically final I seems to occur either in pausa or in Sandhi, it is found as a substitute for d in two or three words in the later Samhitas (see above 52 d, p. 45).

for vi-prils. These are the only examples occurring in the RV. and AV. In the only two examples in which s occurs in the RV. as a final in the compound form ks, it is dropped: anák 'eyeless', from an-áks-; á-myak, 3. sing. aor. of myaks- 'be situated' (?).

 $\gamma$ . The palatal s becomes either k or t'; e. g. -drk for drs'- (III. 619);

vipāt, N. of a river, for vipās-.

 $\delta$ . According as it is guttural or palatal in origin, h become k or t; •thus á-dhok, 3. sing. impf. of duh- 'milk'; but á-vát, 3. sing. aor. of vah- 'carry'.

- c. The rule is, that only a single conscnant may be final. Hence all but the first of a group of consonants are dropped; e.g. ábhavan for \*ábhavant; tấn for \*tấns; tudán for tudánts; prấn for \*prấnks (= \*prắncs); acchān for \*achantst, 3. sing. aor. of chand- 'be pleasing'.
  - $a_{\bullet}$  k t or t, when they follow an r and belong to the root, are allowed to remain; e. g. várk, 2. 3. sing. aor. of vrj. 'bend'; űrk (VS), nom. of űrj. 'strength'; á-mīrt, 3. sing. impf. of mrj- 'wipe'; a-vart, 3. sing. aor of vrt- 'turn'; suhart (AV.), nom. of suhard-'friend'. The only instance of a suffix remaining after r is dar-t, 3 sing aor of dr-'cleave', used also for 2 sing. beside d-dah = d-dar (for \*d-dars).

β. Some half-dozen instances have been noted, in the Samhitās, in which a suffixal s or t seems to have been retained instead of the preceding consonant; but they are

probably all to be explained as due to analogical influence. They are:

1. the nominatives sadha-mās (beside sadha-mād) 'companion of the feast'; ava-yās 'sacrificial share', and puro-las (acc. puro-lasam) 'sacrificial cake'. Sadha-mās may be due to the influence of nom. with phonetic s like -mās 'moon', beside inst. pl. mīd-bhis (44 a 3). Ava-yās, in the only passage in which it occurs in the RV., has to be read as quadrisyllabic (also in AV.), i. e. as ava-yājah, and is probably to be explained as a contraction which retains the living -s of the nom. (and not the prehistoric s of \*-yij-s). Puro-iās (from dīs-'worship'), occurring only twice in the RV., may be due to the influence of a frequent nom. like diavivo-dīs 'wealth-giver'. That the prehistoric nom. -s should in these three forms have survived in the linguistic consciousness of the Vedic poets, and as such have ousted the preceding consonant, which in all other analogous nominatives alone remains, is hardly conceivable. The only reasonable explanation is to assume the analogical influence of the nom. -s which was in living use after vowels.

2. The four verbal preterite forms (a-yās (for \*a-yāj-s) beside a-yāt, 2. sing. aor. of yaj-'sacrifice'; srās (AV.) = \*a-srāj-s, 2. sing. aor. of srj- 'emit'; a-bhanas (AV.) = \*a-bhanak-s, 2. sing impf. of bhavy 'break'; and a-srat (VS.) = \*a-sras-t, 3. sing aor. of sras- 'fall') are the beginnings of the tendency (of which there are several other examples in the Brahmanas)3, to normalize the terminations, so as to have -s in 2. sing. and -t in 3. sing. This tendency is extended in the RV. from the s and t of 2. 3. sing. even to 1. sing. in the forms a-kramīm (beside a-kramisam) owing to a-kram-īs, a-kram-īt; and vam (for var-am) owing to 2. sing. vak (for var), aor. of vr- 'cover'.

67. Rules of Sandhi. — The body of euphonic rules by which final consonants are assimilated to following initials and hiatus is avoided between final and initial vowels is called Sandhi in the Prātiśākhyas+. The editors of the Samhita of the RV. have greatly obscured the true condition of the text with which they dealt by applying to it rules of euphonic combination which did not prevail at the time when the text was composed. Thus though the Sandhi between the verses of a hemistich is (excepting a few survivals from the older form of the text)<sup>5</sup> applied with greater stringency than elsewhere, the metre clearly shows that the end of the first verse of a hemistich constitutes a pause as much as the end of the last. Within the verse, moreover, Sandhi is, according to metrical evidence, not applied where the caesura occurs; ná, when it means 'like' (as opposed to ná 'not'), is never contracted with any following vowel, nor dd 'then' with a preceding  $a^6$ ;  $\tilde{i}$  and  $\tilde{u}$  before

<sup>&</sup>lt;sup>1</sup> Cp. 43 a. 3, 28 ff.; BARTHOLOMAE, KZ. 29, 578 ff.

<sup>&</sup>lt;sup>2</sup> Cp. WHITNEY 146 a; BLOOMFIELD, AJP. APr. IV. 414.

<sup>3</sup> Cp. WHITNEY 555 a.

<sup>4</sup> RPr. II. 2. 7. 13; VII. 1; VPr. III. 2;

<sup>5</sup> E. g. manīṣā | agniķ (I. 701).

<sup>6</sup> In these instances there is a pause in

dissimilar initial vowels are hardly ever changed to the corresponding semi-vowels<sup>1</sup>, and often remain uncontracted even before similar vowels<sup>2</sup>; the elision of a after e o is rare<sup>3</sup>; contraction is commonly avoided by the final vowel of monosyllabic words, and by an initial vowel followed by conjunct consonants<sup>4</sup>. Nevertheless, it may be said in a general way that the poets of the RV. show a tendency to avoid the meeting of vowels<sup>5</sup>. The divergences between the apparent and the real Sandhi which appear in the RV., decrease in the later Vedas, while the application of particular rules of Sandhi becomes more uniform<sup>6</sup>.

a. External Sandhi, or that which applies between words in the sentence, is to a considerable extent identical with internal Sandhi, or that which applies within words. The most striking difference is, that in the latter consonants remain unchanged before verbal and nominal terminations beginning with vowels, semivowels, or nasals? External Sandhi is on the whole followed in the formation of compounds, the divergences from it in the latter being merely survivals of an earlier stage of external Sandhi due to the closer connexion between members of a compound that renders them less liable than separate words to be affected by modifications of phonetic laws.

External Sandhi is to a considerable extent affected by the law of finals in pausa. Under that influence it avoids final aspirates and palatals. There are, however, in the treatment of final n r, and s, certain survivals which do

not agree with the corresponding forms in pausa.

b. There are certain duplicate forms which were originally due to divergent euphonic conditions. Thus the tendency was to employ the dual ending  $\bar{a}$  before consonants, but au before vowels. Similarly, the word  $s\acute{a}d\bar{a}$  'always', was used before consonants, but  $s\acute{a}dan$  before vowels.8.

68. Lengthening of final vowels.—Final vowels as a rule remain unchanged before consonants. But  $\check{a}$   $\check{\iota}$   $\check{u}$  are very frequently lengthened? before a single initial consonant both in the metrical portion of the Samhitās and in the prose formulas of the Yajurveda; e. g. śrudht hávam hear (our) call. This practice includes examples in which the consonant is followed by a written y or v, to be pronounced, however, as i or u; e. g.  $\acute{a}dh\bar{a}$  hy agne (IV.  $10^{2a}$ ) =  $\acute{a}dh\bar{a}$  hi agne; abht sv  $\grave{a}ry\acute{a}h$  (x.  $59^{3a}$ ) = abht si  $ary\acute{a}h$ . The lengthening here appears to have arisen from an ancient rhythmic tendency of the language to pronounce long, between two short syllables, a final short vowel which was liable to be lengthened elsewhere as well i; this tendency being utilized by the poets of the Samhitās where metrical exigencies required a long syllable. Thus  $\acute{a}dha$  'then', appears as  $\acute{a}dh\bar{a}$  when a short syllable follows. Similarly th 'but' generally becomes th before a short syllable; and sh 'well' nearly always becomes sh between short syllables sh.

Cp. Bartholomae in KZ. 29, 37,
 p. 511 f.

the sense; cp. Oldenberg, Prolegomena 443, note 2; Arnold 122.

r ARNOLD 125.

<sup>&</sup>lt;sup>2</sup> Op. cit. 124. 3 Op. cit. 127.

<sup>4</sup> Thus māpsavaḥ (Iv. 47d) must be read má ápsavaḥ, but māduvaḥ (for má áduvaḥ) remains (ibid.).

<sup>5</sup> Cp. OLDENBERG 434f.

<sup>7</sup> Thus sakat, á-saknuvan, sakra-, sákvan-(from sak- 'be able'), in all which forms gwould be required by external Sandhi.

<sup>8</sup> Cp. Wackernagel 1, 309, bottom.

<sup>9</sup> The Padapātha in these instances regularly gives the original unlengthened vowel.

10 Except in compounds, this lengthening disappears in the later language; there are, however, several survivals in the Brāhmaṇas; see AUFRECHT, Aitareya Brāhmaṇa 427; and cp. WACKERNAGEL 1, 264 b.

I'I This tendency survived in the post-Vedic language in compounds, in words (which followed the analogy of compounds) before suffixes beginning with consonants, and in reduplicative syllables.

<sup>12</sup> Cp. WACKERNAGEL 1, 266 b.

a. The short vowel regularly remains unchanged at the end of a verse t (even within a hemistich); and often before the caesura of a Tristubh or Jagatī Pāda (even in terminations otherwise liable to be lengthened)<sup>2</sup>.

b. The final vowel is not lengthened in I. vocatives (except zysabhā VIII.  $45^{38}$ , and  $hariyojan\bar{a}$  I.  $61^{16}$ ); 2. datives in  $-\bar{a}ya$ ; 3. nom. plur. neuter in -i; 4. verbal forms ending in -i and -u excepting imperatives in -dhi and the 3. sing. ráksati II. 264) 3; 5. the prepositions úpa 4 and úpa (except úpā zydhi VII. 272).

c. In some instances final vowels appear to be lengthened before vowels 5 or two consonants 6.

69. Contraction of similar vowels.—When a final  $\tilde{a}$   $\tilde{i}$  or  $\tilde{u}^7$  is followed by corresponding initial  $\tilde{a}$   $\tilde{i}$  or  $\tilde{u}$ , contraction resulting in the long form of the respective vowel regularly takes place; e. g. ihásti = ihá asti; indr $\dot{a} = indra \dot{a}$ ;  $tv\bar{a}gne = tv\bar{a}$  agne;  $v\bar{t}d\dot{a}m$  (VI. 9°) = vi  $id\dot{a}m$ ;

a. The contraction of  $\bar{a} + a$  and of  $\bar{u} + \bar{u}$  occasionally does not take place even in the written text of the RV. both at the end of and within a Pāda; thus manīṣā | agniḥ (1.701); manīṣā abhi (1.1017); pūṣā ásuraḥ (v.5111),  $p\bar{u}$ ṣā abhi- (VI. 505),  $p\bar{u}$ ṣā aviṣṭu (X. 26<sup>I d</sup>);  $v\bar{\iota}$ lā utā (I. 39<sup>2</sup>); sā  $\bar{\iota}$ Irdhvā(h) (VI. 249);  $sii \overline{u}tibhih$  (I.  $112^{1-23}$ ); the compound  $su\overline{u}tiyah$  (VIII.  $47^{1-18}$ ) 8.

b. On the other hand, in many instances where the contraction is written, the original vowels have to be restored in pronunciation with hiatus?. The restored initial in these instances is long by nature or position, and the preceding final if long must be shortened in pronunciation 10; e. g. cāsāt (1. 273) = ca āsāt; cārcata (I.  $155^1$ ) = ca arcata;  $m\dot{a}p\dot{c}\dot{h} = m\dot{a}$   $\bar{a}p\dot{c}\dot{h}$ ;  $m\dot{a}ps\dot{a}va\dot{h} = m\dot{a}$  apsáva $\dot{h}$ ;  $mrlat\bar{u}dr\dot{s}e$  $(IV. 57^1) = mrlati \ \bar{t}d\dot{r}\dot{s}e; \ y\dot{a}nt\dot{r}ndaval; (IV. 47^2) = y\dot{a}nti \ indaval; \ bhavant\bar{u}ks\dot{a}nal;$  $(VI. 16^{+7}) = bhavantu \ ukṣánaḥ$ . After monosyllables, the hiatus is regular in the case of the written contractions  $\bar{\imath}$  and  $\bar{\imath}$ , especially when the monosyllables are vi and hi; e.g. vindra (x. 32<sup>2</sup>) = vi indra; hindra (1. 102<sup>5</sup>) = hi indra<sup>11</sup>.

c. Duals in  $\bar{a} \bar{i} \bar{u}$  are regularly uncombined. Such  $\bar{i}$  and  $\bar{u}$  are usually written with hiatus in the Samhitā text; the dual  $\bar{a}$  always appears before  $u^{12}$ , but at the end of internal Padas invariably coalesces in the written text.

70. Contraction of  $\ddot{a}$  with dissimilar vowels.—1. When final  $\ddot{a}$  is followed by  $\bar{i}$   $\bar{u}$ , contraction takes place resulting in  $e \, o^{\, ij}$  respectively; e. g. pit/ $va = pit\acute{a}$  iva;  $\acute{e}m = \acute{a}$   $\bar{\iota}m$ ;  $\acute{e}bh\acute{a} = \acute{a}$   $ubh\acute{a}$ . When  $\acute{a}$  is followed by r, contraction is never written in the RV. and VS. 14, but the metre shows that the combination is sometimes pronounced as ar, as is the case in the compound saptarsáyah 'the seven seers' 15.

Apparent exceptions are due to erroneous metrical division of Padas by the editors of ratur 67 f. the Samhitas, or to mechanical repetition of formulas originally used in a different position in the verse. Thus srudhī | hávam (1. 2519) appears in imitation of srudhi havam which before vowels; see Oldenberg 465 f. is frequent at the beginning of a verse (II. 111, etc.). Cp. OLDENBERG 420 f.

<sup>&</sup>lt;sup>2</sup> See ZUBATY, Der Quantitätswechsel im Auslaute vedischer Worter, Vienna Or. Journal 2, 315.

<sup>3</sup> See ZUBATV, op. cit. 3, 89.

<sup>4</sup> See Oldenberg 399.

<sup>5</sup> Op. cit. 60.

<sup>6</sup> Cp. WACKERNAGEL I. 265 b, note.

Samhitas, as rr never meet; and in the RV. final r never occurs (cp. above, p. 59, note 8).

<sup>8</sup> Cp. Benfey, SV. XXXII f.; ROTH, Litte-

<sup>9</sup> ná 'like', is never combined in pronunciation, see above 67; cp. ARNOLD 120.

<sup>10</sup> Long vowels being regularly shortened II Cp. ARNOLD 124.

<sup>12</sup> Op. cit. 120. Before other vowels,  $\bar{a}v$ , the Sandhi form of au, the alternative dual ending, appears.

x3 Because the long monophthongs  $\bar{e}$  and  $\bar{o}$ represent IE. ăi and ăii.

<sup>14</sup> The MS. does not contract either, but on the contrary often lengthens  $\ddot{a}$  to  $\ddot{a}$ , even where the metre requires contraction. Cp. 7 There is no example of contracted γ in the | WACKERNAGEL 1, 267 a α, note.

<sup>15</sup> See Grassmann, Wörterbuch p. VII.

- a. In the RV.  $\bar{a}+i$  is once contracted to ai- in praisayu' (I. 120<sup>5</sup>) = praisayu' (Pp.)<sup>1</sup>; in the SV.  $\bar{a}+i$  is once contracted to ai- in  $aindra=\bar{a}$  indra (I. 2. I. 45); and in the AV. and VS. the preposition  $\bar{a}$  contracts with r to  $\bar{a}r$  in  $\bar{a}rti-=\bar{a}\cdot rti$  'suffering', and  $archatu=\bar{a}\cdot rechatu^2$ . The last three instances are perhaps survivals of an older contraction. That  $\bar{a}$  is not otherwise contracted with  $\bar{i}$   $\bar{u}$  r to ai au  $\bar{a}r$ , is doubtless to be accounted for by the previous shortening of  $\bar{a}$  in hiatus 3.
- b. Occasionally  $\tilde{a}$  followed by i remains uncontracted in the written text of the RV.; thus  $jy\bar{a}$   $iy\bar{a}m$  (vi. 753);  $pib\bar{a}$   $im\bar{a}m$  (viii. 171);  $ranay\bar{a}$   $ih\bar{a}$  (viii. 3411)4. When  $\bar{a}$  is followed by r, it is either shortened 5 or nasalized; e. g. tatha r-tih for  $tath\bar{a}$  r-;  $kad\bar{a}m$  rtacia (v. 39) =  $kad\bar{a}$  r-;  $vibhv\bar{a}m$  rbhur (iv. 333)6 =  $vibhv\bar{a}$  r-;  $vipany\bar{a}m$ 7 | rtasya (iv. 112) =  $vipany\bar{a}$  rtasya.
- c. On the other hand, in many instances where the contraction e or o is written, the original simple vowels must be restored with hiatus; e. g.  $\dot{e}ndr\bar{a}gn\bar{\iota}$  (I.  $108\dot{\tau}$ ) =  $\dot{a}$  indr $\bar{a}gn\bar{\iota}$ ; subhágos $\dot{a}h$  (I. 487) = subhága $\bar{a}$  uṣā $\dot{\mu}$ 8.
- 2. Final  $\tilde{a}$  contracts with a following e or ai to ai; and with o or au to au; e. g.  $\acute{a}ibhih$  for  $\acute{a}ebhih$ . But though the contraction is written, the original vowels must sometimes be restored; e. g.  $\acute{a}isu$  (I.  $61^{16}$ ) must be read  $\acute{a}esu$ .
- b. Final  $\ddot{a}$ , instead of being contracted with e is, in a few instances, nasalized before that diphthong; thus aminantam évaih \*\*I\* (I. 79\*) for -a é-; šášadānām éṣi (I. 12310) for -ā é-; upásthām | ékā (I. 356) for -ā é-.
- 3. When  $\tilde{a}$  remains after a final y or s has been dropped, it does not as a rule contract with the following vowel. Nevertheless such contraction is not infrequent in the Samhitās. In some instances it is actually written; thus  $s\acute{a}rtav\acute{a}j\acute{a}u$  (III.  $32^6$ ) = Pp.  $s\acute{a}rtav\acute{a}i$   $\bar{a}j\acute{a}u$ ;  $v\acute{a}s\acute{a}u$  (v.  $17^3$ ) = Pp.  $v\acute{a}i$   $as\acute{a}u$ ; and the compound  $r\acute{a}jejitam$  (VIII.  $46^{28}$ ) = Pp.  $r\acute{a}ja\rlap/{e}i-ijitam$ ; in the later Samhitās are found  $k\rlap/{e}ty\acute{e}ti$  (AV. x.  $1^{15}$ ) = Pp.  $k\rlap/{e}tya\rlap/{e}h$  iti;  $pivopavas\bar{a}nan\bar{a}m$  (VS. XXI. 43) = Pp.  $piva\rlap/{e}u-upavasan\bar{a}n\bar{a}m$   $1^2$ .

In other instances the contraction, though not written, is required by the metre; thus ta indra (VII. 21°), Pp. te indra, must be read as tendra; pṛthivyā antārikṣāt (AV. IX. 1°), Pp. pṛthivyāh, as pṛthivyāntārikṣāt 1³; goṣṭhā upa (AV. IX. 4°3), Pp. goṣṭhā upa, as goṣṭh pa.

a. There appear to be several other instances of such written contraction, which are however otherwise explained by the Padapātha; thus  $r\bar{s}y\delta t\dot{a}$  (x. 9310) =  $r\bar{s}y\dot{c}$   $ut\dot{a}$ ,

\* Several instances of this contraction occur in B and later.

<sup>2</sup> The TS. extends this contraction to prepositions ending in a: úpārchati, avārchati; see WHITNEY, APr. III. 47 f., TPr. III. 9 f. In the post-Vedic language this contraction was extended to all prepositions ending in ä.

3 Cp. Benfey, GGA. 1846, p. 822.

5 See p. 63, note 10;  $\bar{a}$  is shortened before r in the AB.; see AUFRECHT's ed. 427.

6 vábhvām occurs thus three times; see Lanman 529.

7 In opposition to the Mss. MAX MÜLLER, RV2. reads vipanyám rtásya because Sāyaṇa appears to favour that reading.

8 See ARNOLD, Vedic Metre 123.

9 This is a precursor of the post-Vedic rule by which the  $\ddot{a}$  of a preposition before initial e and o of verbs (except eti etc. and edhate etc.) is elided.

10 Though the AV. has páñcaudanapáñca odana- the elision of a before -odanaoften takes place in the Sūtras and later.

ri The old hiatus is here treated as it would be at the end of an internal Pada. The TS. (III. 1, II.5) retains the hiatus in the same verse without nasalization; cp. OLDENBERG 469 ff.

12 See WACKERNAGEL I, 268 b.

<sup>13</sup> In the Paippalāda recension this contraction is actually written.

Pp.  $r\bar{a}y\hat{a}$  utá;  $bh\hat{u}myop\acute{a}ri$  (x. 753) =  $bh\hat{u}my\bar{a}h$  upári, Pp.  $bh\hat{u}my\bar{a}$  upári $^{\mathrm{I}}$ . In a few of these the contraction must be removed as contrary to metre; thus usa vāti (III. 614), Pp. usá h vāti, which means 'Dawn goes', should be read as usá 'á vāti, as the sense requires Dawn comes', and the metre requires an additional syllable; abhistipási (II. 202), Pp. -på asi, should be read as abhistipå(h) asi; vrsabhéva (VI. 464), Pp. vrsabhå iva2, as vrsabhá(h) iva.

b. In a very few instances a final m is dropped after a, which then combines with a following vowel. This contraction is actually written in durgáhaitát (IV. 182) for durgáham etát (but Pp. durgáhā etát)3, and sávanedám (TS. I. 4. 442) for sávanam idám (Pp. sávanā idám). Occasionally this contraction though not written is required by the

metre; thus rāstrám ihá (AV.) must be read rāstréhá.

71. Final  $\vec{i}$  and  $\vec{u}$  before dissimilar vowels.—1. The final vowels  $\vec{i}$ and  $\check{u}$  before dissimilar initial vowels and before diphthongs are in the Samhitās regularly written as y and v5 respectively; e.g. práty āyam  $(I. II^6) = pr\acute{a}ti \ \bar{a}yam; \ \acute{a}tv \ \acute{c}t\bar{a} \ (I. 5^1) = \acute{a}t\acute{u} \ \acute{e}t\bar{a}; \ j\acute{a}nitry \ ajījanat (X. I34^1)$ = jánitrī ajījanat. The evidence of the metre, however, shows that this y or v nearly always has the syllabic value of i or  $u^6$ ; e.g. vy usa h (I. 924) must be read as vi usáh: vidáthesv añján (I. 925) as vidáthesu añján.

a. The final of disyllabic prepositions must, however, frequently be pronounced as a semivowel, especially before augmented forms; e. g. adhyásíhāh (I. 492); ánv acārişam (I. 2323); also anv ihi (X. 536)7.

b. In all the Samhitas the particle u following a consonant is written as v and pronounced as u before a vowel; e. g. ávéd v indra (I. 281)8; but the long form of the same particle occasionally remains unchanged in the RV. even after a consonant; e. g.

úd ū ayām (VI. 715); tám ū akruvan (X. 8810).

c. In RV. I—IX there are other instances of monosyllabic and disyllabic words at the end of which y and v are pronounced; but the only example of a trisyllabic word in which this occurs is stoyatu in stoyatu apah (11.324). In RV. X there are a few further examples; e. g. devésv ádhi (x. 1218)9.

d. The semivowel is regular in the compounds rtv-ij-, gávy-ūti-10, sv-āhā, and sv-id11.

2. Unchangeable  $\bar{i}$  and  $\bar{u}$ . a. The dual  $\bar{i}$  and  $\bar{u}$  never change to y or v; nor is the former ever prosodically shortened, though the latter sometimes is; e.g. hárī (U) rtásya; but sādhā (LU) asmai (II. 27 15). The dual ī may remain even before i; e. g. hárī iva, hárī indra, akṣi iva; but the contraction is written in upadhíva, pradhíva, dámpatīva, vispátīva, nrpátīva (AV.), ródasīmé (VII. 903) = ródasī imé 'these two worlds'. There are also several passages in which the contraction, though not written, must be read 12.

b. The rare locatives in  $\bar{\imath}$  and  $\bar{\imath}$ <sup>13</sup> (from stems in  $\bar{\imath}$  and  $\bar{\imath}$ ) are regularly written unchanged in the Samhitā text of the RV., except védy asyám (II.34),

<sup>1</sup> Cp. Wackernagel 1, 268 a.

3 Cp. DELBRÜCK, Verbum 67, end.

5 The Sandhi which changes a vowel to the semivowel is called ksaipra 'gliding', in the Prātiśākhyas; cp. RPr. II. 8; III. 7;

VII. 5.
6 The long vowel being regularly shortened; cp. OLDENBERG 465.

 $i\nu$  and uv are sometimes written for i and u; e. g. suv-itá- = su-itá- 'accessible'; hence the pronunciation may have been iy, uv; cp. WACKERNAGEL I, 270 c, 271 a.

9 See ARNOLD, Vedic Metre 125.

10 If the analysis of BR., gávi-ūti-, is correct; the Pp. divides gó- yūti-.

11 See Arnold, Vedic Metre 125.

12 Cp. WACKERNAGEL I, 270 b, note. Here we have probably not contracted forms with iva, but the dual  $\bar{i} + va$ , the byform of iva.

13 The vowels which regularly remain unchanged are called pragrhya, 'separated', by the native phoneticians; see RPr. 1. 16 etc.; VPr. 1. 92 etc.; APr. 1. 73 etc. They are indicated as such in the Pp. by an appended iti. The particle u is indicated as pragrhya in the Pp. of RV. and AV. by its nasalized form um (nasalization being employed to avoid hiatus: see above 66, 1).

<sup>&</sup>lt;sup>2</sup> In instances in which contraction with iva seems to take place, the existence of a byform va has to be taken into consideration; cp. GRASSMANN, Wörterbuch, column 221; WACKERNAGEL I, 268 a, note.

<sup>4</sup> In the RV. r is never final, and I doubt whether any example can be quoted from the other Samhitas in which it is followed by an initial vowel.

<sup>7</sup> WACKERNAGEL I, 271 b; OLDENBERG 438, note, ZDMG. 44, 326 note; ARNOLD, Vedic Metre 125.

<sup>8</sup> The TS. has uv for v. Elsewhere also Indo-arische Philologie. I. 4.

where, however, the vowel must be pronounced (\_\_\_\_). The vowels here (unlike the dual 7) seem always to be treated as prosodically short 1.

c. The final \(\tau\) of other cases also occasionally remains unchanged; thus the nominatives pṛthivi, pṛthujráyī, samrájnī and the instrumental sušámī

sometimes retain their  $\bar{\imath}$ , and the inst.  $\bar{\imath}t\dot{\imath}$  frequently does so '.

72. Final e and o.—r. a. Before a. The diphthongs e and o remain unchanged before an initial  $\alpha$ . This  $\alpha$  is often not written in the Samhitās 3. being dropped in about three-fourths of its occurrences in the RV. and in about two-thirds in the AV.4; but the evidence of metre shows that, in 99 instances out of 100 in the RV., and in about 80 in the AV. and the metrical parts of the YV., it is, whether written or not, to be read, and at the same time shortens the preceding diphthong to  $\check{c}$  or  $\check{o}^5$ . In visve deváso aptirah (1. 38) the a is both written and pronounced; in sūnávé | 'gne (1. 19) it must be restored: sūnáve | ágne6. The exceptional treatment of e in stotava ambyàm (VIII. 725), for stotave ambyam, indicates that the Sandhi of c and o before a was originally the same as before other vowels?. But their unchanged form, as before consonants, gained the day, because the short close a, when coming immediately after them in their character of monophthongs, would have a natural tendency to disappear and thus leave a consonant to follow.

b. Before other vowels. The diphthongs e and o before any vowels but  $\tilde{a}$  would naturally become ay and av, as being originally  $= \tilde{a}i$  and  $\tilde{a}u$ , and as having the form of ay and av within a word. But ay regularly drops the y; e. g. agna ihá (1. 2210); av on the other hand generally retains the v. dropping it before  $\tilde{u}^8$ ; e. g.  $v\tilde{u}yav$   $\tilde{u}$   $y\bar{u}hi$  (I. 21); but  $v\tilde{u}ya$  ukthébhir (I. 22).

2. Unchangeable e. a. The e of the dual nom. acc. f. n. of a-stems, e. g. ibhe 'both', is regularly uncontracted (pragrhya), because it consists of

a + the dual  $\bar{\iota}^9$ .

b. Under the influence of this nominal dual  $c_i$ , the verbal dual  $c^{10}$  of the 2. 3. present and perfect middle, e. g. váhethe 'ye two bring', bruvāte 'they two speak', āś-āthe 'ye two have obtained', come to be uncontractable, though the e is nearly always prosodically shortened; e. g. yuñjāthe apáḥ (I. 1514); but parimamnáthě asmán (VII. 93°).

c. The e of the locative tve' in thee', is uncontractable. Under its influence the other pronominal forms asmé 'us', and yuşmé 'you', are also always treated as pragrhya by the Samhitā as well as the Padapāṭha; it is,

<sup>1</sup> Cp. Oldenberg 456, note; Wacker-NAGEL 1, 270 b.

3 This form of Sandhi is in the Prātiśākhyas called abhinihita 'elided'; RPr. II. 13 etc.; VPr. 1. 114, 125; APr. 111. 54; TPr.

4 See Whitney 135 c.

5 Cp. Oldenberg 435 f., 453 ff., ZDMG.

44, 331 ff.; WACKERNAGEL I, p. 324.

6 The few instances (70 out of 4500) of the elision of a in the RV. are the forerunners of the invariable practice of post-Vedic Sandhi.

7 Internally the original Sandhi of the compound gó-agra- must have been gáv-agra-; cp. WACKERNAGEL I, p. 325, note.

10 There was originally no difference between this dual e and any other e in middle forms, such as that of the dual -vahe, the

singular -te, and the plural -ante.

<sup>&</sup>lt;sup>2</sup> Cp. op. cit. 1, 270 b, note. Such forms, in which the absence of contraction is only occasional, are not indicated by iti in

<sup>8</sup> There are a few survivals of ay; e. g.  $t\acute{a}y$   $\acute{a}$  (MS. I. I<sup>1</sup>) =  $t\acute{a}$   $\acute{a}$  (TS.); cp. TPr. x. 23; OLDENBERG 447 ff. In the MS., the K., and Mantras occurring in the Manavasütras, unaccented  $\alpha$  for e before an accented initial vowel is lengthened; e. g. á dadhā iti.

<sup>9</sup> See above 71, 2. A dual e once appears contracted in dhisnyemé (VII. 723), which, however, should probably be read uncontracted as dhisnye ime. The -cva which occurs several times (I. 1864 etc.) and looks like a contraction of the dual e with iva, in reality probably stands for the dual e + va, the byform of iva; cp. WACKERNAGEL I, p. 317, note, top.

however, doubtful whether they were so treated in the original text of the RV.1.

- 3. Unchangeable o. a. When o is the result of combining the final  $\ddot{a}$ of particles with u (which itself is often unchangeable)2, it is pragrhya; thus  $\delta (= \delta u)$ ,  $\delta tho (= \delta tha u)$ ,  $ut\delta (= ut\delta u)$ ,  $m\delta (= m\delta u)$ .
- b. Following this analogy, the vocative in o of u-stems is sometimes treated as pragrhya in the Samhita of the TS.; e. g. pito a (TS. v. 7.24). It is regularly so treated in the Padapāthas of the RV., AV., VS., TS. (but not SV.). Thus in  $v \dot{a} y a v \dot{a}$  (I. 2<sup>1</sup>),  $v \dot{a} y a u k t h \dot{b} h i r$  (I. 2<sup>2</sup>),  $v \dot{a} y a v \dot{a} t \dot{a} v a$  (I. 2<sup>3</sup>) the vocative is equally given in the Padapatha as vayo iti.
- 73. The diphthongs ai and au.—The diphthongs ai and au are treated throughout in the same way as e and o before vowels other than a. Thus ai is regularly written  $\bar{a}$  (having dropped the y of  $\bar{a}y$ ); e.g. tásm $\bar{a}$  akst (I. II616); tásmā indrāya (I. 49). On the other hand, au is generally written  $\bar{a}v$ , but always  $\bar{a}$  before  $\bar{u}$  in the RV. and VS.; e.g.  $t\dot{\bar{a}}v$   $\dot{\bar{a}}$  (1. 25);  $t\dot{\bar{a}}v$  $indr\bar{a}gn\bar{\iota}$  (I. 1083); but  $suji/v\dot{a}$  i/pa (I. 138). In the AV.  $\bar{a}$  appears before uin  $p\bar{a}d\bar{a}$  ucyete (AV. xix. 65). In the MS.  $\bar{a}$  appears before other vowels also 3.
- 74. Euphonic combination of consonants. The Sandhi of final consonants, generally speaking, starts from the form which they assume in pausā. Thus an aspirate first loses its aspiration; the palatal c becomes k;  $j \circ k$  become k or  $t^4$ ; and of a group of consonants the first alone remains. Final n is, however, to a great extent differently treated from what it is in pausā; and the Sandhi of s and r is, for the most part, based not on h, their form in pausa, but on the original letter.

A final consonant is assimilated in quality to the following initial, becoming voiceless before a voiceless consonant, and voiced before a voiced sound 7; e. g.  $t\acute{a}t$  satyám (I. 15) for  $t\acute{a}d$ ;  $y\acute{a}t$   $tv\bar{a}$  (I. 15 10) for  $y\acute{a}d$ ;  $havyav\acute{a}d$ juhväsyaḥ (1. 126), through -váṭ for -váh; gámad vájebhiḥ (1. 53) for gámat; arvág rádhah (1. 95) for arvác through arvák.

- a. A final media before a nasal may become the nasal of its own class. There seems to be no certain instance of this in the RV.; cakrán ná (x. 9512. 13), however, probably stands for cakrát ná, though the Pp. has cakrán ná. This assimilation is regular în some compounds; e. g. sán-navati- '96' for sát-navati-. From here it penetrated into internal Sandhi; e. g. san-nam.
- b. Assimilation not only in quality, but also largely in the place of articulation occurs in the Sandhi of final m, of the final dentals 8 7 n s, and of final r (under the influence of s).
- 75. Euphonic combination of final m.— i. Before vowels, final mremains unchanged; e. g. agnim īļe (I. I I). In a very few instances, however, the m is dropped, and the vowels then contract. This Sandhi is mostly indicated by the metre only: it is very rarely written9, as in durgáhaitát

<sup>&</sup>lt;sup>1</sup> Cp. Oldenberg 455, note.

<sup>&</sup>lt;sup>2</sup> Cp. above 71, 1 b.

<sup>3</sup> See GARBE, GGA. 1882, 117 f.; WACKER-NAGEL I, 274; OLDENBERG, ZDMG. 60, 755 -758 (Duale auf  $-\bar{a}$  und -au).

<sup>4</sup> Some compounds, however, preserve survivals of an earlier phase of Sandhi; e.g. viś-páti- 'lord of the house'; viśpálā- N., not vit-; nabh-ráj- (MS.) 'cloud-king', not nab-ráj-. Cp. L. v. Schroeder, ed. of MS. 1, p. xvi.

<sup>5</sup> Final t before vowels becomes l in the RV., not d as later; e. g. bál itthá, for bát.

<sup>6</sup> Within a word a voiced consonant is not necessary before vowels, semivowels, of the TS.; see WACKERNAGEL I, 277 b. and nasals.

<sup>7</sup> Some scholars think that the 3. sing. impv., e. g. bhávatu represents bhavat u for original bhavad u, the t being retained owing to the influence of the innumerable forms of the 3. sing. with -t, -ti, -te, etc. (cp. WACKER-NAGEL I, 276 b); but this is doubtful; DEL-BRÜCK, Altindische Syntax 517ff., thinks it may originally have been bhava + tú (particle); cp. IF. 18, 71.

<sup>8</sup> An example of a final guttural becoming a dental before a dental occurs in TS. I. 2.71, where samyát te stands for samyák te. There are a few other examples in B. passages

<sup>9</sup> See above 70, 3 b.

(IV. 182) for durgáham ctát, and it is never analysed by the Padapātha in this way. It may perhaps have started from the analogy of the doublet

thibhya beside thibhyam 'to thee' 1.

2. Before mutes, final m is regularly assimilated, becoming the corresponding nasal, and before n similarly becoming n. The Mss. and printed texts, however, represent this assimilated m by the Anusvāra sign; e. g. bhadrám karisyási (I. 16) for bhadrán karisyási; bhadrám no (x. 201) for bhadrán no. This actual change of m to n before dentals led to some errors in the Pada text; e. g. yán ni-pási (IV. 116), analysed as yát instead of yám; ávi-venan tám (IV. 246), analysed as ávi-venan instead of ávi-venam (cp. IV. 253).

3. Before  $r \le s \le a$  and  $h^3$ , final m becomes Anusvāra (m); e.g. hótāram ratnadhátamam  $(1. 1^i)$ ; várdhamānam své  $(1. 1^9)$ ; mitrám huve  $(1. 2^7)$ . From its original use before sibilants and h, Anusvāra came to be employed before the semiyowel also 4. A compound like sam-ráj- 'overlord' shows that m

originally remained unchanged in Sandhi before r.

4. Before  $y \mid v$ , final m is assimilated as nasalized  $\dot{y} \mid \dot{l} \mid \dot{v}$ . The TPr.°, however, allows Anusvāra beside these, while the APr. even requires Anunāsika before y and v; and the printed texts regularly use Anusvāra; e. g.  $s\acute{am}$  yudhi (1.83);  $yaj\~n\acute{am}$  vastu (1.3010). Forms like  $yamy\acuteam\~ana$ - 'extended' and  $\acute{apamlukta}$ - 'concealed' show that final m originally remained unchanged in Sandhi before y and  $l^5$ ; and forms like  $jaganv\acute{an}$ , from gam- 'go', point to its having at one time become n before v in Sandhi.

76. Euphonic combination of final t. — t. Before l, final  $t^6$  becomes

fully assimilated as l; e. g. ángāl lómnaḥ (x. 1636) for ángāt lómnaḥ.

2. Before palatals (including  $\dot{s}$ )? final  $\dot{t}^{\text{I}}$  becomes palatal<sup>8</sup>; e. g.  $\dot{t}$   $\dot{a}$   $\dot{c}$   $\dot{a}$   $\dot{k}$   $\dot{s}$   $\dot{u}$   $\dot{h}$  (VII.  $\dot{b}$   $\dot{b}$  for  $\dot{t}$   $\dot{a}$   $\dot{d}$   $\dot{c}$   $\dot{a}$   $\dot{k}$   $\dot{s}$   $\dot{u}$   $\dot{h}$   $\dot{b}$   $\dot{c}$   $\dot{c}$   $\dot{b}$   $\dot{d}$   $\dot{c}$   $\dot{d}$   $\dot{d$ 

in a compound yātayáj-jana- 'marshalling men', for yātayát-jana-.

77. Euphonic combination of final n.— I. Before vowels. Final  $n^9$ , a. if preceded by a short vowel, is doubled  $10^9$ ; e. g. dhann dhim (II. II5) for dhan. The final n is here chiefly based on original ns or nt. Though it is always written double  $10^{11}$ , the evidence of metre shows that this rule was only partially applied in the RV.  $10^{12}$ .

b. If preceded by a long vowel, it becomes within 3 a Pāda in the RV.  $\dot{m}$  after  $\bar{a}^{14}$ , but  $\dot{m}r$  after  $\bar{\iota} \bar{u} \bar{F}^{15}$ ; e.g.  $s\acute{a}rg\bar{a}\dot{m}$  iva, for  $s\acute{a}rg\bar{a}n$ ;  $paridh\acute{t}n\mathring{x}$   $i\acute{t}i$ , for  $paridh\acute{t}n$ ;  $abh\acute{t}s\bar{u}n\mathring{r}$  iva, for  $abh\acute{t}s\bar{u}n$ ;  $n\acute{r}n\mathring{r}$   $abh\acute{t}$ , for  $n\acute{r}n$ . This Sandhi was caused by the n having originally been followed by  $s^{16}$ ; e.g.  $v\acute{r}k\bar{a}n$  originally

<sup>2</sup> Op. cit. I, 283, b α.

3 Op. cit. I, 283 d.
4 In the post-Vedic language

5 Cp. Wackernagel I, 283 c.

8 Final dentals never come into contact with initial cerebrals in the Samhitās.

9 This rule applies to final guttural n also; e. g. kīdṛnn i- (x. 1083), cp. Lanman 490; hinn akṛṇot (1. 16428) for hin α-.

The compound vrsan-asvá- having stallions as steeds', forms an exception.

12 Cp. OLDENBERG 424 f., 429 ff.

14 In the MS. and K.,  $-\bar{a}m$  is shortened to -am; e. g.  $asm\acute{a}m$   $a\acute{s}notu$  for  $asm\acute{a}n$ . Cp. v. Schroeder, ed. of the MS. I, p. XXIX.

15  $\bar{r}n$  becomes  $\bar{r}mr$  only once (v. 5415), remaining unchanged elsewhere because two r sounds are avoided in the same syllable (see below 79).

<sup>16</sup> For examples of this Sandhi applied to nominatives in  $-\bar{a}n$ , see LANMAN 506 A, note (mahān), 512 ( $-v\bar{a}n$ ), 514 ( $-y\bar{a}n$ ), 517 ( $-m\bar{a}n$ ); for accusatives, 346.

<sup>&</sup>lt;sup>1</sup> Cp. WACKERNAGEL I, 283 a, note.

<sup>4</sup> In the post-Vedic language Anusvāra came to be allowed before mutes and nasals also.

<sup>6</sup> Representing th d dh also, if they occur. 7 In the MS. t anomalously becomes ñ, instead of c, before s; see L. v. SCHROEDER, ZDMG. 33, 185; ed. of MS. I, p. XXIX. On the aspiration of s in this Sandhi, see below 80 a.

<sup>&</sup>lt;sup>11</sup> For various explanations of this doubling, see Wackernagel I, 279 a (p. 330).

<sup>13</sup> At the end of a Pāda,  $-\bar{a}n - \bar{i}n - \bar{n}n$  remain unchanged (as being in pausā) before a vowel. For passages in which  $-\bar{a}n$  is unchanged within a Pāda, see below and OLDENBERG 428.

\*vrkans 1; mahán for \*mahánts; á-yān, 3. sing. aor. for \*á-yān-st (1. sing. á-yāṃsam) 2. The n became Anusvāra (or Anunāsika) before this s, which was treated in exactly the same way as when it followed an unnasalized vowel ( $\bar{a}s$  becoming  $\bar{a}$ , but  $\bar{\imath}s$ ,  $\bar{\imath}s$ ,  $\bar{r}s$  becoming  $\bar{\imath}r$ ,  $\bar{\imath}r$ ,  $\bar{r}r$ ).

- $\alpha$ . The  $\tilde{a}n$  of the 3. pl. subjunctive (originally  $\tilde{a}nt$ ), however, remains unchanged before vowels within a Pada, obviously owing to the -/ which at one time followed. There happen to be only five occurrences of this form under the conditions required: ấ vahān āśú (I. 8418); ghósān úttarā (III. 338); sphurắn rjipyám (VI. 6711); gácchān íd •(VIII. 795); gacchān úttarā (X. 1010)3.
- 2. Before consonants. Final n remains unchanged before all gutturals and labials (including m), as well as before voiced dentals (including n). It is, however, liable to be changed before the following sounds:

a. Before p, final n, when etymologically = ns, sometimes becomes mh; thus  $n\dot{r}mh$   $\rho\bar{a}hi$  (VIII.  $84^3$ ) 4;  $n\dot{r}mh$   $\rho\bar{a}tram$  (I.  $121^{\circ}$ ).

b. Before all palatals that occur it becomes palatal  $\tilde{n}$ ; e. g.  $\bar{u}rdhv\dot{a}\tilde{n}$ caráthāya (1.3614) for ūrdhván; táň jusethām (v.516) for tán; vajriň chnathihi

(1.635) for vajrin śnathihi5; deváñ chlókah (X.125) for deván ślókah.

Before c, however, the palatal sibilant is sometimes inserted  $^6$  in the RV., the n then becoming Anusvāra. This insertion occurs only when the sibilant is etymologically justified (that is, in the nom. sing. and acc. pl. masc.) almost exclusively (though not invariably) before ca and cid; thus anuyājāms ca (x. 518), amenāms cid (v. 312)?. In the other Samhitās the inserted sibilant becomes commoner, occurring even where it is not etymologically justified (that is, in the 3. pl. impf., and the voc. and loc. of nstems) 8.

c. Before dental  $t^9$ , final n usually remains; but the dental sibilant is sometimes inserted in the RV., the n then becoming Anusvāra. This insertion, however, occurs in the RV. only when it is etymologically justified; it is commoner in the other Samhitas 10, where it appears even when not etymologically justified.

d. Before y r v h, final n as a rule remains unchanged; but  $-\bar{\alpha}n$ ,  $-\bar{\imath}n$ ,  $-\bar{u}n$  sometimes become  $-\bar{u}m^{i}$ ,  $-\bar{v}mr$ ,  $-\bar{u}mr$ , as before vowels; e.g.  $-ann\bar{a}m$ rayivfdhah (VII. 913) for -annān; dadvām vā (x. 1323) for dadvān; panimr hatam (I. 1842) for panin; dásyūmr yónau (I. 634) for dásyūn.

e. Before I, final n always becomes nasalized l'12; e. g. jigīvāl lakṣám (II. I 24).

f. Before the dental sibilant, final n remains; but a transitional  $t^{13}$ may be inserted; e. g. ahant sáhasā (I. 8010) 'he slew with might'; tấn sám may also be written  $t \acute{a}nt s \acute{a}m^{14}$ . In the former example the t is organic; from such survivals it spread to cases where it was not justified. A similar insertion may take place before s; that is, vajrin śnathihi may become vajriñ śnathihi or vajriñ chnathihi (through vajriñc śnathihi for vajrint śnathihi) 15.

\* Cp. Cretic λύκους.

3 Cp. OLDENBERG 428.

4 The MS. (II. 1311) has nṛmṣ pāhi.

7 Op. cit., 512.

post-Vedic language a sibilant is invariably inserted after n before all voiceless palatals, cerebrals, and dentals.

9 Neither th nor t th occur in the Samhitäs after final n.

10 Cp. LANMAN 516 A, note.

II For dadhanvám yáh of the RV. (IX. 1071) and SV., the VS. (XIX. 2) has dadhanva yah.

12 As m does before l; see above 75, 4. 13 Before s a transitional & may similarly be inserted after a final n; e. g. pratyán sá may also be written pratyánk sá.

<sup>&</sup>lt;sup>2</sup> In all the other Samhitas the pause forms -an -in -in -rn predominate. In the post-Vedic language they became the only allowable forms.

<sup>5</sup> For examples of nominatives with this Sandhi, see LANMAN 506A, note, 512 (top), 517. 6 Op. cit., 506 A, note, and 514.

<sup>8</sup> There are no examples of the inserted sibilant before ch in the Samhitas. In the

<sup>14</sup> See Lanman 506 A, note, and 346. 15 Cp. WACKERNAGEL I, 282, note.

78. Euphonic combination of final s. — I. Before voiced sounds. a. Final s after all vowels except  $\tilde{a}$ , assumes its voiced form r before all vowels and voiced consonants; e. g. rsibhir tilyo (1. 12) for rsibhis; agnir hítā (I. 15) for agnis; paribhūr ási (I. 14) for paribhūs; nūtanair utá (I. 12) for nitanais.

The s doubtless became r through an older transitional voiced cerebral

 $z^2$ , as is shown by the Avesta, e. g. in du = du - ita.

b. Final s after a must originally have become z before voiced. sounds. But az drops the sibilant before vowels and voiced consonants, while az drops it before vowels except  $a^{\dagger}$ , but becomes  $o^{5}$  before voiced consonants6 and a; thus suta ime (1. 34) for sutas; visvā vi (1. 312), for visvās; khya á for khyas (1.43); no áti (1.43) for nas; indavo vām (1.21) for indavas.

2. Before voiceless consonants. a. Before the palatals c, ch, s

final s becomes the palatal sibilant s/7; e. g. devās' cakṛmá (x.  $37^{12}$ ).

b. Before the dental to, final s following a always remains; e.g. yas te (1. 41); médhirās tiṣām (1. 117). After  $\vec{i}$   $\vec{u}^{10}$ , it remains as a rule; e. g. ánvībhis tánā (1.34). But s becomes s, which cerebralizes the following t to t: a. regularly in compounds " in all the Samhitas; e. g. dis-tara- 'insuperable' for dis-tara- (but rajas-tir- 'traversing the air'); 6. often in external Sandhi in the RV. This occurs chiefly, and in the independent passages of the other Samhitās 12 only, before pronouns; e. g. agnis te; krátus tám; otherwise it occurs occasionally only in the RV.; thus nis-tataksúr (X.317); gobhís tarema (X. 4210); nákis tantisu (VIII. 2012) 13.

c. Before k kh p ph, final s as a rule becomes Visarjanīya (its pause

treated like an original r, being dropped would become  $-i\bar{a}$  before r. after lengthening the preceding vowel.

corresponding to the voiceless s which appears before voiceless consonants (e. g. in duskha-).

3 This s would account for the Sandhi of some Vedic compounds formed with dus-'ill': dū-dábha-, dū-dás-, dū-dhi-, dū-nása-, dūnåśa-, beside dur-niyántu-. It may possibly also account for the forms svádhitīva (v. 87), for svádhitiz va (Pp. svádhitir-iva), and urv iva (IX. 9615), where the metre requires uru va (Pp. urii-iva); the cerebral being dropped after lengthening the preceding vowel.

4 In the vis. unaccented -a for -as is lengthened before an accented vowel; e. g. tátā indrah. In TS.11.4.71 ar for a in jinvár āvrt is merely a bad reading (MS. II. 47

jinva rāvá!); cp. above p. 33, note 13.
5 In the compound ánar-vis- (I. 1217)
'having a wain as his abode', ar instead of o (cp. ánas-vant- 'possessed of a wain)' is perhaps due to the influence of vanar-, beside vanas- and vana-. On a still more anomalous compound of the same word, anad-vāh- 'drawer of a cart', 'bull', cp. WACKERNAGEL I, p. 339, top. The vowel ā appears instead of o in pracetā | rājan (I. 2414) 'O wise king' (praceto rajan in the same verse, TS. 1. 5. 113), probably owing to the voc. pracetah, as it would have been

When final s becomes r before r, it is a voc. in -tar (from a stem in -/r), which

O The starting point of this Sandhi was <sup>2</sup> This z would be the voiced cerebral probably the treatment of az before voiced dentals, where the sibilant was dropped and the preceding vowel lengthened to e or o. The latter finally carried the day, e surviving only in sure duhita (I. 345); cp. BARTHOLO-MAE, BB. 15, 1f.; WACKERNAGEL 1, p. 338.

7 Số cit does not stand for sáh cit, but

for sá u cit.

8 If initial cerebral mutes had existed in the Samhitas, final s would doubtless have become the cerebral sibilant s before them.

9 No example of initial the occurs in the Samhitās; but the internal Sandhi of sthā-'stand', in ti-sthati (for ti-stha-ti) shows that initial th would have been treated in the same way as t.

10 Final rs never occurs; rs, occurring only once in the RV., remains unchanged in

mātrs trin (I. 16415).

The only exception in the RV. is cátus-trimsat 'thirty-four', doubtless due to the avoidance of the combination str.

12 The TS. also has nis tap- 'heat'. On the usage of the SV., see BENFEY, SV. p. XLIII; on that of the AV., see WHITNEY, APr. 11. 84.

13 Owing to the far more numerous occurrences of as before t, combined with the disinclination to change the following initial, the retention of s after  $\tilde{i}$   $\tilde{u}$  gradually pronounced at the end of a Pada in the gained ground and finally prevailed in the original text, having been misunderstood as post-Vedic language, even in compounds.

form), or Jihvāmūlīya (1) before the gutturals and Upadhmānīya (1) before the labials; e. g. indraḥ páñca (1. 7°). But ăs remains and is is īs īs become is is īs īs īs a. regularly in compounds in all the Samhitās; e. g. paras-pá-'far-protecting'; haviṣ-pá-'drinking the offering'; duṣ-k/t-'evil-doing'; duṣ-pád-'evil-footed'. The general rule, however, applies in the following compounds: puráḥ-prasravaṇa- 'streaming forth'; chándaḥ-pakṣa- (AV.) 'borne on the wings of desire'; śrċyaḥ-keta- (AV.) 'striving after superiority'; sadyaḥ-krź- (AV.) 'bought on the same day'; bahiḥ-paridhi (TS.) 'outside the enclosure'; itiḥ-pradāna- (TS.) 'offering from hence (= this world)'.

The repeated (or amrejita) compounds also follow the general rule, doubtless from a desire to change the repeated word as little as possible; thus purvale-parvo 'each first'; parale-parale 'always without' (AV.); parale-parusas (VS.) 'from every knot'; purusale-puruso (TS.) 'every man'; parule-parule (TS.) 'joint by joint', but parus-parur also in RV. AV. TS.

β. Often in external Sandhi in the RV.2; e. g. divás pári (x. 45¹) 'from the sky'; pátnīvatas kṛdhi (1. 14²) 'make them possessed of wives';

dyáus pitá (IV. 110) 'Father Heaven'.

d. Before mutes immediately followed by s or s, final s regularly becomes Visarjanīya; e. g. śatákratuh tsárat (VIII. 1<sup>11</sup>); ubhayatah-kṣṇhr (TS.) 'two-edged'. Occasionally the sibilant disappears, as in ádha ksárantīr (VII. 34<sup>2</sup>)<sup>3</sup>.

- e. I. Before a simple sibilant final s is either assimilated or becomes Visarjanīya; e. g. vas sivātamo or vaļi sivātamo (x. 9¹); dēvīs saļ or dēvīh saļ (x. 128⁵); nas sapātnā or naḥ sapātnā (x. 128°). Assimilation is undoubtedly the original Sandhi⁴ and is required by some of the Prātisākhyas⁵; but the Mss. usually employ Visarjanīya, and European editions regularly follow this practice⁵.
- a. The sibilant disappears in the compounds barhi-sád- 'sitting on the sacrificial litter'; dráu-samsita- (AV.) 'sky-sharpened'; and, after lengthening the preceding a, ayrī-sayā rajā-sayā harā-sayā (TS. 1. 2. 112 MS. 1. 27) for ayas-, rajas-, haras-.
- 2. Before a sibilant immediately followed by a voiceless mute, a final sibilant is dropped; e. g. mandibhi stómebhir (1. 93) for mandibhis; mithaspfrdhyā (1. 1669) for mithas-; du-s/uti-'ill praise' for dus-7. The omission is required by the Prātiśākhyas of the RV., VS., TS., and is the practice of all the Mss. of the MS.
- 3. Before a sibilant immediately followed by a nasal or semivowel, a final sibilant is optionally dropped; thus kṛta śrávaḥ (vi. 583), beside which (though the Pp. reads kṛta) the MS. reads kṛtaḥ śrávaḥ³; ni-svarám (vii. 17) for nis-svarám 'noiseless' (Pp., however, ni-svarám).
- 79. Euphonic combination of final r.—As k is the pause form of both r and s, a certain amount of mutual contamination appears in their Sandhi; r, however, suffers much more in this respect than s. Since both s and r when preceded by  $\tilde{i}$   $\tilde{u}$  have the same natural Sandhi, it is in a few

<sup>\*</sup> This treatment of final s before voiceless gutturals and labials, which is parallel to that before t, was doubtless the original from of sentence Sandhi.

 $<sup>^2</sup>$  adó pito (1. 1877) is probably only an apparent exception, as  $ad\delta = \dot{a}da \ u$ , not  $\dot{a}das$  (Pp.  $ad\dot{a}\dot{b}$ ); the Paippalada recension of the AV., however, has  $\dot{a}das$  pito, for  $ad\dot{a}s$ .

<sup>3</sup> Though the Pp. reads ádha, the PB. in quoting the verse has ádhah; see OLDENBERG 369, note 1.

<sup>4</sup> Cp. WHITNEY on APr. II. 40.

<sup>5</sup> Cp. WACKERNAGEL 1, p. 342, top.

<sup>6</sup> In páritó siñcata (x. 1071), itó probably = itá u (Pp. pári itáh).

<sup>7</sup> The omission was doubtless due to the fact that it made no difference to the pronunciation. Hence probably the wrong analysis of isastit by the Pp. as isah-stit, instead of isa-stit, as in isa-vant- (cp. BR.).

<sup>&</sup>lt;sup>8</sup> Cp. BOLLENSEN, ZDMG. 45, 24; PISCHEL, Vedische Studien I, 13.

instances uncertain which was the original sound. Thus it is somewhat doubtful whether the -u/v of the abl. gen. sing. of r-stems and of the 3. pl. act. of past tenses represents original us or ur. In the verbal form, the r in the corresponding middle termination of the perfect, -re, seems to decide in favour of ur 1.

1. a. Before vowels and voiced consonants (except r itself) r remains not only when preceded by  $\tilde{i}$   $\tilde{u}^2$ , but by  $\tilde{a}$  also<sup>3</sup>; e. g.  $gir \mid is\hat{a}$  (1. 117<sup>1</sup>); pár devatrá (VII. 521); prātár agnih (V. 181); plinar nah (X. 575); svàr druhú  $(II. 35^6)^4$ .

b. Before r, r disappears, after lengthening a preceding vowel; e. g. plinā rūpāni (AV. 1. 244). In a few instances, however, o appears instead of  $\bar{a} (=ar)$ , under the influence of -ah as the pause form of neuters in -as; thus údho romasám (VIII. 319), for údhā; and the compound aho-rātrá- 'day and night', for aha-.

2. Before voiceless consonants final r is as a rule treated like s.

a. Before the gutturals k kh and the labials p ph, it becomes hunder the influence of the pause form; e.g. pinah kaléh (x. 398); pinah pátnīm (x. 85<sup>29</sup>); púnah-punar (1. 92<sup>10</sup>). But that the r originally remained before these consonants is shown by its survival in the compounds púr-pati-, svàr-pati-, vār-kāryá-, ahár-pati- (VS.). But even here the pause form was gradually introduced; e.g. svàh-pati- (SV.); it supplanted the r of antár throughout; e. g. antali-peya- 'drinking up'; antali-kośú- (AV.) 'inside of a store-room'; antali-parśavyá- (VS.) 'flesh between the ribs'; antali-pātrá- (AV.) 'interior of a vessel'; and because the pause form of r and s was identical, the Sandhi of s came to be applied here even in the RV.; thus ántas-pathabeing on the way' (for ántar-); cátus-kaparda- 'having four braids', cátus-pād-'four-footed' (for cátur-).

b. Before the palatals c ch, final r invariably (like s) becomes the palatal sibilant s'; e. g.  $p\vec{u}s'$  ca (1. 1892) for  $p\vec{u}r$  ca. This applies almost always even in compounds; e. g. cátuś-catvāriņisat (VS.) 'forty-four'. There are only two examples of the r being retained even here: svàr-caksas-'brilliant as light', svàr-canas- 'lovely as light'.

c. Before dental t, final r is without exception treated like s; e.g. gís tribarhísi (1.1818) for gír; cátus-trimsat 'thirty-four' for cátur-. The retention of r before t in avar támah (1.924) is only apparently an exception, as this really stands for avart támah5.

d. Before sibilants, final r appears in its pause form as Visarjanīya in sentence Sandhi, e. g. pinah sám (11. 384). In compounds, however, it

<sup>1</sup> Cp. WACKERNAGEL I, 284 note (p. 335). as the form would originally have been -1694, columns 3-4.

3 r is original in dvar- 'door'; var- 'protector'; vár-'water'; áhar-'day'; usár-'dawn'; ūdhar- 'udder'; vádhar- 'weapon'; vanar-'wood'; svà; 'light'; antár 'within'; avár 'down'; púnar 'again'; prātár 'early'; the voc. of r-stems, e.g. bhratar; the 2.3. sing. of past tenses from roots in -r, e. g. avar, from vr- 'cover'.

4 áha evá (VI. 487) for áhar evá is due to áhah, the pause form of áhar, being treated like that of a neuter in -as, ahas. In aksā indur (IX. 983) for aksār indur (Pp. aksār), the editors of the Samhita misunderstood akṣāh,

2 A list of root-stems in -ir and -ur will pronounced at the end of an internal Pada. be found in Grassmann's Wörterbuch 1693 udho for udhar, which appears before a and m, is due to the influence of neuters in as, the pause form of which, -ah, would be the same as of those in -ar. The form avó, for avár 'down', which appears before d (avó drvá): V. 406, etc.; but before m, avár mahá); I. 1336), is due to the influence of páro diváh and páro divá (for páras), cp. RPr. I. 32. āvo before a, d, m, explained by BENFEY (SV. XL and 176) as standing for avar is probably from vas-'shine' (cp. WACKERNAGEL 1, p. 335, top).

5 Cp. above 62, 1.

frequently remains; thus vanar-sád- and vanar-sád- 'sitting in the wood'; dhūr-ṣád- 'being on the yoke'; svar-sá- 'winning light'; svàr-sāti- 'acquisition of light'; dhūr-ṣāh- (VS.) 'bearing the yoke'. This indicates that it originally remained before sibilants in sentence Sandhi also.

80. Initial aspiration. — The palatal sibilant s and the breathing h,

when initial, may under certain conditions be changed to aspirates.

a. After a final c, initial s' may become, and in practice always does become, ch; e. g. yác chaknávāma (x. 23) for yád śaknávāma. The same change occasionally takes place after t; thus vipāt chutudri (III. 331), for śutudri; turāṣāṭ chuṣmi (v. 404) for śuṣmi.

b. After a final voiced mute, initial h may be and usually is changed to the aspirate of that mute; e. g. tád dhí (1.1262) for tád hí; sídad dhótā  $(x. 12^1)$  for sidad (= sidat) hita; avad dhavyani  $(x. 16^{12})$  for havyani.

- 81. Sandhi of compounds . The euphonic combination at the junction of the members of compounds is on the whole subject to the rules prevailing in external Sandhi or between words in a sentence. Thus the evidence of metre shows that contracted vowels are often even in compounds to be read with hiatus, when the initial vowel of the second member is in a heavy syllable; e. g. yuktá-aśva- 'having yoked horses', devá-iddha- 'kindled by the gods', áccha-ukti- 'invitation'. Many archaisms of Sandhi are, however, preserved in compounds which have either disappeared from or are obsolescent in the sentence.
- 1. An earlier stage of Sandhi has been preserved by compounds alone in the following instances:
- a. Several old phonetic combinations appear in single words: dvi-bárha*jman-* 'having a double course' for *dvi-bárhaj-jman-* (= \**dvi-bárhad-* from bárh-as, with -ad for -as before the voiced palatal)2; barhi-sád- 'sitting on the sacrificial litter' (from barhis- for barhis-sád-); viś-páti- 'lord of the house' and vis-pátnī- 'mistress of the house' (with s' retained instead of t)3, sam-rāj-'sovereign ruler' (with m preserved before r)<sup>4</sup>.
- b. In a group of compounds with dus- 'ill' as first member, the combinations  $d\bar{u} \cdot d = duz \cdot d$  and  $d\bar{u} \cdot n = duz \cdot n$  appear instead of dur-d and dur-n: dū-ḍábha- 'hard to deceive', dū-ḍht- 'malevolent', dū-ṇáśa- 'hard to attain', dūnāśa- 'hard to attain' and 'hard to destroy', dū-dāś- (AV.) 'not worshipping'. But dur-, the form which would be required by external Sandhi, is already commoner in the RV.; e. g. dur-dṛśīka- 'looking bad', dur-dhár-ī-tu- 'hard to restrain', dur-náman- 'having a bad name', dur-nása- (AV.) 'hard to attain'.
- c. Final r in the first member is preserved in the RV. before voiceless sounds<sup>5</sup>; thus vār-kāryá- 'producing water', svàr-cakṣas- 'brilliant as light', par-pati- 'lord of the stronghold', svar-pati- 'lord of heaven', dhur-sad-6 'being on the yoke'.
- d. Radical stems ending in -ir and -ur mostly lengthen their vowel before consonants (as within words), e. g. dhūr-ṣád- 'being on the yoke', dhūrṣāh- (VS.) 'bearing the yoke', pār-pati- 'lord of the stronghold', pār-bhid-'breaking down forts', pūr-bhídya- n. 'destruction of forts', pūr-yāna-7 'leading to the fort'.

7 But gir retains the short vowel in girvanas- 'fond of praise', gir-vahas- 'praised in

<sup>&</sup>lt;sup>1</sup> See Benfey, Göttingische Abhandlungen 15, 105 ff.; WACKERNAGEL 21, 125-139.

<sup>&</sup>lt;sup>2</sup> Cp. above 44 a, 3. <sup>3</sup> Later vit-pati- (TB. II. 5. 74), and even in the RV. pád-bīśa- 'fetter' from paś- 'bind'.

<sup>4</sup> Otherwise Anusvāra, as in sam-rājantam. 5 While in external Sandhi it would be-

come Visarjanīya or a sibilant.

<sup>6</sup> External Sandhi gradually encroaches here in the later Samhitas, as in svah-pati-(SV.). On punah- for punar- in punah-sará-, ántas- for ántar- in ántas-patha-, and antahin antah-péya- see WACKERNAGEL 21, 126γ, note, and above 79, 2 a.

- e. As first member of a compound dyu-'heaven' appears as div- before vowels would in external Sandhi become yv), as d'v-isti- 'striving for heaven', div-it- 'going to heaven'.
- 2. Compounds in the Samhitās preserve many euphonic archaisms which, while still existing in external Sandhi, disappear from the sentence in later periods of the language though still partially surviving in compounds.
- a. A final consonant disappears before the same consonant when the latter is the initial of a group:  $up\acute{a}(s)$ -stha- 'lap',  $n\acute{a}(k)$ -kṣatra- 'star', hr(d)-dyotá- (AV.), an internal disease, hr(d)-dyótana (AV.) 'breaking the heart' 2.
- b. A final sibilant disappears before a mute followed by a sibilant, as in divá-ksa- 'heavenly' ('ruling over heaven', div-ás, gen.)3.
- c. A sibilant as initial of the second member is retained; thus scandra-'bright' in puru-scandrá- 'much-shining' and many other compounds, but almost invariably candrá- as an independent word 4.
- d. A final s in the first member or an initial s in the second is cerebralized; e. g. dus-tára- 'invincible', nis-tákvarī- (AV.) 'running away'. dus-svápnya- 'evil dream'.
- e. An original n in the second member is cerebralized after a rrs with the necessary phonetic restrictions (47) a. In derivatives from verbs compounded with prepositions containing r, initial, medial, or final n of the root is almost invariably cerebralized in the Samhitas; thus nir n/j- 'bright garment'. pari-hnuta- (AV.) 'denied' ( / hnu-), parī-ṇāh- 'enclosure', pary-ā-ṇaddha- (AV.) 'tied up', pra-nt- and pra-neti- 'leader', prá-nīti- 'guidance', prāná- 'breath', prānana- and prānatha- (VS.) 'respiration' (an- 'breathe'). The cerebralization appears even in suffixes, as pra-yana- 'advance'5.
- $\beta$ . In other compounds  $\mu$  greatly predominates when the second member is a verbal noun; e. g. grāma-nī- 'chief of a village', dur-gāni 'dangers'; nrpāṇa- 'giving drink to men', pitṛ-yāṇa- 'trodden by the fathers', pūr-yāṇa- (AV.) 'leading to the fort', rakso-hán-'demon-slaying', vṛtra-hán-'Vṛtra-slaying'. The cerebralization fluctuates in -yāvan: thus prātar-yāvan- 'going out early', vŕsa-pra-yzvan- 'going with stallions', but puro-yávan- 'going in front', śubhrayāvan- 'going in a radiant chariot'; also in purīsa-vāhaņa- (VS.) and purīsavåhana- (TS. K.) 'removing rubbish'. Cerebralization never takes place in -ghn-, the weak form of -han- 'killing'; nor in akṣā-náh- 'tied to the axle', kravya-váhana-6 'conveying corpses', carma-mná- 'tanner', yusmá-nīta- 'led by you'.
- y. The cerebralization takes place somewhat less regularly when the second member is an ordinary (non-verbal) noun; e. g. urū-ṇasá- 'broad-nosed', tri-navá- (VS.) 'consisting of three times nine parts', tri-nāman- (AV.)7 'having three names', dru-ghaná-'mallet', nr-mánas-'friendly to men', purh-nāman-'many-named', pūrvāhná- 'forenoon', prá-napūt- 'great-grandson'. There is

song'. The long vowel in án-āśīr-dā- 'not as go- 'cow' instead of gav- before vowels, fulfilling expectation, āśīr-dā- and āśīr-dāvā-'fulfilment of a benediction' is due to analogy, as  $\bar{a}$ -sis- is derived from the root  $s\bar{a}s$ -.

<sup>1</sup> dyu- remains before consonants: dyu-kṣá-, dyu-gá-t-, dyú-bhakta-.

<sup>&</sup>lt;sup>2</sup> Also in external Sandhi 'tá dyam (AV. IV. 19<sup>6</sup>) for tád dyấm.

<sup>3</sup> Also in external Sandhi ádha ksárantīr (Vvah-), prá-pīna- (VS.) 'distended'.

<sup>(</sup>VII. 34<sup>2</sup>), cp. above 78, 2 d.

4 Divergence from external Sandhi is sometimes not archaic but due to innovation; tri-, while the RV. always has n; as tri-

e.g. gi-agra-'headed by cows'; cp. WACKER-NAGEL 21, p. 129 e. Another kind of innovation in compounds is due to haplology; cp. Wackernagel I, 241 a  $\beta$ ; 21, p. 128 bottom.

<sup>5</sup> There are a few exceptions: pari-pana-'drink', pary-uhyámāna- 'being led home'

<sup>6</sup> Like havya vahana- 'conveying oblations'. 7 The later Samhitas always have n after

fluctuation when dus- 'ill' assumes the later Sandhi form of dur-, as dur-náman- 'having a bad name', dur-hann- 'having ugly jaws', but dur-niyántu-'hard to restrain' i; also in vārdhrā-nasá- (TS.) 'rhinoceros' and vārdhrī-nasá- (VS.) 'having streaks on the nose'; śri-maṇas- (TS.) and śri-maṇas- (VS.) 'well-disposed'.

But n often remains in this type of compound: initially in kṛpá-nīla-whose home is splendour', candrá-nirnij- 'having a brilliant garment', varṣá-nirnij- 'clothed with rain', tveṣá-nṛmṇa- 'of brilliant power', dīrghá-nītha-, N. of a man, pinar-nava- 'again renewed', babhri-nīkaśa- (VS.) 'looking brownish', vṛṣa-nābhi- 'having a mighty nave'; medially in ṛṣi-manas-² 'inspired', indrāgnt' 'Indra and Agni', kṣatra-váni- (AV.) 'addicted to military rule', 'bráhma-vani- (VS.) 'well disposed to the priesthood', cátur-anīka- 'four-faced', try-anīká- 'three-faced', jyɔtir-anīka-³ 'having a shining face', citrá-bhānu- 'having bright lustre', dhruvá-yoni- (VS.) 'having a fixed abode', pra-mánas- (AV.) 'careful', hári-manvu-sāyaka-4 (RV. x) 'stimulating the mettle of the bays'.

f. The final vowel of the first member is often lengthened. This frequently occurs before v-; e. g. anná-vrdh- 'prospering by food', pratī-vartá-(AV.) 'returning into itself', prā-vṛṣ-5 'rainy season'. It is often due to the rhythmical tendency (which also prevails in the sentence) to lengthen a vowel before a single consonant between two short syllables: e. g. ahī-ś/wa-, N. of a demon (from ahi-), urū-ņasú- 'broad-nosed', rtā-sáh- (VS.) 'maintaining the sacred law', pavī-nasá- (AV.) 'having a nose like a spearhead', naghā-risá-° (AV.) N. of a plant', rathā-sáh- 'able to draw the car'. Lengthening of a vowel between other than two short syllables is less common, being probably due to imitation of compounds in which the long vowel is produced by the normal rhythm; e.g. dhanvā-sáh-'skilled in archery' and vibhvā-sáh-'overcoming the rich' like rathā-sáh-; sahásrā-magha- 'having a thousand gifts' like śatámagha- 'having a hundred gifts'. The interchange of short and long is entirely regulated by the rhythmic principle in sanā- 'of old' and almost entirely in tuvi- 'much'; e. g. sanā-júr- 'long since aged' and sána-śruta- 'famous of old', tuvī-maghá- 'very rich' and tuvi-bādhá- 'killing many'?. The final vowel of prepositions is particularly often lengthened in the later Samhitas without reference to rhythm, especially before nouns ending in -a with long radical vowel, e. g. nī-víd- (AV.) 'liturgical invitation', abhī-moda-múd- (AV.) 'excessively joyful', nī-nāhá- (AV.) 'girth', pratī-bodhá- (AV.) 'vigilance', vī-barhá- (AV.) 'scattering'. Sometimes the final vowel is left unlengthened between two short syllables; e. g. rayi-páti- 'lord of wealth', ghrta-duh-as (voc. pl.) 'yielding ghee'8.

g. On the other hand, final  $\bar{a}$  and  $\bar{\tau}$  of the first member are often shortened before a group of consonants or a long syllable; e. g.  $am\bar{v}va$ - $c\acute{a}tana$ -(AV.) 'driving away disease' and  $am\bar{v}va$ - $h\acute{a}n$ - 'destroying disease' ( $\acute{a}m\bar{v}v\bar{a}$ -);  $\acute{a}rna$ -mradas- 'soft as wool' ( $\acute{a}rn\bar{a}$ -) and \* $\bar{u}rna$ - $v\bar{a}bhi$ - 'spinning wool', 'spider', in the patronymic  $aurnav\bar{a}bh\acute{a}$ -; kaksya- $pr\acute{a}$ - 'filling out the girth' (kaksya-);

nāká- 'third heaven', tri-nābhi- 'having three naves'.

The AV. here always has the cerebral, as dur-nihita- 'badly kept'.

<sup>&</sup>lt;sup>2</sup> But *ny-mánas-* 'friendly to men' and *ry'sa-manas-* 'manly-spirited'.

<sup>3</sup> But purv-anīka- 'having many faces'.

<sup>4</sup> But vy'sa-manyn- (RV. I) 'vigorous-minded'.

<sup>5</sup> Cp. WACKERNAGEL I, 42.

<sup>6</sup> Beside nagha-mārá- (AV.) N. of a plant.

<sup>7</sup> Cp. also  $pr\bar{a}$ -sdh- and pra-sdh- 'victorious'. The long vowel in the former is probably historic, = IE.  $pr\bar{a}$ .

<sup>8</sup> The vowel is originally long, in astā'eight', probably also in acchā- 'to' and
visvā- 'all', and may be differently explained in ā-deva- 'hostile to the gods',
ā-rupita- (IV. 57) meaning, and ā-sat-; see
WACKERNAGEL 2<sup>I</sup>, p. 131, note.

sena-j/t- (VS.) 'vanquishing armies' (sínā-); gáuri-vīti- N. of a seer (from gauri-), pṛthivi-ṣ/hā- 'standing on the earth'; even before a short syllable in pṛthivi-ṣád- (AV.) and pṛthivi-ṣád- (VS.) 'sitting on the earth' (pṛthivi-), sárasvati-kṛta- (VS.) 'made by Sarasvatī' I.

82. Extension of external to internal Sandhi. — The rules of sentence Sandhi as applied between members of a compound are often found to affect

the internal form of words.

a. Nominal (chiefly secondary) suffixes with initial consonants are frequently treated like the second member of a compound; e. g. beside duvas-yi- 'worshipping', appears duvo-yi-². This influence extends even to radical finals before primary suffixes; e. g. án-na- 'food' for ád-na-; ṣan-ṇám for ṣaṭ-nām, from ṣáṣ- 'six'; námo-bhis, from námas- 'obeisance', with o for ad (as in uṣád-bhis from uṣás- 'dawn')³; haviḥ-ṣu⁴ for haviṣ-ṣu, from havis-'oblation'; jigī-váṃs- for jigi-váṃs- 'having conquered', with radical final lengthened as in sentence Sandhi.

b. In the verb the influence of sentence Sandhi is seen in reduplicated forms. Thus parallel with the lengthening of final syllables in the sentence, the final radical vowel is made long before the ending -hi in didīh/ beside the more usual dīdih/, from dī- 'shine'. The rhythmical lengthening in the

reduplicated agrist is probably due to a similar influence.

# III. ACCENT.

ROTH, Nirukta LVII—LNXII: Ueber die Elemente des indischen Accentes nach den Prâtiçâkhja Sütren. — BENFEY, Vollständige Grammatik p. 9—13. — WHITNEY, 'On the nature and designation of the accent in Sanskrit', Transactions of the American Philological Association, 1869—70; Oriental and Linguistic Studies 2, 318ft; Sanskrit Grammar3, p. 28—33; see also General Index, s. v. 'Accent'. — HAUG, Ueber das Wesen und den Werth des wedischen Accents, München 1873 (cp. WEBER, Indische Streifen 3, 335 ff.; WHITNEY, JAOS. 10, IX ff., CIII f.). — WACKERNAGEL, Altindische Grammatik I. 243 ff. — Cp. also Hirt, Der indogermanische Akzen', Stressburg 1805. and Akzentstudien in IF. VI—IX; BRUGMANN, Kurze vergleichende Grammatik I. 2323-25; 1902), p. 52—66.

Besides the Prātišākhyas several other native authorities refer to the accent. Pāṇini and his commentators give an account of it; all the Sūtras of Pāṇini relating to accentuation are collected in a chapter of the Siddhānta-kaumudt called refer to the section on the Vedic accent. The accent is further dealt with in the Bhaşikasura, in the Pratijñāsūtra, in the Sikṣās, and as regards the position of the accent in individual

words, in the Unadisūtras and especially in the Phitsūtras.

83. General character of the Vedic accent. — In Vedic literature sacred texts only, primarily all the Samhitās 5 have been handed down in an accented form. Of all other sacred texts, only those to which a special importance was attached, have preserved the accent. These are the Taittirīya Brāhmaṇa (together with its Āraṇyaka) and the Śatapatha Brāhmaṇa (including the Brhadāraṇyaka Upaniṣad). There is, however, evidence to show that the Pañcaviṃśa Brāhmaṇa and other Brāhmaṇas were at one time accented?

TOn the relation of this shortening to the lengthening in the same position, and its probable explanation, see WACKERNAGEL 21, p. 135 (56 g).

<sup>&</sup>lt;sup>2</sup> Hence the Padapātha treats a nominal stem which takes a suffix with initial consonant like the first member of a compound, separating it from the suffix by Avagraha; e. g. dwwah5yúh for dwwyúh; adriswah for adriwah, voc., 'armed with a bolt'; ūtisbhih for ūtibhis 'with aids'.

<sup>3</sup> See above 44 a, 3.

<sup>4</sup> See 57, 1.

<sup>5</sup> The Mss. of the Kāṭhaka are so defective as regards accentuation that L. v. SCHROEDER found it possible to print parts only of his edition of the text (vol. I, 1900) with accents.

<sup>6</sup> WEBER, Indische Studien 10, 421; cp. MAX MÜLLER, ASL. 348; BURNELL, Sämavidhäna Brähmana p. vi. The Mantra parts of the AitareyaÄranyaka are accented (KEITH's ed. p. 10).

<sup>7</sup> The Suparṇādhyāya, an artificially archaic

The Sūtras, though not themselves accented, occasionally accent the Mantras which they quote.

The Vedic accent, like that of ancient Greece, was of an essentially musical nature. This is indicated by the fact that the accent exercises no influence on the rhythm of versification. The phoneticians of the Prāti-sākhyas, in describing it, speak only of its pitch, which is also indicated by the name of the chief tone, ud-ātta 'raised', 'high' '. But that the Vedic accent was accompanied by some stress 2, is shown by certain phonetic changes which cannot otherwise be explained 3.

In the Vedic accent three degrees of pitch may be distinguished: the high, properly represented by the  $ud\bar{a}tta$ , the middle by the svarita ('sounded'), and the low by the an- $ud\bar{a}tta$  ('not raised'). That the  $Ud\bar{a}tta$  originally denoted the highest pitch in the oldest form of the Vedic language, is shown by the evidence of Comparative Philology, and especially of Greek which, as far as its peculiar laws of accent will admit, has the acute on the same syllable as in the Vedic language has the  $Ud\bar{a}tta$  (e. g.  $\Delta tf \delta s$ : div ds; sapt d: sapt d; div d: sapt d: div d

The Svarita is a falling accent of a dependent nature, marking the transition from an accented to a toneless syllable. It regularly follows an Udātta, to the rise of which its fall corresponds in pitch. It assumes an independent appearance when the preceding Udatta is lost in consequence of the vowel that bears the Udatta being changed to a semivowel in Sandhi. It is described in Pāṇini 1. 2314 as a combination of Udātta and Anudātta, which means that it falls from the high pitch of the acute to the low pitch of unaccented syllables. According to the RV. Prātišākhya and the TS. Prātiśākhya, however, the first part of the Svarita sounds higher than the Udātta. This means that, instead of falling immediately from the high pitch of the preceding Udatta, it first rises somewhat before falling to low pitch 5. It would thus have something of the nature of a circumflex in the RV.; only the rise in pitch above the highest level of the Udatta is but slight (corresponding to the initial rise of the Udatta from Anudattatara to Anudatta level), while the fall corresponds to the total rise of the Udatta<sup>6</sup>. The low tone of the syllables preceding an accented syllable (with Udatta or Svarita) is called an-udātta 'not raised' in the Prātiśākhyas?. When it follows a Svarita it is called the pracaya (svara), or 'accumulated pitch' (as several such unaccented syllables often occur in succession) which continues at the low level reached by the preceding Svarita till the syllable immediately

poem composed in the style of the Vedic hymns, is also accented, but with many mistakes; see Grube's edition in Indische Studien, vol. XIV.

<sup>&</sup>lt;sup>1</sup> Cp. HAUG, op. cit. 19.

<sup>2</sup> The Vedic accent, like the Greek, was, after the beginning of our era, changed to a stress accent which, however, unlike the modern Greek stress accent, did not remain on the original syllable, but is regulated by the quantity of the last two or three syllables, much as in Latin; cp. HAUG 99, end.

<sup>3</sup> See WACKERNAGEL I, 218 and cp. OST-HOFF, Morphologische Untersuchungen 4, 73.

<sup>4</sup> In agreement with VPr. I. 126; APr. 1. 17; cp. HAUG 73.

<sup>5</sup> See Oldenberg, Prolegomena 483 f.

<sup>&</sup>lt;sup>6</sup> According to Pāṇini's account the Svarita does not rise above Udātta pitch before falling; see OLDENBERG, loc. cit.

<sup>7</sup> See RPr. 111. 1; cp. HAUG 91.

<sup>8</sup> HAUG 92 f.

preceding the next accent. The latter syllable, called sanna-tara 'lower' or anudātta-tara 2 'more lowered', sinks somewhat below this monotone.

- 84. Methods of marking the accent.—The accent is marked in the Vedic texts in four different ways.
- I. The system of the Rgveda is followed also by the Atharvaveda 3. the Taittirīya Samhitā (along with its Brāhmana) and, with only slight deviations in the treatment of the Svarita, by the Vajasanevi Samhita. This system is peculiar in not marking the principal accent at all. The explanation is doubtless to be found in the fact that the pitch of the Udatta is in the RV. intermediate between that of the other two tones. Hence the preceding Anudatta, as having low pitch, is marked by a horizontal stroke below the syllable, while the following Svarita, as rising to a higher pitch, is marked by a vertical stroke above the syllable ; e.g. श्राग्निन agnina = agnina. The presence of successive Udattas at the beginning of a hemistich is recognizable by the absence of all marks till the Svarita which follows the last of them, or the Anudatta which follows the last of them and precedes the next accented syllable; thus तावा यांतम tav a yatam = tav a yatam; tavet tat satyam = tavet tát satyám. On the other hand, all the unaccented syllables at the beginning of a hemistich are marked; e. g. বিজ্ঞানমে = vaiśrānaram = vaiśvānaram. But all the syllables following a Svarita remain unmarked till the one immediately preceding the next Udatta or Svarita; e. g. इमं में गड़े यमने सरस्वति मतंदि iman me gange yamune sarasvati śutudri = imám me gange yamune sarasvati ślitudri.
- a. The hemistich being treated as the unit with regard to accentuation 6, the marking of the Anudatta and of the Svarita is not limited to the word containing the Udatta which those accents precede and follow respectively?. Hence the final syllable of one word may be marked with an Anudatta as preceding an Udatta of the next initial syllable; or the initial syllable of one word may be marked with the Svarita following the Udatta at the end of the preceding word; e.g. पूर्विभिक्सिपिभिर् purvebhir ṛṣibhir; यज्ञमञ्ज्राम् yajñam adhvaram = yajñam adhvaram. But if an initial syllable after a final Udatta precedes an accented syllable, it loses the enclitic Svarita and must be marked as Anudātta; e.g. देवस्तिवर्जम devam rtvijam = devám rtvijam,
- b. If an independent Svarita<sup>8</sup> precedes an Udatta, it is marked with the numeral Q (1) when its vowel is short, and with 3 (3) when it is long, the figures receiving both the sign of the Svarita and that of the Anudatta9 which precedes an Udatta; e.g. ग्रास्त्र १ नतर् = apsv àntár; राया दे वनिः = rāyò 'vániḥ. The phenomenon is described by the phoneticians with the words kampa

\* See Oldenberg, Prolegomena 485, end.

Kāśikā vṛtti on Pāṇini 1. 210.

3 The Mss. of the AV., however, show considerable variations; see WHITNEY's

Udatta and the independent Svarita only are marked, the former by a vertical stroke above the accented syllable, the latter by a hook ( ) above the accented syllable; see SCHEFTELOWITZ, Die Apokryphen des Rgveda 48 ff.

5 Cp. HAUG, op. cit. 92 f.

7 In the Padapatha, on the other hand, <sup>2</sup> Sanna-tara, APr. 1. 43; anudatta-tara in each word receives its natural accent only, so that where the one text has a Svarita, the other may have an Anudatta; e.g. in 1. 13 the Samhitā has nayim asnavat, the Translation p. CXXI ff.

4 In the Kashmir Ms. of the RV. the unaccented has the Anudatta marked under each syllable).

8 Examples of independent Svarita are svàr for suar; kvà for kua; vīryam for vīriam. Independent' Svarita in the above rule is intended to include that which results from change to a semivowel (ksaipra), from contraction (praslista) and from elision of a

9 The long vowel before the 3 receives

<sup>6</sup> From the point of view of the sentence (abhinihita). accent the Pada is the unit; thus a verb or vocative is always accented at its beginning. the Anudatta stroke as well.

'quaver', vikampita, and the verb pra-kamp. In the TS it appears only when the second syllable as well as the first has the Svarita, and the figure 2, as well as I and 3, is here used.

- In the system of the Maitrayani Samhita and of the Kathaka the Udatta is marked by a vertical stroke above (which seems to indicate that this accent was here pronounced with the highest pitch); e. g. श्रापिना = agninā. The two Samhitās, however, diverge in their method of indicating the Svarita. The MS. marks the independent Svarita by a curve below the accented syllable, e. g. बरियम vīryàm; but the dependent Svarita by a horizontal stroke in the middle or three vertical strokes above the accented syllable. The Kāṭhaka, on the other hand, marks the independent Svarita by a curve below (if an unaccented syllable follows), e. g. वॉर्थ ब्रधाति vīryàm badhnāti; or by a hook below (if an accented syllable follows) e. g. वीर्य व्याचारे णार्थेण vyácaste; but the dependent Svarita by a dot below the accented syllable. Both these Samhitas mark the Anudattatara in the ordinary way by a stroke below the syllable. In L. v. Schroeder's editions, however, the Udatta and the independent Svarita only are marked. When the text of any of the Samhitās is transliterated in Roman characters, it is the regular practice to omit any indication of the dependent Svarita and of the Anudatta as unnecessary.
- 3. In the system of the Samaveda, the figures 1 2 3 are written above the accented syllables to represent three degrees of pitch. Here I always stands for the highest pitch (Udatta), and 3 always for the lowest (Anudatta), and 2 generally for the middle pitch (Svarita); e. g. barhişi = RV. barhişi (barhişi). But 2 also represents the Udatta when the latter is not followed by a Svarita (that is when the Udatta syllable is final in the hemistich or when an Anudattatara preceding another accented syllable follows); e.g. girā = RV. girā (girā); yajūānāňi hotā visveṣām = RV. yajñānām hotā visvesām (yajñānām hótā visvesām). If there are two successive Udattas, the second is not marked, but 2r is written over the following Svarita; e.g. dviso martyasya = RV. dviso martyasya (dvisó mártyasya). If in such case there is no room for zr, the first Udatta has zu written over it instead; e. g. esa sya pītaye = RV. esa sya pītaye (esá syá pītáye). The independent Svarita (as well as the dependent one which follows two successive

Udāttas) is marked with 2r; and the Anudātta which precedes it, with 3k; 3k 2r e. g. tanvā. Syllables which follow a Svarita and in which the pitch remains 3 1 unchanged, are left unmarked; e. g.  $d\bar{u}tan$   $vrn\bar{v}mahe$  hotāram = RV.  $d\bar{u}tan$ 

vṛṇīmahe hotāram (dūtám vṛṇīmahe hótāram)4.

4. Though the Brāhmaṇas do not come within the scope of this work, the system of accentuation in the Satapatha Brāhmaṇa cannot be passed over here, as it must be treated in connexion with the other systems of the Vedic period. It is historically important as forming a transition to the post-Vedic period, when the accent assumed a different character<sup>5</sup>. The system of the SB. in various respects differs considerably from the three described above.

<sup>&</sup>lt;sup>1</sup> See Haug 27-32; L. v. Schroeder, Introduction to his edition 1, p. XXIX—XXXIV; marking the Svarita, see HAUG 32-35. ZDMG. 33, 186ff.

<sup>&</sup>lt;sup>2</sup> Cp. L. v. Schroeder, Introduction to his edition, 2, p. X—XI.

<sup>3</sup> On some peculiarities of the VS. in

<sup>4</sup> For further details see HAUG 35-42. 5 Cp. Leumann, KZ. 31, 50 (mid.).

a. Its chief peculiarity is that it marks only the main accent, the Udatta. This is done by means of a horizontal stroke below the accented syllable: e. g. utu: piirusah. If there are two or more successive Udattas, only the last is marked; e. g. agnir hi vai dhūr atha = agnir hi vái dhūr átha. When, however, an Udatta is thrown back as the result of Sandhi, an immediately preceding Udatta is also marked; e. g. so 'gnim evabhīksamīnah = só 'gnim évābhīksamānah, where évābhī- stands for evābhī- evá abhī-. Two successive syllables are also sometimes marked when a compound receives a secondary Udatta; e. g. sprhayad-varnah, for sprhayád-varnah.

b. An independent Svarita is thrown back on the preceding syllable in the form of an Udātta; e. g. manusyeşu, that is, manusyesu for manusyesu. The Svarita resulting from change to a semivowel (kṣaipra), from contraction (prastista), or elision of a (abhinihita), is similarly treated; e.g. katham nv imam, that is, kathám nv imám for kathám nv ìmám; evaitad, that is, évaitád

from evá etád; te 'reantah, that is, té 'reantah sor té àreantah.

When, however, the prepositions d and prd, and final d in the first member of a compound, combine with an unaccented vowel, the contracted syllable retains the Udātta; e. g. thi  $(=\acute{a} ihi)$ ;  $pr\acute{a}ha$   $(=pr\acute{a} \bar{a}ha)$ ; citróti-(= citrá-ūti-) 'bestowing wondrous gifts'.

c. Before a pause an accented syllable may lose its Udatta or receive a reduced accent marked with three dots, if the initial syllable after the pause has an Udatta or independent Svarita; e. g. sa bhāgah samsthite, for sá bhāgáh sámsthite. The penultimate syllable may also be thus reduced; e.g. juhoti atha, for juhoti atha. This may occur even when the following

initial syllable is unaccented; e. g. nāpsu | apa, for nāpsu | apa.

d. Reduplicated forms or long compounds accented on the first syllable or prior member, sometimes receive a secondary accent near the end of the word; e. g. balbalīti, that is bálbalīti for bálbalīti; eka-catvārimsat, that is, éka-catvāriņsát for éka-catvāriņsat. Sometimes, in such case, the primary accent itself is lost; e. g. eka-saptatih beside éka-saptatih. Somewhat analogous to this double accentuation of compounds is the frequent accentuation of both verbal prefix and verb at the same time; e. g. abhi gopayéd (cp. 109). Finally, the accent occasionally appears on a syllable different from that on which it usually rests. The irregularities mentioned here (d) are much commoner in Books x-xiii than in the earlier Books; they are commonest of all in xiv.

85. Normal accentuation of words. — As a general rule, every Vedic word is both accented and has one main accent only. The Udatta is the only main accent in the original text of the Rgveda. It is generally found on the syllable which, according to the evidence of Comparative Philology<sup>2</sup>, bore it in the Indo-European period 3. Sometimes, however, the Udatta is secondary, being a substitute for the independent Svarita (itself the result of an original Udatta). Thus there is already a tendency in the RV. to change a final Svarita into a final Udatta: the vocative dyaus (= dlaus) 'O Heaven', appears as  $dy \dot{a}us$  (VIII.  $89^{12}$ );  $ary \dot{a}$  (= ar/a-) 'kind', occurring only once (I. I23<sup>1</sup>), otherwise and very frequently appears as aryá-; thus, too, śván- 'dog', was probably at one time śvān- for śμαn- (Gk. κύων), which would explain the

<sup>&</sup>lt;sup>2</sup> Cp. Brugmann. KG. 45, 1.

<sup>3</sup> Under the influence of analogy the

r For further details, see HAUG, 43–48; Vedic Udātta shifted, in a few instances, to Leumann, Die accentuation des Çatapatha- other syllables in the Brāhmaṇas and in Brāhmaṇa, KZ. 31, 22–51; cp. also Wacker- NAGEL I, 252; Bhāṣikavṛtti, ed. by KIEL- HORN IS. 10, 397 ff.

C. Branch M. C. 12, 3, 424; 3, AV. gáhvara- 'deep', C. gahvará-.

abnormal accentuation s'imas etc. instead of the regular accentuation \*s'unás etc. prevailing in monosyllabic stems (93). Or the final Svarita is thrown back as an Udātta on the preceding syllable: thus mitrya-'friendly', beside mitryà-'.

In some Vedic words, however, the only accent which is written is the 'independent' Svarita, by the native phoneticians called the 'genuine' (jātya)² or also the 'invariable' (nitya). Always following a y or v, it is, however, just as much due to a preceding Udātta (lost by the change of i and i to y and v), as the dependent Svarita is; e. g. kvà (= kúà) 'where?'; svàr (= súàr, TS. sívar) 'light'; rathyàm (= rathiàm, from rathi- 'charioteer'); tanvàm (= tanuàm from tani-body'); ok-yà- (= ok-là-) 'belonging to home'; vasav-yà- (= vasav-là-) 'wealthy'. In reading the RV. the original vowel with its Udātta must be restored except in a very few late passages³.

a. Double accent. Contrary to the general rule that a word has a single accent only, a certain class of infinitives and a special type of compounds have a double accent. The infinitives in -tavai, of which more than a dozen examples occur, accent both the first and the last syllable; e. g. &-tavai 'to go', ápa-bhartavái 'to take away'. The Udātta on the final syllable is probably to be explained as a secondary accent like that of the SB. in intensives and compounds (bálbaliti, éka-catvārimśút, cp. 84, 4 d), where an accent at the beginning of a word is counterbalanced by another at the end.

A good many compounds of a syntactical type, in which both members are duals in form or in which the first member is nearly always a genitive in form, accent both members; e. g. mitrá-várunā 'Mitra and Varuna', bṛhas-páti-'Lord of prayer'5.

b. Lack of accent. Contrary to the general rule that every word is accented, some words never have an accent, while others lose their accent under special conditions.

I. The following are invariably enclitic:

- a. pronouns: tva- 'another'; sama- 'some'; ena- 'he', 'she''; me, D. G., 'of or to me';  $m\bar{a}$ , A., 'me'; nau, du. A. D. G., 'us two', etc.; nas, A. D. G., 'us', etc.; te, D. G., 'of or to thee';  $tv\bar{a}$ , A., 'thee';  $v\bar{a}m$ , A. D. G., 'ye two', etc.; vas, A. D. G., 'you', etc.; tm, tm 'him', 'her', 'it', 'them', etc.; tm 'some one' in na-tm 'no one'; tm in tm 'from', tm 'from', tm 'never'.
- $\beta$ . particles: ca 'and'; u 'on the other hand';  $v\bar{a}$  'or'; iva 'like', 'as it were'; kam 'indeed' (after ni, si, hi); gha, ha 'just' (emphasizing); cia 'at all'; bhala 'indeed'; sama-ha 'somehow'; sma 'just', 'indeed' (almost invariably with the present tense); svid 'probably'.
- 2. The following classes of forms or individual words are subject to loss of accent according to their position or function in the sentence:
  - a. vocatives, unless beginning the sentence or Pada.
- β. finite verbs, in principal clauses, unless beginning the sentence or Pāda.
- γ. all oblique cases formed from the demonstrative pronoun α-, when used merely to replace a preceding substantive, and not occurring at the beginning of a sentence or Pāda; e. g. asya jánimāni 'his (i. e. Agni's) births' (but asyá uṣásaḥ 'of that Dawn').

Top. the accentuation of the SB., 84, 4 b. In Pāṇini's system of accentuation this tendency went still further; thus V. vīryā-(= vīria-), becomes in C. vīrya-; and the gerundive in -tavyā (= -tavia) appears in C. as -tāvya also.

<sup>&</sup>lt;sup>2</sup> RPr. III. 4, VPr. I. III f.; cp. HAUG 75. Indo-arische Philologie. I. 4.

<sup>3</sup> Cp. Benfey, Gött. Abhandlungen 27, 31 ff.

<sup>4</sup> In the Brāhmaṇas also the particle vắvá-5 See below, on the accentuation of compounds, 91.

<sup>6</sup> The A. sing. f. occurs once (VIII. 619) accented at the beginning of a Pada as enam.

8. yáthā 'as', when used in the sense of iva 'like', 'as it were', at the

end of a Pāda; e. g. tāyávo yathā (1. 502) 'like thieves'.

 $\varepsilon$ .  $n\dot{a}$  'not', when followed by  $h\dot{l}$  'for', the two particles being treated as one word; e.g.  $nah\dot{l}$   $tv\bar{a}$  ...  $invata\dot{l}$  (I. 108) 'for the two do not restrain thee'; similarly when combined with the particle  $n\dot{u}$  'now':  $na-n\dot{u}$  'certainly not'.

### I. Accentuation of Nominal Stems.

86. A. In primary derivation no general law for the accentuation of nominal suffixes can be stated; but there is a tendency, when -a, -ana, -as, -an, -man are added, to accent the root in action nouns, and the suffix in agent nouns; and in nouns formed with -as and -man difference of gender is to some extent accompanied by difference of accent.

r. Root stems when reduplicated or compounded with prepositions as a rule retain the accent on the radical syllable; e. g. juhů-'tongue' and 'ladle', yavī-y'dh-'eager to fight'; pra-nent-'guiding constantly'. In stems formed with intensive reduplication, however, the reduplicative syllable is sometimes accented; thus júgū-'singing aloud', vúnīvan-'desiring', dáridra-(VS.) 'roving'. The prefix is accented in áva-sū-'deliverance', úpa-stu-t-'in-

vocation', pári-jri- 'running round'2.

2. When the suffix -a is added, the root is accented in action nouns, but the suffix in agent nouns; e. g. véd-a- 'knowledge', śiśnáth-a- 'perforation'; but cod-á- 'instigator', cacar-á- 'moveable' 3. When there is a verbal prefix, the final syllable is as a rule accented; e. g. sam-gam-á- m. 'coming together'. In a few of these compounds, however, the root is accented, as ut-pāt-a- (AV.) 'portent', ā-śréṣ-a- (AV.) 'plague'; and in some others (mostly agent nouns) the prefix: á-bhag-a- 'sharing', práti-veś-a- 'neighbour', vy-òṣ-a- (AV.) 'burning', sám-kāś-a- (AV.) 'appearance'.

3. The suffix -ata is always accented on the final syllable; e. g. dars-

atá- 'visible', pac-atá- 'cooked', yaj-atá- 'to be adored'.

4. Of the participial suffixes -at and -ant the former is never accented when the sense is verbal; e. g. dád-at- 'giving', dás-at- 'worshipping'. A few old participles, however, which have become substantives, have shifted the accent to the suffix: vah-át- 'stream', vegh-át- (AV. VS.) 'barren cow', vāgh-át- 'sacrificer', srav-át- 'stream', saśc-át- 'pursuer'. The suffix -ant is accented in the present participle of the second (450) and sixth (429) classes and of the denominative (562), e. g. ad-ánt-, tud-ánt-, aghāy-ánt-; in the future (537), e. g. dāsy-ánt- (AV.); in the root aorist, e. g. bhid-ánt- and sometimes in the a-aorist, e. g. vrdh-ánt-; also in the old present participles which have become adjectives, rh-ánt- 'weak', bṛh-ánt- 'great', and (with lengthened vowel) mah-ánt- 'great'.

5. The suffix -an is generally accented; e. g. ukṣ-án- m. 'bull', ud-án- n. 'water'. The radical syllable is, however, not infrequently accented; e. g.

rāj-an- m. 'king', ūdh-an- n. 'udder'.

6. Stems formed with -ana predominantly accent the root; e. g. kár-anan. 'act', cód-ana- (AV.) 'impelling'. The final syllable is, however, accented fairly often; e. g. kar-aná- 'active', kroś-aná- 'yelling', kṣay-aná- (VS.) 'habitable', tvar-aná- (AV.) 'hastening', roc-aná- 'shining' (AV.), n. 'light', svap-aná- (VS.) 'sleepy'. The penultimate is also accented in several words: the substantives

The ŚB., however, accents both particles; Cp. Whitney 1147 g. Cp. Leumann, KZ. 31, 22. Cp. Whitney 1148; Lindner p. 34.

kir-ána- m. 'dust', krp-ána- n. 'misery' (but krp-aná- 'miserable' AV.), dams-ána- n. 'great deed', vrj-ána- n. 'enclosure', res-ána- n. 'service'; and the adjectives tur-ána- 'hastening', doh-ána- 'milking', bhand-ána- (VS. TS.) 'rejoicing', man-ána- 'considerate', mand-ána- 'joyful', saks-ána- 'overcoming'. When the stem is compounded with a verbal prefix, the root is nearly always accented; e. g. sam-gámana- 'gathering together'; but the final syllable is accented in vi-cakṣaṇā- 'conspicuous', upari-śayanā- (AV.) 'couch'.

7. The suffix -anā, whether forming the feminine of adjectives in -ana or f. action nouns, is always accented either on the penultimate or the final syllable; e. g. tur-ánā- 'speeding', spand-anā- (AV.) 'kicking'; arh-ánā- 'inerit', jar-anā- 'old age'. The word pṛt-anā- 'fight' is irregularly accented on the radical syllable.

8. The suffix -ani is always accented, either on the final or the penultimate syllable; e. g. dyot-ani- 'brilliance'; as-áni- 'missile'.

9. The suffix -anī being the feminine form of action and agent nouns in -ana, is similarly accented; e. g. péś-anī- (AV.) 'beautiful' (péś-ana-). The accent is, however, sometimes shifted to the final syllable; e. g. tap-anī- 'heat' (táp-ana-).

10. Stems formed with the suffix -as accent the root if they are action nouns, but the suffix if they are agent nouns; e. g. áp-as-n. 'work', but ap-ás-'active'. There are also some masc. substantives with the accent on the suffix; e. g. rakṣ-ás- m. beside rákṣ-as- n. 'demon'.

II. The suffix -ā, forming action nouns from roots and secondary conjugation stems, is invariably accented; e. g. nind-ά- (AV.) 'blame'; jigīṣ-ά- 'desire to win'; gamay-ά- (AV.) 'causing to go'; aśvay-ά- 'desire for horses'.

12. The suffix  $-\bar{a}na$ , forming middle participles, is normally accented on the final syllable; e. g. ad- $\bar{a}na$ -'eating'. Reduplicated stems, however, regularly accent the first syllable; e. g. ddd- $\bar{a}na$ -'giving',  $j\delta huv$ - $\bar{a}na$ -'invoking'. A few others accent the root; e. g. clt- $\bar{a}na$ - (AV¹.) 'shining', dydt- $\bar{a}na$ - (RV¹.) 'beaming' (beside the usual dyut- $\bar{a}na$ -)². There are also a few adjectives and substantives ending in  $-\bar{a}na$  in which the primary character of the suffix or the derivation of the word is doubtful. These also accent the first syllable; e. g.  $v\dot{a}sav$ - $\bar{a}na$ -'possessing wealth',  $p\dot{a}r\dot{s}$ - $\bar{a}na$ - m. 'abyss'3.

13. No general rule can be stated regarding the suffix -i, either the suffix or the root being accented with about equal frequency; e.g. āj-i-'race', grāh-i-'seizure'. Action nouns used as infinitives, however, regularly accent the suffix; e.g. drś-dye 'to see'. Reduplicated derivatives tend to accent the initial syllable; e.g. cákr-i-'active'; while stems compounded with a preposition usually accent the final syllable; e.g. parā-dad-i- 'delivering over'.

14. Stems formed with the superlative suffix -istha regularly accent the root; e. g. yáj-istha- 'sacrificing best'. The only exceptions are jyesthá- when meaning 'eldest' (but jyéstha- 'greatest') and kan-isthá- 'youngest' (but kán-istha- 'smallest', TS. B). When the stem is compounded with a preposition the latter is accented; e. g. á-gam-istha- 'coming best'.

15. The suffix -is is nearly always accented; e. g. arc-is- 'flame'. The exceptions are ám-is- 'raw flesh', jyút-is- 'light', and vyáth-is- 'course'(?).

16. The few action and agent nouns formed with the suffix -r, are accented either on the root or the suffix; e. g. deh-i- 'rampart', śdc-i- 'power'.

<sup>2</sup> See LINDNER p. 54, top.

If jánghā- 'leg' is formed with this 3 See below, Nominal stem formation, suffix, it is the only exception. under -āna- (130).

- 17. Stems formed with the comparative suffix  $-\bar{\imath}y\bar{a}ms$  invariably accent the root; e. g.  $j\dot{a}v-\bar{\imath}y\bar{a}ms$  'swifter'. When the stem is compounded with a preposition the latter is accented; e. g.  $pr\acute{a}ti-cyav-\bar{\imath}y\bar{a}ms$  'pressing closer against'.
- 18. The suffix -u is usually accented; e. g. ur-ú- 'wide', pād-i/- m. 'foot'. The radical syllable is, however, not infrequently accented; e.g. tάk-u- 'speeding', άs-u- m. 'life'. The suffix is regularly accented in adjectives formed from desiderative, causative, and denominative stems; e.g. dips-i/- 'wishing to harm', bhāvay-ú- 'cherishing', aghāy-ú- 'malignant'.
- rg. Substantives formed with the suffix -us regularly accent the root (excepting jan-ús- 'birth'); e. g. dhán-us- 'bow'. But a few adjectives which are never used as substantives accent the suffix; e. g. jay-ús- 'victorious', but táp-us- both 'hot' and 'heat'.
- 20. The suffix  $-\bar{u}$  forming independent feminine substantives is regularly accented; as  $cam \hat{u}$  'dish',  $vadh \hat{u}$  'bride'.
- 21. When the suffix -ta forms past passive participles it is invariably accented; e. g. jā-tá- 'born', rakṣ-i-tá- 'protected'. But a few ordinary nouns formed with this suffix accent the radical syllable: ¿-ta- 'variegated'; m.: gár-ta- 'car-seat', már-ta- 'mortal', vá-ta- 'wind', hás-ta- 'hand'; n.: ás-ta- 'home', nák-ta- 'night'.
- 22. Stems formed with the suffix -tar generally accent the root when the meaning is participial, but the suffix when it is purely nominal; e. g.  $d\bar{\alpha}$ -tar-'giving' (with acc.), but  $d\bar{\alpha}$ -tar-'giver'.
- 23. Stems formed with the suffix -ti accent the root more frequently than the suffix; e. g.  $i_{\bar{s}}$ -ti- 'offering',  $k_{\bar{s}}$ -ti- (AV.) 'destruction',  $dh\dot{a}$ -ti- m. 'shaker', but  $i_{\bar{s}}$ -ti- 'desire',  $k_{\bar{s}}$ -ti- 'abode',  $j\bar{n}\bar{a}$ -ti- m. 'relative',  $r\bar{a}$ -ti- 'gift'. Reduplicated derivatives seem to have accented either the first syllable or the suffix; e. g.  $d\dot{t}dhi$ -ti- 'devotion' and carkr-ti- 'fame'. When these stems are compounded with prepositions, the latter are nearly always accented; e. g.  $\dot{a}$ -hu-ti- 'offering'; the only exceptions are  $\bar{a}$ -sak-ti- 'pursuit',  $\bar{a}$ -su-ti- 'brew' and 'enlivening', and abhi-s-ti- m. 'helper' beside abhi-s-ti- f. 'help'.
- 24. Derivatives formed with the suffix -tu, with some half dozen exceptions, accent the root (invariably when they are used as infinitives); e. g. tán-tu- 'thread', but ak-tú- 'ray'.
- 25. The suffix -tnu is always accented; e. g. ha-tnú-'deadly', jigha-tnú-'harming'.
- 26. Derivatives formed with the suffix -tra generally accent the root; e. g. mán-tra- 'prayer', but kṣa-trá- 'dominion'.
- 27. Gerundives formed with the suffix -tva regularly accent the root; e. g. kár-tva- 'to be made', vák-tva- 'to be said', bháv-i-tva- 'future'.
- 28. Derivatives formed with the suffix -tha generally accent the latter; e. g. uk-thά- n. 'saying'. Sometimes, however, the root is accented; e. g. άr-tha- 'goal'. When the suffix is added with the connecting vowel -α-, the latter is generally accented; e. g. uc-ά-thα- n. 'praise'.
- 29. The suffix -na when forming past passive participles is invariably accented; e. g. bhin-ná- 'split'. When forming ordinary nouns, whether adjectives or masc. substantives, it is usually accented; e. g. r-ná- 'guilty', ghr-ná- m. 'heat'; but a few masculines accent the root, as kár-na- 'ear', vár-na- 'colour', sváp-na- 'sleep'. Neuters (except śu-ná- 'welfare') and feminines (-nā) accent the root; e. g. án-na-¹ 'food', tŕ-na- 'grass', tŕs-nā- 'thirst'.

30. Derivatives formed with -ni accent either the root or the suffix; e. g. yô-ni- m. 'receptacle', but ag-ni- m. 'fire'.

31. The suffix -nu is almost invariably accented; e. g. vag-nu- 'sound'.

An exception is vis-nu-1, N. of god.

- 32. Derivatives formed with the suffix -ma accent the suffix more than twice as often as the root; e. g. tig- $m\acute{a}$  'sharp', ghar- $m\acute{a}$  'heat',  $dh\bar{u}$ - $m\acute{a}$  'smoke', but  $\acute{u}$ -ma- 'friend',  $s\acute{o}$ -ma- 'Soma'.
- 33. Derivatives formed with -man regularly accent the root in neuter substantives; e. g. kár-man- 'action', ján-man- 'birth', ná-man- 'name'. There are, however, several masculine agent nouns which accent the suffix; e. g. dar-mán- 'breaker'. In several instances the accent varies in the same word according to the gender and meaning; e. g. bráh-man- n. 'prayer', brah-mán-m. 'one who prays'; sád-man- n. 'seat', sad-mán- m. 'sitter'. These stems when compounded with prepositions nearly always accent the latter; e.g. prá-bharman-n. 'presentation'.
- 34. The participial suffix  $-m\bar{a}na$  is never accented except in the anomalous perfect participle  $sasr-m\bar{a}n\dot{a}$  (RV'.) =  $sasr-\bar{a}n\dot{a}$  'speeding'. The accent of these derivatives is regularly on the same syllable as in the tensestem to which the suffix is added; e. g.  $y\dot{i}ja-m\bar{a}na$  'sacrificing',  $icch\dot{a}-m\bar{a}na$  'desiring',  $idhy\dot{a}-m\bar{a}na$  'being kindled',  $yaksy\dot{a}-m\bar{a}na$  'about to sacrifice'.

35. Gerundives formed with the suffix -ya invariably accent the root;

e. g. háv-yα- 'to be invoked'.

36. The suffix -ra is usually accented; e.g. ak-rú- m. 'banner', rud-rú-, m. N. of a god, abh-rú- n. 'cloud'. The root is, however, accented in a good many words; e.g. gŕdh-ra- 'greedy', új-ra- m. 'field', 'nd-ra-, N. of a god, ág-ra- n. 'point'.

37. Derivatives formed with the suffix -ri accent the root oftener than

the suffix; e. g. bhū-ri- 'abundant', but also sū-ri- m. 'patron'.

38. Derivatives formed with the suffix -va accent the suffix rather

oftener than the root; e. g. rk-vá- 'praising', but also fbh-va- 'skilful'.

39. The root is regularly accented in derivatives formed with the suffix -van; e. g. kɨ-t-van- 'active', pát-van- 'flying', yáj-van- 'sacrificing'. This is the case even when the stem is compounded with a preposition; e. g. vi-mɨg-van-(AV.) 'cleansing'.

40. The suffixes -vana, -vanu, -vani are always accented, the first two on the final, the last on the initial syllable; e. g. vag-vaná- 'talkative',

vag-vanú- m. 'noise', bhur-váni- 'restless'.

- 41. Derivatives formed with the suffix -vara chiefly accent the final syllable when they are masc. nouns, but the root when they are neuter substantives; e. g. i-t-vará- 'going', Is-vará- (AV.) 'able', but kár-vara- n. 'deed', gáh-vara- (AV.) n. 'thicket'. The suffix appears with I instead of r in the adjective vid-valá- 'cunning'.
- 42. The suffix -vāms of the perfect participle is always accented, even in the reduced form -us appearing in the weak cases; e. g. cakṛ-váms- and cakṛ-ús- 'having made'.
- 43. Derivatives formed with the suffix -vi from the simple root accent the radical syllable, but the first syllable of the reduplicated root; thus ghis-vi- 'lively', but jägg-vi- 'watchful'.

I This word may, however, be differently derived; possibly vi-sun- 'der in die Weite strebende', according to Uhlenbeck, Kurz-gefasstes etymologisches Wörterbuch der land der land between der land between 1898; cp. Bloomfield, AJPh. 17, 427 f., 'crossing the back (of the world)'.

44. Derivatives formed with the suffix -sa sometimes accent the root sometimes the suffix; e. g. g/t-sa- 'adroit', //t-sa- m. 'fountain', but prk-sá- 'dappled', g/hray-sá- m. 'sun's heat'.

45. The suffix -snu is always accented; e. g. ji-ṣnu- 'victorious', vṛdh-a-snu- 'joyful', car-i-ṣnu- 'wandering', ni-ṣat-snu- 'sitting down', tāpay-i-ṣnu-

'tormenting', abhi-socay-i-snil- (AV.) 'causing torments'.

- B. In secondary derivation five groups of stems may be distinguished with regard to accentuation: a. those which accent the suffix, being formed with  $-\bar{a}yan\dot{\alpha}$ ,  $-\dot{\alpha}y\bar{c}$ ,  $-\dot{\alpha}yya$ , -in, -iya, -ina, -iya, -eni, -eni, -enya,  $-t\dot{\alpha}$ ,  $-tav-y\dot{\alpha}$ ,  $-tv\dot{\alpha}$ , -t
- r. Stems formed with the suffix -a and Vrddhi of the first syllable from primitive stems ending in -a are predominantly accented on the final syllable. This is, however, mostly the case when the primitive is accented on any syllable other than the last; e. g. āmitrá- 'hostile' from amitra- 'foe', nārāśaṃsá- 'belonging to Nárā-śáṃsa', śaucadrathá-, patronymic from śucád-ratha- 'having a shining car', pāvamāná- 'relating to the clear-flowing (pávamāna-) Soma'. In several instances, however, the primitive stem is also oxytone, e. g. kauśiká- 'belonging to Kuśiká'. On the other hand, stems formed with Vrddhi sometimes accent the first syllable, when the primitive is otherwise accented; e. g. mādhyaṇdina- 'belonging to midday' (madhyáṇ-dina-), sáubhaga-n. 'luck' from su-bhága- 'lucky', vādhryaśva- 'descendant of Vadhryaśvá'. The derivative dáivodāsa- 'belonging to Divodāsa' is, however, formed from a stem similarly accented (divo-dāsa-).

A similar rule prevails in the accentuation of stems derived from other primitives by means of the suffix -a and Vrddhi of the first syllable; e. g. \( \alpha yas-\delta-\) 'made of metal' (\( \delta yas-\)), \( saumanas-\delta-\) 'benevolence' from \( su-m\dnas-\) 'well-disposed'; also sometimes from stems similarly accented, as \( paidv-\delta-\) 'belonging to Pedú'. On the other hand, the first syllable is accented in derivatives from primitives mostly accented on the last; e. g. \( p\darthiva-\) 'earthy' from \( prthiv\darthiva-\) 'earth', \( m\delta fhona-\) 'belonging to the bountiful one' \( (magh\dnashavan-); \) but sometimes also from stems similarly accented, as \( n\darthiva-\) 'neighbouring' from \( n\darhhus-\) 'neighbour'. The accentuation is similar when the secondary \( -a \) is added without Vrddhi; e. g. \( parus-\darha-\) 'knotty' from \( p\darharus-\) 'knot', but \( h\darharlar-\) 'fallow' from \( harlt-\).

- 2. The suffix  $-\bar{a}$  forming feminines to masculines in -a retains the accent on the same syllable as in the masculine; e.g.  $priy\hat{a}$  beside  $priy\hat{a}$  'dear'.
- 3. Stems formed with the somewhat rare suffix  $-\bar{a}n\bar{n}$  accent one of the last three syllables; e. g.  $indr\bar{a}n\bar{i}$  'wife of Índra',  $mudgal\hat{a}n\bar{i}$  'wife of Múdgala',  $puruk\hat{u}ts\bar{a}n\bar{i}$  'wife of Purukútsa',  $us\bar{i}ndr\bar{a}n\bar{i}$  'queen of the Usīnaras'.
- 4. The only example of the patronymic suffix  $-\bar{a}yana$  in the RV.  $k\bar{a}nv-\bar{a}yana$  'descendant of Kanva' is unaccented (occurring in the voc. only); the final syllable seems to have been accented judging by  $d\bar{a}k\bar{y}-\bar{a}yana$ -

- (VS. AV.) 'son of Dakṣa', and the fem.  $r\bar{a}m\bar{a}yani$  (AV.) 'daughter of the Black one'. The derivative ukṣanyayana-, N. of a man, is unique both in accentuation and absence of Vrddhi.
- 5. The suffix  $-\bar{a}y\bar{\imath}$  occurs accented on the first syllable only in  $agn-\bar{a}y\bar{\imath}$  'wife of Agni';  $vr_s\bar{a}kap-\bar{a}y\bar{\imath}$  (RV'.) 'wife of Vrsákapi', occurring in the voc. only, is unaccented.
- 6. The suffix -āyya- forming gerundival adjectives is always accented on its first syllable; e. g. pan-āyya- 'to be admired'.
- 7. Derivatives formed with the suffix -i and Vrddhi, being almost exclusively patronymics, always accent the first syllable; thus ágnives-i- 'son of Agnivesa', páurukuts-i- 'descendant of Purukútsa', prátardan-i- 'descendant of Pratardana', práhrād-i- (AV.) 'son of Prahrāda', sámvaran-i- 'descendant of Samvárana'. Similarly formed and accented is sárath-i- 'charioteer' (from sa-rátha-m' on the same chariot'). Two other words, formed without Vrddhi, take the secondary -i: tápuṣ-i- 'burning' (tápus- 'heat') and, accented on the final syllable, śucant-!-, N. of a man.
- 8. The very frequent suffix -in forming possessive adjectives is always accented; e. g. asv-in- 'possessing horses', dhan-in- 'wealthy'; manīṣ-in- 'wise'; abhimāt-in- 'insidious'. The adjective śāk-in- 'powerful' occurs once accented on the first syllable: śāk- $\bar{\iota}$  (I.  $51^8$ ); the accentuation of this form and of the two nominatives (each occurring once)  $ir-\bar{\iota}$  'violent' and  $sár-\bar{\iota}$  'speeding' is perhaps due to error.
- 9. The accentuation of the suffix -ima, which is attached to three stems in -tra- and to one in -ra, varies: khanltr-ima- 'made by digging', krtr-/ma- 'artificial', pūtr-/ma- (AV.) 'purified'; agr-imá- 'foremost'.
- ro. The suffix -iya is regularly accented either on its first or its second syllable; e. g. abhr-iya- and abhr-iyá- 'derived from the clouds' (abhrá-), kṣatr-/ya- 'having authority' (kṣatrá-), amitr-/ya- 'inimical' (amitra- 'foe'); agr-iyá- 'foremost', indr-iyá- 'belonging to Indra'. The only exceptions are /tv-iya-(AV.) 'being in season' (rtú-), beside rtv-/ya-, and śr/tr-iya- (AV.) 'learned' (śrótra- 'learning').
- syllable as the corresponding masculines (except oxytones); e. g. bhávant-ī-'being', m. bhávant-. But the feminine in -ī from masculines in -a that are not accented on the final syllable usually accents the -ī (and follows the radical ī- declension); e. g. rath-ī-'charioteer' (m. f.) from rátha-'chariot'. The -ī is also accented when it forms the fem. of masc. oxytones in -u, e. g. pṛthv-ī-'broad' (pṛth-ū-); in -ant, e. g. uśat-ī-'desiring' (uś-ánt-); in -tár, e. g. avitr-ī-'protectress' (avi-tár-); in -anc taking Samprasāraṇa, e. g. pratīc-ī-'facing' (praty-áñc-). The fem. in -ī from masc. oxytones in -a sometimes retains the accent on the suffix, e. g. devī-'goddess' (devā-'god'), but more usually throws it back on the first syllable, e. g. áruṣ-ī- 'ruddy' (aruṣ-i-).
- 12. The suffix -ina is generally accented on its first syllable, rarely on its last; e. g. apāc-ina- 'western', samvatsar-ina- 'annual'; pratīc-īná- 'turned towards'. The suffix is unaccented only in māk-īna- (RV<sup>I</sup>.) 'mine'.
- 13. The suffix -īya is always accented on its first syllable; e. g. ārjīk-iya- a kind of Soma vessel, āhavan-iya- (AV.) 'sacrificial fire', grhamedh-iya-'relating to the domestic sacrifice', parvat-iya- (AV.) 'mountainous'. Similarly in the ordinals dvit-iya- 'second', trt-iya- 'third', tur-iya- 'fourth'.
- 14. The suffix -ena is accented on the final in its only occurrence in the feminine form  $s\bar{a}midh$ -enz-'relating to fuel' (samidh-).
  - 15. The suffix -enya, nearly always forming gerundives, regularly accents

its first syllable; e. g. drś-énya- 'worthy to be seen'. The only exception is vár-enya- 'desirable'. Similarly accented are the ordinary adjectives vīr-énya-

'manly' (vīrá-) and kīrt-énya- 'famous' (kīrtí- 'fame').

r6. Derivatives formed with the suffix -eya and Vrddhi accent the final syllable when they have a patronymic sense, but otherwise the first; e. g. ars-eyá- 'descendant of a seer' (rṣi-), but páurus-eya- 'relating to man' (púrusa-). The analogy of the gerundive from roots ending in -7, which is formed with -eya (e. g. d½ya- 'to be given'), is followed by didrks-éya- 'worth seeing' (didrksā-) and sabh-éya- 'fit for an assembly' (sabhā-).

17. Derivatives formed with -ka are variously accented. Those which have a diminutive sense regularly accent the suffix; e. g. arbha-ká- 'small', kanīna-ká- 'youth', kumāra-ká- 'little boy'. Otherwise the accent sometimes remains on the same syllable as in the primitive; e. g. ánta-ka- 'making an end' (ánta-), yuṣmá-ka- 'your' (yuṣmá-); or it shifts to the suffix, e. g. anya-ká- 'other' (anyá-), sana-ká- 'old' (sána-); or to the first syllable, e. g. rúpa-ka- (AV.) 'having an assumed form' (rūpá- 'form').

18. The rare suffix -ta is regularly accented: eka-ti- (VS.) 'First', dvi-ti'Second', tri-ti- 'Third' as Proper Names, ava-ti- 'well', muhūr-ti- 'moment'.

19. Derivatives formed with the suffix -tana or its syncopated form -tna are variously accented: nú-tana- and nú-tna- 'present', sanā-túna- (AV.) and sanά-tna- (AV.) 'lasting', pra-tná- 'ancient'.

20. The suffix -tama when forming superlatives is hardly ever accented?, the primitive nearly always retaining its original accent; e. g. tavás-tama-3 'very strong'. But when it forms ordinals the final syllable is accented; e. g. sata-tamá- 'hundredth'.

21. A few adjectives formed with -taya from numerals meaning 'consisting of so many parts', accent the primitive: cátuṣ-ṭaya- (AV.) 'fourfold', dáśa-taya-'tenfold'.

22. The suffix -tara forming comparatives is hardly ever accented, the primitive retaining its original accent; e. g. rathi-tara- 'better car-fighter'. An exception is vrtra-tara- 'a worse Vrtra'.

23. Derivatives formed with  $-t\bar{\alpha}$  regularly accentuate the syllable preceding the suffix; e. g.  $a-g\psi-t\bar{\alpha}$ —'want of cows',  $dev\dot{\alpha}-t\bar{\alpha}$ —'divinity',  $puru_{\bar{\beta}}\dot{\alpha}-t\bar{\alpha}$ —'human nature'. The only exception is  $a-vira-t\bar{\alpha}$ —'want of sons'.

24. Derivatives formed with -tāti and -tāt have the same accentuation as those formed with -tā; e. g. a-riṣṭá-tāti- 'security', devá-tāti- 'divinity', śáṇ-tāti- 'good fortune'. The accent is exceptional in ásta-tāti- 'home' and díkṣa-tāti- (AV.) 'cleverness'.

25. The suffix -tya, forming nouns from particles, is never accented: apa-tya-n. 'offspring', amā-tya-'companion', āviṣ-tya-'manifest', ni-tya-'own', niṣ-tya-'foreign', sánu-tya-'secret'. When attached to the substantive ap-water' it is, however, accented: ap-tyá- and āp-tyá- 'watery'.

**26.** The suffix -tva is invariably accented; e. g. amṛta-tvá- 'immortality', pati-tvá- 'matrimony'.

27. The very rare suffix -tva-tā is accented on its first syllable: isita-tvātā- 'excitement', puruṣa-tvātā- 'human nature'.

28. The suffix -tvana is always accented on its final syllable; e. g. kavitvaná- 'wisdom', pati-tvaná- 'matrimony', sakhi-tvaná- 'friendship'.

in the RV. is kanīnakā- but in the AVI. kanīnikā-. (with the ordinal accent).

kanīnikā-. (with the ordinal accent).

3 It is shifted in mṛḍayát-tama- 'showing

<sup>&</sup>lt;sup>2</sup> Except puru-lúma- 'very many' and ut- great compassion' (mṛḍáyat-). Cp. below 89.

- 29. The suffix -tha, forming ordinals from a few numerals and adjectives of a cognate sense from pronominal stems, is nearly always accented: thus catur-thá- (AV.) 'fourth', saṣ-ṭhá- (AV. VS.) 'sixth', kaṭi-thá- 'the how-maniest'; but saṣtá-tha- 'seventh'.
- 30. The rare derivatives formed with the suffix -na are accented either on the first or the last syllable: strái-na- 'feminine' (strí- 'woman'), vísu-na- 'various'; but purā-ná-¹ 'ancient', samā-ná-¹ like'.
- 31. With the suffix -bha² are formed the names of a few animals with one exception accented on the final syllable: ṛṣa-bhá- and vṛṣa-bhá- 'bull', garda-bhá- 'ass', śara-bhá- (AV. VS.) 'fabulous eight-legged animal', rása-bha- 'ass'. This suffix also occurs once in the adjective sthūla-bhá- (AV.) 'big'.
- 32. The suffix -ma is regularly accented, whether forming superlatives; e. g. adha-má- 'lowest', madhya-m.i- 'middle-most', or ordinals; e. g. asta-má- 'eighth'. An exception is ánta-ma-3 'next'.
- 33. Derivatives formed with the suffix -mant retain the accent of the primitive, unless the latter is oxytone, when the accent in the great majority of instances (about three-fourths) is thrown forward on the suffix; e. g. oṣadhī-mant- (AV.) 'rich in herbs', aśáni-mant- 'bearing the thunderbolt'; but agni-mánt- 'having fire' (agni-).
- 34. The suffix -maya is always accented on the first syllable; e. g. ayas-máya- 'made of metal', go-máya- 'consisting of cows', śaka-máya- 'arising from excrement'.
- 35. The suffix -min is accented (like -in) in the only two derivatives formed with it: iṣ-min- 'impetuous', and rg-min- 'jubilant with praise' (re-).
- 36. The rare suffix -mna is always accented: dyu-mnd-'brightness', nr-mná'manliness', ni-mná- 'depth', su-mná- 'welfare'.
- 37. Derivatives formed with the suffix -ya and Vrddhi accent the initial or the final syllable with the same shift as appears in those formed with -a: the initial, when the primitive is accented on the final (or sometimes a medial) syllable, but the final, when the primitive is accented on the initial (or sometimes a medial syllable); e. g. dáiv-ya- 'divine' (devá- 'god'), ártvij-ya- 'office of priest' (rtvij-,), gárhapat-ya- 'position of a householder' (grhá-pati-); but ādit-yá- 'son of Aditi', prājāpat-yá- (AV.) 'relating to Prajápati'. In a very few instances the accent remains unchanged, as ádhipat-ya- 'lord-ship' (ádhi-pati- 'lord'), páums-ya- 'manliness' (púms- 'man'), váis-ya- 'man of the third caste' (vis- 'settler'), śráiṣṭh-ya- (AV.) 'superiority' (śréṣṭha- 'best'); while in several instances it shifts from the final syllable to the suffix (instead of to the initial syllable); e. g. kāv-yá- 'descendant of Kaví' (but káv-ya- 'endowed with the qualities of a sage', kaví-).
- a. In derivatives formed without Vrddhi the accentuation is to some extent similar; thus a final accent shifts to the first syllable; e. g. in pitrya- 'belonging to the fathers' (pitr-), prátijan-ya- 'adverse' (prati-janá-'adversary' AV.); or from the first to the last; e. g. grām-yi- 'belonging to the village' (grāma-); or it remains on the first syllable; e. g. áv-ya- 'belonging to sheep' (ávi-), gáv-ya- 'derived from cows' (gi-); or it shifts from the final syllable to the suffix (instead of the first syllable); e. g. kav-yá- 'wise' (kavi-). But here the accent may also remain on or be shifted to a medial syllable; e. g. svaráj-ya- 'autocracy' (svaráj- 'sovereign'), viśvádev-ya- 'belonging to all gods' (viśvá-deva-); hiranyá-ya- 'golden' (hiranya- 'gold'), avyá-ya- 'derived from sheep' (beside ávya-ya-), gavyá-ya- 'derived from cows' (beside gávya-).

<sup>&</sup>lt;sup>1</sup> Cp. BB. 28, 318, bottom.

<sup>2</sup> Cp. PRELLWITZ, BB. 22, 74—114, on animal names in -bha.

<sup>3</sup> But antamébhih (I. 1655).

But a peculiarity of the derivatives formed without Vṛddhi is that the majority of them have the Svarita accent on the suffix; e. g.  $r\bar{a}jan-y\dot{a}$ -'belonging to the royal class'  $(r\dot{a}jan-)$ ;  $dosan-y\dot{a}$ - 'relating to the arm' (dosan-);  $r\bar{a}yav-y\dot{a}$ - 'belonging to Wind'  $(v\bar{a}y\dot{u}-)$ ;  $-dundubh-y\dot{a}-$  (VS.) 'relating to a drum' (dundubhi);  $budhn-y\dot{a}-$  'belonging to the bottom'  $(budhn\dot{a}-)$ . The suffix thus accented also appears in the gerundive in  $-tav-y\dot{a}-$  (twice found in the AV.) formed from an infinitive stem in -tu (585, 4).

38. The rare suffix -yin is (like -in) always accented: ātatā-yin- (VS.) 'having one's bow drawn', dhanvā-yin- (VS.) 'bearing a bow', marā-yin-, N. ot a man, sṛkā-yin- (VS.) 'having a spear', sradhā-yin- (VS.) 'owning the Svadhā'.

- 39. Derivatives formed with -ra having a comparative sense (chiefly from prepositions) accent the initial syllable: ádha-ra-'lower', ápa-ra-'later', áva-ra-'lower', ápa-ra-'lower', ánta-ra-' 'near' (ánta- 'end'). Other nouns formed with the suffix are chiefly accented on the final syllable; e. g. a-śrī-rá- 'ugly', dhūm-rá- (VS.) 'dusky' (dhūmá- 'smoke'), pāṃsu-rá- 'dusty, rath-i-rá- 'riding in a chariot'; but sometimes otherwise; thus ágnīdh-ra- 'belonging to the fire-kindler' (agnīdh-), médh-i-ra- 'wise', karmá-ra- 'smith'.
- 40. Derivatives formed with -/a nearly always accent the suffix; e. g. a-s/t-lá- (AV.) 'ugly', jīva-lá- (AV.) 'lively', bahu-lá- 'abundant', madhu-lá- 'sweet'; but t/lvi-la- 'fertile', séva-la- (AV.) 'slimy', sís/t-la- 'little child'.
- 41. The suffix -va is regularly accented: arṇa-vá- 'billowy', keśa-vá- (AV.) 'hairy', añji-vá- (AV.) 'slippery', śanti-vá- (AV.) 'friendly', śraddhi-vá- 'credible'.
- 42. The fem. substantives formed from adverbs or prepositions with the suffix -vat always accent the final syllable:  $arv\bar{a}$ -vát- 'proximity',  $\bar{a}$ -vát- (AV.) 'proximity', ud-vát- 'height', ni-vát- 'depth',  $par\bar{a}$ -vát- 'distance', pra-vát- 'height', sam-vát- 'region'.
- 43. Derivatives formed with the suffix -van may have the accent on any syllable; e. g. áthar-van, 'fire-priest', 'Indhan-van- 'possessed of fuel', 'ghā-van- 'violent'; 'rtā-van- 'regular', maghá-van- 'bountiful'; arātī-ván- 'hostile', śrustī-ván- 'obedient'.
- 44. Derivatives formed with -vant generally retain the original accent except in oxytone stems (if not ending in a or ā), which as a rule throw it on the suffix; e. g. kéśa-vant- 'hairy', putrá-vant- (VS.) 'having a son', prajávant- 'having offspring', dyāvāpṛthivi-vant- 'connected with heaven and earth'; but agni-vant- 'having fire' (agni-), āsan-vant (AV.) 'having a mouth'. The accent is anomalously shifted in kṛśaná-vant- 'decorated with pearls' (kṛśana-) and viṣā-vant- 'central' (viṣu-) 'in both directions'.
- 45. The very rare derivatives formed with the suffix -vaya accent either the suffix or the primitive: dru-vaya- (AV.) 'wooden dish' and catur-vaya- 'fourfold'.
- 46. Derivatives formed with the rare suffix -vala accent their final syllable: kṛṣṣ-valá- 'peasant', nad-valá- (VS.) 'reed bed'.
- 47. The suffix -vin is always accented; e. g. namas-vin- 'reverential', yaśas-vin- (AV.) 'beautiful', medhā-vin- (AV.) 'wise', dhṛṣad-vin- 'bold'.
- 48. The very rare names of relationship formed with the suffix -vya accent the first syllable: bhråtr-vya- (AV.) 'nephew'.
- 49. A few adjectives and substantives formed with the suffix -śa accent either the final or, less often, the first or second syllable: arva-śa- or

This word may, however, be derived from antár- 'within', with BR. and Whitney 1209 i.

drva-śa- 'hasting', eta-śa- or éta-śa- 'variegated', babhlu-śa- (VS. MS.) 'brownish', roma-śa- 'hairy', yuva-śa- 'youthful', anku-śa- 'hook', turvá-śa-, N. of a man. Perhaps also kaśma-śa- (AV.) 'stupefaction' (?), and kalá-śa- 'jar'.

# 2. Accentuation of Compounds.

AUFRECHT, De accentu compositorum Sanscriticorum, Bonn 1847. — GARBE, KZ. 23, 470 f. — REUTER, Die altindischen nominalcomposita, ihrer betonung nach untersucht, KZ. 31, 157—232; 485—612. — WACKERNAGEL, Altindische Grammatik 21, p. 40—43, etc.

87. The rule as to the accentuation of compounds, stated in the most general way, is that iteratives, possessives, and governing compounds place the accent on the first member; determinatives and regularly formed copulatives (with one accent) on the last member and to a large extent on its final syllable. Speaking generally the accent of a compound is that of one of its members. But some words always change their accent when compounded; thus viśva- 'all' regularly becomes viśvá-, and in the later Samhitās sárva-'all' sometimes becomes sarvá-. Other words when compounded change their accent in certain combinations only; thus some paroxytones become oxytone, as pūrva-'prior' in pūrvá-citti-'foreboding', pūrvá-pīti- 'precedence in drinking', pūrvá-hūti- 'first invocation'; néma- 'one' in nemá-dhiti- 'separation'; médha-'sacrifice' in medhá-pati- 'lord of sacrifice', and medhá-sāti- 'receiving the oblation'; vésan- in vesá-kapi-, N. of a monkey; on the other hand some oxytones throw back the accent, as khādi- 'bracelet' in khādi-hasta- 'having hands adorned with bracelets'; grīvá- 'neck' in tuvi-gráva- 'powerful-necked'; vīrá- 'hero' in puru-vira- 'possessed of many men' and su-vira- 'heroic'; dhūmá-'smoke' in śaka-dhúma- (AV.) 'smoke of cowdung'.

An adjective compound may shift the accent from one member to the other if it becomes a substantive or a Proper Name; thus a-kṣira- 'imperishable', á-kṣarā- 'speech'; sú-kṛta- 'well done', su-kṛtá- n. 'good deed';

ά-rāya- 'niggardly', a-rāya-, N. of a demon.

88. In iteratives, which may consist of repeated nouns, pronouns, adverbs, prepositions, or particles, the first member alone is accented, the two words being separated by Avagraha in the Pada text, like the members of other compounds. Examples are: áhar-ahar jāyate māsi-māsi (x. 52³) 'day after day he is born, month after month'; yád-yad yámi tád á bhara (viii. 616) 'bring to me whatever I ask'; yáthā-yathā matáyaḥ sánti nṛṇám (x. 111¹) 'as are the desires of men in each case'; adyádyā śváḥ-śva 'ndra trāsva pare ca naḥ (viii. 61¹)' 'on each to-day, on each to-morrow protect us, Indra, and in the future'. The prepositions which appear as iteratives are upa, párā, prá, sám; e. g. prá-pra pūṣṇás tuvijūtásya śasyate mahitvám (i. 138¹) 'forth and again the greatness of the mighty Pūṣan is praised'¹. The only verbal iterative occurring is piba-piba (ii. 11¹¹)² 'drink again and again'.

89. Governing compounds always accent the first member when it is a verbal noun<sup>3</sup>, as *trasá-dasyu-* 'terrifying the foe', N. of a man. When the first member is a present or aorist participle, its final syllable is invariably accented, whatever the original accentuation may have been, e. g. vidád-vasu-

'winning wealth', tarád-dvesas- 'overcoming (tárat-) foes'.

In a few instances the repeated verbal form is words are not treated as a compound and are both accented, as  $n\ddot{u}$  now, now, now, now', which (AV.) 'here, here',  $s\dot{a}m$  sam (AV.).

3 Except  $\dot{s}ik_{\bar{s}}\bar{a}$ -nará- 'helping men'.

- a. When the first member is a preposition, the accentuation is much the same as in possessives: either the first member is accented on its proper syllable, as abhi-dyu- 'directed to heaven'; or the last member on the final syllable, but only when it ends in the compositional suffix -a, or when as a simple word it is not accented on the final syllable; e.g. adhas-pad-á-'being under the feet', anu-kāmá- 'according to wish' (kāma-). The accentuation of api-prāna- (f. -ī-) 'accompanying the breath' is quite exceptional.
- qo. A. Possessive compounds (Bahuvrīhis) normally accent the first member on the same syllable as the simple word, e. g. raja-putra- having kings as sons' (but rāja-putrá- 'son of a king'). Other examples are: án-abhimlata-varna- 'whose colour is not dimmed', iddhágni- 'whose fire is kindled', indra-jyestha- 'having Indra as chief', indra-sakhi- 'having Indra as a friend', ghrtá-prstha- 'butter-backed', rúsad-vatsa- 'having a bright calf', sahisra-pad- 'thousand-footed' '. Similarly when the first member is a preposition, an ordinary adverb, or sahá- and (chiefly in the later Vedas) sain the sense of 'accompanied by'; e. g. nír-hasta- (AV.) 'handless', prá-mahas-'having pre-eminent might', vi-grīva- 'wrynecked', viśváto-mukha- 'facing in all directions', sahá-vatsa-'accompanied by her calf', sú-kāma- ('accompanied by' = ) 'fulfilling desires' (VS.), sá-cetas- 'intelligent'2.
- a. The original accent of the first member is sometimes changed. r. The adjective viiva- 'all' always, and (owing to its influence) súr va- 'all' sometimes in the later Samhitās, shift their accent to the final syllable; e. g. visvá-pesas- 'having all adornment', sarvá-janman-3 (AV.), sarvá-śuddha-vāla- (VS.) 'having a completely white tail', sarváyur-(VS.) 'having all life'. — 2. Present participles in several instances shift the accent to their final syllable; e. g. krandád-isti- 'having roaring (krándat-) speed', d. avád-akvat-'having swift (dr ávat-)5 steeds'. Other participles with this shift of accent are areal- and bhandát- 'shining', rapśát- 'swelling', svanát- 'resounding'. — 3. There are also a few miscellaneous examples of shift of accent in the first member: abhisti-dyumna- 'abounding in aid', jyoti ratha- 'whose car is light' (jyótis-), dadrśāná-pazi- 'whose felly is visible' (dádṛṣāna-), avákolba- (AV.) 'surrounded with Avakā plants' (ávakā-); cá/uṛ-anga- 'fourmembered' (catier-), khādi-hasta- 'having hands adorned with bracelets' (khādi-).
- B. About one eighth of the total number of Bahuvrīhis accent the second member, and in the majority of instances on the final syllable.
- a. This accentuation is common when the first member is a dissyllabic adjective ending in i or u. It is invariable in the RV. after the very frequent puril- 'much' and the less frequent krdhil- 'shortened', bahil- 'much', sitiwhite'; e. g. puru-putrá- 'having many sons', puru-vára- 'having many treasures', kṛdhu-kárṇa- 'having short ears', bahv-annú-6 'having much food' (ánna-), siti-pád- 'white-footed'. Examples of this accentuation after other adjectives ending in i and u are:  $\bar{a}su$ - $h\dot{c}sas$ - 'having swift steeds', uru- $ks\dot{a}ya$ -'having a wide abode', rju-krátu- 'whose works are right', tuvi-dyumná- 'having great glory', trsu-cyávas- 'moving greedily', pṛthu-pákṣas- 'broad-flanked', vibhukrátu- 'having great strength', vīļu-pāṇi- 'strong-hoofed', hiri-siprá- 'goldencheeked'7. In the later Samhitas there is an increasing tendency to follow

precedes the first member, it has the accent; member is common. e. g. éka-śiti-pad- (VS. TS.) having one foot white'; cp. WACKERNAGEL 21, p. 291.

<sup>&</sup>lt;sup>2</sup> There are, however, a few exceptions in which the final member is accented, as vi-śikhá- 'hairless' (but vi-śikha- AV.), purorathá- 'whose car is foremost', sa-práthas- 'extensive', sāngá- (AV.) 'together with the limbs'.

<sup>3</sup> This is the only example (occurring beside visvá-janman-) of this shift of accent in budhná- and prthú-budhna- 'broad-based'.

When another adjective or an adverb sárva- in the AV., where sárva- as first

<sup>4</sup> sárva- shows this shift of accent in the RV. in the adverb sarvá-tas 'from all sides' and in the derivative sarvá-tāti- 'totality'.

<sup>5</sup> Here the accent may be affected by that of the adverb dravát 'swiftly'.

<sup>6</sup> After bahu- the final syllable is always accented, even in the later Samhitas.

<sup>7</sup> Both accentuations occur in prthu-

the general rule; e. g. puri-nāman- (AV.) 'many-named', s'/ti-kakud- 'having a white hump', and s'/ti-bhasad- 'having white buttocks' (TS. v. 6. 14').

- b. Bahuvrīhis beginning with dvi- and tri- generally accent the second member; e. g. dvi-pdd- 'two-footed', dvi-dhdra- 'forming two streams', tri-tdntu-'having three webs', tri-nabhi- 'having three naves', tri-vandhurd- 'three-seated' <sup>1</sup>. The only exceptions to this rule in the RV. are dvi-savas- 'having twofold might', try-andha- 'having three mothers' and try-andha- 'having three products of milk'. The later Samhitās accent dvi- and tri- in new Bahuvrīhis as often as not. In a few possessives beginning with other numerals the second member is accented on the last syllable, e. g. catur-aksi- 'four-eyed' 2.
- c. Possessives beginning with the negative prefix a- or an- almost invariably accent the final syllable irrespectively of the original accent of the second member (doubtless in order to distinguish them clearly from determinatives); e. g. a-dánt- 'toothless', a-phalá- 'unfruitful' (phála-), a-balá- 'not possessing strength' (bála-). A very few accent the penultimate; a-bhrátṛ-³ (AV.) 'brotherless', a-víra- 'childless', a-śéṣas- 'without offspring'. On the other hand a good many (though only a small proportion of the whole) accent the prefix (like determinatives), especially when the second member is a noun formed with the suffix -ti; e. g. 4 á-gu- 'kineless', á-jñās- 'kinless', á-dyu- 'not burning', án-āpi- 'kinless', á-prajas- (AV.) 'childless', á-mṛtyu- 'deathless', á-hri-'bold', á-kṣiti- 'imperishable'5.
- d. Possessives beginning with dus-6 'ill' or su-'well' regularly accent the second member, usually on the original syllable; e. g. dur-mánman- 'ill disposed', su-bhága- 'well endowed'. There is, however, a tendency to throw the accent forward on the final syllable; e. g. sv-angurí- 'fair-fingered' (angúri-), su-phalá-(AV.) 'fruitful', su-bandhú- (AV.)? 'closely related'8. On the other hand, the accent is in a few instances shifted from the final to the penultimate syllable, as su-vira- 'rich in heroes' (vīrá-), and su-gándhi- 'sweet-smelling' beside su-gandhi- (from gandhá- 'smell') 9.
- gr. Determinatives as a rule accent the last member, and prevailingly on the final syllable.
- A. I. In the descriptive type, that is, those in which a substantive is described by an adjective or an appositional substantive (Karmadhāraya) and those in which a verbal noun is described by an adverbial word, the accent is on the final syllable; e. g. kṛṣṇa-śakuná- (AV.) 'black bird', mahā-dhaná- 'great spoil', ajñāta-yakṣmá- 'unknown disease', yāvayat-sakhá- 'a protecting friend', rāja-yakṣmá- ('king' ==) 'royal disease' 10, sūrya-śvit- 'sun-bright'; pura-etṛ- 'going before', prathama-jā- 'first-born', prātar-ylij- 11 'early yoked', svayam-bhā- 'self-existent', duṣ-kṛt- 'acting wickedly', su-pra-tūr- 12 'victorious', a-ghārin- (AV.) 'not anointing', a-cit- 'senseless', a-jarayh-13 'not aging', a-jūr- 'unaging'.

<sup>&</sup>lt;sup>1</sup> But aṣ/ā-vandhura- 'having eight carseats'.

<sup>&</sup>lt;sup>2</sup> Cp. WHITNEY 1300 c.

<sup>3</sup> But in the RV, with the usual accentuation a-bluraty-.

<sup>4</sup> For many other examples see WACKER-NAGEL 27, 114 note (p. 293).

<sup>5</sup> The only possessive of this kind in which the second member ends in -ti and accents the final syllable seems to be a-gavyūti- 'pastureless'.

o The only exception in the case of dusis dúr-āśir- 'ill-mixed'.

<sup>7</sup> The RV. retains the original accent, su-phála-, su-bándhu-.

<sup>&</sup>lt;sup>8</sup> For other examples see Wackernagel 2<sup>1</sup>, p. 294, bottom.

<sup>9</sup> Op. cit. 2<sup>1</sup>, p. 295  $\gamma$ , note.

10 Exceptions, when the first member is a noun, are all compounds formed with visva-'all', as visva-mānuṣa-'every man', also v-7''-2''-2''--2''---'midday', v/-ṣā-kapi-'male ape', in all of which the original accent of the first member is shifted.

<sup>11</sup> ádhri-gu- 'irresistible' and sadhá-stha-'standing together', are exceptions.

<sup>12</sup> sv-ā-vṛ-j- 'easy to acquire' is an exception.

<sup>13</sup> But á-mavisnu- 'immoveable'.

a-vodd/i/- 'not fighting', a-rājin- 'not shining', a-pra-mṛṣ-yá-1 'indestructible', a-budh-vá- 'not to be wakened', an-aty-ud-yá- (AV.) 'unspeakable', an-ādhrṣ-yá-'unassailable', an-āmayi-tnú- 'not making ill'.

- a. When, however, the second member ends in -van, -man or -i, or has the form of a gerundive used as a neuter substantive, the penultimate (radical) syllable is accented; e. g. raghu-pátvan- 'swift-flying', puro-yávan-2 'going in front'; su-tarman- 'crossing well', vīļu-patman- 'flying mightily', raghuyaman- 'going swiftly', su-vahman- 'driving well', dur-gfbhi- 'hard to hold', riu-váni 'striving forward', tuvi-sváni- 'roaring mightily', pūrva-pāyya- and pūrvapéya- n. 'precedence in drinking', saha-śéyya- n. 'act of lying together', amutra $bh\dot{n}_{y}a^{-3}$  (VS.) n. 'state of being in the other world'.
- 2. The first member is, however, accented under certain conditions. a. It is generally accented if it is an adverbial word and the last member is a past participle in -ta or -na+ or a verbal noun in -ti; e. g. dámsu-jūta-'speeding wondrously', dir-hita- 'faring ill', sana-sruta-5 'famed from of old'; puri-hiti- 'priestly ministration', sadhd-stuti- 'joint praise'.—b. The privative particle a- or an- when compounded with a participle, adjective, or substantive is nearly always accented; e. g. án-adant-7 'not eating', á-ditsant- 'not wishing to give', ά-manyamāna- 'not thinking', ά-hiṃsāna- 'not injuring', á-vidvāms- 'not knowing', á-kṛta-8 'not done'; á-kṛ-a-9 'inactive', á-susv-i- 'not pressing Soma', á-tandra-'unwearied', á-kumāra-10 'not a child'; á-citti- 'thoughtlessness'. The particle is regularly accented when it negatives a compound; e. g. á-dus-krt- 'not doing ill', án-aśva-dā- 'not giving a horse', á-paścād-daghvan-'not remaining behind'; á-punar-dīyamāna-" (AV.) 'not being given back', án-agni-dagdha- 'not burnt with fire', án-abhi-sasta-12 'blameless'.
- B. r. Dependent determinatives as a rule accent the second member and that mostly on the last syllable, even if the simple word is not an oxytone.
- a. When the second member is a root<sup>13</sup>, a verbal noun in  $-\alpha$ , an ordinary substantive (without verbal sense), or an adjective ending in -in <sup>14</sup>, the final

gerundive with the negative prefix, which is, however, accented in some half dozen instances: á-gohya-, á-jesya-, á-dabhya-, á-nedya-, á-yabhya- (AV.) and á ghnya- beside a-ghnyá-. Two of these compounds in the AV. retain the Svarita of the simple gerundive: anativyādhyà- and an-ādharsyà-.

2 satyá-madvan- 'truly rejoicing' is an exception.

3 sadhú-stutya- n. 'joint praise', is an exception.

4 Here the adverb is treated like a preposition compounded with a past participle.

5 There are a good many exceptions in which the original accent of the past participle remains on the final syllable; e. g. tuvi-jātá- 'mightily born', dus-kṛtá- 'ill done'. su-jātá- (beside sú-jāta-). This is the regular accentuation when the first member is puru-; e. g. puru-stutá 'much praised'.

6 Not, however, when the second member is a gerundive, a root, or a noun with verbal meaning ending in -yu, -tnu, -snu, -in, -tr-; see examples above (A 1).

7 But a-sascánt- beside á-sascant- 'not ceasing', a-codánt- (v. 442) and as substan- the simple word (86 B. 8).

This is the regular accent of the tives a-rundhat-t-(AV.) a name, and a-jarant-t-(VS.) 'unaging'.

> 8 Exceptions are a-citta-, a-drsta-, a-mrta-, a-yúla-n. 'myriad' but (AV.) á-yula- 'undisturbed', a-türta- (beside á-türta-), a-bhinná- (AV.) beside á-bhinna-.

> 9 There are also some verbal derivatives in -a which accent the second member; e. g. a-ksár-a- 'imperishable', a-jár-a 'unaging', a-dábh-a- 'not-deceiving', a-tṛp-ú-'dissatisfied', a-vadh á- 'inviolable', a-vrdh-á-'not furthering', an-āvrask-á (AV.) 'not falling off'; cp. WHITNEY 1283-S8.

> 10 There are also several ordinary nouns which are accented as second member; e. g. a-citrá- 'colourless', a-mítra- 'enemy', -a-víra-'unmanly'.

> 11 But a ni-pádyamāna- (AV.) 'not going to rest' where RV. has á-ni-padyamāna.

> 12 But an-ā-sastá- (RŶ1.) 'not praised', a-pra-sastá- beside á-pra-sasta- 'not praised'.

13 There are a few exceptions when derivation from a root is not clear, as in ôsadhi- 'plant'; otherwise -dhi from dhā- 'put' is regularly accented; e. g. isu-dhi 'quiver'.

14 This suffix being invariably accented in

syllable is regularly accented; e. g. gotra-\$h/d- 'opening the cowpens', ghrtā-vidh- 'delighting in ghee', divi-spf-s- 'touching the sky', patam-gd- 'going by flight', 'flying', varuṇa-dhrù-t- 'deceiving Varuṇa'; agnim-indh-d-i 'fire-kindling', hasta-grābh-d- 'hand-grasping', puraṃ-dar-d- 'fort-destroying'; uda-meghá- 'shower of water', go-saphd- (VS.) 'cow's hoof', jīva-lokd- 'world of the living', indra-senā- 'Indra's missile' (sénā-), kṛṣṇājin-j- (AV. TS.) 'hide (aj/na-) of the black antelope', deva-kośá-² (AV.) 'cask (kóśa-) of the gods', deva-māná-³ 'abode (māna-) of the gods'; uktha-śaṃs-in- 'uttering praise', bhadra-vād-in- 'uttering auspicious cries'.

- a. The word páti- 'lord' follows this rule in only a few compounds occurring in the later Samhitās; thus in the AV.: apsar.ī-pati- 'lord of the Apsarases', vrīja-pati- 'lord of a troop' (vrājā-pati- RV.); in the VS.: amhasas-pati- 'lord of perplexity', upa-pati- 'paramour', edidhiṣuḥ-pati- 'husband of a younger sister', nadī-pati- 'lord of rivers'; in the MS.: ahar-pati- 'lord of day', cit-pati- 'lord of thought', vāk-pati- 'lord of speech'. In a few determinatives pāti- retains its own accent as second member, as nr-pāti- 'lord of men', rayi-pāti- 'lord of wealth', viṣ-pātin- 'mistress of wealth', viṣ-pātin- 'direct of the tribe'; also the f. in vasu-pāti- 'mistress of wealth', viṣ-pātin- 'lord of proper seasons', pasu-pāti- 'lord of animals' (VS.), puṣti-pāti- 'lord of welfare', bhitta-pāti- 'lord of beings', stha-pāti- 5 'governor'. In compounds with pāti-, however, the first member is usually accented, there being 22 cases in the RV., besides 10 with pāti-; e. g. grpha-pāti- 'lord of the house', gō-pāti- 'lord of kine', pāšu-pāti- 'lord of vealth', vāja-pāti- 'lord of booty', svār-pāti- 'lord of light'; grhā-pātīn- 'mistress of the house', devā-pātīn- 'wife of a god', vāja-pātīn- 'queen of booty'. In the AV., of 15 new masculines ending in -pātī- more than half accent the first member as do all the 8 new ones ending in pātīn-; e. g. ātithi-pāti- 'entertainer of a guest'. In the other Saṃhitās also occur: kṣatrā-pāti- (VS.) 'lord of dominions', bhūva-pāti- (VS.) 'lord of the more), bhūva-pāti- (VS.) 'lord of the mosphere', bhūva-pāti- (VS.) 'lord of beings', bhū-pāti- (TS.) 'lord of the world', saṃvešā-pāti- (VS.) 'lord of rest', viṣnu-pātīn- (VS.) 'lord of the world', saṃvešā-pāti- (VS.) 'lord of rest', viṣnu-pātīn- (VS.) 'lord of the world', saṃvešā-pāti- (VS.) 'lord of rest', viṣnu-pātīn- (VS.) 'lord of the world', saṃvešā-pātī- (VS.) 'lord of rest', viṣnu-pātīn- (VS.) 'lord of the world', saṃvešā-pātī- (VS.) 'lord of rest', viṣnu-pātīn- (VS.) S.) 'Viṣnu's wife' 'lord of the world', saṃvešā-pātī- (VS.) 'l
- b. Determinatives which have as their second member verbal nouns in -ana<sup>9</sup>, adjectives in -i and -van, as well as action nouns in -ya, regularly accent the radical syllable of the second member; e. g. dera-mād-ana-'exhilarating the gods', keśa-várdh-ana-'io 'causing the hair to grow'; pathi-rákṣ-i- 'protecting the road'; soma-pā-van- 'somadrinking', talpa-śi-van- 'lying on the couch', prātar-i-t-van-'i' 'coming early'; ahi-hát-ya- 'slaughter of the dragon', deva-hā-ya- 'invocation of the gods', mantra-śrii-t-ya- n. 'listening to counsel', vṛtra-tắr-ya-<sup>12</sup> 'conquest of Vṛtra'.
- 2. Dependent determinatives, however, which have as their second member past passive participles in -ta and -na or action nouns in -ti accent

I digha- retains its original accent, as madhu-digha- 'yielding mead', kāma-d'igha-(AV. VS.) 'yielding desires'. A few others have the original accent of the first member: marúd-vṛdha- 'delighting in the Maruts', divi-cara- (AV.) 'moving in the sky', suti-kara-'active at the Soma offering'. Cp. WHITNEY 1278.

<sup>2</sup> A few accent the penultimate syllable of the final member with shift of the original accent, as go dhūma- (VS.) 'wheat', šaka-dhūma- (AV.), yama-rājya-(AV. VS.) 'Yama's sway' (rājyá-); cp. WACKERNAGEL 2<sup>1</sup>, p. 268,

op, note.

3 But deva-yána- 'going to the gods'.

4 Also the Karmadhāraya sa-pátnī- 'cowife' and the Bahuvrīhi su-pátnī- 'having a good husband'.

6 In K. médha-pati-.

7 svá-pati- 'one's own lord' is a Karma-dhāraya; as a Bahuvrīhi it is accented sva-pati- (AV.) 'having an own consort'.

8 On doubly accented compounds with -pati- see below (3).

9 Just as when such nouns are compounded with prepositions.

To The very few apparent exceptions to this rule are due to these words losing their verbal character; e. g. yama-sādaná· (AV.) 'Yama's realm'.

II In mātari-śvan- and mātari bhvan- the suffix is probably-an; here the original accent of the first member (if it is the loc. mātári) has shifted, perhaps owing to the influence of words like prātar-i-tvan-.

12 An exception is sadhá-stu-t-ya- 'joint praise'. A few feminines in -yā, which are closely allied to these neuters in -ya, retain their accent on the final syllable, as deva-

<sup>5</sup> Cp. BLOOMFIELD, SBE. 42, 319.

the first member (like a preposition); e. g. indra-prasūta- 'incited by Indra', devá-hita- 'ordained by the gods', hásta-yata- 'guided by the hand'; deváhūti-2 'invocation of the gods', dhána-sāti-3 'winning of wealth'.

- 3. Double accentuation. A certain number of determinative compounds. syntactical in origin, which have a genitive case-form in the first member, and nearly always -páti- in the second, are doubly accented. Such are brhaspáti- and bráhmanas-páti-+ 'lord of prayer', gnás-páti- 'husband of a divine woman' (with the anomalous fem. gnás-pátnī- 'divine wife'), jás-páti-5 'head of a family'. The compound sádas-páti- 'lord of the seat' (sádas-) probably stands by haplology for \*sádasas-páti-, but vána-s-páti-6 'lord of the wood' perhaps, and rátha-s-páti- 'lord of the car' (rátha-) probably, owe their s to the analogy of b'fhas-páti-1. Though without case-ending in the first member, sácī-páti- 'lord of might' follows the analogy of the above compounds. Other doubly accented compounds with case-form in the first member but not ending in -pati- are śúnah-śépa- 'Dog's tail', N. of a man; dásyave-v/ka- 'Wolf to the Dasyu', N. of a man; apám-nápāt- 'son of waters', the analogy of which is followed by tánū-nápāt- 'son of himself' (tant-) though it is without caseending in the first member; nárā-súmsa-8 'Praise of men' (for \*nárām-súmsa-), the analogy of which is followed by nṛ-śaimsa-. The name nābhā-nédisthaseems to contain an old locative in the first member, while the uninflected stem appears in ds-pdtra- (TS. II. 5. 9<sup>3</sup>) 'vessel for the mouth'.
- 92. I. The regular class of copulatives, which have only one accent, places the acute on the final syllable9 irrespective of the accent of the uncompounded word. In the plural occur: ajāváyalı m. 'goats and sheep', ukthārká n. 'praises and songs', ahorātrāņi 'days and nights'; in the dual: rk-sāmé n. 'song and chant', satyānrté n. 'truth and untruth', sāśanānaśané n. 'what eats and does not eat'; in the singular: nīlalohitám n. 'blue and red' ro, iṣṭā-pūrtám<sup>11</sup> n. 'what is sacrificed and presented', keśa-śmaśrii- (AV.) n. 'hair and beard', añjanābhyañjanám (AV.) n. 'salve and ointment', kasipu-barhanám (AV.) n. 'mat and pillow', krtūkrtám (AV.) n. 'what is done and undone', cittākūtám (AV.) n. 'thought and desire', bhadra-pāpám (AV.) 'good and evil', bhūta-bhavyám (AV.) n. 'past and future', n. pl. priyāpriyāni (AV.) 'things

yáj-ya-, jāta-vid-yá- 'knowledge of things', musti-hat ya- 'hand to hand fight'.

There are, however, a good many exceptions in which the final syllable is accented (as in prepositional determinatives), e.g. agni-taptá- 'glowing with fire', agni-dagdhá-'burnt by fire'.

<sup>2</sup> The original accent of the first member is shifted in nemá-dhiti- 'putting opposite' 'fight', vaná-dhiti- 'layer of wood', medhásāti- 'receiving of the oblation'.

3 When the verbal sense is lost in the second member, the general rule of final accentuation applies; e.g. deva-sumati- 'favour of the gods', deva-heti- (AV.) 'weapon of the gods'. This analogy is followed by sarvajyāni- (AV.) 'loss of one's all'.

4 Though bráhmanas páti- is not treated as a compound in the Pada text, it is so treated in the Dvandva indrā-brahmaņaspatī (II. 2412).

5 Thus accented in Book VII, but jás-pati, in Book I. The latter is the only Tatpurusa in the RV. in which double accentuation does not take place when -páti- is preceded | II In the VS. used in the dual also.

yaj-yā- 'worship of the gods', beside deva- by s. The only other instance in the RV. of a Tatpurusa with case-ending in the first member and yet singly accented is divodāsa-, N. of a king. Elsewhere occur upsuyogá- (AV.) 'connecting power in water', amhasas-pati- (VS.), perhaps mātur-bhrātrá-(MS. I. 612) 'mother's brother' (the Mss. read mātur-bhrātrá-).

o In vánas-páti- the first member may be the gen. sing. of van- 'wood' (gen. pl. vanām); but in rátha-s-páli- the s must be inorganic; cp. GARBE, KZ. 23, 490; RICHTER, IF. 19, 17; BARTHOLOMAE, BB. 15, 15 note1; WACKERNAGEL 21, p. 247.

7 The only new instance of double accentuation of a compound with -páti- after the RV. seems to be nṛms-páti- (MS.); cp. Wackernagel 21, p. 248 d.

8 Cp. Foy, JAOS. 16, CLXXII-IV.

9 The two or three exceptions which occur in the AV. and VS. are doubtless due to wrong readings.

10 The adjectives being used as substan-

agreeable and disagreeable'; and as adjectives tāmra-dhūmrá- (AV.) 'tawny and dark', daksina-savyá- (AV.) 'right and left', saptamāstamá- (AV.) 'seventh and eighth'.

a. The very few adverbial copulatives which occur accent the first member: áhar-divi 'day by day', sāyám-prātar (AV.) 'at even and at morn'.

- 2. The class of Devatā-dvandvas, each member of which is dual in form, and which in the RV. is about thrice as frequent as the regular class, retains the accent of simple words in each member of the compound : thus agnā-viṣṇū (AV.), agnī-somā, indrā-pūṣaṇā, indrā-bṛhaspatī², indrā-varuṇā, índrā-visnū, índrā-sómā, usásā-náktā 'Dawn and Night', dy ívā-kṣámā 'heaven and earth', dyávā-pṛthiví, dyávā-bhímī, náktosásā, párjanyā-vátā, pṛthiví-dyávā, mitrā-vārunā, sūryā-māsā. A few others are formed in the same way from substantives which are not the names of deities: krátū-dákṣau (VS.) 'understanding and will', turváśā-yádū (IV. 30<sup>17</sup>) 'Turváśa and Yadu', dhúnī-cúmurī 'Dhuni and Cumuri', mātárā-pitárā (IV. 67) 'mother and father'.
- a. A certain number of these compounds have been assimilated to the regular class of copulatives by giving up the accent of the first member: indrāgni, indrā-pūṣáṇā, somā-pūṣáṇā, vātā-parjanyá, sūryā-candramásā, bhavārudríu (AV.), bhavā-śarváu (AV.); one has been completely assimilated by giving up also the dual form in the first member: indra-vāyú.
- a. There occurs once a secondary adjective copulative accented on both members, being formed from an adverbial Dvandva: áhar-divá-(VS.) 'daily' (áhar-divi 'day by day').

### 3. Accent in Declension.

- 93. The vocative, when accented at all (85, 2) invariably has the acute on the first syllable; e. g. pitar, N. pita 'father'; déva, N. devá-s 'god'. The regularly accented vocative of dyú- (dyúv-) 'heaven' is dyàu-s4, that is díaus, but the nominative form dyáus is also used in its stead.
- **a.** Otherwise, in the  $\alpha$ -declension (f.  $-\overline{\alpha}$ ) the accent always remains on the same syllable; e. g. N. devá-s, G. devá-sya, pl. devá-nām. This rule is also followed by monosyllabic pronominal stems in -a; e. g. from ma-: I. máy-ā 'by me', D. má-hyam, L. máy-i; from tá- 'that', G. sing. tá-sya, pl. G. té-ṣām, I. tá-bhis 5.
- a. An exception to this rule is formed by the plural cardinal stems ending in -a. They regularly accent that vowel before endings with initial consonant, and throw the acute on the ending of the genitive; e. g. páñca 'five': I. pañcá-bhis. G. pañcānām; aṣṭá 'eight', however, shifts the accent to the endings generally, thus I. aṣṭā-bhis, D. aṣṭābhyás (TS.).
- 94. When the final syllable of the stem is accented, the acute (except in the  $\tilde{a}$ -declension) is liable to shift to the endings in the weak cases.
- 1. This is the rule in monosyllabic stems; e. g. náu- 'ship': A. náv-am, but I. nāv-ā, pl. I. nau-bhis, L. nau-su; dánt- m. 'tooth': I. dat-ā, pl. A. dat-ás<sup>6</sup>, I. dad-bhis.

Indo-arische Philologie. I. 4.

the derivatives mitrá-váruna-vant- 'accom- the regular class is on the final syllable. panied by Mitra and Varuna', and dyavaprthivi-vant- (AV.) 'accompanied by heaven (Gk. Zev). and earth'.

<sup>2</sup> Retaining the double accent of the second member.

<sup>3</sup> In the AV. the number of Devatadvandvas is only about half that in the RV. (though the total number of Dvandvas is

The double accent is retained even in again, have only one accent, which as in

<sup>4</sup> Retaining the nom. -s, instead of \*diau

<sup>5</sup> An exception is the pronoun a- 'this', which is treated like a monosyllabic stem, e. g. G. a-syá, pl. m. e-sám, f. a-sám; a few times, however, the accentuation á-smai, á-sya, á-bhis occurs; cp. Whitney 502 b.

<sup>5</sup> The accusative plural is treated as a more than double); about one-half of these, weak case and accented on the ending in

- a. Exceptions to this rule are the rare monosyllabic stems in  $-\bar{a}$ , which retain the accent on the stem; e.g. gnā- 'woman': pl. I. gnā-bhis, L. gnā-su. Individual exceptions are go- 'cow', dyo- 'sky'; e.g. I. gáv-ā, pl. G. gáv-ām, I. go-bhis; L. dyáv-i, pl. I. dyú-bhis. Similarly no- 'man': D. nár-e, pl. I. no-bhis, L. no-su, but G. nar-ām and no-nām; ksám- 'earth'; L. ksám-i; tán- 'succession: I. tán-ā (and tan-ā), D. tán-e; rán- 'joy': rán-e, pl. L. rám-su; ván- 'wood': pl. L. vám-su (but G. van-ám); víp- 'rod': G. víp-as; str- 'star': pl. I. stf-bhis; svàr- 'light': G. sūr-as (but D. sūr-é); also the infinitives bādh-c 'to press', cáh-c 'to convey'. In some words the irregular accentuation is due to their having originally been dissyllables; such are dru- 'wood', snu- 'summit', svan- 'dog', yūn- weak stem of yúvan- 'young'; e.g. I. drú-nā; pl. L. snú-su; I. śún-ā, pl. śvá-bhis; I. yūn-ā 1.
- 2. When the accented vowel of the final syllable in polysyllabic stems disappears either by syncope or by changing to a semivowel, the acute is thrown on endings with initial vowel in the weak cases; thus from mahiman-'greatness', I. mahimn-a; from mūrdhan- 'head', D. mūrdhn-e; from agn!- 'fire', G. du. agny-vs; from dhenú- 'cow', I. sing. dhenv-á; from vadhú- 'bride', D. vadhv-ái (AV.); from pitý- 'father', I. pitr-á.
- a. Polysyllabic stems in -1, -1/1, -1/2, and in the RV. usually those in -1, throw the acute on the ending of the G. pl. also, even though the vowel retains its syllabic character in this case; e. g. agnī-nām, dhenū-nām, dātṛ-ṇām; bahvī-nām².
- 3. Present participles in -át and -ánt throw the acute on the endings with initial vowel in the weak cases; e. g. from tud-ánt- 'striking': I. sing. tud-at-\(\daggera\) (but tud-\(\daggera\)dd-bhis). This rule is also followed by the old participles mah-át- 'great' and bṛh-át 'large', e. g. mahat-á (but mahád-lhis)3.
- 4. In the RV. derivatives formed with accented -añc throw the acute on endings with initial vowel in the weak cases when contraction to z and z appears in the final syllable; thus from praty-áñc- 'turned towards', I. sing. pratīc-ā (but L. pl. pratyāk-su); from anv-āñe- 'following'; G. anūe-ās (but from práñc- L. sing. prác-i). The other Samhitas, however, generally retain the accent on the stem 4.

#### 4. Verbal Accent.

os. As regards personal endings, those of the singular active in all tenses and moods are always unaccented except the 2. imperative -dhi or -hi. Others may be accented; if dissyllabic, they have the acute on the first syllable, as -ánti, -máhi.

When the tense stem ends in -a in the present, in the future, in the unaugmented imperfect and agrist, and throughout the subjunctive, the accent is never on the ending, as it remains on the same syllable of the stem throughout.

96. All tenses formed with the augment invariably accent the latter, if the verb is accented at all  $(85, 2\beta)$ ; e. g. impf.  $\acute{a}$ -bhara-t, plupf.  $\acute{a}$ -jagan, aor.  $\acute{a}$ - $bh\bar{u}$ -t, conditional  $\acute{a}$ -bharisya-t. If the augment is dropped, the accentuation is as follows. In the imperfect the acute is on the same syllable as in the present; e. g. bhára-t, pres. bhára-ti. The pluperfect, if regularly

hardly more than one third of the stems the plural cardinals in -a: as páñea 'five', occurring; see Whitney 390 a; cp. Lanman pañcā-nām, dúša ten', dašā-nām.

494, 499, 504 top, 505. member of a compound, it loses its monosyllabic accent; e. g. su-dhi- 'wise', G. pl. su-dhinam. On the other hand pres- 'pressing on' though a compound (pra-is-) is accented like monosyllables in the I. sing. pres-ā.

<sup>2</sup> This regularly takes place in the G. of

3 The accent is, however, not shifted in When a monosyllable becomes the final the old participle vāghát- m. 'worshipper'; nor in the two forms a-codat-e 'not urging' (from ¿ód-ant-) and rathirāyát-ām 'speeding'; cp. Lanman p. 505-6 (top).

4 Thus the f. stem pratic-i- (AV.), but RV.

pratīc-i- (cnce in the A. pratīcīm).

formed, accents the root, as 3. sing. cākán (V kan-), 3. sing. rārán (V ran-), 1. sing. cikétam (Vcit-); when formed with thematic -a, it accents that vowel, as 3. pl. cakrpá-nta. The aorist if formed with -sa, accents that syllable, e. g. 3. pl. dhuk-sá-n, dhuk-sá-nta (from duh- 'milk'); if formed with -s, it accents the root, as may be inferred from 1. sing. vám-s-i (from van-'win'), the only accented example occurring; if formed with -i<sub>v</sub>-, it accents the root, e. g. 1. sing. sáms-is-am<sup>1</sup>. If formed from the root, it accents the radical vowel in the singular active, but the endings elsewhere, as 3. sing. várk (Vvrj.). but 2. sing. mid. nut-thas (V nud-). If formed from the root with thematic -a, it usually follows the analogy of the present á-class, e. g. ruhá-m, bhujá-t, vidá-t, budhá-nta; in several instances, however, it accents the root, as ára-nta (r- 'go'); sára-t (sr- 'flow'); sáda-tam (sad- 'sit'); sána-t (san- 'gain') but opt. sanéma; vóca-t (vac- 'speak') but opt. vocéyam. The reduplicated agrist usually accents the reduplicative syllable, as 2. sing. didharas, ninasas, 3. sing. piparat, sisvap, itianat, pl. itianan; but sometimes the root, as 2. sing. sisrathas, 3. sing. pīpárat, sisnáthat. Passive aorists accent the root, e. g. dhá-y-i, sráv-i, véd-i, ján-i, pád-i, sád-i.

- 97. Present system.— I. Throughout the present system of the a-conjugation the accent remains on the same syllable of the stem in all moods; on the radical syllable in verbs of the first and fourth classes; e. g. bháva-ti from bhū- 'be', náh-ya-ti from nah- 'bind'; on the thematic -a in the sixth class; e. g. tudá-ti from tud- 'strike'.
- 2. In the second or graded conjugation, the singular indicative active, the whole of the subjunctive, and the 3. sing. imperative active 2 accent the stem, while all other forms accent the endings 3. In the strong forms the radical syllable is accented in the second class; generally the reduplicative syllable, but sometimes the root, in the third class; the suffix in the fifth, eighth, seventh, and ninth; e. g. 3. sing. ind. ás-ti, subj. ás-a-t, impv. ás-tu, from as-'be', 2nd cl.; 3. sing. ind. bi-bhar-ti from bhr-'bear', 3rd cl.; 3. sing. ind. kr-nú-ti, subj. kr-núv-a-t, 2. pl. impv. kr-nú-ta, and kr-nú-tana from kr-'make', 5th cl.; 3. sing. subj. man-áv-a-te from man-'think', 8th cl.; 1. sing. ind. yu-ná-j-mi, 3. sing. subj. yu-ná-j-a-t from yuj-'join', 7th cl.; 3. sing. ind. grbh-ná-ti, 2. sing. subj. grbh-ná-s from grabh-'seize', 9th cl.; but 2. sing. impv. ad-dhi, 3. pl. opt. ad-yir from ad-'eat', 2nd cl.; 1. pl. ind. bi-bhr-mási; 1. sing. ind. mid. kr-nv-i, 2. sing. impv. kr-nu-hi; 1. pl. opt. van-u-yáma, 3. pl. impv. van-v-ántu from van-'win', 8th cl.; 3. sing. mid. yunk-té, 2. sing. impv. mid. yunk-svá; 1. pl. ind. gr-nī-mási, 2. sing. impv. gy-nī-hi from gy-'praise', 9th cl.
- a. Irregularities. In the second or root class, several verbs accent the radical syllable throughout 4: \$\siz\$- 'lie' does so besides taking Guṇa; e. g. 1. sing. \$\sigmay.e^2, 2. sing. \$\siz\*-\sigma \text{etc.}5\$ Occasional accentuation of the root in weak forms appears in 2. sing. impv. \$\sigmai^2+\sigma \text{etc.}5\$ (\$\sigma \sigma n \text{oth} \sigma \text{oth} \sigma n \text{oth} \text{oth} \text{oth} \sigma n \text{oth} \text{o

Tof the sis-aorist no accented forms occur.
The 2. pl. impv. active often accents

the stem, which is then strong, as *i-ta*, *i-tana* from *i-'go'*; this is sometimes also the case with the 2. du. in *-tana*.

<sup>3</sup> The final syllable of the ending of the 3. pl. middle is regularly accented in several verbs, as *ri-hati*, *duh-ati*; see WHITNEY 613, 685, 699; DELBRÜCK, Verbum 73.

<sup>4</sup> These are ās- 'sit', ūd- 'praise', īr- 'set in motion', īś- 'rule', cakṣ- 'see', takṣ- 'fashion', trā- 'protect', niṃṣ- 'kiss', vas- 'clothe', sū-bring forth'.

<sup>5</sup> See WHITNEY 628 and 629.

<sup>6</sup> Op. cit. 631 a.

<sup>7</sup> Op. cit. 630.

r- 'go', 2. sing. mid. dhát-se from dhā- 'put', and bi-bhár-ti (RVI. AV2.) beside the usual bi-bhar-ti. Both types, when the ending begins with a vowel, throw the accent back on the reduplicative syllable; c. g. 3. pl. júhv-ati and bibhr-ati, but 2. pl. juhu-thá and bibhrthat. The subjunctive here, as usual, follows the accentuation of the strong indicative; its stem from the same two roots would be juháv-a- and bibhar-a-. In the optative middle the accent is thrown back on the reduplicative syllable because the modal affix begins with a vowel; e.g. I. sing. dádh-īya etc. beside 1. sing. act. dadh-yam etc. The RV., however, once has dadhī-tā beside dādhī-ta (3 times). In the imperative, endings with initial consonant are accented in the weak forms, otherwise the reduplicative syllable; e. g. 2. sing. de-hi, 2. du. dat-tám, but 3. mid. pl. jihatām. The strong 3. sing. impv. act. follows the strong ind., e. g. dádhātu, pipartu; the 2. pl. is often strong; e. g. juhóta, dádhāta. The participle regularly accents the reduplicative syllable; e.g. juhv-at, juhvāna, except only pipāná- (pā- 'drink'). — In the seventh class the root hims- 'injure' (originally perhaps a desiderative of han- 'strike') accents the radical syllable in weak forms, as 3. sing. hims-te, pl. hims-anti, part. hims-ana-. — In the fifth and eighth classes the RV. has several instances of irregular accentuation of the final syllable in the 3. pl. mid.: kr-nv-até, vr-nv-até, spr-nv-até; tan-v-até, man-v-até. — In the ninth class the irregular accentuation of the 3. pl. mid. occurs in pu-n-a-te and ri-n-ate (ri- 'flow'). The ending -āna, which is here added in the 2. sing. impv. act. to a few roots with final consonant, is accented on the last syllable: grh-āná, badh-āná (AV.), stabh-āná (AV.).

98. The perfect. - The singular indicative active and the whole subjunctive<sup>2</sup> accent the radical syllable; all other forms of the indicative, as well as the whole imperative and optative accent the endings; e. g. ind. 3. sing. cakár-a, pl. cakr-úr, 1. pl. mid. cakr-múhe; subj. sing. 2. papráth-a-s, pipráy-a-s; 3. jabhár-a-t, pipráy-a-t, mumóc-a-t; dadhárṣ-a-ti, vavárt-a-ti; pl. 1. cākán-āma, śūśáv-āma, 3. papráth-a-n; opt. sing. 1. vavrt-yám, 2. śuśrū-yás, 3. tutuj-yát, du. 2. śuśrū-yātam; pl. 3. vavrj-yúr; mid. sing. 2. vāvrdh-ī-thás, 3. śiśrī-tá (śri-'resort'); impv. sing. 2. piprī-hi, mumug-dhi (V muc-), du. 2. jajas-tām; mid. sing. 2. dadhi-svá3. The participle, both active and middle, accents the suffix; e.g. cakr-váms-; cakr-āná-.

gg. The agrist.—The accentuation of the unaugmented forms of the indicative has already been stated (96). With regard to that of the moods,

the following notes may be added.

1. The root agrist accents the radical syllable in the subjunctive; e. g. sing. 2. kár-a-s, 3. kár-a-t, du. 3. śráv-a-tas, pl. 3. gám-a-nti, mid. sing. 3. bhója-te; in the injunctive, the radical syllable in the singular, but the ending elsewhere; e. g. sing. 1. nám-s-i, pl. 3. dabh-úr, mid. sing. 2. mṛ-thās; in the optative, the endings throughout; e. g. act. sing. 1. as-yām, 2. bhū-yās, mid. pl. 1. as-īmāhi; in the imperative, the root in the 3. sing. act., but the ending elsewhere; e. g. sing. 3. śró-tu, but 2. kṛ-dhi, du. 2. ga-tám, pl. 2. bhū-tá<sup>4</sup>, mid. sing. 2. kr-svá; in the participle, the suffix is accented in the active, e.g. bhid-ánt-, and generally in the middle, e. g. budh-āná-, but in several instances the root; e. g. dyút-āna-.

2. In the  $\alpha$ -aorist the accentuation follows that of the unaugmented indicative; thus the subjunctive sing. 3. vidāt; the injunctive sing. 1. darsa-m ruhá-m, 3. rúha-t, vidá-t, sána-t, pl. 3. vidá-nta; optative, sing. 1. vidéyam, sanéyam, pl. 1. śakéma, sanéma and sánema; the imperative, sing. 2. sána, sára, du. 2. ruhá-tam, sáda-tam, pl. 2. khyá-ta. The participle usually accents the thematic -a, but sometimes the root; e. g. trpá-nt-, but sáda-nt-; guhámāna-, but dása-māna-.

<sup>&</sup>lt;sup>1</sup> Cp. Whitney 645 a, 668 a, 669. the reduplicative syllable is almost always môc-a-ta, mid. sing. 2. pipráy-a-sva accented; e. g. jújosasi; some others, which the root, also accent the reduplicative perative. syllable, as dádhrsanta; see below 490.

<sup>3</sup> A few forms accent and strengthen the When the primary endings are added, radical syllable, du. 2. mumóc-a-tam, pl. 2. mu-

<sup>4</sup> But the root is strong and accented in take secondary endings, but do not strengthen several forms, kár-ta etc., of the 2. pl. im-

- 3. In the reduplicated aorist the only accented form in the subjunctive seems to be *vócati*; in the injunctive, either the reduplicative syllable or the root is accented; e. g. sing. 2. nínas-as, sisráthas, 3. píparat and pīpárat; in the optative, the thematic vowel or the ending; e. g. pl. 1. vocémá, cucyuv-ī-máhi; in the imperative, the thematic vowel or the ending; e. g. du. 2. jigy-tám, pl. jigr-tá, suṣūdá-ta (AV.).
- 4. The s-aorist accents the root in the subjunctive; e. g. ddr-s-a-t (dr-'split'), ydk-s-a-t (yaj-'sacrifice'), du. 2. pdr-s-a-thas (pr-'take across'); the root in the injunctive as far as can be judged from the extremely few accented forms, as mid. sing. 1. vdm-s-i (van-'win'); the ending in the optative, as mid. sing. 1. bhak-s- $\bar{r}$ -yd (Vbhaj-), pl. dhuk-s- $\bar{r}$ -mdhi (duh-'milk'); in the imperative no accented forms occur; the participle accents the root in the active, as ddk-s-ant-(dah-'burn'), but in the irregularly formed middle nearly always the suffix, as arc-a-s- $\bar{a}nd$ -, but bh-a-s- $\bar{a}na$  (527).
- 5. The *iṣ*-aorist accents the root in the subjunctive; e. g. sing. 3. bódh-iṣ-a-t; the root in the injunctive, e. g. sing. 2. máth-īṣ, but once the ending in pl. 3. tār-iṣ-úr (AV.); the ending in the optative; e. g. sing. 1. edh-iṣ-īyá (AV.); the ending in the imperative; e. g. sing. 2. av-iḍ-ḍhi, du. 2. av-iṣ-ṭám.

6. In the sis-aorist no accented forms occur except one in the imperative,

where the ending has the acute, du. 2. yā-siṣ-ṭúm.

7. The sa-aorist accents that syllable in the injunctive, as pl. 3. dhuk-sa-nta (but once sing. 3. dhuk-sa-ta), and in the imperative, as sing. 2. dhuk-sa-sva (Vduh-). No subjunctive or optative forms occur.

- 100. The future.—The accent in all forms of this tense remains on the suffix  $-sy\acute{a}$  or  $-i-sy\acute{a}$ ; e. g. sing. 3.  $e-sy\acute{a}-ti$  (AV.) 'he will go' (Vi-); sing. 1.  $stav-i-sy\acute{a}mi$  'I shall praise' (Vstu-), 3.  $kar-i-sy\acute{a}ti$  'he will do' (Vkr-); participle  $kar-i-sy\acute{a}nt$  'about to do'.
- 101. Secondary conjugations. All these, except the active form of the intensive, accent the same syllable of the stem throughout. They are the causative, the denominative, the passive, the secondary form of the intensive, and the desiderative, the stem of all of which ends in -a. The causative accents the penultimate syllable of the stem; e.g. krodh-áya-'enrage'.—The passive, the secondary form of the intensive, and the denominative, accent the suffix -yá; e. g. pan-yá-te 'is admired'; rerih-yá-te 'licks repeatedly'; gopā-yánti 'they protect'. A certain number of unmistakable denominatives, however, have the causative accent; e.g. mantrá-ya-te 'takes counsel'.—The desiderative accents the reduplicative syllable; e.g. piprīsa-ti.—The primary form of the intensive agrees in accentuation with the third or reduplicating class of verbs, that is, it accents the reduplicative syllable in the strong forms, but the endings with initial consonant in the weak forms of the indicative active; e. g. sing. 3. jóhav-ī-ti, du. 3. jar-bhr-tás, pl. 3. vár-vrt-ati. In the middle indicative, however, the reduplicative syllable is more often accented than not; e. g. té-tik-te and nenik-té. In the subjunctive the reduplicative syllable is regularly accented; e. g. sing. 3. jánghan-a-t, but once the root in sing. 1. janghán-āni; mid. pl. 3. jánghan-anta, but once the ending in du. 3. tantas-áite. No accented form of the optative occurs. In the imperative the ending is accented; e. g. sing. 2. jāgr-hi, car-kṛ-tắt. In the participle, both active and middle, the reduplicative syllable is regularly accented; e. g. cékit-at-, cékit-ana-; there are, however, two exceptions in the middle: badbadh-āná- and marmrj-āná- (548a).

I Once the root is accented in the irregular participles irregularly formed with -māna. form du. 2. trā-s-ī-thām. hā-s-a-māna- and dhī-s-a-māna-.

<sup>&</sup>lt;sup>2</sup> The root is accented in two middle

### 5. Accent of nominal verb forms.

- 102. The accentuation of participles formed from tense and conjugation stems has already been stated. When these are compounded with prepositions, they retain their accents; thus the present and perfect participles of apa-gám-'go away' would be apa-gácchant-, apa-gácchamāna-; apa-jaganvāṃs-, apa-jagmāná-. The preposition is, however, not infrequently found separated from the participle by another word or is placed after it, when it is treated as independent and accented, e. g. prá śmáśru dódhuvat (x. 23¹) 'shaking his beard'; ápa dṛļhāni dárdrat (vi. 17⁵) 'bursting strongholds asunder'; á ca párā ca pathibhis cárantam (i. 164³¹) 'wandering hither and thither on (his) paths', mádhu bibhrata úpa (i. 166²) 'bringing sweetness near'; tanvánta á rájah (iv. 45²) 'extending through the air'. The preposition is occasionally found independently accented immediately before the participle, as abhi dákṣat (ii. 4¹) 'burning around'; vi vidvān (i. 189¹) 'distinguishing' (probably in distinction from vividván, perfect participle of vid- 'find').
- a. When there are two prepositions, either both are compounded and unaccented, as vi-pra-yánta/: (IX. 22<sup>5</sup>) 'advancing', pary-ā-vivṛtsan (VII. 63<sup>2</sup>) 'turning round'; or one is compounded and the other independent and accented, as abhi ā-cárantī/: (VIII. 96<sup>15</sup>) 'approaching'; ava-sṛjánn lipa tinánī (I. 142<sup>11</sup>) 'bestowing indeed'; prá vayám uj-jihānā/! (V. I<sup>1</sup>) 'flying up to a branch'.
- b. Participles in -tar generally accent the root, as kár-tar 'making', but when compounded the suffix. But nl-cetar- 'observing' occurs beside ni-cetár- 'observer'.
- 103. The past passive participle regularly accents the suffix; e. g. ga-tá- 'gone', pat-i-tá- (AV.) 'fallen', chin-ná- 'cut off' (γchid-). But when this participle is compounded with prepositions, the latter are as a rule accented. In several instances, however, the accent of the simple participle is retained, as apa-krī-tá- (AV.) 'bought', ni-ci-tá- 'seen', niṣ-kṛ-tá- 'prepared', niṣ-ṣat-tá- 'seated', ni-vā-tá- (AV.) 'uninjured', pra-jah-i-tá- 'given up' (from jah-, a secondary form of hā- 'leave'), pra-śat-tá- 'celebrated', saṃ-skṛ-tá- 'prepared' (beside sáṃ-skṛ-ta-), saṃ-hi-tá- (VS.) 'variegated' '. The preposition may be separated from the participle by another word, as pári soma siktáḥ (IX. 97¹5) 'poured, O Soma, around'. When there are two prepositions, the first remains unaccented, as apā-vṛktāḥ (VIII. 80²) 'removed' (apa-ā-), sam-ā-kṛ-tam (X. 84²) 'accumulated'; or it may be separated and independently accented, as prá yát samudrá ā-hitaḥ (IX. 64¹9) 'when despatched forth to the ocean'; pári góbhir ā-vṛtam (IX. 86²) 'encompassed round by streams of milk'.
- 104. Of the gerundives, those in -ya (or -t-ya) and -tva accent the root; e. g. cákṣ-ya- 'to be seen', śrń-t-ya- 'to be heard', car-kṛ-t-ya- 'to be praised', vák-tva- 'to be said'; those in -āyya, -enya, -anīya (AV.) accent the penultimate; e. g. pan-āyya- 'to be admired', īkṣ-cṇya- 'worthy to be seen', while those in -tavya accent the final syllable, as jan-i-tavyà- (AV.) 'to be born'. When compounded with prepositions3, gerundives nearly always leave the accent unchanged; e. g. pari-cákṣ-ya- 'to be despised'; with Svarita on the final syllable in the RV. only ā-kāy-yà- 'desirable' and upa-vāk-yà-

I Such compounds are also thus accented when turned into substantives, as nix-two examples of each occur (581 a, b).

ky-tii- n. 'rendezvous', upa-stutá-, N. of a man.

3 The preposition is here always inseparable.

<sup>&</sup>lt;sup>2</sup> The gerundives in -aniva and -tavya

'to be addressed'; abhy-ā-yaṃs-énya- 'allowing oneself to be drawn near'; ā-mantr-aniva- (AV.) 'to be addressed'.

- 105. Infinitives are as a rule accented like ordinary nominal cases formed from the same stems.
- a. The dative infinitive from root stems accents the ending: e. g. drś-ć 'to see', but when compounded, the root; e.g. sam-ldh-e'to kindle', abhi-pracákṣ-e (1. 1136) 'to see'. Those formed from stems in -as generally accent that suffix, but sometimes the radical syllable; e. g. car-ás-e 'to fare', but cúks-as-c 'to see'. Those formed from stems in -i and -ti accent the suffix; e. g. drś-áy-e 'to see', pī-táy-e 'to drink'. Those from stems in -tu accent the root, as bhir-tav-e; also those from stems in -tav.7, but with a secondary accent on the final syllable, as gán-tavái. When these two forms are compounded with prepositions, the latter are accented; e. g. prú-vantave<sup>1</sup> 'to win', ápa-bhartavái 'to be taken away', the latter retaining its final accent as well. When there are two prepositions, the first may be independent and accented as well; e. g. ví prá-sartave (VIII. 6712) 'to spread'. Infinitives formed with -dhvai generally accent the preceding a of the verbal stem, but sometimes the root; e.g. iyá-dhyai 'to go', but gáma-dhyai 'to go'. Those formed from stems in -man accent the root; e. g. dá-man-e 'to give', except vid-mán-e 'to know'; from stems in -van there are da-van-e 'to give', tur-van-e 'to excel', but dhur-van-e 'to injure'  $(Vdhvr-)^2$ .

b. The accusative infinitive if formed from a radical stem accents the root even when compounded with a preposition; e. g. subh-am 'to shine', a-sád-am 'to sit down'; if formed from a stem in -tu, it accents the root in a simple stem, but the preposition in a compounded stem; e. g. di-tum 'to give', prá-bhar-tum 'to present', ánu prá-volhum 'to advance'3.

c. The ablative-genitive infinitive, if formed from radical stems, which here occur only in combination with prepositions, accents the root; e.g. avap.id-as '(from) falling down'; if formed from a stem in -tu, the root in a simple stem, but the preposition in a compound stem; e. g. gán-tos 'going', ni-dhā-tos 'putting down'.

d. The locative infinitive if formed from radical stems accents the ending in the simple form, but the root in the compounded form; e. g. budh-/ 'at the waking', but sam-dis-i 'on seeing'. The one locative infinitive formed from a stem in -tar, and those from stems in -san accent the suffix; e. g. dhar-tár-i 'to bestow', nc-sán-i 'to lead'.

106. Uncompounded gerunds formed with -tvī, -tvā, tvāya accent the suffix, while the compounded gerunds; formed with  $-y\tilde{a}$  or  $-ty\tilde{a}$  accent the root; e. g. ga-tvt 'having gone', bhū-tvt 'having become', ga-tvt 'ya 'having gone'; sam-grbh-vā 'gathering', upa-śrú-tya (AV.) 'having overheard'.

107. Case-forms used as adverbs frequently show a shift of accent. This appears oftenest in the accusative neuter. Thus drav-át 'quickly', but dráv-ant- 'running', probably also drah-yát 5 'stoutly'; aparám 'later', but áparam as neuter adjective; ā-vyuṣ-ám (AV.) 'till dawn'6; and the adverbs in -vát, as angiras-vát 'like Angiras', manus-vát 'as Manus did', purāna-vát,

I The infinitive from stems in -tu in all first is independent and therefore also accented.

its cases accents the preposition; e. g. sámhartum 'to collect', ápi-dhātave 'to cover up', áva-gantos 'of descending'.

<sup>&</sup>lt;sup>2</sup> A preposition is occasionally uncompounded with or separated from the infinitive, irregular present participle of drh- 'be firm'. when both are accented, as prá dāváne (IV. 32°; v.653); prá dāšúṣe dắtave (IV. 2011).

<sup>3</sup> When there are two prepositions, the

<sup>4</sup> The preposition is here always inseparable.

<sup>5</sup> Which seems to be formed from an

pūrva-vát, pratna-vát 'as of old', which are accusative neuters of the adjective suffix -vant¹ (unaccented); and some adverbs from the comparative in -tara, ut-tarám (AV.) 'higher', but út-tara- as adjective; similarly ava-tarám, parastarám and parā-tarám 'farther away', vi-tarám 'more widely'² saṃ-tarám (AV.) 'still farther'. Similarly the instrumental d'vā 'by day', but divá 'through heaven'; and the dative aparáya 'for the future', but áparāya 'to the later'; and the ablatives apākát 'from afar' (ápāka- 'far'), amát 'from near' (áma- AV. 'this'), sanát 'from of old' (sána- 'old')³.

### 6. Accent in Sandhi.

ro8. r. When two vowels combine so as to form a long vowel or diphthong, the latter has the Udātta if either or both of the original vowels had it<sup>4</sup>; e. g. nudasvātha for nudasva átha; távét for táva /t; kvét for kvà /t<sup>5</sup>; ágāt for á agāt; pitéva for pitá iva, śató for śatá u; nántaras (VI. 63²) for ná ántaras.

The contraction of l+i is, however, accented  $\tilde{l}$ , 6 the (dependent) Svarita having here (in l) ousted the preceding Udāttal; e. g.  $div\tilde{l}va$  (RV. AV.) for divl lva. This is the *praslista*, 'contracted', Svarita of the Prātiśākhyas<sup>8</sup>.

2. When  $\tilde{i}$  and  $\tilde{u}$  with Udatta are changend to y and v, a following

unaccented vowel receives the Svarita; e. g. vy anat for vi anat.

The uncontracted form with Udātta must, however, almost invariably be read in the RV. This is the kṣaipra<sup>9</sup> Svarita of the Prātiśākhyas<sup>8</sup>. Here the enclitic Svarita assumes the appearance of an independent accent.

3. When  $\acute{a}$  is elided, it throws back its Udātta on unaccented e or o; e. g.  $s\bar{u}n\acute{a}v\acute{e}$  'gne for  $s\bar{u}n\acute{a}ve$  ágne;  $v\acute{o}$  'vasaḥ for vo ávasaḥ. But when unaccented a is elided, it changes a preceding Udātta to Svarita; e. g.  $s\grave{o}$  'dhamáḥ for  $s\acute{o}$  adhamáḥ. This is the abhinihita Svarita of the Prātiśākhyas 8. Here also the enclitic Svarita (in  $\acute{o}$   $\grave{a}$ ) has ousted the preceding Udātta (as in  $div\bar{v}va$ ) 10.

# 7. The Sentence Accent.

HASKELL, Vocative-Accent in the Veda, JAOS. 11, 57. — BÖHTLINGK, ein erster Versuch über den Accent im Sanskrit (Mémoires de l'Académie imp. de St. Pétersbourg 1843) p. 38 ff. — WHITNEY, JAOS. 5, 193 ff., 387 ff. — AUREL MAYR, Beiträge aus dem Rigveda zur Accentuirung des verbum finitum (Sitzungsberichte der phil.-hist. Classe der kaiserlichen Akademie der Wissenschaften, Wien 1871, p. 219 ff.). — Weber, IS. 13, 70ff. — BÖHTLINGK, Sanskrit-Chrestomathie² p. 356. — WHITNEY, Sanskrit Grammar 591 ff. — Delbrück, Altindische Syntax (Halle 1888) 21—29. — Oldenberg, Die Verbalenklisis im Rgveda, ZDMG. 60, 707—740.

rog. The vocative.—a. The vocative, which whether it consist of a single word or a compound expression, is invariably accented on the first syllable, retains its accent only at the beginning of a sentence or Pāda II;

<sup>&</sup>lt;sup>1</sup> Cp. WHITNEY 1107 a.

<sup>&</sup>lt;sup>2</sup> See op. cit. 1119.

<sup>3</sup> Cp. op. cit. 1114 a.

<sup>4</sup> Cp. Benfey, Vollständige Grammatik 64.

<sup>5</sup> But when a Svarita is followed by an unaccented syllable, it of course remains; e. g. knivatha for kni ivatha (VIII. 17).

e. g. kvèyatha for kvà iyatha (VIII. 17).

6 Except in the Taittiriya texts which follow the general rule (diving)

follow the general rule (diviva),
7 This also takes place in sūdgūtā (TS.)
for sú-udgūtā 'a good Udgātṛ' (TS. vii. I.
81: B.).

<sup>8</sup> Cp. HAUG 75.

<sup>9</sup> So called because 'uttered with a quick' (kṣipra-) pronunciation, the semivowel replacing the vowel.

<sup>&</sup>lt;sup>10</sup> Cp. Wackernagel 1, 251, b  $\alpha$ ; Brugmann, KG. 45, 2.

It This applies to the second as well as the first Pāda of a hemistich (as some of the above examples show), thus indicating the independent character of these Pādas, which is obscured by the way in which the redactors of the Samhitās apply the rules of Sandhi and mark the dependent Svarita.

that is to say, when, having the full force of the case, it occupies the most emphatic position; e. g. ágne sūpāyani bhava (1. 19b) 'O Agni, be easy of access'; úrjo napāt sahasāvan (x. 1158a) 'O mighty son of strength'; hótar vavistha sukrato (IV. 4<sup>II d</sup>) 'O most youthful, skilful priest'. This rule also applies to doubly accented dual compounds, as mitrāvaruna (1. 156b) 'O Mitra and Varuna' (N. mitrá-várunā).

- a. Two or more vocatives at the beginning of a Pada are all accented; e. g. ádite, mitra, váruna (II. 2714a); ürjo napūd, bhádrašoce (VIII. 713b) 'O son of strength, O propitiously bright one' 1.
- b. The vocative, when it does not begin the sentence, loses its accent, being unemphatic as referring only incidentally to a person already invoked; e. g. rtína mitrāvarunāv rtāvrdhāv rtaspršā (1. 28) 'through Law, O Mitra and Varuna, lovers and cherishers of Law'; upa tvā agne divi-dive, diṣā-vastar dhiyā vayám | ... émasi (1. 17) 'to thee, O Agni, day by day, O illuminer of darkness, with prayer we come';  $\tilde{a}$   $r\bar{a}j\bar{a}n\bar{a}^2$  maha rtasya gopā (VII. 642) 'hither (come), O ye two sovereign guardians of great order'; yád, indra brahmanas-pate, abhidrohám cárāmasi (x. 1644)3 'if, O Indra, O Brahmanaspati, we commit an offence'4.
- a. The vocative, whether at the beginning of or within a sentence, not being regarded as part of it, does not interfere with the normal accentuation of the sentence. Hence a verb 'at the beginning of a sentence, following a vocative, is accented as the first word of the sentence; while a verb within a sentence, following a vocative, remains unaccented; e. g. dévā, jīvata (AV. XIX. 701) 'O gods, live'; asmé ū sú, vṛṣaṇā, mādayethām (1. 1842) 'beside us, ye two heroes, enjoy yourselves'.
- 110. The verb.—A. The finite verb in a principal sentence is unaccented except when it is the first word; e. g. agnim Ile purihitam (I. II) 'I praise Agni, the domestic priest'; but ile agnim vipascitam (III. 272) 'I praise Agni the wise'. This rule and its exception must, however, be understood with the following restrictions:
- I. A sentence is regarded as capable of having only one verb. Hence all other verbs syntactically connected with the subject of the first, are accented as beginning new sentences (a subject or object coming between two such verbs being generally counted to the first); e. g. tesām pāhi, śrudhi hávam (I. 21) 'drink of them, hear our call'; asmábhyam jest vátsi ca (I. 1324) 'conquer and fight for us'; taránir íj jayati, kséti, phsyati (VII. 329) 'the energetic man conquers, rules, thrives'; jahí prajám náyasva ca (AV. I. 83) 'slay the progeny and bring (it) hither'.
- 2. The verb, though not beginning a sentence, receives the accent if it coincides with the beginning of a Pada (which is treated as the beginning of a new sentence); e. g. átha te ántamānām | vidyáma sumatīnám (1. 43).
- 3. Since a vocative (or vocatives) at the beginning of a sentence is treated as extraneous to it, the verb which immediately follows it becomes the first word of the sentence and is accordingly accented; e. g. ágne, jusásva

Here bhádrasoce is treated as an in-vocatives. The preceding example may dependent vocative; it would lose its accent contain two also, as the accent of two as if intended to form a compound expression well as of one vocative would be lost within with  $\pi r j \sigma$  napāt = 'O propitously bright son a Pāda; but if  $r \bar{a} j \bar{a} n \bar{a}$  stood at the beginning of a Pāda, the accentuation would be rājānā máha rtasya gopā, supposing two vocatives were intended.

4 The very rare exceptions to the rules given above (a, b) are doubtless due to devāsah 'O All-gods', would appear within a errors on the part of the editors or of tradition.

of strength', as is the case in hotar yavistha sukrato.

<sup>2</sup> When the first word of a compound vocative is an adjective (not a genitive), it retains its accent within a Pada; thus visue Pāda as well as at the beginning.

<sup>3</sup> This is an example of two distinct

no havih (III. 281) 'O Agni, enjoy our sacrifice'. Thus the following sentence of six words contains three accented verbs as well as three accented vocatives: indra, jīva, sūrya, jīva, dēvā, jīvata (AV. XIX. 701) 'O Indra, live; O Sūrya, live; O gods, live'.

4. There are some instances in the RV. of the verb when emphatic, even though not placed at the beginning of the sentence, being accented before the particle id, and even before cand ; e. g. adha sma no maghavañ carkrtád (d (1. 1045) 'then be mindful of us, bounteous one'; ná, deviz,

bhasáthas caná (vi. 594) '(him) O gods, ye two never consume'2.

B. The accent always rests on the verb of a subordinate clause (which is almost invariably introduced by the relative ya- and its derivatives, or contains the particles ca and cld 'if', m'd 'lest', hl 'for', kuvid 'whether'); e. g. yán yajnám paribhír ási (1. 14) 'what offering thou protectest'; grhán gaccha grhapátnī váthā ásah (x. 8526) 'go to the house, that thou be lady of the house'; indras ca mṛliyāti no, ná nah paścád aghán naśat (II. 4111) 'if Indra be gracious to us, no hurt will thereafter reach us'; ví céd ucchánty, aśvinā, uṣáṣaḥ, prá vām bráhmāṇi kārávo bharante (VII. 72+) 'when the dawns shine forth, O Aśvins, the singers offer their prayers to you'; má cirám tanuthā ápah, nít tvā .. tápāti sáro arcisā (v. 799) 'do not long delay thy work, lest the sun burn thee with his beam'; triâm hi balada ási (III. 5318) 'for thou art a giver of strength'; tâm, indra, mádam á gahi, kuvín³ nv àsya trpnávah (III. 422) 'come to this gladdening drink, O Indra, (to see) whether thou mayst enjoy it'.

I. When the first of two clauses, though in form a principal one, is virtually subordinate in sense (being equivalent to one introduced by 'if' or 'when'), its verb is occassionally accented; e. g. sám ásvaparņās cáranti no náro, 'smákam, indra, rathíno jayantu (VI. 4731) 'when our men winged with steeds come together, may the car-fighters of our side, O Indra, win

the victory'.

2. Similarly, but much more frequently, the verb of the first of two clauses which are antithetical in sense, is accented4. The occurrence of correlative words like anyá-anyá, éka-éka, vā-vā, ca-ca, often makes the antithesis obvious; e. g. prá-pra anyc yánti, páry anyá āsate (III. 93) '(while) some go on and on, others sit about'; sám ca idhásva agne, prá ca bodhaya enam (VS. XXVII. 2) 'both be kindled, O Agni, and waken this man's knowledge': id vā siñcádhvam úpa vā prnadhvam (VII. 16"1) 'either pour out or fill up'. If the verb of both clauses is the same, it usually appears (as is natural in the circumstances) in the first only; e. g. dvipác ca sárvam no ráksa, cátuspād yác ca nah svám (AV. vi. 1071) 'protect both every biped of ours and whatever quadruped is our own'.

3. The second clause, on the other hand, accents the verb if it contains an imperative (with a final sense), and follows a clause with an imperative of i-, gam- or  $y\bar{a}$ - 'go'; e. g. 'ta, dhiyan krnávāma (v. 45°) 'come, let us (= that we may) make prayer'; thyam a gahi, kanvesu saca piba (VIII. 43) 'come quickly, beside the Kanvas drink thy fill'.

III. Verbal prepositions.—A. The preposition, which generally precedes, but sometimes follows the verb, being often separated from it by other words,

<sup>1</sup> Cp. Delbrück 23, 3, 4; 26, 2; Whitney | the verb; cp. Grassmann, sub verbo; Del-

<sup>598</sup> a. In the SB. hánta regularly accents BRÜCK 550, end. the verb.

<sup>(</sup>v. 310, 363) in which kuvid does not accent

<sup>4</sup> This accentuation is more strictly applied <sup>2</sup> Cp. Grassmann, Wb. under id and cand. in B. than in V., and among the Samhitas <sup>3</sup> There are only two passages in the RV. least strictly in the RV.; cp. WHITNEY 597 a.

is regularly accented in principal sentences; e. g. a gamat (1. 15) 'may he come'; jáyema sám yudhí spṛdhah (1. 83) 'may we conquer our foes in fight'; gávām ápa vrajám vrdhi (1. 107) 'unclose the stable of the kine'; gámad vājebhir ā sá naḥ (1. 53) 'may he come to us with booty'.

a. When there are two prepositions, both are accented in the RV., being treated as separate words; e.g. úpa prá yāhi (1.826) 'come forth'; pári spáso ní sedire (1. 2513) the spies have sat down around'; úpa práyobhir á gatam (1. 24) 'come hither with refreshments'; ágne, vi pasya brhatá abhí rāyā

(III. 232) 'O Agni, look forth towards (us) with ample wealth'.

a. When  $\bar{a}$  immediately follows another preposition (unless it ends in  $\iota$ ), it alone is accented, both being compounded with the verb; e.g. upagahi (I. 9110) 'come hither'; samākrinosi jīvāse (x. 250) 'thou fittest (them) for living'. The general rule, however, is followed if the preposition preceding  $\bar{a}$  ends in i; e. g. praty  $\dot{a}$  tanusva (1v. 44) 'draw (thy bow) against (them)'<sup>2</sup>. In the only passage in which it has been noted in combination with another preposition preceding it, ava is treated like ā: upāvasrja (X. 11010) 'pour out' 3.

B. The preposition in subordinate clauses is generally compounded with the verb, when it is regularly unaccented; e. g. vád . . niṣtdathaḥ4 (VIII. 921) 'when ye two sit down'. It is, however, often separated from the verb, and is then accented as well as the verb. In this case it is commonly the first word of a Pāda, but occasionally comes after the verb; e. g. vi yó mamé rijasī (1. 1604) 'who measured out the two regions'; yás tastámbha sáhasā vi jmô ántān (IV. 501) 'who with might propped earth's ends asunder'. Occasionally the preposition is separate and accented even when immediately preceding the verb; e. g. yá áhutim pári védā námobhih (vi. 19) 'who fully knows the offering with devotion'.

a. When there are two prepositions, either both are unaccented and compounded with the verb, or the first only is separate and accented; e. g. yūyú: n hl, devīr, rtayi:gòhir ásvaih pariprayāthá (IV. 515) 'for ye, O goddesses, proceed around with steeds yoked by eternal order'; sám yám āyánti dhenávah (v. 62) 'to whom the cows come together', yátra abhi samnávāmahe (VIII. 695) 'where we to (him) together shout'. A very rare example of two independent prepositions in a dependent sentence is prû yát stotá ... úpa gīrbhír tite (III. 525) 'when the praiser pours forth laudation to (him) with songs'.

# IV. NOMINAL STEM FORMATION.

GRASSMANN, Wörterbuch zum Rig-veda 1687-1738 (list of nominal stems according to alphabetical order of the final letter). - LINDNER, Altindische Nominalbildung. Nach den Samhitas dargestellt. Jena 1878. — Whitney, Sanskrit Grammar 1136-1245; Roots, Verb-forms, and Primary Derivatives, 1885.

112. The bare root, both verbal and pronominal, is often used as a declinable stem. But much more generally the stem in declension is formed by means of suffixes. These are of two kinds: primary, or

There seems to be an exception in goes much further, apparently making accentuation of the second preposition the rule;

3 Cp. Delbrück p. 47, end.

átaš cid, indra, na úpá yāhi (VIII. 9210) 'thence, O Indra, come to us', but upa here coming cp. Delbrück p. 48. at the end of a Pada, is used adnominally with nah.

on the whole the same in the AV. (cp. astal. (VII. 1811), vy asthat (II. 47) as ni asīdat, WHITNEY, APr. 185 ff.) and the TS. (cp. ni astal., vi asthat. There are about thirty WEBER, IS. 13, 62 ff.); but the TS. treats instances of this; cp. WHITNEY 1084 a. some other prepositions like  $\bar{a}$ , and the MS.

ith null.

4 It is not clear why the Pada text analyses forms like ny asidat (1. 1431), ny

those that are added directly to roots; secondary, or those that are added to stems already derivative (pronominal stems being also accounted as such). The distinction between these two kinds is, however, not absolute. Suffixes containing a secondary element sometimes have the appearance and application of primary suffixes (as  $-an\bar{\imath}ya = -an\bar{\imath}ya$ ). Less frequently primary suffixes come to be used as secondary ones; thus the participial suffixes are added not only to the root, but also to primary and secondary conjugation stems as well as to tense stems. These nominal suffixes are sometimes added by means of what looks like and may conveniently be called a connecting vowel, though it may not be so in origin. Primary suffixes are also added to roots compounded with verbal prefixes.

## I. Primary Nominal Derivation.

113. As regards form, the root when used without suffix usually remains unchanged in respect to its vowel2; it is then, however, liable to modification in two ways: always adding the determinative -t if it ends in -i, u, or -t, and occasionally appearing in a reduplicated form. But before primary suffixes the root usually appears in a strong form: either with Guna of medial or final vowels, as véd-a- 'knowledge' from V vid-, sár-ana- 'running' from V sr-; or with Vrddhi of final -i, -u, -r and lengthening of medial a, as kar-a- 'making' from  $\sqrt{kr}$ ,  $gr\bar{a}bh$ -á- 'seizer', from  $\sqrt{grabh}$ -.

a. As regards meaning, there are two classes of primary derivatives: the one expressing abstract action nouns (with an infinitival character), the other concrete agent nouns (with a participial character) used as adjectives or substantives. Other senses are only modifications of these two; as that of the passive participle, which expresses an agent who becomes the recipient of an action. The primary suffixes forming action nouns can also nearly all be used to form agent nouns; and many of those properly forming agent nouns may also form action nouns. Those which properly form action nouns are: -a, -an, -ana, -anā, -anī, -anī, -as, -ā, -i, -is, -ī, -īka, -us, -tas, -ti, -tu, -tna, -tha, -thu, -nas, -ni, -nu, -pa, -ma, -man, -mi, -yu, -van, -sas. Those which properly form agent nouns are: -aka, -at or -ant, -ata, -anīya, -asi, -āku, -āna, -in, -iṣtha, -īyāms, -u, -uka, -ū, -ūka, -ka, -ta, -tar, -tnu, -tra, -tri, -tva, -thi, -na, -māna, -min, -ya, -ra, -ri, -ru, -la, -li, -lu, -va, -vana, -vani, -vanu, -vara, -vas, -vāms, -vi, -sa, -sani, -saru, -sna, -snu.

#### Root stems.

114. These stems are used both as action nouns (often in the function of infinitives) and as agent nouns, either substantives or adjectives.

I. Examples of the simple root form are: dyút- f. 'splendour', n/t- (AV.) f. 'gesticulation', bildh- f. 'awaking';  $d\hat{a}$ - 'giver', bhid- f. 'destroyer', yij- m. 'companion', spás- m. 'spy'; máh- 'great', vị dh- 'strengthening'.—2. With root determinative -t: mi-t- f. 'pillar', stil-t- f. 'praise'.—3. With reduplicated root: cikít- 'wise' (cit- 'observe'), juhú- f. 'sacrificial spoon' (hu- 'offer'), juhú- 'tongue' ( $\hbar \bar{u}$ - 'call'),  $dad\dot{r}h$ -3 'hearty' (drh- 'be firm'),  $didy\dot{v}$ - m. 'missile',  $didy\dot{v}$ -t- f. 'missile', 'lightning', sasyad-f. 'running stream' (syand-'run') 4 and with intensive

Those chiefly thus used are approximately in the order of their frequency: -a, form, in which it is usually stated. -ana, -ti, -tar and -tra, -in, -ya, -van and 3 In dadhrk adv. 'heartily'. -man, -i, -u, -as; cp. Whitney 1141 c.

<sup>2</sup> That is, the root appears in the weak

<sup>4</sup> Perhaps also gángā- f. 'Ganges' if

reduplication: júgū- 'singing aloud' (gu- 'sound'), pra-nenī- 'guiding constantly' (nī- 'lead'), yaviyidh- 'warlike' (yudh- 'fight'), vánīvan- 'desiring', a-sūsū- (AV.) 'barren' ('not bringing forth'). dáridra- (VS.) 'roving' (drā- 'run') is a transfer to the radical a-stems.

### -α: action and agent.

115. A vast number of derivatives is formed with this suffix, before which the root is generally strengthened, but sometimes remains unchanged or is reduplicated. Those formed with Guna are more than twice as numerous as all the rest taken together. Medial a generally remains unchanged.

I. Examples of derivatives with Guna are the following action nouns: úy-α- m. 'course' (i- 'go') háv-α- m. 'invocation' (hū- 'call'), tár-α- m. 'crossing' (tṛ- 'cross'); véd-a- 'knowledge' (vid- 'know'), jóṣ-a- 'enjoyment' (juṣ- 'enjoy'), sárg-a- 'emission' (srj- 'send forth'); agent nouns: plav-á- m. 'boat' (plu- 'float'), megh-á-m. 'cloud' (mih- 'discharge water'), cod-á- 'instigator' (cud- 'incite'). With medial a: grábh-a- m. 'seizure' (grabh- 'seize'), śrám-a- m. 'weariness' (śram-'be weary').

a. In several words thus formed the meaning varies according as the root is accented or the suffix, the word in the former case being nearly always an abstract substantive, in the latter regularly an adjective or an agent noun; thus árdh-a-m. 'side', ardh-á- 'half'; és-a- m. 'speed', es-á- 'speeding'; cód-a- m. 'goad', cod-á- m. 'instigator'; vár-am. 'choice', var-á- m. ('chooser') 'suitor', sas-a- m. 'command', sas-á- m. 'commander', śók-a- m. 'glow', śok-á- (AV.) 'glowing'.

2. Vrddhi of final vowels and lengthening of  $a^2$ : action nouns are  $d\bar{a}v$ -d- (AV.) 'fire' (du- 'burn'),  $t\bar{a}r$ -d- (VS.) 'crossing' ( $t\bar{r}$ - 'cross'),  $bh\bar{a}g$ -d-'share' (bhaj- 'divide'); agent nouns are nāy-á- 'leader' (nī- 'lead'), jār-á- 'lover', grābh-á- 'seizer'.

3. Several derivatives are formed from the weak form of the root, the suffix being accented3; thus priy-á- 'dear' (prī- 'please'), sruv-á- m. 'spoon' (sru-'flow'), vr-á-4 m. 'troop' (vr-'surround'), tur-á-'rapid' (tr-'cross'); yug-á-n. 'yoke', śuc-á- 'bright', kṛś-á- 'lean' 5.

a. Several derivatives of this type, which occur almost exclusively at the end of compounds, are made from various tense stems; e. g. -ā-saj-a- 'stopping', -tud-ā- (AV.) 'impelling', -pas-ya- 'seeing', -inv-ā- 'urging', -pr-nā- 'bestowing', -indh-ā- 'kindling', -bruv-ā- (AV.) 'saying', -pib-ā- (AV.) 'drinking', -ej-ayā- 'exciting' 6; je-s-ā- m. 'attainment' (aor. stem of ji- 'conquer'), nesá- m. 'guidance' (aor. stem of ni- 'lead').

4. A considerable number of derivates are formed from the reduplicated root; thus cacar-á- 'movable', dadhṛṣ-á- 'bold', vavr-á- m. 'hiding' (vṛ- 'cover), śiśay-á- 'strengthening' (śi- 'sharpen'), śiśnáth-a- 'perforation' (śnath- 'pierce'), sasr-á- 'flowing' (Vsr-). They are more usually formed directly from the intensive stem or from stems analogously reduplicated; e. g. cāksm-á-'gracious' (kṣam- 'forbear'), rerih-á- (AV.) 'continually licking' (rih- 'lick), -rorud-á- (AV.) 'shedding tears' (rud- 'weep'), vevij-á 'quick' (vij- 'dart'); carā-car-á 'farextending', calā-cal-á- 'unsteady', pani-spad-á- (AV.) 'palpitating' (V spand-), marī-mṛṣ-á- (AV.) 'groping' (mṛṣ- 'feel'), mali-mluc-á- (AV.) 'moving about in

'grow'.

from  $g\bar{a}$ - 'go'; sisu- m. 'child', if from  $s\bar{u}$ - | on the root as differentiated from  $k\bar{a}m$ -á- 'desiring'; similarly śāk-a- 'help' and śāk-á- 'help-

3 See LINDNER p. 33.

4 According to Grassmann, f. vrā-.

i jágat- 'going', 'living', is an old participle present of the reduplicated stem of 3 gā- 'go'; WHITNEY, however, thinks (1147 e) that it is made from the reduplicated form iaga- (= ja-gam-) with the root determinative .t.

<sup>2</sup> In these words the suffix is almost invariably accented; kām-a-'desire' is accented | 272.

<sup>5</sup> Some of the derivatives of this type are transitions from the root stems to the a-declension, especially at the end of compounds.

<sup>6</sup> See below, Determinative Compounds,

the dark', a kind of demon (mluc- 'set', of the sun), varī-vṛt-ú- (AV.) 'rolling' (vṛt- 'turn'), sani-sṛad-á- (AV.) 'running' (V syand-), sani-sṛas-ú- (AV.) 'decrepit' (sṛaṇs- 'fall'), sarī-sṛp-á- 'crawling' (V sṛp-).

a. The suffix -a is by far the most frequent one used in forming derivatives from the root with a verbal prefix, being nearly always accented whether the noun expresses an action or an agent; e.g. ami-kar-á- (AV.) 'assistance', abhi-droh-á- 'enmity', ud-ān-á- (VS.) m. 'breathing upwards', ni-mes-á- (VS.) 'wink', praty-ā-śrāv-á- 'response', sam-gam-á- 'assembly'; ati-yāj-á- 'sacrificing excessively', 'over-pious'. adhi-carihram-á- (AV.) 'climbing over', ā-dardir-á- 'crushing', ut-tud-á- (AV.) 'rousing', pari-car-á- (AV. VS.) 'wandering', vi-bodh-á- 'wakeful', sam-gir-á- (AV.) 'swallowing', sam-jay-á- 'victorious' 1.

b. There are many words which have the appearance of ending in this suffix, though the root cannot be found elsewhere. They include several nouns of plants and animals. Examples are ukhú-2 (AV.) 'caldron', krodá- (VS. AV.) 'breast', khilá- (AV.)

'waste land', nakhá- 'nail', paksá- 'wing', vamsá- 'reed' 3.

### $-\alpha$ - $k\alpha$ : agent.

added, is in a few words used as a primary suffix forming agent nouns only: abhi-króś-aka- (VS.) 'reviler', pśy-aka- (AV.) 'abuser', a class of demon, vádh-aka- (AV.), a kind of reed ('destructive'), sấy-aka- n. 'missile' (Vsi-); also pāv-aká- 'purifying', 'bright', which though always written thus is invariably to be pronounced pavāká-4.

### -ata: agent.

117. In a few adjectives the primary suffix -a with -ti added is attached to the strong form of the root, chiefly with the sense of the gerundive: dars'-atá-'visible', pac-atá-'cooked', bhar-atá-'to be tended', yaj-atá-'to be adored', raj-atá-5 'silvery', hary-atá-6 'desirable'.

## -at and -ant: agent.

rr8. The suffixes -at and -ant are almost restricted to the formation of active participles. The former appears chiefly in the formation of present participles of the reduplicating class, as did-at- 'giving'; also in dis-at- 'worshipping', sis-at- 'instructing', and the aorist participle diks-at- and dhiks-at- from dah- 'burn'. There are besides a few substantives originally participles, which have shifted their accent, formed with -at: vah-it- f. 'stream', vegh-it- (AV. VS.) f. 'barren cow', vāgh-it- m. 'sacrificer', srav-it- f. 'stream', sass-it- m. 'pursuer'?. The suffix -ant is used to form the active participle of present stems (excepting those of the reduplicating class), of future stems, and aorist stems. Some of these have become independent adjectives: rh-int- 'weak', pfs-ant- 'spotted', brh-int- 'great', mah-int-8 'great', rhs-ant- 'brilliant'; also the substantive d-int- m. 'tooth'9. dvay-ant- in ind-dvay-ant- (RV'.) 'not double-tongued' has the appearance of a participle of a denominative stem from dvi- 'two'. With the same suffix are formed the two pronominal stems l-y-ant- 'so great' ('making this', l-) and kl-y-ant- 'how great?' ('making what?' kl-).

# an-: action and agent.

119. Few words are formed with this suffix, and in some of them the root is doubtful.

<sup>&</sup>lt;sup>1</sup> Cp. Lindner p. 35.

<sup>2</sup> Also in ukha-cchid- (RV1.) 'fragile as a of hári- 'bright'.

pot', f. ukhá-.

<sup>3</sup> Cp. LINDNER p. 33, bottom.

<sup>4 -</sup>āka- also appears in the Proper Name nabh-āka-.

<sup>5</sup> Probably from the root raj- 'colour'.

<sup>6</sup> Formed from the denominative stem

<sup>7</sup> See below, Participial stems in at,

<sup>311</sup> A.

8 With lengthened vowel in the strong cases.

<sup>9</sup> See below, Participles in -ant, 313.

The only action nouns are the following neuters: mah-án-<sup>1</sup> 'greatness', rāj-án- (RVI.) 'guidance', gámbh-an- (VSI.) 'depth'. The infinitives in -ṣ-áṇ-i (588c) are, however, probably locatives of action nouns formed with -an from aorist stems.

Agent nouns are: ukṣ-án- m. 'ox', cákṣ-an- (AV.) n. 'eye', tákṣ-an- m. 'carpenter', pūṣ-án- m., N. of a god, plīh-án- (VS. AV.) m. 'spleen', majj-án- m. 'marrow', mūrdh-án- m. 'head', ráj-an- m. 'king', v/-y-an- adj. 'virile', m. 'bull', ságh-an- (TS. III. 2. 11) 'vulture'.

a. There are also several words formed with an the root and original meaning of which are mostly doubtful: I. yú-v-an- m. 'youth', yós-an- f. 'maiden', św-án- m. 'dog'; 2. defective neuter nouns; akṣ-án- 'eye', ás-an- 'blood', asth-án- 'bone', áh-an- 'day', āṣ-án-'face', ud-án-2 'water', ndh-an- udder', dadh-án- 'sour milk', dos-án- (AV.) 'arm', yak-án-'liver', sak-an- (AV. VS.) 'dung', sakth-an- 'thigh'; 3. stems occurring at the end of compounds only: -gm-an- and -jm-an- (also used independently) 'course', -div-an- 3 'playing'; -bhv-an-4 'being', -sv-an-5 'growing' (?)6.

### -ana: action and agent.

120. With the suffix -ana are formed a large number of derivatives with both types of meaning. The root generally shows Guna, sometimes Vrddhi, occasionally no change, rarely a weakened vowel. These derivatives very often appear with a preposition, such verbal compounds coming next in frequency to those formed with the suffix -a.

I. With Guna are formed neuter action nouns; e. g. kár-ana- 'deed', cáy-ana- (AV.) 'piling', dév-ana- 'play', bhúj-ana- 'enjoyment', várdh-ana- 'increase', véd-ana- 'possession', háv-ana- 'invocation', adhi-vi-kárt-ana- 'cutting off'; also agent nouns; e. g. the adjectives kar-auá- 'active', cét-ana- 'visible', cód-ana-(AV.)7 'impelling', vi-méc-ana- 'releasing'; from a duplicated (intensive) stem:

iāgar-aná- (VS.) 'waking' (Vgr-).

2. With Vrddhi<sup>8</sup> or lengthened medial a are formed neuter action nouns, sometimes with a concrete sense; e. g. ut-pár-ana- (AV.) 'transporting', upa-vās-ana- (AV.) 'clothing', 'dress', pra-vāc-ana- 'proclamation', sād-ana- 'seat'; also agent nouns; e. g. sam-srāv-ana- (AV.) 'flowing together'; -cāt-ana- 'driving away', mád-ana- 'gladdening', -váh-ana- 'conveying', -spás-ana-9 (AV.) 'spying'; svád-ana- m. 'sweetener'.

- 3. With unchanged vowel (final  $-\bar{a}$  and medial a) are formed neuter action nouns; e. g. dána- 'giving', ud-yána- (AV.) 'going out', ni-dhána-'receptacle', rákṣ-aṇa- 'protection', sád-ana- 'seat', ava-pra-bhráṃs-ana- 10 (AV. XIX. 398) 'slipping down',  $pr\dot{a}n$ -ana- 'breathing' (Van-); anomalously formed directly from a preposition, sim-ana-'meeting'; also agent nouns; e.g. tipana- 'burning', ā-krám-aṇa- (VS.) 'stepping upon', saṇ-gám-ana- 'assembling'.
- 4. With weak vowel are formed very few derivatives: either neuter action nouns partly with concrete meaning: krp-ána- 'misery', prs-ana-'tenderness', bhiv-ana- 'being', zrj-ána- and (once) zrj-ana- 'enclosure', -súvana- (AV.) 'procreation'; or agent nouns: kṛp-aná- (AV.) 'miserable', tur-ána-

<sup>2</sup> From ud- 'be wet'.

4 From bhū-'be' in vi-bhvan- and vi-bhvan-

'far-reaching'.

6 -kāman- in ní-kāman- 'desirous' is a transition form for the a-stem ni-kāma-.

compounds, rsi-codana- etc. 8 In this type the only vowel appearing

in the radical syllable is  $\bar{a}$ .

<sup>&</sup>quot; Used in the instrumental only.

<sup>3</sup> From dīv- 'play' in prati-div-an- 'adversary at play'.

rji-sv-an-, cp. Wackernagel 21, p. 125, bottom, and above, p. 95, n. 11.

<sup>7</sup> In the RV. only as final member of

<sup>9</sup> In prati-spāsana- (AV. VIII. 511). 10 See WHITNEY's note on navaprablisán-5 In the Proper Names mātari-sv-an- and sanα- in his translation of AV. XIX.398 and WEBER's erroneous interpretation of this as 'descent of the ship'.

'speeding'; m. *ur-ana-* 'ram' (*vr-* 'cover'), *kir-una-* m. 'dust' ('scattering'), *vr.s-ana-* (VS.) 'testicle'.

### $-an\bar{a}$ : action and agent.

- r21. With this suffix (accented on the first or the last syllable) are formed some feminine action nouns (like the neuters in -ana) which sometimes have a concrete meaning: as-anā-'missile', jar-anā-'old age', dyot-anā-'brilliance', man-anā-'devotion', rodh-anā-('obstruction') 'dam', śvet-anā-'daybreak', has-anā-'laughter'. kap-anā-'caterpillar' and raś-anā-'rein' have the appearance of being formed with this suffix, though the radical parts are not found in independent use. Accented on the penultimate syllable: arh-áṇā-'merit', jar-áṇā-'dry wood'(?), barh-áṇā-'might', bhand-ánā-'brilliance', maṇh-ánā-'readiness', meh-áṇā-'abundance', vakṣ-áṇā-'belly', vadh-áṇā-'slaughter', van-ánā-'desire'. The formation of yoṣ-áṇā-(RV¹.), usually yóṣ-aṇā-, 'woman' is obscure'. With the suffix -anā-is also formed (though irregularly accented on the radical syllable) pṛt-anā-'fight' from a root not found in independent use<sup>3</sup>. The suffix -anā also forms feminine agent nouns (adjectives) corresponding to masculines in accented -ana-; thus tur-áṇā-4 'speeding', tvar-aṇā- (AV.) 'hasting', spand-anā- (AV.) 'kicking'.
- a. Derivatives in -ana with verbal prefixes, if compounded with other words, form their f. in -anā-; thus an-apa-vāc-anā- (AV.) 'not to be ordered away', sūpa-vañc-anā- and sūpa-s.urp-anā-5 (AV.) 'easy of approach', sāā-vi-dhānā- 'forming an order (vi-dhāna-) of six'.

## -ani: action and agent.

122. This suffix, accented either on the first or the last syllable, is added to either the strong or the weak form of the root.

1. It forms feminine action nouns, sometimes with concrete sense; thus as-áni- 'missile', iṣ-áni- 'impulse', kṣip-ani- 'blow', dyot-ani- 'brilliance', dham-áni- 'piping', vart-ani- 'track', śar-áni- 'injury'; also jarani- 'noise' (?) in the compound jarani-prá- 'moving with noise' (?).

- 2. It forms agent nouns, both m. f. substantives and adjectives; thus ar-dni- f. 'fire-stick', cakṣ-áni- m. 'enlightener', car-áni- 'movable', 'active', tar-áni- 'swift', dhvas-áni- 'sprinkling', vakṣ-áni- m. 'strengthener'; also in the compounds án-arṣ'-ani-, N. of a demon, áj-ani- (AV.) f. 'stick for driving' (ā-aj-) and udani-mát- 'abounding in waves' (ud-ani- 'undulating' from ud-'be wet').
- a. From the reduplicated root: papt-ani- (pat- 'fly') in su-papt-ani- f. 'swift flight'. From aorist stems: cars-ani- 'active' (car- 'move'), f. pl. 'men', pars-ani- 'crossing' (pr- 'cross'), saks-ani- 'overcoming' (V sah-). From desiderative stems: ruruks-ani- 'willing to destroy' (ruj- 'break'), sisās-ani- 'eager to win' (V sā-), ā-susuks-ani- 'gleaming forth' (suc- 'shine').

## -anī: action and agent.

123. This suffix is the feminine form corresponding to the action and agent nouns formed with -ana from the strengthened or unreduced root<sup>6</sup>, with or without verbal prefix; thus -cód-anī-<sup>7</sup> 'urging' (cód-ana-), péś-anī- (AV.) 'well-formed' (péś-ana-), prókṣ-anī- (VS. AV.) f. 'sprinkling water', pra-jñānī-

To Other stems with the same meaning are: yóṣ-an-, yóṣ-ā-, yóṣ-it-. The root is probably yu- 'unite'.

<sup>&</sup>lt;sup>2</sup> The suffix -anā never otherwise occurs sarp-anā. when the root is accented.

5 See -

<sup>3</sup> Only as a nominal stem prt- 'fight'.

<sup>4</sup> This is the only example of such accentuation.

<sup>5</sup> That is, su-upa-vañc-anā- and su-upa-sarp-aṇā-.

<sup>6</sup> See -ana, 120, I—3.

<sup>7</sup> In brahma-códani- 'stimulating devotion'.

(AV.) 'easily known', spár-anī- (AV.) 'preserving'; abhi-ṣáv-anī- (AV.) 'pressing implement', vi-dhár-anī- (AV.) 'preserving'.

a. In some (partly obscure) words the accent here shifts from the radical vowel to the final of the suffix: arṣ-anī- (AV.) 'piercing pain', cet-anī- (AV.) 'visible' (cét-ana-), taf-anī- 'heat' (táp-ana- 'burning'), ted-anī- (AV. VS.) 'blood', pṛṣ-anī- 'tender' (pṛṣ-ana- 'tenderness'), vṛṣ-anī- 'enclosure' (vṛṣ-ana- and vṛṣ-ana-).

## -an-īya: gerundive.

124. This is a new compositive suffix beginning to be attached directly to the root in the formation of the gerundive. It is based on the primary suffix -ana of neuter action nouns extended with the secondary adjective suffix -\bar{z}ya. There are two examples in the AV.: upa-j\bar{z}v-an\bar{z}ya- 'to be subsisted on', and \bar{a}-mantr-an\bar{y}ya- 'to be addressed'.

### -ar: agent.

125. This suffix is found in a very few words:  $u_{\bar{s}}$ -dr- f. 'dawn', dev-dr- m. 'husband's brother',  $n\dot{a}$ - $n\bar{s}$ nd-ar- f. 'husband's sister'  $\bar{s}$ .

### -as: action and agent.

- 126. This suffix forms a large class of neuter action nouns (which sometimes acquire a concrete sense) accented on the root, and a small class of agent nouns (mostly adjectives) accented on the suffix. Some words belong to one class or the other according to the accent. The root generally takes Guṇa, and medial  $\alpha$  is sometimes lengthened, while the vowel is reduced in a few instances.
- 1. Examples of action nouns are: with Guṇa, práy-as-'pleasure' (\$\sqrt{pr\vec{i}}\$-), \$sr\u00e1s-as-'fame' (\$\sqrt{sru}\$-), \$k\u00e1r-as-'deed' (\$\sqrt{kr}\$-), \$c\u00e1t-as-'brilliance' (\$\sqrt{cit}\$-), \$t\u00e1j-as-'splendour' (\$\sqrt{tij}\$-), \$d\u00e3h-as-'milking' (\$\sqrt{duh}\$-)\u00e2. With medial \$a\$ unchanged: \$\u00e1v-as-'aid'\$, \$t\u00e1p-as-'heat'\$, \$pr\u00e4th-as-'breadth'\$, \$v\u00e1c-as-'speech'\$; and with partially or wholly concrete meaning, \$c\u00e1ks-as-'lustre'\$, 'eye'\$, \$m\u00e1n-as-'thought'\$, 'mind'\$, \$s\u00e1r-as-'dsee'\$. With lengthened \$a\$: \$-v\u00e1c-as-3\$, \$v\u00e1s-as-'covering'\$, 'garment'\$, \$v\u00e1h-as-'offering'\$, \$-sv\u00e1d-as-'flavour' in \$pr\u00e1s-sv\u00e1das-'as-'epath'\$. With reduced vowel: \$\u00e1r-as-'breast'\$, \$\u00e1j\u00e1v-as-'speed'\$ (beside \$\u00e1j\u00e1v-as-'\u00e1pas-cit-'inspired' and \$vi\u00e1p-as-'bestowing inspiration'\$; \$iras-'anger'\$ in the denominative \$iras-y\u00e1-'be angry'\$; \$hur-as-'deceit'\$ in \$huras\u00e1cit-'\u00e1plotting mischief'\$. Perhaps also the adverbs (with shift of accent) \$tir-\u00e1s\$ 'across' and \$mith-\u00e1s\$ 'mutually'\$.
- a. To roots ending in  $-\bar{a}$  the suffix is added direct in  $bh\bar{a}s$ -5 n. flight'  $(bh\bar{a}s$ -'shine') and  $-i\bar{a}s$ -5 'giving' 6  $(l/d\bar{a}s)$ .  $jh\bar{a}s$  'kinsman' and  $m\bar{a}s$  'moon' are probably also formed with the suffix -as, but being masculines were most likely agent nouns in origin:  $m\bar{a}-\dot{a}s$ 
  "measurer'  $(m\bar{a}-$  'measure'). The suffix seems to be added with an intervening y in  $-h\bar{a}l$ -as- 'agility' 7 if it is derived from  $h\bar{a}$  'leave' 8, while in  $dh\bar{a}l$ -as- n. 'enjoyment' and  $-s\bar{a}l$ -as- 'song' 9 the l- probably belongs to the root 10.

<sup>2</sup> The word he's-as- 'missile' is perhaps formed from the aorist stem of hi- 'impel'.

3 In vi-vācas- (AV.) 'speaking variously' and sá-vācas- (AV.) 'speaking similarly'.

(AV.) 'having all strength'.

8 But it may be a derivative of hi-

'impel'.

9 From dhe- 'suck' and gai- 'sing'; cp. above 27 a.

r svásar- 'sister' in probably an old compound in which -sar represents a root; cp. Brugmann, Grundriss 2, 8, note.

<sup>4</sup> According to OLDENBERG, ZDMG. 54, 607 this word means 'home' and is perhaps formed with a suffix -thas from pā- 'protect'; according to Sieg, Gurupūjākaumudī 97, it means 'food', and is derived from pā- 'drink'.

<sup>5</sup> Often to be read as dissyllables, bhaas-nd daas-.

<sup>6</sup> In -das- 'giving' and -dhas- 'placing' an -as has been formed probably by a misunderstanding of the N. sing. -da-s and -dha-s. 7 In vi-hāyas- 'vigorous' and sárva-hāyas-(AV.) 'having all strength'.

<sup>10</sup> In pi-v-as- n. 'fat' (pī- 'swell') the v may

Indo-arische Philologie. I. 4.

- 2. Agent nouns in -ds, mostly adjectives, correspond in several instances to action nouns accented on the root. These are ap-ús- 'active' (úp-as- 'work'), tar-ús- (VS<sup>1</sup>.) 'quick' (tár-as- 'quickness'), tyaj-ús- m. 'descendant' (tyúj-as-'abandonment'), duv-ás- 'stirring' (div-as- 'worship'), mah-ás- 'great' (máh-as-'greatness'). The derivative tav-ás- occurs both as an adjective 'strong' and without change of accent as a m. substantive strength. A few others have no corresponding action noun: toś-ús- 'bestowing', dhvar-ús- 'deceiving', yaj-ús-'offering', vedh-ús- 'worshipper', veś-ús- (AV.) 'neighbour'; and from a denominative stem mrgay-ús- (AV<sup>I</sup>.) 'wild animal'<sup>2</sup>.
- a. There are a few substantives accented on the suffix and seemingly never neuter, which are allied to the neuter action nouns in meaning, some being abstract, others concrete in sense. The change of accent may be due to change of gender3. Thus raks-as- m. occurs beside raks-as- n. both meaning 'demon'. There also occur jar-ás- m. 'old age', bhiy-ás- m. 'fear', tves-ás-4 'impulse', hav-ás- 'invocation'; us-ás- f. 'dawn' may have been an agent noun originally; dos-ás- (AVI.) f. (?) beside dos-á- 'night' may be due to parallelism with us-ás-. The stem upás- 'lap' (the gender of which is uncertain, as it occurs only in the locative singular) may have been formed under the influence of  $up\acute{a}$ -stha-5 m. 'lap'.
- a. A few Proper Names are formed with the suffix -as; thus nodh-as-; arcananasis a compound of anas- 'wain', possibly also bhalanas-. ap-saras-6 f. 'nymph' is perhaps a compound ('moving in the waters'). answer of Agni, has the appearance of being formed with this suffix, but the -s is perhaps secondary 7.

### -así: action and agent.

127. This suffix, which is an extension of -as with -i, forms a couple of action nouns with concrete sense, and a few agent nouns: dhāsi- m. 'drink' (dhe-'suck') and dhāsi- f. 'abode'; at-asi- m. 'beggar', dharn-asi- 'strong', sān-asi- 'victorious'.

#### $-\bar{a}$ : action.

128. By far the greatest proportion of words in  $-\bar{\alpha}$  consists of secondary feminine adjectives corresponding to masculines and neuters in -a.

There is, however, also a considerable number of feminine action nouns of an independent character, formed by adding  $-\dot{a}$  sometimes to the root, but usually to secondary conjugation stems (desiderative, causative, denominative). Thus  $\bar{\imath}s'-\hat{\alpha}-$  (AV.) 'dominion', nind- $\hat{\alpha}-$  (AV.) 'blame';  $jig\bar{\imath}s-\hat{\alpha}-$  'desire to win', bhikṣ-á- (AV.) 'begging', vīrtṣ-á-8 'desire to frustrate'; gamay-á-9 (AV.) 'causing to go'; aśvay-á- 'desire for horses', apasy-á- 'activity', uruṣy-á- 'readiness to help', jīvanasy-ā- (TS. 11. 3. 10<sup>2.3</sup>) 'desire of life', sukratūy-ā- 'skill'.

a. This suffix has the appearance of being added to a reduplicated stem in jángh-ā-10 'leg' and jihv-ā- 'tongue'; it may also be contained in the very obscure word sāsā-II (AVI.).

have been inserted owing to the influence but owing to the accent it is probably of pi-van- adj. 'fat'.

WHITNEY 1152, 2 e, erroneously, távas-'strength'.

<sup>2</sup> The suffix is probably contained in ā-han-ás- 'wanton', but the derivation is obscure, Cp. Fröhde, BB. 21, 321-330.

3 The dative infinitives from stems in -as are sometimes accented on the root, but usually on the suffix (105 a). This may indicate a difference of gender, the former being neuter, the latter masculine.

4 As tves-as- and hav-as- occur in the top. I. sing. only, the gender is uncertain,

masc.

5 According to Grassmann, however,  $up\acute{a}stha$ - probably =  $up\acute{a}s$ -stha-; cp. 81, 2  $\alpha$ . 6 See MACDONELL, Vedic Mythology 47,

note 3; but cp. PISCHEL, VS. 3, 197.

7 Cp. Brugmann, Grundriss 2, p. 188. 8 From vi-īrtsa- desiderative of rdh-'prosper'.

9 The causative stem used in the formation of the periphrastic perfect. 10 Cp. Brugmann, Grundriss 2, p. 106,

11 See WHITNEY's note on AV. I, II3.

## -āku: agent.

129. This very rare suffix seems to have been limited to the formation of agent nouns. It appears in mrday-áku- 'gracious' (formed from a causative stem), pŕd-āku- (AV. VS.) 'adder', íksv-āku-, N. of a man.

### -āna: agent.

130. This suffix forms a middle participle? from the present (455, 461, 467, 473, 479), the perfect (493) and (in the form of  $-s-\bar{a}na$ ) from the aorist tense stem3 (527). It also appears in the formation of a few adjectives and substantives, a preceding u always taking Guna. Such adjectives are: tákav-āna- 'speeding' (beside ták-u- and ták-va-), bhígav-āna- 'beaming' (beside bhṛgu- m.), vásav-āna- 'possessing wealth' (vásu-), ūrdhva-s-āná- 'being erect' (formed like an aorist participle from ūrdhvá- 'upright').

There are also the Proper Names ápnav-āna-, cyáv-āna-, pfthav-āna-; also cyávat-āna- which looks as if formed by adding -āna to the active present participle stem of cyu-'fall'. Of doubtful derivation are the substantives  $p\acute{a}r\dot{s}$ - $\bar{a}na$ - m. 'abyss' and  $ruj\acute{a}n\bar{a}$ -4 f. 'river' (I. 326).

### -i: action and agent.

131. With this suffix are formed numerous feminine action nouns, agent nouns (adjectives and masculine substantives), and a few neuters of obscure etymology 5.

The root appears in various forms: sometimes with Guṇa, Vṛddhi or lengthened a, generally with unchanged or weak vowel, often reduplicated. Before the suffix a final radical palatal regularly appears (not the original guttural). In many of these derivatives the root is not traceable elsewhere. The accent is so fluctuating that no general rule can be stated. The meaning is often greatly specialised.

 Examples of action nouns are: with Guna, rύρ-i (AV.) 'pain', śoc-i (AV.) 'heat'; with lengthened a: āj-i- m. f. 'race', grāh-i- 'seizure', dhráj-i- 'course'; with unchanged vowel: san-i- 'gain'; with weak vowel: tvis-i- 'brilliance', krs-i- 'tillage', ric-i- (AV.) 'brightness'.

2. Examples of agent nouns are: with Guna, ar-i- 'devout', arc-i- m. 'beam'; with Vrddhi, kārṣ-i (VS.) 'drawing'; with lengthened vowel -jāni-6 f. 'wife', śár-i- f. 'arrow' (RVI.), a kind of bird (VS. TS.), dás-i- (AV.) 'poisonous matter'; also in a few words of obscure etymology, drāp-i- m. 'mantle', nābh-i- f. 'navel', pān-l- m. 'hand', rās'-l- m. 'heap'; with unchanged vowel: krīd-/- 'playing', granth-/- m. 'knot', máh-i- 'great'; with weak vowel: śúc-i- 'bright', grbh-i- (AV.) 'container', bhrm-i- 'lively' (beside bhrm-i- f. 'lively motion'). From the reduplicated root, which nearly always has a weak or reduced radical vowel, are formed with ordinary reduplicative vowel: cikit-i-7 (SV.) 'understanding', cákr-i- 'active', jághr-i- 'sprinkling about' (ghr-), pápr-i- 'bestowing abundantly', babhr-i- 'carrying', vavr-i- m. 'covering', sásr-i-'speeding', silsv-i-'pressing'; yilyudh-i-'warlike', vivic-i-'appropriating' (\langle vyac-);

It occurs in the RV. only as the first member of a compound in prdāku- rujānās see p. 59, note 1. sanu- 'having a surface like that of a snake'.

<sup>&</sup>lt;sup>2</sup> See LINDNER p. 53-55.

<sup>3</sup> āpnāna- seems to be an irregular present independent jáni-. participle of  $\bar{a}p$ - 'obtain' formed from the stem āp-nā- instead of āp-nu-.

<sup>4</sup> For this word occurring in the form of

<sup>5</sup> See Grassmann, Wörterbuch 1718f.;

LINDNER p. 55-58.

6 At the end of compounds beside the 7 Various reading for the cikit-ú- of the

jágm i- 'hastening' (gam- 'go'), jághn-i- 'striking' (Vhan-), sásn-i- 'winning'; jágur-i- 'conducting' (Vg $\bar{r}$ -), tátur-i- 'victorious' (Vt $\bar{r}$ -), pápur-i- and púpur-i- (SV.) 'bestowing abundantly' (Vp $\bar{r}$ -) beside pápr-i; with lengthened or strong reduplicative vowel: tátrp-i- 'gladdening', dádhr-s-i- 'bold', vávah-i- 'driving swiftly', sāsah-i- 'victorious'; tátuj-i- 'speeding', tūtuj-i- m. 'stimulator', yáyuv-i- 'driving away', yáyudh-i- 'warlike'; jarbhár-i- 'nourishing' (Vbhr-) '. The weak reduplicated present stem appears in dad-i- 'giving' and dádh-i- 'bestowing'; from similar stems (appearing in the perfect) are formed pap-i 'drinking' (Vp $\bar{a}$ -) and yay-i 'speeding' (Vy $\bar{a}$ -).

a. There are only about half a dozen neuters formed with the suffix -i, nearly all being obscure in origin. They are ákṣ-i- 'eye', ásth-i- (AV. VS.) 'bone', dádh-i- 'sour milk', śám-i- 'toil' (śam- 'work'); and with Vrddhi hárd-i-

'heart'.

b. The root is sometimes compounded with verbal prefixes in these derivatives, the suffix being then usually accented; thus  $\bar{a}$ - $j\acute{a}n$ -i- f. 'birth', vi-vavr-i- m. 'opening', sam-tan-i- f. 'harmony', 'music',  $\bar{a}$ -yaj-i- 'bringing near by offerings',  $\bar{a}$ -mir-i- m. 'destroyer', ni-jaghn-i- 'striking down',  $par\bar{a}$ -dad-i-

'delivering over', vi-sāsah-i- 'victorious', vy-ānaś-i-2 'pervading'.

c. From  $dh\bar{a}$ - 'put' is derived the stem -dhi- which is used in forming many m. compounds; e. g. antar-dhi- (AV.) 'concealment', ud-dhi- (AV.), part of a car, ni-dhi- 'treasure', pari-dhi- 'fence'. From sthā- 'stand' is similarly formed -sthi- in prati-sthi- f. 'resistance'. There is here some doubt as to whether we have a reduced form of the root (as in dhi-ta-) or displacement of the radical vowel by the very frequent suffix -i. The latter alternative is perhaps the more probable owing to the almost invariable accentuation of the i and the occurrence of a stem like prati-sthi- 'resistance' beside prati-sthi- 'standpoint'.

## -in: agent.

132. The very frequent secondary suffix -in seems sometimes to have the value of a primary suffix, exclusively, however, at the end of compounds; thus -ād-in-'eating',-eṣ-in-(AV.) 'seeking', -tod-in-'piercing', á-nām-in-'unbending', -vyādh-in- (AV.) 'piercing'; from a present stem -aś-nuv-in- (VS.) 'reaching'; from an aorist stem -sakṣ-in-3 overpowering (Vsah-); from a reduplicated stem -yay-in- 'going' 4.

# -istha: agent.

vith this suffix attached to the root is formed the superlative with an adjectival sense. The root is regularly accented<sup>5</sup>, i and i taking Guṇa, while  $\alpha$  remains unchanged, though in two or three instances it is strengthened with a nasal. Roots in  $-\bar{\alpha}$  combine that vowel with the initial -i of the suffix to e, which, however, is usually to be read as two syllables. About fifty superlatives formed with this suffix occur in the Samhitās. Examples are:  $n\dot{\alpha}y$ - $i\dot{\gamma}tha$ - 'leading in the best manner' ( $n\bar{z}$ - 'lead'),  $j\dot{\alpha}v$ - $i\dot{\gamma}tha$ - 'quickest' ( $j\bar{u}$ - 'speed'),  $v\dot{\epsilon}d$ - $i\dot{\gamma}tha$ - 'procuring most' (vid- 'find'),  $\dot{\gamma}c$ - $i\dot{\gamma}tha$ - 'most brilliant' ( $\dot{\gamma}uc$ - 'shine');  $\dot{\gamma}d\dot{\gamma}$ - $i\dot{\gamma}tha$ - 'sacrificing best';  $\dot{\delta}dmh$ - $i\dot{\gamma}tha$ - 'most abundant' ( $\dot{\delta}amh$ -

The words bámbhār-i-(VS.) m., a somaguarding genius, karkar-i-f. lute', dundubh-im. 'drum' may be onomatopoetic in origin.

<sup>&</sup>lt;sup>2</sup> From the perfect stem an-as- of asfattain'.

<sup>3</sup> In pra-saks-in- 'victorious'.

<sup>4</sup> In ni-yay-in- 'passing over'. Cp. LINDNER p. 59; WHITNEY 1183 a.

<sup>5</sup> Except two or three times jyesthá- and kan-isthá- (see above p. 83, 14); and when the superlative is compounded with a prefix, which then has the accent.

'make firm'), mámh-istha- 'most liberal' (mah- 'be great'); jyéstha- 'greatest' and jyesthá- 'eldest' (jyā- 'overpower'), dhéstha- 'bestowing the most' ( $1/dh\bar{a}$ -),

véstha- 'going fastest' ( $\sqrt{v\bar{a}}$ -).

- a. In many instances these superlatives attach themselves in meaning derivative adjectives, being formed from the root which the latter contain; thus os-istha-1 (TS. 1. 6. 123) beside osa-m 'quickly', barh-istha-'greatest' beside brh-ánt- 'great', vár-istha- 'choicest' (vr- 'choose') beside vár-a-'choice', sádh-istha- 'straightest' beside sādh-i- 'straight'. In a few cases the suffix is added to the derivative form of the root which appears in the adjective; thus as-istha-(AV'.) 'swiftest' beside as-u- (from as- 'reach'); and in náv-istha- 'newest' the suffix is attached to the radical element in náv-a-2 'new' (and not directly to the root from which that word may be derived).
- b. In some cases the root is compounded with a verbal prefix or other indeclinable; thus a-gam-istha- 'coming best', a-sram-istha- 'never tiring', śám-bhav-istha-3 'most beneficial'.
- a. There are some irregularities in the formation of this superlative. Thus  $bh\bar{u}$ retains its vowel unchanged, adding the suffix with an intervening -y: bhit-y-istha-4 'greatest'; the roots prī- and śrī- are treated as if they ended in -ā: prēstha- 'dearest', srestha- 'most glorious'; par-s-istha- 'taking across best' is made from an acrist stem of pr-'cross'. The abnormal accentuation of jyesthá- 'eldest' is doubtless intended to differentiate its meaning from jyéstha- 'greatest'. The use of kan-isthá- 'youngest' is parallel to that of the former 5.

#### -is: action.

- 134. This suffix forms a dozen neuter action nouns, mostly used in a concrete sense. Though the root takes Guna, the suffix is accented except in three instances. The words thus formed are: arc-is- 'flame', am-is-6 'raw flesh', krav-is- 'raw flesh', chad-is- 'cover', chard-is- 'protection', jyót-is- 'light', barh-is- 'straw', roc-is- 'light', vart-is- 'track', vyúth-is- 'course' (?), soc-is- 'flame', sarp-is- 'melted butter', hav-is- 'oblation'.
- a. Besides these av-is- appears for av-as- 'aid' and mah-is- for mah-as-'greatness' in a few derivatives: avis-yánt- 'helping readily', avis-yá- 'desire', avis-yil- 'desirous'; máhis-vant- 'great'; and with inorganic -s tilvi-s- 'might', śuci-s- 'flame', su-rabhi-s- 'fragrant' for tuvi-, śuci-, surabhi- in a few derivatives: túvis-mant- 'mighty', śucis-mant- (only voc.) 'brilliant', surabhis-ṭama- 'very fragrant'.

## $-\bar{i}$ : action and agent.

135. This suffix, besides its secondary use in the formation of feminines, chiefly adjectives, from m. and n. stems in -a, -i, -u, -r, as well as various consonant stems (201), seems to be primary in forming a few independent feminine action and agent nouns. Such are deh-t-'rampart', nad-t-'stream', nānd-t-'joy', péṣ-ī- (RV'.) 'swaddling clothes' (?), veś-t- 'needle', śác-ī- 'power', sám-ī- and sím-ī- 'work'; seemingly from an aorist stem (Vvah-) vakṣ-t- (RV'.) 'flame'. There are also about a dozen masculines: ah-i- 'serpent', upāv-i-(VS.) 'encouraging', dakṣ-ī- (RV¹.) 'flaming', prāv-t- 'attentive', duṣ-prāv-t-

<sup>2</sup> Probably from a demonstrative root nu-

4 The regular form bhav-istha- occurs in Cp. p. 119, note 5. combination with sam-.

In the compound osistha-davan- 'giving | immediately'.

<sup>3</sup> This superlative is formed under the influence of the positive sam-bhú- as the in- like all the rest a neuter, is not clear. dependent superlative of bhū- is bhū-y-istha-.

<sup>5</sup> kán-istha- 'smallest' appears in books V and VI of the TS.

<sup>6</sup> This word, which occurs in the L. sing. which appears in nú 'now', nu tana- 'present'. form ámis-i only, is given as m. in BR., pw., and Grassmann, but why it should not be

<sup>7</sup> Only voc. daksi, Pada dhaksi-, I. 1418.

'unfriendly', su-prāv-i- 'very attentive', rath-i- 'charioteer', á-rath-i- 'not a charioteer'; and the Proper Names nám-ī- and pŕth-ī-¹.

## -īka: action and agent.

136. This suffix forms a few neuter substantives and some adjectives: thus  $\acute{a}n$ - $\bar{\imath}ka$ - n. 'face',  $\acute{d}\acute{\imath}\acute{s}$ - $\bar{\imath}ka$ - n. 'aspect', mrd- $\bar{\imath}k\acute{a}$ - n. 'grace',  $\acute{a}$ - $\acute{s}ar$ - $\bar{\imath}ka$ - (AV.) n. 'rheumatic pains'; -rj-īka-2 'beaming', drbh-īka- m., N. of a demon, vrdhīkú- m. 'increaser', vi-śar-īka- (AV.) m., a kind of disease; from a reduplicated stem: par-phar-tka- m. 'filler'.

## -īyāms: agent.

- 137. This suffix is used in forming comparatives, being added to the root in the same way as the superlative suffix -istha (133). At least 40 of these derivatives occur in the Samhitās. Examples are: jáv-īyāṃs- 'quicker', mámh-īyāms- 'more liberal', yúj-īyāms- 'sacrificing better', t/j-īyāms- 'sharper'. véd-īyāms- 'procuring more', yódh-īyāms- 'fighting better', préyāms-4 'dearer'  $(\sqrt{pr\bar{\imath}})$ ,  $\dot{sr}\dot{y}\bar{a}\eta s^{-5}(\sqrt{\dot{sr}\bar{\imath}})$  'more splendid',  $-sthey\bar{a}\eta s$ - 'lasting'  $(\sqrt{sth\bar{a}})$ . Connected in sense with the corresponding positive are án-īyāms- (AV.) 'smaller', beside ánu- 'minute', sás-īyāns- 'more frequent', beside sás-vant- 'constant'; and from a derivative form of the root tikṣṇ-īyāṇṇs- (AV.)5 'sharper', beside tīkṣná- 'sharp' (tij- 'be sharp').
- a. Beside the usual form in -ty.tms- there appear some half dozen comparatives made with a shorter form of the suffix -yāms: táv-yāms- beside táv-īyāms- 'stronger', náv-yāms- beside náv-īyāms- 'new', pán-yāms- beside pánīyāņis- 'more wonderful', bhū-yāṇis- '(becoming) more', 'greater', beside bhárīyāṃs- 'more plentiful', rábh-yāṃs- beside rábh-īyāṃs- (VS.) 'more violent', sáh-yāms- beside sáh-īyāms- 'stronger'; jyā-yāms- 'greater', 'older', and sán-yāms-'older' (sána- 'old') appear without an alternative form beside them.
- b. With verbal prefixes or particles: vi-kled-īyāṇis- (AV.) 'moistening more', pári-svaj-īyāms- (AV.) 'clasping more firmly', práti-cyav-īyāms- 'pressing closer against'; á-stheyāms- 'not enduring'.

#### -u: agent.

- 138. This suffix forms a considerable number of agent nouns, both adjectives and substantives. The latter are chiefly masculines, but there are also several feminines and neuters. The suffix is usually accented. The root is generally weak, but sometimes shows Vrddhi, least often Guna; it also occasionally appears in a reduplicated form. Medial a usually remains unchanged, but is sometimes lengthened; occasionally it is nasalized or appears as e. Final  $-\bar{a}$  adds an intervening y, but is occasionally dropped. Gutturals only (not palatals) appear before this suffix.
- I. Examples of adjectives are: ur-ú- 'wide', rj-ú- 'straight', prth-ú-'broad', mrd-il- (VS.) 'soft', vidh-il- 'solitary';  $j\bar{a}y$ -il- 'conquering' ( $\sqrt{ji}$ -),  $d\bar{a}r$ - $\dot{u}$ - 'splitting' ( $\sqrt{dr}$ -);  $\dot{s}ay$ - $\dot{u}$ - 'lying' ( $\sqrt{\dot{s}\bar{\iota}}$ -),  $\dot{c}ikit$ - $\dot{u}$ - 'shining' ( $\sqrt{\dot{c}it}$ -), jigy-i'- 'victorious', siṣn-u- 'ready to give' (V san-)'; tak-i'- 'swift', tan-i'- 'thin',

2 As final member of a few compounds, as bhá-rjīka- 'light shedding'.

3 See LINDNER p. 155; WHITNEY 466-

5 In the TS. pāp-īyāms- is formed directly

<sup>1</sup> See below 375 B; LINDNER p. 80; from the adjective stem pāpā-, the radical element of which is uncertain.

6 With the radical vowel unchanged as in the superlative.

7 Some other words have the appearance of being reduplicated: babhr-ú- 'brown', a-rár-u- 'hostile' (rā- 'give'); malimlu- (VS.) seems to be a mutilated form of malimbucá-(AV.) 'robber'.

WHITNEY 355 b.

<sup>+</sup> The roots pri- and sri- being treated as ending in -ā: prā-īyāms- and śrā-īyāms- as in the superlative.

tip-u- 'hot',  $\bar{a}s'-i$ - 'swift' (as'- 'reach'); amh-i- 'narrow'; cer-u- 'active' (car- 'move');  $dh\bar{a}-y-i$ - 'thirsty',  $p\bar{a}-y-i$ - 'protecting'; y-i- 'going' ( $\sqrt{y}\bar{a}$ -)<sup>2</sup>; reku-

'empty' ( \( \frac{1}{ric} - \)).

2. Examples of substantives are: m. grh-u- 'beggar', rip-u- 'cheat'; p/pr-u-, N. of a demon; ds-u- 'life', mdn-u- 'man',  $p\bar{a}d$ -u- 'foot',  $b\bar{a}h$ -u- 'arm', ams-u- 'filament',  $v\bar{a}$ -y-u- 'wind'; f. u-u- (also m.) 'arrow', slndh-u- (also m.) 'river', dhdn-u- 'sandbank', pdrs-u- 'rib', hdn-u- 'jaw'; n. dy-u- 'life', jdn-u- 'knee', tdu-u- (VS.) 'palate', trdp-u- (AV. VS.) 'tin', ddr-u- (also m.) 'wood', sdn-u- (also m.) 'summit'; with syncope, u-u- 'food' (u-u-u-u-u- 'sieve'.

a. In a few of these derivatives the root appears with a prefix: upā-y-l-(TS. 1. 1. 1) 'approaching', ni-cer-l- 'gliding', pra-may-l- (AV.) 'liable to destruction', pari-tatn-l- (AV.) 'surrounding', sán-vas-u- 'dwelling together';

abhīś-ú-3 m. 'rein', vi-klind-u- (AV.) m. a kind of disease.

139. There is besides a large class of agent nouns formed with -u not directly from the root but from tense or secondary conjugation stems.

r. From present stems are formed: tany-ii- 'thundering' (tanya-ti 'roars'), bhind-ii- m. 'destroyer' (bhind-ánti 'they split'), -vind-ii-4 'finding' (vindá-ti 'finds');

from an aorist stem dáks-u-5 and dháks-u- 'burning'.

2. From desiderative stems are formed i-yaks-i- 'desirous of sacrificing' (Vyaj-), cikits-i- (AV.) 'cunning' (Vcit-), jigts-i- 'desirous of winning' (Vji-), jighats-i- (AV.) 'greedy' (ghas- 'eat'), titiks-i- (AV.) 'patient', dits-i- 'ready to give' ( $Vd\bar{a}$ -), didfks-u- (VII. 863) 'eager to see' (Vdrs-), didhis-i- 'wishing to obtain' ( $Vdh\bar{a}$ -), dips-i- 'wishing to harm' (Vdabh-), ninits-i- 'wishing to revile',  $b\bar{\imath}bhats$ -i- 'feeling disgust' ( $Vb\bar{\imath}dh$ -), mimiks-i- 'mingling' (Vmis-), mumuks-i- 'desiring release' (Vmuc-), ririks-i- 'wishing to damage' (Vris-), vivaks-i- (AV.) 'calling aloud' (Vvac-),  $sis\bar{\imath}s$ -i- (AV.) 'eager to win' ( $Vs\bar{\imath}s$ -).

3. From causative stems are formed: dhāray-ú- 'streaming', bhājay-ú- 'liberal', bhāvay-ú- 'cherishing', maṃhay-ú- 'liberal', manday-ú- 'joyous', śramay-ú- 'exhausting oneself'; from a causative denominative mṛgay-ú- (AV.VS.) m. 'hunter'.

4. By far the commonest are the derivatives from regular denominatives, of which nearly 80 occur in the RV., and at least half a dozen additional cases in the AV. About 35 of these words are formed from denominative stems in actual use 7; thus aghāy-ú-'malignant', arātīy-ú-(AV.) 'hostile', vasāy-ú-'desiring wealth', carany-ú-'mobile', manasy-ú-'desirous'. A few are formed from pronouns, as ahany-ú-'selfish', asmay-ú-'favouring us', kiny-ú-'desiring what?', tvāy-ú-'loving thee', yuvay-ú- and yuvāy-ú-'desiring you two', svay-ú-'left to oneself'. In the absence of an accompanying denominative, there is the appearance of a secondary suffix -yu (with the sense of 'desiring' or some more general adjectival meaning) attached directly to nouns. Thus there are derivatives in the RV. in which the -as of noun stems is changed to -o, as if the suffix were actually -yu: anho-yú-'threatening', duvo-yú-'honouring' beside duvas-yú-, and á-skṛdho-yu-'not niggardly'.

## -uka: agent.

140. This suffix probably consists of the primary -u extended with the secondary -ka. It is very rare in the Samhitās. There is no certain example

I Here the y really belongs to the root dhe- 'suck'.

<sup>2</sup> Also in the reduplicated form yάy-u-(VS.) 'swift'; the final-ā seems also to be dropped in ā-kh-ú- 'mole' (khā- 'dig') and in su-ṣ/h-ú '(standing) well' (sthā- 'stand').

<sup>3</sup> Probably from abhi+īs- 'rule'.

<sup>4</sup> In go-vindú- 'searching for milk'.
5 The Pada text has dhákṣ-u-. Cp. p. 117,

note 7.
6 With irregular accent.

<sup>7</sup> See the list in LINDNER p. 63.

in the RV., but  $s\bar{a}n$ - $uk\acute{a}$ - (RV<sup>I</sup>.) 'desirous of prey' ( $\sqrt{san}$ -) and the Proper Name per- $uk\acute{a}$ - (RV<sup>I</sup>.) may be instances. In the AV. occur  $gh\acute{a}t$ - $uk\acute{a}$ - 'killing', vi-kas- $uk\acute{a}$ - 'bursting',  $s\acute{a}m$ -kas- $uk\acute{a}$ - 'crumbling up',  $\acute{a}$ -pra- $m\~{a}y$ - $uk\acute{a}$ - 'not dying suddenly'. In the TS. occurs vas- $uk\acute{a}$ -, but the meaning and derivation are doubtful.

## -us: action and agent.

141. This suffix forms neuter action nouns which have mostly a concrete sense, and masculine agent nouns, altogether less than 20 in number. All the substantives except one are accented on the root, which generally takes Guna, but in one instance Vrddhi. Those adjectives which also appear as substantives have the same accentuation; but those stems which are used solely as adjectives accent the suffix.

1. The neuter substantives are: άr-us- (AV.) 'wound', άy-us- 'life', cάkṣ-us- 'light', táp-us- 'heat', tár-us- 'battle', dhán-us- 'bow', pár-us- 'knot', yáj-us- 'worship', váp-us- 'marvel', śás-us- 'command'; with accent on the suffix: jan-l/s-

'birth' (also m.).

2. The masculine substantives are:  $n\acute{a}h$ -us- 'neighbour',  $m\acute{a}n$ -us- 'man'; adjectives identical in form with neuter substantives are:  $c\acute{a}ks$ -us- 'seeing',  $t\acute{a}p$ -us- 'glowing',  $v\acute{a}p$ -us- 'wondrous'; adjectives without corresponding substantives are: jay-us- 'victorious', van-us- 'eager', vid-us-us- 'heedful'; also daks-us- 'flaming' from the agrist stem.

#### $-\bar{u}$ : feminine substantives.

142. This rare suffix chiefly forms feminines corresponding to masculines and neuters in  $-u^2$ . Independent feminine substantives are:  $cam-\hat{n}$ - 'dish',  $tan-\hat{n}$ - 'body',  $vadh-\hat{n}$ - 'bride'; perhaps  $pan-\hat{n}$ -3 'admiration'. There are also the compounds  $puns-cal-\hat{n}$ - (VS.) 'courtesan',  $pra-jan-\hat{n}$ - (AV.) 'organ of generation'.

# $-\bar{u}ka$ : intensive adjectives.

143. This suffix is merely the lengthened form of -uka used in forming a few derivatives from the reduplicated intensive stem. It appears in jāgar-úka- 'wakeful', dandaś-úka- (VS.) 'mordacious', salal-úka- (RV'.) 'wandering aimlessly'.

### -ka: agent.

r44. This is a very common secondary suffix, but very rarely appears in a primary character. It is thus used in  $\acute{a}t$ -ka- m. 'garment', su-mé-ka-'firmly fixed' (mi-'fix'),  $\acute{s}\acute{t}s$ -ka-'dry',  $\acute{s}\acute{t}\acute{b}$ -ka- m. 'call' ( $\acute{s}ru$ -'hear'), sto-ká- m. 'drop'. In  $v\acute{r}\acute{s}c$ -i-ka- m. 'scorpion' the suffix is added with connecting -i-. The feminine form of the suffix appears in  $st\acute{u}$ -kā-'flake',  $r\bar{a}$ -ká-, N. of a goddess.

#### -ta: agent.

r45. This suffix is employed almost exclusively to form past participles<sup>+</sup>, chiefly with passive, sometimes with intransitive meaning. Its more general and original sense is, however, preserved in some words used as adjectives or as substantives with concrete meaning; thus trṣ-tá- 'rough', dṛḍhá- 'firm', śī-tá- 'cold', vāvá-ta-5 'dear'; m. dū-tá- 'messenger', sū-tá- (AV. VS.) 'charioteer',

TWith weak root; the only instance of medial vowel other than  $\ddot{a}$  in the radical syllable. form occurring is the I. sing. panvā.

4 See below, Past passive participles, 572, and the lists in LINDNER p. 70f.

<sup>&</sup>lt;sup>2</sup> See below, derivative  $-\bar{u}$  stems, 384. 5 From a reduplicated form of  $v\bar{u}$ - 'win', 3 The stem may be pan- $\hat{u}$ -, as the only and with unusual accent.

kīstá-1 'singer', bastá-1 'he-goat'; n. r-tá- 'right', ghṛ-tá- 'ghee', jā-tá- 'kind', dyū-tá- (AV.) 'gambling', nrt-tá- (AV.) 'dance', pūr-tá- 'reward', vra-tá-2 'ordinance'; with accented and strong radical syllable: e-ta- 'variegated'; m. gár-ta- 'car-seat', már-ta- 'mortal', vá-ta- 'wind', hás-ta- 'hand'; n. ás-ta-'home', nák-ta- 'night'.

a. In many past participles the suffix is added with connecting -i-, as rakṣ-i-tá- 'protected'. Some of these are used as n. substantives; thus jīv-i-tá- 'life', car-i-tá- 'behaviour'. Several words thus formed appear as adjectives only; thus tig-i-tá-3 'sharp', pal-i-tá- 'grey'; also some other names of colours with strong and accented radical syllable: ás-i-ta- 'black', róh-i-ta-'red', lóh-i-ta- (AV.) 'red', hár-i-ta- 'yellow'; śye-tá- 'white' is perhaps anomalously formed with -ita- from sva-4 'freeze's.

### -tar: agent.

- 146. The agent nouns formed with this very frequent suffix 6 are often used participially, governing an accusative. The root is generally accented when they have this verbal force, but the suffix, when they are purely nominal (86 A 22). The root regularly has Guna,  $\alpha$  and  $\bar{\alpha}$  remaining unchanged; thus né-tar- 'leader' ( $\sqrt{n\bar{\iota}}$ -), hú-tar- 'priest' ( $\sqrt{hu}$ -), kar-tár- 'doer' ( $\sqrt{kr}$ -), bhet-tár-'breaker' (V bhid-), yok-tár- 'yoker' (V yuj-); yaṣ-tár- 'sacrificer' (V yaj-), dā-tár-'giver'7. With weak root: uṣ-ṭár- m. 'ploughing bull'8.
- a. Less commonly the suffix is added to the root with connecting -i-: regularly when the root ends in more than one consonant9, as vand-i-tár-'praiser', but also often when it ends in a single consonant and sometimes when it ends in a vowel, as cod-i-tár-'instigator', sav-i-tár-'stimulator' ( \( \star{su} - \)).
- b. The suffix is combined with -ī- instead of -i- in grábh-ī-tar- (AV.) 'seizer', prati-grah-ī-tár- (AV.) 'receiver', sam-grah-ī-tár- (VS.) 'charioteer', pratar-ī-tár- 'prolonger', ā-mar-ī-tár- 'destroyer'; with -u- in tár-u-tar- 'winning' and tar-u-tár- 'conqueror', dhán-u-tar- 'running swiftly', sán-u-tar- 'winning'; with -ū- in var-ū-tár- 'protector'; with -o- in man-ó-tar-10 and man-o-tár-'inventor'.
- c. These derivatives are very frequently compounded with prepositions in; e. g. pura-e-tár- 'leader', apa-bhar-tár- 'taking away', prāv-i-tár- 'protector' (av- 'favour'), pra-sav-ī-tár- 'vivifier'.
- d. They are very rarely formed from secondary conjugation or from tense stems, as coday-i-tár- 'stimulator' 12, bodhay-i-tár- 'awakener', né-s-tar-13, a kind of priest. From the reduplicated root is formed vāvā-tar- 'adherent'.
- e. Several names of relationship appear to be formed with this suffix. Being all very old words, the radical syllable is obscure in meaning or irregular in form. They are jā-mā-tar- 'son-in-law', duh-i-tār- 'daughter', nāp-tar-'grandson', pi-tár- 'father', bhrá-tar- 'brother', mā-tár- 'mother'.

3 With anomalous guttural before -i-.

4 Originally perhaps 'rimy', cp. śī-tá- 'cold'. 5 The f. of these adjectives of colour is

6 See the lists in LINDNER p. 72-75.

8 The f. of these words is formed with

9 Except dams-tar- (AV.) 'biter'.

10 Connected with the present stem manu-le etc. of man- 'think'.

11 See LINDNER p. 73 f.

12 In the f. coday-i-tr-i-.

13 From the agrist stem of nī- 'lead'.

These two words are of doubtful origin. malous form of radical syllable; but accord-

ing to Whitney (1176 b) it is to be explained as vrat-á- formed from vpt- 'turn' -ī from the weak stem, i. e. in -trī. like vraj-á- from Vvrj-.

formed from other stems: énī-, ásiknī-, páliknī-, róhiṇī-, lóhinī- (AV.), śyénī-, háriṇī-.

<sup>7 -</sup>tur appear, instead of -tar in yan-tur-<sup>2</sup> If derived from vr- 'choose' with ano- beside yan-tár- 'guide' and in sthā-túr- beside sthā-tár- 'stationary'.

#### -tas: action.

147. This suffix is identical in meaning with -as, being used to form neuter action nouns which have acquired a concrete meaning. It is very rare, occurring only in ré-tas- 'semen' (ri- 'flow') and sró-tas- 'stream', 'current' (sru- 'flow').

### -ti: action and agent.

- 148. This suffix is used to form a large number of feminine action nouns; it also appears in a few agent nouns employed either as adjectives or masculine substantives. The root generally has the same weak form as appears before the -ta of the past passive participle2; it is, however, more often accented than the suffix. In a few words the suffix is added with the connecting vowels -a, -i or  $-\bar{\iota}$ .
- I. Action nouns. With accent on the suffix are formed e. g. is-t/-'desire' (i.e. 'seek'),  $\bar{u}$ -t'- 'aid' ( $\sqrt{av}$ -),  $k\bar{v}$ -t'- 'praise' (kr- 'commemorate'), dhau-ti- 'stream' (dhāt- 'flow'), pī-ti- 'draught' (pā- 'drink'), pūr-ti- 'reward' (pr-'fill'), bhak-ti- 'distribution' (bhaj- 'divide'), ma-ti- 'thought' (man- 'think'), rī-ti- 'gift' (rī- 'give'), rī-ti- 'flow' (ri- 'flow'), vis-ti- 'work' (vis- 'be active'), stu-ti- 'praise'; from the reduplicated root: carky-ti- 'praise' (ky- 'commemorate'); with connecting -a-3: amh-a-ti- 'distress', drs-a-ti- 'appearance', mith-a-ti- 'conflict', vas-a-ti- 'abode'. With accent on the root are formed e.g. /s-ti- 'offering' ( $\sqrt{yaj}$ -),  $g\acute{a}$ -ti- 'motion' ( $\sqrt{gam}$ -),  $d\acute{l}$ -ti- 'liberality' ( $d\bar{a}$ -'give'), v/d-dhi- 'increase' (V vrdh-), śan-ti- (AV. VS.) 'repose' (V śam-); from the reduplicated root didhi-ti- 'devotion' (dhī- 'think')4; with connecting  $-\alpha$ :  $\alpha m$ - $\alpha$ -ti- $\tau$  'indigence' ( $\alpha m$ - 'be afflicted').
- a. The derivative di-ti- 'giving' when used as the final member of a compound is reduced to -tti-: bhága-tti-, maghá-tti-, vásu-tti-; above 26 a 2.
- 2. Agent nouns. These are rare, amounting to hardly 20 in number. Accented on the suffix: jñā-ti- m. 'relative', pat-ti- m. (AV. VS.) 'pedestrian', rā-ti- 'willing to give'; with connecting -a-: ar-a-ti- m. 'servant', khal-a-ti- (VS.) 'bald', and with accent on the connecting vowel vrk-á-ti- m. 'murderer'. Accented on the root: m. dhú-ti- 'shaker', pú-ti- 'master', múṣ-ṭi- 'fist', súp-ti- 'steed'; adjectives: dhṛṣ-ṭi- (VS.) 'bold', pit-ti- (AV.) 'putrid', váṣ-ṭi-'eager'; and from the reduplicated root jigar-ti- m. 'swallower'; with connecting vowels: ám-a-ti- 'poor', rám-a-ti- (AV. TS.) 'liking to stay', ŕj-ī-ti- 'glowing', turv-i-ti-, N. of a man (turv- = tur-, tr- 'overcome'), dabh-i-ti-6, N. of a man'7, snéh-a-ti- 'carnage' and snīh-i-ti- (SV.).
- a. These derivatives are often compounded with prepositions 8, which are almost always accented; thus anu-ma-ti- 'assent', abhiti- 'attack' (abhi-ti-), a-hu-ti- 'offering', nir-r-ti- 'dissolution', vy-ap-ti-(AV.) 'attainment', sam-ga-ti- 'coming together', abhi-mā-ti-'insidious' (man-'think')9; with suffix accented, only a-sak-ti- 'pursuit', a-su-ti- 'brew' (Vsu-) and 'enlivening' (1/sū-); also abhi-s-ti- m. 'helper' beside abhi-s-ti- f. 'help'.

I See the list in GRASSMANN, Wörterbuch

1719-21; LINDNER p. 76-79.

3 The -a- here often, if not always, belongs

to a verbal stem.

6 This word may be a compound (\*dabhiiti-).

7 yayati-, N. of a man, is according to BR. and GRASSMANN derived from yat-'stretch'.

8 See LINDNER p. 77 f.

<sup>2</sup> The roots tan- 'stretch', ram- 'rest', han-'strike' may retain the nasal: tán-ti- f. 'cord', rán-ti- 'enjoyment' (AV. VS. TS.) beside rá-ti- (VS.), á-han-ti- (VSt.) beside á-ha-ti-'uninjured condition'.

<sup>4</sup> Roots which have the connecting -i- in the past participle, do not take it here: gúp-ti- (AV.) 'protection' beside gup-i-tá-, prádrp-ti- 'arrogance' beside d-drp-i-ta- 'not in- | 'requiring the fulfilment of a wish'.

fatuated' (also á-drp-ta-). These are, however, the only two examples.

<sup>5</sup> But with the connecting -a- accented: am-á-ti- 'lustre', ram-á-ti- (AV.) 'haunt', vratá-ti- 'creeper'.

<sup>9</sup> Compounded with a noun: kama-ka-ti-

b. The suffix is added to a secondary stem in ján-aya-ti- (VS.) f. 'generation'; it seems to have a secondary character in yiva-ti- f. 'maiden', adj. 'young'. It is secondary in paksa-ti (VS.) 'root of the wing'; in the numerals vimśa-ti- '20', sas-ti- '60', and others; in pank ti- f. 'set of five'; in the pronominal words kā-ti 'how many?', tā-ti (AV.) 'so many', yā-ti 'as many as'; and in addhā-ti- m. 'sage', formed from the adverb ad-dhā 'truly'.

### -tu: action and agent.

- 149. The great majority of the words derived with this suffix are infinitives appearing in the form of the dative, ablative-genitive, and accusative cases. Besides these, there are a few action nouns used independently, and still fewer agent nouns. The root is usually accented and takes Guṇa; but the suffix is accented in some half dozen instances, in two or three of which the radical syllable is weakened. The gender is usually masculine, but a few feminines and neuters also occur.
- I. Accented on the root: m.  $\delta$ -tu- 'weft' ( $v\bar{a}$  'weave'),  $kr\dot{a}$ -tu- 'capacity' (kr- 'make'),  $t\dot{a}$ n-tu- 'thread',  $-dh\dot{a}$ -tu-2' element',  $s\dot{a}k$ -tu- 'groats' ( $Vsa\bar{n}j$ -),  $s\dot{c}$ -tu- 'bond' (si- 'bind'),  $s\dot{b}$ -tu- 'libation' (su- 'press'),  $dh\dot{a}$ -tu- adj. 'drinkable' (dhe- 'suck'); m.  $m\dot{a}$ n-tu- 'adviser'; f.  $v\dot{a}$ s-tu- 'morning' (vas- 'shine'),  $s\dot{u}$ -tu-3 (AV.) 'birth'; n.  $d\dot{a}$ -tu- 'division' ( $d\bar{a}$  'divide'),  $v\dot{a}$ s-tu-4 'abode' (vas- 'dwell').
- 2. Accented on the suffix: m. ak-ti/- 'ray'  $(a\tilde{n}j$  'anoint'),  $g\bar{a}$ -ti/- 'way'  $(g\bar{a}$  'go') and 'song'  $(g\bar{a}$  'sing'), jan-ti/- 'creature', hc-ti/- 'cause' (hi- 'impel'); with weak radical vowel: r-ti/- 'season', pi-ti/- 'drink'  $(p\bar{\imath}$  'swell') 5.
- a. The suffix is attached in a few instances (as in some infinitives) with connecting -ī-: dur-dhár-ī-tu- 'irresistible', su-háv-ī-tu- 'to be successfully invoked', tur-phár-ī-tu-6.
- b. The suffix appears in a few instances to be attached to a present or a secondary conjugational stem: edha-til- m. 'welfare' (¿dha-te 'thrives'), tapya-til- adj. 'glowing' (tapyá-te 'is heated'), vaha-til- m. 'wedding' (váha-ti 'conveys'), siṣāsá-tu-7 'desirous of obtaining'; jīvá-til- f. 'life' (jiva-ti- 'lives').
- c. Derivatives formed with -tu are in several instances compounded with the particles dus- and su-: dur-dhár-ī-tu- and dur-dhár-tu- 'irresistible', dur-vár-tu- 'difficult to ward off', duṣ-ṭár-ī-tu- 'unconquerable', su-yán-tu- 'guiding well', su-śró-tu- 'hearing willingly', su-hán-tu- 'easy to slay'; also with a pronoun in sváitu- 'going one's own (sva-) gait' (etu-).

# -tna: action and agent.

150. This suffix is very rare, occurring only in cyau-tná- n. 'concussion', adj. 'animating' (cyu- 'stir') and in rá-tna- n. 'gift' (rā- 'give').

### -tnu: agent.

- 151. This suffix, which is always accented, forms more than a dozen adjectives and a few substantives. It is added to the root either directly or more commonly with the connecting vowel -a- (which probably belongs to the present stem) or -i- (which is almost exclusively used with causative stems).
- 1. Attached directly to the root: kr-tnú- 'active', dar-tnú- m. 'breaker', ha-tnú- 'deadly' (V han-); with reduplication: jiga-tnú- 'hastening' (gam- 'go'), jigha-tnú- 'harming' (han- 'strike').
  - 2. With connecting -a-: kav-a-tnil-8 'miserly', pīy-a-tnil- 'reviling' (pīya-ti

The infinitives always accent the root (105).

Only in the compounds tri-dhātu-' three-fold' and saptā-dhātu-' sevenfold'.

<sup>3</sup> Without Guna.

<sup>4</sup> With lengthened a.

<sup>5</sup> kitu-as 'times' is probably an acc. pl. of a stem ky-tu- 'making'. Cp. BB. 25, 294.

<sup>6</sup> The derivation of this word is uncertain and its meaning is obscure. [Cp. Mahābhāsya Vol. 1, p. 363, 1. 25.]

<sup>7</sup> From the desiderative stem of  $s\bar{a}$ 'obtain'.

<sup>8</sup> Cp. WHITNEY, Roots, under ku- 'design'.

'abuses'), meh-a-tnú-, N. of a river (méha-ti), ā-ruj-a-tnú- 'breaking' (rujá-ti

3. With connecting -i-: drav-i-tnú- 'running' (dru- 'run'); from causative stems: tanay-i-tnii- 'thundering', drāvay-i-tnii- 'hasting' (dru- 'run'), poṣay-i-tnii-'causing to thrive' (V pus-), māday-i-tnú- 'intoxicating' (V mad-), sūday-i-tnú-'causing sweetness to flow' ( $\sqrt{s\bar{u}d}$ -), stanay-i-tni- m. 'thunder' ( $\sqrt{stan}$ -);  $an-\bar{a}may-i-tnu'$ - 'not making ill', 'curative' ( $\sqrt{am}$ -).

### -tra: agent.

- 152. This suffix was doubtless originally formed by a secondary  $-\alpha$  added to -tr (the weak form of tar-). But having early attained an independent character, it came to be largely employed as a primary suffix. It is used to form some half dozen adjectives and about 60 substantives, the latter being neuters except about a dozen (partly masc, and partly fem.)<sup>2</sup>. The substantives generally express the means or instrument by which the action of the verb is performed, sometimes the place where it is performed. The root is generally accented and has Guna; but it is sometimes unaccented and has a weak vowel. The suffix is generally added directly to the root, but in about a dozen instances with a connecting vowel.
- 1. Attached directly to the root: adjectives: jái-tra-3 'victorious', śv $\bar{a}$ -trá-4 'invigorating'; with reduplication: johń-tra- 'calling aloud' ( $\sqrt{h\bar{u}}$ -).
- m. a-trá-5 'eater', ús-tra-6 'buffalo', dáms-tra- 'tusk' (dams- 'bite'), mán-tra-'prayer'; with weak (etymologically doubtful) root: pu-trú- 'son', mi-trá-7 'friend', vr-trá-8 'foe'.
- f.  $\acute{a}$ s- $\acute{r}$ r $\ddot{a}$  'goad' (as'- 'reach'),  $n\ddot{a}$ s- $\acute{r}$ r $\acute{a}$  (AV. VS.) 'destroyer' ( $\sqrt{nas}$ -),  $m\dot{\tau}$ - $tr\ddot{a}$ -'measure', hú-trā- 'sacrifice'.
- n. With accent on the root: d-tra-9 'food', kar-tra- (AV.) 'spell', kgd-tra-'field', kṣṇó-tra- 'whetstone', gá-tra- 'limb', jñá-tra- (VS.) 'intellectual faculty',  $t\acute{a}n$ -tra- 'warp',  $d\acute{a}$ -tra- 'gift',  $d\bar{a}$ -tra- 'knife',  $dh\acute{a}r$ -tra- 'support' (VS. TS.), pát-tra- (VS.) 11 'wing', pá-tra- 'cup', (pā- 'drink'), péṣ-ṭra- (AV.) 'bone', má-tra-(AV.) 'urine', médhra- (AV.) 'penis', yók-tra- 'rope', vár-tra- (AV.) 'dam', vás-tra- 'garment', śró-tra- 'ear', sú-tra- (AV.) 'thread' (sīv- 'sew').

With accent on the suffix and often with an abstract meaning: as-trá-(AV.) 'missile', kṣa-trá-12 'dominion', dā-trá- 'share', deṣ-ṭrá- 'indication' (V dis-), ne-trá- (AV.) 'guidance', rāṣ-ṭrá- 'dominion', śas-trá- (VS.) 'invocation', śās-trá-'command', sat-trá-'sacrificial session', sto-trá-'praise', sthā-trá-'station', ho-trá-'sacrifice'.

2. With connecting vowel -a-: ám-a-tra- 'violent', yáj-a-tra- 'adorable'; kṛnt-á-tra- 'shred', gāy-a-trá- 'song', pát-a-tra- 'wing', vádh-a-tra- 'deadly weapon', f. var-a-trá- 'strap'; with -i-: khan-i-tra- 'shovel', car-1-tra- 'foot', jan-1-tra- 'birthplace', pav-/-tra- 'sieve', bhar-1-tra- 'arm', bhav-/-tra- 'world', san-/-tra- 'gift'; with -u-: tár-u-tra-13 'overcoming'.

I These have mostly masc. forms, some neuter; the only one which has fem. forms is yájatra- 'deserving adoration'.

<sup>2</sup> Six or seven masculines and five femi-

<sup>3</sup> With exceptional Vrddhi of the radical syllable.

<sup>+</sup> From  $sv\bar{a}$ - =  $s\bar{u}$ - 'swell'.

<sup>6</sup> With weak root though accented.

<sup>7</sup> Occurs in the RV. as a n. when it means 'friendship'.

<sup>8</sup> Occurs also as a n. in the RV. when plural.

<sup>9</sup> For át-tra- from ad- 'eat'.

<sup>10</sup> Probably for dát-tra- from the presentstem of dā- 'give'.

only at the end of a compound in the

<sup>12</sup> nakṣatra- 'asterism' is perhaps a com-5 For at-trá-from ad-'eat'. Cp. p. 125, note 1. pound. Cp. above 81, 2 a.

<sup>13</sup> Cp. tar-u-tár- 'victor'.

## -tri: agent.

153. This very rare suffix occurs in only three or four derivatives: á-tri-1 'devouring', sá-tri-m., N. of a man2; with connecting -a in arc-á-tri- 'roaring'; also in the f. form with  $\bar{\imath}$  in  $r\bar{\alpha}$ - $tr\bar{\imath}$ -3 'night'.

## -tru: agent.

154. This suffix is found only in satru-'enemy' for \*sat-tru-, perhaps from sad- 'prevail'.

### -tva: agent.

155. This suffix probably arose by the addition of the secondary suffix -a to action nouns in -tu, which turned them into adjectives used in a gerundive sense. It occurs in about a dozen such derivatives which are almost restricted to the RV.; e. g. kár-tva- 'to be made'.

#### -tha: action.

- 156. This suffix is almost exclusively used to form action nouns (some of which have acquired a concrete meaning) in all genders. The root generally appears in a weak form, as the suffix is mostly accented. The suffix is attached to the root either directly or more commonly with a connecting vowel<sup>5</sup>.
- r. Attached directly to the root: m. ár-tha-7 'goal', gā-thá- 'song', pak-thá-, N. of a man, bhr-thá- 'offering', rá-tha-8 'car', há-tha-9 'slaughter'; in composition with prepositions: sam-i-thá- 'conflict', nir-r-thá- 'destruction', sam-ga-thá- 'union' (gam- 'go'), ud-gī-thá-10 (AV.) 'singing of chants'; in composition with nouns: putra-kṛ-thá- 'procreation of sons', dīrgha-yā-thá- 'long course', go-pī-thá-11 'protection' (pā- 'protect') and 'draught' (pā- 'drink') of milk'.—f.  $k\dot{a}s$ - $th\bar{a}$ - 'course',  $g\dot{a}$ - $th\bar{a}$ - 'song',  $n\dot{t}$ - $th\bar{a}$ - 'trick'.—n. uk- $th\dot{a}$ - 'saying' ( $\sqrt{vac}$ ),  $t\bar{t}r$ -thá- 'ford' ( $t\bar{t}r$ - 'cross'),  $n\bar{t}$ -thá- 'song',  $y\bar{u}$ -thá- 'i 'herd', rik-thá-'inheritance' 13.
- 2. With connecting vowel -á-: ay-á-tha- n. 'foot', uc-á-tha- n. 'praise' (Vvac-), car-á-tha- n. 'mobility', tveṣ-á-tha- m. 'fury', proth-á-tha- n. 'snorting', yaj-á-tha-14 'worship', rav-á-tha- m. 'roar', vaks-á-tha- m. 'growth', vid-á-tha-15 n. 'assembly', śap-á-tha- m. 'curse', śay-á-tha- n. 'lair', śvas-á-tha- m. 'snorting', sac-á-tha- m. 'aid', stan-á-tha- m. 'thunder', stav-á-tha- m. 'praise', srav-á-tham. or n. 'flow'; with prefix: ā-vas-a-thá- (AV.) 'abode', pra-vas-a-thá- n. 'absence', prān-á-tha-16 (VS.) 'respiration'.
- a. With -ū: jár-ū-tha-, m. a kind of demon ('wearing out', jr-), vár-ū-than. 'protection'; with -u: mat-ú-tha-17 m. 'sage'.

<sup>2</sup> For sat-tri- from sat- 'cut in pieces'.

3 In AV. rá-tri- also.

5 The fem. form of the suffix is -tha.

6 This vowel for the most part belongs in reality to a present stem.

7 With accented strong root.

8 The root is uncertain.

9 With root accented though weakened by loss of nasal (han- 'slay').

10 With gā- 'sing' weakened to gī-.

II Both pā- 'protect' and pā- 'drink' are weakened to  $p\bar{i}$ . Cp. above 27.

27 Perhaps from man- with double suffix

(-tu, -tha).

For at-tri- from ad-'eat'. Cp. p. 124, note 5.

<sup>4</sup> See below, Future Passive Participles, 581.

<sup>12</sup> The root in this word is uncertain.

<sup>13</sup> prsthá- 'back' probably contains the root sthā- 'stand', = \*pra-sthá- 'prominent'.

<sup>14</sup> The gender is uncertain, as the word occurs in the dat. sing. only.

<sup>15</sup> Probably from vidh- 'worship': OLDEN-BERG, ZDMG. 54, 608—611; cp. above p. 23, note 10.

<sup>16</sup> When there is a prefix the accent is thrown on the suffix; but pran-(=pra-an-)is treated like a root.

## -thi: agent.

157. As far as can be judged from the very few examples occurring, this suffix was used to form agent nouns. It is attached with or without a connecting vowel. The derivation of all the words which seem to be formed with this suffix is doubtful: át-i-thi- m. 'guest' (if from at- 'wander'); ud-ār-a-thi- adj. 'rising'; me-thi- (AV.) m. 'pillar' (mi- 'fix'). The neuters ásthi- (AV. VS., beside asth-án-) 'bone' and sákthi- (beside sakth-án-) may be formed with the suffix -i.

### -thu: action.

158. This very rare suffix, which is not found in the RV., appears only with the connecting vowel -a- (which in reality belongs to a present stem), forming masculine action nouns: ej-á-thu- (AV.) 'trembling', vep-á-thu- 'quivering', stan-á-thu- (AV.) 'roar'.

### $-n\alpha$ : action and agent.

159. This suffix is in the first place used, like -ta, to form past passive participles<sup>1</sup>; e. g. *bhin-ná*- from *bhid*- 'split'; but, unlike -ta, it is never added to the root with a connecting vowel or to a secondary conjugation stem.

It is further employed to form a number of adjectives and masculine substantives, mostly accented on the suffix. It also forms a few feminine (-nā) and neuter substantives, all but one of the latter being accented on the root. The substantives have partly an abstract and partly a concrete meaning. A medial vowel never takes Guna, but a final vowel nearly always does.

- r. The adjectives (f. -ā) are: áś-ná- 'voracious', uṣ-ṇá- 'hot', ū-ná- 'deficient', ṛ-ṇá- 'guilty', kṛṣ-ṇá- 'black', kṣo-ṇá- 'immovable' (?), nag-ná- 'naked', bradh-ná- 'pale red', śó-ṇa- 'red', śro-ṇá- and ślo-ṇá- (AV.) 'lame', ślakṣ-ṇá- (AV.) 'slippery', śvit-na- 'white', syo-ná- 'agreeable'; compounded: an-āmṛ-ṇá- 'inviolable', á-rūkṣ-ṇa- (AV.) 'tender', sadā-pṛ-ṇá- 'always munificent'.
- 2. Substantives are: m. ghr-ná- 'heat', budh-ná- 'bottom', bhrū-ná- 'embryo', yaj-ñá- 'sacrifice', śye-ná- 'eagle', ste-ná- 'thief'; sam-praś-ná- 'question'; accented on root: áś-na- 'stone', kár-na- 'ear', vár-na- 'colour', śúṣ-na-, N. of a demon, sváp-na- 'sleep'.— n. tf-na- 'grass', dhá-na-² 'booty', par-ná- 'wing', vas-ná- 'price', śíś-na- 'penis', śu-ná- 'welfare', śń-na- 'want', si-na- 'property'.— f. tŕṣ-nā- 'thirst', dhá-nā- 'milch cow', sá-nā- 'missile', sthň-nā- 'post'.

#### -nas: action.

160. This suffix, which has the same meaning as -as and -tas, is used in forming a few action nouns which have mostly acquired a concrete sense. These are dp-nas- n. 'possession', dr-nas- n. 'flood', -bhar-nas-3 'bearing'(?), rdk-nas- n. 'property left by bequest' (ric- 'leave'). With connecting vowel: drdv-i-nas- n. 'movable property' (dru- 'run'), pdr- $\bar{v}$ -nas- m. 'abundance' ( $p\bar{r}$ - 'fill'). It also appears in the agent noun ddm- $\bar{w}$ -nas- adj. 'domestic', m. 'friend of the house' (dam-).

# -ni: action and agent.

r6r. This not very frequent suffix is employed to form m. and f. action nouns as well as agent nouns (adjectives and substantives). Either the radical vowel or the suffix may be accented; and the root in several instances takes Guna. The feminines have rarely an abstract sense, having generally acquired a concrete meaning.

<sup>2</sup> Probably from dhā- 'place'.

<sup>&</sup>lt;sup>1</sup> For a list of these see below 576.

- r. The feminines are: jūr-ni- 'heat', -jyā-ni- '(AV.) 'injury', me-ni- 'missile', s'ré-ni- 'line', s'ré-ni- 'hip', sr-ni- and sr-ni- 'sickle'; masculines are: ghr-ni-2 'heat'. vó-ni- 'receptacle'.
- 2. Agent nouns, adjectives and m. substantives, are: ag-n/- m. 'fire'. jūr-ni- 'singeing', tūr-ni- 'speeding', dhar-ni- m. 'supporter', pṛś-ni- 'speckled'. pre-ni- 'loving' (1/prī-), bhūr-ni- 'excited', váh-ni- m. 'draught animal', zýs-niand vrs-nl- 'virile', m. 'ram'.
  - a. The suffix occurs with a connecting -u- in hrād-il-ni- f.(?) 'hail' 3.

### -nu: action and agent.

162. With this suffix is formed a small number of action and agent nouns of all genders, but mostly masculine. The action nouns often have a concrete meaning. As the suffix is almost invariably accented, the radical vowel, with one exception, never shows Guna. This suffix, like -tu, is sometimes preceded by  $-\alpha$  (which really belongs to present stems).

1. The substantives occurring are: kṣep-nú- m. 'jerk' (x. 516), da-nu-4 m. f. 'demon', f. 'dew', n. 'drop', dhe-nii- f. 'cow', bhā-nii- m. 'light', vag-niim. 'sound', v/s-nu-5 m., N. of a god,  $s\bar{u}-nh-$  m. 'son',  $sth\bar{u}-nh-6$  m. 'pillar'; with connecting -a-: krand-a-nii- m. 'roaring', ksip-a-nii- m. 'missile', nad-a-nii-

m. 'roaring', nabh-a-nú-7 m. 'fountain'8.

2. Adjectives are: grdh-nú- 'hasty', dhṛṣ-nú- 'bold'; with connecting -a-: the compound vi-bhanj-a-nil- 'breaking to pieces'.

### -pa: concrete substantives.

163. A few words are formed with this suffix, but the origin of all of them is more or less obscure. These are: pi/s-pa- n. 'flower', stu-pi/- 10 (VS.) m. 'tuft', stń-pa-10 m. 'top-knot'; perhaps also tál-pa- m. 'couch', śńs-pa- (VS.) n. 'blade of grass', s'il-pa (VS.) n. 'ornament', s'ir-pa- (AV.) 'winnowing basket': possibly apū-pά- m. 'cake', úla-pa- m. 'shrub', kúna-pa- (AV.) n. 'corpse'<sup>11</sup>.

## -ma: action and agent.

- 164. This suffix forms a considerable number of action nouns (almost exclusively masculine) as well as agent nouns, both adjectives and substantives. Only a single neuter and one or two feminine substantives occur. The suffix is accented more than twice as often as the root. The vowel r always takes Guna in the radical syllable; on the other hand, initial or medial i and u never take Guna; when final they only do so if the root is accented. Several of these derivatives in -ma appear beside others in -man; some at least are transfers from the latter; thus dhár-man-'ordinance' alone is found in the RV., while dhár-ma- appears beside it in the later Samhitas.
- I. Accented on the suffix: adjectives: e. g. jih-má- 'oblique', tig-má-'sharp', das-má- 'wondrous', bhī-má- 'terrible', śag-má- mighty'; with reduplication.

<sup>2</sup> Beside ghṛ-ná- m. and ghṛ-ṇā- f. 3 This suffix is in several words preceded by -a, much in the same way as -i; but similarly formed, but with long  $-\bar{a}$ . as -ani has assumed a more independent characteritis treated above (122) as a separate | 496. suffix.

4 With irregular accent.

7 Also nabh-anń- f.

8 The Proper Name kṛś-ánu- is perhaps.

9 Cp. Lindner p. 69; Liden, IF. 18,

10 Probably from a root stu- 'drip'; see WHITNEY, Roots.

11 yπρα- m. 'sacrificial post' is probably

In sarva-/yāni- (AV.) 'complete loss of property'.

<sup>5</sup> Perhaps originally an adjective \*ข่ร-ทน์-, with shift of accent on becoming a Proper derived from yup- 'obstruct'. Name. But cp. p. 85, note 1.

<sup>6</sup> The origin of the cerebral " here is obscure.

tūtu-má- 'powerful'; substantives: m. aj-má- 'course', idh-má- 'fuel', ghar-má- 'heat', dar-má- 'breaker', dhū-má- 'smoke', nar-má- (VS.) 'jest', ruk-má- 'ornament', hi-má- 'cold'.

- 2. Accented on the root: substantives: m. e. g. h-ma- 'friend' (av-favour'), e-ma- (VS.) 'course', dhár-ma- (AV. VS. TS.) 'ordinance', bhá-ma- 'brightness', sár-ma- 'flow', só-ma- 'Soma' (V su-), stó-ma- 'praise' (V stu-), hó-ma- 'offering'; f. h/-mā- 'winter'; n. b/l-ma- 'chip'.
- a. The suffix seems to be added once with connecting  $\cdot a$  (which really belongs to a present stem) in the f.  $sar \cdot \hat{a}$ - $m\bar{a}$  'the fleet one', N. of a goddess.

### -man: action and agent.

- 165. This suffix forms a large number of derivatives, which are almost exclusively action nouns. The great majority of these are neuters accented on the root, but there are also a good many masculines accented on the suffix. Besides these occur a few agent nouns, mostly accented on the suffix, both adjectives and masculine substantives, all of them, except brah-mán-'priest', of rare occurrence. The same word in several instances varies in meaning according to the accent and gender<sup>2</sup>; e. g. dhár-man- n. ordinance', m. dhar-mán- 'ordainer'. The root in these derivatives usually takes Guṇa; in a few instances it has Vṛddhi or lengthens a; sometimes it is weak. The suffix is often added with the connecting vowels -i- or -ī-. The derivatives are occasionally compounded with prepositions, which are then nearly always accented.
- I. Examples of action nouns are: n. ád-man- 'food', á-man- 'course', kár-man- 'action', kárs-man- 'goal', ján-man- 'birth', trá-man- 'protection', dấ-man- 'gift' (dã- 'give') and 'bond' (dã- 'tie'), nấ-man- 'name', pát-man- 'flight', bráh-man- 'devotion', bhár-man- 'table', bhá-man- 'world', vák-man- 'invocation', várt-man- 'course', vés-man- 'dwelling', sák-man- 'power', sás-man- 'praise',  $s\dot{a}k$ -man- 'power',  $h\dot{s}$ -man- 'sacrifice' (Vhu-) and 'invocation' ( $Vh\bar{u}$ -); with connecting -i-: ján-i-man- 'birth', vár-i-man- 'expanse' (beside var-i-mán- m.); with connecting -ī-: dár-ī-man-'destruction', dhár-ī-man-'ordinance', pár-ī-man-3 'abundance', bhár-ī-man- 'maintenance', vár-ī-man- 'expanse', sár-ī-man- 'course', sáv-ī-man- 'impulse' +, háv-ī-man- 'invocation'. — m. ūṣ-mán- (AV. VS.) 'heat', o-mán- 'favour', jc-mán- (VS. TS.) 'superiority', drāgh-mán- (VS.) 'length' (beside drāgh-i-mán-), pāp-mán- (AV.) 'wickedness', bhū-mán- 'abundance', vid-mán-'knowledge', sväd-mán- 'sweetness', he-mán- 'impulse'; with connecting -i-: jar-i-mán- 'old age', práth-i-mán- 'breath', mah-i-mán- 'greatness', var-i-mán-, vars-i-mán- (VS.) 'height' (beside várs-man- and vars-mán-), har-i-mán-'yellowness'.
- 2. Agent nouns accented on the suffix are: dar-mán- 'breaker' dā-mán- 'giver', dhar-mán- 'supporter', brah-mán- 'one who prays', bhuj-mán- 'fertile', τad-mán- 'speaker', sad-mán- 'sitter', so-mán- 'Somapresser'; accented on the root: áś-man- 'stone', δ-man- 'friend', jδ-man- 'superior', bhás-man- 'chewing's.
- a. The following words are according to difference of accent neuter action nouns or masculine agent nouns då-man- 'gift' and dā-mán- 'giver'; dhár-man- 'ordinance' and dhar-mán- 'ordainer'; bráh-man- 'worship' and brah-mán- 'priest'; sád-man- 'seat' and sad-mán- 'sitter'.

For lists of these see Grassmann, Wörterbuch 1730 f.; LINDNER p. 91-93.

<sup>&</sup>lt;sup>2</sup> Somewhat in the same way as the derivatives in -as (126).

<sup>3</sup> Also with anomalous -e-: pár-e-man-(SVI.).

<sup>4</sup> Also står-ī-man-'spreading' used in the loc. as an infinitive.

<sup>5</sup> In a compound also svādu-kṣád-man-having sweet food'.

b. In a few words difference of gender and accent is not accompanied by difference of meaning: várṣ-man- n. and varṣ-mán- m. both mean 'height'; svád-man- n. and svāa-mán- m. 'sweetness'; vár-i-man- n. and var-i-mán- m. 'expanse'.

c. In a few instances difference of accent is accompanied by a reversal of the usual distinction of meaning: jė-man- 'victorious', je-mán- (VS. TS.) 'superiority'; ó-man-m. 'friend', o-mán- m. 'favour'.

d. A few derivatives in -man both action and agent nouns are compounded with prepositions: vi-gā-man- n. 'step', prá-bhar-man- n. 'presentation', prá-yā-man- n. 'departure', vi-dhar-man- m. 'maintainer', vi-pat-man- iflying through', ánu-vart-man- (AV.) 'following after', vi-sar-mán-2 m. 'flowing asunder'.

### -māna: agent.

**166.** This suffix is used to form the present<sup>3</sup>, future, and a rist middle participle and the present passive participle<sup>4</sup>. It is always preceded by a except in the anomalous perfect participle sasr-maná- (= sasr-aná-) 'speeding'.

### -mi and -m $\bar{i}$ : action and agent.

### -min: agent.

**168.** A few adjectives have the appearance of being formed with a suffix -min. They are is-min-'impetuous',  $bh\bar{a}$ -min-'shining', sus-min-'roaring'. They may, however, be explained as secondary derivatives made with the suffix -in, like  $dh\bar{u}m$ -in- from  $dh\bar{u}m$ -'smoke'.

## -ya: gerundive.

169. This suffix is used to form a large number of future participles passive. It probably has a primary character in other derivatives besides these; but it is so difficult to distinguish them from those which are secondary, that it is preferable to treat all but gerundives under secondary -ya (228).

## -yu: action and agent.

170. This suffix forms a few action and agent nouns. The root remains unchanged, while the accent varies. Action nouns are: man-yú- m. 'anger', mrt-yú- m. 'death'. Agent nouns are: dás-yu- m. 'enemy', druh-yú-, N. of a man ('hostile'), śim-yu- 'enemy'; bhuj-yú- both adj. 'wealthy' and m. as N. of a man. Adjectives only are: yáj-yu- 'pious', śundh-yú- 'pure', sáh-yu- 'strong'.

### $-r\alpha$ : agent.

171. A large number of derivatives are formed with this suffix, which is usually accented, the root consequently almost always appearing with a weak vowel. These words are mostly adjectives, but a few substantives occur in all genders. The suffix is frequently added with the connecting vowels  $-\alpha$ -, -i-, -i-,  $-\nu$ -.

<sup>2</sup> With unusual accent on the suffix instead of on the preposition.

3 In the a-conjugation.

7 See LINDNER 78, p. 100—102; WHITNEY 1188.

I Or as a Bahuvrīhi 'having the flight of a bird' (vi-).

<sup>4</sup> See below under those tenses, 427, 435, 442, 447; 512, 538; and cp. Delerück, Verbum 226; LINDNER 72.

<sup>5</sup> The only form occurring krudhmi, N. pl. n. might, however, come from krudh-

<sup>&</sup>lt;sup>6</sup> See below, Future participles passive, 578; cp. Delbrück, Verbum 230; LINDNER 76, p. 96—99.

I. Of derivatives accented on the suffix there are more than 60 adjectives; e. g. ak-rá- 'swift', ug-rá- 'mighty', cit-rá- 'bright', tu-rá- 'strong', mū-rá- 'stupid', śak-rá- 'mighty', śuk-rá- 'bright', hiṃs-rá- 'injurious', Substantives are: m. us-rá- 'bull', kṣu-rá- 'razor', mṛdh-rá- 'foe', rud-rá-, N. of a god, vam-rá- 'ant', vī-rá-'man', śūd-rá- 'man of the fourth caste'; n. abh-rá- 'cloud', kṛch-rá- 'distress', kṛū-rá- (AV. VS.) 'wound', kṣī-rá- 'milk', khid-rá- 'weight', rip-rá- 'defilement', sī-rá- 'plough'; f. hi-rā- (AV. VS.) 'vein'.

a. With connecting vowel -a-: drav-a-rá- 'running', pat-a-rá- 'flying', ny-oc-a-rá- (AV.) 'suiting' i; n. gambh-a-rá- 'depth', tas-a-rá- 'shuttle' 2; with i: aj-i-rá- 'swift', is-i-rá- 'lively', dhvas-i-rá- 'stirring up', badh-i-rá- 'deaf', mad-i-rá- 'pleasing', rudh-i-rá- (AV.) 'red', sphi-rá- 'fat'; m. khad-i-rá-, a kind of tree; n. sar-i-rá- (VS.) 'wave'; with ī: gabh-ī-rá- and gambh-ī-rá- 'deep';

with u: amh-u-rá- 'narrow', vith-u-rá- 'tottering'.

2. Of stems accented on the root the only adjectives are: grdh-ra'greedy', tim-ra- 'stout', dht-ra- 'wise', vip-ra- 'inspired'; substantives are:
m. új-ra- 'field', ind-ra-, N. of a god, váj-ra- 'thunderbolt', várdh-ra- (AV.)
'girth', śń-ra- 'hero'; n. ág-ra- 'point', rándh-ra- 'hollow', śvábh-ra- 'pit';
f. dhá-rā- 'stream', śip-rā- 'jaw', sil-rā- 'intoxicating liquor'.

a. With connecting vowel -i-: stháv-i-ra- 'firm'; m. áng-i-ra-, N. of a seer, ás-i-ra- 'missile'; with -ī-: śáv-ī-ra- 'mighty'; n. śár-ī-ra- 'body';

with -u-: m. ás-u-ra- 'spirit', bák-u-ra- 'trumpet'.

a. A few of these derivatives are compounded with prepositions: ni-ci- $r\acute{a}$ - 'attentive', ni-mrg-ra- 'attached'; m.  $\bar{a}$ -kha- $r\acute{a}$ - 'lair', sam-ud- $r\acute{a}$ - 'sea'.

## -ri: agent.

172. This suffix forms adjectives as well as m. and f. substantives. It is sometimes added with connecting -u-. The root is more frequently accented than the suffix.

Adjectives are: bhū-ri- 'abundant', vádh-ri- 'emasculated', śubh-ri- 'beautiful'; with connecting -u-: jás-u-ri- 'exhausted', dūś-u-ri- 'pious', sáh-u-ri-

'mighty'.

2. Substantives are: m. áṅgh-ri- (VS.) 'foot', jī-ri- 'flowing water', sū-ri- 'patron'; f. ábh-ri- (AV. VS.) 'hoe', áś-ri- 'edge', is-ri- 'dawn', vánk-ri- 'rib'; with connecting -u-: aṅg-h-ri- 'finger'; -rī occurs in tand-ri- (AV.) 'weariness'.

#### -ru: agent.

173. This rare suffix forms adjectives and a very few neuter substantives. It is added either directly to the root or with a preceding -a-,  $-\bar{a}$ -, or -e-. Either the root or the suffix may be accented.

1. Adjectives are: cά-ru- 'dear', dhā-rú- (AV.) 'sucking', pé-ru- 'causing to swell' (p̄-), bh̄-rú- 'timid'; ar-á-ru- 'hostile', pat-á-ru- 'flying'; jáb-ā-ru- '(RV'.) 'speeding', ply-ā-ru- 'reviling', vand-á-ru- 'praising', sar-á-ru- 'injurious'; mad-e-rú- 'intoxicating', san-é-ru- 'obtaining'.

2. Substantives are: n. áś-ru- 'tear', śmás-ru- 'beard'.

### $-l\alpha$ : agent.

174. This rare suffix, a later form of -ra, is equivalent in sense and use to the latter, sometimes also interchanging with it. It forms adjectives and a

<sup>1</sup> bhārvará- (of doubtful meaning) is probably a secondary formation, and vāsará- 'matutinal' seems to be derived from vasar- 'morning'.

<sup>&</sup>lt;sup>2</sup> Also -rkṣará- 'thorn' m. in an-rkṣará- 'thornless'.

<sup>3</sup> Perhaps for \*jāv-ā-ru- from jū- 'speed'.
4 The suffix is secondary in mitrė-ru- 'ally'.

few masculine and neuter substantives. The radical syllable is accented in two or three substantives only. The suffix is added either directly to the root or with the connecting vowels -a-, -i-, -u-.

Derivatives thus formed are: -pā-lá-(VS.) m. 'guardian' in aja-pālá-(VS.) 'goat-herd', śuk-lá- (AV.) n. 'white colour' (beside śuk-rá- 'white'), sthū-lá-(AV.) 'thick' (beside sthū-rá-); with connecting -a-: trp-á-la- 'joyous', bhrma-lá- (AV.) 'torpid', mús-a-la- (AV.) m. 'pestle', śab-á-la- 'mottled', śám-a-la-(AV.) n. 'defilement'; with -i-: án-i-la- m. 'wind', trd-i-lá- 'porous', sal-i-lá- 'surging' (beside sar-i-rá- VS. 'flood'); with -u-: tanḍ-u-lá- (AV.) m. 'grain', śak-u-lá- (AV. VS.) m., a kind of fish.

## -li and -lu: agent.

175. The suffix -li occurs only once as the equivalent of -ri in aṅg-i-li-(VS<sup>I</sup>.) f. 'finger' (beside aṅg-i-l-ri-). Similarly -lu occurs only once as the equivalent of -ru in patayā-li- (AV<sup>I</sup>.) 'flying', formed from the conjugation stem patáya- (from pat- 'fly').

### -va: agent.

- 176. This suffix forms about 20 adjectives and seven or eight substantives, mostly masculines with a concrete meaning. With one or two exceptions it is added directly to the root. The accent is rather oftener on the suffix than on the radical syllable. The root hardly ever appears in a strengthened form.
- I. Accented on the suffix are the adjectives:  $\overline{u}rdh$ - $v\acute{a}$  'upright', rk- $v\acute{a}$  'praising', rs- $v\acute{a}$  'lofty', tak- $v\acute{a}$  'swift', dhru- $v\acute{a}$  'fixed', pak- $v\acute{a}$  'ripe', mal- $v\acute{a}$  (AV.) 'foolish', yah- $v\acute{a}$  'swift', ran- $v\acute{a}$  'joyful',  $vi\acute{s}$ - $v\acute{a}$  'all',  $\acute{s}ik$ - $v\acute{a}$  (AV.) 'deft',  $\acute{s}y\bar{a}$ - $v\acute{a}$  'dark brown', hras- $v\acute{a}$  (VS.) 'short'; the substantives: m.  $\overline{u}r$ - $v\acute{a}$  'stall',  $\acute{s}ar$ - $v\acute{a}$  (AV.) 'rime'; vidh- $\acute{a}$ - $v\bar{a}$  'widow'.
- 2. Accented on the root are: fbh-va- 'skilful', é-va- 'quick', m. 'course', pt-va- 'fat', ptr-va- 'preceding', vtk-va- 'twisting', vts-va- 'all', str-va- 'all'; m. ts-va- 'horse', khtl-va- (AV. VS.), a kind of grain, srtk-va- 'corner of the mouth'; f. tm-\tau-va- 'disease' \( \frac{3}{2} \).
- a. A few such derivatives occur only compounded with prefixes: á-khar-va- 'not shortened', áti-kulva- (VS.) 'too bald', vi-bhá-va- 'brilliant'.

#### -van: agent.

177. This suffix is used almost exclusively to form agent nouns<sup>4</sup>, both adjectives and substantives, which are mostly masculine, but sometimes neuter. Though the root is regularly accented<sup>5</sup>, it almost invariably appears in its unstrengthened form. If it ends in a short vowel -t- is added before the suffix. The feminine of these words is regularly formed with -varī (179 a).

Examples of adjectives are: fk-van-'praising', kf-t-van-'active', dr'lh-van-'injurious', pát-van- 'flying', pź-van- 'fat', yáj-van- 'sacrificing', rá-van- (VS.)

T Cp. Brugmann, Grundriss 2, p. 126.
Cp. Roth, KZ. 19, 223; Brugmann, Grundriss 2, p. 126.

<sup>3</sup> Also n. úlba- 'caul' if this stands for \*úlva- from vṛ- 'cover'.

<sup>4</sup> The only action nouns are the few which in the active are employed as infinitives; op. WHITNEY 1169 e.

<sup>5</sup> The only exceptions are two words formed with the connecting vowel -i-, mūṣ-i-vān- 'robber', san-i-t-van- 'bestower', and two others from the reduplicated root, rārā-van- 'liberal', cikit-vān- 'wise'.

'bestowing', śák-van- (VS.) 'able', sú-t-van- 'pressing Soma'; substantives: m. ádh-van- 'road', ár-van- 'steed', grá-van- 'stone'; n. t/g-van- 'ford', dhánvan- 'bow' and 'desert', pár-van- 'joint', sná-van- ' (AV. VS.) 'sinew'.

a. Several derivatives with -van are compounded with prepositions; thus ati-şkádvan- (VS.) 'transgressing', upa-hás-van- 'mocking', vi-vás-van- 'shining forth', vi-mṛ'g-van- (AV.) 'cleansing', sam-bhṛ'-t-van- (AV.) 'accumulating' 2.

### -vana, -vani, -vanu: agent.

178. These rare suffixes are doubtless secondary forms of -van. They are all three accented: -vana and -vanu on the final, -vani on the first syllable. With -vana are formed: vag-vaná- 'talkative', sat-vaná-, m. 'warrior' (beside  $s\acute{a}t$ -van-), and from the reduplicated root  $\acute{s}u\acute{s}uk$ - $van\acute{a}$ - 'shining' ( $\bigvee \acute{s}uc$ -). The suffix -vani seems to be preferred for derivatives from the reduplicated root; thus besides tur-váni- 'overcoming', bhur-váni- 'restless', occur jujurváni- 'praising', tutur-váni- 'desiring to gain', dadhrs-váni- 'daring', susuk-váni-'shining' (V suc-); the obscure word arharisváni- 'exultant' seems to be derived with this suffix from an irregularly reduplicated form of hrs- 'be excited'. With -vanu is formed only vag-vanu- m. 'noise'.

### -vara, -vala: action and agent.

179. This suffix makes a few masculine nouns (f. -7) chiefly accented on the final syllable of the suffix, and a very few neuter substantives accented on the root. The masculines are: i-t-vará- 'going', is-vará- (AV.) 'able', phár-vara- 'sower', vyadh-vará- (AV.) 'piercing' 3 (Vvyadh-). Neuter substantives are: kár-vara- 'deed', gáh-vara- (AV.) 'thicket'. There are also two feminines which have the appearance of being derived with this suffix, ur-várā- 'field' and ur-várī- (AV.) 'filament', but their origin is uncertain. This suffix appears with l instead of r in vid-vala'- 'cunning'.

a. The f. of this suffix, -varī, is used as the f. of adjectives in -van, with which it corresponds in accent and treatment of the radical syllable. There are about 25 of these feminines in the RV.; e. g. yáj-varī- 'pious', sr-t-varī- 'speeding' 4.

# -vas: action and agent.

180. This very rare suffix forms only the neuter subtantive vár-i-vas-'wide space' (beside vár-i-man-) and the adjectives fbh-vas- 'skilful' (beside fbh-va- and fbh-van-) and sik-vas- 'skilful' (beside sik-van-). The vocative khid-vas (vi. 224) 'oppressing' is probably from a perfect participle khidvāms-5 formed without reduplication, not from a stem khid-vas-.

## -vāms: agent.

181. This suffix is used to form a large number of perfect participles active, being added with or without the connecting vowel -i-; e. g. cakr-vāns-'having done', vi-i-váns- 'having gone'; sometimes without reduplication; e.g. vid-vāms- 'knowing'6. This suffix, which is always accented, is in the weak cases reduced to -21s- before vowels7.

I On two or three doubtful derivatives | nines occurring in the AV. see his Index with this suffix see WHITNEY 1169 b.

<sup>&</sup>lt;sup>2</sup> Several others are compounded with nouns; see LINDNER p. 107.

<sup>3</sup> According to the Pada text vi- it is derived from Vkhād-. adhvará-.

<sup>4</sup> See WHITNEY 1171 b; for such femi-

Verborum 375.

<sup>5</sup> Cp. pw.; in BR. the stem is given as khid-van-. According to WHITNEY 1173 b,

<sup>6</sup> For the forms occurring see below 492. 7 See Declension, -vāms stems, 347.

## -vi: agent.

r82. This rare suffix is used to form some half dozen adjectives and one f. substantive, partly from the simple root (which is accented), partly from the reduplicated root (of which the reduplicative syllable is accented). The adjectives are: ghṛṣ-vi- 'lively', jir-vi-¹ (AV.) 'aged', dhril-vi- 'firm'; jāgṛ-vi- 'watchful', dā-dhṛ-vi- 'sustaining', dī-di-vi- 'shining'²; f. dār-vi-³ 'ladle'.

### -vit: agent.

183. This suffix, which is perhaps an extension of -vi with -t, occurs in the single form cikit-vit (RV<sup>1</sup>.) 'deliberately'.

### -sa: agent.

r84. This suffix is used to form about two dozen adjectives and substantives of all genders. It is added to the root with or without the connecting vowels  $-\bar{i}$  or  $-\bar{u}$ . The accent is sometimes on the suffix, sometimes on the root, which is usually unstrengthened. Many of these derivatives are of obscure origin.

The suffix is added direct in: grt-sa- 'adroit', -drk-sa-4 (VS.), prk-sá- 'dappled' (Vprc-); út-sa- m. 'fountain', kút-sa-, N. of a man, ghram-sá- m.

'sun's heat', drap-sá- m. 'drop', ruk-sá- m. 'tree';  $bh\bar{\iota}$ -sá-5 f. 'fear'.

a. The suffix is added with a connecting vowel  $(-\bar{i}, -\bar{u})$  in: tav-i- $s\acute{a}$ - $s\acute{a}$ 

### -sani: agent.

185. This suffix is found only in the derivatives car-sant 'active', f. pl. 'people', and par-sant 'carrying across' (pr- 'cross').

### -sara: agent.

186. This suffix appears only in *mat-sará-* 'intoxicating' (*V mad-*) and perhaps in *sap-sará-* (I. 168°) 'inspiring awe'(?) if derived from *sap-* 'do homage'.

#### -sas: action.

187. This suffix seems to be contained in  $v\acute{a}p$ -sas- (RV\*.) 'beauty'(?)", and possibly in  $t\acute{a}r$ - $\bar{u}$ -sas- (RV.) 'superior' (Vtr-).

#### -sna: agent.

188. This suffix (perhaps syncopated for -sana) forms some half dozen adjectives and m. or n. substantives: tīk-ṣṇá- 'sharp' ( $\sqrt{tij}$ ), de-ṣṇá-<sup>11</sup> n. 'gift'

7 The f. is máhisī-.

I From jr-' age'; see WHITNEY's note on AV. XIV. 121. The RV. has jiv-ri-.

The derivation of pra-pharvi- (RV1.) is

uncertain.
3 In VS. dárvī- in the vocative darvi.

<sup>4</sup> In *ī-dṛk-ṣa-* (VS.) 'looking like this' 'such' (from *dṛś-* 'see').

<sup>5</sup> Only in the I. s. *bhīṣā* which is a contraction for *bhiyasā*.

<sup>6</sup> The f. is távisī-.

<sup>&</sup>lt;sup>8</sup> The absence of cerebralization in the s, together with the b, makes the origin of this word quite uncertain; it is most probably borrowed.

<sup>9</sup> The f. is árușī.

<sup>\*</sup>O This is Sāyaṇa's interpretation of the word.

<sup>11</sup> Generally to be read trisyllabically as da-işná.

(dā- 'give'), ślak-ṣṇá-(AV.) 'smooth'; with connecting -a-: kar-á-sna- m. 'forearm', mát-a-sna-, n. 'lung', vadh-a-sná- n. 'deadly weapon'.

#### -snu: agent.

- 189. This suffix, which is always accented, forms adjectives, being added with or without a connecting vowel to the simple root, or more usually with connecting -i- to the causative stem.
- I. From the simple root: ji-sn/u- 'victorious', dank-sn/u- (VS.) 'biting' (Vdams'-), ni-sat-smi-'sitting down'; vadh-a-sni-'murderous', vrdh-a-sni-'joyous'; car-i-sni-'wandering', d-mavisnu-' (x. 94'') 'immovable ( $\sqrt{m\bar{u}}$ -  $m\bar{v}$ -).
- 2. From the causative stem: tapay-i-snil- 'tormenting', namay-isnil-'bending', patay-i-snii- 'flying', pāray-i-snii- 'saving', posay-i-snii- (AV.) 'causing to thrive', māday-i-ṣṇi/- 'intoxicating', abhi-śocay-i-ṣṇii- (AV.) 'causing torments'.

### II. Secondary Nominal Derivation.

LINDNER, Altindische Nominalbildung p. 114-52. - Whitney, Sanskrit Grammar p. 454—80.

190. Secondary nominal stems are those derived from stems already ending in a suffix. They, however, include derivatives from pronominal roots, as 1-tara- 'other', and exceptionally from indeclinable words or case-forms, as antár-vant- 'pregnant' (antár 'within'), māma-ka- 'belonging to me' (máma 'of me)'. The stem to which secondary suffixes are added is subject to certain changes. Thus final -a and -i vowels are regularly dropped before suffixes beginning with a vowel or y, while final -u generally takes Guna; thus as'v-in-'possessing horses' (áśva-), khād-in- 'adorned with rings' (khādi-), vāyav-yà-'relating to the wind' ( $v\bar{\alpha}v''$ ). Again, the n or the a of stems ending in -an is occasionally lost, e. g. vrsa-tvá- 'manly power', vrsu-ya- 'manly' (but visan-vant- 'drawn by stallions'); while stems in -ant regularly appear in the weak form of -at, e. g. váivasvat-a- 'son of Vivásvant'. The commonest change is, however, the strengthening of the initial syllable with Vrddhi2, e. g. āmitrá- 'hostile' (a-mitra- 'enemy'), pārthiv-a- 'relating to the earth' (prthivž-), maitrāvaruná- 'derived from Mitrá-váruṇa', sáubhaga- 'luck' (subhágα- 'lucky').

As regards meaning, the great majority of secondary suffixes form adjectives with the general sense of 'relating to' or 'connected with'. several, however, the meaning has become specific. Thus the suffixes -ayana, -i, -eya, form patronymics or metronymics; -in, -mant, -vant express possession; -tama and -tara imply degrees of comparison; -ta and -tva form abstract substantives. The masculines and feminines of adjectives are frequently used as appellatives, while the neuter is commonly employed as a substantive expressing the attributive sense of the adjective as an abstraction.

a. The secondary suffixes are in their alphabetical order the following: -a,  $-\bar{a}$ ,  $-\bar{a}n\bar{i}$ ,  $\bar{a}yana$ ,  $\bar{a}y\bar{i}$ ,  $\bar{a}yya$ , -i, -in, -ima, -iya,  $-\bar{i}$ ,  $-\bar{i}na$ ,  $-\bar{i}ya$ ,  $-en\bar{i}$ , -enya, -eya, -eyya, -ka, -ta, -tana and -tna, -tama, -taya, -tara, -tavya, -tā, -tāt, -tāti, -tya, -tva, -tvatā, -tvana, -tha, -na, -nī, -bha, -ma, -mant, -maya, -min, -mna, -ya, -yin, -ra, -la, -va, -vat, -van, -vant, -vaya, -vala, -vin, -vya, -śa.

as devá-'divine' (div-'heaven'), dróna-'wooden vessel' (drí-'wood'), bhesaj-á- 'medicine' (bhisáj- 'healing'); cp. 191 a α.

Thus derived in pw.; in BR. emended | hand, extremely rare in secondary derivation, to á-marisnu- 'immortal'; in Grassmann explained as áma-vismu- 'mit Ungestüm andringend'.

<sup>2</sup> Strengthening with Guna is, on the other

- 191. With the suffix -a is formed a very large number of derivatives which are primarily adjectives expressing the sense of relation to or connexion with the primitive word; in the m. and f. they are, however, often used as appellatives, and in the neuter as abstracts. The first syllable of the primitive word, whether it is simple or compound is in the great majority of instances strengthened with Vrddhi; e. g. marut-a- 'relating to the Maruts' (marut-),  $m\bar{\alpha}ghon-a-$  n. 'bountifulness' (maghávan- 'bountiful') ,  $d\bar{\alpha}sar\bar{\alpha}j\tilde{n}-\dot{\alpha}-$  'battle of the ten kings' (daśa-rājan-)2; jaitr-a- 'victorious' (jê-tr- 'conqueror'), tvāṣṭr-á-'belonging to Tvastr'; mānav-á- 'belonging to man' (mánu-), tắnv-a-3 'belonging to the body' (tani-); sārasvat-á- 'coming from the Sarasvatī', aindrāgn-á-(AV. VS. TS.) 'belonging to Indra and Agni' (indrāgni'); yāmun-á- (AV.) 'coming from the Yamuna'; vādhryaśv-a-4 'descended from Vadhryaśvá', vaiśvadev-á- (AV. VS.) 'sacred to all the gods' (viśvá-deva-).
- a. A comparatively small number of derivatives add the suffix without taking Vrddhi. These are probably to a considerable extent due to transfers from other declensions to the a-declension. Such are tamas-á- (AV.) 'darkcoloured', parus-á- 'knotty' (párus- 'knot'), hemant-á- 'winter'; ápāk-a- 'distant' (άρāñc- 'behind'); hotr-á- 'office of priest' (hótr-); sakhy-á- 'friendship' (sákhi-'friend').
- a. With Guna are formed tray-á- 'threefold' (tri- 'three'), dvay-á- 'twofold' (dvi-'two'), náv-a- 'new' (nú- 'now'); dev-á- 'divine' (dív- 'heaven'), bheṣaj-á- 'medicine' (bhiṣáj-'healer').
- 192. The suffix  $-\bar{a}$  is used in a very large number of stems to form the feminine of adjectives which in the masculine and neuter end in -a. Thus  $n \dot{a} v - \bar{a}$ - f.,  $n \dot{a} v a$ - m. n. 'new';  $p r i v - \dot{a}$ - f.,  $p r i v \dot{a}$ - m. n. 'dear';  $g a t - \dot{a}$ - f., gatá- m. n. 'gone'.
- 193. The suffix  $-\bar{a}n\bar{i}^{5}$  is used to form the feminine from stems in  $-a_{c}$ designating the wife of the corresponding male being, or expressing a feminine personification: arany-āni-'Forest Nymph' (áranya-'forest'), indr-āni-'wife of Indra', usīnār-āņī- 'Queen of the Usīnaras', ūrj-ānī- 'Strength' (personified), purukúts-ānī- 'wife of Purukutsa', mudgal-ánī- 'wife of Mudgala', varun-ānī-'Varuna's wife'.
- 194. The suffix -ayana- forms a few patronymics with Vrddhi in the first syllable: ānty-āyaná- (VS. TS.) 'descendant of Āntya', āmusy-āyaná- (AV.) 'descendant of so and so' (amisya- gen. of adás), kāṇv-āyana- 'descendant of Kanva', dākṣ-āyaná- (VS. AV.) 'descendant of Dakṣa'; also the f. rāmāyanī- (AV.) 'daughter of the Black One' (rāmá-). The derivative ukṣanάγαπα-, N. of a man, being formed without Vrddhi is perhaps not meant for a patronymic.
- 195. The suffix -ayī occurs perhaps only twice, forming the feminine from two masculine stems in -i and designating the wife of the corresponding male: agn-āyī- 'wife of Agni' and vrsākap-āyī- (only voc.) 'wife of Vṛṣākapi'.
- 196. The suffix -āyya forms gerundives6; e. g. śrav-áyya- 'glorious' (śru- 'hear'). There are also a few other derivatives similarly formed, which are used as ordinary adjectives or as neuter abstracts; thus nr-pάγγα- 'guarding

ceptions in pārśv-á- 'side' (párśu- 'rib'), takes place here; cp. Whitney 1208 i. paidv-á- 'belonging to Pedu', mādhv-a- 'full 5 Cp. Leumann, KZ. 32, 294 ff. of sweetness' (mádhu-), yādv-a- 'belonging

Formed from the weakest stem maghón. |-a| is added to stems in -a as to others (the <sup>2</sup> With syncope of the vowel of the suffix. final vowel of the primitive disappearing before 3 Without Guna of the  $\bar{z}$ ; similar ex- it) and not that derivation by Vrddhi alone

<sup>6</sup> These are probably formed from dative infinitives in -ai + -ya; cp. Brugmann, Grund-

<sup>4</sup> It is natural to suppose that the suffix riss 2, p. 1422; cp. also IF. 12, 2.

men', bahu-páyya- 'protecting many'; pūrva-páyya- 'first drink', mahay-áyya- 'enjoyment', kuṇḍa-páyya- and puru-máyya- as Proper Names; also formed from nouns, ras-áyya- 'tasteful' (rása- 'sap') and uttam-áyya- n. 'summit' (uttamá-

'highest') '.

197. The suffix -i forms a few patronymics from nouns in -a with Vrddhi in the initial syllable: ágniveś-i- 'descendant of Agniveśa', páurukuts-i- 'son of Purukutsa', prātardan-i- 'descendant of Pratardana', prāhrād-i- (AV.) 'son of Prahrāda, sāṇvaraṇ-i- 'descendant of Saṃvaraṇa'. Similarly formed, but with the sense of an ordinary substantive, is sārath-i- 'charioteer' (from sa-rātha-m 'on the same chariot'). Two other words add a secondary -i without Vrddhi or patronymic sense: tápuṣ-i- 'burning' and śucant-i-, N. of a man (seemingly an extension of the participle śuc-ānt- 'shining')

198. Hundreds of adjectives are formed with the suffix -in from stems in -a, but very rarely from stems with any other final; e. g. ark-in- 'praising' (arká- 'praise'), manīṣ-in- 'wise' (manī-ṣā- 'wisdom'), arc-in- 'radiant' (arci- 'beam'), satagv-in- 'consisting of hundreds' (\*sata-gva-), varm-in- 'clad in armour' (várman-), svan-in- (VS.) 'keeping dogs' (śván-). With loss of final -as: ret-in- 'abounding in seed' (rétas-) and perhaps in the Proper Name varc-in- (várc-as- 'power'); with loss of -ya: hiran-in- 'adorned with gold' (hiran-ya-).

rgg. The suffix -ima is very rare, being employed to form adjectives from the stems in -tra and from one in -ra: kṛtṛ-ima- 'artificial', kḥanitṛ-ima- 'made by digging', pūtṛ-ima- (AV.) 'purified'; agṛ-imá- 'foremost' (ág-ra-

'front').

200. The suffix -iya is employed to form some 20 adjectives (from stems in -a). It is only a modified form of -ya which is added for facility of pronunciation after two or more consonants, the last of which is generally r, rarely n, m or v; e. g. abhr-iyá- 'derived from the clouds' (abhrá-), samudr-iya- 'belonging to the sea' (samudrá)-, indr-iyá- 'belonging to Indra'; kṛṣṇ-iyá-, N. of a man (kṛṣṇá- 'black'); ṛgm-iya 'praiseworthy'; aśv-iyá- 'con-

sisting of horses', 'troop'.

201. The suffix -ī is employed in a very large number of derivatives to form the feminine of masculine stems; often from stems in -a²; e. g. áruṣ-ī- 'ruddy' (aruṣá-), dev-ī- 'goddess' (devá-); or in -u; e. g. prthī-ī- 'broad' (prth-ī-); or from stems formed with suffixes ending in consonants, as participles in -at or -ant, e. g. p/prat-ī-, 'protecting' (pṛ- 'take across'), ad-at-ī- 'eating' (ad-ánt-), mád-ant-ī 'rejoicing' or in -váṇṣ-, e. g. jagm-iṣ-ī- 'having gone'; comparatives in -īyāṇṣ-, e. g. náv-īyaṣ-ī- 'new'; stems in -tar, e. g. avitr-ī- 'protectress'; in -mant, e. g. dhenu-mát-ī- 'abounding in nourishment'; in -vant, e. g. áma-vat-ī- 'impetuous'; in -an, e. g. sóma-rājn-ī- 'having Soma as king'; in -in, e. g. arkiṇ-ī- 'radiant'; in -añc, e. g. arvāc-ī- 'hitherward'; in compounds of -han 'slaying', e. g. a-pati-ghn-ī- 'not killing a husband', of -drś- 'look', as su-df-ś-ī- 'well-looking', and of -pád 'foot', as a-pád-ī- 'footless'.

202. The suffix -īna forms more than a dozen adjectives from the weak stems of derivatives in -añc-, expressing direction without change of meaning; e. g. arvāc-ina- and arvāc-īná- 'turned towards' (arváñc- 'hitherward'). It also forms six or seven adjectives from other words, expressing the general sense of relation; e. g. añjas-ina- 'straightforward' (añjasa- 'straight'), viśvajan-ina-

(AV.) 'containing all kinds of people'.

I See Whitney 1218 a. formed with Vrddhi in the initial syllable; This is regularly the case in stems e. g. mānuṣ-a- 'human', f. mānuṣ-ī-.

203. The suffix -iva forms fewer than a dozen general adjectives, of which only two occur in the RV.; e. g. arjīk-iya-, designation of a Soma vessel, grha-medh-íya- 'relating to the domestic sacrifice'; āhav-an-íya- (AV.) 'sacrificial fire', parvat-iya- (AV.) 'mountainous'. This suffix also appears in the three ordinals dvit-tya- 'second', trt-tya- 'third', tur-tya- 'fourth'.

204. The suffix -ena with Vrddhi of the initial syllable, occurs only once, forming a general adjective, in its feminine form sāmidh-ent- 'relating

to fuel' (samidh-).

205. The suffix -enya was doubtless originally formed by the addition of -ya to derivatives made with -na, but it nearly always has a primary value as forming gerundives; e.g. drś-énva- 'worthy to be seen'. It appears, however, also in the two ordinary adjectives kīrt-inya-'famous' (kīrti-'fame')

and vīr-énya- 'manly' (vīrá- 'hero').

206. The suffix -eya, with Vrddhi of the initial syllable, is employed to form fewer than a dozen adjectives of a patronymic or metronymic value and some half dozen adjectives of a general character, the latter occasionally appearing in the neuter as abstract substantives; e. g. ars-eyá- 'descended from a seer' (rsi-), ādit-eyá- 'son of Aditi'; páurus-eya- 'relating to man' (púrusa-), máun-eya- 'position of a sage' (múni-). Two words with this suffix are formed without initial Vrddhi, following the analogy of gerundives from roots ending in ā like diya- 'to be given' (dā- 'give'): didrkṣ-bya- 'worth seeing' (as from didrk-sā- 'desire to see') and sabh-éya- 'fit for an assembly' (sabha-1).

207. The very rare suffix -eyya forms adjectives with a gerundive sense in stus-éyya-1 'praise-worthy', and sapath-eyyà- (AV.) 'worthy of cursing'. also forms an ordinary adjective used as a neuter substantive, sahaś-éyya-

n. 'lying together' (st. 'lie)'.

208. The suffix  $-k\alpha$  was probably used originally to form adjectives expressive of connexion, but it has become so attenuated in meaning as often to be added to substantives or adjectives without changing the sense; while on the other hand it has become specialized as a suffix forming diminutives. 1. Examples of its significant use are: ánta-ka- 'making an end' (ánta-), rūpa-ka- (AV.) 'having an assumed form' (rūpά- 'form'); asmā-ka- 'our' (asmá- 'us'), máma-ka- 'my' (máma 'of me'); ánti-ka- 'near' (ánti 'before'). 2. The suffix appears without changing the meaning in e. g. dūra-ká-'distant' (dūrá- 'far'), vamra-ká- 'ant' (vamrá- 'ant'), sarva-ká- (AV.) 'all'  $(s\acute{a}rva-)$ , and in the fem. form of  $-k\bar{a}$  in:  $avi-k\acute{a}-$  'ewe'  $(\acute{a}vi-$  'sheep'),  $isu-k\acute{a}-$ (AV.) 'arrow' (isu-), dhénu-kā- (AV.) 'cow' (dhenú-). 3. The diminutive sense appears in e. g. arbha-ká- 'small', kumāra-ká- 'little boy', pāda-ká-'little foot', putra-ká- 'little son'2. Sometimes a contemptuous meaning is conveyed at the same time, as in anya-ká- 'other' (anyá-), ála-ka-m 'in vain' (ála-m 'enough')3.

a. With Vrddhi in the first syllable is formed māma-ká-4 'belonging to me' (máma); and with connecting -i-: várṣ-i-ka- (AV. VS.) 'belonging to the rains' (varsá-), vásant-i-ka- 'belonging to the spring' (vasantá-), and

in the fem. kairāt-ikā- (AV.) 'relating to the Kirātas'.

200. The rare secondary suffix -tα has an ordinal sense in ekα-tά- (VS.)

Grundriss 2, p. 1422 (5).

The feminine of some of these diminutives is formed with -ikā: iyatt-ikā- 'so
 4 Beside the more normal máma-ka-.

I This gerundive is probably based on small, kumār-ikā- (AV.) 'little girl', khárvthe infinitive stusé 'to praise'; cp. Brugmann, ikā- (AV.) 'mutilated', śakunt-ikā- 'little bird', śīt-ikā- 'cool' (AV. śītá- 'cold').

'First', dvi-tá- 'Second', tri-tá- 'Third' as Proper Names. It also appears in ana-tá- 'well' and muhūr-tá- 'moment'.

- 210. With the suffix -tana and its syncopated form -tna are made, from adverbs or prepositions, a very few adjectives with a temporal sense: กน์-tana- and กน์-tna- 'present' (กน์ 'now'), sana-tána- (AV.) and saná-tna- (AV.) 'eternal' (sánā 'from of old'), pra-tná- 'ancient' (prá 'before').
- 211. The suffix -tama has two uses. It is employed to form superlatives from nominal stems and from the preposition i'd; e.g. puru-táma- 'very many', mádhumat-tama- 'very sweet', rathi-tama-1 'best charioteer'; ut-tamá-2 'highest'. It is also used to form ordinals; e.g. śata-tamá- 'hundredth'.
- 212. With the suffix -taya are formed only two adjectives from numerals in the sense of 'consisting of so many parts': cátus-taya- (AV.) 'fourfold' and dúśa-taya- 'tenfold'.
- 213. The suffix -tara is regularly used to form comparatives from adjectives, substantives, or the preposition úd; e. g. tavás-tara- 'stronger', rathi-tara- 'better charioteer', vṛtra-tára- 'worse Vṛtra'; vit-tara- 'higher'. It also forms the ordinary adjective  $div\bar{a}$ -tara- (RV<sup>I</sup>.) 'diurnal' ( $div\bar{a}$  'by day'), and a few substantives in which the meaning of the suffix is somewhat obscure: aśva-tára-3 (AV.) 'mule' (f. -i), vatsa-tará-4 'weaned calf'5 (f. -i).
- 214. The suffix -tav-ya, probably originating from the predicative use of dative infinitives in -tax:-e and beginning to be used in a gerundive sense, appears only twice in the AV.: jan-i-tav-yà- 'to be born' and hims-i-tav-yà-'to be injured'.
- 215. The suffix  $-t\bar{a}$  forms, from adjectives and substantives, some two dozen abstract nouns expressing the sense conveyed by the English suffixes -ness and -ship; e. g. bandhú-tā- 'relationship', vasú-tā- 'wealthiness'; agú-tā- 'lack of cattle', devá-tā- 'divinity', puruṣá-tā- 'human nature'; janá-tā- (AV.) has acquired the concrete sense of 'mankind' 6. Exceptional formation appears in mamá-tā- 'selfishness' and tré-tā-7 (VS. TS.) 'triad'. This suffix is probably contained in sū-ný-tā-8 'gladness' also.
- a. The suffixes -tāti and -tāt are related to -tā and have the same sense. With the former are made about a dozen abstract substantives; e.g. a-ristá-tāti- 'security', grbhītá-tāti- 'the being seized', jyesthá-tāti- 'superiority', devá tāti- 'divinity', vasú-tāti- 'wealth', sarvá-tāti- 'completeness'. The two substantives sám-tāti- 'good fortune' and satyá-tāti- 'truth' also appear as adjectives meaning respectively 'beneficent' and 'truthful'. The suffix -tat, which seems to be an abbreviation of -tati and occurs only in the RV., is employed to form four or five abstract substantives: upará-tāt- 'proximity', devá-tāt- 'divine service', vṛká-tāt- 'wolfishness', sarvá-tāt- 'completeness'.
- 216. The suffix -tya forms some half dozen adjectives and substantives from prepositions and adverbs. These are apa-tya-n. offspring, amā-tya- 'companion' (amā 'at home'), āviṣ-tya- 'manifest' (āvis 'openly'), nis-tya- 'foreign' (nis 'out'), sánu-tya- 'secret'9. This suffix is also added to

I Also in the Proper Name gô-tama-.

<sup>&</sup>lt;sup>2</sup> The superlatives tivi-s-tama- 'strongest' and surabhi-s tama- 'most fragrant' insert a sibilant before the suffix.

<sup>3</sup> Perhaps 'more (like a) horse' (than an ass).

<sup>4</sup> Probably 'more than a calf'.

<sup>5</sup> In ratham-tará-, designation of a kind of Saman, in which the case ending of the nrta-'gladness' and as an adjective 'joyful'. acc. remains, the second part is doubtless 9 Cp. sanu-tár 'aside'.

the verbal -tara 'speeding' (tr- 'cross'). kārotará- 'filter' and kaulitará-, designation of Sambara, are probably formed with a and Vrddhi.

<sup>6</sup> Like 'humanity' in English.

<sup>7</sup> Also in tret-in-i- (RV.) 'the threefold flame of three fires'.

<sup>8</sup> Though it appears also as a neuter sū-

the substantive  $\bar{a}p$ - 'water' to form the two adjectives ap-tyá- and  $\bar{a}p$ -tyá- 'watery'.

- 217. With the suffix -tva are formed more than thirty abstract substantives with the same sense as those in -tā; e. g. am;ta-tvá- 'immortality', aham-uttara-tvá- (AV.) 'assertion of superiority', bhrātṛ-tvá- 'brotherhood', maghavat-tvá- 'liberality', rakṣas-tvá- 'sorcery'. The final syllable of the primitive is lengthened in an-āgās-tvá- 'sinlessness'; while it is shortened in sadhani-tvá-¹ 'companionship'. Owing to the influence of the nominative, s is inserted before the suffix in su-prajā-s-tvá- 'possession of many children' and with initial Vrddhi in sauprajā-s-tvá-² (AV¹.) 'possession of good offspring'.
- a. The two suffixes  $-t\bar{a}$  and -tva, identical in meaning, are pleonastically combined in the form of  $-tva-t\bar{a}$  in the two derivatives  $isita-tv\acute{a}t\bar{a}$  'excitement', and  $purusa-tv\acute{a}t\bar{a}$  'human nature'.
- 218. The suffix -tvana, an extension of -tva with -na, appears in the formation of some eight neuter abstracts occurring almost exclusively in the RV. These are kavi-tvaná- 'wisdom', jani-tvaná- 'state of a wife'; pati-tvaná- 'matrimony', martya-tvaná- 'the ways of man', mahi-tvaná- 'greatness', vasu-tvaná- 'wealth', vrṣa-tvaná- 'manliness', sakhi-tvaná- 'friendship'. All of these except martya-tvaná- have beside them the corresponding abstracts formed with -tva 3.
- 219. The suffix -tha forms a few ordinals from cardinals, and adjectives from pronominal stems with a general numerical sense. Thus catur-thá (AV.) 'fourth', saṣ-ṭhá- (AV. VS.) 'sixth', saptá-tha- 'seventh'; kati-thá- 'the how manieth?'.
- 220. The rare secondary suffix -na appears in one adjective derived with initial Vrddhi from a substantive, strái-na- 'feminine' (strź- 'woman), and in three adjectives derived from adverbs without any internal change: purā-ná- 'ancient (purá 'before'), viṣu-ṇa- 'various' (viṣu- 'apart'), samā-ná- 'like' (samá- 'equal').
- 221. The suffix  $-n\bar{\imath}$  is used to form the feminine of  $p\acute{a}ti$  'lord' and  $paru\bar{\imath}$ - $\acute{a}$  'knotty', as well as of several adjectives in -ta denoting colours. Thus  $p\acute{a}t$ - $n\bar{\imath}$  'mistress',  $p\acute{a}ru\bar{\imath}$ - $n\bar{\imath}$ -, as N. of a river. The suffix is substituted for -ta in  $\acute{e}$ - $n\bar{\imath}$  'variegated' ( $\acute{e}$ -ta-),  $r\acute{o}hi$ - $n\bar{\imath}$  'red cow' ( $r\acute{o}hi$ -ta- 'red'),  $\acute{s}y\acute{e}$ - $n\bar{\imath}$  'white cow' ( $\acute{s}ye$ - $t\acute{a}$  'white'),  $h\acute{a}ri$ - $n\bar{\imath}$  'fallow' ( $h\acute{a}ri$ -ta-). In a few such words  $-n\bar{\imath}$  is substituted for the final a, while k takes the place of the  $t^4$ :  $\acute{a}sik$ - $n\bar{\imath}$  'black' ( $\acute{a}si$ -ta-),  $p\acute{a}lik$ - $n\bar{\imath}$  'grey' (pali- $t\acute{a}$ -),  $h\acute{a}rik$ - $n\bar{\imath}$  in the diminutive form  $h\acute{a}rikn$ - $ik\bar{\imath}$  (AV.) 'yellowish' ( $h\acute{a}ri$ -ta- 'fallow').
- 222. The suffix -bha forms half a dozen derivatives, all names of animals except one adjective<sup>5</sup>: ṛṣa-bhá- and ফṛṣa-bhá- 'bull', garda-bhá- and rắṣa-bha-6 'ass', śara-bhá- (AV. VS.) 'fabulous eightlegged animal'. The one adjective is sthūla-bhá- (AV.) beside sthūlá- 'big'.
- 223. The suffix -ma forms some eight superlatives, partly from prepositions, and the ordinals from the cardinals for 'five' and 'seven', 'eight', 'nine', 'ten'. The former are: adha-má- 'lowest', apa-má- 'farthest', ava-má- 'lowest',

r From sadha-ni- ('one who leads with him') 'companion', which is, however, analysed in the Pada text as sa-dhani-.

<sup>2</sup> saubhaga-tvá- 'happiness' is formed from sáubhaga- 'welfare' = 'condition of welfare', not from su-bhága- 'lucky', from which is formed subhaga-tvá- 'welfare'.

<sup>3</sup> Cp. LINDNER 26 and 28.

<sup>4</sup> See Brugmann, Morphologische Untersuchungen 2, p. 198, and Grundriss 2, p. 315.

<sup>5</sup> See BRUGMANN, Grundriss 2, p. 203; cp. p. 89, note 2.

<sup>&</sup>lt;sup>6</sup> Formed, with Vrddhi and accented on the initial syllable, from ras- 'roar', 'bray' etc.

upa-má- 'highest', ánta-ma- 'nearest', cara-má- 'last', para-má- 'remotest', madhya-má- 'middlemost'. The ordinals are: pañca-má- (AV. VS.) 'fifth', sapta-má- (VS.) 'seventh', asta-má- 'eighth', nava-má- 'ninth', daśa-má- 'tenth'.

- 224. The suffix -mant forms in the Samhitas between 80 and 90 possessive adjectives, like the parallel suffix -vant<sup>2</sup>, with which it is to some extent interchangeable. Unlike -vant, however, it never forms derivatives from stems ending in -a except kánva-mant- (RV1.) 'prepared by the Kanvas' and yáva-mant- 'rich in barley'. Examples are: aśáni-mant- 'possessing the thunderbolt', ósadhi-mant- (AV.) 'rich in herbs', krátu-mant- 'having power', vadhú-mant-'drawn by mares'(?), hótr-mant- 'provided with a sacrificer', gó-mant- 'rich in kine', virúk-mant- 'gleaming', garút-mant- 'winged' (?), kakúd-mant-3 'provided with a hump', cáksus-mant- 'possessed of eyes', vidyún-mant-4 'containing lightning'.
- a. A final i is sometimes lengthened: tvisī-mant- 'vehement' (tvisī- 'vehemence'), dhrājī-mant- 'gliding' (dhrājī- = dhrājī- 'gliding motion'), hirī-mant- 'tawny-horsed' (hirī- hārī- 'bay steed'); -ī- is inserted in jyótiṣ-ī-mant- (AV.)5 'full of light' (beside jyótiṣ-mant-), and s in śuci-s-mant-6 'shining'. In the derivative suṣu-mant- (RVI.) 'very stimulating' the suffix seems to have primary value 7. The adverb āśu-mát (AVI), formed from the neuter of this suffix, seems to follow the analogy of adverbs in vat from derivatives in -vant.
- 225. The suffix -maya (f.  $-\overline{\imath}$ ) forms fewer than a dozen adjectives with the sense of 'consisting of', 'derived from', 'abounding in'. The suffix -as remains unchanged before the m, but d is assimilated as in external Sandhi. Derivatives thus formed are: ayas-máya- 'made of metal', aśman-máya- 'made of stone', kim-máya- 'consisting of what?', go-máya- 'consisting of cattle', nabhas-máya- 'vaporous', manas-máya- 'spiritual', mṛn-máya- 'made of clay' (mṛd-), śaka-máya- 'arising from dung', sū-máya-8 'well-fashioned'.

226. The suffix -min was most probably due to the derivatives in -in from nouns in -ma, like dhūm-in- 'smoking' (dhūmá- 'smoke') which are fairly common. It has an independent character, however, in is-min-'impetuous' and rg-min-9 'jubilant with praise' (rc-).

227. The rare suffix -mnq forms a few neuter abstracts from nouns or particles. It seems to be an extension with -a of -man syncopated like -tna for -tana. The derivatives formed with it are: dyu-mná-'brightness' (dyú- 'sky'), ny-mná-'manliness' (nf- 'man'), ni-mná- 'depth' (ní 'down'), su-mná- 'welfare' (su- 'well').

- 228. The very common suffix -ya<sup>10</sup> forms a large number of adjectives of relation, including a good many patronymics, and abstract substantives. It is pronounced -ia nearly four times as often as -ya. The feminine is usually -ya, both in adjectives and abstract substantives; but in the former it is sometimes  $-\bar{\imath}$ , as  $d\hat{r}-\bar{\imath}$  and  $d\hat{r}-y\bar{a}$  'Aryan',  $ddiv-\bar{\imath}-\bar{\imath}$  and  $ddiv-y\bar{a}$  'divine'.
- a. All the patronymics besides a good many general adjectives, and most of the abstract substantives are formed with initial Vrddhi; e. g. ādit-yá- 'Son of Aditi', sāhadev-yá- 'descendant of Sahadeva'; gráiv-ya- (AV.) relating to the neck' (grīvā-), dáiv-ya-'divine' (devá-'god'), prājāpat-yá- (AV.)

<sup>&</sup>lt;sup>1</sup> Once (I. 1655) anta-má-; cp. p. 89, note 3.

<sup>&</sup>lt;sup>2</sup> Which is, however, about three times as common.

<sup>3</sup> The VS. has kakun-mant- as in external

<sup>4</sup> With assimilated t as in external Sandhi. 5 Following the analogy of távisī-mant-

<sup>6</sup> Occurring only once in the vocative śucis-mas.

<sup>7</sup> The word is analysed in the Pada text as susu-mān.

<sup>8</sup> This derivative seems to preserve the originally nominal character of this suffix.

<sup>9</sup> In this derivative the original guttural appears, though it has become sonant as in external Sandhi.

<sup>10</sup> See WHITNEY 1210—1213 (p. 459—466) and LINDNER 36 (p. 138-144).

II These are evident instances of the reduction of unaccented  $y\bar{a}$  to  $\bar{i}$ ; cp. 24 a.

'relating to Prajāpati'; ádhipat-ya- 'lordship' (ádhi-pati- 'lord'), jánarāj-ya- (VS.) 'kingship' (jana-rájan- 'king of the people'), vaimanas-yá- (AV.) 'dejection' (vi-manas-), sángrāmajit-ya- (AV.) 'victory in battle' (sangrāma-jit-AV.) 'conquering in battle'), sáuvaśv-ya-¹ 'wealth in horses' (sv-áśva-).

- b. Derivatives formed without Vṛddhi are mostly ordinary adjectives, being about four times as numerous as those formed with Vṛddhi. They are made from stems with all kinds of finals. The following are examples: áśv-ya'relating to horses' (áśva-); urvar-yà- (VS.) 'belonging to cultivated land'
  (urvárā-); áv-yà- 'belonging to sheep' (ávi-); vāyav-yà-² 'belonging to wind'
  (vāyú-); nár-ya- 'manly' (nṛ- 'man'); pitr-ya- 'belonging to the fathers' (pitṛ-);
  gáv-ya- 'derived from cows' (gó-); nāv-yà- (AV.) 'navigable' (náu- 'boat'),
  svarāj-ya- 'autocracy' (sva-rāj- 'sovereign'); karman-yà-'skilful in work' (kárman-),
  vṛṣṇ-ya-3 'virile' (vṛṣan- 'male'); sat-yá-4 'true' (sánt-), prāc-yà- (AV.) 'eastern'
  (prānc-); āyuṣ-yà- (VS. AV.) 'length of life' (āyus-).
- a. The final -a is retained before the suffix in hiranyá-ya- 'made of gold' (hiranya-), while -an is dropped before it in aryam-yà- 'intimate' (arya-mán- 'companion'). The suffix is added pleonastically in avyá-ya- and ávya-ya- 'belonging to sheep' (beside áv-ya-) and gavyá-ya- 'derived from cows' (beside gáv-ya-); also in forming a few possessive compounds, as su-hást-ya- 'skilful-handed' (beside su-hásta-)5. It is also used in forming a few governing compounds, as ádhi-gart-ya- 'being on the driver's seat' (gárta-), abhi-nabh-yá-m, adv. 'near the clouds' (nábhas-)6.

β. In some adjectives and substantives, the suffix has a primary appearance; e. g. púṣ-ya- 'flower', yúj-ya- 'related', mádh-ya- 'middle', már-ya- 'young man', sứr-ya- 'sun', f. sūr-yā-7 (svàr- 'light').

γ. Though as a gerundive suffix -ya must be regarded as primary, it is manifestly secondary in certain adjectives which have a gerundive sense; thus a-vi-mok-yά- (AV.) 'not to be loosened', pari-varg-yà-8 (AV.) 'to be avoided'.

 $\delta$ . Akin to the gerundives are a few abstract feminines in  $-y\bar{a}$ ; e. g. kr-t- $y\bar{a}$ - 'action', 'enchantment', vid- $y\bar{a}$ -9 (AV.) 'knowledge', deva-yaj- $ya\bar{t}$ - 'worship of the gods'.

229. The rare suffix -yin, like -in, forms a few possessive adjectives, all of which except one occur in the VS. They are ātatā-yin- (VS.) 'having one's bow drawn' (ā-tata-), dhanvā-yin- (VS.) 'bearing a bow' (dhánvan-), marā-yin- (RV1.), N. of a man, srka-yin- (VS.) 'having a spear' (srká-), svadhā-yin- 1x (VS.) 'owning the Svadhā.

230. The suffix -ra forms four superlatives from prepositions and about a dozen ordinary nouns, most of which are adjectives. The superlatives are ádha-ra- 'lower', ápa-ra- 'later', áva-ra- 'lower', úpa-ra- 'lower'. The ordinary adjectives formed with the suffix have the sense of 'belonging to' or 'connected with'. It is usually added direct; e.g. dhūm-rá- 'grey' (dhūmá- 'smoke'), aśrī-rá- 'ugly', pāmsu-rá- 'dusty' (pāmsú- 'dust', AV.), and with initial Vṛddhi ágnīdh-ra- 'belonging to the fire-kindler' (agnīdh-). It is added with connecting i in medh-i-rā- 'wise' (medhā- 'wisdom') and rath-i-rā- 'riding in a car'. It also occurs in a few substantives, some of which are of

<sup>&</sup>lt;sup>1</sup> As if from suvašva-; like vaiyašv-á-'descendant of Vyaśva'; cp. WHITNEY 1204 b, c.

<sup>&</sup>lt;sup>2</sup> With Guṇa of final -u as usual before secondary suffixes (190); prāsav-yà- 'to be partaken of' (pra-as-) and ūrjav-yà- 'rich in nourishment' (ūrj-) are formed without any primitives prāsu- and ūrju-.

<sup>3</sup> With syncope in the suffix of the primitive; cp. 190.

<sup>4</sup> From the weak stem of the primitive; cp. 190.

<sup>5</sup> Cp. WHITNEY 1212 c.

<sup>6</sup> Cp. WHITNEY 1212 m.

<sup>7</sup> Cp. WHITNEY 1213 e; and Roots, under swar- 'sound'.

<sup>8</sup> Here the guttural shows that these words are derived from nominal stems -moka- and -varga-.

<sup>9</sup> In the RV. only in the compound jātá-vidyā- 'knowledge of creatures'.

To Perhaps meaning 'brilliant' or, according to Sayana, 'destroying' enemies.

The TS. IV. 4. 114 has svadhā-vin-.
For ánta-ra op. above p. 90, 39 and

note 1.

doubtful etymology: karmá-ra-¹ 'smith', muṣka-rá- (AV.), a kind of small animal², śámbara-³, N. of a demon, śānkurá- (AV.) 'penis', sahás-ra- 'thousand'.

- 231. The suffix -/a forms about a dozen adjectives with the same meaning as those formed with -ra, with which it sometimes interchanges and of which it is generally a later form. Examples are: aś/ī-lá- (AV.) 'ugly', kapi-lá- 'brown', jīva-lá- (AV.) 'lively', t/lvi-la- 'fertile', bahu-lá- 'abundant', madhu-lá- 'sweet', śśva-la- (AV.) 'shiny'. This suffix also forms two or three diminutives: vṛṣa-lá- 'little man', śiśń-la- 'little child', and the fem. śalāka-lá- (AV.) 'small splint'.
- 232. The suffix -va forms a few adjectives: arna-vá- 'billowy', keśa-vá- (AV.) 'hairy', añji-vá- (AV.) 'slippery', śanti-vá- (AV.) 'friendly', śraddhi-vá- 'credible'.
- 233. The suffix -vat forms seven feminine abstract substantives, with a local sense, from adverbs or prepositions: arvā-vát-4 'proximity', ā-vát-(AV.) 'proximity', ud-vát- 'height', ni-vát- 'depth', parā-vát- 'distance', pra-vát- 'height', sam-vát- 'region'.
- 234. With the suffix -van, before which -a and -i may be lengthened, are formed some twenty derivatives, nearly all adjectives with the sense of 'possessing' or 'connected with'. The adjectives are: amatī-ván- 'indigent', arātī-ván- 'hostile', fghā-van- 'impetuous', rṇā-ván- 'indebted', dhitā-van- 'rich in gifts', dhi-van- (AV.) 'clever', maghā-van- 'bountiful', sruṣṭī-ván- 'obedient', satyā-van- (AV.) 'truthful', samād-van- 'warlike', svadhā-van-, f. -varī-7 'faithful', hārd-van- (VS.) 'hearty'; also the feminines sumnā-várī- 'bringing favour', sūnṛtā-varī- 'joyous'. Somewhat anomalously formed are indhan-van- 'possessed of fuel' (indhana-), sahā-van- and sáho-van- (AV.) 'mighty'. There are also the substantives áthar-van- m. 'fire-priest', muṣī-ván- m. 'robber', and sanl-t-van- 'reward'.
- 235. The suffix -vant forms, from nominal stems of every kind, possessive adjectives numbering at least 250 in the Samhitās. A final vowel is often lengthened before the suffix, most frequently -a, but very rarely -u. Examples are: kéśa-vant- 'hairy', áśvā-vant- 'possessed of horses' (beside áśva-vant-); prajā-vant- 'having progeny'; sákhi-vant- 'having friends', śáktī-vant- 'mighty' (śákti- 'might'); dyávā-pṛthivi-vant- II (AV.) 'connected with heaven and earth'; viṣṇu-vant- 'accompanied by Viṣṇu', viṣū-vánt- 'dividing' (viṣu- 'apart'); hárit-vant- 'gold-coloured'; āsan-vánt- (AV.) 'having a mouth', róman-vant- and lóma-vant- (AV.) 'hairy', śīrṣaṇ-vánt- (AV.) 'having a head'; kakilbh-vant- (MS. I. II') 'having a peak'; svàr-vant- 'splendid'; páyas-vant- 'containing milk', nas-vánt- (AV.) 'having a nose'. With external Sandhi: pṛṣad-vant- 'variegated' 12.
- a. Some of these derivatives, especially if formed from pronominal stems, have the meaning of 'resembling' instead of 'possessing'; thus må-vant- 'like me', i-vant- 'so great', ki-vant- 'how far?', indras-vant- '13 'like Indra', nila-vant-

3 Probably a foreign word.

<sup>\*</sup> śćvāra- 'treasury' probably stands by haplology for śćva-vāra-.

<sup>&</sup>lt;sup>2</sup> The word occurs in TS. v. (B) as an adjective meaning 'having testicles'.

<sup>4</sup> From arva- 'hither' contained in arvanc-'hitherward' and some other derivatives.

<sup>5</sup> The Pada text has dhitá-van-.

<sup>6</sup> The Pada text has satyá-van-.

<sup>7</sup> The fem. of the secondary -van being formed like that of the primary -van; see 177 and cp. 179 a.

<sup>8</sup> The Pada text has sahá-van-.

<sup>9</sup> The only instance of external Sandhi with this suffix.

<sup>10</sup> With -t interposed, as after short radical vowel preceding primary -van; e. g. kt-t-van-.

IT Retaining the double accent of the primitive.

<sup>12</sup> In a few derivatives -vant has the appearance of a primary suffix: vivás-vantor vi-vasvant- 'shining', ár-vant- 'swift', yah-vánt- 'speeding'.

<sup>13</sup> With the s of the nominative.

'blackish', nr-vánt- 'manly'. From this sense is derived the use of the neuter acc. as an adverb of comparison, e.g. manus-vát 'like Manus', 'as Manus did'.

- 236. The very rare suffix -vaya, probably a noun in origin, seems to be found only in one numeral adjective, cátur-vaya- 'fourfold', and one substantive, dru-váya- (AV.) 'wooden dish'.
- 237. The suffix -vala (cp. 179) seems to be used in the formation of secondary derivatives only in kṛṣṭ-valá- 'peasant' (kṛṣṭ- 'tillage') and in the fem. naḍ-valá- (VS.) 'reed-bed'.
- 238. The suffix -vin is used in forming nearly twenty possessive adjectives from stems ending in -a (which is lengthened),  $-\bar{a}^x$ , -as; thus  $ubhay\bar{a}$ -vln'partaking of both' ( $ubh\dot{a}ya$ -),  $astr\bar{a}$ -vln- 'obedient to the goad', yastas-vln(AV.) 'beautiful'. To the analogy of the derivatives from stems in -as is due the insertion of s in stata-s-vln- 'possessing a hundred'. The only derivatives from stems ending in any consonant other than s are aln-stata-vln- 'bold' (aln-stat-) and vat-stata-vln- (AV.) 'eloquent' (vat-'speech'), both formed as in external Sandhi.
- 239. The only derivative of the suffix -vya forming names of relationship which occur in the Samhitās seems to be bhrátṛ-vya- (father's) 'brother's son'?
- 240. The suffix -śa forms eight or nine adjectives or substantives without in most instances changing the original meaning. The adjectives are ¿ta-śa-'variegated', babhlu-śá- (VS.) 'brownish', yuva-śá-'youthful', and with possessive sense roma-śá- 'hairy'. The substantives are aṅku-śa- m. 'hook', káśma-śa-(AV.) m. or n. 'stupefaction'(?), kalá-śa- m. 'jar', turvá-śa-, N. of a man, lopā-śá-³ m. 'jackal'.

### V. COMPOUNDS.

Benfey, Vollständige Grammatik p. 245—282. — Whitney, Sanskrit Grammar 1246—1316. — Reuter, Die altindischen nominalcomposita, ihrer betonung nach untersucht, KZ. 31, 157—232; 485—612. — Wackernagel, Altindische Grammatik, 2<sup>1</sup>, Nominalkomposition, 1905: cp. Bartholomae, IF. 20, 162—172 (Anzeiger).

241. Form of compounds.— The Vedic language has inherited from the Indo-European speech the power of combining words into a compound treated like a simple word as regards accent, inflexion, and construction. Both in the frequency and the length of compounds the Vedic language resembles that of Homer. In the RV. and the AV. no compounds of more than three independent members occur; and those which consist of three members are rare, such as ádabdha-vrata-pramati- 'superior-minded owing to unbroken observances', pūrva-kāma-kftvan- 'fulfilling former wishes', mithó-avadya-pa- 'mutually warding off want', hári-manyu-sāyaka- 'stimulating the mettle of the bays'.

The two characteristic features of a compound are unity of accent and use of the uninflected stem in the first member (or members). There are, however, exceptions to both these rules. The Sandhi between the two numbers is occasionally different from that between words in a sentence. Occasionally also tmesis of a compound occurs 4. Generally speaking a

The doubtful word vy-asnuv-in- (VSI.) seems to add -in to the present stem with interposed euphonic -v-.

<sup>&</sup>lt;sup>2</sup> pity-vya- 'father's brother', 'uncle', occurs in the later language.

<sup>3</sup> Cp. GUSTAV MEYER, IF. 1, 328.

<sup>4</sup> Frequently in dual compounds, as dyāvā ha kṣāmā 'heaven and earth'; occasionally in others also, as śúnaś cic chépam for śúnaḥ-śépam; nárā vā śámsam for nárā-śámsam; saptá me saptá for saptá-sapta me.

compound assumes a modified and single meaning as compared with the same words used in juxtaposition in a sentence; e.g. kṛṣṇa-śakuni- (AV.) 'rayen', while krsnáh śakúnih would mean 'black bird'. Compounding must take place when a derivative has to be formed from the two words; as ksúitrapat-ya- 'property' beside ksétrasya páti- 'lord of the field'. Sometimes. however, the case-ending remains while the compound accent is used. as rāyas-poṣa-dá- 'bestowing abundance of wealth', beside rāyás póṣa- 'abundance of wealth'. There is a tendency to compounding when the first of two syntactical words is indeclinable. Thus beside same you happiness and welfare' also appears s'am-yós (1. 346); and analogously the indeclinable form or stem of a word takes the place of the case 1. Sometimes compounds are formed by the coalescence of inflected words occurring side by side in a sentence. Thus viśvāhā (TS.) 'all days' beside áhā viśvā (RV.) has become viśvaha 'daily' with a single accent. Occasionally, when two compounds have the same final member, the latter is used only once, as mitrotá<sup>2</sup> médhyātithim (1. 367) for mitrátithim utá médhyātithim; patayán mandayátsakham (1. 47) for patayát-sakham mandayát-sakham. Sometimes one of the members of a compound governs a case 3 outside the compound, as árvato māmsa-bhikṣām (1. 16212) 'begging for the flesh of the steed'; in some instances pleonastically, as ganānām ganā-patim (II. 231) 'troop-leader of troops'. A caseform may agree with the first member of a compound when that member has the form or even only the sense of that case, as  $r\bar{a}y\dot{a}s-k\bar{a}mo$  viśvápsnyasya (VII. 426) 'desirous of wealth of all forms'; or a case-form may agree with the second member, while coordinated in sense with the first, as mahā-dhané .. árbhe (1. 75) 'in great booty (and) in small'.

a. The gender of compounds is, in Copulatives (Dvandvas) and Determinatives (Tatpurusas) ending in substantives, that of the last member 4; but collective compounds are regularly neuter<sup>5</sup>. Compounds ending in adjectives, possessives, and governing compounds have the gender of the substantives with which they agree or which they represent. The number in Determinatives is that of the last member. In Copulatives of the older types it is dual or plural according to the total number meant by the combination, while it is singular (and neuter) in the later type. Collective compounds (whether copulatives or possessives) are singular. Compounds ending in adjectives, possessives, and governing compounds, have the number of the substantive with which they agree or which they represent.

# A. The First Member of Compounds.

242. Its form. — The first member of nominal compounds may consist of nouns (including numerals and pronouns) or indeclinables suitable for qualifying nouns. Exceptionally an inflected form appears in this position qualifying the second member in dependent determinatives and possessives. This is mainly due to words frequently in juxtaposition becoming permanently joined; thus beside the two independent words jas pátih (VII. 386) 'lord of the family'

of Visnu' there appears in a B. passage of the TS. (v. 2. 11) the compound visnu-kramá. <sup>2</sup> The Pada text reads mitrā utá.

<sup>3</sup> This seems to be almost restricted to the genitive in the Samhitas, but many examples of other cases (acc., inst., dat., abl.) occur in the later language.

<sup>4</sup> In a few Dvandvas the gender of the

Thus for visnoh kráma- (AV. TS.) 'step | first member prevails (265, notes I and 2); and a few Determinatives change the gender of the final member, as patnī-śāla- (VS.) n. (śā lā-) 'shed for the wives (of sacrificers)' and agra-jihvá- (VS.) n. 'tip of the tongue' (jihvā-).

<sup>5</sup> Both Dvandvas (266) and Bahuvrihis (290).

we find the compound jās-patim (1. 1858) 1. But it partly also arises from a desire to express the syntactical relation of the words in the compound even without antecedent juxtaposition; as in the verbal determinatives dhanam-jayá-'winning booty', apsu-sád- 'dwelling in waters'; or in possessives like rāyáskāma- 'desirous of wealth'. Such case-endings show a tendency to encroach beyond their legitimate sphere; thus the frequency of the ending -as before -pati-, e. g. vāc-ás-páti- 'lord of speech', led to its becoming the general genitive sign before that word, as in rátha-s-páti- 'lord of the car' (rátha-). Similarly, according to apsu-ks/-t-'dwelling in the waters' was formed apsu-j/-tbeside ab-j/-t- 'winning waters', where the locative is not appropriate. Ordinarily the first member appears only in its stem form. As the stem cannot express number it may mean either the singular or the plural. That it often indicates the plural is shown by expressions like narám or jánānām nr-pāt/- 'manguardian of men' or 'people'. The plural sense is also evident in compounds like devá-krta- 'made by the gods', vīrá-jāta- 'produced by men', nr-páti-'lord of men'. In personal pronouns and cardinals the number is of course inherent in the stem itself.

a. The gender is expressed in the first member only in as far as feminine words retain their f. stem when coordinated in copulatives or dependent on the final member in the sense of a case in determinatives; e. g. patnī-śála- (VS.) 'shed for wives'. The f. suffix -ā is, however, often shortened to a<sup>2</sup>, as in amīva-hán- 'destroying suffering', amīva-sátana- 'dispelling suffering' (ámīvā-). But when a feminine adjective as first member agrees attributively with a feminine in the last member, it appears in the masculine stem-form; e. g. práyata-daksina- 'one by whom a sacrificial fee (dáksinā-) has been presented'+.

243. If the stem is liable to gradation, that form is used which occurs in the weak cases. Thus in the vowel stems -i, -u, -r, appear; e. g. pátijusta- 'dear to a husband', vasu-vid- 'finding wealth', pitr-yajñá- 'sacrifice to the manes'. Similarly dyu- (diu-) 'heaven' appears before consonants, as dyu-kṣá-'dwelling in heaven', dyú-bhakta- 'presented by heaven', but div- before vowels, as div-it- 'going to heaven', div-isti- 'prayer'. The two stems daru- 'wood' and ap- 'water' are reduced to dru- and ap-: dru-padá- 'wooden pillar', drusád- 'sitting on the tree'; ap-tiir- 'overcoming the waters', ab-já- 'derived from waters'. The stem pimāns- 'man' appears in the weak form puns- in punscalt- (VS. AV.) and puns-calt- (VS.) 'courtezan' ('running after men').

a. Stems in -an have -a not only before consonants 5, but also before vowels<sup>6</sup> and y, v<sup>7</sup>; e. g. rāja-putrá- 'king's son', ukṣánna- 'devouring bulls' (uksán-), áśmāsva- 'whose mouth is a rock' (áśman-), bráhmeddha- 'kindled with devotion' (bráhman-), brahmaudaná- (AV.) 'boiled rice (odaná-) for Brāhmans' (brahmán-). Exceptions, however, are nemann-ls-'following the lead', vrsan-asvá- 'drawn by stallions', vrsan-vasu- 'having great wealth' 8.

b. Stems in -in seem to follow the same analogy, dropping the -n before consonants; thus saci-gu- (only voc.) 'having strong cattle' and saci-pūjana-

(only voc.) 'worshipping the strong'9.

<sup>2</sup> This, however, seems to be due to metrical influence.

4 In brhác-chandas- (AV.) 'having Brhatī Indo-arische Philologie. I. 4.

The compounding of such forms probably often started from vocatives like sahasas putra treated as a unit in regard to accent.

<sup>3</sup> An exception in urvy-ūti- 'giving wide aid', where the f. stem wvi-appears instead

as metre' and jágac-chandas- (AV. VS.) 'having Jagatī as metre', the first members doubtless represent neuter names of the metres.

<sup>5</sup> As in rāja-bhis etc. 6 Unlike rāj-n-e etc.

<sup>7</sup> Not -an as in rājan-yà-, udan-vánt-.

<sup>8</sup> In āsánn-iṣu- having arrows in his mouth' the first member is a locative. 9 Cp. WACKERNAGEL 2<sup>1</sup>, p. 54 β, note.

- c. Occasionally the weak grade stem used as first member does not occur as an independent word; thus kṣá-pāvant- and kṣa-pávant- 'earth-protector' from kṣám- 'earth'; jñu-bádh- 'bending the knee' from jánu- 'knee'; man-dhātṛ- 'devout man' from mán-as- 'mind' (through \*manz-), sát-pati- 'lord of the abode', probably from sád-as- 'abode' (through \*sats-).
- 204. When in the inflexion of a word two or more collateral stems (not differing in gradation only) are used, the one which appears in weak cases is mostly employed as first member in compounds. I. Even though the stem  $\bar{a}s-y\hat{a}$ -'mouth' is inflected throughout, the alternative stems of weak cases ās- and āsan- are preferred: ā-daghná-'reaching to the mouth', āsánnisu-1 'having arrows in his mouth'. 2. udán-2 'water' is preferred to uda-ká-3: uda-grābhá- m. 'holding water', uda-pú- (AV.) 'purified by water', uda-meghá-'water-shower'; uda-ká- appears only in udákātman-4 (AV.) 'having water for its chief substance'. 3. Of the three stems pánthān-, pathi-, páth-, only the middle one, which appears before consonant endings, is used: pathi-kft-'pathmaking', pathi-rákṣi- 'protecting roads'. 4. śákan-5 is preferred to śákrt-'dung': śaka-dhūma- (AV.) 'dung-smoke', śaka-pindá- (VS.) 'lump of dung', śáka-pūta- ('purified by dung'), N. of a seer. 5. śīrsán- is preferred to ślras-'head': śīrṣa-kapālá- (AV.) 'skull', śīrṣa-bhidya- (AV.) n. 'head-splitting', śīrṣāmaya'- (AV.) m. 'disease ( $\bar{a}maya$ -) of the head'. 6. There is fluctuation between pád- and páda- 'foot', māms-6 and māmsá- 'flesh', hrd- and hrdaya-'heart': pad-ghosá-7 (AV.) 'sound of footsteps', but pāda-grhya, ger. 'seizing by the foot'; māms-pácana- 'used for cooking flesh', but māmsa-bhiksá-'begging for flesh', hrd-rogá- 'heart-disease', but hrdayā-vidh- 'wounding the heart'8.
- 245. Alternative adjective stems sometimes appear in the first member of compounds. Thus in the RV. mahi- interchanges with mahā-9 'great' in Karmadhārayas and Bahuvrīhis, as māhi-kṣatra 'owning great sway', but mahā-dhanā- 'great booty', mahā-manas- 'great-minded' 10. A few stems in -i appear instead of or interchanging with others in -ra: rji- in rji-pyā- and the Proper Names rji-svan-11 beside rjrā- 'quick' in rjrāsva- ('having quick horses'), N. of a man; \*dabhi- in dabhiti- (for \*dabhi-iti-) 'injurer', beside dabhrā-'small' in dabhrā-cetas- 'of little wit'; sviti- in śvity-āñc-12 'bright', beside śvitrā-(AV.) 'white'; saci- in saci-viā- 'belonging together', beside ā-sk-ra-13 'united'; perhaps also -kravi- for \*kruvi- in á-kravi-hasta- 'not having bloody hands', beside krā-rā-14 (AV.) 'bloody'.
- a. A few adjective stems in -i used as first member neither occur as uncompounded adjectives nor have corresponding adjective stems in -ra: tuvi-jātá- 'mightily born', tuvi-grīva- 'strong-necked', tuvy-ójas- 'very strong'; gabhi-sāk (AV.) 'deep down'.

<sup>&</sup>lt;sup>1</sup> See above p. 145, note 8.

<sup>&</sup>lt;sup>2</sup> Inst. sing. uda, pl. uda-bhis.

<sup>3</sup> Nom. n acc. udakám.

<sup>4</sup> With irregular accent; cp. WACKER-NAGEL 2<sup>1</sup>, p. 56, note.

<sup>5</sup> Inst. śáka-bhis (TS.), nom. acc. śákrt.

<sup>6</sup> Beside vaná- 'wood' (which is fully inflected and appears in vaná-dhiti- 'layer of wood'), the stem van- (gen. van-ām, loc. vam-sii) is perhaps used in vám-saga- 'bull', van-dhitra- 'car-seat', and van-ád- 'devouring wood' (?).

<sup>7</sup> Perhaps in pád-grbhi-, N. of a man or demon, if pad- = pad-, cp. WACKERNAGEL I, 148 a.

<sup>8</sup> On the other hand, of the alternative stems *ásrj*- and *asán*- 'blood', only the nom. acc. form is used; e.g. *asrk-pávan*- (AV.) 'drinking blood', *ásrn-mukha*- (AV.) 'bloodyfaced'.

<sup>9</sup> mahā- being the m., mahi- the n. nom. acc. stem, beside the weak dat. mah-é etc. 10 The AV. has the stem mahāt- in the

Karmadhāraya mahat-kāṇḍá-, 'great section'.

11 Perhaps also in 'rjūti- (= rji-iti-), cp.

WACKERNAGEL 21, p. 59.
12 Cp. siti-pād- 'white-footed', siti-pṛṣṭha'white-backed'.

<sup>13</sup> From sac- 'be attached' with syncope.
14 Cp. WACKERNAGEL 21, p. 59.

- 246. Extension of the stem sometimes takes place in the first member. The commonest addition is -a owing to the frequency of that ending: dura-dabhná- (AV.) 'eluding doors', aśvin-a-kṛṭa- (VS.) 'done by the Aśvins'; viśaujas-¹ (VS.) 'ruling the people'; ṣaiḍ-a-rcá-² (AV.) 'collection of six verses'. An a-stem becomes one in -as in yakṣmo-dhá- (AV.) 'seat of a disease' (yákṣma-). An extension with -d appears in śatád-vasu-³ 'having a hundred (śatá-) treasures', and in án-atid-bhuta-⁴ 'unsurpassed'.
- a. Shortening of the stem sometimes takes place by the dropping of a final t or s (preceded by a) or of the vowel -a; thus pṛṣodará- (TS. v. 6. 14¹) 'having a spotted (pṛṣat-) belly' (udára-); apna-rāj- 'ruling over riches' (ápnas-); bhar-iṣá-5 (IV. 40²) 'desiring booty' (bhára-); til-piñja- (AV.) 'barren sesamum' (tilá-); sas-piñjara- (TS.IV. 5. 2¹) 'reddish like grass' (sasá-), may also be an example, but it is more probably a modification of s'aṣ-piñjara- (VS. XVI. 17) by haplology for \*s'aṣpa-piñjara-.
- 247. Adverbs often occur as first member of compounds. In several instances a nominal stem in -a represents an adverbial case (acc., inst., abl., loc.) formed from that stem; thus nitya-vatsa- 'having a calf continually' (nityam); satya-yáj- 'sacrificing truly' (satyám), samantá-siti-bāhu- (VS.) 'whose forefeet are white all round' (samantám); sana-já- 'born of old' (= saná or sanát); upāká-cakṣas- 'visible from near at hand' (upāké 'near'). Occasionally a nominal stem which has no separate existence is abstracted from the adverb; thus ará-maṇas- 'ready-minded' (from áram 'ready'), ará-mati- 'suitable prayer', abhyardha-yájvan- 'offering apart' (abhyardhás). A cardinal is sometimes thus used instead of its adverb: try-àruṣa- 'reddish in three places' (tri-s), dzi-já- (AV.) 'born twice' (dvi-s).
- 248. The case-ending is also preserved in several instances; thus aram-k/rt- 'preparing', sākam-ikṣ- 'sprinkling together', sākam-yij- 'joined together' (sākám), sāyam-bhavá- (AV.) 'becoming evening'; paścā-doṣá- (VS.) 'late evening'. Adverbs that are neither case-forms nor look like them regularly remain unchanged; thus akṣṇayā-drih-6 'injuring wrongly'; itthá-dhī-'truly devout'; idā-vatṣará- (VS. AV.) 'the present year', a particular kind of year; pinar-nava- 'renewing itself', punar-bhi-' 'arising again'; viśváto-dhī-'observing in all directions', viṣu-rūpa- 'coloured variously' (viṣu-), viṣū-vrt- 'rolling in various directions'. A nasal is added in makṣu-ṃ-gamá- 'approaching quickly' (makṣū).
- 249. Prepositions frequently occur as the first member of a compound. I. Owing to their originally adverbial character they may qualify ordinary adjectives or substantives like adverbs; thus áti-kṛṣṇa- (VS.) 'excessively dark', vi-mahī- 'very great'; pṛá-napāt- 'great grandson', vi-vāc- 'opposing shout'; and in Bahuvrīhis: pṛā-śṛṅgá- (VS.) 'having prominent horns', vy-àṃsa- 'having shoulders wide apart'.
- 2. Owing to their constant connexion with verbs they are very common before verbal nouns; e. g. úpa-sṭu-t- and úpa-stuti- 'invocation'; purò-hita- 'domestic priest'.
- 3. Owing to their frequent connexion with cases, they also appear in a governing sense; e. g. ádhi-gart-ya- 'being on the car-seat', anu-pathá-'following the path'.

For vísa-ojas- like (AV. VS.) satyáujas-(= satya-ojas-) instead of víd-ojas-.

<sup>&</sup>lt;sup>2</sup> Like pañcarcá- = pañca-rca.

<sup>3</sup> Influenced by the analogy of pañcāśád-'50' etc., and vidád-vasu-, etc.

<sup>4</sup> Due to a confusion of \*ati-bhuta- = ati-bhūta- 'surpassed' and ádbhuta- 'marvellous'.

<sup>5</sup> According to the analogy of gav-işá-'desiring cows'.

<sup>6</sup> akṣṇa-yāvan- 'going across' stands by haplology for \*akṣṇayā-yāvan-. Cp. WACKER-NAGEL 2<sup>1</sup>, p. 128 d.

- a. Prepositions as first member sometimes appear in a shortened form; thus  $bhi = abhi \pm in bhi \cdot saj 2$ : 'healer'; o = ava in  $o \cdot gana$  ('away from the crowd') 'isolated', 'wretched', and in  $o \cdot pass$  'top-knot' ('that which is tied down', from pas 'fasten'). On the other hand, anu several times appears lengthened to  $\bar{a}nu$ : thus  $an \cdot \bar{a}nu \cdot kr/va$  'inimitable',  $an \cdot \bar{a}nu \cdot ada$  'not giving way',  $an \cdot \bar{a}nu \cdot dispan$  'unsolicited',  $an \cdot \bar{a}nu \cdot bh\bar{u}ti$  'disobedient'.  $\bar{a}nu \cdot sak$  'in constant succession'.
- 250. Sam and sa.— The preposition sam is of very common occurrence as first member. This is its form invariably before vowels, and when accented originally always before consonants. Its unaccented form sa- (= sm-) should phonetically always appear before consonants. But the proper use of sam- and sa- before consonants has begun to be confused.
- a. In determinatives (I) when the final member is a verbal noun samalways appears before a vowel, as sam-aiká- (AV.) 'hook' (from añc- 'bend'), sam-ldh- 'fuel'; and sám- if accented predominates³ before consonants, being phonetic; e. g. sáṃ-gati- f. 'coming together', sáṃ-dhātṛ- 'one who puts together', sáṃ-pṛkta- 'mixed'. sá-, however, also occurs in sá-gdhi- (VS. MS.) f. 'eating together', sá-cyuti- (MS. II. 7<sup>12</sup>) 'falling together', sá-pīti- (VS. MS.) f. 'drinking together', sá-hūti- f. 'joint invocation'.
- (2.) sa- is preserved before accented verbal nouns formed from the simple root with or without -t, or with the suffixes -a, -ana, -van, -in; thus sa-cit- 'thinking', sa-bādh- (TS. III. 2. 124) 'oppressed', sa-yij- 'united', sa-vidh- 'increasing together', sa-stilbh- (TS. IV. 3. 12²), a kind of metre. sa-syád- 'streaming together'4; sa-kṣi-t- 'dwelling together', sa-srii-t- 'streaming'5; sa-gm-á-(VS.) 'coming to terms', sa-jiṣa- 'unanimous', sa-mádana- 'conflict'o'; sa-yā-van- 'going along with', sa-yig-van- 'united with', sa-sthā-van- 'standing together', sa-ji-t-van- 'victorious'; sa-vās-in- (AV.) 'dwelling together'.
- (3.) Before ordinary adjectives sam- appears in sám-vasu- 'fellow-dweller', sám-misla- 'commingling', sám-priya- (VS.) 'loving one another', and even when unaccented before ordinary substantives in sam-vatsará- 'year', sam-grāmá- (AV.) 'assembly', but sa-pátnī- 'co-wife'.
- b. In Bahuvrīhis when the meaning is (1.) 'together' (as in the verbal use of the preposition) sam- appears, as sám-hanu- (AV.) 'striking the jaws together', sam-gavá- m. '(time when the) cows (are driven) together', and (as usual before vowels) sam-udrá- m. 'sea'. But when the meaning is (2) 'united with', 'accompanied by' what is expressed by the final member, sa- is almost exclusively used (and nearly always even accented)<sup>8</sup>, as sá-cctas- 'accompanied by intelligence', 'rational'; sam- occurs here only in sám-sahasra- 'accompanied by a thousand', and in sám-patnī- (AV.) 'accompanied by her husband' 9. In this sense sam- still appears before vowels in sám-agra- and sam-agrá- (AV.) ('including the top'), 'complete', sám-anga- (AV.) 'accompanied by all limbs' 10, 'complete', sám-āśir- 'accompanied by mixture', 'mixed'; but even here sanonce in the RV. takes the place of sam- in the compound sāśana- (x. 904)

The initial a- of some other prepositions is lost in the later language: pi- = api (SB.); ahi- = adhi and va- = ava are post-Vedic.

<sup>&</sup>lt;sup>2</sup> See Wackernagel 2<sup>1</sup>, p. 72 s, and cp. Brugmann, KZ. 25, 214, note.

<sup>3</sup> sam- occurs more than three times as often as sa- before consonants, doubtless owing to the parallel use of sam- with verbs.

<sup>+</sup> But also sam-gir- 'assenting', sam-yát- that of sa-pátnī- 'co-wife'.

'contiguous'.

that of sa-pátnī- 'co-wife'.

TO Cp. also the adv. san

<sup>5</sup> But also sam-ji-t- 'conqueror', sam-há-t- 'layer'.

<sup>6</sup> But also sam-gamá- 'coming together', sam-cárana- 'suitable for walking on'.

<sup>7</sup> With verbal nouns otherwise formed, as with -tra or -na only sam- occurs, as sam-hotrá- 'joint sacrifice', sam-prašná- 'interrogation'.

<sup>8</sup> With the usual Bahuvrīhi accent on the first member.

<sup>9</sup> In order to distinguish this sense from

TO Cp. also the adv. sam-antá-m (AV.) 'including the ends', 'completely'.

'provided with food' (áśana-), 'eating', and becomes common in the later Samhitās; e. g. sānga- (AV.) 'accompanied by the limbs' (ánga-), sāntardesa-(AV.) 'accompanied by the intermediate quarters' (antar-deśá-). — When the meaning is (3.) 'in common', 'same', 'identical' 1 sa-2 is very common before consonants, as sá-keta- 'having the same intention', sá-laksman- 'having the same characteristics'; while sam-appears only in sam-sisvarī- having a calf in common', sám-manas- (AV.) 'being of the same mind', unanimous', sámmātr- 'having the same mother'. In this sense sam- alone appears (as usual) before vowels: sám-anta- 'contiguous' ('having the same boundary'), sám-okas-'having a common abode', 'living together'.

251. Particles, which for the most part have no independent existence.

frequently appear as first member of compounds.

r. The negative particle, the form of which in the sentence is na, almost invariably appears in composition as  $\alpha$ -3 before consonants, and invariably as an- before vowels. It completely reverses the meaning of the final member; thus mitrá- 'friend', a-mitra- 'enemy', sasti- 'praise', á-sasti-'curse' 4. As participles, infinitives, and gerunds are nominal forms, they may be compounded with the privative particle: thus  $\acute{a}$ -bibhyat- 'not fearing', á-budhya-māna- 'not waking', á-dāsyant- (AV.) 'not about to give', i-vidvāms- 'not knowing' 5. The syntactical form of the particle is very rare: na- $mur\acute{a}$ - (AV<sup>1</sup>.) 'non-dying'(?)<sup>6</sup>. Perhaps also in  $n\acute{a}$ - $p\bar{a}t$ - 'grandson', if it originally meant 'un-protected'7.

2. su- 'well', 'very', except in the RV. very seldom used independently 8, and dus- 'ill', 'hardly', which occurs as a prefix only, appear as first member in determinatives and possessives; e. g. su-kára- 'easy to be done', sú-kṛta-'well-done', su-da- 'giving willingly', su-vasana- 'fair raiment', su-varna- 'faircoloured', sv-άśτια- 'having excellent horses'; dū-dūś- (AV.) 'not-worshipping', 'irreligious', duś-cyavaná- 'difficult to be felled', dur-vásas- 'having bad clothing', 'ill-clad'; dur-άλα (AV'.) 'wail!' is formed as an antithesis to sv-άλα 'hail!'.

- 3. There are a few prefixes beginning with k- which seem to be etymologically connected with the interrogative, and express depreciation, badness, or difficulty: ku-9 in ku-cará- 'wandering about', ku-nakhín- (AV.) 'having diseased nails', ku-nannamá- 'hard to bend', kú-yava- (VS.) 'bringing bad harvest' 10; kad- in kat-payá- 'swelling horribly'; kim- in kim-'ilá- (VS. TS. MS.) (land) 'having small stones', kim-purusá-, a kind of mythical being ('somewhat like a man'); a collateral form kavā- perhaps in kavāri- 'stingy', kavāsakhá- 'selfish' 11.
- 4. The particles -id and -cid make their way into the first member of compounds in the company of pronominal words to which they may he

samāna- is also used in this sense: as samāná·bandhu- 'having the same relatives'.

<sup>&</sup>lt;sup>2</sup> sa- has the sense of 'one' in sāhná- (AV.) 'lasting one day', sa-k/t 'once', sa-divas and p. 77 f. For a few other doubtful compounds sa-dyás 'on one and the same day'.

<sup>3</sup> This is the low-grade form (= n-) of

<sup>4</sup> It frequently reverses the pregnant sense of the final member, as vi-sastr- '(good) dissector', a-viśastý- 'bad dissector'.

<sup>5</sup> See KNAUER, Ueber die betonung der composita mit a privativum im Sanskrit, KZ. 27, 1-68; examples from the later Samhitās in Delbrück, Altindische Syntax p. 540 f., Syntaktische Forschungen 2, p. 530 f. somewhat across'.

<sup>6</sup> ná-pumsa-ka- 'neuter' also occurs in MS.

<sup>7</sup> See LEUMANN, Festgruss an Böhtlingk, with na- see WACKERNAGEL 21, p. 78, note.

<sup>8</sup> sú occurs as an independent particle about 250 times (but never at the beginning of a sentence) in the RV., rarely in the later Samhitās: only 14 times in AV.

<sup>9</sup> Often in adverbs such as kú-tas 'whence', kú-tra 'where'.

<sup>10</sup> On a few doubtful compounds with ku-, see Wackernagel 21, p. 83, note.

<sup>11</sup> Also in kávā-tiryañc- (TS.) 'directed

appended; thus tad-id-artha- 'directed to that particular object'; kā-cit-kará- 'effecting all manner of things'; kū-cid-arthin- 'striving to get anywhere', kuha-cid-vid- 'wherever being'.

5. A few interjectional or onomatopoetic words are compounded with  $k\bar{a}ra$ - and -krti- 'making' = 'sound', 'utterance', or -kartr- 'maker', to express the actual phonetic sound of those words: thus vasat- $k\bar{a}ra$ - (AV. VS.) 'the interjection vasat',  $svadh\bar{a}$ - $k\bar{a}ra$ - 'pronouncing (the benediction) sva-dha',  $svah\bar{a}$ -krti- 'consecration with the call  $svah\bar{a}$ ', hin-kartr- (TS.) 'one who utters the sound hin', hin- $k\bar{a}ra$ - (VS.) 'the sound hin'. In has-kartr- 'enlivener', has- $k\bar{a}ra$ - 'laughter', has-krti- 'loud merriment', the first member represents either an interjection connected with the verb has- 'laugh', or a reduced form of \*hasas- 'laughter' (like sat-pati- for sadas-pati- through \*sats-pati-).

## B. The Last Member of Compounds.

252. Its form. — Practically all nouns may appear in this position. But many verbal nouns, especially participles, if used in their primary sense, are found exclusively after indeclinables which are capable of being combined with the corresponding verbs. Some stems also occur as final members though not used independently; such are verbal nouns formed from the simple root with or without an added determinative -t; also derivatives like  $-jan\bar{t}na$ - (AV.) 'belonging to the people ( $j\acute{a}na$ -) of -'.

a. Change of ending. — When the gender of the final member is changed, the -ā of feminine words, even though radical, becomes -a in masculine or neuter compounds; thus privosriyá- 'fond of cows' (usrlyā-); an-avasá-'restless' (from ava-sá-'rest'), a-śraddhá-'unbelieving' (from śrad-dhá-'belief'), rtá-jya- 'well-strung' (from jyá-'bowstring'). Even -t in a few instances becomes -a; thus ati-rātrá- 'performed overnight' and aho-rātrá- 'day and night' (rātrī-); api-śarvaré 'early in the morning' and ati-śarvaré or ati-sarvaréṣu (AV.) 'late at night' (śárvarī-).

On the other hand m. and n. stems in -a regularly end in -ā in the feminine, as cittá-garbhā- 'having evident offspring' (gárbha- m.); and páti- 'husband' in f. possessives substitutes -patnī-; thus cha-patnī- (AV.) 'having a single husband', dāsá-patnī- 'having demons as lords', sa-pátnī- 'having one husband in common', sám-patnī- (AV.) and sahá-patnī- (AV.) 'having her husband with her', su-pátnī- 'having a good husband'; also in the determinative vīrá-patnī- 'wife of a hero'.

253. Alternative stems. — When in the inflexion of a word alternative stems are used, only one of these, and as a rule the older one, appears as final member of possessive compounds: thus dánt- 'tooth' (not dánta-) in satá-dant- (AV.) 'hundred-toothed', súci-dant- 'bright-toothed'; pád- 'foot' (not páda-): a-pád- 'footless', uttāná-pad- 'whose feet are extended', éka-pad- 'one-footed'; nás- 'nose' (not násā-) in ŕjū-nas-² 'straight-nosed', N. of a man³; údhan- 'udder' (not údhar-) in an-ūdhán-4 'udderless', rapśád-ūdhan- 'having a distended udder', f. á-cchidrodhn-ī- 'having an intact udder'; dhánvan- 'bow' (not dhánus-) in abalá-dhanvan- (AV.) 'having a weak bow', ávatata-dhanvan- (VS.) 'having an unstrung bow', kṣiprá-dhanvan- 'having a swift bow', śatá-

The AV., however, has the nom. sing.

<sup>&</sup>lt;sup>2</sup> According to BLOOMFIELD also in rujānās, for rujāná-nās 'broken-nosed'; see p. 59, note 1.

<sup>3</sup> According to Wackernagel 2<sup>1</sup>, p. 92(top), a-nāsiká- occurs in TS. (VII. 5. 12<sup>1</sup>.

<sup>4</sup> Cp. WACKERNAGEL 21, p. 93, note.

dhanvan- (VS.) 'having a hundred bows' ''; śīrṣán- 'head' (not śiras-) in a-śīrṣán- 'headless', tri-śīrṣán- 'three-headed' '², f. rúru-śīrṣṇ-ī- 'having the head of a Ruru antelope' '³; hrá- 'heart' (not hráaya-) in its long-grade form -hārd- in dur-hārd- (AV.) 'ill-disposed' and su-hārd- 'good-hearted'.

- a. Sometimes an alternative stem is used which has not been preserved as an independent word; thus 'jñu- 'knee' (weak form of jánu-) in asitá-jñu-(AV.) 'dark-kneed', mitá-jñu- 'firm-kneed'+; an old stem -medhas- in su-medhas- 'wise' and puru-médhas- (SV.) 'wise' beside the regular compounds in -medha-(from medhá- 'wisdom') such as puru-médha- 'having much wisdom'; -tvacas- 'skin' in sárya-tvacas- (AV. VS.) 'having a skin bright as the sun' and híranya-tvacas- (AV.) 'having a golden skin', beside tvac- in sárya-tvac- and híranya-tvac-.
- 254. Transfer stems. Some four stems appear in certain forms changed to stems in -as from a misunderstanding of the nom. -s in -ā-s (as in su-prajā-s); thus from prajā- 'offspring', á-prajas- (AV.) 'having no offspring', and su-prajás-6 'having good offspring', lda-prajas-7 (MS. I. 5<sup>3</sup>) 'descendant of Idā'; from kṣā- 'dwell', divá-kṣas- 'living in heaven'; from dā- 'give', dravino-dás- 'bestowing wealth'; from dhā- 'put', vayo-dhás- (AV. VS.) 'bestowing strength' and varco-dhás- (AV.) 'bestowing vigour'. On the other hand, by the loss of final -s or -t a few consonant stems are transformed to a-stems; thus beside án-āgas- 'guiltless' appears án-āga-, and beside puru-dáṃsas- 'abounding in wondrous deeds', puru-dáṃsa-; ūrv-asthīvá- (VS.)<sup>8</sup>, n. du. 'thigh and knee', beside aṣṭhī-vánt- m. du. 'knees ('bony'); ubhayá-da-9 (AV.) 'having teeth in both (jaws)', beside ubhayá-dat-.
- 255. Vowel gradation in final member.—a. r. The low grade vowel of the roots  $d\bar{a}$ -'give' and  $d\bar{a}$ -'cut' disappears when the past participles \*dita-'given' of and dita-'cut' and the action noun \*diti-'giving' become unaccented final members in a compound: thus dva-tta-(VS.) 'cut off', devá-tta-'given by the gods', vy-á-tta- (AV. VS.) 'opened', párī-tta- (VS.) 'given up' II, d-pratī-tta- (AV.) 'not given back'; bhága-tti-'gift of fortune', maghá-tti-'giving of presents', vásu-tti- 'granting of wealth' II. Unreduced forms, however, occur in tvá-dāta- and tvá-dātta- 'given by thee' and in havyá-dāti-'sacrificial gift' I3.
- 2. The vowels  $\bar{i}$  and  $\bar{u}$  in the radical syllable of the final member is in a few instances reduced to i and u; thus  $try-udh\acute{a}n$  'having three udders'  $(\acute{n}dhan$ -),  $dh\bar{i}$ - $j\acute{u}$  'inspiring the mind'  $(j\bar{u}$  'impel'), su- $sir\acute{a}$  'having a good channel', 'hollow'  $(s\bar{v}r\dot{a}$  'stream'),  $s\acute{u}$ - $su\acute{t}$  'easy birth'  $(s\bar{v}$ -t- TB.),  $\acute{a}$ -huti- 'invocation' (otherwise  $s\acute{a}$ - $h\bar{u}ti$  'joint invocation', etc.). Derivative  $-\bar{v}$  is reduced to -i in  $\acute{a}$ -ni-bhrsta-tavisi- 'having unabated power'  $(t\acute{a}vis$ - $\bar{v}$ -).

3 From ásthan- (beside ásthi-, AV.) occur both an-asthán- and an-asthá- 'boneless'.

5 Also in the derivative tvacas-yà- (AV.)

'being in the skin'.

offspring' (for \*su-prajā-tva-).

7 In K. idā-prajas- (IS. 3, 463) with the ā of idā- unshortened.

9 Formed by dropping the -t of the weak stem -dat-.

11 The participle prá-tta- 'given up' also occurs in TS. II. 2. 84 (B).

12 prá-tti- 'gift' also occurs in TS. v. 4.72 (B) and nir-áva-tti 'distribution of shares' in K.

13 The  $\bar{a}$  of saman 'chant' is perhaps reduced to a in fk-sama-(VS.), fk-sama-(TS.), and fc-sama-; cp. WACKERNAGEL 21, 43 f., note.

The determinative indra-dhaniis- 'Indra's bow', occurs in the AV.

<sup>&</sup>lt;sup>2</sup> The AV. however has pṛthú-śiras- 'broadheaded'.

<sup>4</sup> Other reduced stems are sá-gdhi- (VS.) 'joint meal' (Vghás-), nīdá- 'nest' (ni+Vsad-). upa-bd-i- 'noise' (upa+Vpad-) á-sk-ra- 'united' (Vsac-); perhaps pari-msá- 'best part of' (ámsa- 'part').

<sup>6</sup> Under the influence of this new stem is formed su-prajās-tvá- 'possession of good offspring' (for \*su-prajā-tva-).

<sup>8</sup> Formed by dropping the -t of the weak stem aṣṭhī-vát-.

ro This phonetic form has otherwise been ousted by the anomalous participle dat-tá-made from the weak present stem dad-.

3. The o of  $g\psi$ - 'cow' is reduced to -u in plisti-gu- 'rearing cows', N. of a man, and su-gi/- 'having fine cows'. The -ai of rái- 'wealth', is reduced to -i in bṛhád-ri-1 'having abundant wealth'; perhaps also in ṛdhád-ri-2, N. of a man.

4. Final -i and -u of the first member combine with the low grade form of  $\bar{\alpha}$  of  $d\bar{p}$ - 'water' in the last member to  $\bar{\nu}$  and  $\bar{\nu}$ , in  $dv\bar{\nu}p$ -d-3 'island' (dvi-āp-), pratīp-ά-m 'against' (prati-) 'the stream', απūp-ά- 'pond'

 $(anu-\bar{a}p-).$ 

- b. On the other hand, radical a in several instances appears lengthened to \$\alpha 4\$. This occurs in several possessive compounds of jani- 'wife': bhadrajāni- 'having a beautiful wife' (only voc.), yiva-jāni- 'having a young wife', vittá-jāni- having found a wife', 'married', and with shifted accent dvi-jáni-'having two wives' and a-jāni- (AV.) 'having no wife'. A similar lengthening appears in prthu-jāghana- (only voc. f.) 'broad-hipped'; sahá-jānusa- 'with offspring' (janis-); ni-pādá- 'low ground' (padá-); tvát-pitāras (TS. 1. 5. 102), N. pl. 'having thee as father'; su-vácas- 'having good speech', 'very eloquent', sá-vācas-5 (AV.) 'employing similar speech', vi-vācas- (AV.) 'speaking in various ways' (vácas-), visvá-sārada- (AV.) 'occurring every autumn' (śarád-) 'annual', śatá-śārada- 'lasting a hundred autumns'6.
- 256. Adjectival suffixes. Adjective compounds not infrequently add certain suffixes to mark their adjectival character more clearly. These suffixes are  $-k\alpha$ , -i,  $-y\alpha$ ,  $-\alpha$ , -in.
- **I.** The suffix  $-k\alpha^7$  is thus used in only two somewhat obscure compounds in the RV. tri-kadru-ka- (only pl.), a designation of certain soma vessels (kadrú-) and try-àmba-ka- 'having three mothers' (amba voc.); in the AV. occur vi-manyu-ka- 'free from anger' and sahá-kanthi-kā- f. 'with the throat'  $(kanthá-, B.)^8$ .
- 2. In the final member of a few Bahuvrihis, the suffix -i sometimes takes the place of -a; thus práty-ardhi- 'to whom the half (árdha-) belongs'; áñjana-gandh-i- 'having a smell (gandhá-) of ointment', dhūmá-gandhi- 'smelling of smoke', su-gándhi- or su-gandhi 'sweet-smelling'; kṛṣṭá-rādhi- (AV.) 'attaining success (rādha-) in agriculture'.
- 3. The suffix -ya is frequently added in Bahuvrīhis; thus anyódar-ya-'born from another womb' (udára-), dáśa-mās-ya-9 'ten months old', dīrghajihv-yà-'long-tongued' 10, mádhu-hast-ya-'honey-handed', mayhra-sep-ya-'peacocktailed' II, viśvá-jan-ya- 'belonging to all men', viśvá-dev-ya- 'relating to all gods', viśvāng-yà- (AV.) 'being in all limbs', sά-garbh-ya- (VS.) 'born from the same

<sup>2</sup> In the anomalous gen. sing. rdhád-

3 Also nīp-a- 'low-lying' (ni-āp- 'into which the water flows down') in K.

4 For a phonetic explanation of this phenomenon see WACKERNAGEL 21, 43 (p. 100); and cp. 1, 68.

5 There is a various reading sú-vācasas in AV. VII. 122, on which see WHITNEY's

6 On vi-hāyas- 'of extensive power', sárvahāyas- (AV.) 'having all vigour', su-rāmá- 'delighting', su-yāmá- 'guiding well', see WACKERNAGEL 21, p. 101 (middle).

7 This suffix, which is never accented, is probably identical with that which forms

In the dative brhádraye; cp. BB. 25, adje\_tives, as ánta-ka- 'ending' from ánta-'end'.

> 8 In the YV. several examples occur; WACKERNAGEL 21, p. 102, quotes from the TS. a-karņá-ka- 'earless', a-dantá-ka- 'toothless', a-pādá-ka- 'footless', an-aksí-ka- 'eyeless', an-asthi-ka- 'boneless', a-tvák-ka- 'skinless', sáśīr-ka- 'accompanied by a blessing', an-āstr-ka- 'lacking a blessing'; from the MS. a-cchandás-ka- 'metreless', an-ástha-ka- 'bone-

9 Also san-māsya- 'six months old', and sapta-māsya- 'seven months old' in K.

10 Also in TS. some compounds formed with ·deva-tyà- 'having — for a deity' (devátā-); nānā-vis-yá- (MS.) 'consisting of various villages'.

11 Also vi-śiśn-ya- (K.) 'tailless'.

womb', sa-dhan-yà- 'accompanied by gifts', sá-yūth-ya- (VS.) 'belonging to the same herd', su-hást-ya- 'fair-handed' (beside su-hásta-), híraṇya-keś-ya- 'goldenmaned' (beside híranya-keś-a-) <sup>1</sup>.

The suffix -ya is also common in governing compounds with prepositions as first member; thus ádhi-gart-ya- 'being on the car-seat', antaḥ-parśav-yá- (VS.) and antaḥ-pārśv-yá- (VS.) 'being between the ribs', ánv-āntr-ya- (AV.) 'being in the entrails', api-kakṣ-yà- 'situated near the arm-pit', ipa-tṛn-ya- (AV.) 'being in the grass', ipa-mās-ya- (AV.) 'occurring every month', pári-rath-ya- (AV.) 'being around the car', n. part of the car. It also appears in the adverbially used governing compounds abhi-nabh-yá-m 'near the clouds' and ud-āp-yà-m (AV.) 'upstream'.

4. The final member of Bahuvrihis is very frequently extended by the suffix -a. In the RV, there are at least fifteen such stems; thus aks-'eye' in an-aks-á-'eyeless', ádhy-aks-a-'eye-witness', catur-aks-á-'four-eyed', bhūry-aks-á-'many-eyed', sahasrākṣ-á- 'thousand-eyed', hiranyākṣ-á- 'golden-eyed', āktākṣ-a-(AV.) 'whose eyes are anointed', án-āktāks-a-3 (AV.) 'whose eyes are not anointed', dhūmūksá- (AV.) 'smoke-eyed', paryastāks-á- (AV.) 'with eyes cast about', sanisrasākṣ-á- (AV.) 'having constantly falling eyes', hary-akṣ-á- (VS.) 'yellow-eyed'; \*asth-4 'bone' in an-asth-ú- 'boneless' beside an-asth-ún-; \*udar-'water' in an-udr-á- 'waterless'; gó- 'cow' in su-gáv-a- 'having fine cows', samgav-á- 'time when cows come together', and in atithi-gv-á-, a name, éta-gv-a-'variegated', dása-gva-, N. of a mythical group, náva-gv-a-5, N. of a mythical group; janus- in sahá-jānuṣ-a- 'with offspring'; div- 'heaven' in bṛhád-div-aand brhad-div-á-, N. of a seer, su-div-ú- (AV.) 'bright day'; dur- 'door' in śatá-dur-a- 'having a hundred doors'; dhur- 'yoke' in su-dhiir-a- 'going well under the yoke' (beside su-dhir-), sá-dhur-a- (AV.) 'harnessed to the same yoke'; nas- 'nose' in urū-nas-á- 'broad-nosed', pavī-nas-á- (AV.) 'having a nose like a spear-head', vārdhrī-nas-á- (VS.) 'rhinoceros'; m'fdh- in vimṛdh-á-6 (AV.) 'warding off foes' (beside vi-mṛdh-, VS.); rái- 'wealth' in ά-rāy-a- 'not liberal'; vāstu- 'dwelling' in náva-vāstu-a- 'having nine abodes'; śarád- 'autumn' in śatá-śārad-a- 'lasting a hundred autumns'; āp- 'water' in dvīφ-á- 'island''.

In the later Samhitās several other final members extended with -a occur: áhan- 'day' in sāhn-á- (AV.) 'lasting a day'; fc- 'verse' in eka-rc-á- (AV.) 'consisting of one verse'; kṣám- 'earth' in su-kṣm-á- (VS.) 'consisting of good earth'; netf- 'leader' in agni-netr-a- (VS. TS.) 'having Agni as leader': path- 'road', in vi-path-á- (AV.), a kind of chariot ('fit for untrodden paths'); pád- 'foot' in á-bd-a- (VS.) 'year'; \*vatas- 'year' in tri-vats-á- (VS.) 'three years old'; saṃ-dṛś- 'aspect' in mádhu-saṃdṛṣ-a- (AV.) 'sweet-looking'.

a. The final member is also sometimes extended with -a after a governing preposition; thus ánu-path-a- 'going along the road', ántas-path-a- 'being on the road', anūp-á- 'tank' ('lying along the water'), upānas-á- 'being on the car' (-ánas-), parò-kṣ-a- (AV.) 'away from the eye' (akṣ-), puro-gav-á- 'leader' ('preceding the cows').

r áśva-budh-ya- 'based on horses' is probably for \*áśva-budhn-ya- (from budhná-'bottom') beside áśva-budhna- 'borne by horses'.

<sup>&</sup>lt;sup>2</sup> The accent of these words in -ya is usually the same as it would be without the suffix; for a few exceptions, see WACKERNAGEL  $2^{\text{I}}$ , 47 d (p. 108).

<sup>3</sup> The Mss. (AV. XX. 1286) read anāktākṣa-.

<sup>4</sup> See Wackernagel 2<sup>1</sup>, p. 108 (bottom). 5 See Bloomfield, AJPh. 17, 422 ff.

<sup>6</sup> Also the f. vi-mrdh-ā- (TS. II. 4. 2 B).

<sup>7</sup> On a few doubtful instances see WACKER-NAGEL 21, p. 109 (bottom).

<sup>8</sup> In TS. I. 8. 7<sup>1</sup> = VS. IX. 35, 36 several other names of deities compounded with -netr-a- occur.

b. A similar extension with -a occurs in collectives which are allied to Bahuvrīhis: thus try-āyuṣ-á- (VS.) 'threefold lifetime', dvi-rāj-á- (AV.) 'battle of two kings', ṣaḍ-rc-á- 'aggregate of six stanzas', sam-udr-á- 'collection of waters' (\*udar-), 'sea', sa-vidyut-á- (AV.) 'thunderstorm' ('accompanied by lightning'). Akin to these are compounds in which the first member expresses a part of the last (with change of gender); thus ardha-rc-á- (AV. VS.) m. 'half-stanza', aparāhṇ-á- (AV.) m. 'afternoon', ny-áhn-a- (AV.) 'decline of day', pūrvāhṇ-á- 'forenoon', prá-pad-a- 'tip of the foot'. There are further some neuter determinatives which probably had originally a collective sense; thus, with change of gender, tri-div-á- 'third heaven', su-div-á- (AV.) 'fine day'; á-path-a- (AV.) 'pathlessness', su-páth-a- 'good path'. From neuter stems in -as, devainas-á- (AV.) 'curse of the gods', manuṣyainas-á- (AV.) 'sin (énas-) of men'; brahma-varcas-á- (AV. VS.) 'divine power', hasti-varcas-á- (AV.) 'vigour of an elephant', brāhmaṇa-varcas-á- (AV.) 'dignity of a Brahman'.

c. The ending -a frequently takes the place of -an<sup>1</sup> in the final member of Bahuvrihis, collectives, and Karmadhārayas; thus deva-karmá-'doing divine work', viśvá-karma- 'performing all work', vīrá-karma- 'performing manly work', priyá-dhāma- 'occupying desirable places', chando-nāma-(VS.) 'named metre', 'metrical', vi-parva- 'jointless', dvi-vṛṣá-² (AV.) 'having two bulls', añji-sakthá- (VS.) 'having coloured thighs', ut-sakthá- (VS.) 'lifting up the thighs', lomaśá-saktha- (VS.) 'having hairy thighs'3, rk-sāmá- 'the Rc verses and the Sāmans', saḍ-ahá- (AV.) m. 'period of six days'; bhadrāhá-(AV.) n. 'auspicious day', eka-vṛṣá- (AV.) 'only bull', mahā-vṛṣá- (AV.) 'great bull'.

d. The suffix -a takes the place of -i in kavā-sakhá- 'having a niggard for a friend' (sákhi-), in mandayát-sakha- 'gladdening his friend', and in

dasāngulá- 'length of ten fingers' (angúli-).

5. In Bahuvrīhis the suffix -in is sometimes pleonastically added; thus ku-nakh-in- (AV.) 'having bad nails', mahā-hast-in- 'having large hands', yaśo-bhag-in- (VS.) 'rich in glory', sa-rath-in- (VS.) 'riding on the same chariot'.

257. Classification of Compounds.—The Indian grammarians divided compounds into three main classes according to their syntactical relations: r) copulatives, or those in which the members are coordinated, called dvandva-4 ('couple'); 2) determinatives, or those in which the first member determines the second, called tat-purusa- ('his man') 5; 3) those which are dependent on another word, called bahu-vrīhi-6. The latter are usually regarded as compounds of the determinative class transmuted to adjectives, which would thus have a secondary character. They are often called 'possessives' since their meaning can usually be rendered by 'possessing', as bahv-anná-'possessing much food'. To these may be added three other groups in order to treat Vedic compounds exhaustively: 4) governing compounds, or those in which the first member governs the last in sense; e.g. ksayád-vīra-'ruling men'; 5) a certain remnant of irregular combinations which are best dealt with together; 6) iteratives, or repeated words which are treated as compounds in the Samhitas inasmuch as they have only one accent and a special meaning when thus combined; in these the second member is called āmredita- 'repeated' by the Indian grammarians.

This -α probably started in stems ending in -man, representing \*-mn-α-; see WACKER-NAGEL 2<sup>1</sup>, p. 118 c.

<sup>2 -</sup>vrşa- for -vrşan- occurs in the AV. after other numerals also.

<sup>3</sup> For some doubtful examples see WACKER-NAGEL 21, p. 116.

<sup>4</sup> The word first occurs in a B. passage of the TS. (1. 6. 94) in the form of dvandvāni 'couples', and in the AB.

5 An example used as the name of the

class.

6 'Having much rice', an example used as the name of the class.

### I. Iteratives.

COLLITZ, Transactions of the Oriental Congress of Berlin 22, 287 ff. — Delbrück, Vergleichende Syntax, Dritter Theil (1900), p. 141—153: Iterativcomposita. — Wacker-NAGEL 21, p. 142—148.

- 258. The repetition of an inflected form with loss of accent in the second word is very frequent in the RV. Such repetitions are treated in the Pada texts as compounds the members being separated by the Avagraha. The word thus repeated is generally a substantive and iteration is expressed chiefly in regard to time or distribution in regard to space; e. g. áhar-ahar, divédive, dyávi-dyavi 'every day'; grhé-grhe, dáme-dame, visé-vise 'in every house'; diśó-diśah (AV.) 'from every quarter'. Substantives are also thus repeated to express frequency or constant succession in other matters: satroh-satroh of every foe'; ánnam-annam (AV.) 'food in perpetuity'; agnim-agnim vah samidhā duvasyata (VI. 156) 'worship Agni again and again with your fuel', yajñásyayajñasya 'of every sacrifice' (x. 15), ángād-angāt 'from every limb' (x. 1636), párvani-parvani 'in every joint' (x. 1636). Adjectives repeated in this way are less common; e. g. pányam-panyam . . á dhāvata . . sómam (VIII. 2<sup>25</sup>) 'cleanse Soma who is again and again to be praised'; prácīm-prācīm pradlśam (AV. XII. 37) 'each forward (eastern) direction'; úttarām-uttarām sámām (AV. XII. 133) 'each following year', 'year after year'2.
- a. The repeated word was originally used in the singular only. But the plural meaning of this repetition led to the beginnings of plural forms, as ékan-ekā śatá daduḥ (v. 5217) 'they have given a hundred each' (lit. 'hundreds, each one'). But a word thus iterated seems never to be in the plural except in agreement with a plural.

b. The frequency of -e as locative of a-stems led to the occasional use of the dative in consonant stems; div-ê-div-e (for \*div-î-div i) and vis-ê-vis-e (for \*vis-i-vis-i).

c. The transition from iteratives to regular compounds, which appears in B., began with numerals. Thus the éka-ekah of the RV. (III. 29<sup>15</sup>) appears in the ŚB. as ékaika-; and from the dvá-dvā of the RV. (VIII. 68<sup>14</sup>) we come to the adverbial dvan-dvám 'in pairs' in the MS., and finally to dvandvá- 'pair' in the TS. (B).

d. Adjective compounds in which a word is repeated for emphasis are unconnected with iteratives, differing from them both in sense and accent; thus mahā-mahá-mightily great'; eṣaiṣī-f. of \*eṣaiṣā- (= eṣa-eṣā-) 'very speedy'3. Whether carā-carā- and calā-calā- 'moveable' belong to this group is somewhat uncertain.

# 2. Copulative Compounds.

REUTER, Die altindischen nominalcomposita, KZ. 31, 172–87: I. Copulative composita. — Delbrück, Altindische Syntax 31. — Richter, Die unechten Nominalkomposita des Altindischen und Altiranischen: IF. 9, 23 ff. — Whitney, Sanskrit Grammar 1252—61. — WACKERNAGEL 21, 62—74 (p. 149—173).

259. Classification of Dvandvas.— This class consists of compounds consisting of two substantives, far less commonly adjectives, the syntactical relation of which in the sentence is the same and which may be regarded as connected in sense by 'and'. The successive stages in the development of this class can be closely traced from the beginning in the Samhitäs. I. First we have in the RV. the most numerous group (about three-fourths

<sup>2</sup> The only repetition of a verbal form in this way is phoa-piba (II. 11<sup>11</sup>) 'drink again and again'; cp. above 88.

r A vocative repeated to express emphasis is not treated in the same way: in *áranyāny áranyāni* (X. 146<sup>1</sup>) both vocatives are accented, the second being as emphatic as the first.

<sup>3</sup> According to GELDNER, VS. 2, 15 the form esaisyā (RVI.) is the inst. sing. of esaisf-f. of \*eṣaiṣá-; but according to BR. and GRASSMANN it is neut. pl. of eṣaisyà-(=eṣa-eṣyà-) 'to be striven for with desire', 'desirable'.

of all the Dvandvas) in which the compound consists of two co-ordinated nouns in the dual, each with its own accent. 2. The first member assumes an unchangeable form. 3. Only one accent remains and is restricted to the last syllable of the final member. 4. The first member assumes (but quite rarely in the RV.) the form of the stem. 5. The formation, becoming more general, can assume plural endings (but the RV. has only a few examples in the last book). 6. In the later Samhitās this type becomes quite general, forming a single category with the dual Dvandvas. 7. The final stage (of which the examples are few) is that of Dvandvas which are neuter singulars of a collective character.

260. In the commonest and earliest type of the old Dvandvas each member is dual in form and has a separate accent. This type seems to have originated from two grammatical practices frequent in the Vedas: (a) the juxtaposition of two coordinate words without ca; e.g. bhúmano divás pári (IX. 735) 'away from earth and heaven', krátum dáksam (VIII. 423) 'understanding and will'; (b) the use of the elliptic dual which puts one of a pair in the dual to express both, as dyavā 'heaven and earth'. This origin is probable because the dual Dvandvas are found alternating with one or both of these usages; thus mitrā-várunā 'Mitra and Varuna' appears beside both mitrá alone and mitró várunah (or mitró várunas ca and mitrás ca várunas ca): mātárā-pitárā 'mother and father' beside mātárā or pitárā and pitre mātri and other cases, the VS. (Ix. 19) having pleonastically even pitárā-mātárā ca meaning father and mother. The transition from the syntactical collocation divás.. prthizyás (vi. 301) to a dual compound is seen in divásprthivy's 'of heaven and earth' (occurring four times in the RV.) where the second word is put in the dual to show clearly that an associated couple is meant. In the RV, the two duals of the compound are often separated: e. g. dyávā ha kṣámā (x. 121) 'heaven and earth'; dyávā yajñúih pṛthiví (VII. 53°); indrā no átra várunā (IV. 41°)2; á núktā barhih sadatām usásā (VII. 425) 'let Night and Dawn seat themselves upon the litter'; indra nie pūsánā (vi. 571) 'Indra and Pūṣan'; indra no àgni (vi. 593) 'Indra and Agni'. índrā yo agnť (VI. 601)3; cákṣur máhi mitráyor ām éti priyám várunayoh (vi. 511) 'the great, dear eye of Mitra and Varuna comes'. In two or three examples of tmesis the dual ending appears in the first member only, while the singular remains in the second; thus mitrá ... várunah (VIII. 252) and indrā yó vām varuna 4 (vi. 685) 'O Indra and Varuna'. Generally, however, the two duals are in immediate juxtaposition, as indrā-bi haspátī 'Indra and Brhaspati': dyávā-pṛthiví 'Heaven and Earth'; agní-sómā 'Agni and Soma'; gen. mitráyorvárunayoh5 'of Mitra and Varuna'.

The characteristic final vowel of the first member is  $-\bar{a}^6$ , as  $u_5\bar{a}s\bar{a}-n\hat{a}kt\bar{a}$  (or  $n\hat{a}kto_5\bar{a}s\bar{a}$ ); hence it even ousts  $-\bar{a}$  as in  $\hat{a}gn\bar{a}-visn\bar{u}$  (AV.) 'O Agni and Viṣnu'. Beside this  $-\bar{a}$  there sometimes appears a in the vocative, both in tmesis, as in  $mitra\ r\bar{a}j\bar{a}n\bar{a}\ varun\bar{a}$  (v. 623) 'O kings Mitra and Varuna' (voc. of  $r\hat{a}j\bar{a}n\bar{a}\ mitr\hat{a}-v\hat{a}run\bar{a}$ , III. 567; x. 645); and when the members are joined, as

T Cp. WACKERNAGEL, KZ. 23, 302 ff., REUTER, KZ. 31, 176 ff., DELBRÜCK, Altindische Syntax 58 (p. 98), Vergleichende Syntax, Erster Theil 41 (p. 137 f.).

<sup>&</sup>lt;sup>2</sup> In each of the first  $\tilde{0}$  stanzas of IV. 41 indr $\tilde{a}$  and  $v\dot{a}run\bar{a}$  are separated by one or two words of two or three syllables.

<sup>3</sup> Also viṣṇū agan várṇṇā 'Viṣṇu and Varuṇa' in a Mantra in TB. 11. 8. 45.

<sup>4</sup> The Pada text here reads  $v\acute{a}run\bar{a}$ ; cp.  $indr\bar{a}$  kố  $v\bar{a}m$   $varun\bar{a}$  (iv. 411).

<sup>5</sup> Double duals in -bhyām do not appear to occur.

<sup>&</sup>lt;sup>6</sup> The ending -au or -āv never occurs in the first member.

in párjanya-vātā (VI. 496), voc. of parjányā-vátā (VI. 5012), and always in indravāyū<sup>τ</sup> 'O Indra and Vayu'. The ending -τ appears in the first member in agni-sómau 'Agni and Soma'; and -ū in krátū-dáksau (VS.)2.

261. These coordinate duals having early come to be regarded as a unit, the commonest ending of the first member, that of the nom. acc., came to be retained unaltered in other cases and in derivatives3. Thus arose the forms mitrá-várunābhyām; mitrá-várunayos beside mitráyor-várunayos, índrāvárunayos; in the AV. dyávā-prthivíbhyām and dyávā-prthivyós (instead of the divás-prthivyós of the RV.).

262. In a minority of instances, but comparatively oftener in the later Samhitas than in the RV., the first member loses its accent and only the last syllable of the final member (irrespectively of its original accent) has the acute 4; thus indra-pūsnis (beside indra-pūsána); soma-pūsábhyam; bhavarudráu (AV.) 'Bhava and Rudra', bhavā-śarváu (AV.) 'Bhava and Sarva's; vātā-parjanyā 'Vāta and Parjanya' (parjánya-); sūryā-candramásā 'sun and moon' (candrá-mas-).

a. In the later Samhitās there are a few examples in which the nom. sing. of stems in tr has, doubtless owing to identity in form of the final vowel with the Vedic dual ending -ā, become fixed in the first member: pitā-putráu (AV.) 'father and son'; nestā-potfbhyām (TS. I. 8. 181) 'to the Nestr and the Potr' 6. They doubtless started from syntactically coordinated nominatives (like divás prthivyós beside divás prthivyás, VI. 4727)7.

263. Dvandvas with a single accent having established themselves, the stem form began to encroach in the first member. The only two examples from RV. I.—IX, are *indra-vāyū* (the transition being facilitated by the more frequent occurrence of the vocative indra-vāyū) and satyīnrtė<sup>8</sup> (VII. 403) 'truth and untruth'. Two additional neuters occurs in book X: sāśanānaśanē 'what eats (sa-asana-) and does not eat' (an-asana-); and rk-sāmābhyām 'with hymns and chant'. In the later Samhitas this becomes the prevailing type regularly followed in new formations; prastotr-pratihartifbhyām (TS. 1.8. 181) 'to the Prastotr and Pratihartr'; krátū-dákṣau (VS.); dakṣa-kratú (TS.), śūdrāryáu (VS.) 'a Sūdra and an Ārya'9.

264. The stem form having established itself in the first member, the compounding of Dyandvas became freer, and not only neuters but feminines began to be admitted, as dīksā-tapás-os (VS.) 'consecration and austerity'. Here, too, the final syllable of the compound has the acute; the svarita of the original word is, however, retained in brahma-rājanyàu (VS. XXVI. 2; AV. XI. 328) 'a Brahman and a warrior'.

265. Dvandvas with plural ending are on the whole later than those with dual ending. They would first have been used to express the plural sense of the pair in question, thus sá! āhur dyávā-pṛthivi!! (VIII. 916) 'they speak of six heaven-and-earths'; aho-rātrāni = 'pairs of day-and-night'.

nom. indra-vāvā.

<sup>&</sup>lt;sup>2</sup> The dual notion is sometimes emphasized by the addition of ubhau 'both', as ubhá mitrá-várunā; sūryā-candramasáv ubhá

<sup>3</sup> Like jeder-manns for jedes-manns in German. Bartholomae, IF. 20, 168 (Anzeiger) regards these Dvandvas as abbreviations by dropping the common ending in the first | Sūtras, as idhmā-barhiṣī 'fuel and litter'. member.

<sup>4</sup> This accentuation is probably due to Dvandva. the influence of collective compounds which are nearly allied to Dvandvas. Indragni, further examples from B. portions of the indragnibhyam, indragnyós and agnindrabhyam later Samhitas.

<sup>&</sup>lt;sup>1</sup> This Dyandva always has a even in the are examples which may contain the stem form in the first member (263).

<sup>5</sup> WACKERNAGEL 21, p. 153, also quotes somā-rudráyos (TS.), uṣṇihā-kakubhau (MS.).

<sup>6</sup> On tvast i-varūtrī see WACKERNAGEL 21, 64 (p. 154).

<sup>7</sup> The three divisions of Dvandvas treated above include masculines and feminines only. Neuters of similar type first appear in the

<sup>8</sup> This is the earliest example of a neuter

<sup>9</sup> WACKERNAGEL 21, p. 155, gives some

A transition to the use of plural Dvandvas, that is, of pairs of groups, is made by indrā-marutas 'O Indra and Maruts', where the dual notion is made up of a singular on the one hand and a group on the other. The older type of such plural Dvandvas (which express two coordinated plurals, the first member retaining its accent and the archaic ending  $-\bar{a}$ , like the  $-\bar{a}$  of dual Dvandvas) is represented by ángā-párāmṣi 'limbs and joints' occurring in a B. passage of the TS. (II. 5. 61). Examples of the later type with one accent are ukthā-śastráni (VS. XIX. 28) 'recitations and praises', ukthā-madáni (AV.) 'recitations and rejoicings', and probably ukthārkā (VI. 341) 'recitations and hymns'r. The latest type of these plural Dvandvas (like that of the duals) has the stem form in the first as well as the acute on the last syllable of the final member. The only examples of this type in the RV. occur in book x: aho-rātrāni² 'days and nights', ajāvayas 'goats and sheep', dhana-bhaksésu 'in riches and enjoyments'. In the later Samhitas this type becomes quite general, forming a single category with the duals; e. g. deva-manusyàs (AV. VIII. 109), bhadra-pāpás (AV.) 'the good and the bad', priyāpriyāni (AV.) 'pleasant and unpleasant things' 3.

- a. The expression ámrta mártyānām (I. 269) appears to be an abridgment for amṛtānām mártyānām 'of immortals (and) mortals', amounting almost to a plural Dvandva (= amrta-martyānām)4.
- 266. A few Dvandvas appear in the Samhitas with a singular ending, these being neuter only. The older type in which a dual or plural has been turned into a singular at the end, only in order to express a collective meaning, is represented in the RV. by istā-pūrtám<sup>5</sup> 'what has been offered or given', originally a pl. n. in both members (\*iṣṭā-pūrtā) which has become a singular to emphasize its collective character<sup>6</sup>. Both owing to the lack of an early type of neuter Dvandvas and because of the desire to express a collective sense, nearly all the neuter Dvandvas of the later kind are singular. In most instances both members are neuter; e. g. kṛtākṛtá-m (AV.) 'what has been done and not done', cittākūtá-m (AV.) 'thought and intention' (ákūta-), bhūta-bhavyá-m (AV.) 'the past and the future', samista-yajús (VS.) 'sacrifice and sacrificial formula'; bhadra-pāpasya (AV.) 'of good and evil', añjanābhyañjana-m (AV.) 'unction and inunction' (abhyañjana-), kasipūpabarhaná-m (AV.) 'mat and pillow'.

a. In a few instances the first member is a masculine or feminine: keśaśmaśrú (AV.) 'hair and beard', isv-āyudhé (loc. sing.) 'arrows and weapons' (AV.).

267. Adjectives also occur as Dvandvas, but they are of rare occurrence. Three types may be distinguished.

1. Adjectives of colour expressing a mixture: e. g. nīla-lohitá- 'dark-blue and red' = 'dark red'; tāmra-dhūmrá- (AV.) 'red and black' = 'dark red'; aruná-babhru- (VS.) 'ruddy and yellow', dhūmrá-rohita- (VS.) 'grey and red'7.

<sup>2</sup> The gender of the first member here prevails over that of the second.

5 See WINDISCH in Festgruss an Böhtlingk,

7 Except in these colour adjectives in the VS., the accentuation of the adjective Dvandvas is the same as that of neuter substantive Dvandvas, that is, the last syllable of the final member has the acute.

Probably = ukthá-arká, not uktha-arká, the gender of the first member having prevailed over that of the last.

<sup>3</sup> Some other examples from B. passages of the Samhitas in WACKERNAGEL 27, p. 157. The oldest example of a Dvandva consisting of three members is trānāpānodānėsu (TS. VII. 3. 31) in the outward, the downward and the upward airs', where the plural results from the addition of three individual things (not three groups).

<sup>4</sup> Cp. WACKERNAGEL 21, p. 157.

p. 115 ff. 6 WACKERNAGEL (2<sup>1</sup>, 68) quotes idhma-barhis from the MS., 'fuel and litter', which with its double accent as well as dual ending in the first member represents a still earlier type.

- 2. Adjectives expressing a contrast; e. g. utkūla-nikūlá (VS.) 'going uphill and downhill'.
- 3. Adjectives used with dual or plural substantives to express that each is an attribute of one unit of the kind; e. g. padbhyām daksina-savyābhyām (AV. XII. 128) 'with the right foot and the left'; or with the substantive to be supplied, saptamāsṭamābhyām svāhā (AV.) 'hail to the seventh and the eighth (Āngirasa)'; aghaśaṃsa-duḥśaṃsābhyām (AV.) 'by those plotting evil and those plotting ill'; sāhnātirātráu (AV.) 'terminating with a day (sa-ahna-) and exceeding a day' (ati-rātrá-).
- 268. As regards the order of the members in a Dvandva, the rule seems to be that the more important or the shorter word comes first; thus dyāvā-kṣāmā, dyāvā-bhūmī, dyāvā-pṛthivī' 'heaven and earth'; sāryā-māsā and sūryā-candramásā 'sun and moon'; indrā-várunā 'Indra and Varuna'; ulūkhalamusalé (AV.) 'mortar and pestle'. Indrā- regularly comes first in the RV. and the later Samhitās in some dozen Dvandvas2; e.g. indrāgnī; otherwise agnī- always precedes; sóma- comes after indrā- and agnī-, but before pūsanand rudra. The longer word comes first, perhaps, as the more important, in parjányā-vátā 3 'Parjanya and Vāta' and in turváśa-yádū 'Turvaśa and Yadu'. This can hardly be the reason in sambādha-tandryàs (AV.) 'oppressions and weariness'. The shorter word comes first in mitrá-várunā, though Varuṇa is the more important of the two4; in rk-sāmābhyām the shorter word is at the same time the more important.

## 3. Determinative Compounds.

269. Classification. — The large class of determinative compounds in which the first member determines or limits the sense of the last, is best divided into two main groups. In the one, the final member is a verbal noun which governs the first member in meaning, and often even in form, as a verb governs its case. In the other, the final member is an ordinary noun (either adjective or substantive), the relation of which to the first member is a purely nominal one.

#### a. Verbal Noun as final member.

270. The final member is often a verbal noun either not occurring as a simple word or at least not belonging to a type used as simple words: either the bare root<sup>5</sup> or a verbal derivative formed with the suffixes -a, -ana, -i, -in, -man, -van. These nouns limited to use as final members are agent nouns; e. g. havir-ád- 'eating the oblation', sam-ídh- 'flaming', /yotis-k/-t- 'producing light', abhi-hr\(\text{i-t-}\) 'causing injury', go-ghn-\(\delta\)- 'cow-slaying', ā-kar-á- 'scattering'; amitra-dámbh-ana- 'injuring enemies', tuvi-gr-í- 'devouring much', uru-cákr-i- 'doing large work'; bhadra-vād-in- 'uttering an auspicious cry'; āśu-hé-man- 'swiftly speeding', bhūri-dā-van-6 'giving much'. — Occasionally agent-nouns limited to use as final members are formed with other suffixes: prati-dīv-an- 'adversary at play', vi-bhv-an- 'far-reaching' and vi-bhv-an- 'skilful'; pra-py-asá- (AV.) 'swelling', sva-bhy-asá- (AV.) 'spontaneously frightened';

I This form occurs 79 times in the RV. and prthivi-dyáva only once.

<sup>&</sup>lt;sup>2</sup> Otherwise only agnīndrábhyām (VS.)
'Agni and Indra'. Cp. the list of dual divinities in Vedic Mythology, Grundriss III, I A, variations for -man and -van, as vi-rithр. 126.

<sup>3</sup> Once also vātā-parjanyā.

<sup>5</sup> Appearing in its weakest form or, if ending in a short vowel, with determina-

mant- 'shining'; prāṇa-dá-vant- (AV.) 'lifegiving' (cp. WHITNEY on AV. IV. 355); see 4 Cp. WACKERNAGEL 21, p. 168 (middle). REUTER, KZ. 31, 560 f.

duli-slās-u- 'malignant', vi-bhind-i- 'splitting', pra-yly-u- 'used for driving', go-vind-i- 'seeking cows', pari-tatn-i- (AV.) 'encompassing', puṇṣ-cal-ā- (VS.) 'prostitute'; pīva-sphā-kā-¹ (AV.) 'abounding in fat', ni-hā-kā- 'whirlwind'; vi-bhañj-ani- 'shattering'; pra-cet-ina- 'affording a wide prospect'; div-l-tmant-'going to heaven'; tuvi-kūrm-l(n)- 'stirring mightily'; vāsaḥ-palpūl-ī- (VS.) 'washing clothes'.

- a. The meaning of these agent-nouns restricted in use as final members is chiefly active. But in those of them which consist of the bare root (with or without the determinative -t) it is often intransitive; e. g. namo-výdh-'growing by adoration'; it is not infrequently passive, as mano-výj-'yoked at will', su-yúj-'well-yoked'; yāma-hū-'called by entreaties', indra-pā-tama-'most eagerly drunk by Indra', tīvra-sú-t-'pressed from the fermenting mass', hṛdaya-vidh-'fierced to the heart' 2 (AV.). The passive meaning also appears in one derivative formed with -a: pari-mar-à- (TS.) 'died around' = 'around whom people die'. Final members formed with -a, -ana, (i)-tu when compounded with su- or dus- also have a passive (gerundive) meaning expressive of the ease or difficulty with which the verbal action is performed; e. g. su-hár-a- 'easy to be done', su-mán-tu-'easily recognisable', su-vod-aná-'easily acquired'; dur-āp-aná-'hard to attain'; dur-ni-yán-tu-'hard to restrain', dur-dhár-ī-tu-'irresistible', dū-dábha-'hard to deceive'; also an isolated derivative with -i, dur-gf-bh-i-'hard to catch', and one with -na, su-śrú-na-'easily heard' (beside su-śrú-t-'hearing easily').
- 271. A certain number of verbal nouns restricted to employment as final members which are formed from the simple root (with or without determinative -t) or with the suffixes -a, -ana, -tha are nouns of action; e.g. srad-dhā-'belief', āsīr-dā-(VS. TS.) 'fulfilment of wishes', ½pa-stu-t-'invocation', pari-pād-'snare', sam-nām- (AV.) 'affection'; kṣudhā-mār-ā- (AV.) 'death by hunger', pāpa-vād-ā- (AV.) 'evil cry'; deva-hēd-ana- 'offence against the gods', baddhaka-mōc-ana- (AV.) 'release of a prisoner'; go-pī-thā- 'drink of milk', putra-kṛ-thā- 'procreation of sons', sam-i-thā- 'conflict'. kāma-pr-ā- is both a noun of action, 'fulfilment of desires' (AV.) and an agent-noun, 'fulfilling desires' (RV.)<sup>3</sup>.
- a. A class of secondary nouns of action is here formed by adding the suffixes -ya and -yā to agent nouns formed from the simple root (with or without -t). These are abstracts (neuter and feminine respectively); e. g. havir-ād-ya-'enjoyment of the oblation'; pūrva-pāy-ya- and pūrva-pā-ya-'protection of men', bahu-pāy-ya- 'protection of many', 'large hall', deva-yáj-ya- n. and -yaj-yā- f. 'adoration of the gods' (deva-yáj- 'adoring the gods', VS.), nṛ-ṣāh-ya- 'overcoming of men' (nṛ-ṣāh- 'overcoming men'), rāja-sā-ya- (AV.) 'royal consecration' (rāja-sā- 'creating a king', VS.), madhyama-sthéy-ya- 'standing in the middle' (madhyama-sthā-adj., VS.); su-krt-yā- 'righteousness' (su-kṛ-t- 'righteous').
- 272. The close verbal connexion of these final members with the roots from which they are derived, shows itself formally. Thus they retain the palatal of the verb where the guttural would otherwise appear<sup>4</sup>. Again, agent nouns of this kind are formed from almost every kind of present stem. The following are examples of such nouns from present stems of: I. the first class: cakram-ā-sajá- 'stopping<sup>5</sup> the wheel'; 2. the sixth class: ut-tudá-(AV.) 'instigator' (tudá-ti), sam-girá- (AV.) 'swallowing' (sám girāmi). 3. stems with -cha: go-vyacchá- (VS.) 'cow-tormentor' (from a lost present stem \*vyaccha-)

<sup>&</sup>lt;sup>1</sup> For p̄was-sphāká.; the Mss. read p̄ibasphāká-m (Pada p̄ībaḥ-phākám): see Whitney on AV. IV. 73.

<sup>&</sup>lt;sup>2</sup> But 'heart-piercing' (RV.).

<sup>3</sup> Isolated examples of nouns of action formed with other suffixes are su-papt-ani'good flight', sam-śreṣ-iṇá- (AV.) 'conflict'(?).

<sup>4</sup> See WACKERNAGEL 2<sup>1</sup>, 76. Exceptions to this would be *twoi-kūrmi-(n)*- and *divā-kará-* (AV.) 'sun', if these words are derived from *car-* 'fare'.

<sup>5</sup> From á sajāmi 'I attach'.

4. the fourth class or passive with -ya: akrsta-pacyá- (AV. VS. TS.) ripening in unploughed ground, a-pasyá- not seeing, ugram-pasyá- (AV.) 'fierce-looking', mām-pasyá- (AV.) 'looking at me', adhi-pasya- (AV. Paipp.) 'superintendent', punar-manyá- 'remembering' (mánya-te 'thinks'), á-risanya-'not failing' (riṣaṇyá-ti), bala-vi-jñāyá- 'recognized by his strength', a-vi-dasyá-'not ceasing' (vi dasyanti 'they cease'), a-vi-driyá- 'not bursting' (dr- 'split'). 5. stems with -aya: vācam-īnkhayá- 'stirring the voice', samudram-īnkhaya-(only voc.) 'stirring the vat' (īnkháya-nti 'they shake'), viśvam-ejaya- (only voc.) 'exciting all' (ejáya-ti 'sets in motion)', ati-pārayá- 'putting across'. 6. the fifth (-nu) and ninth (-na) classes: viśvam-invá- 'all-urging' (in/-ti, inv-a-ti 'urges'), dhiyam-jinvá- 'stirring devotion' and viśva-jinvā (voc. du.) 'allquickening' (jinv-a-ti 'stirs'), ā-daghná- 'reaching to the mouth' 2 (dagh-nu-yāt 'may reach', K.), dura-dabhná- (AV.) 'eluding doors' = 'not to be kept by bars and bolts' (dabhnuv-anti 'they deceive'), dānu-pinvá- 'swelling with drops' (pinv-āná- 'swelling'), sadā-prná- 'always giving' (prná-ti 'fills', 'bestows'), a-miná-3 (beside á-minant-) 'undiminishing' (miná-ti 'diminishes'), pra-mṛṇá-'destroying' (pra-mrnánt-'crushing', prá mrna 'destroy'), a-sinvá-4 (beside á-sinvant-) 'insatiable', a-sunv-á- 'not pressing Soma' (beside á-sunv-ant-). 7. the sixth and seventh classes: agnim-indhá-'fire-kindling' (indh-áte 'they kindle'), pra-kṛntá- (TS.IV. 5.31) and vi-kṛntá- (VS.) 'cutting to pieces' (kṛntá-ti 'cuts'), bhūmi-drmhá- (AV.) 'firmly fixed on the ground' (drmha-ta 'make firm'), ni-limpá- (AV.) a kind of supernatural being (ní limpāmi 'I besmear', AV.). 8. the root class: vrātya-bruvá- (AV.) 'calling himself a Vrātya' (bruv-ánti 'they say'). 9. the reduplicating class: anu-jighrá- (AV.) 'snuffing at' (j/ghrantī 'smelling'), sam-pibá- (AV.) 'swallowing down' (sám pibāmi, AV.)5.

a. In a few instances verbal nouns which are final members of compounds in the RV. or the later Samhitās subsequently appear as independent words. Thus jāta-vidyā-'knowledge of things', vidyā. (AV. TS.) 'knowledge' 6. On the other hand, verbal nouns derived from roots without suffix, which in the RV. appear both as independent words and as final members of compounds, often survive in the later Samhitas in their compound form only; such are tiv- 'racing',  $d\vec{a}$ - 'giver',  $s\vec{u}$ - m. 'begetter', f. 'mother',  $sth\vec{a}$ - 'standing'. As a rule verbal nouns which occur independently have the same general meaning as when they form the final member of a compound. But those formed without any suffix generally, and those formed with -a occasionally, have the sense of agent nouns at the end of compounds, but of action nouns or of designations of things conreceived as feminine, when they are used independently. Thus gible- f. 'act of seizing', fiva-gible- adj. 'seizing alive'; vid-â 'with knowledge', hotrā-vid- adj. 'knowing the oblation', yidh- f. 'fight', pra-yidh- adj. 'assailing'; bhar-â- (AV.) 'act of carrying', pustim-bharâ- 'bringing prosperity'. Sometimes the simple word has the meaning of an agent noun as well as of an action noun; e. g. af's- adj. 'seeing' and f. 'act of seeing'; bhuj-di. 'spinying', and f. feature- adj. 'feature- adj. 'feature- adj. 'feature- adj. adj. 'enjoying' and f. 'enjoyment'; stibh- adj. 'shouting' and f. 'shout'; but at the end of a compound these three words express the agent only. Similarly grābh-á- m. 'seizer' (AV.) and 'grasp', but grāva-grābh-á- 'handling the Soma stones' 7.

273. Independent verbal nouns. — Several kinds of verbal nouns which are also capable of independent use occur as final member of compounds. Among these the only ones of frequent occurrence are those in -ta which are adjectives (often used as substantives) and the corresponding abstract

the view that this -ya is identical with that TS.): dád-ati 'they give'. of the gerundive.

2 -daghna- forms the last member of several other compounds in the later Samhitās. See Wackernagel 21, p. 181.

3 Cp. WACKERNAGEL 21, p. 181, note.

4 From a lost root \*si-nó-ti 'satisfies'. 5 There is also a transition form (leading

to the later -dada-) in ayur-dad-am (AV.) Indo-arische Philologie. I. 4.

\* WACKERNAGEL 21, p. 179 (bottom), refutes | acc. f. 'life-giving' (beside ayur-da', AV. VS.

<sup>6</sup> For examples of verbal nouns which assume an independent character in the later language, see WACKERNAGEL 21, 77 a.

<sup>7</sup> On the origin of these verbal compounds and the relation of the final member to the independent word, see WACKERNAGEL 21, 78 b and note (p. 186 f.).

substantives in -ti; e. g. purò-hita- adj. 'placed in front', m. 'domestic priest'; puró-hiti- f. 'domestic priesthood'.

- r. Agent nouns. Those which are formed with -aka and -snu are compounded with prepositions only: abhi-króś-aka- (VS.) 'one who cries out', vi-lāy-aka- (VS.) 'melter'; abhi-śocayi-ṣnú- (AV.) 'causing heat', ni-ṣat-snú- 'sitting firmly'. Agent nouns in -tr may be compounded with adverbs, as pura-etr-'going before', purale-sthati- 'standing at the head', and rarely with substantives, as nr-pātr-'protecting men', man-dhātr-x 'applying (his) mind', 'thoughtful man'. Agent nouns formed with -u from secondary present stems are in a few instances compounded with substantives: gir-vanasy-il- 'fond of hymns', deva-pīy-i- (AV. VS.) 'hating the gods', rāṣṭra-dips-i- (AV.) 'wishing to injure the country'.
- 2. Action nouns. A few action nouns formed with -ā from adjectives in -u derived from secondary verbal stems, begin in late passages of the RV. to appear in composition with a substantive: māmsa-bhiks-á- (1. 16212) 'request for flesh', śraddhā-manasy-á- 'faithful intent' (X.1139); sajāta-vanasy-á-(TS. II. 6, 67) 'desire to rule over relatives'. Much more common are the abstracts in -ti (corresponding to adjectives in -ta), which may be compounded with indeclinables or nouns (adjective or substantive)<sup>2</sup>; e. g. άn-πti- 'no help', d-śasti- 'curse', nir-rti- 'dissolution', sá-hūti- 'joint invocation', su-ūti- 'good aid'; sóma-pīti- 'drinking of Soma', sóma-suti- 'pressing of Soma'. Some of these are becoming or have become agent nouns; thus jarád-asti- 'attaining great age' as well as 'attainment of old age'; vásu-dhiti- 'bestowing wealth' as well as 'bestowal of wealth'; but vásu-nīti- (AV.) only 'bringing wealth'. Others. even in the RV., approximate to the type of the non-verbal determinatives, as ásu-nīti- 'world of spirits', rjú-nīti- 'right guidance', devá-hiti- 'divine ordinance', námo-vrkti- 'cleansing for adoration', pūrvá-citti- 'foreboding': these can, however, be understood as abstracts to corresponding compounds in -ta3.
- 3. Gerundives. The gerundives formed with -ya are ordinarily compounded with adverbial prepositions, as puro-'nuvākyà- (sc. fc- AV.) '(verse) to be repeated beforehand'. In the later Samhitas a noun here sometimes appears as first member: nīvi-bhāryà- (AV.) 'to be worn in a skirt', prathama-vāsyà-(AV.) 'worn formerly'. The Proper Names kunda-pāyya-, puru-māyyà, vṛṣṭihávya-, if they are formed with the gerundive suffix -ya, would be examples from the RV.4.—Gerundives formed with -anīya and -enya5 are compounded with prepositions and a(n)- only:  $\bar{a}$ -mantrantya- (AV.) 'to be asked'; samcarénya- 'suitable for walking on', a-dvisenyá- 'not malevolent'. — Gerundives in -tva are not compounded at all except with a(n)-.
- 4. Participles. Besides prepositions and a(n)-, only indeclinable words occurring in connexion with verbs are found compounded with participles (exclusive of the past passive participle): thus alalā-bhávant- 'murmuring' (waters) and janjanā-bhavant- 'crackling' (flame), astam-yant- (AV.) 'setting' and astam-eṣyánt- (AV.) 'about to set', á-punar-dīyamāna- (AV.) 'not being given back', āvis-kṛṇvāná- 'making visible', dir-vidvāṃs- 'ill-disposed, súvidvāms- 'knowing well'.

I From manas- through \*manz-dhātý-.

preceding substantive has the sense of an in their formation.

<sup>3</sup> As devá-hiti- 'act of ordaining by the gods'.

ratrī- 'night of the new moon', eka-vādyā- sv-etavyam (TS.) 'easy to go'.

<sup>(</sup>AV.) 'uttering a single sound', a kind of <sup>2</sup> The verbal force is strongest when the spectre, and vār-kārvā- (1. 884) are obscure

<sup>5</sup> A few gerundives in -tavya begin to be compounded with prepositions or particles gods' beside devá-hita- 'ordained by the in the B. portion of the TS. and MS.: pravastavyàm (TS.) 'one should go on a jour-4 The compounds amā-vāsyā- (AV.) sc. ney'; a-bhartavyá- (MS.) 'not to be borne',

a. By far the commonest verbal nouns occurring as final member are the past participles in -ta, which are compounded with nouns as well as prepositions and other indeclinables. The meaning is mostly passive. It is, however, sometimes active, but in the RV. almost exclusively when a preposition precedes, as 'id-ita-'risen'; when a noun precedes, only in sárga-takta-'speeding with a rush' and sárga-pratakta-'darting forth with a rush'. In the AV. a noun appears also in uda-plutá-'swimming in the water'; occasionally even transitively governing the first member in sense: kṛtá-dviṣṭa-(AV.) 'hating what has been done' (by another)'.

b. The past participle in  $-n\alpha$  is less frequent and occurs in the RV. only compounded with prepositions, a(n)- and su-; e. g.  $p\acute{a}ri$ -cchinna-'lopped around';  $\acute{a}$ -bhinna-'not split';  $s\acute{u}$ -pūrna-'quite full'. But it is found a few times in the later Samhitās with a preceding substantive: agni-nunna- (SV.) 'driven away by fire',  $resm\acute{a}$ -cchinna- (AV.) 'rent by a storm'; and with active

(transitive) sense gara-gīrná- (AV.) 'having swallowed poison'.

5. There are besides some verbal adjectives in -ra or (after a vowel) -tra, -la and -ma, the first of which occurs compounded with nouns as well as prepositions: \(\delta\cdot -sk\ra-\text{ra}\) 'united' 2, \(ni\-mrg\)-ra- 'attached to', \(tan\delta\cdot subh\)-ra- 'shining in body', \(hari\cdot scand\)-ra- 'shining yellow'; \(vi\-bhr\)-tra- 'to be borne about in various directions'; \(\delta\-mi\si\-la\-\cdot, ni\-mis\-la\-\cdot, s\delta\-mm\) 'emaciated', \(\delta\cdot -chu\cdot\-ma\-\cdot\) (TS. I. 6. 22) 'hissing upwards', \(ni\-sus\-ma\-\cdot\) (TS. I. 6. 22) 'hissing downwards'.

6. Comparatives and superlatives in -īyāms and -iṣṭha having originally been verbal adjectives are found in composition with prepositions and sám- when they still retain their verbal meaning: úd-yamīyāms- 'raising excessively', pári-ṣvajīyāms- (AV.) 'clasping more firmly', práti-cyavīyāms- 'pressing closer against', vl-kledīyāms- (AV.) 'moistening more'; ā-gamiṣṭha-

'coming quickly', śam-bhavistha- 'most beneficial'.

### First member in verbal determinatives.

274. a. Prepositions. At the beginning of determinatives prepositions are employed in accordance with their use in verbal forms; e. g. pra-ni- and pra-niti- 'furtherance', pra-niti- 'leader', pra-nita- 'furthered', pra-nini- 'guiding constantly'. Even in the many instances in which the corresponding verbal combination has not been preserved, it may be assumed to have existed; e. g. in abhi-pra-mir- 'crushing' and abhi-pra-bhangin- 'breaking'. Occasionally, however, the preposition has a meaning which otherwise occurs only before non-verbal nouns; e. g. ati-yājá- 'sacrificing excessively'3. A preposition belonging to the second member is once prefixed to the first in sam-dhanā-jl-t (AV.) 'accumulating (= sam-jl-t-) 'wealth'.

b. Adverbs. Various kinds of adverbs occur in this position, as puro-yávan- 'going before', akṣṇayā-drúh- 'injuring wrongly'; amutra-bhūya- (AV. VS.) 'state of being there' (i. e. in the other world). The privative a(n)- though belonging in sense to the final member always precedes the first; e. g. án-agni-dagdha- 'not burnt by fire'; ú-paścād-daghvan- 'not remaining behind';

á-dāra-sṛ-t (AV.) 'not falling into a crack'.

c. Nouns. The first member, when a noun, expresses various relations to the last.

T Cp. WACKERNAGEL 21, p. 195; but also 3 In TS. II. 5. 44 (B.) ati-yaj- means 'to WHITNEY on AV. VII. 1131. pass over in sacrificing'.

It expresses: I. the object, which is the prevailing meaning when the final member is an agent noun or an action noun; e.g. ab-jl-t- 'winning waters', asvahayá- 'urging on steeds', nṛ-pātṛ- 'protecting men', vája-sāti- 'act of winning booty', vrtra-hátya-n. 'act of slaying Vrtra' i. When the final member is a verbal noun formed from kr- 'make', the first member does not necessarily express the product, but may mean the material with which the activity is concerned: thus hiranya-kārá- (VS.) is not 'gold-maker' but 'worker in gold', 'goldsmith'.

- 2. the agent when the last member has a passive sense; e.g. indra-patama-'most drunk by Indra', sóma-sita-'excited by Soma'; occasionally also when the final member is an action noun, as devá-hiti- 'ordinance of the gods', parna-śadá- (AV. VS.) 'fall of leaves', mitra-túrya- (AV.) 'victory of friends'.
- 3. the instrument, the source, or the locality when the final member is an agent noun or a past passive participle; e.g. ádri-dugdha-2 'milked with stones', aritra-párana- 'crossing with oars'; gó-jāta- 'produced from kine', tīvra-sú-t- 'pressed from the fermenting mass'; uda-plutá- (AV.) 'swimming in the water', áhar-jāta- (AV.) 'born in the day', puru-bhú- 'being in many places', bandhu-ksí-t- 'dwelling among relatives', píśni-ni-presita-3 'sent down to earth'.
- 4. in an appositionally nominative sense, that as or like which the action of the final member is performed; e. g. Isana-kf-t- 'acting as a ruler', pūrva-pā- 'drinking first', vāmā-jāta- 'born as one dear' = 'dear by nature'; dhāra-vākú- 'sounding like streams', syenú-jūta- 'speeding like an eagle'.
- 5. in the sense of a predicative nominative before a past participle, or a predicative accusative before an agent noun expressive of 'saying'; e.g. bhaksám-krta- (TS.) 'enjoyed', stóma-tasta- 'fashioned as a hymn of praise'; vrātya-bruvá- (AV.) 'calling oneself a Vrātya'.
- 6. adverbially the manner in which an action is done, sometimes by means of a substantive, more often by means of an adjective; e. g. rtv-lj-'sacrificing at the proper time', that is, 'regularly', sárga-takta- 'speeding with a rush'; āśu-pátvan- 'flying swiftly', dhruva-kṣi-t- (VS.) 'dwelling securely', satyayáj- 'sacrificing truly'; with a numeral in dvi-já- (AV.) 'twice-born'.
- 275. Before a verbal noun a nominal first member very often appears with a case-ending4, generally with that which the corresponding verb would govern in a sentence. The accusative is here the commonest case, the locative coming next, while the other cases are rarer. A singular caseending (the acc. or inst.) may here indicate a plural sense; e. g. áśvam-iṣṭi-'seeking horses', puran-dará- 'destroyer of forts', s'inesita- 'driven by dogs' (sínā-). Plural (acc.) endings sometimes occur, but dual endings are never found in these compounds.

The accusative case-ending is very common, generally expressing the object of a transitive verb, as dhanam-jaya- 'winning booty'. But it also expresses other senses, as that of the cognate accusative; e. g. śubham-yā-(van)-'moving in brilliance'; or of an adverbial accusative, e.g. ugram-pasyá-5

jit-am svargám (AV. IV. 348) as showing that reference to', as bāhú-jūta- 'quick with the the first member was felt to have an accusative sense = 'winning the heavenly world' (svargám lokám); but the Paipp. Ms. has the accusative of the goal. reading svargyam, which WHITNEY regards as better, translating 'world-conquering, heaven-going'.

<sup>2</sup> When the first member is a part of swiftly. In patam-gá- 'bird', patam-probably

I WACKERNAGEL 21, p. 198, quotes boka- the body it expresses the sense of 'with

<sup>3</sup> The local sense here is that of the

<sup>4</sup> Cp. LINDNER, Nominalbildung p. 28. 5 Occasionally the -m is inorganic, as in maksum-gamá- and āsum-gá- (AV.) 'going

- (AV.) 'looking fiercely'; or of a predicative accusative, e.g. ayakşmam-kárana-(AV.) 'producing health', 'srtam-kartr'- (TS, III, I, 44) 'making cooked'. The acc. pl. occurs in kā-cit-kará- 'doing all manner of things', páśva-isti-2 'desiring kine', vipaś-cit- 'understanding eloquence', vipo-dhá- 'granting eloquence', huraścit-3 'intending evil'4.
- a. The accusative form is commonest before agent nouns ending in -a or -i which begin with a single consonant and the first syllable of which is short: that is, the -m here appears in a syllable in which rhythmic lengthening would be allowed5. This accusative form is the regular rule in the RV. when the stem of the first member ends in -a, being found before -kara-'making', -caya- 'collecting', -jaya- 'conquering', -tara- 'overcoming', -dara- 'cleaving', -bhara- 'bearing', -ruja- 'breaking', -sani- 'winning', -saha- 'overwhelming'; e. g. abhayam-kará- 'procuring security'. The only exceptions to this rule in the RV. are aśva-hayá- 'urging on steeds', śukra-dilgha- 'emitting clear fluid'. In the RV, the ending -im also occurs in pustim-bhará- 'bringing prosperity' and harim-bhará-6 'bearing the yellow-coloured (bolt)'; and -um inorganically in maksum-gamá- 'going quickly'. In the later Samhitās also occur iram-madá- (VS.) 'rejoicing in the draught', dūram-gamá- (VS.) 'going far', devam-gamá- (TS.) 'going to the gods', yudhim-gamá- (AV.) 'going to battle', viśvam-bhará- (AV.) 'all-sustaining', śakam-bhará-1 (AV.) 'bearing ordure'8.
- b. The accusative form in -am is not uncommon before a final member with initial vowel (coalescence of the two vowels being thus avoided); e.g. cakram-āsajá- 'obstructing the wheel', viśvam-invá- 'all-moving', áśvam-isti-'desiring horses', vācam-tikhayá- 'word-moving', samudram-tikhaya- (only voc.) 'stirring the vat', viśvam-ejayá- 'all-exciting'; in -im: agnim-indhá- 'fire-kindler'; in -ām: tvām-āhuti- (TS.) 'offering oblations to thee'.
- c. The accusative form is common when the final member is formed from a present stem, owing to the close connexion of such verbal nouns with the verb; e. g. dhiyam-jinvá- 'exciting meditation', ugram-pasyá- (AV.) 'looking fiercely', mām-paśyá- (AV.) 'looking at me'.
- d. Apart from the conditions stated above (a, b, c) the accusative caseending rarely occurs in the first member of verbal determinatives; e.g. vanam-kárana-, a particular part of the body; dhiyam-dhá- 'devout', śubham $y\bar{\alpha}$ -(van)- 'moving in brilliance'9.
- a. In the great majority of instances the first member, if it has the accusative case-form, ends in -am, mostly from stems in -a, but also from monosyllabic consonant stems (pur-am- etc.) 10, and from one stem in -ī (dhiy-am-). Otherwise there are three or

origin of the nasal is doubtful; cp. WACKER-NAGEL 21, p. 202.

In B. this predicative accusative sometimes comes to have the value of a predicative nominative when compounded with a gerundive or a derivative of bhū-, as sytamkrtya- (TS.) 'to be made cooked', nagnambhāvuka- (TS.) 'becoming naked'.

2 pasvás acc. pl.

3 Here huras- might be a genitive as Vcitgoverns that case as well as the acc.

4 puro-há 'destroying forts' may contain an acc.; also isa-stitt- 'praise of prosperity', which the Pada analyses as isah-stitt.

5 How much the use of these forms is dependent on rhythm is seen in the alter-

represents IE. petn-; while in puram-dhi- nation of rnam-cayá- and rna-cit- 'paying a 'fertile woman' and rysan-dhi- 'bold', the debt', khajam-kará- and khaja-krt- 'causing the din of battle', dhanam-jayá- and dhana-ji-t- 'winning booty', janam-sahá- 'overcoming beings' and vrāta-sāhá- 'conquering crowds'.

6 Beside kavi-vydhá- 'prospering the wise'. 7 Here the acc. of an a-stem is substituted for šakán-.

8 The compound narám dhisa (VS.) is of doubtful meaning and irregular accent.

9 For several other examples occurring in Brāhmaņa passages of the later Samhitās see WACKERNAGEL 21, p. 207 d, e.

10 In hrd-am-sani- 'winning the heart' the neuter hrd- is treated as if it were a masc. or fem.

four in -im (agnim- etc.), one in -um (makṣum-), and two pronominal accusatives in -ām (mām-, tvām-). Polysyllabic consonant stems never have the accusative case-ending in the first member 1.

- 276. The locative case-ending is in the RV. almost limited to employment before agent-nouns formed from the simple root with or without determinative -t: agre-gá- 'going before', agre-gá- (VS.) 'moving forwards'. agre-μέ- (VS.) 'leader', agre-pά- 'drinking first', agre-pά- (VS.) 'drinking first', ange-sthá-2 (AV.) 'situated in a member of the body', rte-já-3 'produced at the sacrifice', krechre-śri-t- 'running into danger', gahvare-sthá- (VS.) 'being at the bottom', divi-kṣi-t- 'dwelling in heaven', divi-yáj- 'worshipping in heaven'. divi-śri-t- (AV.) 'sojourning in heaven', divi-śdd- (AV.) 'sitting in heaven', dure-dis- 'visible afar', dosani-sris- (AV.) 'leaning on the arm', rathe-subh-'flying along in a car', rathe-stha- 'standing in a car', vane-raj- 'shining in a wood'. vane-sáh- 'prevailing in woods', sute-gfbh- 'taking hold of the Soma'. hrdi-sprs- 'touching the heart'4.
- 2. The RV. has only two examples of a locative before an agent noun formed with the suffix -a: divi-kṣayá- 'dwelling in heaven', vahye-śayá- 'resting in a litter'5. There are several others in the later Samhitas: agre-vadhá- (VS.) 'killing what is in front', talpe-śayá- (AV.) 'resting on a couch', divi-cará- (AV.) 'faring in heaven', divi-stambhá- (AV.) 'supported on the sky', dūre-vadhá-(VS.) 'far-striking', harā-śayá-6 (MS. I. 27) 'resting in gold'. In the AV. also occurs an example of the locative before an agent noun formed with -in: parame-sth-in- 'standing in the highest (place)'.
- 3. The locative plural is much rarer than the singular in the first member: apsu-kṣi-t- 'dwelling in the waters', apsu-jā- 'born in the waters', apsu-ji-t- 'vanquishing in the waters', apsu-sád-'dwelling in the waters', apsu-váh- (SV.) 'driving in water', apsú-samsita- (AV.) 'excited in the waters', goşu-yúdh-'fighting in (= for) kine', prtsu-túr- 'conquering in battles', bhareṣu-jā- 'produced in fights', hrtsv-ás- 'piercing to the heart'.
- a. In these locative compounds the second member is most commonly -stha- or -sthā- in the RV., while the first member is most usually agre-, dūre- or vane-. The locative in -e is the predominant one, even displacing -i in pathe-stha- 'standing on the road' beside pathi-sthā- (AV.).
- 277. The instrumental case-ending occurs several times in the first member of verbal determinatives: kṣamā-cará- (VS.) 'being in the ground', girā-v/dh- 'rejoicing in song', dhiyā-jur- 'aging in devotion', yuvā-datta- 'given by you two', yuvā-nīta- 'led by you two', yuşmā-datta- 'given by you', yuşmānīta- 'led by you', śúnesita- 'driven by dogs' (śúnā). When the stem of the first member ends in  $-\alpha$  there is some doubt whether  $-\bar{\alpha}$  here represents the instrumental ending or lengthening of the vowel7; thus saphā-rij- may mean 'breaking with the hoof' or 'hoof-breaker'; and in yuvā-yij- 'yoked by you two' the vowel may be simply lengthened. In divā-kará- (AV.) 'sun' the first member is an old instrumental used adverbially 8.
  - a. The examples of the ablative case-ending are rare: daksināt-sád-

i sakan- substitutes the acc. of an a-stem; above p. 165, note 7.

<sup>&</sup>lt;sup>2</sup> There are several other locatives compounded with -sthā -.

<sup>3</sup> There are several other locatives compounded with -já-.

<sup>4</sup> In nare-stha- (RVI.), an epithet of the car, the first member may be a locative (Sāyana), but it may also be a dative of ný- locative of hári-. (BR., GRASSMANN), 'serving for a man to stand on'.

<sup>5</sup> In suté-kara- 'active in (offering) Soma', the accent shows that the final member has an adjectival, not a verbal sense. In the name mātari-svan- the first member is interpreted in RV. III. 2911 as a locative; cp. RICHTER, IF. 9, 247, note; MACDONELL, Grundriss III. I A, p. 72 (middle).

<sup>6</sup> In VS. v. 8 hari-sayá-; harā- here is the

<sup>7</sup> Cp. Wackernagel 21, 56.

<sup>8</sup> See Wackernagel 21, 213 a, note.

(MS. II. 63) 'sitting in the south'; divo-jά- 'produced from heaven', divo-dúh-(SV.) 'milking from the sky', divo-rúc- 'shining from the sky'.

b. The ending of the genitive would naturally appear only before derivatives from verbs governing the genitive. There seem to be no certain examples: divd-ksas- 'ruling over the sky' (divds) however seems probable'.

### b. 1. Ordinary Adjective as final member.

- 278. Ordinary adjectives which are not of a verbal character may appear as final member of determinatives much in the same way as past participles in -ta and -na (273, 4). But adjectives ending in -u are almost exclusively compounded with the privative a(n)- and prepositions; e. g. an-āśi- 'not swift', án-ṛju- 'dishonest', á-dāśu- 'impious', á-bhīru- 'not terrible'; prāśi- 'very (prá) swift' (āśi-). The only final members otherwise compounded are -vasu- 'rich' in vibhā-vasu- 'radiant' and other compounds, and -raghu- 'swift', in máderaghu- 'quick in exhilaration'.
- a. The first member may be a substantive in the relation of a case to the last; e. g. tanú-śubhra- 'shining in body', yajñá-dhīra- 'versed in sacrifice', vakmarája-satya- 'faithful to the ordainers of hymns', viśvá-śambhū- 'salutary for all'. The relation is sometimes expressed by the case-ending: the locative in gávi-ṣṭhira- (AV.) 'strong in kine (gávi)' as a name, máde-raghu- 'quick in exhilaration', suté-kara- 'active in (offering) Soma', sumná-āpi- 'united in affection (sumné)'; instrumental in dhiyá-vasu- 'rich in devotion', vidmanāpas- 'working (apás-) with wisdom (vidmánā)'. The first member may also appositionally express a comparison as representing a type: śhka-babhru- (VS.) 'reddish like a parrot'3.
- b. The first member may be an adjective qualifying the final member in an adverbial sense; thus aprāmi-satya (voc.) 'eternally true', ūrdhvá-pṛśni-4 (VS.) 'spotted above', try-àruṣa- 'reddish in three (parts of the body)', mahā-nagnī-5 (AV.) 'courtezan' ('very naked'), mahā-mahi-vrata- 'ruling very mightily', mahā-vaṭūrin- 'very broad', viśvá-ścandra- 'all-glittering'6.
- c. Adverbs and particles often appear as first member; e. g. an-āśú'not swift', anyáta-enī- (VS.) 'variegated on one side (anyátas)', evára- 'quite (evá)
  ready (ára-)', duḥ-śéva- 'unfavourable', púnar-nava- 'renewing itself', sató-mahānt'equally (sa-tás) great', sató-brhatī- (VS.) 'the equally great' (a metre), satyámugra- 'truly mighty', sú-priya- (AV.) 'very dear'.
- d. Several prepositions appear as first member, mostly with their original adverbial meaning; e. g. áti-kṛṣṇa-7 (VS.) 'very dark'; á-miśla-tama- 'mixing very readily'<sup>8</sup>; upottamá- (AV.) 'penultimate'; ni-dhruvi- ('fixed down') 'persevering', niṣ-kevalya- (VS.) 'belonging exclusively'; prāśli- 'very swift', pra-

<sup>&</sup>lt;sup>1</sup> But it has also been otherwise explained; cp. WACKERNAGEL 2<sup>1</sup>, p. 213 c, note; who also quotes á-kasya-vid- knowing nothing from the MS.

<sup>&</sup>lt;sup>2</sup> The word  $j\bar{a}t\bar{u}$ -sthira- probably contains an old instrumental = 'naturally solid'; in  $n\bar{a}bh\bar{a}$ -nidistha- 'nearest in kin' as a name, the first member though looking like a locative, probably represents an IIr. stem  $nabh\bar{a}$ -; cp. Richter, IF. 9, 209. The compounds  $fc\bar{i}$ -sama-, an epithet of Indra, and  $gh\bar{a}s\dot{e}$ -ajra- (VS.) are Bahuvrīhis.

<sup>3</sup> A transition to this compound use appears in mano javistham (RV. VI. 95) 'very swift as thought'.

<sup>4</sup> Here the adjectival stem is used for the adv.  $\bar{u}rdhv\acute{a}m$ .

<sup>5</sup> From this is formed the m. mahā-nagná-(AV.) 'paramour'.

<sup>6</sup> The meaning of sādhv-aryá- 'truly faithful'(?), which occurs only once, is doubtful; cp. WACKERNAGEL 21, p. 237 (top).

cp. Wackernagel 21, p. 237 (top).
7 ati in the sense of 'very' does not occur in the RV., but in the later Samhitās it is the commonest of the prepositions compounded with adjectives.

<sup>8 &#</sup>x27;Very slightly mixed', Geldner, VS. 3, 3 A transition to this compound use appears 181. — å-tura- 'suffering' is obscure in origin.

śardha- (voc.) 'bold'; vi-mahī- 'very great', vi-ṣama- (VS.) 'uneven', vi-sadṛśa-'dissimilar', vy-ènī- 'variously tinted' (dawn); sám-vasu- 'dwelling together'. sám-priya- (VS.) 'mutually dear'.

## b. 2. Ordinary Substantive as final member.

279. Determinatives with ordinary non-verbal substantives as their final member r are not common in the earliest period of the language. In the first nine books of the RV., except the frequent compounds in -pati- and -patnī-. there are not many more than three dozen examples2; the tenth book has quite two dozen more, and the AV. seven dozen more.

The first member is frequently a substantive also. Its relation to the final member seems to be limited to the genitive sense in the Samhitas. This genitive sense appears when the final member is a word expressive of relationship, or -pati- 'husband' or 'lord'; e. g. rāja-putrá- 'king's son', mrtyubándhu- 'companion of death', viś-páti- 'lord of the tribe'. It sometimes expresses the material, as dru-padá- 'post of wood', hiranya-rathá- 'car of gold' or 'car full of gold'. In deva-kilbişá- 'offence against the gods' we have an example of an objective genitive. There seems to be no instance in the RV. of a Proper Name appearing as the first member of a determinative in the genitive sense 3 except in indra-sená-(x.1022) 'Indra's missile'4, which compound is itself perhaps a Proper Name<sup>5</sup>. In camasādhvaryu- (AV.) 'the priest of the cups', the first member expresses quite a general genitive sense of relation = 'the priest who is concerned with the cups'.

280. As in determinatives with verbal noun as final member, the caseending may appear in the first member. But it is less common here, and owing to the purely nominal character of the final member, is almost restricted to the genitive. The ending of this case is very common before -pati-'lord' or 'husband': anhas-as-pati- (VS.) 'lord of distress', N. of an intercalary month,  $gn\bar{a}$ -s-páti-6 'husband of a divine woman',  $j\bar{a}$ -s-páti- 'lord of the family', břh-as-páti-<sup>7</sup> and bráhman-as-páti-<sup>4</sup> lord of devotion, mánas-as-páti-<sup>4</sup> lord of mental power', ván-as-páti-8 'lord of the wood', 'tree', vāc-ás-páti- 'lord of speech', vástos-páti- 'lord of the dwelling', śubh-ás-páti- 'lord of splendour', sádas-aspáti-9 'lord of the sacrificial seat'. According to the analogy of these compounds which end in -s-pati-, were also formed from a-stems rta-s-pati- (only voc.) 'lord of pious works' and rátha-s-páti- 'lord of the car'. The word dám-pati- may stand for \*dám-s-pati- 'o 'lord of the house' (dám-, the gen. pl. of which,  $dam-\tilde{a}m$ , occurs).

E Bahuvrīhis with ordinary substantives from this word after the etymology had been forgotten, as conversely the m. sapátna-'rival' was formed from sa-pátnī- 'co-wife'.

as final member were common from the beginning; hence combinations which appear as Bahuvrīhis in the older period, are often only found later as Tatpurusas, the latter being thus occasionally affected by the formal peculiarities of Bahuvrihis.

<sup>&</sup>lt;sup>2</sup> See Wackernagel 2<sup>1</sup>, p. 241 (97 note). 3 If this compound is a Proper Name, it is the only instance with the stem-form in the first member; but the genitive case-ending appears in the first member of a few determinative Proper Names; see below, 280 a.

<sup>4 &#</sup>x27;Indra's missile' (BR.), 'Indra's army' (GRASSMANN).

<sup>5</sup> This is the opinion of GELDNER, VS. 2, 1, and of DELBRÜCK, Vergl. Syntax 3, p. 202.

<sup>7 \*</sup>bṛh- here is synonymous with bráhman-, bráhmanas-páti- being a parallel and explanatory formation. On bý has-páti- and cognate compounds see Otto Strauss, Brhaspati im Veda (Leipzig 1905), p. 14-17.

<sup>8</sup> van- 'wood' appears also in the pl. G. van-ám, L. vám-su.

<sup>9</sup> It is unnecessary to assume the existence of a stem sad- to explain sádas-páti- and sát-pati- since the stem sadas- occurs; nor is rādh- necessary to explain rādhas-pati-(only voc.) as rādhas- is frequent.

<sup>10</sup> PISCHEL, VS. 2, 93 ff., 307 ff., rejects any connexion between dámpati- and dám- 'house'. 6 An anomalous f. gnås-pátnī- was formed | Cp. WACKERNAGEL 21, p. 249 e, note.

- α. These compounds in -páti- are treated by the Pada text in three different ways: 1. gnáspáli-. břhaspáli-, vánaspáli-, višpáli- (and višpálnī-) appear as simple words; 2. gnáhpátnī-, jáḥ-páti-, sácī-páti-, rta-pate (voc.), rādhas-pate (voc.), and those with a single accent (except vispáti-) as compounds separated by the Avagraha sign; 3. all other doubly accented compounds (e. g. bráhmanas-páli-) as two separate words; even ráihas-pális is written ráthah | pátih | as if ráthah were a nom. sing. 1
- a. Otherwise the genitive ending appears only two or three times in the RV. in Proper Names: divo-dāsa- 'Servant of heaven' (?), ślinali-śépa-2 'Dog's tail', and (with gen. pl.) nárā-śámsa- (for \*nárām-śámsa-) 'Praise of men', an epithet of Agni. The VS. has also rāyas-poṣa- 'increase of wealth' in rāyas-poṣa-dá- 'bestowing increase of wealth' and rāyas-poṣa-váni- 'procuring increase of wealth'.
- b. Other case-endings are very rare in such determinatives. The locative appears in svapne-dusvapnyá- (AV.) 'evil dreaming in sleep'4; the instrumental in vācá-stena- 'thief by speech', 'one who makes mischief by his words'; the dative in dasyave-vrka- (voc.) 'Wolf to the Dasyu', N. of a man; and possibly dásyave sáhah (1. 36<sup>18</sup>) may be meant as a name with double accent.

28r. In a few instances the first member is a substantive used appositionally to express sex or composite nature: purusa-mrgá- (VS.) 'male antelope'; úlūka-yātu- 'owl demon' (= demon in form of an owl), śuśulākavātu- 'owlet demon'; purusa-vyāghrá- 'man-tiger', a kind of demon, vrsákapi- 'man-ape'.

- 282. An adjective may appear as first member determining the sense of the following substantive. This type, which is called Karmadhāraya by the Indian grammarians, is uncommon in the Samhitas. Among the oldest are candrá-mās-5 '(bright) moon'6 and pūrná-mās-a- (TS. III. 4.41) 'full moon'. Besides these occur eka-vīrá- 'unique hero', kṛṣṇa-śakuní- (AV.) 'raven'7, nava-jvārá- 'new pain', mahā-grāmá- 'great host', mahā-dhaná- 'great booty', mahā-vīrá- 'great hero' 8, sapta-rṣáyas 'the Seven Seers', N. of a group of ancient sages (beside the separate words saptá ŕsayah and ŕsayah saptú in Books I-IX), sapta-grdhrāh (AVI.) 'the seven vultures'9.
- a. A variety of Karmadhāraya is that in which the first member expresses a part of the last: adhara-kanthá-(VS.) 'lower part of the neck', ardha-devá-10 'demi-god', ardha-māsá- (AV. VS.) 'half-month', madhyám-dina- 'midday'; also with change of gender: agra-jihvá- (VS.) n. 'tip of the tongue (jihvá-)'; with the suffix -a: ardha-rc-á- (AV. VS.) 'hemistich', pūrvāhn-á- 'forenoon' 11.
- 283. Prepositions frequently occur as first member, all except prá in their ordinary adverbial senses. Those which are thus used in the RV.

<sup>2</sup> This name occurs once with tmesis, śúnaś cic chépam (v. 27).

3 Cp. narám ná sámsa- (I. 1739 etc.) and sámso narám (VI. 242); see WACKERNAGEL 21, p. 248 d, note.

4 hradé-caksus 'mirrored in the lake' is regarded by GELDNER (VS. 1, 173) as a Tatpuruşa = 'eye in the lake'. For one or two doubtful examples of locative pl. see WACKER-NAGEL 21, p. 249 (bottom).

5 That this is a very old combination is shown by the fact that mas- 'moon' occurs almost exclusively in compounds (sūryā-māsā and pūrņá-mās, SB.), only two or three times alone (though often in the sense of 'month'), and is therefore obsolescent in the RV.

6 In the later Samhitas candrá- comes to

<sup>1</sup> See Wackernagel 2<sup>1</sup>, p. 241 (97 a α, | mean 'moon' as an abbreviation of candrá-

7 With change of meaning from 'black

8 In K. appears the dative visva-devāya, the expression visve devah having become a Karmadhāraya.

9 Translated by WHITNEY (AV. VIII. 918) as a Bahuvrihi, 'seven-vultured'.

10 ardhá- 'half' is here used in a figurative

II pitā-mahá- (AV. TS. VS.) and tatā-mahá-(AV.) 'grandfather' and prá-pitāmaha- (VS. TS.) and pra-tatāmaha- (AVI.) 'great grandfather' (only voc.) are probably not Karmadhārayas, but formed in imitation of mahāmahá- which appeared to be a gradation of mahant-; cp. WACKERNAGEL 21, p. 255, note.

are ádhi 'over', n! 'down', pári 'around', prá 'forward' 1, 'front part of' 2, 'extreme' (of high degree), 'great' (in names of relationship), práti 'against', vi 'asunder'3, sám 'together' (also sa- in the same sense); and in the later Samhitas, antár between', ápa 'away', á 'at hand', úd 'up', úpa 'beside', úpari 'above'. The following are examples in the alphabetical order of the prepositions: ádhi-pati(AV. VS.) 'over-lord', ádhi-patnī- (AV. VS.) 'sovereign lady', ádhi-bhojana- 'additional gift', adhi-rājá- 'supreme king'; antar-deśá- (AV.) 'intermediate region', antah $p\bar{a}tr\dot{a}$ - (AV.) 'inner (= interior of the) vessel';  $\dot{a}pa$ - $r\bar{u}pa$ - (AV.) 'absence of form', 'deformity';  $\dot{a}$ -pati- (VS. MS. 1. 27) 'the lord here'; \*ut- $s\bar{u}$ rya-'sunrise' in otsūryám (AV.) 'till sunrise' (ā-utsūryám); upa-pati- (VS.) 'paramour' (lit. 'sub-husband'); upari-sayaná- (AV.) 'elevated couch'; ni-dhána- (AV.) 'conclusion', ni-pakṣati- (VS.) 'second rib', ni-pādú- 'low ground', ny-áhna-5 (AV.) 'close of day'; pári-pati- 'lord (of all) around', pari-vatsará- 'full year'; pragāthá- (VS.) 'fore-song', a kind of stanza, pra-diś- 'region' and (AV.) 'intermediate quarter', pra-dhána- 'prize of battle', prādhvaná- ('forward course'. ádhvan-) bed of a river', prártha- (AV.) preparation', implement'; prá-pada-6 'tip of the foot', prá-uga- 'forepart of the shafts (of a chariot)'?; prá-napāt-'great-grandson', pra-tatāmaha- (AVI.) and prd-pitāmaha- (VS. TS.) 'greatgrandfather'; pra-div- (AV.) 'third (or fifth) heaven', prá-patha- 'distant path', prá-maganda- 'arch-usurer', prá-vīra- 'great hero', práyus- (MS. 1.54) 'long life' (āyus); prati-janá- (AV.) 'adversary', prati-dīvan- 'adversary at play'; vi-dis- (VS.) 'intermediate region', vi-madhya- 'middle', vi-manyu- 'longing' 8, vi-vāc- 'opposing shout', 'contest', vy-ódana- (RV'.) 'different food'9; sa-pátnī-'co-wife', sam-grāmá- (AV.) 'assembly', 'encounter', sam-anīká- 'battle-array' 10, sam-bándhu- 'akin', sam-vatsará-11 'full year'.

284. Other indeclinables sometimes occur as first member, but very rarely in the RV. They include a few adverbs and the particles a(n)-, dus-, su-, kim-, ku-: paścā-doṣá- (VS.) 'late evening', purb-agni- (VS.) 'fire in front'; a-mitra- 'enemy', á-hotr- (AV.) 'incompetent Hotr'; duc-chinā- 'calamity'  $^{12}$ ; su-brāhmaṇa- (AV.) 'good Brāhmaṇ', si-bheṣaja- (AV. TS.) 'good remedy', su-vasaná-  $^{13}$  'fair garment'; kim-puruṣá- (VS.) a kind of mythical being, ku-sara- (RV<sup>1</sup>.), a kind of reed.

# 4. Bahuvrīhi Compounds.

285. The term Bahuvrīhi, employed by the Indian grammarians to designate this type, is perhaps the most convenient name for these secondary adjective compounds, as it represents their general character both in form and meaning. For the final member is practically always a substantive, and the relation of the first member to the last is mostly attributive

Without perceptibly changing the meaning of the final member.

<sup>&</sup>lt;sup>2</sup> This and the following meanings do not occur in the combination of *trá* with verbs.

<sup>3</sup> Expressing separation, extension, derivation.

<sup>4</sup> In apa-kāmá- 'aversion' the final member is a verbal noun. There seem to be no certain instances of this kind of compound with  $\acute{api}$ : cp. Wackernagel 2<sup>1</sup>, p. 259  $\beta$ , note.

<sup>5</sup> In ny-arthá- 'destruction' the second member is a verbal noun. On the relation of ny-àrbuda- (AV. VS.) and ny-àrbudi- (AV.) to árbuda- and árbudi-, see WACKERNAGEL 2<sup>1</sup>, p. 260 (top).

<sup>6</sup> Once prá-pad- in AV.

<sup>7</sup> Probably for prá-yuga-.

<sup>8</sup> From manyú- 'zeal'.

<sup>9</sup> This is Śāyaṇa's explanation (vividhe 'nne) of the word in VIII. 529.

<sup>10</sup> From ánīka- 'front'.

<sup>11</sup> sám in this compound expresses completeness.

<sup>12</sup> Cp. śunám 'with success'. On the Sandhi see p. 31, note 4.

<sup>13</sup> Though vasana- has a concrete sense here, the compound may have arisen when the word had a verbal meaning.

(Karmadhāraya), less commonly dependent (Tatpuruṣa), and very rarely coordinative (Dvandva). The best name otherwise is 'possessive' r, as this is their meaning in the vast majority of instances. In a few examples, however, the more general sense of 'connected with' (which may usually be expressed more specifically) is required to explain the relation between the substantive and the Bahuvrīhi which agrees with it; thus áśva-prstha- borne on horse-back', devá-psaras- 'affording enjoyment for the gods', parjánya-retas-'sprung from the seed of Parjanya', viśvá-krsti- 'dwelling with all peoples', viśvā-nara-2 'belonging to or existing among all men', vīrā-pastya- 'belonging to the abode of a hero', śatá-śārada- 'lasting a hundred autumns', śára-vīra-(AV.) 'characterized by heroic men' = 'making men heroic' (amulet).

286. Attributive Bahuvrīhis. - The commonest form of Bahuvrīhi is that in which an attributive noun is the first member. It is most frequently an adjective, as ugrá-bāhu- 'powerful-armed', urvy-ūti-3 'giving wide aid', jīvá-putra- 'having living sons', śukrá-varna- 'bright-coloured' +. The first member is also often a past passive participle in -ta or -na, the action expressed by which is usually performed by the person denoted by the substantive with which the Bahuvrīhi agrees; e. g. práyata-dakṣiṇa- 'he by whom the sacrificial fee has been presented', rātá-havis- 'who offers an oblation' 5. The action is, however, not infrequently supposed to be performed by others, always in the case of hata- 'slain'; e.g. hatá-vrsn-ī- 'whose husband has been slain', hatá-mātṛ- 'whose mother has been slain'. Both senses appear in rātá-havya- 'he by whom' and 'to whom offerings have been made'. An outside agent is sometimes expressed by an additional member at the beginning of the compound, as jīvá-pīta-sarga- 'whose streams have been drunk by the living 6. A present participle occasionally occurs as first member; e. g. ā-yád-vasu- (AV.) and sam-yád-vasu- (AV.) 'to whom wealth comes', bhrājad-ṛṣṭi- 'having glittering spears', rúśad-vatsa- 'having a shining calf', śucád-ratha- 'having a brilliant car'7; also a perfect-participle in dadyśāná-pari- 'whose felly is visible', yuyujāná-sapti- 'whose steeds are yoked'.

a. The first member is further often a substantive used predicatively; e. g. ásva-parņa- 'horse-winged' = 'whose wings are horses' (car); indra-satru-, whose foe is Indra'; tad-id-artha-8 'having just that as an aim', dronahava-, whose pail (āhāvá-) is a trough', śiśná-deva- 'whose god is a phallus', silrodaka- (AV.) 'whose water is spirit' (silrā-). The final member is here sometimes a comparative or superlative (including pára-) used substantively: avaras-pará-9 (VS.) 'in which the lower is higher' = 'topsy-turvy' 10, ásthi-bhūyāms- (AV.) 'having bone as its chief part' = 'chiefly bone', indrajyestha- 'having Indra as chief', 'of whom Indra is chief', yamá-śrestha- (AV.) 'of whom Yama is best', sóma-śreṣṭha- (AV.) 'of which Soma is best'.

I For other names see WACKERNAGEL 21, p. 273 (107 a, note).

<sup>&</sup>lt;sup>2</sup> For several other examples formed with viśvá- see Whitney 1294 b.

<sup>3</sup> Cp. p. 145, note 3.

<sup>4</sup> Cp. WHITNEY 1298.

determinatives or verbally governing compounds such as vājam-bhará- and bharád- compound. vāja. 'bearing booty'. In vīti-hotra- 'having an invitation sacrifice' = 'inviting to sacri- Lüders, Das Würfelspiel im alten Indien fice', a stem in -ti is used almost like a (Abh. d. K. Ges. der Wiss. zu Göttingen past participle in -ta; cp. vītá-havya- as a 9, 2) p. 64.

<sup>6</sup> Cp. WHITNEY 1299 a.

<sup>7</sup> Cp. WHITNEY 1299 b.

<sup>8</sup> Here a pronoun appears instead of a substantive in the first member.

<sup>9</sup> Here the first member retains the -s of the nom. surviving from the use of the two 5 The sense is thus identical with verbal words in syntactical juxtaposition; the first member also is used substantively in this

<sup>10</sup> On eka-pará- (said of dice) see now

A comparison is sometimes implied between the first substantive and the second:  $vars\acute{a}jya$  (AV.) 'whose rain is like butter',  $vrks\acute{a}-ke\acute{s}a$ - 'tree-haired' = 'whose trees are like hair' = 'wooded' (mountain).

The first member further sometimes expresses the material of which the second consists; e. g. rajatá-nābhi- (VS.) 'whose naval is (made of) silver'; hiranya-nemi- 'whose fellies are (made of) gold'; or something closely connected with and characteristic of it, as niyila-ratha- 'whose car is (drawn by) a team'.

287. Dependent Bahuvrihis. — The first member is dependent on the last in the sense of a case-relation, the case-ending being sometimes retained.

a. It has often a genitive sense  $^{r}$ , as  $p\acute{a}ti-k\bar{a}ma$ - (AV.) 'having desire for a husband'; with genitive ending,  $r\bar{a}y\acute{a}s-k\bar{a}ma$ - 'having a desire of wealth'. Here the first member often implies a comparison (when it never has the case-ending): agnl-tejas- (AV.) 'having the brightness of fire', 'fire-bright',  $fksa-gr\bar{v}va$ -(AV.) 'having the neck of a bear' (demons),  $g\acute{o}-va\dot{p}us$ - 'having the form of a cow',  $j\tilde{n}\bar{a}tl-mukha$ - (AV.) 'having the face of (= like) relatives',  $m\acute{a}no-javas$ - 'having the swiftness of thought' = 'swift as thought',  $may\acute{a}ra-roman$ - 'having the plumes of peacocks' (Indra's steeds).

b. In a few instances it has the sense of, and then always the ending of, the instrumental:  $\acute{a}$ -giraukas- 'not to be kept at rest ( $\acute{b}kas$ -) by a song ( $gir\acute{a}$ )',  $kr\acute{a}tv\bar{a}$ -magha- 'constituting a reward (gained) by intelligence',  $bh\bar{a}s\acute{a}$ -

ketu- 'recognisable by light' 2.

There are further examples in which the last member has the locative sense when it is a part of the body and what is expressed by the first member appears in or on it: aśru-mukhi- (AV.) 'having tears on her face', 'tear-faced', kīlálodln-ī- (AV.) 'having sweet drink in her udder', ghṛtá-pṛṣṭha-'butter-backed', pátra-hasta- (AV.) 'having a hand in which is a vessel', maṇi-grīvá- 'having pearls on the neck', mádhu-jihva- 'having a tongue on which is honey', váṛra-bāhu- 'having an arm on which is a bolt'.

288. Coordinate Bahuvrīhis.—No example is found in the RV. and hardly any in the other Samhitās of the first and last members of Bahuvrīhis being coordinated in sense. The VS. has stóma-pṛṣṭha- 'containing Stomas and Pṛṣṭhas'; also áhar-divá- (xxxviii.12) 'daily', which is a kind of Dvandva Bahuvrīhi, being formed from the adverb áhar-divi 'day by day'. The form somendrá- 'belonging to Soma and Indra', occurs only in B. passages of later Samhitās (TS. MS. K.).

28g. Indeclinables as first member. — In a number of Bahuvrīhis the first member is not a noun, but an indeclinable word, either a preposition or an adverb.

a. Prepositions are common as first member of Bahuvrīhis, expressing the local position of the final member in relation to the substantive with which the Bahuvrīhi agrees. Some sixteen prepositions are thus used, the most frequent being vi which occurs as often in the RV. as all the rest put together. They are áti 'beyond', ádhi 'on', antár 'within', ápa 'away', abhi

<sup>&</sup>lt;sup>I</sup> An accusative in sense and form appears on to a Bahuvrīhi with ápas-'work'; cp. 278 a in tvām-kāma-'having a desire for thee'. and 91 B.

<sup>&</sup>lt;sup>2</sup> The compound vidmanāpas- 'working 3 On a few doubtful instances of such with skill' (vidmānā) is probably a determilicative compounds see WACKERNAGEL 2<sup>1</sup>, native formed with the adj. apás- 'working', p. 278 (bottom).

'around' and 'toward', úva 'down', 'away', á 'near', úd 'upward', úpa 'near', ní 'down', nís 'away', pári 'around', prá 'in front', 'very', práti 'against', ví 'apart', sám 'together'. Of these úpa is used thus in the RV. only, while antár, áva, ní appear in the later Samhitas only. The following are examples of compounds thus formed in the alphabetical order of the prepositions: áty-ūrmi- 'overflowing', áti-cchandas- (VS.) 'having redundant metres' (verse); ádhi-nirnij- 'having a garment on', ádhv-aksa- 'having an eye on', 'overseer'; antar-dāvá- (AV.) 'having fire within'; ápodaka- 'waterless', apa-rth- (AV.) 'unseasonable'; abhi-vīra- and abhi-satvan- 'having heroes around', abhi-rūpa-(AV.) 'beautiful', abhi-sená- 'directing arrows'; ava-keśá- (AV.) 'having hair hanging down', áva-toka- (AV. VS.) 'miscarrying'; á-deva- 'having the gods near', 'devoted to the gods', a-manas- (AV. TS.) 'kindly disposed'; ilt-saktha-(VS.) 'having the thighs raised', 'ud-ojas- 'highly powerful'; upa-manyú- 'having zeal at hand', 'zealous', 'ipā-vasu- 'bringing riches near'; ni-manyu- (AV.) 'whose anger has subsided', nl-vaksas- (TS. v. 6. 23") 'having a sunken breast', ni-kūlá- (VS.) 'going down hill', ni-kilbisá- 'deliverance from sin' ('that in which sin has subsided'); nír-jarāyu- (AV.) 'having cast its skin', nír-māya-'powerless', nir-hasta- (AV.) 'handless'; pari-mará- (TS.v.6.211) 'having death around' = 'round whom people have died', pari-manyi- 'very angry'; prā-sṛngá-(VS. TS.) 'having prominent horns', prá-tvakṣas- 'very energetic'; prá-maṇas-(AV.) 'very thoughtful'; práti-rūpa- 'having a corresponding form', 'like', prativartmán- (AV.) 'having an opposite course', práti-vesa- 'neighbour' ('living opposite'); vi = 'apart': vi-karná- (AV.) 'having ears far apart', vi-śākha-(AV.) 'branched', vy-àmsa- 'having the shoulders apart', 'broad-shouldered'; = 'extensive': vi-manas- 'wide-minded', 'sagacious', vi-hāyas- 'of extensive power'; = 'divided': zy-adhvá- (AV.) 'having a divided course' = 'being midway between zenith and earth'; = 'various': vy-àilaba- (AV.) 'making all kinds of noises'; = 'divergent': vi-pathi- 'following wrong paths', vivrata- 'refractory'; = 'distorted': vi-grīva- 'having a twisted neck', vy-ànga-(AV.) 'having distorted limbs'; = 'different': vi-rūpa- 'having a different form', vi-vācas- (AV.) 'speaking differently'; = 'devoid of', 'less': vi-māya-'devoid of magic', vy-ènas- 'guiltless'; sám-hanu- (AV.) 'striking the jaws together'.

b. Adverbs with a local meaning, which are akin to prepositions, also frequently appear as first member of Bahuvrīhis, being generally speaking equivalent in sense to predicative adjectives. Examples of such Bahuvrīhis in the alphabetical order of the adverbs are the following: adhás 'below': adhóvarcas- (AV.) 'powerful below'; ánti 'near': ánti-mitra- (VS.) 'having friends at hand', ánti-sumna- (AV.) 'having benevolence at hand', ánty-ūti- 'having aid at hand'; avás 'down': avó-deva- 'attracting the gods down'; āré 'afar': ārć-agha- 'having evil far-removed', ārć-satru- (ĀV.) 'whose foes are far away'; itás 'hence' : itá-ūti- 'helping from hence'; ihá 'here' : ihéha-mātṛ- 'whose mothers are, the one here, the other there'; ihá-kratu- (AV.) 'whose will is hitherward', ihá-citta- (AV.) 'whose thought is hitherward'; rdhak 'apart': rdhan-mantra- (AVI.) 'having a special sacred text' I; kuhayā 'where?' : kuhayākrti- (only voc.) 'where active?'; daksina-tás 'on the right': daksinatás-kaparda-'having a coil of hair on the right'; nīcā 'downward': nīcā-vayas- 'whose strength is low'; purás 'in front': puro-rathá- 'whose car is in front', purovasu- (TS. III. 2. 51) 'preceded by wealth' (only voc.); prācā 'forward': prācāiihva- 'moving the tongue forward', prācā-manyu- (only voc.) 'striving forward'.

According to Whitney on AV. v. 11; BR., pw. 'lacking speech'; Ludwig 'of distinguished meditations'.

- α. Bahuvrīhis are also formed with a few adverbs of another kind as first member: itthå-dhī- 'having such thought', 'devout', nånā-sūrya- 'illuminated by various suns', púnarmagha- (AV. TS.) 'repeatedly offering oblations', purudhá-pratika- 'having various aspects', sadyá-tit- 'helping at once't. There are also several formed with sahá-, sumád-, smúd-2 'together with', as sahá-gopa- 'having the cowherds with them', sahá-purusa- (AV.) 'accompanied by the men', sum'aj-jāni- 'accompanied by his wife', sum'ad-gu- (AV.) 'accompanied by the cows', smad-abhisir- 'provided with reins', smad-ista- 'having an errand', smadudhan- 'provided with an udder'.
- c. Certain particles frequently appear as the first member of Bahuvrīhis. These are the privative  $\alpha$ - or an-, ku-3 expressing depreciation, dus-'ill', su- 'well'; e. g. a-pád- 'footless', a-sapatná- 'having no rivals', an-udaká-'having no water', 'waterless'; kú-yava- 'causing a bad harvest', dus-pád-'ill-footed'; su-parná- 'having beautiful wings'.
- 200. Bahuvrihis are very frequently used as m. (sometimes f.) substantives in the sense of Proper Names, in many instances without the adjectival sense occurring at all; thus brhad-uktha- m., as the N. of a seer and adj. 'having great praise'; bṛhád-diva- m., N. of a seer (bṛhad-divā- f.. N. of a goddess) and adj. 'dwelling in high heaven'; but priyú-medha- m. ('to whom sacrifice is dear') and vāmá-deva- m. ('to whom the gods are dear') only as the names of seers.
- a. Bahuvrīhis are further not infrequently used as neuter substantives with an abstract and a collective sense, especially when the first member is the privative particle a- or an- and sárva- 'all'; e. g. a-śatri/- 'free from foes', n. (AV.) 'freedom from foes', a-sapatná- 'having no rivals', n. (AV.) 'peace', α-sambādhá- (AV.) n. 'non-confinement', α-skambhaná- (AV.) n. 'lack of support', an-apatyá- 'childless' (AV.), n. 'childlessness', an-amitrá- (AV.) 'foeless', n. (AV. VS.) 'freedom from foes'; sarva-ratha- 'the whole line of chariots', sarva-vedasá- (AV. TS.) 'whole property'; ni-kilbisá- n. 'deliverance from sin', pitr-bandhil- (AV.) 'paternal kinship', mātr-bandhil- (AV.) 'maternal kinship', rikta-kumbhá-4 (AVI.) 'empty-handedness', su-mṛgá- (AV.) 'good hunting'5.
- b. A special category of Bahuvrīhis used as substantives are those in which the first member is a numeral from dvi- 'two' upwards 6. They express a collection or aggregate and are singular neuter? except those formed with -ahá- 'day', which are singular masc.; e. g. tri-yugá- n. 'period of three lives', tri-yojaná- (AV.) n. 'distance of three Yojanas', try-udāyá- n. 'threefold approach to the altar', daśāngulá- n. 'length of ten fingers', daśāntarusyá- n. 'distance of ten stations', dvi-rājá- (AV.) n. 'battle of two kings', pañcayojaná- (AV.) n. 'distance of five Yojanas', sad-ahá-(AV. TS.) m. 'series of six days'. These numeral collectives always end in accented  $-\alpha^8$ .
- 291. Origin of Bahuvrihis.—Considering that Bahuvrihis, which are adjectives, are far commoner than the corresponding determinatives, which are substantives, it cannot be assumed that the former always passed through

of uncertain meaning; see WACKERNAGEL hrduya- (AV.) 'lack of courage'. 21, p. 287 (middle).

<sup>2</sup> Compounds formed with these three words might also be explained as belonging to the 'governing' class.

3 Also the cognate kim- in kim-silá- (VS.) TS.) (land) 'having small stones'.

4 See WHITNEY's note on AV. XIX. 84. 5 Accentuation of the final syllable (as in the cognate singular Dvandvas) prevails in these n. Bahuvrīhis; exceptions are á-bhaya-, n. (AV.) 'a thousand days' journey'.

I The Bahuvrīhi compound ἀνίν-γ-jīkα- is | n. 'safety' (adj. 'free from danger'), and νί-

6 These are called Dvigu by the Hindu grammarians, and are classed by them as a subdivision of Tatpurusas.

7 A few numeral collectives are determinatives used in the pl. and the original gender: sapiarsáyas 'the seven seers', saptagrdhras 'seven vultures' (AV.); tri-kadru-kapl. 'three soma-vessels' (from kadru-f.).

8 With the suffix -ya is formed sahasrāhṇ-yá-

the process of transmutation from the latter. They must in the vast majority of instances have been formed directly and independently in conformity with the type of these secondary adjectives which had come down from the IIr. period . WACKERNAGEL (21, 112) adopts the view that the origin of Bahuvrīhis is not to be explained by transmutation from determinatives, but from the predicative or appositional use of groups of words characterizing a substantive2. This use he exemplifies by the following quotations from the RV.: urih kákso ná gāngyáh (vi. 4531) 'like the broad shoulder dwelling on the Ganges', that is, for \*uril-kaksah 'Broad-shoulder' as a Proper Name; sá iāyase sáho mahát (v.116) 'thou art born a great power' (= \*mahá-sahāh 'one having great power'); tvácam krsnám arandhavat (1. 1308) 'he delivered over the black skin' (that is, 'those having a black skin', 'the black-skins'); dróghāya cid vácasa ánavāya (vi. 629) 'to Ānava, deceitful speech', that is, 'who utters' deceitful speech's; and narām.. śámsah (II. 346) 'praise of men' as representing an earlier stage than nárā-sámsa- 'receiving the praises of men' as a Bahuvrīhi. Appositional Bahuvrīhis, he thinks, similarly arose from explanatory clauses, as indra-jyesthā devāh 'the gods having Indra as their mightiest' from deváh indro jyésthah 'the gods - Indra their mightiest'. The first step here would have been assimilation in case and number to the main substantive, involving change to a compound (with stem-form and single accent), followed by assimilation in gender. The change to the Bahuvrihi had already become the rule in the pre-Vedic period.

### 5. Governing Compounds.

292. In a considerable number of compounds the first member governs the last in sense, being either a preposition (prepositional adverb) or a verbal noun. These compounds being adjectives are allied to Bahuvrīhis.

I. In the prepositional group the first member is a preposition or adverb capable of governing a case. There are about twenty examples in the RV. In some instances they seem to have arisen from the corresponding syntactical combination, as ádhi-ratha- n. 'wagon-load' from ádhi ráthe (x. 6412) 'on the wagon'. In other instances they seem to have originated from the corresponding adverb; thus the adjective in pra-div-ā ketilnā (v.608) 'with long-existing light' has been changed from the adverb pra-divas 'from of old' to agree with a substantive in the instrumental. The ending of the second member has been preserved for the most part only when it was -a; otherwise the suffix -a or -ya is generally added. Like Bahuvrīhis, compounds of this type may become neuter substantives; thus upānas-á- 'being on the wagon', n. (AV.) 'space in a wagon'.

a. All prepositions which govern cases (except áva) as well as prá (though it never governs a case), besides several adverbs capable of being used with a case, are employed as first member in these compounds. The following are examples of prepositional governing compounds: ati-mātrá-(AV.) 'beyond measure', ati-rātrá- 'lasting overnight', áty-amhas- (VS.) 'beyond the reach of distress', áty-avi- 'running over the wool'; ádhi-gart-ya- 'being on the car-seat', adhi-gav-á- (AV.) 'derived from cows'; adhas-pad-á- 'being

<sup>&</sup>lt;sup>1</sup> Cp. Brugmann, Grundriss 2, p. 88; IF. | similar in form to the prepositional Bahu-

tives cp. Brugmann, Grundriss 2, p. 89.

<sup>4</sup> This type of governing compound is which the Bahuvrihi agrees.

vihis; the meaning, however, is quite
On substantives used instead of adjecdifferent, as in the latter the preposition ves cp. BRUGMANN, Grundriss 2, p. 89. does not govern the following member, but 3 Cp. drog ha-vac-futtering deceitful speech'. refers adverbially to the substantive with

under the feet', adho-aksá- 'remaining below the axle'; ánu-path-a- and ánuvartman- (AV. VS.) 'along the road', anu-kāmá- 'according to wish', ánuzirata- 'obedient'; ántas-path-a- 'being within the path'; api-prána- 'being on (= accompanying) the breath', api-s'arrará- 'bordering on night' (s'árvarī-); abhl-dyu- 'directed to heaven', abhl-rāstra- 'overcoming dominion'; ā-jaras-d-1 'reaching to old age', \(\hat{a}\)-pathi- and \(\bar{a}\)-pathi- 'being on the way', \(\hat{a}\)-bhaga- 'taking part in', 'participator'; upa-kakṣá- 'reaching to the shoulder', upānas-á- 'being on a wagon', úpa-tṛn-ya- (AV.) 'lurking in the grass', úpa-mās-ya- (AV.) 'occurring every month'; upári-budhna- 'raised above the ground', upári-martyabeing above men':  $\bar{u}rdhv\acute{a}-nabhas$ - (VS.) being above the clouds',  $\bar{u}rdhv\acute{a}-barhis$ -(VS.) 'being above the litter'; tirú-ahn-ya- ('being beyond a day' = ) 'belonging to the day before yesterday'; pari-panth-in-2 ('lying around the path') 'adversary', pari-hastá- (AV.) ('put round the hand') 'hand-amulet'; parś-mātra-('being beyond measure') 'excessive', parύ-kṣ-a- (AV.) ('lying beyond the eye') 'invisible'; puro-gav-á- ('going before the cows') 'leader'; prati-kāmyà- (AV.) 'being in accordance with desire'; sam-gayá- 'blessing the household'.

- 2. In verbal governing compounds the first member is either an agent noun or an action noun governing the last member as an object. The abnormal position of the verbal form before the object in this class is probably to be explained by the first member having originally been an imperative, which usually has this position. These compounds are an old formation, two types going back to the Indo-European period, and one to the Indo-Iranian. They are adjectives, but the final member never adds a compositional suffix except in śikṣā-nar-á- 'helping men'. Three types are to be distinguished.
- a. The first member consists of a present stem or the root, which probably represents an imperative<sup>3</sup>; of this type there are few examples: trasá-dasyu- m., N. of a man ('terrify the foe'), radā-vasu-4 (only voc.) 'dispensing wealth', śiksā-nará-4 'helping men', sthā-raśman-5 'loosening bridles'6.
- b. Examples of the second type are more numerous. Here the first member ends in -at, but the participle, being formed from present stems in -a, -á or -aya, which appears in these compounds, in a few instances does not occur in independent use. This type, which is almost entirely restricted to the RV., is also Iranian. It seems to have taken the place of the older one (a), which owing to its form was apt to be confused with Bahuvrīhis though differing from them in meaning. The form which they assumed was probably aided by the analogy of Bahuvrīhis with a present participle as their first member, like śucád-ratha- having a brilliant car, which are formed from intransitive verbs, while those in the governing compounds are of course transitive. Examples of this type are the following: rdhád-ray-7 ('increasing wealth') m., N. of a man, and rdhád-vāra-7 'increasing goods', kṣayád-vīra8 'ruling men', codayán-mati-9 'stimulating devotion', jamád-10

meaning 'up to old age'.

2 Formed with the suffix -in which is not properly attached to compounds; cp. WACKER-NAGEL 21, 53 (p. 121 bottom).

<sup>3</sup> See BRUGMANN, IF. 18, 76; DELBRÜCK, Vergleichende Syntax 3, 174; JACOBI, Compositum und Nebensatz (1897), 46—82; WACKERNAGEL 21, p. 315.

<sup>4</sup> Rhythmically lengthened for rada-, siksa-. 5 The Pada has sthah-rasman. The meaning 'go'.

Occurs only in the dative as an adverb is doubtful; it may be a simple Bahuvrīhi, 'having firm bridles' (GRASSMANN).

<sup>6</sup> krpá-nīda- would be another example if it means 'arranging his abode', but the meaning of the first member is doubtful.

<sup>7</sup> rdhát- is an aorist participle of rdh-'increase'.

<sup>8</sup> From ksáyati 'rules'. 9 From codáyati 'urges'.

<sup>10</sup> jamát- a palatalized form from gam-

agni- ('going to Agni'), N. of man, tarád-dvesas-1 'overcoming foes', drāvayátsakha-2 'speeding the comrade', dhārayát-kavi- 'supporting the wise' and dhārayát-ksiti-3 'supporting men', bharád-vāja- ('carrying off the prize') m., N. of a man, and a-bharád-vasu-4 'bringing wealth', mamhay.id-rayi-5 'lavishing wealth', mandád-vīra-6 'gladdening men', \*vidád-aśva-7 'possessing steeds', zidád-vasu-8 'winning wealth', śrāvayát-pati- 'making his lord famous', and śrāvayát-sakhi-9 'making his friend famous', sanád-rayi- 'bestowing possessions' and sanád-vāja-10 'bestowing booty', sādád-yoni-11 'sitting in one's place', sprhayádvarna-12 'striving after lustre'. Two such governing compounds are once combined in such a way that the final member common to both is dropped in the first: patayán mandayát-sakham (I. 47) 'causing his friend to fly (patáya-) and to be glad' (mandáya-) 13.

c. In the third type, which goes back to the Indo-European period 14, the first member is a noun of action variously accented. There are some half-dozen examples in the RV.: dati-vara- 'giving treasures', plusti-gu- ('rearing kine') m., N. of a man,  $r\bar{\iota}ty-\bar{a}p^{-15}$  'causing waters to flow',  $v\bar{\iota}tl-r\bar{\iota}dhas$ - 'enjoying the oblation', cvīt!-hotra- 'enjoying the sacrifice', zrstl-dyīv- 'causing the sky to rain' 16.

# Syntactical Compounds.

293. There are some irregular formations in which words not in coordinate, attributive, dependent or governing relation are compounded owing to constant juxtaposition in the sentence.

r. The relative word yat (abl.) 'in so far as' is compounded with a superlative in RV. III. 53<sup>21</sup>: ūtibhih ... yāc-chresthābhih <sup>17</sup> 'with the best possible aids', lit. 'with aids in so far as (they are) the best'. The adverb yad-radhyam (II. 388) 'as quickly as possible', lit. 'in so far as possible', is analogous.

2. The initial words of a text begin to be compounded in the later Samhitās as a designation of that text; thus ye-yajāmahá- (VS.) in the nom. pl. m. means the text beginning with the words yé yájāmahe<sup>18</sup>.

3. Phrases, almost always consisting of two words, used in connexion with certain actions are compounded; thus aham-uttará-19 (AV.) 'dispute for precedence', from the phrase used by each disputant ahám úttaraḥ 'I (am) higher'; mama-satyésu 'in disputes as to ownership', in which every one says máma satyám '(it is) certainly mine'; mām-paśyá- (AV.) as the name of a plant used by a woman to secure the love of a man with the words  $m\tilde{a}m$ paśya 'look at me'20. Similarly in connexion with persons, as kuvit-sa-'some

14 See WACKERNAGEL 21, p. 320 (bottom).

15 This is the only example recognized

16 Brugmann, IF. 18, 70 f., explains these

by BR. as belonging to this type; GRASS-MANN explains them all as Bahuvrīhis.

compounds as having originated in imperatives, while JACOBI, Compositum und Neben-

satz p. 64 f., thinks the first member re-

corrupt variant. Compounds formed with

yāvat- do not otherwise occur till the Sūtras.

17 In AV. VII. 311 y zvac-chresthábhis is a

18 In the TS. also occurs idám-madhu- m.

presents an original 3. pers. sing.

<sup>1</sup> From tára-ti 'overcomes'.

<sup>&</sup>lt;sup>2</sup> From drāváya- causative of dru- 'run'.

<sup>3</sup> From dhāraya- causative of dhr- 'sup-

<sup>4</sup> From bhára-ti 'bears'.

<sup>5</sup> From mamháya- causative of mamh- be

<sup>6</sup> From mánda-ti 'gladdens'. The SV. has the wrong variant vandád-vīra-.

<sup>7</sup> To be inferred from the patronymic váidadašvi•.

<sup>8</sup> From vidá-ti 'finds'.

<sup>9</sup> From śrāváya- causative of śru- 'hear'.

TO From sána-ti or saná-ti 'wins'.

<sup>11</sup> Lengthened for sadád- from sáda-ti'sits'.

<sup>12</sup> From sprhava-ti 'desires'.

<sup>13</sup> On the doubtful examples arcad-dhūma-, kṛtád-vasū, pratád-vasū, bhuvad vásuh (VIII. 1937), vrsad-añji- (voc.) see WACKERNAGEL 2<sup>r</sup>, p. 319 note.

as a designation of the text idám evá sāraghám mádhu. This kind of compound becomes common in the ancillary literature when particular hymns are referred to.

<sup>19</sup> Used in the locative only.

<sup>20</sup> One or two doubtful examples are discussed by Wackernagel 21, p. 327 (top).

Indo-arische Philologie. I, 4.

one' from the phrase kuvit sá 'is it he?'. This type is more commonly based on phrases used by people about themselves; thus aham-sana (voc.) 'rapacious', that is, one who says ahám saneyam (dhánāni) 'may I obtain (wealth)': aham-pūrvá- 'eager to be first', that is, one who says ahám pūrvah (syām) 'I (should be) first'; kin-tvá- (VS.) 'asking garrulously' that is, one who continually says 'what (are) you (doing)?'.

# VI. DECLENSION.

Benfey, Vollständige Grammatik 707-780. — Whitney, Grammar 261-526.

294. General character. — Declension means the inflexion of nominal stems by means of endings which express the various relations represented by what are called cases. The stems belonging to the sphere of declension are most conveniently divided, owing to difference of meaning, form, and use, into nouns, pronouns, and numerals. Pronouns have to be treated separately because they have certain peculiarities of inflexion, besides to some extent lacking the distinction of gender. Numerals again show other peculiarities of form as well as partial lack of gender. Nouns are divided into substantives as names of things and adjectives as names of attributes. But as no definite line of demarcation can be drawn between substantive and adjective in any of the classes of declension in the Vedic language, these two categories are nowhere treated separately in the present work.

#### I. Nouns.

LANMAN, Noun-inflection in the Veda, JAOS. vol. x (1880), p. 325-600.

- 295. Owing to considerable divergencies of inflexion, nominal stems are best grouped in the two main divisions of consonant and vowel declension. Stems ending in semivowels form a transition from the former to the latter. The stems contained in the two main classes have further to be sub-divided, owing to difference of derivation and, in part, consequent variety of inflexion, into radical and derivative stems.
- a. Like other Aryan tongues, the Vedic language distinguishes in declension the three genders, masculine, feminine, and neuter. It also distinguishes three numbers, the singular, dual, and plural, the dual being in full and regular use 2.
- b. There are eight cases: nominative, vocative, accusative, instrumental, dative, ablative, genitive, locative, all in regular and unrestricted use. The same ending, however, is to a limited extent employed to express the sense of two and sometimes of three cases. Thus the eight cases of the dual have among them only three endings; in the plural the single ending -bhyas does duty for both dative and ablative; while in the singular the same ending -as appears for both ablative and genitive in all but the a-declension.
  - c. The normal endings of cases are the following:

Singular: nom. m. f. -s, n. none; voc. of all genders, none; acc. m. f. -am, n. none; inst.  $-\bar{a}$ , dat. -e, abl. gen. -as, loc. -i.

**Dual:** nom. voc. acc. m. f.  $-\bar{a}$ , -au, n.  $-\bar{i}$ , inst. dat. abl.  $-bhy\bar{a}m$ , gen. loc. -os. Plural: nom. voc. acc. m. f. -as, neut. -i; inst. -bhis, dat. abl. -bhyas, gen.  $-\bar{a}m$ , loc. -su.

<sup>&</sup>lt;sup>1</sup> RV. vш. 61<sup>9</sup>; ср. aháṃ sánā v. 75<sup>2</sup>. is generally strict, the plural is often used 1906, p. 18f., OLIPHANT, ibid. p. 22-31. instead of the dual of natural pairs in

the 'hieratic' parts of the RV.; see BLOOM-2 But while the employment of the dual | FIELD, Johns Hopkins University Circular for

- d. A distinction is often made in the stem between strong (or full) and weak (or reduced) case-forms. It appears in its full development only in derivative consonant stems, affecting the suffixes -añc1; -an, -man, -van; -ant, -mant, -vant; -tar; -yams; -vams. The strong form of the stem appears in the masculine nom. voc.2 acc. singular and dual, and in the nom. voc. plural; and in the neuter nom. voc. acc. plural only. The weak form of the stem appears in the remaining cases. But in the first four and in the last of the above suffixes the weak stem which appears before endings with initial consonant is further weakened before endings with initial vowel.
- e. The way in which the normal endings are attached to the strong and the weak stem with accompanying shift of accent, may be illustrated by the inflexion of the stem ad-ánt- 'eating' in the masc.:

Singular: N. ad-án. V. ád-an. A. ad-ántam. I. ad-at-á. D. ad-at-é. Ab. G. ad-at-ás. L. ad-at-í.

Dual: N. A. ad-ánt-ā, -au. V. ád-ant-ā, -au. I. D. Ab. ad-ád-bhyām. G. L. ad-at-ós.

Plural: N. ad-ánt-as. V. ád-ant-as. A. ad-at-ás. I. ad-ád-bhis. D. Ab. adád-bhyas. G. ad-at-ám. L. ad-át-su.

The neuter differs only in the N. A. V. of all numbers: Sing.: N. A. ad-át; V. ád-at. Du.: N. A. ad-at-t. Pl.: N. A. ad-ánt-i.

# A. Consonant Stems.

296. Among these stems there are none ending in gutturals<sup>3</sup> and only two ending in the cerebral  $\mathcal{A}$ . Those which end in the labials p, bh, m are fairly numerous. The majority end in dentals, the only class of consonants in which every sound contained in the group (t, th, d, dh, n) is represented. Of the semivowels, y is represented by one stem, v by three stems, and rby a large number of stems. There are many stems ending in the sibilants s', s, s, and several in the breathing h as representative of both a new and an old palatal.

#### r. Palatal Stems.

207. I. Radical stems in -c. — All uncompounded stems (being of course monosyllabic) are, with very few isolated exceptions, feminine substantives. The exceptions are: tvác- 'skin', otherwise f., occurs twice in the L. sing. tvaci as a m.; árc-, in its only occurrence, I. sing. arc-á, is a m. adj. in the sense of 'shining'; and kriinc-, 'curlew' (VS.) is a m. substantive.

Compounds, as being adjectives, are often m.; but excepting those formed with  $a\tilde{n}c$ - the only n. is  $\bar{a}$ -p/k (from p/c- 'mix'), used adverbially. Compounds ending in -anc+ regularly distinguish strong and weak forms. This distinction elsewhere appears to a limited extent only in compounds ending in the three roots vyac- 'extend', vac- 'speak', sac- 'accompany': the first by nasalization in uru-vyáñcam5 'far-extending', the other two by lengthening the radical vowel in several compounds.

<sup>-</sup>añc is practically a suffix; cp. 293.

initial syllable in this case.

<sup>3</sup> The gutturals as finals of nominal stems having become the new palatals  $c, j^2$  and  $h^2$  formed with  $-a\tilde{n}c$ , like praty- $a\tilde{n}cam$ .

<sup>&</sup>lt;sup>I</sup> Though in origin a radical element, | (as distinguished from the old palatals  $j^{I}$ and  $h^{\mathrm{I}}$ ).

The voc. sing., however, generally 4 These compounds formed with the root assumes a somewhat shortened form owing ance will, owing to the peculiar changes 4 These compounds formed with the root to the accent invariably shifting to the which the stem undergoes, be treated apart from other words ending in radical c.

<sup>5</sup> Through the influence of compounds

#### Inflexion.

The forms actually occurring, if made from  $v\acute{ac}$ - f. 'speech', would be the following:

Sing.: N. V. vák. A. vácam. I. vācá. D. vācé. Ab. G. vācás. L. vācé.—
Dual: N. A. V. vácā and vácau. I. vāgbhyám (VS.).— Plur.: N. V. vácas.
A. vácas and vācás. I. vāgbhís. D. vāgbhyás (VS). Ab. vāgbhyás (AV.).
G. vācám.

a. The forms actually occurring are:

- Sing. N. f. fk (AV.) 'stanza', tvák 'skin', vák 'speech', síik (AV. VS.) 'flame', sríik 'ladle'; ni-mríik (AV.) 'sunset', puruṣa-vák (VS. XXIV. 33) 'human-voiced', puro-riik (TS.VII. 3. 13¹) 'forward light', sam-vák (VS. IX. 12) 'argument'.

   m. kríiñ (VS. XIX. 43) 'curlew'; anṛta-vák (AV.) 'speaking untruth', upa-pṛk 'adhering to', tri-śiik (VS. XXXVIII. 22) 'having triple light', yatá-sruk 'extending the ladle', sárya-tvak (AV.) 'having a covering (bright) as the sun', hlranya-tvak 'coated with gold'.
- A. f. fcam, tvácam, rúcam (VS. TS.) 'lustre', vácam, śúcam (AV.), sícam 'hem', srúcam (AV.); ā-sícam 'oblation', vi-múcam 'unyoking', sáryatvacam. m. anho-múcam 'delivering from distress', ádrogha-vācam 'free from treacherous speech', kúya-vācam 'speaking ill', tanū-rúcam 'brilliant in person', dhánarcam 'shining (rcam) with booty', puro-rúcam 'shining in front', madhu-pfcam 'dispensing sweetness', mṛdhrá-vācam 'speaking injuriously', su-rúcam 'shining brightly', su-vācam 'very eloquent', sārya-tvacam (Kh. Iv. 63). With strengthened stem: uru-vyáñcam; satya-vācam 'truth-speaking'; apatya-sācam 'accompanied with offspring', abhi-sācam 'accompanying', drona-sācam 'clinging to the trough', dhāma-sācam 'keeping his place', rāti-ṣācam 'bestowing gifts'. n. (adv.) ā-pfk 'in a mixed manner'.

I. f. rcā, tvacā, mrcā 'injury', rucā, vācā, sucā, sicā, srucā; puro-rucā (VS. xx. 36) 'forward light', su-rucā. — m. arcā 'shining'; uru-vyācā, sārya-tvacā.

D. f. rcé (VS. XIII. 39), tucé 'offspring', tvacé (AV.), rucé, vācé (VS. XXII. 23), sucé (VS. XXXIX. 12); uru-vyáce (AV.). — m. anho-múce (TS. 1. 6. 123), údyata-sruce 'extending the ladle', yatá-sruce, viśva-śúce 'all-enlightening'.

Ab. f. tvacás, srucás (AV. VS.); ni-mrúcas.

G. f. rcás, tvacás, vācás; vi-mucas (napāt, V.). — m. puru-rúcas 'shining brightly', su-rúcas.

L. f. tvaci, vāci, sruci; ā-túci 'evening', ud-rci 'end', ni-mrúci, vi-vāci 'crying aloud'. — m. tvaci 'skin' (1x. 693, 10116).

V. m. ákrtta-ruk 'possessing unimpaired lustre' (x. 844).

Du. N. A. V. f. vácau, sicau; ghṛta-pṛcā 'sprinkling fatness', tanū-rūcā.

— With strengthened stem: satya-vácā. — m. krūñcau (VS. xxx. 6); tanū-rūcā, yatá-srucā, su-vácā; sam-pṛcau (VS. ix. 4) 'united'.

I. m. ati-rúgbhyām (VS. xxv. 3) 'fetlocks'.

Pl. N. f. rcas, preas 'food', ricas, vácas, sícas (AV.), sricas¹; ā-preas 'filling' (VIII. 409)², divo-ricas 'shining from heaven', ni-mricas (AV. VS.), vi-micas (AV.), V. bhadra-vācas 'speaking auspiciously'. — m. dudhrá-vācas 'speaking confusedly', yatá-srucas, vasu-ricas 'bright as the Vasus', vi-preas (VS. XIX. II) 'parted', vi-vācas, saṃ-sicas (AV.) 'shedding together', saṃ-preas (VS. XIX. II), su-ricas, su-vácas, sūktá-vācas 'uttering good speech', V. sūrya-tvacas. — With strengthened stem: abhi-sácas, úyajña-sācas 'not performing sacrifice', drogha-vácas 'speaking maliciously', V. nr-ṣācas 'befriending men',

<sup>\*</sup> AV. once (XIX. 422) with wrong accent 2 According to BR., infinitive of \$\delta\$-pre-sruc\$\delta\$s.

ranya-vácas 'speaking agreeably', rayi-sácas 'possessing wealth', rāti-sácas, satya-vácas, smád-rāti-sācas 'attended by liberal men', hari-sácas 'occupied with the tawny (Soma)'.

A. f. rilcas, vácas and (once) vācás, śilcas (AV.), sicas (AV.), srilcas and (once) srucás (AV.); dur-vácas (AV.) 'having a bad voice', mrdhrá-vácas, su-ricas. — m. an-reas 'hymnless', a-ricas 'lustreless', mrdhrá-vācas, vádhrivācas 'talking idly', vi-vācas.

I. f. rgbhis. — D. f. srugbhyás (VS. 11. 1). — Ab. f. rgbhyás (AV.) — G. f. rcám, tvacám (AV.); madhu-pṛcām (AV.).

298. Stems in  $-a\tilde{n}c$ . A considerable number of compounds is formed by adding as final member the root añc- 'bend', which almost assumes the character of a suffix expressing the meaning of '-ward'; e. g.  $pr\dot{a}\tilde{n}c$ - (=  $pr\dot{a}$ - $a\tilde{n}c$ -) 'for-ward'. Strong and weak forms are regularly distinguished, the nasal which appears in the former being always lost in the latter. If  $-\alpha \tilde{n}c$  is preceded by a word ending in i or u, the syllables ya and  $\tau a$  thus produced are further weakened to 7 and \$\overline{u}\$ before vowel endings, and if bearing the accent, shift it to those endings<sup>2</sup>; e. g. Sing. A. m. pratyáñcam, N. n. pratyák, G. pratīcás.

In these compounds -añc is added to words ending in I.  $\ddot{z}$ , with which it coalesces: adharāñe- 'tending downward' (ádhara-)3, ápīñe- 'backward' (ápa). arvāñe- 'hitherward' (arvá-), ávāñe- 'downward' (áva), asmatrāñe- 'turned toward us', ghṛtāne- 'filled with ghee' (ghṛtá-), devāñe- 'directed toward the gods' (devá-), párāñe- 'turned away' (párā), ṛrāñe- 'forward' (pra), visvāñe- 'universal' (visva-)5. satrāñe- 'going together' (satrā)6.
2. -i: akudhryàñe-7 'going nowhere' (aku-dhri-), asmadryàñe- 'turned towards us' (asmad-ri-)7, iidañe-8 'turned upward' (id', kadryáñe-7 (turned towards what' (kád-), tıryáñe- 'going across' (tiri-)9, dadhyáñe- 'sprinkling curds' (dádhi-), devadryàñe-7 'turned towards the gods' (devá-), nyáñe- 'turned down' (ní), pratyáñe- 'turned towards' (prát), madryáñe-7 'turned towards me' (mad-ri-), visvadryáñe- 'going everywhere' (visu-a-dri-), svityáñe- 'whitish' (śvit-i-), sadhryáñe- 'going together' (sa-dhri- 'the same goal'), samyáñe- 'going together' (sam-i-). 3. -u: anváñe- 'going after' (ánu), rjváñe- 'moving straight forward' (rjú-), visvañe- 'going in all directions' (visu-), sváñe- 'going well' (sú). The two feminines purvae-i-'abundant' and uruc-i- 'far-reaching' presuppose similar stems ("puru-unc- and "uru-unc-).

# Inflexion.

299. These stems are inflected in the m. and n. only, as they form a f. in -ī from the weak or contracted stem, e. g. prάνις-, f. prάς-ī-; pratyάνις-, f. pratīc-ž-. The only cases occurring in the pl. are the N. A. and in the du. the N. A. and L.

The forms actually found, if made from pratyáñc-, would be as follows: Sing. N. m. pratyán, n. pratyák. A. m. pratyáncam. I. pratīcā. D. pratīcā. Ab. G. pratīcás. L. pratīci. — Du. N. A. m. pratyáñcā, pratyáñcau (AV.), n. pratīci. L. m. pratīcis. — Pl. N. m. pratyáñcas. A. m. pratīcás and praticas (AV.).

a. The forms actually occurring are the following:

Sing. N. m. adharán (AV.), ápān, arván, ávān (TS. III. 2.53), údan (AV.),

3 With shifted accent.

5 With shift of accent.

8 The weak stem udic- being formed as

9 tiri- appearing instead of tirás- 'across' from which the weak stem tirásc- (= tirás-ac-) is formed.

<sup>&</sup>lt;sup>1</sup> Cp. WHITNEY 407; LINDNER, Nominal-·añc as a suffix.

<sup>&</sup>lt;sup>2</sup> The accent is similarly shifted to the suffix -ī with which the f. of these stems is formed (cp. 86 B II, p. 87)). This rule of accentuation applies to the RV. only, not to the later Samhitās; cp. A. pl. below (p. 182).

<sup>4</sup> In this and some other of these com- if from \*id-i-anc-. pounds only the weak unnasalized form of the stem occurs.

<sup>6</sup> The f. narāc-i- (AV.), N. of a plant, is bildung, Addenda p. 167, prefers to treat doubtless based on a similar stem formed from nára- 'man', with shift of accent.

<sup>7</sup> The suffix -ri- in these compounds perhaps spread from sadhri-añc- (the dh also to akudhryāñc-), while the d of deva-dryàñcand visvadryàñe- may be due to the pronominal forms mád- and asmád-.

tiryán (AV.), dadhyán¹, nyàn, párān (AV.), pratyán², prấn, viṣvan, sadhryàn (AV.), su-prán. — n. Nearly all the following forms are used adverbially: akudhryàk, adharák (AV.), ápāk, árvāk and arvák (AV.), asmadryàk, údak, tiryák (AV.), nyàk, párāk (AV.), pratyák, prák, madryàk, viṣvak, viṣvadryàk, sadhryàk, samyák³.

A. m. adharáñeam (AV.), anváñeam (AV.), ápāñeam (AV.), arváñeam, údañeam, tiryáñeam (VS. x. 8), nyàñeam, párāñeam (AV.), pratyáñeam,

práñcam, madryàñcam, visvañcam, samyáñcam, sváñcam.

I. m.  $arv\acute{a}c\bar{a}$ . — n.  $devadr\acute{t}c\bar{a}$ ,  $satr\acute{a}c\bar{a}$ ; used adverbially with shifted accent:  $tira\acute{s}c\acute{a}$ ,  $n\bar{c}\acute{a}$ ,  $pr\ddot{a}c\acute{a}^{\dagger}$ .

D. m. dadhīce, svitīce. - Ab. m. pratīcas. - G. m. dadhīcas, visvācas 5.

- L. m. práci.

Du. N. A. m. ápāñeau (AV.), arváñea and arváñeau (AV.), vişvañeau (AV.), sadhryàñeā, samyáñeā and samyáñeau (AV. VS.). — n. pratīci, samīci (VS. 1. 31, TS. IV. 1. 32). — L. m. viṣūeos.

Pl. N. m. adharáñcas (AV.), ápāñcas (AV.), arváñcas<sup>6</sup>, asmatráñcas, asmadryàñcas, údañcas, rjváñcas, tiryáñcas (AV.), párāñcas, pratyáñcas,

práñcas, visvañcas, śvityáñcas¹, sadhryàñcas, samyáñcas, sváñcas.

A. m. adharácas, anūcús and anúcas (AV.), úpācas, arvácas, ávācas, údīcas, nícas (AV.), párācas, pratīcás and pratícas (AV.), prácas, viṣūcas, satrácas.

300. Radical stem in -ch. — Only one stem ending in ch, which occurs in a single form as a noun, has been found. This is made from the root prech- 'ask', in the compound N. du. m. bandhu-prech- $\bar{a}$  'asking after kinsmen'. The D. and A. of the same stem also appear as infinitives in the forms prech' 'to ask', sam-preche 'to greet'; vi-precham and sam-precham 'to ask'.

301. Stems in radical -j. — These stems are inflected in all three genders alike. The neuter would of course differ in N. A. V. dual and plural, but these forms do not occur. When uncompounded these stems are f. substantives except yij- and rij-, which appear as m. also; bhrāj-, which occurs as a m. adj. as well as a f. substantive; ij-, which is found once (AV.)<sup>8</sup>, and vij- twice as a m. only. Neuter cases occur from bhāj-, yij-, rāj- and vij- as final members of adj. compounds, but no distinctively neuter forms (N. A. V. du. pl.) are met with even here.

The only stem showing traces of the distinction of strong and weak cases is yuj, which has the nasalized form  $yu\tilde{n}j$  beside the unaltered stem

in the N. A. sing. and du.

In the **N.** sing. the j, when derived from a guttural, appears as k, but when it represents an old palatal, it becomes the cerebral t except in  $rtv-ij^{\circ}$  'priest'; but before the -su of the L. pl. both alike t0 become k.

10 See above 34, I.

<sup>\*</sup> On the doubling of the  $\dot{n}$  before vowels, see Lanman 456.

<sup>2</sup> pratyánk- before s- in TS. I. 8. 211.

<sup>3</sup> The forms tvad-ik, madrik and madryadrik, yuwadrik, 'towards thee, — me, — you', are doubtless shortened forms of dryak, which pronunciation is favoured by the metre in some instances: LANMAN 456 (bottom).

<sup>4</sup> pr.īcā is probably used adverbially in III. 315 also. As an adj. the form, being a compound, would be accented prācā.

<sup>5</sup> N. of a demon, formed with -añc, from visva-, an extension of visu-, as in visva-dryàñc-.

<sup>6</sup> The weak form arvācas seems to be used for arvāncas in VII. 48<sup>1</sup>.

<sup>7</sup> A transition form, N. m. śvistcáyas (x. 46') = śvisyáńcas, is made from an i-stem śvistci- based on the regular f. śvistci-.

<sup>8</sup> In AV. XIX. 50<sup>5</sup>, where the reading ájam is somewhat doubtful; see WHITNEY's note.

<sup>9</sup> Which is derived from yaj. 'sacrifice': rtu-ij- 'sacrificing in due season'.

#### Inflexion.

302. Sing. N. I. with -k: m. ylin¹ (VS. x. 25) 'associate'; a-bhilk 'not having enjoyed', ardha-bhāk (AV.) 'sharer', rta-ylik 'duly harnessed', rtv-lk 'priest', ghṛtá-nirṇik 'having a garment of fat', candrá-nirṇik 'having a brilliant garment', parā-vṛk 'outcast', bhi-ṣāk² 'healing', śatá-bhiṣak (AV.) 'requiring a hundred physicians', saṃ-vṛk 'overpowering', sa-yuk 'companion', hiraṇya-srak (AV.) 'having a golden garland'. — f. urk (VS. IV. 10) 'vigour', nir-ṇik³ 'bright garment', hiraṇya-nirṇik. — n. N. A. sv-ā-vṛk 'easily acquired', su-yuk 'well-joined' (adv.).

2. with -i: m. bhrát 'shining', rát 'king'; eka-rát 'monarch', jana-rát (VS. v. 24) 'lord of men', vane-rát 'shining in a wood', vi-bhrát 'resplendent', vi-rát 'ruling far and wide', viśva-bhrát 'all-illuminating', satra-rát (VS. v. 2) 'king of a Soma sacrifice', sam-rát 'universal ruler', sarva-rát (VS. v. 24) 'ruler of all', sva-rát 'self-ruler'. — With anomalous loss of the final of the root and retention of the N. -s: áva-yīs (I. 1625), a priest who offers the share of the oblation (ava-yáj-). — f. rát 'mistress'; vi-rát. — With anomalous loss of the final of the root (yaj-) and retention of the N. -s: ava-yás 6

'share of the sacrificial oblation' (I. 17312).

A. m. ájam (AV.) 'driver', ylíñjam', ylíjam; rtv-ljam, jyestha-rājam 'sovereign', tri-bhiljam (AV.) 'threefold', deva-yájam (VS. I. 17) 'sacrificing to the gods', parā-vijam, pliskara-srajam (VS. II. 33) 'wearing a lotus wreath', pūrva-bhājam 'first sharer', prtanājam 'rushing (-ájam) to battle', prathama-bhājam 'receiving the first share', prātar-ylijam 'yoking early', bhi-ṣājam (VS. XXVIII. 9), yuvā-ylijam 'yoked by both of you', ratha-ylijam 'yoking to a chariot', vi-rājam, saphā-riljam 'destroying with hoofs', satya-yājam 'worshipping truly', sam-rājam, sa-ylijam 'su-tyājam 'easily letting loose', su-yājam 'worshipping well', su-ylijam 'well-yoked', su-srājam (AV.) 'wearing a beautiful garland', sva-rājam, sva-vījam 'appropriating to oneself'. — f. ārjam, tlijam 'offspring', bhiljam 'enjoyment, bhrājam (VS. IV. 17) 'splendour', srājam 'garland'; upa-spijam<sup>8</sup> (x. 88<sup>18</sup>) 'emulation', nir-nijam, pari-vījam 'avoiding', pra-ylijam (VS. xi. 66) 'impulse', mano-ylijam 'yoked by thought', vi-rājam, sahāsra-nirnijam 'having a thousand adornments', sva-rājam (AV.).

I. m. yujá; bhi-ṣájā (VS. AV.), mano-yújā, vaco-yújā 'yoked by a mere word', sa-yújā (AV.), sahásra-nirṇijā, su-yájā (VS. TS.) 'good sacrifice', su-yújā. — f. ūrjá, tujá, bhrājá 'lustre'; nir-níjā, mano-yújā (AV.), vi-rájā. —

n. śwātra-bhājā 'strengthening'.

D. m. yujé (AV.); mṛtǎ-bhraje<sup>9</sup> (AV.) 'whose virility is dead', rakṣo-ydje 'associated with demons', vi-ráje (VS. AV.), sam-ráje, sva-ráje<sup>10</sup>. — f. ūrjé, tujé<sup>11</sup>, bhujé; nir-nije. — Ab. m. yujás; vi-rájas. — f. nir-nijas.

G. m. sam-rājas, sva-rājas. — f. ūrjás, bhrajás 12 (AV.) 'virility', yujás; pra-yijas 'team', ratna-bhājas 'dispensing gifts', vi-rājas (AV.) — n. sva-rājas.

I For wink; cp. VPr. IV. 104.

3 From nir-nij- 'wash out'.

5 See LANMAN 463.

7 Strong form (301).

8 According to Sayana, used adverbially in the sense of 'emulously'.

9 bhrāj- is probably a reduced form of bhrāj-: cp. the later meaning of téjas-flustre'.

10 There is also the transfer form bhrājāya (VS. VIII. 40) 'for the bright one'.

II There is also the transfer form tujáye v. 467) from tuj-i-.

12 Probably a reduced form of bhrajlustre'. Cp. WHITNEY on AV. VII. 902.

<sup>2</sup> Probably 'one who conjures', cp. in the later language, abhi-sajati 'utters an imprecation'; cp. BRUGMANN, Grundriss 2, p. 8, bottom; UHLENBECK, Etymologisches Wörterbuch, rejects this etymology in favour of a derivation connected with Av. -bis 'healing'.

<sup>4</sup> There is also the transition form (v. 467) from tuj-i-.
blirājā-s (IX. 1703).

<sup>6</sup> See above 66 c β (p. 61).

L. m. áśva-nirniji 'adorned with horses'. — f. sam-sṛji 'collision'.

V. m. ghŕta-nirnik, sam-rāt.

Du. N. A. V. m. yunja, yuja, rtv-ija, tana-tyája 'risking one's life', puru-bhuja (V.) 'enjoying much', puskara-sraja, pratar-yija, brahma-yija 'harnessed by prayer', bhi-sája, mano-yúja (VS. AV.), vaco-yija, sam-rája, sa-yúja, sakam-yúja 'joined together', su-yúja; ana-výjau (AV.) a part of the body near the ribs, apna-rájau 'ruling over wealth' (apna-=apnas), bhi-sajau (V.), sam-rájau, sa-yújau (AV.), su-yújau (AV.). — f. asva-yújau (AV.) 'harnessing horses'.

D. m. bhi-ságbhyām (AV.). — G. m. sam-rájos.

Pl. N. m. yijas; ā-yijas (AV.) 'joining on', rtv-ijas, V. rtv-ijas (AV.), krtá-dhvajas 'furnished with banners', giri-bhrájas² 'glittering on the mountains', ghrtá-nirnijas, tanū-tyájas, divi-yájas 'worshipping in heaven', dur-yijas 'difficult to be yoked', niḥ-sɨjas 'pouring out', pitu-bhájas 'enjoying food', pūrva-bhájas, prtanájas (-ajas), pra-yijas (AV.), brahma-yijas, bhi-sájas, mano-yijas, mitra-yijas 'joined in friendship', ratha-yijas, varṣá-nirnijas 'clothed with rain', vāma-bhájas 'partaking of goods', viśva-sɨjas (AV.) 'all-creating', sam-rājas, V. sam-rājas, su-yijas, sva-yijas 'allies', sva-rājas, hárita-srajas (AV.) 'wearing yellow garlands'. — f. árjas, tijas, bhújas; abhi-yijas 'assailants', go-bhájas 'bestowing cows', nir-nijas, prkṣá-prayajas 'in which oblations begin to be offered', pra-yijas, vi-rājas (VS. XVII. 3), stanā-bhi'jas³ 'enjoying the udder', sv-ā-yijas 'easy to yoke'.

A. m. vijas 'stakes' (at play); údhi-nirnijas 'covered over', aśva-yújas, catur-yújas 'yoked as (a team of) four', śaphā-rújas, sa-yújas, su-yújas. —

f. tiljas, bhiljas, srájas; abhi-yiljas.

I. m. aruna-yilgbhis 'furnished with ruddy (rays)', rta-yilgbhis, vi-yilgbhis (AV.), su-yilgbhis, sva-yilgbhis.

D. f. pra-yigbhyas (VS.xxx.8) 'impulses'. — Ab. m. bhi-ságbhyas (AV.) — G. m. rtv-ljām, bhi-sájām. — f. ūrjām, bhujām; nir-majām<sup>5</sup>. — L. f. srakṣú;

pra-yáksu (AV.) 'offerings'6.

303. Stems in derivative -j. — There are seven m. and f. adjectives or substantives formed with the suffixes -aj and -ij: á-svapnaj- 'sleepless', trṣṇáj- 'thirsty', dhṛṣáj- 'bold', sanáj- 'old'; uś-ij 'desiring', bhur-ij- f. 'arm', vaṇ-ij- m. 'trader'. There is also the n. ásṛj-7 'blood', which is of obscure etymology, but the -j of which is probably a reduced suffix. The forms occurring are the following:

Sing. N. m. usik, vanik. — n. dsrk. — A. m. usijam, trsndjam, vanijam (AV.) — I. usij $\bar{a}$  (VS. xv. 6) 'ghee'. — D. m. trsndje, vanije. — G. m. usijas.

Du. N. f. sanájā. — G. f. bhurijos. — L. f. bhurijos.

Pl. N. m. uśijas, tṛṣṇájas, á-tṛṣṇajas, dhṛṣájas, á-svapnajas. — f. uśijas. — A. m. uśijas. — I. m. uśigbhis. — D. m. uśigbhyas. — G. uśijām.

### 2. Cerebral Stems.

304. There is only one doubtful derivative stem in -t, raghát-, which occurs in the single form raghátas (AV. VIII. 7<sup>24</sup>), possibly a mistake for raghávas<sup>8</sup> 'swift'.

I Strong form (301).

<sup>&</sup>lt;sup>2</sup> Occurring once (x. 681), bhraj- being a reduced form of bhrāj-; cp. D. m. mṛtá-bhraje, G. f. bhrajás (AV.); cp. p. 183, notes 9 and 12.

<sup>3</sup> The Pada text reads stana-bhujas.

<sup>4</sup> See Whitney's note on AV. VII. 4<sup>1</sup>.
5 A word of doubtful derivation and meaning, occurring only once (VIII. 4<sup>20</sup>).

<sup>6</sup> The corresponding form is pra-yátsu in TS. iv. 1. 82 and VS. XXVII. 14.

<sup>7</sup> Cp. Brugmann, Grundriss 2, p. 559,

<sup>&</sup>lt;sup>8</sup> See Lanman 466, and Whitney, note on AV. viii. 7<sup>24</sup>.

There are besides only two radical stems ending in -d,  $id^{-1}$  'praise', and  $id^{-2}$  'refreshment'. Of the former occurs only the sing. I.  $id\hat{\alpha}$ ; of the latter only the sing. I.  $id\hat{\alpha}$  and the G.  $id\hat{\alpha}s^3$ .

# 3. Dental Stems.

- 305. Stems ending in all the dental mutes as well as the nasal are of frequent occurrence except those in -th. There are radical stems ending in each of the dentals, but no derivative stems in -th or -dh. The distinction of strong and weak appears with slight exceptions only in the derivative stems in -ant and -an.
- 306. Stems in radical -t. The only four monosyllabic stems occurring are feminine substantives: dyút- 'splendour', n/t- 'dancing', p/t- 'battle', v/t-' hostile array'. There are also two reduplicated stems, which are primarily adjectives: cikit- 'knowing' (V cit-) and didyút- 'shining'. The rest are compounds, used mostly in the masculine or feminine. Neuter cases occur from only four of them: akṣi-pút- 'falling into the eye', án-apā-vrt- 'not turning away', tri-vṛt- 'three-fold', saṃ-yát-5 'continuous'.

#### Inflexion.

The forms occurring would, if made from tri-v/t-, be as follows:

Sing. N. m. f. tri-v/t (also n.). — A. m. f. tri-v/tam. — I. m. f. tri-v/tā (also n.). — D. m. f. tri-v/tē. — Ab. G. m. f. tri-v/tās. — L. n. tri-v/ti (AV.).

Du. N. A. m. f. tri-v/tā, tri-v/tau. — L. f. tri-v/tos.

Pl. N. A. m. f. tri-výtas. — I. n. tri-výdbhis (AV.). — G. m. f. tri-výtām. — L. f. tri-výtsu. — V. m. f. tri-vrtas.

The forms actually ocurring are the following:

Sing. N. m. anā-výt 'not returning', ábandhu-kṛt' (AV.) 'not cutting off kin', eka-t/t (AV.) 'one-fold', 'simple', cikit 'knowing', tri-v/t (VS. x. 10) 'triple', pra-v/t (VS. xv. 9), manaś-cit 'thinking in the mind', mūla-k/t (AV.) 'cutting roots', vipaś-cit 'inspired', vi-v/t (VS.xv.9), viṣū-v/t 'rolling in various directions', sa-v/t (VS. xv. 9), su-v/t 'turning well'. — f. cit (VS.v.19) 'thought'; apa-cit (AV.) a noxious insect, didylit 'shining', vi-dylit 'flashing'. — n. eka-v/t (AV.), tri-v/t: as adv. aksi-pát 'a little' and ánapā-vrt 'unremittingly'.

A. m. a-citam 'unthinking', eka-výtam (AV.), ghrta-ścitam 'sprinkling ghee', tri-výtam, duś-citam (AV.) 'thinking evil', madhu-ścitam 'distilling sweetness', vipaś-citam, viṣū-výtam, su-výtam, huraś-citam 'plotting deceit'.—
f. dyitam, výtam; ā-výtam 'turning home', ghṛta-ścitam, vi-cýtam 'loosening', vi-dyitam, vipaś-citam, saṃ-vátam, saṃ-výtam (AV.) 'approach', saṃ-cýtam 'tunion'.

I. m. tri-výtā, vipaś-cítā (VS. IV. 32), su-výtā. — f. dyutá, vṛtá; ā-cítā 'attention', ghṛta-ścútā, tri-výtā, pra-cátā 'with concealment' (adv.), vi-dyútā. — n. saṃ-yátā, tri-výtā (AV.).

D. m. a-cite, tri-vite (VS. xv. 9), pra-vite (VS. xv. 9), vipaš-cite, vi-vite (VS. xv. 9), sa-vite (VS. xv. 9), su-dyúte. — f. vi-dyúte.

Ab. m. tri-vrtas (VS. XIII. 54), vi-dyiltas 7. — f. didyiltas.

<sup>&</sup>lt;sup>1</sup> Cp. above 17, 5.

<sup>&</sup>lt;sup>2</sup> Derived from is- 'refreshment' which is of very frequent occurrence; cp. above p. 35, note <sup>1</sup>.

<sup>3</sup> This form is regarded by GRASSMANN in one passage (VII. 471) as an A. pl.: cp. LANMAN 466.

<sup>+ 2/2-</sup> occurs once in the dual as a fem. adjective.

<sup>5</sup> From yat- 'unite'.

<sup>&</sup>lt;sup>6</sup> From krt- 'cut'; but it may be 'not relative-making' (kr-t); see WHITNEY's note on AV. 1V. 19<sup>1</sup>.

<sup>7</sup> The Ab. didyót (TS. I. 8. 141) and vidyót (VS. XX. 2) are probably irregular formations due to parallelism; cp. LANMAN 468.

G. m. tri-vítas, vipas-citas, sa-citas 'wise', su-dyútas 'shining beautifully'. — f. vi-dyútas. — L. n. tri-víti (AV.).

Du. N. A. V. m. vipaś-citā (V.), isu-kṛtā (I. 1843). — f. vṛtau; ā-vṛtā,

madhu-ścútā, vi-cítau (AV.). – L. f. vi-cítos (AV.).

Pl. N. m. ā-v/tas, rṣti-vidyutas 'glittering with spears', eka-v/tas (AV.), ghṛta-ścútas, duś-citas (AV.), vi-dyitas, vipaś-citas, saṃ-yátas, sūṛya-śvitas 'bright as the sun', svá-vidyutas 'self-lightning', hrādunī-v/tas 'bringing hail'.— V. ṛṣṭi-vidyutas, vi-dyutas.— N. f. apa-citas (AV.), ā-v/tas (AV.), upā-v/tas (VS. AV.) 'return', ghṛta-ścútas, ghṛta-ścyitas (VS. XVII. 3), madhu-ścitas, madhu-ścyitas (VS. XVII. 3), vi-dyitas, saṃ-yátas.— V. ápa-citas (AV.).

A. m. a-citas, a-dyitas 'lacking brightness', ghrta-ściitas, vipaś-citas, huraś-citas. — f. nṛtas (AV.), vṛtas; tri-vṛtas (AV.), dakṣinā-vṛtas, didyitas, purū-vṛtas (AV.) 'moving in various ways', madhu-ściitas, vi-dyitas, viṣū-vṛtas (AV).,

sam-yátas, sam-vítas (AV.).

I. n. tri-vidbhis (AV.). — G. m. vipaś-citām. — f. apa-citām (AV.), vi-

dyútām (AV.). — L. f. prtsú².

307. Stems in determinative -t. — Derivative nominal stems are formed from nearly thirty roots ending in the short vowels i, u and r by means of the suffix -t3. The roots adding it are i- 'go', kṛ- 'make', kṣi- 'dwell', gu- 'sound', ci- 'pile', 'note', cyu- 'move', ji- 'conquer', dhṛ- 'hold', dhʊṛ- 'injure', pi- 'swell', pru- 'flow', bhr- 'bear', mi- 'fix', yu- 'join' and 'separate', ri- 'flow', vṛ- 'cover', śri- 'resort', śru- 'hear', su- 'press', sṛ- 'flow', stu- 'praise', spṛ- 'win', sru- 'flow', hu- 'sacrifice', hṛ- 'take', hvṛ- or hru- 'be crooked'. Two other roots, gam- 'go', and han- 'strike', are modified so as to end in short a (representing the sonant nasal) before adding the suffix: -gá-t and há-t.

These stems are mostly m. and f. Neuter cases are very rare, occurring from five or six stems only. The inflexion is exactly the same as that of

the stems in radical -t.

#### Inflexion.

308. Sing. N. m. with -krt: anukāma-krt 'acting according to desire', abhisti-kft 'giving help', āji-kft 'instituting a contest', īśāna-kft 'acting as a lord', rsi-k/t 'making into a seer', khaja-k/t 'causing the din of battle', iyotiş-k/t 'causing light', tanū-k/t 'preserving life', pathi-k/t 'path-making', puru-kit 'doing much', pūrva-kit (VS. xx. 36) 'active from of old', bhadrakft 'bestowing blessings', uloka-kft 'procuring free space', vayas-kft 'creating youthful vigour', varivo-kŕt 'bestowing freedom', vijesa-kŕt 'procuring victory', su-kft 'acting well', steya-kft 'committing theft', syona-kft 'causing comfort', svista-kit (VS. 11. 9) 'offering right sacrifice'; with -jit: apsu-jit 'conquering in the waters', ab-i/t 'winning waters', abhimāti-j/t (VS. XXVII. 3) 'conquering foes', aśva-jit 'winning horses', rta-jit (VS. xvII. 83) 'winner of right', go-jit 'winning kine', dhana-jit 'winning booty', ranya-jit 'winning in battle', ratha-jit 'winning chariots', viśva-jit 'all-conquering', samsṛṣṭa-jit 'conquering combatants', satya-jit (VS. xvII. 83) 'winner of truth', satrā-jit 'wholly victorious', samarya-jit 'winning battles', sahasra-jit 'conquering a thousand', sena-jlt (VS. xv. 19) 'conquering armies', svar-jlt 'winning heaven', hiranya-jit 'winning gold'; with other roots: acyuta-kṣit (VS. v. 13) 'dwelling immovably'; acyuta-cyút 'shaking what is firm'; á-dāra-srt (AV.) 'not falling into a crack';  $\bar{a}$ -ks/t 'dwelling'; rna-c/t 'avenging guilt', rta-c/t 'observing sacred order';

I işu-kifteva here may, however, be a 3 This suffix -t partakes of the character of a root determinative, as roots in -i -u -f are hardly ever used without it as nominal stems.

kilbişa-spft 'removing sin'; kşatra-bhft (VS. XXVII. 7) 'holder of sway'; carşanīdhírt 'preserving men'; dīrgha-śrút 'heard afar', deva-śrút (VS. XXXVII. 18) 'heard by the gods'; dhana-spft 'winning booty'; dhruva-ksft (VS. v. 13) 'dwelling firmly'; pari-hrút 'overthrowing'; pūta-bhít (VS. XVIII. 21) a kind of soma vessel; bhāra-bhít 'bearing a load'; mada-cyút 'reeling with excitement'; madhu-sút 'emitting sweetness'; yaksa-bhit 'supporting pursuers' (?), vajra-bhŕt 'wielding a thunderbolt'; vāja-sŕt 'running for a prize'; sapatna-kṣlt (VS. I. 29) 'destroying rivals'; suparna-cit (VS. XXVII. 45) 'heaped up like the bird Suparna'; soma-sút 'pressing Soma'; sva-sŕt 'going one's own way'; havanaśrlit 'hearing invocations'. — f. upa-bhrt (VS. 11. 6) 'sacrificial ladle'; upa-mit 'prop'; rta-cit; pari-srit (VS.XIX. 15) 'fermented liquor'; prasasta-kft 'bestowing praise'. — N. A. n. viśva-j/t; dīrgha-śrút, nava-gát (AV. TS.) 'first-bearing', purītát (VS. XXXIX. 9) 'pericardium'; as adverbs: upa-stút 'invoked', dyu-gát 'going to heaven', sa-kft ('one-making') 'once'.

A. m. adhi-ksitam 'ruler', adhvara-kftam (VS. 1. 24) 'performing sacrifice', arno-vétam 'enclosing the waters', uktha-bhétam 'offering verses', uda-prhtam 'swimming in water', rna-cylitam 'inciting to (fulfil) obligations', carsant-dhftam, tīvra-sutam 'pressing pungent (juice)', tṛṣu-cyitam 'moving greedily', dīrghaśritam, duṣ-kṛtam 'acting wickedly', dveṣo-yitam 'removing hostility', dhanajitam (VS. XI. 8), dhana-sprtam, nadī vrtam 'stream-obstructing', pari sritam 'flowing around', prātar-jitam 'conquering early', mada-cy!tam, mithū-kitam 'fallen into trouble', vayas-kftam (VS.III. 18), vāja-jitam (VS.II.7) 'winning spoil', śrawo-jitam 'winning renown', sam-jitam 'conqueror', satya-dhwitam 'perverting truth', satrā-jitam (VS. XI. 8), sahas-kṛtam (VS. III. 18) 'bestowing strength', sāma-bh/tam 'bringing chants', su-k/tam, svar-j/tam, svista-k/tam (VS. XXI. 47), havana-śrútam, haviş-kftam 'preparing the oblation'. — f. aram-kftam 'making ready', upa-priltam 'flowing near', deva-śriitam, ni-yiitam 'team', pari-sriitam.

I. m. abhi-jitī (VS.xv. 7) 'victorious', upari-priitī (VS. vii. 3) 'falling from above', carṣanī-dhṛtā, brahma-kṛtā 'offering prayers', soma-s/tā. — f. ni-y/tā,

pari-sritā (VS. XIX. 83), pari-hartā<sup>2</sup> (VIII. 47<sup>6</sup>) 'deceiving'.

D. m. aram-kite, dus-kite, dharma-kite 'establishing order', brahma-kite, su-k/te; ab-jite, asva-jite, urvarā-jite 'winning fertile fields', go-jite, dhana-jite, nr-jlte 'conquering men', viśva-jlte, satrā-jlte, svar-jlte; giri-kṣlte 'dwelling in mountains', parvata-cylite 'shaking mountains', soma-bhfte (VS. v. 1) 'bringing Soma'.

Ab. m. pari-srútas (VS. xix. 75) 'foaming', brahma-kŕtas, sarva-hútas 'offered completely'. — f. abhi-hritas 'injurious'.

G. m. carsanī-dhŕtas, vāja-jítas (VS. IX. 13), vīrya-kŕtas (VS. X. 25) 'doing mighty deeds', sam-jitas, su-krtas, havis-krtas. — f. isa-stitas, deva-stitas 'praising the gods', pari-sriitas (AV.).

L. m. mada-cyliti, go-jiti, vasu-jiti (AV.) 'winning goods', sam-dhanā-jiti4

(AV.) 'winning booty together'.

V. m. acyuta-cyut, uru-kṛt 'making wide', ṛta-cit, khaja-kṛt, puru-kṛt, rana-krt 'causing joy', vandana-śrut 'listening to praise', vāja-jit (VS. 11. 7); sahasra-jit, hávis-kṛt (VS 1.15). — f. upa-bhrt (AV.), ráṣṭra-bhṛt (AV.) 'bearing sway'.

The second part of the word may be derived from tan- 'stretch' like -ga-t- from Pada text reads isah-stútas, and GRASSMANN

gam- 'go'.
<sup>2</sup> With anomalous accent; but the form may be L. of pari-hvrti-, the normal accent of which would be pári-hvrti-; see LANMAN 502 (bottom).

<sup>3</sup> isa- = is- 'refreshment', BR.; but the regards isa = isa! (before st-) as G. of is-. 4 Instead of \*dhana-sam-jiti.

Du. N. A. V. m. go-jitā, divi-kṣitā 'dwelling in the sky', pari-kṣitā 'dwelling around', mada-cyútā, su-śrútā 'hearing well', havana-śrútā, V. páthi-krtā (AV.); á-dus-krtau, krsna-prútau 'moving in darkness', sa-kítau (AV.) 'acting at once'. sa-kṣitau 'dwelling together', su-kṛtau (AV.), bhadra-kṛtau (AV.), su-śriitau (AV.). — f. ugra-jitau (AV.) 'fierce-conquering' (name of an Apsaras). — G. f. su-krtos, pari-ksitos.

Pl. N. V. m. citas (VS. I. 18) 'heaping up', hritas 'stumbling-blocks': with -kŕt: aram-kŕtas, īśāna-kŕtas, karma-kŕtas (VS. III. 47) 'skilful in work'. dudhra-k/tas 'boisterous', dus-k/tas, dhānyā-k/tas' 'preparing grain', brahmakŕtas, yajña-nis-kítas 'preparing the sacrifice', vayas-kítas, su-kítas, havis-kítas: with -cyút: dhanva-cyútas 'shaking the ground', dhruva-cyútas 'shaking the immoyable', parvata-cyútas, mada-cyútas; with -ksít: apsu-ksítas 'dwelling in the waters', upa-ksitas 'dwelling near', vraja-ksitas (VS. x. 4) 'resting in their station', sa-ks/tus; with other roots: adhva-gátas (AV.) 'travellers', arth/tas2 (VS. x. 3) 'swift', uda-prútas, ūrdhva-citas (VS. 1. 18) 'piling up', krechre-śritas 'undergoing danger', grāma-jitas 'conquering troops', carṣaṇī-dhrtas, janabhítas (VS. x. 4) 'supporting people', divi-śritas (AV.) 'going to heaven', devaśriltas (VS. VI. 30), dveso-yiltas, ni-gútas 'enemies', pari-citas (VS. XII.46) 'piling up around', pitu-bhitas 'bringing food', pūrva-citas (VS. XXVII. 4) 'piling up first', mano-dh'rtas 'intelligent', V. vāja-jitas (VS. IX. 9), vi-citas (VS. IV. 24) 'sifting', viśva-bh/tas (VS. x. 4) 'all-nourishing', satya-śr/tas 'hearing the truth', satrā-jitas, su-kitas (VS. XXXIII. 16), su-śrūtas, soma-sūtas, sva-sitas, havanaśrútas. – f. mítas 'posts', stútas 'praises'; uda-prútas, ni-yútas, pari-srútas, pitu-bhítas, sam-hátas 'layers', sa-srútas 'streaming'. - N. A. n. dīrgha-śrút 'farrenowned' appears to be used as a n.pl. in agreement with vratá (VIII. 2517)3.

A. m. hritas and hrutas (AV.); a-pitas 'not swelling', go-jitas, jyotiskŕtas, dus-kítas, ni-gútas, mada-cyútas, su-kŕtas. — f. rítas 'flowing'; úpa-stutas 'invocations', dīrgha-śrutas, ni-yūtas, bali-hŕtas 'paying tribute', varuna-dhrutas 'deceiving Varuna', vi-s/tas 'flowing asunder', sa-srútas.

I. m. soma-súdbhis. — f. antariksa-prúdbhis 'floating over the atmosphere', ni-yudbhis.

D. m. işu-kfdbhyas (VS. XVI. 46) 'arrow-makers', dhanuş-kfdbhyas (VS. xvi. 46) 'bow-makers', pathi-kŕdbhyas, bandhu-kṣldbhyas 'dwelling among kinsmen'. — Ab. n. tanū-kŕdbhyas.

G. m. agni-hotra-hútām (AV.) 'offering the oblation to Agni', iṣu-bhṛˈtām (AV.) 'archers', mantra-kṛtām 'composers of hymns', su-kṛtām. — f. abhi-hrútām, upa-citām (VS. XII. 97) a kind of disease, upa-mitām (AV.), ni-vitām, parimítām (AV.) 'rafters', prati-mítām (AV.) 'props', ratha-jítām (AV.).

L. m. su-kŕtsu.

# Derivative Stems in -vat, -tat, -it, -ut and secondary -t.

309. The following stems are formed with the suffix (1) -vat 5: arvā-vátf. 'proximity', ā-vát- (AV.) f. 'proximity', ud-vát- f. 'height', ni-vát- f. 'depth',  $par\bar{a}$ - $v\acute{a}t$ - f. 'distance', pra- $v\acute{a}t$ - f. 'height', sam- $v\acute{a}t$ - f. 'region'; (2)  $-t\bar{a}t^6$ : upará-tāt- f. 'vicinity', devá-tāt- f. 'divine service', vrká-tāt- f. 'wolfishness', satyá-tāt- f. 'reality', sarvá-tāt- f. 'totality'; (3) -it: tad-it- f. 'contiguous', div-it-7

<sup>1</sup> dhānya-kṛlas in the raua (22) 2 That is, 'going (i-t) to the goal' 233. 6 Cp. above 215 a. (ártha-).

<sup>3</sup> See Lanman 503 (bottom), and 474 on the N. A. pl. n.

<sup>4</sup> With irregular accent.

<sup>5</sup> See above, secondary nominal derivation,

<sup>7</sup> In this word the suffix -it probably consists of the root i- 'go' with the primary (determinative) -t (307).

'going to the sky', yos-it- f. 'young woman', roh-it- f. 'red mare', sar-it- f. 'stream', har-it- f. 'fallow'; (4) -ut: mar-it- m. 'storm-god'; (5) with secondary -t: the two neuters yākṛ-t-¹ (AV.) 'liver', sākṛ-t-² 'excrement', and perhaps the etymologically obscure m. nāpāt³ 'descendant', all three of which are supplemented in the weak cases by the stems yakān-, sakān- and nāpṭṛ- respectively. The inflexion of this group of -t stems is the same as that of the radical -t stems.

### Inflexion.

310. Sing. N. m. tadit, tánū-nápāt 'son of himself', nápāt, prá-ņapāt 'great-grandson'. — f. parāvát, pravát, rohit, sarit (VS. XXXIV. 11). — n. yákṛt (VS. AV.), śákṛt.

A. m. tánū-nápātam, nápātam. — f. arvāvátam, parāvátam, pravátam,

yositam, rohitam (AV.), samvátam (AV.).

I. m. divitā. — f. udvátā, devátātā‡, nivátā, pravátā, satyátātā‡, sarvátātā‡, haritā.

D. f. devátāte. There is also the transfer form avirate (from a-vira-tā-'lack of sons').

Ab. f. arvāvátas, udvátas<sup>5</sup>, nivátas<sup>5</sup>, parāvátas, pravátas, samvátas. — G. f. pravátas.

L. f. arvāváti, uparátāti, devátāti, parāváti, vrkátāti.

V. m. tanū-napāt, napāt6.

Du. N. A. V. m. nápātā. — f. harítā. — G. f. harítos.

Pl. N. m. nápātas, maritas, haritas. — f. āvátas (AV.), udvátas, tadītas, parāvátas (AV.), pravátas, yositas (AV.), sarītas, harītas.

A. m. maritas. — f. udvátas, nivátas, parāvátas, pravátas, yositas (AV.),

rohitas, samvátas, saritas, haritas.

I. m. marúdbhis. — f. pravádbhis. — D. m. marúdbhyas.

Ab. m. marildbhyas. — G. m. mariltām. — f. pravátām.

L. m. marútsu. — f. udvátsu, nivátsu, pravátsu.

V. m. indrā-marutas 'O Indra and the Maruts', napātas, marutas.

# Participial Stems in -at and -ant.

311. Participles in -at are almost limited to the present active form of stems made with reduplication, viz. those of the third class (457) and of intensives (545). The old reduplicated participle (from gā-'go') jágat-'going', 'living', is used chiefly as a n. substantive meaning 'the animate world'. The analogy of these participles is followed by a few others formed from unreduplicated stems: dás-at-'worshipping', śás-at-'instructing'; also dákṣat- and dhákṣat-, the aor. participle of dah-'burn'. A few others, again, originally participles, having come to be used as substantives, have shifted the accent to the suffix: vah-át-8 'stream', veh-át-9 (AV. VS.) f. 'barren cow', vāgh-át-10 m. 'sacrificer', srav-át-11 f. 'stream'; like the regular participle sáśc-at- (from sac- 'accompany'), which as a substantive becomes saśc-át- m. 'pursuer'. In

I Cp. Lat. jecur.

<sup>&</sup>lt;sup>2</sup> Cp. Brugmann, Grundriss 2, p. 559.

<sup>3</sup> The suffix may here have been a primary -t added to the root pā-: cp. LEU-MANN'S etymology (1888), Festgruss an Böhtlingk 77 f.: BRUGMANN 2, p. 366.

lingk 77 f.; BRUGMANN 2, p. 366.
4 These forms might be locatives of devátāti-, sa'yátāti-, sarvátāti-.

<sup>5</sup> These forms might be A. pl.

<sup>6</sup> Perhaps marut in evayá-marut.

<sup>7</sup> Lanman 505, would place dásat- injuring' here, but there is no evidence, as only a weak case, dásatas G. sing., occurs.

<sup>8</sup> But váh-ant- 'carrying'.

<sup>9</sup> The derivation of this word is obscure.
10 In one or two passages vāghát- still retains its participial sense.

<sup>11</sup> But sráv-ant- 'flowing'.

this class masculines are frequent, but only about half a dozen neuter forms occur, and the feminines are limited to three substantives and the adjective a-saścát 'unequalled' 2. The inflexion is like that of the radical -t stems, the accent never shifting to the endings.

### Inflexion.

312. Sing. N. m. 1. reduplicating class3: cíkyat, júhat, júhvat, dádat. dádhat, bápsat (V bhas-), bíbhyat, bíbhrat. — 2. intensives: kánikradat and kánikrat, kárikrat (kr. 'do') and (a-)cárikrat (AV.), ghánighnat and jánghanat (V han-), cániscadat (V scand-), cárkṛṣat, cákasat (V kās-), cékitat (V cit-), iárbhurat, jágrat, távītvat, dárdrat, dédišat, dídyat, dávidyutat, dádhuvat, dávidhvat, nánadat, nánnamat, pánīphanat, bháribhrat, mármrjat, mármrsat, mémyat, rárajat, rérihat, róruvat, várīvrjat, vávadat, vévidat, vévişat, sósucat, sánisyadat ( $\sqrt{syand}$ ), sésidhat. — 3. non-reduplicating verbs:  $v\bar{a}gh\acute{a}t$ , sásat; aor. dáksat and dháksat. — N. A. n. 1. jágat, dávidyutat, pípisat, yóyuvat (AV.). — N. f. vehát (AV. VS.).

A. m. I. á-saścatam (I. II29), dádatam, bibhratam. — 2. kárikratam (AV.). gánigmatam, dídyatam, nánadatam, pánipnatam, róruvatam (AV.). — f. a-saścátam

(II. 323); vehátam (AV.).

I. m. dádatā, śóśucatā. — f. a-saścátā. — n. jágatā (AV.).

D. m. 1. jújosate, júhvate, dádhate, bíbhrate, sáscate. — 2. ghánighnate. — 3. vāgháte. — n. I. jágate (AV.).

Ab. m. 2. kánikradatas.

G. m. 1. jígatas, dádatas, dádhatas, bápsatas. — 2. jánghnatas, táritratas, dúdhatas, vévisatas. — 3. vāghátas, śásatas, dháksatas (aor.). — n. 1. jágatas. — 2. ā-várvrtatas (AV.), vávadatas. — L. n. jágati.

Du. N. A. V. m. a-saścátā, bápsatā, bíbhratā; táritratā; śásatā; dádhatau,

bibhratau. — f. a-saścátā. — G. m. pipratos.

Pl. N. m. 1. júhvatas, títratas, dádatas, dádhatas, pípratas, bápsatas, bibhratas, sisratas. — 2. kárikratas, jágratas, jóhuvatas, dávidhvatas, dídhyatas, dbdhatas, nonuvatas, marmrjatas, susucatas. — 3. dūsatas, vaghatas. — f.a-sascatas, vahátas, sravátas.

A. m.i. jákṣatas (Vghas-).— 2. jágratas (AV.), dódhatas (AV.), śáśvasatas, śóśucatas (AV.). — f. saścátas; sravátas.

I. m. 2. nánadadbhis, pópruthadbhis, vávadadbhis, śáśvasadbhis. — 3. vāghádbhís. — G. m. jágatām, bíbhyatām (AV.); vāghátām. — f. sravátām. V. m. jagatas, vāghatas.

313. Participles in -ant are formed from all present stems (except those of the reduplicating class and of intensives and the few others that follow their analogy), from all future stems, and from aorist stems. Their analogy is followed by rhant- 'weak', prsant- 'spotted', brhant- 'great', rusant-'brilliant', which have lost their participial function; also by dánt-5 m. 'tooth'. The adjective mahant- 'great', having lost its original participial meaning deviates from the participial declension in lengthening the vowel of the suffix in the strong forms. In the inflexion of this group the distinction between

formed by the suffix -ī.

<sup>&</sup>lt;sup>2</sup> But å-saścant-ī from sáścat-.

<sup>3</sup> See below, Verb, 461.

<sup>4</sup> There occurs once an anomalous N. pl. with -ant from a reduplicated stem: vavydhántas. See below, Perfect, 492, note on vavrdhváms-.

The f. of the regular participles is | 5 This word is probably an old pres. participle of ad- 'eat', with prehistoric loss of the initial a like s-ant- 'being' from as-'be' (25, 1). The RV. has one transfer form, N. dánta-s (starting from the A. dánt-am); the AV. has others, dántās and dántais.

strong and weak forms is regularly made, -ant appearing in the former only and being reduced to -at in the latter, which shift the accent, if resting on the suffix, to the ending. These participles are declined in the m. and n. only, as they form a special f. stem in -7t. The m. and n. forms are the same, except of course in the N. A.; the former are very frequent, the latter rare.

# Inflexion.

314. The forms occurring, if made from bhávat- 'being', would be as follows:

Sing. N.m. bhávan². — n. bhávat. — A. m. bhávantam. — I. m. n. bhávatā. — D. bhávate. — Ab. m. n. bhávatas. — G. m. n. bhávatas. — L. bhávati.

Du. N. A. V. m. bhávantā and bhávantau. — n. bhávatī. — D. bhávadbhyām. — G. m. n. bhávatos.

Pl. N. m. bhávantas. — n. bhávanti. — A. m. bhávatas. — I. bhávadbhis. — D. m. bhávadbhyas, — Ab. m. bhávadbhyas. — G. m. n. bhávatām. — L. m. n. bhávatsu.

Forms actually occurring are the following. It is unnecessary to enumerate all the m. N. and A. forms, as in the RV. alone 228 forms of the N. sing., 121 of the A. sing., and 166 of the N. pl.3 occur.

Sing. N. m. Examples are: árcan, sídan; ghnán, yán, sán; páśyan; icchán; krnván, sunván; bhañján; jānán; janáyan; yúyutsan; karisyán. Also dán, 'tooth' 4; mahán 5. — n. anát, ásat6, iṣṇát, éjat, éṣat7, kulāyáyat, cárat, citáyat, trpát, dhrsát, pátat, patáyat, minát, yát, raghuyát, várdhat, sámsat, ślksat, śváyat, sát, sunvát; adj. brhát, mahát, rúsat; aor. sáksat (Vsah-); fut. bhavisyát (AV.). As adv. with shift of accent: dravát 'swiftly' (dru- 'run'), drahyát 'firmly' (irregular formation from drh- 'be firm').

A. m. Examples are: cárantam; yántam, uśántam, sántam; yúdhyantam; vidhántam; krnvántam; prñcántam; grnántam; dítsantam; dántam; brhántam, mahántam.

I. m. á-ghnatā, ávatā, á-sunvatā, cáratā, jānatā, tujatā, púṣyatā, bhindatā, vanusyatā; datā, syāvā-datā (AV.) 'dark-toothed', brhatā, mahatā, rūsatā. n. á-drpyatā, á-sredhatā, á-hedatā, ásatā8, usatá, gavyatá, tvāyatá, dhṛṣatá (adv.), śucatá, śravasyatá, samaryatá, sumnāyatá; brhatá, mahatá, rúśatā.

D. m. 1. from stems accented on the suffix: avasyaté, aśvāyaté, işayaté, işudhyaté, işüyaté, usaté, rjüyaté, rtüyaté, krnvaté, gavyaté, grnaté, juraté, jānaté, tvāyaté, devayaté, dvişaté, dhiyāyaté, dhūnvaté, prnaté, prcchaté, brahmanyaté, mahayaté, mānavasyaté, yajñāyaté, yaté, vanvaté, vidhaté, śrnvaté, śravasyaté, sakhīyaté, saté, siñcaté, sunvaté, stuvaté; rhaté, brhaté, mahaté; fut. avisyaté. – n. śucaté, sanāyaté.

from stems accented on the radical or the penultimate syllable: á-ghnate, a-codáte9, á-minate, árcate, árhate, íyakṣate, cárate, cítate, tárate,

2 On the Sandhi of such nominatives see Lanman 506.

3 Lists of the participle stems will be found below under each of the conjugational classes, under the secondary conjugations, and under the future.

4 Occurring also in several compounds a-dán 'toothless', etc.; ubhayá-dam (AV. v. 192) must be emended to -dann.

5 mahám in II. 24<sup>11</sup>, IV. 23<sup>1</sup>, IX. 1097 is

On the difference in the form of this f. regarded by BENFEY as N. sing. m. (Göttinger Nachrichten 1878, p. 190).

6 For á-sat (VII. 10412); the Pada reads

7 The Pada reads ā-iṣat (x. 8914).

8 Once (IV. 514) with lengthened initial for  $\acute{a}$ -sat- $\bar{a}$  'not being', also once  $\acute{a}$ satas (VII. 1048); the Pp. has ásatā and ásatak. See GRASS-MANN, Wörterbuch, under á-sat.

9 Wrong accentuation (in v. 442) for

á-codate; see LANMAN 508 (top).

stem see 201, 377, 455, 461, etc.

trsyate, dásate, pácate, pípīsate, púsyate, yújate, yúdhyate, rájate, rísate, vádate, śámsate, śárdhate, siṣāsate, háryate; a-dáte\* 'toothless'.

Ab. 1. m. kruvatás, prnatás, vanusyatás; brhatás. — n. brhatás, mahatás. — 2. m. á-bhuñjatas, á-vadatas, jighāmsatas, rīsatas. — n. á-satas.

- G. m. 1. arātīyatás, undatás, ušatás, rghāyatás, rtīyatás, krnvatás, ksiyatás, gruatás, tujatás, turatás, turanyatás, tvāyatás, durhanāyatás, dvisatás, dhrsatás, pitūyatás, prnatás, brahmanyatás, minatás, misatás, yatás, rudhatás, vapusyatás, vidhatás, sucatás, satás, saparyatás, sunvatás, stuvatás, huvatás; brhatás, mahatás; fut. karisyatás.
- 2. á-ghnatas, á-jūryatas, á-bhuñjatas, árcatas, á-sunvatas, ínaksatas. cáratas, cétatas, jáyatas, járatas, jighāmsatas, jíjyāsatas, jívatas, túrvatas, trsyatas, didāsatas, drávatas, dhámatas, dhrájatas, piyatas, bhúsatas, yúdhyatas, ririksatas, rébhatas, váyatas, várdhatas, vénatas, sárdhatas, sócatas, sísāsatas, stdatas, hársatas; rúsatas.
- n. 1. kṛpayatás, prāṇatás², miṣatás, yātás, satás; bṛhatás, mahatás. 2. āsatas3, caratas, bhúvatas, vénatas, siṣāsatas; rúsatas.
- L. m. 1. yatí, sunvatí; mahatí. 2. īráyati, ubhayā-dati (AV.). n. I. mahati. - 2. á-sati.
- Du. N. A. V. a) forms in  $-\bar{a}$ . 1. accented on the suffix:  $a \sin ant \bar{a}$ , irajyánta, usánta, gmánta4, gavyánta, dasasyánta, disánta, duhánta, pánta, punántā, prīicántā, bhujántā, minántā, misántā, yántā, yántā, vanvántā, vasnavántā, vājayántā, vy-ántā, vrdhántā, śrņvántā, sántā, saparyántā, sumnayántā; brhántā, brhantā (V.), mahántā. — 2. accented on the penultimate or antepenultimate: á-mardhantā, á-yatantā, árhantā, işáyantā, kṣáyantā, cárantā, codáyantā, janáyantā, járantā, drávantā, dhámantā, pāráyantā, pipantā, mádantā, rádantā, vádantā, vápantā, váhantā, vājáyantā, vénantā, sádantā, sápantā, sáhantā, sādhantā, háyantā.
- b) forms in -au. 1. aśnántau, tirántau, vántau, vrdhántau, sántau; mahāntau. — 2. iṣāyantau, krīdantau, kṣāyantau, mādantau (AV.), yājantau, rajantau.

N. A. n. yatī; brhatī. — D. m. mrdayádbhyām; mahádbhyām. — G. m. járatos. — n. sam-yatús (AV.) 'going together'.

- Pl. N. m. From the very numerous forms occurring the following may be quoted: mádantas; ghnántas, yántas, sántas; pásyantas; icchántas; bhindántas; kṛṇvántas; gṛṇántas; devayántas, vājayántas; dípsantas<sup>5</sup>; aor. krántas<sup>6</sup>, bhidántas<sup>7</sup>; pṛṣatas (VS. XXIV. II), mahāntas<sup>8</sup>.— V. uśantas; mahāntas.— N. A. n. sánti9; brhánti (AV. VIII. 93), mahánti.
- A. m. 1. usatás, rghāyatás, grnatás, tarusyatás, tvāyatás, prnatás, prtanyatás, bhandanāyatás, manāyatás, yatás, rudatás, vanusyatás, vājayatás, vidhatás, śrnvatás, śravasyatás, śrudhīyatás, sakhīyatás, satás, sasatás, stuvatás; brhatás, mahatás; datás.
- 2. á-prnatas, á-prayucchatas, árcatas, kṣáyatas, dhāvatas, dhrájatas, pátatas, ráyatas, rísatas, ríruksatas (Vruh-), vádatas, vrádhatas, sárdhatas, sisrpsatas; śyāvá-datas (AV.).

<sup>2</sup> That is, pra-anatás.

3 For ásatas according to the Pada text.

5 Desiderative of dabh- 'injure'; cp. LAN-MAN 508 (gen. masc.).

7 On the anomalous N. pl. perf. participle, vavrdhántas, see above p. 190, note 4.

9 The Pada text reads sánti; see RPr.

IX. 25.

I On the accent see 90 B c. The dative of ad-ant- 'eating', would be ad-at-é.

<sup>4</sup> Aor. participle of gam- 'go'. In one passage (I. 12211) the Pada reads gmánta; metrical shortening for -dantas; cp. LANMAN the sense seems to require the pl. smantas. See LANMAN 509.

<sup>6</sup> gmántas should perhaps be read for gmánta in 1. 12211.

<sup>8</sup> ubhayā-datas in x. 9010 is perhaps a 509 (bottom). The AV. has the transfer form dántās; cp. p. 190, note 5.

I. m. á-nimisadbhis, á-prayucchadbhis, á-sredhadbhis, usádbhis, citáyadbhis, tujáyadbhis, devayádbhis, dháradbhis, patáyadbhis, rébhadbhis, vádadbhis, vājay ádbhis, vrájadbhis, śucádbhis, śucáyadbhis, śubháyadbhis, śócadbhis; brhádbhis, mahádbhis, rúsadbhis; dadbhis. - n. sucáyadbhis, stanáyadbhis; brhádbhis, mahádbhis, rúsadbhis.

D. m. usádbhyas, ksúdhyadbhyas, grnádbhyas, tuāyádbhyas, pásyadbhyas prāyádbhyas, vádadbhyas, váhadbhyas, sunvádbhyas; brhádbhyas, mahádbhyas;

dadbhy is (AV.). — Ab. m. parā-yádbhyas.

G. m. 1. adhvarīyatām, usatām, rjūyatām, grņatām, ghnatām, juratām, devayatám, dvisatám, yatám, vanusyatám, vajayatám, śatrūyatám. śrwatam, śravasyatam, sakhīyatam, satam, sasatam, sunvatam, stuvatam, sthātām², bṛhatām, mahatām; datām (AV.). — 2. á-sunvatām, cáratām, jáyatām, nítyatām, pátatām, vívāsatām, sárdhatām. — n. rathirāyátām3.

L. m. grnátsu, devayátsu, patáyatsu, mahátsu. — n. júryatsu.

# Stems in -mant and -vant.

315. As these two suffixes have the same sense, that of 'possessing', and are inflected exactly alike, the stems formed with them are best treated together in declension. These stems are used in the m. and n. only4, as they form a separate f. by adding -ī to the weak stem. They are inflected like the participles in -ant except that they lengthen the vowel of the suffix in the N. sing. m. and never shift the accent from the suffix to the ending in the weak cases. Strong and weak forms are as strictly distinguished as in the -ant stems 5. The regular vocative of these stems ends in -mas and -vas in the RV., but the AV. has neither 6 in any independent passage, and the VS. has only bhagavas and patnīvas. The RV. has also three vocatives in -van, and the AV. adds five others; but no voc. in -man occurs.

Three stems in -vant and one in -mant have case-forms supplementing the inflexion of stems in -an and forming transitions from the latter declension to the former. Thus from maghávant- 'bountiful' alone are formed the pl. I.: maghávadbhis, D. maghávadbhyas, L. maghávatsu; also the N. sing. maghávān beside the usual maghávā from maghávan; from sáhāvant- the N. sáhāvān beside sahāvā; from yúvant- 'young', the A.n. yúvat beside the N.m. yúvā; from varimánt- the I. m. sing. varimátā beside forms from varimán- width'?

#### Inflexion.

316. Sing. N.m. 1. from stems in -vant: akṣaṇvān 8, agnivān, áṅgirasvān ánnavān, á-pavīravān, ámavān, árvān, āśirvān, idāvān, isávān, fghāvān, etävān, kaksīvān, ksapāvān and ksapāvān, ghṛnīvān, janivān, tapasvān, tarsyávan, távasvan, távisīvan, távan, tuvīrávan, tvávan, damsánavan, dáksina-

<sup>2</sup> From the aor. stem sthat- 'standing'. 3 With irregular accent on the suffix in-

stead of the ending, from rathirā-yát-.

dántais.

<sup>4</sup> In two or three instances the m. form seems to be used for the f., as havismata (I. 1282) and ráthavate (I. 12211); see LAN-MAN 515 (bottom).

<sup>5</sup> There seem, however, to be two or MAN 517. three instances of a weak form used instead of a strong: kṣumáti (IV. 218), A. pl. n.,

I The AV. (XI. 337) has the transfer form | krátumatā (X. 591), N. du. m., indrāvatas (IV. 271), N. pl.; see LANMAN 516.

<sup>6</sup> In AV. XIX. 348 the Mss. read bhagavas which is emended to samábhavas in the printed text.

<sup>7</sup> On the other hand, arvant- 'steed', has two forms representing a transition to the -an declension: N. árvā, A. árvānam.

<sup>8</sup> On the Sandhi of these forms, see LAN-

<sup>9</sup> Probably for \*tuvī-rava-vān.

vānī, dátravān, dánavān, dásvān, durhánāvān, devávān, devávān, dyumnávān, námasvān, niyitvān, nilavān, páyasvān, pavitravān, pávīravān, pastyžvān, piramdhivān, pūsanvān, prajāvān, práyasvān, pravátvān, prahávān, bhágavān, praphávān, prahávān, bhágavān, maghávān, matávān, matsarávān, mánasvān, maritvān, máhasvān, māyávān, máhināvān, mehánāvān, yáśasvān, yātumávān, rábhasvān, rásavān, reván, vájavān, vājinīvān, vivakvān, vivásvān, vrsanvān, vrsanvān, sácīvān, sarádvān, sásvān, sípravān, siprinīvān, símīvān, sákhivān, sabhávān, sárasvān, sáhasvān, sahávān and sáhāvān, sutávān, sūnrtávān, staván², svadhávān, svádhitīvān, svarvān, hárivān, hitávān, hemyávān.

2. From stems in -mant: abdimán, ávimān, aśánimān, işumān, udanimán, rbhumán, kakúdmān, krátumān, garútmān, gómān, túviṣmān, tváṣṭrmān, tviṣṭrmān, dyumán, dhrájimān, nadanumán, parasumán, pasumán, pitumán, barhiṣmān, mádhumān, vásumān, virúkmān, vṛṣṭimán, śárumān, śociṣmān, susumán, havismān, hirīmān.

N. A. n. i. apāṣṭhávat, ámavat, arcivát, áśvavat, áśvāvat, ātmanvát, āvŕtvat, írāvat, fghāvat, etávat, kṣáitavat, gopávat, grábhaṇavat, ghṛtávat, candrávat, távat, tokávat, tvávat, dákṣiṇāvat, dyumnávat, dhānāvat, dhvas-manvát, námasvat, nílavat, nrvát, padvát, páyasvat, pastyàvat, pṛṣadvat, prajávat, barháṇāvat, yávat, yhvat³, ráthavat, rásavat, revát, vayhnavat, vayhnāvat, vájavat, vipŕkvat, vivásvat, visávat, vīrávat, śatávat, śaphávat, śáśvat⁴, sahásravat, sáhasvat, sínavat, svàrvat, híranyavat.

2. abhistimát, rbhumát, ketumát, krátumat, ksumát, gómat, jyótismat, tvisīmat, dasmát, dánumat, dyumát, nidhimát, pasumát, pitumát, pustimát,

mádhumat, manyumát, yávamat, rayimát, vásumat, svastimát.

A. m. 1. apidhánavantam, apūpávantam, árvantam, áśvāvantam, asthanvántam, ātmanvántam, indrasvantam, úrjasvantam, úrņāvantam, etávantam, énasvantam, ójasvantam, ómanvantam, omyávantam, kakṣtvantam, ghṛtávantam, dásvantam, devávantam, dhānávantam, dhīvantam, nrvántam, padvántam, párasvantam, prajāvantam, bhásvantam, marhtvantam, máhisvantam, rátnavantam, revántam, vapávantam, vayávantam, vájavantam, váravantam, vírasvantam, vīrávantam, vírasvantam, vīrávantam, vírasvantam, hástavantam, hástavantam, háranyavantam.

2. ṛbhumántam, kánvamantam, ketumántam, kṣumántam, gómantam, jyótiṣmantam, táviṣīmantam, dyumántam, nidhimántam, pitumántam, bándhumantam, bhānumántam, mádhumantam, vásumantam, vásīmantam, vṛṣṭimántam,

śrustimántam, havismantam, hótymantam.

I. i. m. árvatā, áśvāvatā, udanvátā, fkvatā, kakṣtvatā, niyútvatā, nivátā, marútvatā, yáśasvatā, revátā, viśvádevyāvatā, viṣūvátā, śubhrāvatā, sáhasvatā.—
n. etávatā, candrávatā, prajāvatā, barhánāvatā, vivásvatā, sūnṛtávatā, háritvatā, śáśvatā.

2. m. gómatā, jyótiṣmatā, divitmatā, dyumátā, bhṛṣṭimátā, varimátā<sup>6</sup>, vásumatā, virúkmatā, haviṣmatā. — n. divitmatā, virúkmatā, haviṣmatā; as adv. śáśvatā?.

D.1.m. árvate, áśvāvate, kakṣīvate, dákṣināvate 'adroit' and 'bestowing gifts', datváte, dásvate, niyutvate<sup>8</sup>, pūṣaṇváte, marútvate, mávate, yuvávate, ráthavate<sup>9</sup>,

<sup>2</sup> To be read stāvān 'thundering', from Vstan-; see Grassmann, s. v.

7 See LANMAN 518 (bottom).

8 Erronously unaccented (1. 1351).

<sup>&</sup>lt;sup>1</sup> Representing two words: I. 'dexterous' (ddkṣiṇa- 'right hand'); 2. 'possessing sacrifical gifts' (ddkṣiṇā-).

<sup>3</sup> Transfer form from the -an stem yúvan. 4 Also the Āmredita compound sásvacchasvat.

<sup>5</sup> With the N. -s anomalously retained.

<sup>6</sup> Transfer form from the -an stem varimán-.

<sup>9</sup> The f. ráthavatyai should perhaps be read for ráthavate in I. 122<sup>11</sup>, as the latter form agrees with a f. substantive, and the former is favoured by the metre; cp. Lanman 519.

vivásvate and vívasvate, sácīvate, sásvate, sáhasvate, sūnrtávate, svàrvate, hárivate. - n. padváte, reváte, sásvate.

2. m. gómate, cáksusmate, tvísīmate, divítmate, dyumáte, barhísmate, havismate.

Ab. I. m. tvāvatas, vivāsvatas, vṛṣṇyāvatas.

- G. I. m. árvatas, ásvāvatas, kaksīvatas, jāvatas, tvāvatas, dadhanvátas 1, dásvatas, devávatas, dhívatas², niyútvatas, nrvátas, prajávatas, marútvatas, mávatas, mehánāvatas, yásasvatas, revátas, váyasvatas, vájavatas, vivásvatas and vivasvatas, vīrdvatas, sacīvatas, sasvatas, sarasvatas, sahasvatas, sutāvatas, súrāvatas, svadhávatas, híṣīvatas. — n. etávatas, yávatas, viṣūvátas, śáśvatas.
  - 2. m. ksumátas, gómatas, dyumátas, havismatas. n. gómatas.
- L. I. m. árvati, dáksināvati 'bestowing gifts', nrváti, pastyāvati, yásasvati, vánanvati, vivásvati and vívasvati, saryanávati. — n. ásvāvati, símīvati, svàrvati. — 2. m. gómati.
- V. m. i. The normal form in -vas<sup>3</sup> occurs in sixteen examples: rstaas, gnāvas<sup>4</sup>, tavisīvas, niyutvas, patnīvas (VS.), bhagavas (VS. TS.), marutvas, rayivas, vajrivas, vīravas, saktīvas, sacīvas, sarasvas, sahasvas, svadhāvas, harivas. — Of the later V. ending in -van, the RV. has three examples: arvan, satāvan5, savasāvan. In the AV. the following five additional forms occur: marutvan<sup>6</sup>, vājinīvan, vṛṣṇyāvan, svadhāvan, harivan<sup>6</sup>. The MS. has patnīvan<sup>7</sup>. — 2. There are six examples of the form in -mas: tuvismas, dyumas, bhānumas, mantumas, sucismas, havismas. — No vocative form in -man occurs.
- Du. N. A. V. m. 1. with -ā: ángirasvantā, ánasvantā, árvantā, índravantā, káśāvantā, kéśavantā, dhármavantā, námasvantā, niyútvantā, pavítravantā, marhtvantā, mitrāvaruņavantā, vājavantā, visņuvantā, vyacasvantā, sásvantā8, sáptīvantā; with -au: aṣṭhīvántau, yāvantau (AV.), rómaņvantau, sáhasvantau (AV.), V. svádhavantau (AV.). - 2. arcimánta, rbhumánta, krátumantā9, vadhúmantā.
- Ab. I. m. asthīvádbhyām. G. I. m. vājinīvatos, simīvatos, sarasvatīvatos. Plur. N. V. m. 1. aksanvántas, ánasvantas, ámavantas, árvantas, áśvāvantās, āśīrvantas, idāvantas, indravantas, indrāvantas (TS. IV. 7. 141) 10, irjasvantas, énasvantas, kaksívantas, kárnavantas, ghrtávantas, casálavantas, dáksināvantas 'bestowing gifts', dāmanvantas, divasvantas (VS. XVI. 63), dráviņasvantas, dhīvantas, námasvantas, nivútvantas, nrvántas, pátnīvantas, padvántas, páyasvantas (VS.XXI.42), pavítravantas, pájasvantas, puṣṭāvantas, pūṣaṇvántas, prajávantas, práyasvantas, pravátvantas, bhágavantas, marútvantas, máhasvantas (VS.XXI.42), vajñávantas, vacanávantas, váyasvantas (VS.III. 18), vármanvantas, vīrāvantas, vrcīvantas, sāktīvantas, sāsvantas, simīvantas, sāptīvantas, sutāvantas, srkávantas (TS. IV. 5. II<sup>2</sup>), svadhāvantas (V.), svàrvantas, himávantas, hrsīvantas.
- 2. añjimántas, áyuşmantas (TS.), işumantas, rstimántas, kşumántas, jyótişmantas, tvásirmantas (VS. XXVII. 20), tvísīmantas, dyumántas, mádhumantas,

1 'containing\_curds'; cp. LANMAN 513. 2 Also the Amredita compound dhivato- IX. 10.

3 Elsewhere ten vocatives in -vas and -mas occur: five from perfect participle stems in -vāms: khidvas, cikitvas, titirvas, dīdivas, mīdhvas; four from stems ending in -van: rtāvas, evayāvas, prātaritvas, mātarisvas; and pumas from piimāms. There are also two in -yas from comparative stems in -yams: ojīyas and jyāyas.

4 In II. 15 gnávas should probably be read gnāvas as a vocative.

5 The Pada text reads sata-van; cp. RPr.

6 These two forms occurring in passages taken from the RV. are substituted for marutvas and harivas of the RV.

7 That is, patnīvāsn.

8 The mysterious form satapanta (x. 1065) should perhaps be corrected to satavanta = sata-vantā?

9 The weak form krátumatā seems to be used for krátumantā in X. 591.

10 The weak form indravatas seems to be used for indravantas in IV. 274.

mīdhismantas, vávamantas, rayimántas, vadhúmantas, vásīmantas, sisumantas, sthivimántas, harsumántas, havismantas.

N. A. n. 1. ghrtávānti. — 2. paśumánti. The Padapāṭha reads -anti i in these forms, and the lengthening of the vowel seems to be metrical<sup>2</sup>. — The weak form ksumáti (used with yūthá) seems to be used for ksumánti in IV. 218.

A. m. 1. árvatas, indrāvatas, rtviyāvatas, kršanāvatas, jánivatas, tápasvatas, trsyávatas, tvávatas, nrvátas, pátnīvatas, párasvatas (VS. xxiv. 28) wild asses', pastyàvatas, posyávatas, prajávatas, bhangurávatas, yásasvatas, yātumávatas, rábhasvatas, rayivátas, revátas, vánanvatas, vrctvatas, saryanávatas, s'ásvatas, s'imīvatas, sutāvatas, sūnrtāvatas, hiranyavatas, hesasvatas. 2. rtumátas (VS. XIX. 61), gimatas, jyótismatas, dyumátas3, prástimatas, mádhumatas, vadhúmatas, virúkmatas, sūnumátas, svastimátas.

I. I. m. árvadbhis, dúkṣināvadbhis, pátnīvadbhis, maghávadbhis 4, rábhasvadbhis, revádbhis, vájavadbhis, sásvadbhis, símīvadbhis, sutásomavadbhis. n. ghrtávadbhis. — 2. m. rstimádbhis, krīdumádbhis, gómadbhis, barhísmadbhis, bhānumádbhis, vidyinmadbhis, havismadbhis. — n. mádhumadbhis.

D. 1. m. dúvasvadbhyas (VS. IX. 35), bhágavadbhyas (AV.), maghávadbhyas 4, májavadbhyas (AV.), sómavadbhyas (AV.). — 2. m. asimádbhyas (VS.XVI.21), ísumadbhyas (VS. xvi. 22), mātṛmádbhyas (AV.), yātumádbhyas. — n. vibhumádbhyas.

G. m. i. árvatām, dákṣiṇāvatām, datvátām (AV.), bhangurávatām, yātumávatām, śáśvatām, śímīvatām, sutávatām, himávatām (AV.). — 2. gómatām (AV.). L. m. i. ámavatsu, árvatsu, maghávatsu4, yusmávatsu. — 2. dyumátsu.

### Stems in radical -th.

317. There are only three stems in -th: káprth-5 n. 'penis', path-6 m. path', with its compound su-páth- 'fair path', and abhi-śnáth- adj. 'piercing'. Among them these three furnish examples of all the cases in the singular, but there are no dual forms, and in the plural only the A. and G. occur.

Sing. N. káprt; A. káprt<sup>7</sup>; I. pathá<sup>8</sup>, supáthā; D. pathé (VS.); Ab. pathás, abhi-śnáthas; G. pathás<sup>9</sup>; L. pathí. — Pl. A. pathás<sup>10</sup>; G. pathám<sup>11</sup>.

### Stems in radical -d.

318. About a hundred stems ending in d are made in the form of compounds (only seven being simple stems) from the twenty roots ad-'eat', kṣad-'divide', chad- 'cover' and 'please', pad- 'go', mad- 'be exhilarated', sad- 'sit', syad- 'move on'; chid- 'cut off', nid- 'revile', bhid- 'cleave', vid- 'know', vid-'find'; ud- 'wet', nud- 'push', mud- 'rejoice', rud- 'weep', sud- 'enjoy', sūd-

<sup>2</sup> Cp. LANMAN 521.

3 In VI. 1714 the Padapāṭha reads dyumáta indra as dyumátah; GRASSMANN explains it as a D. dyumáte agreeing with rayé. On pathi-. the other hand dyumánta[h] in AV. XVIII. 157 should probably be emended to dyumátah; cp. WHITNEY's note, and LANMAN pathám a-.

4 Forms transferred from the -van de- lengthened, pāthás.

clension.

5 The derivation of this word is uncertain: the -th is radical if the word is derived in TS. IV. 2. 55. from prath- 'extend' (see GRASSMANN, s. v.);

\* As also in the only N. pl. n. of the | but it is suffixal if the word is connected with Lat. caper (cp. UHLENBECK, Etymologisches Wörterbuch, s. v.). With this possible exception there are no derivative stems in -th.

6 This stem supplements pánthā- and

7 kaprthá-m occurs once as a transfer form. 8 Once (1. 1299) nasalized before a vowel

9 Once (II. 24) with the radical vowel

10 Accented as a weak form.

II The transfer form pathinam also occurs

present part. in ant, santi (314). The SV. also has the short  $\check{a}$ .

'put in order'; trd- 'pierce', mrd- 'crush' . Of these roots only seven occur as monosyllabic substantives: nid- 'contempt', bhid- 'destroyer', vid- 'knowledge', 'id- 'wave', m'id- 'joy', mrd- 'clay', being f., and pád- 'foot', m. There is also the monosyllabic n. hid- 'heart'?.

Strong and weak forms are not distinguished except in pád-; and the inflexion is the same in all genders except, of course, the N. A. n. du, and pl.

a. The following pecularities or irregularities of this declension are to be noted. r. The weak reduplicated present stem  $d\vec{u}d$ - of  $d\vec{a}$ - 'give', is once treated as a root in the form  $\vec{a}$ -yur- $d\vec{u}d$ -am (AV.) 'giving long life'. — 2. The vowel of  $m\vec{u}d$ - is lengthened in  $sadha-m\vec{u}d$ - 'drinking companion', and  $soma-m\vec{u}d$ - 'intoxicated with Soma', of both of which, however, only strong cases occur. The vowel of  $p\vec{u}d$ - is lengthened not only in the strong cases, but occasionally in others also: dvipat, N. sing. n., beside acipat, D. dvipåde3, L. pl. dvipåtsu, while the N. pl. m. is once dvipådas (AV.).—3. The euphonic combination is irregular in the I. pl. of påd- which is padbhis<sup>4</sup> beside the Ab. du. padbhyåm.—4. The stem hrd- is found in weak cases only<sup>5</sup>. Its place is taken in the N. A. sing. pl. by hrd-aya-, which is also used in other cases (hrdayāt, hrdaye, hrdayesu), though in the RV. almost entirely in late passages. - 5. There are a few transitions to the a-declension in the inflexion of these stems. Starting from the strong A. påd-am are formed the N. sing. påda-s and the N. pl. pådās, both in late passages of the RV. o. Similarly, starting from the A. sadha-mād-am are formed the locatives sadha-māde and sadha-mādesu. Beside nud-ás, the ordinary Ab. of nid-, the form nidāyās occurs once.

#### Inflexion.

319. The inflexion of these stems is identical with that of the radical -t stems. The forms actually occurring, if made from pád- 'foot', and -vidm. f. n. 'finding', would be as follows:

Sing. N. pất, -vít. — A. pádam, -vídam. — n. -vít. — I. padá, -vídā. — D. padé, -víde. — Ab. padás, -vídas. — G. padás, -vídas. — L. padí, -vídi. — V. (sárva)-vit.

Du. N. A. V. pādā, m. f. -vidā. — I. padbhyām. — Ab. padbhyām. — G. padós. — L. padós.

Pl. N. pādas, m. f. -vidas. — A. padás, m. f. -vidas. — I. padbhís (AV.), -vidbhis. — D. -vidbhyas. — G. padām, -vidām. — L. patsú, -vitsu.

a. The forms actually occurring are the following:

Sing. N. m. 1. with lengthened vowel: pád- with its compounds and sadha-mád-: pát (AV.); a-pát, éka-pāt, éka-śiti-pāt (VS. xxix. 58) 'having one white foot', cátus-pāt, tri-pāt, dvi-pāt and dvi-pāt (AV.), viśvátas-pāt, śiti-pāt (AV.), sárva-pāt (AV.), sahásra-pāt; sadha-mất (IV. 211) and the abnormal sadha-más<sup>7</sup> (VII. 18<sup>7</sup>).

2. with unchanged vowel, being compounds ending in various roots: from ad-: agdhāt (TS. III. 3, 82), karambhāt, kravyāt, visvāt, havyāt; from chad: prathama-cchát8; from pad: anu-pát (VS.xv.8) 'coming to pass'; from chid-: ukha-cchit; from bhid-: adri-bhit, ud-bhit, gotra-bhit, pūr-bhit; from vid-: á-kṣetra-vit, aśva-vít, kratu-vít, kṣetra-vít, gātu-vít, go-vít, dravino-vít,

I Compounds formed with -vid and -sad are the commonest.

<sup>2</sup> The strong form of this word, hard-, appears in composition with dus- and su-. pādam; see LANMAN 4712. Another word for 'heart', srád- (Lat. cord-) 7 See above 55. n. occurs only in the A. sing. with the verbs kr- and dhā-.

<sup>3</sup> The lengthening here is, however, first'. metrical.

<sup>4</sup> Owing to the confusing influence of the I. pl. padbhis from páś- 'look'.

<sup>5</sup> Its high grade form -hard occurs in the N. sing. m.

<sup>6</sup> Probably also the A. sing. m. páñca-

<sup>8 &#</sup>x27;appearing first', 'typical' (x.811); according to Sayana from chad- 'cover' = 'covering

nabho-vít, nātha-vít (AV.), paśu-vít (AV.), purāṇa-vít (AV.), prajā-vít (AV.), rayi-vít, vaco-vít, vayunā-vít, varivo-vít, vasu-vít, viśva-vít, vīra-vít (AV.), śruta-vít, sarva-vít (AV.), svar-vít, hiraṇya-vít; from sad-: adma-sát, antarikṣa-sát, upastha-sát, rta-sát, turaṇya-sát, dakṣṇa-sát (VS. XXXVIII. 10), duroṇa-sát, duvaṇya-sát, prāgharma-sát, vara-sát, vyoma-sát, su-saṃ-sát; camū-ṣát, dru-ṣát, nṛ-ṣát, vedi-sát, śuci-sát. Also su-hárt¹ (AV. II. 75) 'friendly'.

f. i. a-pát. – 2. ā-cchát (VS. xv. 5), pra-cchát (VS. xv. 5) 'covering';

sū-yavasāt (-ad); sam-vit; sam-sát, su-ā-sát (AV.)2.

N. A. n. 1. -pad- appears with both unaltered and lengthened vowel: dvi-pát, cátuṣ-pat and tri-pát, dvi-pát, cátuṣ-pāt.

2. hft (TS. IV. 4. 72); prakala-vít 'knowing very little'; raghu-syát 'moving

quickly' (Vsyad-).

A. m. I. pádam; a-pádam, tri-pádam³, dvi-pádam (VS. XIII. 47), siti-pádam (AV.), sahásra-pādam; sadha-mádam; dur-hárdam (AV.). — 2. from ad-: kravyádam, visvádam; from pad-: dvi-pádam (VS. XXVIII. 32) a metre; from chid: pra-cchídam (VS. XXX. 16) 'cutting to pieces'; from bhid-: ud-bhídam, gotra-bhídam, pūr-bhídam; from vid-: ahar-vídam, kratu-vídam, kṣetra-vídam, gātu-vídam, gōvídam, varivo-vídam, vasu-vídam, visva-vídam, saci-vídam, svar-vídam, hotrā-vídam; from sad-: garta-sádam, su-sam-sádam; apsu-sádam, dru-sádam, dhūr-sádam, barhi-sádam⁴, vanar-sádam; from -syad-: raghu-syádam, havana-syádam. — f. 2. nídam⁵, mídam (VS. XI. 55; TS. IV. I. 5²); āyur-dádam (AV.), oupa-sádam, go-vídam (AV.), ni-vídam, pari-pádam 'snare', pari-sádam (AV.), pitr-sádam, barhi-sádam⁴, vaco-vídam, visva-vídam, sam-vídam, sam-sádam, sa-mádam 'battle' ('raging together').

I. m. padá¹; ápa-duṣ-padā, cátuṣ-padā, dvi-pádā; kṣetra-vídā, varivo-vídā, svar-vídā, su-ṣádā (AV.). — f. udá, mudá, vidá; upa-vídā, ni-vídā, ni-ṣádā, pra-múdā (VS. XXXIX. 9), pra-vídā, saṃ-sádā, svar-vídā. — n. hṛdá; cátuṣ-padā (AV.), duṣ-pádā, dvi-pádā. With adverbial shift of accent: sarva-hṛdá. D. m. a-páde, kuhacid-víde, kravyáde, cátuṣ-pade, tad-víde (AV.), vedi-

D. m. a-páde, kuhacid-víde, kravyáde, cátuş-pade, tad-víde (AV.), vedisáde, sadanā-sáde, sarva-víde (AV.), svar-víde. — f. nidé, mudé; pitr-sáde, pra-máde (VS. xxx. 8), pra-múde (VS. xxx. 10), sam-páde (VS. xv. 8). n. hrdé; cátus-pade, dvi-páde<sup>8</sup>.

Ab. m. padás (AV.); dvi-pádas. — f. nidás9; uttāná-padas, saṃ-vídas

(AV.). — n. hṛdás; sát-padas (AV.).

G. m. éka-padas (AV.), dur-hárdas (AV.), nr-sádas, yavádas (-adas), raghu-syádas (AV.), svar vídas. — f. pra-múdas, sam-sádas (AV.). — n. hrdás; cátus-padas, dvi-pádas.

L. m. padí; svar-vídi. — f. ni-sádi, sam-sádi. — n. hrdí 10.

V. m. viśva-vit, sárva-vit (AV.).

Du. N. A. V. m. 1. pádā; pádau. — 2. V. ahar-vidā, kavi-cchádā 'delight-

<sup>2</sup> Perhaps also nişát in AV. xx. 1326. 7, where the edition has vanişát.

This seems to be the preferable reading (suhārt tēna); the Pada has su-hāh. Otherwise the N. appears as su-hār in MS. IV. 25 (p. 26, l. 19) in suhār ṇaḥ; see Lanman's note in Whitney's AV. Translation on XIX. 45², and Grammar 150 b.

<sup>3</sup> páñca-pāda-m (1. 164<sup>12</sup>) is probably a transfer to the α-declension; see LANMAN 471<sup>2</sup>.

<sup>4</sup> For barhis-sádam; see above 62.

<sup>5</sup> In the Amredita compound nidam-nidam.

<sup>6</sup> From a secondary root dad- formed from the present stem of da- 'give'.

<sup>7</sup> BR. take  $s\dot{a}d\bar{x}$  in AV. IV. 47 as I. of  $s\dot{a}d$ - 'position', but owing to the accent it must be taken as an adv. 'always', see Whitney's note on the passage.

<sup>8</sup> Beside dvi-páde occurring eleven times, dvi-páde occurs once (I. 1213), when the lengthening is metrical.

<sup>9</sup> The transfer form nidāyās occurs once.
10 On the possibility of hrdi representing an A. sing. n. in two or three passages, see LANMAN 4734.

ing in sages', kratu-vidā, vasu-vidā, viśva-vidā, svar-vidā; ātma-sádau. f. ud-bhídā, barhi-sádā2; śrānta-sádau (AV.).

I. m. padbhyām (AV.). — Ab. m. padbhyām. — G. m. padís (AV.)3. —

L. m. padós. — f. prá-pados (AV.).

Pl. N. V. m. 1. a-pādas, cátuṣ-pādas, dvi-pādas+, śiti-pādas+; sadhamādas, soma-mādas; su-hārdas (AV.). — 2. úrjādas, pūru-sādas, madhv-ádas, vavasādas, somādas, havir-ádas; ā-trdas6. V. pra-trdas; deva-nidas; ud-bhidas; abhīmoda-mildas (AV.), svādil-sam-mudas (AV.); anna-vidas (AV.), ahar-vidas, V. gātu-vidas (AV.), nī-vidas (AV.), nī-vidas (AV.), nīthā-vidas, brahma-vidas (AV.), yajur-vidas (AV.), vaco-vidas, varivo-vidas, vasu-vidas, viśva-vidas (AV.), svar-vidas, hotrā-vidas; adma-sádas, antarikṣa-sádas (AV.), apsu-sádas (TS. 1. 4. 10<sup>1</sup>), upa-sádas (AV.), paścāt-sádas (VS. IX. 36), puraḥ-sádas, śarmasádas, sabhā-sádas (AV.), svādu-sam-sádas; camū-sádas, divi-sádas (AV.), dhūr-sádas, barhi-sádas, V. barhi-sadas, vanar-sádas, vedi-sádas (VS. 11. 29); raghu-syádas. — f. 1. dur-hárdas (AV.); nídas, múdas; agha-rúdas (AV.), āmādas (-ádas), upa-sádas (AV.), nis-pádas, pra-múdas, visva-su-vídas, samsádas, suhutādas (-ádas), svar-vidas.

A. m. padás; dur-hárdas (AV.), su-hárdas (AV.); apsu-sádas (AV.), kravyādas, cátus-padas (AV.), tvā-nidas, deva-nidas, dvi-pádas (AV.), parisádas, pastya-sádas, bāhu-ksádas, sattra-sádas (AV.). — f. nidás, bhídas; ni-vidas, pra-múdas, vasu-vidas, vi-núdas, sa-mádas, sa-syádas, havya-súdas.

I. m. padbhis (AV. TS. VS.), padbhis in RV. and VS.8; gharma-sádbhis,

śatá-padbhis. — n. hrdbhis.

D. m. antarikṣa-sádbhyas (AV.), dakṣiṇā-sádbhyas (VS. IX. 35), divisádbhyas (AV. TS.), paścāt-sádbhyas (VS. IX. 35), pṛthivi-sádbhyas (AV.).

G. m. su-hārdām (AV.); adma-sádām, cátuspadām (VS. TS. AV.), dvipádām, barhi-sádām (VS. XXIV. 18), śvá-padām (AV.), su-sádām (AV.). f. upa-sádām (VS. XIX. 14) a kind of ceremony, pari-pádām, śrānta-sádām (AV.), sa-mádām.

L. m. patsú. — f. sa-mátsu. — n. hrtsú.

### Stems in derivative -d.

320. There are some six stems formed with suffixal -d, seemingly all feminines9, which with one exception (sarád-) are of rare occurrence. They are dṛṣád- and dhṛṣád- (RV1.) 'nether millstone', bhasád- 'hind quarters', with its compound su-bhasád- 'having beautiful buttocks', vanád-10 (RVI.) 'longing', sarid- 'autumn'; kakild-" 'summit', with its compound tri-kakild- (AV.) 'threepeaked', kākúd- 'palate'. The inflexion is like that of radical -t stems. The forms occurring are the following:

Sing. N. f. kakút, kākút, dhṛṣát, bhasát, śarát. — m. tri-kakút (VS. AV.).

uncertain meaning and origin.

tical form pathi-sádī an imitation of pathi- I. pl. of pás- look'. ráksī of RV. x. 1411.

<sup>3</sup> This form is used with an ablative sense in AV. I. 182.

<sup>4</sup> AV. x. 26 has dvi-pádas.

<sup>5</sup> The transfer form padas occurs once in the RV. (I. 1639).

<sup>6</sup> Used as ablative infinitive.

n. pl. Cp. Lanman 474.

<sup>8</sup> Four times in RV. and once in VS.

In AV. XVIII. 214 occurs the ungramma- (XXIII. 13) owing to confusion with padbhis,

<sup>9</sup> Except the adj. tri-kakud- (AV.), siti-<sup>2</sup> The form rapsidā, occurring once, is of kakūd- (TS.) 'white-humped' and possibly

<sup>10</sup> This stem occurs only once (II. 45) in the form vanádas, N. pl. m. 'Verlangen' (from van- 'desire') according to BR.; G. sing. m. of van-ad- 'wood-consuming' according to GRASSMANN.

II The origin of this -d is obscure. On 7 There are no N. A. V. forms in the the relation of this word to kakubh- see LANMAN 4714.

A.f. kākúdam, drṣádam, bhasádam (AV.), śarádam.—m. tri-kakúdam (AV.).
I. f. drṣádā, śarádā (TS. IV. 4. 123). — D. f. śaráde. — Ab. f. kākúdas.
— L. f. kakúdi (AV.), śarádi. — Pl. N. f. vanádas, śarádas. — A. f. śarádas.
— I. f. śarádbhis. — G. f. śarádām (AV.). — L. f. śarátsu (AV.).

# Stems in radical -dh.

321. Stems ending in -dh are all radical, simple or compound. There are some fifty derived, with only two or three exceptions, from the following sixteen roots: bādh- 'oppress', sādh- 'succeed'; idh- 'kindle', vidh- 'pierce' (= vyadh-), sidh- 'succeed', sridh- 'blunder' (?); kṣudh- 'be hungry', budh- 'waken', yudh- 'fight', rudh- 'grow' and 'obstruct'; rdh- 'thrive', mrdh- 'neglect', vydh- 'grow', sprdh- 'contend'.

In this declension there occurs no stem distinguishing strong and weak cases. Masculines and feminines are inflected exactly alike. No distinctively neuter forms (N. A. du. pl.) occur, and only four case-forms (G. L. sing.) are found as neuters. There are two monosyllabic m. nouns: vfdh- 'strengthening' and (perhaps)  $b\bar{a}dh$ -'; besides seven f. substantives:  $n\bar{a}dh$ - 'bond'; sr/dh- 'foe'; ks/dh- 'hunger', y/dh- 'fight'; mfdh- 'conflict', vfdh- 'prosperity', spfdh- 'battle'. Neuter cases occur in the sing. (I. G.) of compounds of -vidh, -yudh, and -vrdh.

a. Three or four stems are of doubtful origin: agnidh- is probably to be explained as agni-dh- 'priest who prepares (dhā- 'put') the fire', rather than as a shortened form of agnidh- 'fire-kindler' (from idh- 'kindle') which does not occur in the RV. 'j isidh- 'offering' (RVI.) is perhaps a shortened form of nis-sidh- 'offering' 'f prhsidh- (RVI.) is obscure in meaning and origin; suridh- f. 'invigorating draught' is perhaps derived from sydh- 'be defiant' with Svarabhakti 5.

# Inflexion.

322. Sing. N. m. agnit, anu-rut (VS.) and anū-rut 'loving'; uṣar-bhut 'waking (budh-) at morn', yavīyut<sup>6</sup> 'eager to fight', śvā-vit (AV. VS.) 'porcupine' ('dog-piercer', Vvidh-), sam-it 'flaming'. — f. kṣút (AV.); pra-vṛt 'growth', vī-rut 'plant' (AV.), sam-it 'fuel'.

A. m. vfdham, and its compounds: annā-vfdham 'prospering by food', āhutī-vfdham 'delighting in sacrifices', girā-vfdham 'delighting in praise', tugryā-vfdham 'favouring the Tugryas', namo-vfdham 'honoured by adoration', payo-vfdham 'full of sap', parvatā-vfdham 'delighting in pressing stones', madhu-vfdham 'abounding in sweetness', yajña-vfdham (AV.) 'abounding in sacrifice', vayo-vfdham 'increasing strength', sadyo-vfdham 'rejoicing every day', saho-vfdham 'increasing strength', su-vfdham 'joyous'; agnldham, anu-rhdham (VS. XXX. 9), a-sridham 'not failing', uṣar-bhdham, goṣu-yhdham' 'fighting for kine', marmā-vldham (AV.) 'piercing the vitals', yajña-sādham 'performing sacrifice', hrdayā-vldham (AV.) 'wounding the heart'. — f. kṣhdham, yhdham, sridham; a-sridham, uṣar-bhdham, niṣ-shdham, vīrhdham, saṃ-rhdham (AV.) 'check' (in gambling), sam-idham.

I. m. su-výdhā. — f. kṣudhá (AV.), yudhá, vṛdhá; sam-idhā, su-budhā (AV.) 'good awakening', su-výdhā (AV.), su-ṣam-idhā 'good fuel'. — n. payo-týdhā, yavīyudhā, sākam-výdhā 'growing together'.

In bådhas A. pl. in VI. III (GRASSMANN); BR. do not acknowledge a m. use of bådh, and in VIII. 4510, IX. 1096 they would join the word with the preceding pári.

<sup>&</sup>lt;sup>2</sup> In nádbhyas (x. 606) if derived from nadh- = nah- 'bind' (BR. s. v. náh-); but it is more probably = \*náhd-bhyas from napt-, weak stem of nápāt-, as also indicated by the accent.

<sup>3</sup> See above p. 18, note 6.

<sup>4</sup> Cp. is-krti- for nis-krti-.

<sup>5</sup> Cp. above 21.

<sup>6</sup> From the intensive stem of yudh-'fight'.

<sup>7</sup> In the Amredita samit-samit.

<sup>8</sup> With the L. pl. gosu instead of the stem go-.

<sup>9</sup> Cp. WHITNEY's note on AV. VII. 505.

- D. m. usar-bidhe, rtx-vrdhe 'fostering truth', puru-nissidhe 'repelling many (foes)', mahi-vidhe 'greatly rejoicing', vi-midhe (VS. VIII. 44) 'dispeller of foes', sam-fdhe (AV.) 'welfare', sa-vfdhe (VS. XVI. 30) 'growing'. — f. kṣudhé, yudhé (AV.) , vṛdhé, sam-idhe.
  - Ab. f. ksudhás, yudhás, sridhás.
- G. m. gosu-yúdhas, vi-mṛdhás² 'foe', sumatī-vṛdhas (VS. XXII. 12) 'delighting in prayer'. — f. ksudhás. — n. hrdayā-vidhas.

L. f. mṛdhi, yudhi, spṛdhi; pra-budhi 'awaking'.

- Du. N. A. V. m. a-sridhā, rtā-vrdhā, V. rtā-vrdhā, namo-vrdhā, purovidhā 'fighting in front'; rtā-vrdhau. — f. rdū-vrdhā 'increasing sweetness'. ghṛtī-vṛdhā 'rejoicing in fatness', payo-vṛdhā, vayo-vṛdhā, sākaṃ-vṛdhā; sam-idhau (AV.).
- Pl. N.V.m. ṛtā-vṛdhas, V. rtā-vṛdhas, tugryā-vṛdhas, payo-vṛdhas, parvatāvýdhas, vayo-výdhas, suge-výdhas 'rejoicing in good progress', su-výdhas; a-srídhas, āyur-yúdhas (VS. xvi. 60) 'struggling for life', uṣar-búdhas, goṣu-yúdhas, jñubādhas 'bending the knees', pra-yúdhas 'assailing', vṛṣā-yúdhas 'combating men', śurudhas, soma-pari-bādhas 'despising Soma'. — f. ksúdhas (AV.), mṛdhas, spṛdhas, sridhas (VS. xxvII. 6) 'foes'; amitrā-yhdhas 'fighting with enemies', a-srídhas, isídhas, rtā-výdhas, nis-sídhas, pari-bádhas 'oppressors', pari-sprdhas 'rivals', vī-rudhas, V. vī-rudhas, surudhas, sam-idhas.

L. f. vutsu, vī-rutsu.

#### Stems in radical -n.

323. The radical stems ending in -n are formed from half a dozen roots: from tan- 'stretch', ran- 'rejoice', van- 'be pleasant', are formed monosyllabic substantives meaning 'succession', 'joy', 'wood', respectively; from svan-'sound' is formed the adj. svan-8 'sounding' and the compound tuvi-svan- 'roaring aloud'; from san- 'gain', the compound go-san- 'winning cows'. From these six nouns very few case-forms occur. But from han- 'strike' no fewer than 35 compounds are made in the RV., and all the singular cases as well as several of the du. and pl. cases are formed. All the stems formed from these six roots 9 are m. except tún-, which is f. 10, and only a single n. case-form occurs from a compound of han- (dasyu-ghn $\tilde{a}$ ). The distinction between strong and weak forms is made in -han- only. Here in the weak cases  $\alpha$  as

<sup>2</sup> With irregular accent; cp. LANMAN477(top). 3 Fifteen times accented sridhas, once

(IX. 718) sridhás.

4 În VIII. 4540, IX. 1056 pari-badhas should perhaps be read instead of pári bádhas.

7 In the V. vīrudhām pate.

8 The accent of the monosyllabic stems is irregular in remaining on the radical syllable except taná (beside tánā) and vanām: cp. Lanman 4794 and above 94, 1 a.

9 Other roots in -n used as nominal stems have gone over to the a- or  $\bar{a}$ -declension;

thus jan- becomes -ja- or  $-j\bar{a}$ -. 10 -han- forms a separate fem. stem in -z

I The infinitive yudhaye is a transition to the i-declension, there being no stem yudhi-.

<sup>5</sup> If from náh-, according to BR. (cp. akṣānáhas (A. p. f.); according to WEBER, IS. 13, 109, from nap. It is probably from from its weak form: -ghn-i-.  $napt-=n\acute{a}p\bar{a}t$ . See above 321, note on  $n\acute{a}dh$ -.

<sup>6</sup> In the V. judhām pate.

representing the sonant nasal appears for an before consonants, while before vowels the root, by syncopation of its vowel, assumes the form of -ghn. The N. sing. n. of -han is -ha-m, a transition to the a-declension (for -ha, which does not occur).

#### Inflexion.

- 324. All forms are represented in this declension except Ab. sing., the weak cases of the du., and the D. Ab. pl. The forms made from -han- are: Sing. N. -h\(\alpha^2\), A. -h\(\alpha\)nam, I. -ghn\(\alpha\), D. -ghn\(\alpha\), G. -ghn\(\alpha\), L. -ghn\(\alpha\), V. -han. Du. N. A. -h\(\alpha\)n\(\alpha\), -h\(\alpha\)nau (VS. TS.), V. -han\(\alpha\). Pl. N. -h\(\alpha\)nas, A. -ghn\(\alpha\)s, I. -h\(\alpha\)bhis. The G. would be -ghn\(\alpha\)m and the L. -h\(\alpha\)su according to the analogy of other stems in this declension. The forms of radical n-stems which occur are the following:
- Sing. N. m. aghaśamsa-há 'slaying the wicked', adṛṣṭa-há 'slaying unseen (vermin)', abhimāti-há 'destroying adversaries', amitra-há 'killing enemies', amīva-há 'destroying pains', aruśa-há 'striking the dark (cloud)', á-vīra-hā 'not slaying men', aśasti-há 'averting curses', asura-há 'demon-slaying', ahi-há 'killing the serpent', kṛṣṭi-há 'subduing nations', go-há 'killing cattle', dasyu-há 'destroying the Dasyus', durṇāma-há (AV.) 'destroying the ill-named', nṛ-há 'killing men', puro-há 'destroying strongholds'³, pṛśni-há (AV.) 'slaying the speckled (snake)', mano-há (AV.) 'mind-destroying', muṣṭi-há 'striking with the fist', yāṭu-há (AV.) 'destroying witchcraft', rakṣo-há 'destroying demons', vasar-há 'destroying at dawn', vṛṭra-há 'Vṛṭra-slaying', śarya-há 'killing with arrows', satrā-há 'destroying entirely', sapatna-há 'slaying rivals', sapṭa-há 'slaying seven'. n. Only two transition forms occur: vṛṭra-há-m and satrā-há-m⁴.
- A. m. á-pra-haṇam<sup>5</sup> 'not hurting', abhimāti-hánam, ahi-hánam, tamo-hánam 'dispelling darkness', dasyu-hánam, rakṣo-háṇam<sup>5</sup>, valaga-hánam 'destroying secret spells' (VS. v. 23), mano-hánam (AV.), vīra-háṇam<sup>5</sup> (VS. xxx. 5) 'homicide', vṛtra-háṇam<sup>5</sup>, satrā-háṇam<sup>5</sup>, sapatna-hánam (AV.).
- I. m. vrtra- $ghn\dot{a}^6$ . n. dasyu- $ghn\dot{a}$ . f.  $tan\dot{a}$  (once) and  $t\dot{a}n\bar{a}^7$  (19 times).
- D. m. ráne<sup>7</sup>; abhimāti-ghné (VS. vi. 32), asura-ghné<sup>6</sup>, ahi-ghné, nr-ghné<sup>6</sup>, makha-ghné (TS. 111. 2. 4. <sup>1. 2</sup>), 'slayer of Makha', vṛtra-ghné<sup>6</sup>. f. táne<sup>7</sup>.

G. m. go-sanas (in the V. gosano napāt); asura-ghnás6, vṛtra-ghnás6.

L.m. sváni<sup>8</sup> (IX. 669), tuvi-sváni; bhrūna-ghní (AV.) 'killer of an embryo'. Without an ending: rán<sup>9</sup>.

V. m. amitra-han, ahi-han, vṛtra-han.

Du. N. A. V. tamo-hánā, rakṣo-hánā, rrtra-hánā, V. vṛṭra-haṇā. With -au: rakṣo-háṇau (VS. v. 25), valaga-hánau (VS. v. 25; TS. 1. 3. 2²).

Pl. N. V. m. V. tuvi-svanas; a-bhog-ghánas 10 'striking the niggardly one', punar-hánas 5 'destroying in return', yajña-hánas (TS.) 'destroying sacrifice', satru-hánas 5 'slaying enemies'.

A. m. sāta-ghnús (AV.) 'gain-destroying'. With strong form: rakṣo-hánas 5 and valaga-hánas (VS. v. 25; TS. I. 3. 22).

I. m. vrtra-hábhis. — G. m. vanám. — L. m. rámsu, vámsu.

6 See above p. 38, note 4.

7 Against the rule of accentuation in monosyllabic stems (94).

<sup>&</sup>lt;sup>1</sup> The forms made from -ghna-, viz.-ghnás, -ghnám, -ghnāya, -gnásya, -ghne, are probably to be explained as transition forms starting from the weak stem -ghn-.

<sup>&</sup>lt;sup>2</sup> Formed like the N. of derivative -an stems (327).

<sup>3</sup> That is, puras, A. pl. of pur, the case termination being retained.

<sup>4</sup> The normal forms would be \*vṛtra-há and \*satrā-há.

<sup>5</sup> See above 47, A b 2 (p. 39).

<sup>8</sup> This form may, however, be the 3 sing. passive aor. See below 501, note on sadi. 9 With loss of the loc. ending as in the

<sup>-</sup>an declension (325).

<sup>10 -</sup>ghánas for -hánas, see above 80, 81.

# Derivative stems in -an, -man, -van.

325. This declension embraces a large number of words, the stems in -van being by far the commonest, those in -an the least frequent. It is almost limited to masculines and neuters; but some forms of adjective stems serve as feminines, and there is one specifically f. stem, y/s-an-'woman'.

The distinction of strong and weak forms is regularly made. In the strong cases the a of the suffix is usually lengthened, e. g.  $adhv.\bar{n}-am$ ; but in half a dozen -an and -man stems it remains unchanged; e. g. arya-m.i.y-am. In the weak cases the a is often syncopated before vowel endings, though never when -man and -van are preceded by a consonant<sup>2</sup>, e. g. I. sing.  $gr.i-v.y-\bar{a}$ <sup>3</sup> from gr.i-van-, 'pressing stone'+, while before consonant endings the final n disappears<sup>5</sup>, e. g. r.i.y-bhis. In the RV. the syncopation never takes place in the N. A. du. n., nor with one exception (sata-d.i.vn-i) in the L. sing.

As in all other stems ending in -n, the nasal is dropped in the N. sing.; e. g. m.  $\acute{adhv\bar{a}}$ , n.  $\acute{kdrma}$ . But there are two peculiarities of inflexion which, being common to these three groups, do not appear elsewhere in the consonant declension. Both the L. sing. and the N. A. pl. n. are formed in two ways. The ending of the L. sing. is in the RV. dropped more often than not, e. g.  $m\bar{u}rdh\acute{a}n$  and  $m\bar{u}rdh\acute{a}n$ , the choice often depending on the metre. The N. A. pl. n. is formed with  $-\bar{a}ni$  from 18 stems and with -a from 19 stems? in the RV.; seven of the latter appear with  $-\bar{a}$  in the Samhitā text, but with -a like the rest in the Pada text. The evidence of the Avesta indicates that there were in the Indo-Iranian period two forms,  $n\bar{a}m\bar{a}n$  and  $n\bar{a}m\bar{a}ni$ , the former losing its -n as usual when final after a long vowel. On this ground the  $-\bar{a}$  form of the Samhitā, though the less frequent, would appear to be the older.

There are here many supplementary stems and numerous transitions to the  $\alpha$ -declension.

#### I. Stems in -an.

- 326. These stems, which are both m. and n., are not numerous. They include some which at first sight have the appearance of belonging to one of the other two groups:  $y\cdot u\cdot v-an^{-9}$  'youth',  $s\cdot v-an^{-1}$  'dog',  $r\cdot ji-s\cdot v-an^{-10}$  N. of a man,  $m\bar{u}tari-s\cdot v-an^{-10}$  N. of a demi-god,  $vi-bhv-an^{-11}$  'far-reaching';  $p\cdot dri-jm-an^{-12}$  'going round'. The n.  $s\cdot ir\cdot s-an$  is an extended stem from  $s\cdot iras$  'head' =  $s\cdot ir(a)s-an$ -.
- a. Besides the N. pl. yóṣaṇ-as 'women', six or seven forms of this declension appear to be feminine as agreeing with f. substantives: vṛṣā 'raining' (káśā, vāk), vṛṣaṇam (tvácam), vṛṣaṇā (dyāvā-pṛthivī), pári-jmānas 'going round' (vidyútas), rapśád-ūdhabhis 'having distended udders' (dhenúbhis) 13, vāja-karmabhis (SV. TS.) and vāja-bharmabhis (VIII. 1930) 'bringing rewards' (ūtibhis).

The stems in -van regularly form their f. in -varī, e. g. pī-van, pī-varī; those in -an and -man by adding -ī to the syncopated stem at the end of compounds; e. g. sóma-rājn-ī-, pánca-nāmn-ī- (AV.).

<sup>&</sup>lt;sup>2</sup> This exception does not apply when -an is preceded by two consonants, e. g. sakth-nā.

<sup>3</sup> But also G. sing. vṛṣaṇ-as (ÁV.). The syncopation nearly always takes place in -an stems and in nearly half of the -man and -van stems

<sup>4</sup> When the accent is on the suffix it is thrown on the ending in these syncopated forms, e. g. mahnā from mah-ān-.

<sup>5</sup> That is, a here represents an original sonant nasal, see p. 17, note 2.

<sup>6 48</sup> locatives (occurring 127 times) have the *i*, 45 (occurring 203 times) drop it. See LANMAN 535.

<sup>7</sup> But those in -ani occur nearly twice as often.

<sup>&</sup>lt;sup>8</sup> Cp. Brugmann, KG. 483 and Lanman 538.

<sup>9</sup> Cp. the comparative yav-īyān and the Avestan yvan.

<sup>10-</sup>śvan in both these compounds is probably derived from śū- 'grow'.

II From bhii- 'be'.

<sup>12</sup> From gam- 'go'.

<sup>13</sup> The f. of -an stems at the end of compounds is formed with -ī in acchidra-ūdhn-ī- 'having a faultless udder', sam-rājn-ī-

b. In the strong forms the stems rbhu-kṣán- 'chief of the Rbhus', pūṣán-, and the f. vósan-, retain the short a, while uksán- 'ox' and výsan- 'bull' fluctuate between a and a. The words śwan- and yavan- form their weak stems before vowels with Samprasarana. sien-, vin-; the latter is once used in the N. du. m. form vinā instead of vivānā. In the weak cases syncopation always takes place except in the forms uksánas and výsanas.

c. A number of an stems have supplementary forms from other stems: aksánfrom áksi-; asthán- from ásthi-; áhan- from áhas- and áhar-; āsán- from āsyà-, ás-, and āsá-; udán- from úd- and uda-ká-; údhan- from údhas- and údhar-; dadhán- from dádhi-; dosánfrom dés-; yakán- from yákrt-; yésan- from yésanā- and yésā-; sákan- from sákrt-; sakthánfrom sákthi. As no stem in -an has been found in the N.A. sing. n., such forms appear to have been avoided and to have been purposely replaced by forms from supplementary stems. These forms are the N. A. n. ákṣi, ásthi (AV.), áhar, āsyàm, udakám, ūdhar, yákṛt (AV.), sákrt, sákthi; also vúvat instead of \*vúva, as well as síras and sīrṣá-m (AV.) instead of \*sīrsá2.

d. There are here several transitions to the α-declension. The A. sing. pūsán-am is the starting point for the N. pūsán-a-s and the G. pūṣaná-sya-3. The N. A. pl. n. is the starting point in other instances: the two pl. forms sirså and sirsåni give rise to the L. sing. sīrṣé (AV.) beside sīrṣáṇi, as well as to the du. N. A. sīrṣé and the N. A. sing. śīrṣá-m (AV.); similarly the two plurals áhā and áhāni led to the G. pl. áhānām beside dhnām; and yūṣáṇi, the pl. of yūṣáṇ, which has the appearance of a pl. of a stem yūṣá-, led to the formation of an I. sing. yūṣéṇa (TS.) beside the regular yūṣṇā (VS.).

Again, the weak forms áin-as, ahn-as etc., gave rise to the transition stems áina- and áhna-, from which are formed the I. pl. áinas and the L. sing. pūrvāhnė.

Transition α-stems often take the place of -an stems at the end of compounds. Thus -akṣá- appears in several compounds for -akṣán-, and -vṛṣá- (AV.) for -vṛṣan-; anasthán once forms the N. sing. m. an-asthá-s (VIII. 134); beside the N. sing. m. brhád-ukṣāya appears the D. brhád-ukṣāya (VS.); beside rájānam is found the A. m. adhi-rājá-m

(X. 1289) 'over-lord'; and beside saptubhis 'seven', the compound tri-saptais4.

# Inflexion.

327. The normal forms, if made from rajan- 'king' in the m., and from úhan- 'day' in the n., would be as follows:

1. m. Sing. N. rājā. A. rājānam. I. rājñā. D. rājñe. Ab. rājnas. G. rájñas. L. rájani and rájan. V. rājan.

Du. N. A. rajānā and rajānau. I. rajabhyām. D. rajabhyām. G. rajños. Pl. N. V. rájānas. A. rájñas. I. rájabhis. D. rájabhyas. Ab. rájabhyas (AV.). G. rajnām. L. rajasu.

2. n. Sing. N. A. -5. I. áhnā. D. áhne. Ab. G. áhnas. L. áhani and áhan. — Du. N. A. áhanī. G. áhnos (AV.). — Pl. N. A. áhāni. I. áhabhis. D. Ab. áhabhyas. G. áhnām. L. áhasu.

The forms actually occurring are the following:

Sing. N. m. an-asthá 'boneless', áyaḥ-śīrṣā 'iron-headed', a-śīrṣā 'headless', uksá 'bull', rjí-śvā N. of a man, táksā 'carpenter', tápur-mūrdhā 'burningheaded', try-udha6 'three-uddered', dvi-barha-jma7 'having a double course', pári-jmā 'surrounding', pūṣā 'Pūṣan', plīhā (VS.) 'spleen', brhād-ukṣā 'having great oxen', majjá (VS. AV.) 'marrow', mātari-śvā 'Mātariśvan', mūrdhá 'head', vilvā 'youth', rājā 'king', vi-bhvā 'far-reaching', vi-rājā (TS. v. 7.44) 'sovereign', zýṣā 'bull', śvá 'dog', sahásra-śīrṣā 'thousand-headed'.

The restoration of the a seems to be metrically required in a few instances: see

7 Here bárha- = bárhas-.

<sup>&#</sup>x27;queen', sóma-rājñ-ī- 'having Soma as king', hatá-vṛṣṇ-ĩ- 'whose lord has been slain', rúruśīrṣṇ-ī- 'deer-headed', saptá-śīrṣṇ-ī- 'seven-headed', śka-mūrdhn-ī- (AV.) 'having the head turned in one direction', sindhu-rājū-ī-(AV.) 'having Sindhu as queen'.

Lanman 525.

<sup>2</sup> The N. sing. n. of the adj. vṛṣan- is avoided in several ways: see Lanman 530 (bottom).

<sup>3</sup> With shifted accent.

<sup>4</sup> On the other hand there are two transitions from the a-declension to the an-declension in ni-kāmabhis beside ni-kāmais and naktá-bhis for náktam, but these forms are due to somewhat artificial conditions; see below, I. pl. p. 206, notes 3 and 4.

<sup>5</sup> Only supplementary forms occur: see

LANMAN 530 (bottom). 6 The metre seems to require try-udha (III,  $56^3$ ).

A. m. ukṣáṇam, tikṣāṇam (VS. XXX. 6), tri-mūrdhinam 'three-headed', tri-ṣirṣáṇam 'three-headed', pánthānam (VS. AV.) 'path', pári-jmānam, pṛthu-gmānam ' 'broad-pathed', plīhinam (AV.), majjānam, mātari-śvānam, mūrdhānam, yhvānam, rājānam², vṛṣāṇam, śvānam, sapti-ṣīrṣāṇam 'seven-headed'. — With short a: ukṣáṇam, rbhu-kṣáṇam³ 'chief of the Rbhus', pūṣáṇam, vṛṣaṇam⁴.

I. m. i. rji-śvanī, mātari-śvanī, vi-bhvánī. — 2. With syncope: áśnī, pūṣṇā, plīhnā (VS.), majjñī (AV.), mūrdhnā (VS. xxv. 2), rājñī, vṛṣṇā. — 3. With Samprasāraṇa: śứnī (AV.). — n. asnā (VS. xxv. 9) 'blood', áhnā 'day', āsnā 'mouth', udnī 'water', dadhnā 'curds', mahnā 'greatness'. yaknā (VS. xxxx. 8) 'liver', yūṣṇā (VS. xxv. 9) 'broth', vi-śirṣṇā (Kh. i. 11+) 'headless', śaknā (VS.) 'excrement', śīrṣṇā 'head', sakthnī (VS.) 'thigh'.

D. m. I. rji-svane, pári-jmane, mātari-svane, vi-bhváne, vi-sane (TS. III. 2. 5<sup>2</sup>).— 2. pūṣne, prati-divne 'adversary at play', mūrdhne (VS. XXII. 32), rájne, vi-sne<sup>8</sup>.— 3. yūne.— n. I. dhūrv-ane 'hurting'.— 2. áhne, āsne, sīrṣne.

Ab. m. 2. plīhnás (AV.), mūrdhnás, vṛṣṇasº. — n. 2. akṣṇás 'eye', áhnas, āsnás 'o, udnás 'i, údhnas, yaknás 'liver', vṛṣṇas 'shedding rain', śīrṣṇás.

G. m. i. durgibhi-śvanas continually swelling, pári-jmanas, mītari-śvanas (VS.I.2), visanas (AV.). — 2. áśnas 13, ukṣṇás, pūṣṇás, yūṣṇás (or n.), rājñas, viṣṇas. — 3. yinas, śinas. — n. akṣṇás (VS. IV. 32; TS.), asnás 14 (AV.) blood, asthnás (AV.) bone, áhnas, udnás, dadhnás, viṣṇas, śaknás (AV.), śīrṣṇás 15.

L. m. i. rjí-svani, mātarí-svani, mūrdháni, rájani. — 2. jmán 'way', párijman, mātarí-svan (AV.), mūrdhán. — n. i. áhani, āsáni, udáni, údhani 'udder', kṣấmaṇi 'earth', rājáni, śīrṣáṇi; áhni (AV.). — 2. áhan, āsán, udán, háhan, kṣấman 16, gámbhan (VS. XIII. 30) 'depth', śīrṣán 17.

V. m. i. uru-jman (AV.) 'extension', pari-jman, pṛthu-jman (AV.), pūṣan, mūrdhan (VS.xviii.55), yuvan, rūjan, vṛṣan, śata-mūrdhan (VS.xvii.71; TS.) 'hundred-headed', satya-rūjan (VS. xx. 4) 'true king'. — 2. mātari-śvas 18.

Du. N. A. V. m. i. pári-jmānī, V. mítra-rājānā 'ye kings Mitra (and Varuņa)', yūvānā, V. yuvānā, rājānā, ścánā. With short vowel: indrā-pūṣáṇā, pūṣáṇā, vṛṣaṇā, V. vṛṣaṇā, somā-pūṣaṇā. With weak stem: yūnā (IX. 685) for yūvānā (probably through yūvānā).— 2. With au: rājānau, vṛṣāṇau (AV.), śvānau; V. vṛṣaṇau, somā-pūṣanau.

N. A. n. áhanī, cákṣaṇī (AV.) 'eyes', doṣáṇī (AV.) 'fore-arms' 19.

I. m. vṛṣabhyām. — D. m. somā-pāṣábhyām. — G. m. pári-jmanos, indrā-pūṣṇós. — n. áhnos (AV.). — L. n. akṣṇós (Kh. 1. 118).

=-jman-=-jman- 'path'.

4 In the RV. rysanam occurs 53 times, rysanam only twice.

5 This form (occurring thrice) may possibly be shortened for asmanī (which occurs twice) from asman- stone'.

6 For \*\$ii-an-ā; hence no shift of accent pūsáṇam (326 d). as in monosyllabic stems.

7 Also uśán-e (VI. 2011) according to BENFEY, Orient und Occident 2, 242.

8 There is also the transition form bṛhádukṣāya (VS. VIII. 8).

9 Benfey, Gött. Abh. 19, 261, regards vibhvánā (x. 765) as — Ab. vibhvánas.

10 Also the supplementary forms asyat, as as.

13 This form (occurring once) may be shortened for ásmanas (occurring four times).
14 With supplementary stem ásr-j-.

15 The G. pūsanásya, occurring once, seems to be a transfer form starting from the A. pūsanam (326 d).

16 There are also the transition forms strie, pūrvāhuė: see LANMAN 536.

17 The compound nemann-is- 'following guidance' probably contains a loc.

18 Following the analogy of some stems in van.

19 Also the transition form sursé.

<sup>&</sup>lt;sup>2</sup> There is also the transfer form adhi- $i\bar{a}_{j}\dot{a}_{-m}$  (x. 1289).

<sup>3</sup> Perhaps from kṣā- = kṣi- 'possess'.

II Also the supplementary form udakāt.

<sup>12</sup> For vysa-nama (IX. 9754) GRASSMANN would read vysano na; cp. WACKERNAGEL 21, 68 a, note (p. 160).

P1. N. V. m. ukṣāṇas (VS. XXIV. 13), tigmā-mūrdhānas 'sharp-edged', pānthānas (AV.), mūrdhānas, yivānas, rājānas, svānas. — With short vowel: ukṣāṇas, rbhu-kṣāṇas, vṛṣaṇas.

N. A. n. 1. akṣāṇi, asthāni (TS. IV. 7. 12)1, áhāni, śīrṣāṇi, sakthāni. —

2. áhā, śīrṣā².

A. m. 1. mātari-śvanas, ukṣáṇas, rṛṣaṇas. — 2. ukṣṇás, jana-rájňas 'king of men', majjňás (AV.), mūrdhnás, yamá-rājňas 'subject to Yama', rájňas, rṛṣṇas. — 3. yánas, śúnas.

I. m. uksábhis³, yúvabhis, rájabhis, vísabhis, śvábhis (Kh. v. 15¹)⁴.—
n. aksábhis, asthábhis, áhabhis, āsábhis, udábhis, údhabhis, mahábhis, vísabhis, sákabhis (TS. v. 7. 23¹), su-kíta-karmabhis (Kh. III. 12³) 'doing good deeds'⁵.

D. m. tákṣabhyas (VS.), majjábhyas (TS. VS. XXXIX. 10), yúvabhyas, rájabhyas, śvábhyas (AV. VS.). — n. asthábhyas (VS. XXXIX. 10; TS. v. 2. 12²), áhabhyas. — Ab. m. majjábhyas (AV.). — n. áhabhyas.

G. m. vṛṣṇām, rājnām (VS. AV.), śúnām (AV.). — n. áhnām<sup>6</sup>.

L. m. majjásu (AV.), yamá-rājasu (AV.), rájasu. — n. áhasu, sīrṣásu.

# 2. Stems in -man.

328. These stems are about equally divided between the masculine and the neuter gender, the former being agent nouns, the latter verbal abstracts. These stems seem to have been used normally for the f. as well as the m.; for though no simple stem in -man occurs as a f., about a dozen of them are used as f. at the end of compounds, while no certain example appears in the RV. of a f. being formed by adding  $-\bar{\imath}$  to -man?. A peculiarity of the inflexion of the stems in -man, as compared with those in -an and -van, is that in the syncopated forms of the I. sing. several words drop the m, while two drop the n of the suffix; e. g. mahiná for mahimná, and rasmá for rasmná.

a. The f. forms which occur at the end of compounds are: Sing. N. purů-ŝarmā (VS. x. 9) 'giving wide shelter' (âditi-), sâ-lakṣmā (X. 102) 'similar'; A. dyutâd-yāmānam (V. 801) 'having a shining course' (uṣâsam); su-târmānam (VIII. 423) 'easily conveying across' (nāvam), su-tâ māṇam (X. 6310) 'protecting well' (pṛthivīn), su-sârmāṇam (X. 6310) 'granting secure refuge' (âditim); V. âriṣṭa-bharman (VIII. 184) 'yielding security' (adite), pṛthu-yāman (VI. 644) 'having a broad path' (duhitar); Du. N. su-jânmanīg (I. 1601) 'producing fair things' (dhiṣâṇe); Pl. A. śūci-janmanıs (VI. 393) 'of radiant birth' (uṣâsas); I. vāja-bharmabhis (VIII. 1930) 'winning rewards' (ūtibhis), su-kârmabhis (IX. 70†) 'skilful' (fingers); G. šukrāsaamanām (VI. 475) 'having a bright dwelling-place' (uṣâsām) 10. From nāman- 'name' the AV. forms with -ī the f. stem -nāmnī- at the end of five compounds: dur-ṇāmnī- 'illnamed', pāñ '-- vīvār- 'having five name', mahā-nāmnī- 'great-named', viśvā-nāmnī- 'having all names', uhin the rivar- thousand-named'. The f. dur-adman-ī- (VS. II. 20) 'noxious food' is perhaps similarly formed II.

In the corresponding passage of VS. (XVIII. 3) ásthīni.

<sup>2</sup> Both these might be formed from the transition a-stems  $\acute{a}ha$ -,  $\acute{s}r$ - $\acute{y}\acute{a}$ -. This is perhaps the reason why these are the only two plurals of this declension which retain the  $\ddot{a}$  in the Pada text;  $\acute{a}ha$  appears in I. 92<sup>3</sup>.

3 The form ní-kāmabhis 'eager' for ní-kāmais is due to the parallelism of evayāvabhis in X. 929.

4 There is also a transition form ásnais 'stones', beside the stem ásan-.

5 The unique form naktábhis (as if from a stem naktán-) is doubtless used for metrical reasons instead of náktam in VII. 10418.

6 There is also the transition form ahānām.

7 The AV. has five stems thus formed at the end of compounds.

8 Cp. Bloomfield, BB. 23, 105 ff., AJPh. 16, 409—434; BARTHOLOMAE IF. 8, Anzeiger 17.

9 With the ending of the neuter; see Lanman 433 (top).

10 Possibly also su-yūmā (II. 327) 'bearing well'; but it is derived from \*sū-ma- according to BR. and GRASSMANN.

It The f. bráhmī. (IX. 335) formed from bráhman- is quite exceptional, being due to a play on words (see LANMAN 528). The form tmányā = tmánā in sense, occurring twice in the RV., may be an I. sing. f. of tmán-ī-: cp. GRASSMANN and BR.

b. In the strong forms aryamán- 'Aryaman', tmán- 'self', and jéman- 'victorious' retain the short vowel of the suffix. In the weak forms, even when the suffix is preceded by a vowel, about a dozen forms do not syncopate the a\*: I. omán\*, pravád-vāmanā, bhūmanā, bhūmanā, bhūmanā, bhūmanā, bhūmanā, bhūmanā; D. trāmane, dāmane; Ab. G. bhūmanas; G. mahimanas, dāmanas, yāmanas, voòmanas. The forms which, besides syncopating, drop the m or the n of the suffix are: prathinā, prenā, bhūnā, mahinā, varinā; drāghmā, rašmā.

c. Beside the -man stems there are several transfer stems in -ma, which are, however, of rare or late occurrence: darmá-'destroyer' beside darmán-; dhárma-(AV. etc.) 'law' beside dhárman-; éma- (VS.) 'course' beside éman-; hóma- (VS. AV.) 'offering' beside hóman- (RV.); ájma- 'course' beside ájman-; yáma- 'course' beside yáman-; friyá-dhāma- (I. 1401) 'fond of home' beside priyá-dhāma- (AV.); and occasional forms of -karma- at the end of compounds beside the regular -karman-: vīrá-karma-m (X. 615) 'doing manly deeds'; višvá-karmana (X. 1644) 'all-creating' beside višvá-karmanā, etc.

## Inflexion.

329. The normal forms actually occurring would, if made from dśman'stone' in the m. and from kárman- 'act' in the n., be as follows:

Sing. m. N. áśmā. A. áśmānam². I. áśmana³. Ď. áśmana+. Ab. áśmanas⁵. G. áśmanas⁵. L. áśmani and áśman. V. áśman. — Du. N. A. V. áśmānā-6. L. áśmanos. — Pl. N. V. áśmānas. A. áśmanas. I. áśmabhis. D. áśmabhyas. G. áśmanām. L. áśmasu (AV.).

Sing. n. N. A. kárma<sup>7</sup>. Í. kármanā<sup>8</sup>. D. kármane<sup>8</sup>. Ab. kármanas<sup>8</sup>. G. kármanas<sup>8</sup>. L. kármani and kárman. — Du. N. A. kármanī. G. kármanos. — Pl. N. A. kármāni, kárma, kármā. I. kármabhis. D. kármabhyas. Ab. kármabhyas. G. kármanām<sup>8</sup>. L. kármasu.

Forms which actually occur are the following:

Sing. N. m. a-karmá 'wicked', á-brahmā 'lacking devotion', aryamá 'Aryaman', áśmā 'stone', a-sremā 'faultless', ātmā 'breath', āśu-hêmā 'speeding swiftly', iṣtá-yāmā 'going according to desire', usrá-yāmā 'moving towards brightness', rtá-dhāmā (VS. IV. 32) 'abiding in truth', krtá-brahmā 'having performed devotion', jarimá 'old age', jātú-bharma 'ever nourishing', jemá (VS. XVIII. 4) 'superiority', tṛpála-prabharmā 'offering what is refreshing', darmā 'demolisher', dāmā 'giver', dur-ṇāmā 'ill-named', dur-mánmā 'evil-minded', dyutád-yāmā 'having a shining path', drāghimā (VS. XVIII. 4) 'length', dvijánmā 'having a double birth', dharmá 'arranger', dhvasmá 'darkening', pákasthāmā N. of a man, pāpmā (VS. vi. 35) 'misfortune', prthu-pragāmā 'widestriding', prathimá (VS. xvIII. 4) 'width', brahmá 'devout man', bhujmá9 'abounding in valleys', bhūmā (TS. vii. 3. 131) 'plenty', bhūri-janmā 'having many births', mahima 'greatness', yajña-manma 'ready for sacrifice', raghuyámā 'going quickly', resmá (AV.) 'tempest', vadmá 'speaker', varimá 'width', varşimā (VS. xvIII. 4) 'height', viśvá-karmā 'all-creator', viśvá-sāmā (VS. xvIII. 39) 'having the form of all Samans', vṛṣa-prabharmā 'to whom the strong (Soma) is offered', śatátmā 'possessing a hundred lives', satyá-dharmā 'whose laws are true', satyá-manmā 'whose thoughts are true', saptá-nāmā 'seven-named', sahásra-yāmā 'having a thousand courses', sādhíl-karmā 'acting well', su-kármā 'working skilfully', su-jánimā 'producing fair things', su-trāmā 'guarding well', su-dyótmā 'shining bright', su-bráhmā 'accompanied by good prayers', sumántu-nāmā 'bearing a well-known name', su-mánmā 'benevolent', su-váhmā

The vowel has also to be restored in several other forms (see Lanman 524 f.).

With short vowel aryamánam, tmánam. 3 Without syncope after vowel bhúmanā, etc.; with syncope mahimnā, mahinā, drāghmā,

<sup>4</sup> Also with syncope, mahimné, etc.

<sup>5</sup> Also with syncope, mahimnás, etc.

<sup>Also with short vowel aryamánā, jémanā.
Sometimes kármā in the Samhitā text.</sup> 

<sup>8</sup> Also with syncope, namna, etc.

<sup>9</sup> bhújma (I. 655) should probably be read bhujmá; see BR., GRASSMANN, LANMAN 530 (top).

'driving well', su-siármā (VS. vIII. 8) 'good protector', su-sṭhāmā 'having a firm support', svādu-kṣādmā 'having sweet food' '.

N. A. n. ájma 'track', ádma 'food', éma 'course', kárma 'deed', kárṣma 'goal', kṣádma 'carving knife', cárma 'skin', jánima 'birth', jánma 'birth', tikma 'young blade of corn', dấma 'cord', dhárma 'ordinance', dháma 'abode', nấma 'name', pátma 'flight', bráhma 'prayer', bhásma (TS. VS. XII. 35) 'ashes', bháma 'earth', mánma 'thought', márma 'vital part', yắma 'course', lòma (TS. VS. XIX. 92) 'hair', vártma 'path' (Kh. v. 2¹), várma 'mail', vásma 'garment', véma (VS. XIX. 83) 'loom', vésma 'house', ryòma 'sky', sákma 'power', sárma 'refuge', sádma 'seat', sáma 'chant', sáma 'wealth', stháma 'station', syáma 'strong', svádma 'sweetness', hóma 'oblation'. — With final vowel lengthened in the Saṃhitā text: kármā, jánimā, dhámā (AV.), bhámā, vyòmā, su-stárīmā ² (TS. v. 1. 11²) 'forming an excellent couch', svádmā 's.

A. m. ásmānam, a-sremáṇam, ātmánam, ūṣmáṇam (AV.) 'heat', ojmánam 'power', ománam 'favour', klómānam (VS.xix.85) 'right lung', jarimáṇam, tuvibrahmāṇam 'praying much', darmáṇam, dāmánam 'gift', dur-mánmānam, dyutádyāmānam, dvi-jánmānam, dharmáṇam, páka-sthāmānam, pāpmánam (VS.xii.99; TS. i. 4. 41¹), puru-tmánam 'existing variously', puru-ṇāmānam (AV.) 'having many names', brahmáṇam, bhūmánam, mahimánam, reṣmáṇam (VS.xxv.2), varimáṇam, varṣmáṇam 'height', viśvá-karmāṇam, vi-sarmáṇam 'dispersion', śatátmānam, satyá-dharmāṇam, sadmánam 'sitter', sahá-sāmānam 'accompanied by songs', su-tármāṇam (TS. i. 2. 2²) 'crossing well', su-dyótmānam, su-bráhmāṇam, su-śármāṇam, sománam 'preparer of Soma', stāmánam (AV. v. 13⁵) 'track' (?), svādmáṇam 'sweetness', harimáṇam 'jaundice'. — With short a: aryamáṇam, tmánam 'breath'.

I. m. áśmanā, ātmánā (VS. XXXII. II), ūṣmáṇā (VS. XXV. 9), tmánā, pāpmánā (VS. XIX. II), bhásmanā 'chewing', majmánā 'greatness', varṣmáṇā, viśvá-karmaṇā. — I. ománā, pravád-yāmanā 'having a precipitous course', bhūmánā 'abundance', śatá-yāmanā (AV. SV.) 'having a hundred paths'. — 2. aryamṇā (AV.), pāmnā (AV.) 'scab', bhūmnā (VS. III. 5), mahimnā, varimṇā (VS. AV.), śatá-yāmnā. — 3. prathinā 5, preṇā 'love', bhūnā 1, mahinā 'variṇā (TS.)9'; drāghmā, raśmā 'o. — n. kármaṇā, jánmanā, dhármaṇā 'ordinance', pátmanā, bráhmaṇā, bhásmanā (VS. VI. 21) 'ashes', mánmanā, vármaṇā, vidmánā 'wisdom', vi-dharmaṇā 'extension', śákmanā, śármaṇā, śākmanā 'might', svá-janmanā 'self-begotten', hánmanā 'stroke'. — 1. bhúmanā 'earth', syāmanā, hemánā 'zeal'. — 2. dámnā (AV.) 'tie', dhāmnā, nāmnā, lýmnā (AV.) 'hair', sāmnā, sutrāmṇā (VS. XX. 35) 'protecting well'.

D. m. 1. ātmáne (VS. VII. 28), takmáne (AV.) a kind of disease, tmáne, pāpmáne (AV. VS.), brahmáne, bhúri-karmane 'doing much', viśvá-karmane (TS. VS. VIII. 45). — 2. aryamué, jarimué, bhūmné (VS. XXX. 13) 'plenty', mahimné; án-usra-yāmne 'not going out during daylight', usrá-yāmne, su-trámne (VS. X. 31), su-sámne N. of a man ('having beautiful songs'), suhávītu-nāmne 'whose name is to be invoked successfully'. — n. kár-

is su-dhárma (VS. XXXVIII. 14) well supporting' seems to be meant for a V. (wrong accent), but perhaps su-dhármā should be

<sup>2</sup> sustárīma in the Pada text.

<sup>3</sup> See LANMAN 5311.

<sup>4</sup> Once also the transfer form varimátā, according to the declension in -mant.

<sup>5</sup> For prathimná from prathimán-.

<sup>6</sup> For premņā from premán-.

<sup>7</sup> For bhūmná beside bhūmánā.

<sup>8</sup> mahiná occurs 35 times, mahinná only

<sup>9</sup> Beside varimná (AV.). The TS. twice has variná, which in the corresponding passages of the VS. is replaced by varimná; cp. LANMAN

mane, jánmane, dhármane, bráhmane, bhármane 'support', vidmáne, ví-dharmane, sármane. — I. trámane 'protection', dámane. — 2. dhámne, sámne 'acquisition'.

Ab. m. ásmanas, ātmánas, ūsmánas (VS.vi. 18), satyá-dharmanas (AV.). — 2. klomnás (AV.), jarimnás (AV.), varimnás (AV.). — n. cármanas, jánmanas, dhármanas, mánmanas, vásmanas 'nest', sádmanas.— 1. bhúmanas. — 2. dámnas, dhámnas (VS. VI. 22) I, lómnas.

G. m. a-mármanas 'having no vital spot', brahmánas, ví-patmanas 'speeding away', vipra-manmanas 'having an inspired mind', suci-janmanas of radiant birth', su-śármanas, viśvá-karmanas (VS. XXXI. 17). — 1. mahimánas. — 2. aryamnás, jarimnás (AV.), mahimnás, sthirá-dhāmnas (AV.) 'belonging to a strong race'. - n. kármanas, jánmanas, dhármanas, bráhmanas, mánmanas, vármanas. -1. dāmanas, bhīmanas, vāmanas, vyòmanas. — 2. dhāmnas, sāmnas.

L.m. I. ásmani, ātmáni, tmáni, brahmáni, mahmáni (AV.) 'greatness', susāmani. — 2. ásman, tmán, ātmán (VS. AV.). — n. 1. ájmani (AV.), kármani, cármani (AV.), jánmani, dámani, dīrghá-prasadmani 'affording an extensive abode', dhárīmani 'established usage', dhármani, dhámani, párīmani 'abundance', prá-bharmani 'presenting', prá-yāmani 'setting out', bráhmani, mánmani, mármani, yámani, láksmani (TS. VII. 4. 192) 'mark', vákmani 'invocation', vídharmani, vésmani (AV.), vyòmani, sármani, sárīmani 'current of air', sávīmani 'impulsion', su-sāmáni, stárīmani 'strewing', hávīmani' invocation', hómani 'offering' and 'invocation'. — With syncope: lómni (AV.), vi-jámni (AV.) 'knuckle' (?), sthámni (AV.). — 2. ájman, á-yāman 'no expedition', éman (VS.TS.), ódman (TS. VS.) 'flooding', kárman, kársman, cárman, jániman, jánman, dárīman 'destruction', dhárman, dháman, pátman, bráhman, bhásman (VS. TS.) 'consuming', bhárman 'table', mánman, márman, yáman, váriman, várīman 'width, vársman, vi-jáman 'related to each other', ví-dharman, vyòman, sárman, sásman 'song of praise', sákman 'attendance', sádman, sáman, svádman, hávīman.

V. m. aryaman, ásman (TS.IV. 6. 1 <sup>1</sup>), ásu-heman (TS.I. 7. 7 <sup>2</sup>),takman (AV.), tri-nāman (TS. AV.) 'three-named', pāpman (AV.), puru-nāman, puru-hanman N. of a seer, brahman, vi-dharman, viśva-karman, viśva-sāman N. of a seer, vṛṣa-karman 'doing manly deeds', satya-karman 'whose actions are true', sahasra-dhāman (AV.) 'having thousandfold splendour', su-dāman 'giving good

gifts', su-yāman (AV.), sva-dharman 'abiding in one's own customs'.

Du. N. A. V. m. brahmánā, satya-dharmānā, sa-nāmānā 'of the same kind', su-śármānā; aryamánā, jémanā 'victorious', sámātmanā (Kh. III. 225; cp. TB. II. 8. 91) 'endowed with chants', su-kármanā (VS. XX. 75).

N. A. n. śármanī, jánmanī, sádmanī. — 1. dhámanī, sámanī (VS. x. 14).

- 2. námnī (AV.). - G. n. sádmanos. - L. m. ásmanos.

Pl. N. V. a-dāmānas 'unbound' and 'not giving gifts', a-dhvasmānas 'undarkened', ánu-vartmānas (VS. xvII. 86) 'followers', á-brahmānas, a-rasmánas 'having no reins', 'bha-brahmāṇas 'conveying sacred knowledge', jarimāṇas, brahmānas (VS. XXVII. 2), bhrājaj-janmānas 'having a brilliant birthplace', mahimānas, súici-janmānas, sátya-dharmānas, sá-lakṣmāṇas (TS.I.3.101) having the same marks', su-kármāṇas, su-jánimānas, su-rámānas (VS. XXI. 42) 'very delightful', su śármānas, sthá-raśmānas 'having firm reins', svādmánas. — With short a: aryamánas, mahātmánas (Kh. III. 122) 'high-minded'.

N. A. n. 1. rk-sāmāni (VS. XVIII. 43), karmāni, carmāni, janimāni, janmāni, dāmāni (AV.), dhármāṇi, dhấmāni, nấmāni, pákṣmāṇi (VS. XIX. 89) 'eyelashes', bráhmāṇi, mánmāni, mármāṇi, rómāṇi 'hair', L'māni (AV.), vártmāni, vármāṇi (AV.), śármāni, sádmāni, sấmāni. — 2. kárma², jánima, jánma, dhárma,

<sup>\*</sup> BR. and EGGELING suggest that this is short final a in the Pada as well as the a corruption for damnas 'bond'. Samhitā text.

<sup>&</sup>lt;sup>2</sup> This and the following forms have Indo-arische Philologie. I. 4.

dháma, nắma, bráhma, bhúma, mánma, róma<sup>1</sup>, sárma, sádma. — 3. jánima<sup>2</sup>, dhárma, nắma, bráhma, bhúma, róma, sádma<sup>3</sup>.

A. m. ásmanas, takmánas (AV.), brahmánas. — 2. dur-námnas (AV.).

I. m. á-khidra-yāmabhis 'unwearied in course', a-dhvasmábhis, áśmabhis, áśma-hanmabhis 'strokes of the thunderbolt', āśu-hémabhis, ómabhis, klómabhis (VS. XXV. 8), brahmábhis, mayára-romabhis 'peacock-haired', vīļu-pátmabhis 'flying strongly', su-kármabhis, su-mánmabhis, su-śármabhis. — n. ájmabhis, émabhis, kármabhis, tókmabhis (VS. XIX. 81), trámabhis, dhármabhis, dhámabhis, námabhis, pátmabhis, bráhmabhis, bhárīmabhis 'nourishment', mánmabhis, yámabhis, várīmabhis, vája-karmabhis+ (SV. TS. III. 2. II¹) 'active in war', vája-bharmabhis (VIII. 19³°) 'bringing reward', ví-gāmabhis 'strides', śákmabhis, sámabhis, hávīmabhis.

D. m. brahmábhyas. — n. dhámabhyas. — Ab. n. lómabhyas.

G. m. brahmáṇām. — 2. dur-ṇāmnām (AV.). — n. dhármaṇām, bráhmaṇām, mánmanām, mármaṇām (Kh.I.5<sup>5</sup>). — 2. áhi-nāmnām<sup>5</sup> 'animals named snake', sámnām (AV.).

L. m. ásmasu (AV.). — n. kármasu, jánmasu, dhámasu, vármasu, sádmasu.

# 3. Stems in -van.

330. The -van stems are by far the most numerous of the three groups. They are chiefly verbal adjectives and are almost exclusively declined in the masculine. Hardly a dozen of them make neuter forms, and only five or six forms are used as feminines.

a. The few feminine forms are cases of adjectives agreeing with f. substantives. They are: sing. N. sa-yúgvā (X. 1304) 'companion' (gāyatrī), an-arvā (II. 406) 'irresistible (áditis); A. an-arvánam (x. 92<sup>14</sup>) 'irresistible' (ádıtım); du. N. sam-sthāvānā (VIII. 374) 'standing together' (ródasī); pl. I. indhan-vabhiso (II. 34<sup>5</sup>) 'flaming' (dhenúbhis); G. sahasra-dávnām (I. 17<sup>5</sup>) 'giving a thousand gifts' (sumatīnām). The f. of these stems is otherwise formed with -i, which is however never added to -van, but regularly to a collateral suffix -vara 1. Twenty-five such stems in -varī are found in the RV. and several additional ones in the later Samhitās. It is perhaps most convenient to enumerate them here: agrétvarī-8 (AV.) 'going in front', abhi-krtvari- 'bewitching' (AV.), abhi-bhivari- 'superior', abhitvari-9 (TS. VS.) 'attacking', uttāna-šīvarī- (AV.) 'lying extended', rtāvarī- 'regular', eva-yāvarī- 'going quickly', krtvari- (AV.) 'bewitcher', talpa-sivari- 'lying on a couch', nis-sidhvari- 'bestowing', pivarī- 'fat', pūrva-jāvarī- 'born before', pra-sūvarī- 'furnished with flowers', bahu-sūvarī-'bearing many children', bhūrī-davarī- 'munificent', mātari-bhvarī- 10 'being with her mother', mātari švarī- i (AV.) mother-growing', yújvarī- 'worshipping', vákvarī- 'rolling', vahya-stvarī-(AV.) 'reclining on a couch', vi-bhavarī- 'brilliant', vi-mṛgvarī- (AV.) 'cleansing', śákvarī-('powerful') a kind of metre, śarvarī-12 '(star-spangled) night', śrustīvarī- 'obedient', śvetayavarī 'white-flowing', sam sisvarī 13 'having a calf in common', sa-jitvarī 'victorious', sa-yāvarī- 'accompanying', sumnāvárī- 'gracious', sūnṛtāvarī-14 'glorious', sṛtvarī- 'streaming', svadhavarī- 'constant'.

1 Perhaps singular.

<sup>2</sup> The Pada text has always  $\check{a}$  in this and 'fire-priest', is quite exceptional.

the following forms.

3 This lengthening is found in neither -an stems nor -an stems, except áhā and sūrṣā, which may be formed from transfer stems and in which the Pada as well as the Samhitā text has the long vowel.

4 vāja-karmabhis is a v.l. of vāja-bharmabhis, and both adjectives as agreeing with ūtibhis

have the value of feminines.

5 The G. chando-nāmānām (VS. IV. 24) 'named metre' seems to be a transfer to the a-declension.

6 Formed from indhana- 'fuel', with loss of the final vowel.

8 That is, agra-i-t-vari-.

9 That is, abhi-i-t-varī-.

10 From what only seems to be a -van stem which is really =  $-bh\bar{u}$ -an-.

v. 29 of *mātaribhvarī*- in the corresponding passage of the RV.

12 The f. of śarvara- 'variegated' occurring in api-śarvará- n. 'early morning'; a stem śár-van- does not occur.

13 The f. of what only seems to be a stem in -van but is really = sisu-an.

14 Also sünrtávatī.

<sup>7</sup> The f. atharvi-, formed from atharvan-

b. In the strong cases there is one instance in which the a remains short: anarvánam 1 (X. 9214), and two others in which the weakest stem is used: A. sing. maghónam (VS. XXVIII. 9) instead of maghávānam, N. pl. maghónas (VI. 4412) instead of maghávānas2. In the weak cases when the suffix is preceded by a vowel, the a is always syncopated in the Samhitā text except in the forms dāváne, vasuváne (VS.), and rtávani, but it may have to be restored in one or two instances 3.

c. The three words fk-van- 'singing', maghá-van- 'bountiful', sahá-van- 'powerful' make a few forms from supplementary stems in -vant: I. sing. fkvatā; pl. I. maghávadbhis, D. maghávadbhyas, L. maghávatsu; N. sing. saháván and sáhāvān. Beside dadhi-

krávan-, N. of a mythical horse, also occurs the stem dadhi-krá-.

d. Eight or nine words in -van show transitions to the a-declension by extending the stem with -a or, more commonly, by dropping the n. Thus satvaná-m and satvanás occur beside the numerous regular forms from sátvan- 'brave'. The N. sing. m. anarván-a-s (V. 5111, VIII. 3112) may have started from the A. anarván-am (X. 9214), while the n. anarvá-m (1.1642) may have been due to the f. (áditir) anarvá which appears like the f. of the a- declension. Other transitional forms are rkvá-s beside rkvan-; rthva-m 'dexterous' beside j'bhvan-; takvá-s 'swift' beside tákvan-; vákvās. N. pl., 'rolling' beside vákvan-; vibháva-m 'brilliant' beside vibhávan-; šikvá-s (AV.) 'skilful' beside šíkvan-.

#### Inflexion.

331. The normal forms occurring, if made from grávan- 'pressing stone' in the m. and from dhánvan- 'bow' in the n., would be:

Sing. m. N. grávā. A. grávānam. I. grávna. D. grávne. Ab. grávnas. G. grávnas. L. grávani and grávan. V. grávan. — Du. N. A. V. grávana and grávāņau. I. grávabhyām (AV.). G. grávnos. — Pi. N. V. grávānas. A. grāvņas. I. grāvabhis. D. grāvabhyas. G. grāvņām. L. grāvasu.

Sing. n. N. A. dhánva and dhánvā. I. dhánvanā. D. dhánvane. Ab. G. dhánvanas. L. dhánvani and dhánvan. — Pl. N. A. dhánvāni, dhánva, dhánvā (AV.). I. dhánvabhis. D. dhánvabhyas (VS.). Ab. dhánvabhyas (AV.). G. dhánvanām (AV.). L. dhánvasu.

Forms actually occurring are the following:

Sing. N. m. agra-yávā 'going in front', átharvā 'fire-priest', adma-sádvā 'companion at a meal', ádhvā 'road', an-arvā+ 'irresistible', abhi-yilgvā (VS. XVII. 86) 'attacking', abhisasti-pávā 'protecting from curses', abhi-satvā 'surrounded by heroes', abhyardha-yájvā 'receiving sacrifices apart', amatīvá 'suffering want', arātīvā 'hostile', á-rāvī 'not giving', 'hostile', árvā 'steed', ávatata-dhanvā (VS. III. 61) 'whose bow is unbent', āśu-pátvā 'flying swiftly', ugrá-dhanvā 'having a mighty bow', fkvā 'praising', fghāvā 'impetuous', rnayāvā 'pursuing guilt', rnāvā 'guilty', rtāvā 'pious', rbhvā 'dexterous', krsnādhvā 'having a black track' (adhvā), kratu-prāvā 'granting power', kṣiprádhanvā 'having an elastic bow', grāvā 'pressing stone', tákvā 'bird of prey', dadhi-krāvā N. of a divine horse, deva-yāvā 'going to the gods', dru-sádvā 'sitting on the wood', nr-sádvā 'sitting among men', pátharvā N. of a man, pátvā 'flying', puru-krtvā 'doing much', pūrva-gátvā 'leader', pūrva-yāvā 'leader', pra-tákvā (VS. v. 32) 'steep', pra-rikvā 'extending beyond', prāna-dávā 5 (AV.) 'breath-giving', prātar-itvā 'coming in the morning', bādha-sitvā 'striding mightily', bṛhád-grāvā (VS. I. 15) 'like a great stone', bhūri-davā 'giving much', maghávā6 'bountiful', mádvā 'exhilarating', mrakṣa-kṛtvā 'rubbing to pieces', yájvā 'sacrificer', yāvā 'aggressor', yuktá-grāvā 'having yoked the pressing stones', yúdhvā 'warlike', raghu-pátvā 'flying swiftly', rárāvā 'giving abundantly', rāvā (VS. vi. 30) 'giving', vākvā 'rolling', vasu-dāvā 'giving goods',

This seems to be a metrical shortening; 4 an-arván-a-s is a transition to the aaccording to GRASSMANN it is an A. of a declension. 5 Emendation for prana-davan in AV. transfer stem an-arvána-.

<sup>&</sup>lt;sup>2</sup> The form kitvanas in AV. XIX. 35<sup>5</sup> as IV. 35<sup>5</sup>.

D. m. átharvabhyas, grávabhyas, gharma-pávabhyas (VS. XXXVIII. 15) 'drinking hot (milk)' 5. — n. snávabhyas (VS. XXXIX. 10). — Ab. n. snávabhyas (AV.).

G. m. 1. ádhvanām (VS.v. 33), an-arvánām, á-yajvanām, sátvanām. — 2. grávnām, rárāvnām, vāja-dávnā $m^6$ , soma-pávnām; magh $\int$ nām. — n. 1. dhánvanām (AV.).

L. m. ádhvasu, kŕtvasu, grávasu (Kh. 1.123)7, yájvasu8. — n. dhánvasu, párvasu.

## Stems in -in, -min, -vin.

332. The suffixes -in, -min, -vin, which have the sense of 'possessing', are used to form secondary adjectives. The stems in -in are very common, those in -vin are fairly frequent, numbering nearly twenty, but there is only one in -min: rg-min- 'praising'. They are declined in the m. and n. only9; but the neuter forms are very rare, amounting to fewer than a dozen altogether. The inflexion presents hardly any irregularities. The vowel of the suffix remains accented throughout 10, and is not liable either to syncope or to lengthening in the G. pl. It is lengthened in the N. sing. m. only 11. As in all derivative stems ending in -n, the nasal disappears in the N. sing. m. n. and before terminations beginning with consonants.

a. There are a few transition forms to the a-declension starting from the A. sing. m. in -in-am understood as -ina-m. Such are paramesth ina-m (AV. XIX. 94) 'most exalted', N. sing. n.; the V. mahin-a and the G. mahina-sya from mahin- 'mighty', and

From the intensive of Vvan-.

3 In Pada as well as Samhitā.

4 Also the supplementary form maghávad-

5 Also the supplementary form maghávad-

6 The form sahasra-davnam is read as a

7 Accented grāvásu in the edition.

8 There is also the transfer form maghávatsu.

9 They form a special f. stem by adding <sup>2</sup> The form kytvano in AV. XIX. 355 is a -ī; e. g. from akv-in- possessing horses' aśvin-ī-.

10 Except irin-, sakin-, sarin-, and the compounds kárū-latin-, mahā-vatūrin-, indramedin, from each of which a single form occurs; also the compounds formed with the negative a-; e. g. á-nāmin-.

II It would doubtless be lengthened in the N. A. n. pl. also if that form occurred.

conjecture for the kṛṣṇavo of the Mss.

the n. pl. vaninā-ni (x. 669,x from van-in- m. forest-tree'. The isolated form mandi-m (I. 92) is a transition to the i-declension, starting probably from the I. sing. mandin-a 'exhilarating' understood as mandi-nā.

### Inflexion.

333. All the case-forms are represented in the m., but in the n. the three singular case-forms, N. A., I., and G. only. As only eight or nine n.

forms occur, they may most conveniently be enumerated separately:

Sing. n. N. á-nāmi 'unbending', ubhayā-hasti 'filling both hands', tsāri (AV.) 'hidden', patatri 'winged', vāji 'vigorous' (Kh. IV. 62), śakalyesi (AV.) 'seeking shavings'2. I. kīrinā 'praising', su-gandhinī3 'fragrant'. G. prahosinas 'offering oblations' 4.

The m. forms actually occurring, if made from hast-in- 'having hands',

would be as follows:

Sing. N. hastí. A. hastínam. I. hastínā. D. hastíne. Ab. hastínas. G. hastinas. L. hastini. V. hástin. — Du. N. A. hastinī and hastinau. I. D. hastibhyām. G. L. hastinos. — Pl. N. hastinas. A. hastinas. I. hastibhis. D. hastibhyas (VS. AV.). G. hastinām. L. hastisu.

a. The forms actually occurring are:

Sing. N. 1. Stems in -in: anki 'possessing a hook', ati-ryādhi (VS. XXII. 22) 'wounding', abhyā-vartí 'coming near', arthí 'active', asví 'possessed of horses', irī5 'powerful', uj-jeṣt (VS. XVII. 85) N. of one of the Maruts, udri 'abounding in water', rjīpi 'moving upwards', rjīṣi 'receiving the residue of Soma', ekīki (VS. TS.) 'solitary', kapardi 'wearing braided hair', karū-latī6 'having decayed teeth', kāmī 'desirous', kulīyī (TS. IV. 1.96) 'forming a nest', kevalādi 'eating by oneself alone', keśi 'having long hair', krīḍi (VS. XVII. 85) 'sporting', grha-medhi (VS. xvII. 85) 'performing the domestic sacrifices', candri (VS. xx. 37) 'golden', tsārī 'hidden', dyumnī 'majestic', nis-sapī 'lustful', pakthī 'cooking the oblation', patatrí (TS.1.7.72) 'winged', parame-sthí (VS.VIII.54) 'most exalted', pari-panthi 'waylayer', prsty-āmayi 'suffering from a pain in the side', pra-ghāsi (VS.xvII.85) 'voracious', pra-bhangi 'destroying', pra-vepani 'causing to tremble', bāhu-śardhí 'relying on his arms', brahma-cārí 'practising devotion', brahmavarcast (VS. XXII. 22) 'eminent in sacred knowledge', bhadra-vādi 'uttering auspicious cries', manīṣi 'thoughtful', manthi (VS. VII. 18) 'stirred Soma juice', mandi 'exhilarating', marāyi 'destructive' (?), mahā-hasti 'having large hands', māyi 'crafty', medi 'ally', rathi 'possessing a car', rambhi 'carrying a crutch', rukmí 'adorned with gold', vajrí 'armed with a bolt', varmí 'mailed', vasí 'having power', vājí 'vigorous', vi-rapsí 'copious', sata-sví 'having a hundred possessions', sakí i 'strong', sipri 'full-cheeked', susmi 'roaring', sloki 'sounding', śvaghni 'gambler', sodaśi (VS. TS.) 'having sixteen parts', sárī5 'hastening', sahasri 'thousandfold', sāci 'companion', somi 'offering Soma', svabdi 'bellowing', hasti 'having hands'. — 2. stem in -min: rgmi 'praising'. — 3. stems in -vin: á-dvayāvī 'free from duplicity', á-yudhvī8 'not fighting', aṣṭrāvī 'obeying the goad', tarasvī (VS. XIX. 88) 'bold'.

A. I. atrinam 'devourer', adhi-kalpinam (VS. XXX. 18) 'gamble-manager',

á-yud-dhvī 'without fighting'.

Instead of vanin-as, probably due to the metre.

<sup>&</sup>lt;sup>2</sup> The Pada text reads sakalya-esi; but the Paippalada recension has the better reading sākalyeşu 'among the shavings': see WHITNEY's note on AV. I. 252.

<sup>3</sup> But this form might be from su-gandhi-.

<sup>4</sup> The isolated form krudhmi (VII. 568) agreeing with mánāmsi is a N. pl. n. of a stem krudh-mi-, rather than of krudh-min- 'angry'.

<sup>5</sup> With abnormal accent.

<sup>6</sup> Accented like a Bahuvrihi.

<sup>7</sup> Thus accented VS. XVII. 85, but śākī RV. 1. 518: the latter is probably an error as the suffix is accented in the three other forms śākinam, śākine, śākinas.

<sup>8</sup> Böhtlingk (pw.) regards this as a gerund:

abhi-prasnínam (VS. XXX. 10) 'inquisitive', abhi-mātinam 'insidious', arkinam 'praising', ava-krakşınam 'rushing down', á-vājinam 'a bad horse', asvinam, ādāriņam 'breaking open', āyinam (TS. II. 4. 71) 'hurrying up', isminam 'speeding', uktha-samsinam 'uttering verses', ukthinam 'praising', udrinam, rjīsinam<sup>1</sup>, kapardinam, karambhinam 'possessing gruel', kalpinam (VS. XXX. 18) 'designing', kalmalīkinam 'flaming', kāminam, kārinam 'singing', kulāyinam, kūcid-arthinam 'striving to get anywhere', catinam 'lurking', jana-vādinam (VS. XXX. 17) 'prattler', tri-sthinam (VS. XXX. 14) 'having a threefold footing', dyumninam, dhaninam 'wealthy', ni-yayinam' 'passing over', paksinam 'winged', patatrinam (VS.XIX. 10), pari-panthinam, pītha-sarpinam (VS. XXX. 21) 'cripple', putrinam 'possessing sons', purīsinam 'possessing land', pra-vādinam (VS. XXX. 13) 'speaking pleasantly', prasninam (VS. XXX. 10) 'questioner', bahu-vādinam (VS. xxx. 19) 'talkative', manīsinam, manthinam, mandinam3, manyu-ṣāviṇam 'pressing Soma with zeal', māyinam, medinam (TS. IV. 7. 104), rathinam, vamsa-nartinam (VS. XXX. 21) 'pole-dancer', vajrinam, vaninam 'bountiful', vaninam 'forest tree', vayakinam 'ramifying', varcinam N. of a demon, vājinam, vi-rapšinam, vi-stīminam (VS. XXIII. 29) 'wetting', śatagvinam 'hundredfold', śatinam 'hundredfold', śākinam, śusmiņam, śrngiņam 'horned', śvaninam (VS. xxx. 7) 'keeping dogs', sahasra-posinam 'thriving a thousandfold', sahasrinam. — 3. á-dvayāvinam, ubhayāvinam 'partaking of both', tarasvinam, namasvinam 'reverential', māyāvinam 'employing deceit', medhāvinam (VS. XXXII. 14) 'possessed of wisdom', rakṣasvinam 'demoniacal'.

I. r. arcinā 'shining', aśvinā, kimīdinā 'evil spirit', kīrinā 'praising' 4, balinā (TS. III. 3. 8²) 'strong', mandinā, mahā-vaṭūrinā 'very wide', vaṭūrinā 'wide',

vājinā. — 3. rakṣasvinā.

D. I. abhyā-vartine, a-mitrine 'hostile', ava-bhedine (VS. XVI. 34) 'splitting', ā-tatāyine (VS. XVI. 18) 'having one's bow drawn', ā-yudhine (VS. XVI. 36) 'warrior', upa-vītine (VS. XVI. 17) 'wearing the sacred cord', uṣṇīṣiṇe (VS. XVI. 22) 'wearing a turban', kapardine, kavacine (VS. XVI. 35) 'mailed', kāriṇe, kimīdine, tantrāyine (VS. XXXVIII. 12) 'drawing out rays', ni-vyādhine (VS. XVI. 20) 'piercing', ni-ṣaṇgiṇe (VS. XVI. 20) 'sword-bearer', pra-sakṣiṇe 'victorious', bilmine (VS. XVI. 35) 'having a helmet', bhāmine 'angry', manīṣiṇe, mantrine (VS. XVI. 19) 'wise', mandine, mahine 'mighty', rathine, vajriṇe, varūthine (VS. XVI. 35) 'wearing armour', varmiṇe (VS.), vi-naṇṣine (VS. IX. 20) 'vanishing', vi-rapṣine, vy-aṣnuv-ine' (VS. XII. 32) a genius of food, vyādhine (VS. XVI. 18) 'piercer', ṣākine, ṣipriṇe, ṣuṣmiṇe, ṣoḍaṣine (VS. VIII. 33), sv-āyudhine (VS. XVI. 36) 'having good weapons'.— 3. rakṣasvine.

Ab. 1. abhi-prabhanginas 'breaking completely', patatrinas, manthinas (TS.

VS. XIII. 57), sominas.

G. I. arthinas, rjīṣiṇas, kapardinas (TS. VS. XVI. 10), dhaninas, patatrinas (TS. IV. 7. 13¹), parninas 'winged', pra-gardhinas 'pressing onwards', bhūri-poṣiṇas 'much-nourishing', manthinas (VS. VII. 18), mandinas, māyinas, ratninas 'possessing gifts', rasinas 'juicy', retinas¹ 'abounding in seed', vajrinas, vaninas 'bountiful', vaninas 'forest tree', varcinas, vājinas, vi-rapśinas, vīļu-harṣiṇas

5 Accented like Bahuvrīhi; but cp. p. 154<sup>5</sup>.

r rjīṣám in 1. 326 is possibly a metrically shortened form for rjīṣiṇam: cp. Lanman 5432.

<sup>&</sup>lt;sup>2</sup> As this compound occurs only once beside the simple adj. yayi-, which occurs several times, the former is perhaps a transfer from the i-declension.

<sup>3</sup> mandi-m (I. 92) is probably a transition form; but BR. regard it as a contraction in pronunciation of mandinam.

<sup>4</sup> Grassmann in I. 1009 proposes to read kīriņe.

<sup>6</sup> Formed from the present stem of Vas-: vi-as-nuv-in-.

<sup>7</sup> From réta- for rétas- 'seed'.

'refractory', vrandinas 'becoming soft', śatinas, śuṣminas, śringinas, sahasrinas, sominas. — 3. á-dvayāvinas, dvayāvinas 'double-dealing', namasvinas.

L. I. dvīpini (AV.) 'leopard', parame-sthini (AV.), brahma-cārini (AV.),

māyini, vājini, somini.

V. 1. ánā-bhayin fearless', abhyā-vartin (VS. XII. 7), amatrin having a large drinking vessel', rjīpin, rjīṣin, tuvi-kūrmin working powerfully', pra-pathin froaming on distant paths', yakṣin 'living', vajrin, vājin, virapśin, śavasin mighty', śiprin, śusmin, sahasin mighty'.— 3. ubhayāvin.

Du. N. A. V. 1. aśvinā, V. aśvinā and áśvinā, kumārinā 'having children', keśinā, V. pajra-hosinā 'having rich oblations', parninā, putrinā, purīsinā, prasaksinā, manthinā, V. māyinā, vajrinā, vājinā, V. vājinā, vi-ghaninā 'slaying', susminā, sarathinā (VS. XXIX. 7; TS.) 'driving in the same car', sāma-cārinā (Kh. III. 225) 'faring with chants'. — 3. māyāvinā. — Forms with -au': aśvinau, V. áśvinau and aśvinau, patatrinau (VS. XVIII. 52), vājinau.

I. aśvibhyām, indra-medibhyām (AV.) 'whose ally is Indra'. — D. aśvi-

bhyām. — G. aśvinos. — L. aśvinos.

- Pl. N. V. I. ankusinas 'having a hook', atrinas, arkinas, arcinas, arthinas, avarokinas (VS. XXIV. 6) 'brilliant', isminas, ukthinas, upa-mantrinas 'persuading', rjīsinas, kapardinas, kabandhinas 'bearing casks', kāminas, kārinas, kīrinas, kīrinas, kršaninas 'adorned with pearls', kešinas, khādinas 'adorned with rings', ganinas (TS. I. 4. II') 'having attendants', gāthinas 'singers', gāyatrinas 'singers of hymns', gharminas 'preparing the Gharma offering', daśagvinas 'tenfold', drapsinas 'falling in drops', dhūminas 'smoking', ni-kārinas (TS. VS. XXVII. 4) 'injurers', ni-todinas 'piercing', ni-rāminas 'lurking', ni-sanginas, paksinas, patatrinas, pari-panthinas, pari-parinas (VS. IV. 34) 'adversaries', parninas, pāśinas 'laying snares', purīṣinas, pra-krūdinas 'sporting', pra-saksinas, balinas, manīṣinas, mandinas, mahinas, māyinas, redinas, rathinas, vaninas 'bountiful', vaninas 'forest trees', varminas, vājinas, vi-rapšinas, vi-rokinas 'brilliant', viṣāṇinas 'holding horns' (a people), vrata-cārinas 'performing vows', satagvinas, satinas, sākinas, sūṣminas, sahasrinas, sominas, svāninas 'resounding', hastinas, hiraṇinas 'golden'.— 2. rgminas.— 3. tarasvinas, dvayāvinas, dhṛṣadvinas 'bold', namasvinas, māyāvinas.
- A. I. atriņas, a-rājinas 'lacking splendour', arthinas, aśvinas, uktha-'aṃsinas, kāminas, kāriṇas, grathinas 'false', dyumninas, pakṣiṇas, pra-ghāsinas (VS. III. 44), bhāminas, mandinas, māyinas, mitriņas 'befriended', rathinas, vaninas 'bountiful', vaninas 'forest trees', vājinas, vrandinas, sahasriṇas, sominas, hastinas (VS. XXIV. 29), hiraṇinas.— 3. rakṣasvinas.

I. I. aśvibhis, keśibhis, ni-sangibhis, patatribhis, manīsibhis, mandibhis, rukmibhis, vājibhis, śusmibhis, hastibhis.— 2. rgmibhis.

- D. 1. rta-vādibhyas (VS. v. 7) 'speaking the truth', krīdibhyas (VS. xxiv. 16), grha-medhibhyas (VS. xxiv. 16), dhanvāyibhyas (VS. xvi. 22) 'carrying a bow', rathibhyas (VS. xvi. 26), sikhibhyas (AV.) 'peaked', śvanibhyas (VS. xvi. 27), srkāyibhyas (VS. xvi. 21) 'having a spear', svadhāyibhyas (VS. xix. 36) 'owning the Svadhā'.
- G. i. kārinām, māyinām, vasinām (AV.), vājinām, śringinām. 3. stukāvinām 'shaggy'. L. i. khādisu, dvarisu 'obstructing', hastisu (AV.).

## 4. Labial Stems.

# a. Stems in (radical) -p.

334. These stems are inflected alike in the masculine and feminine, there being no neuters. All the monosyllables are feminine substantives.

x According to Lanman 544 the  $-\bar{a}$  forms occur 369 times, the -au forms 32 times.

They are: dp- 'water', kfp- 'beauty', ksdp- 'night', ksip- 'finger', rlp- 'deceit', rlp- 'earth', vlp- 'rod'. Feminine are also the compounds  $\bar{a}$ -tdp- 'heating', pati-rlp- 'deceiving a husband', vi-stdp- 'summit', rta-sdp- 'performing worship'. All other compound stems are masculine. They are: agni-tdp- 'enjoying the warmth of fire',  $abh\bar{v}$ - $l\bar{a}pa$ -ldp

a. The distinction of strong and weak forms appears in dp- and its compound  $rIU \cdot dp$ -, as well as in the two compounds of sat- 'serve',  $rta \cdot sdp$ - and  $keta \cdot sdp$ -. The strong form dpas is used a few times in the A. pl., but the long vowel in  $pari \cdot rdpas$  as A. pl. is due to the metre; on the other hand, the weak form  $ap \cdot ds$  appears twice in the AV. as N. pl.

b. The A. pl. apás is nearly always accented on the ending as a weak case;

kṣapás similarly appears two or three times, and vipás once.

c. No N. sing. m. or f. occurs, but a n. transition form once appears in this case: vistapa-m (IX. I1310), a form which doubtless started from the A. sing. f. vistap-am. The n. pl. of the same transition stem occurs once as  $vistap\bar{a}$  (VIII. 805). Two other transition forms are  $ksap\bar{a}bhis$  and  $ksip\bar{a}bhis$ .

#### Inflexion.

335. The forms actually occurring are the following:

Sing. A. m. paśu-tṛpam. — f. vi-ṣṭápam. — I. m. vipā 'priest'. — f. apā, kṛpā, kṣapā, vipā. — Ab. f. apās; ā-tápas, vi-ṣṭápas. — G. m. vípas 5. — f. apās, kṣapās, ripās, rupās. — L. f. vi-ṣṭápi.

Du. N. m.  $r\bar{\imath}ty$ - $\dot{a}p\bar{a}$ ; asu- $t\acute{r}pau^6$ .

Pl. N. m. rta-sāpas, keta-sāpas, V. rīti-āpas; vípas; agni-tápas, abhī-lāpa-lápas (AV.), asu-típas, pra-súpas. — f. ápas, V. āpas, rta-sāpas; ksípas, vipas, rípas; pati-rípas. The A. form apás occurs twice in the AV. for the N.?.

A. m. asu-típas, pari-rápas<sup>8</sup>. — f. apás and ápas<sup>9</sup>, kṣapás and kṣápas<sup>10</sup>,

vipás and vípas 11, ripas.

I. f. adbh/s<sup>12</sup>. — D. f. adbhyás <sup>12</sup> (VS. VI. 9). — Ab. f. adbhyás <sup>12</sup>. — G. m. vipám. — f. apám <sup>13</sup>, kṣapám, vipám. — L. f. apsú <sup>14</sup>.

## b. Stems in (radical) -bh.

336. Both masculines and feminines occur in this declension, but there are no neuters. The stems comprise five monosyllables formed from roots, together with compounds of three of the latter (grabh-, subh-, stubh-), and kakibh-. The stems are: ksibh- f. 'push', gfbh- f. 'seizing', ndbh- f. 'destroyer', sibh- f. 'splendour', stibh- adj. 'praising', f. 'praise'; jīva-gfbh- m. 'capturing alive', 'bailiff', sute-gfbh- 'taking hold of the Soma', syūma-gfbh- 'seizing the

<sup>2</sup> An irregular intensive formation.

3 Cp. Kluge, KZ. 25, 311f.

4 From svap- 'sleep'.
5 With irregular accent.

6 Cp. Lanman 482 (middle).

- 7 There is also the transition form in the n. vi-stápā.
- 8 Metrical for pari-rápas, which is the reading of the Pada text in II. 233 14; see RPr. IX. 26.
- 9 apás is the regular form occurring 152 times in the RV. and 26 times in the AV. The strong form apas is used half a dozen

times in books I and X of the RV., and 16 times in the AV.; it also occurs in Kh. III. 9.

10 kṣápas 6 or 8 times in RV., kṣapás 2 or 3 times.

11 vípas thrice, vipás once in RV.

- 12 By dissimilation for \*ab·bhís, \*ab·bhyás; cp. Johansson, IF. 4, 134—146. See Lanman 483. There are also the two transfer forms kṣapābhis and kṣipābhis, each occurring once
- <sup>13</sup> On the metrical value of  $ap\acute{a}m$  see Lanman 484 (top).
- 14 BR. regard apásu in VIII. 414 as = apsú with inserted -a. See Lanman 484.

r vip- as an adjective is used as a m. also.

reins'; rathe-silbh- 'flying along in a car'; anu-stilbh- f. 'after-praise', a metre, rta-stilbh- 'praising duly', tri-stilbh- 'triple praise', a metre, pari-stilbh- 'exulting on every side', sam-stilbh- (VS.) 'shout of joy', a metre, gharma-stilbh-'shouting in the heat', chandal-stilbh- 'praising in hymns', vṛṣa-stilbh- 'calling aloud', su-stilbh- 'uttering a shrill cry'; kakibh- f. 'peak', tri-kakibh- 'threepointed'.

a. The distinction of strong and weak forms does not appear except in the N. and A. pl. of nábh. The inflexion of these stems is incompletely represented, there being no dual forms, and no plural forms the endings of

which begin with a consonant.

#### Inflexion.

337. The forms occurring are:

Sing. N. m. stúp; tri-kakúp. — f. anu-stúp (VS. AV.), anu-stúk (TS. v. 2. III, tri-stúp; kakúp (VS. AV.).

A. m. rathe-ślibham, sutc-gf-bham. — f. gf-bham, ślibham; rta-stlibham. anu-stilbham, tri-stilbham; kakilbham.

I. m. stubhá; su-ṣṭubhā. — ſ. kṣubhá, gṛbhá, subhá; anu-ṣṭubhā, tri-ṣṭubhā (VS. XVII. 34; TS. II. 2. 48); kakilbhā (VS. XXVIII. 44).

D. m. gharma-stúbhe, syūma-gŕbhe. — f. súbhe (AV. VS. XXX. 7); anustubbe (VS. XXIV. 12), tri-stubbe (VS. XXIV. 12); kakubbe (VS. XXIV. 13).

Ab. m. jīva-gŕbhas. — f. gṛbhás (VS. XXI. 43); anu-ṣṭibhas (VS. XIII. 54), tri-stubhas (AV.).

G. m. su-stúbhas. — f. śubhás i (in śubhás pátī, du. N. A. and śubhas patī, V.).

L. f. tri-stilbhi (VS. XXXVIII. 18); kakilbhi (TS. III. 3. 92; VS. XV. 4).

Pl. N. m. chandah-stilbhas, vysa-stilbhas, pari-stilbhas, su-stilbhas, f. nábhas², súbhas, stúbhas.

A. f. nábhas, stúbhas; tri-stúbhas, pari-stúbhas; kakúbhas.

G. f. kakúbhām.

#### c. Stems in -m.

338. There are only about half a dozen stems in -m which among them muster a few more than a dozen forms. All are monosyllables except a compound of nam- 'bend'. Neuters are sam- 'happiness' and perhaps dam-'house'. A possible m. is him- 'cold'; and there are four feminines: kṣám-, gám-, and jám-, all meaning 'earth', and sam-nám- (AV.) 'favour'. Strong and weak forms are distinguished in ksám-, which lengthens the vowel in the strong cases, and syncopates it in one of the two weak cases occurring; gám- and jám- are found in weak cases only, where they syncopate the vowel. The forms occurring are the following:

Sing. N. A. n. śám. — I. f. kṣamā, jmā; m. him-ā3. — Ab. f. kṣmás, gmás, jmás. – G. f. gmás, jmás4; n. dán5. – L. f. ksámi6. – Du. N. f. kṣāmā, dyāvā-kṣāmā 'heaven and earth'. — Pl. N. f. kṣāmas; saṃ-namas (AV.). — G. n. damām.

<sup>2</sup> Strong form.

6 With irregular accent; cp. above 94 a.

The form dábhas in v. 194 is regarded by BR. and GRASSMANN as N. sing. m. 'destroyer'. LANMAN 485 thinks it may be occurring only in the expressions pátir dán a G. sing. f. with wrong accent.

<sup>3</sup> This is the only form, occurring twice, BRUGMANN, Grundriss 2, 453. from a possible stem him-, beside himena, from himá-. It might, however, be an I. from the latter stem. Cp. 372.

<sup>4</sup> Cp. Brugmann, Grundriss 2, 580.

<sup>5</sup> For \*dám-s (like á-gan for \*á-gam-s) and pátī dán and equivalent to dám-patih and dám-patī at the end of a tristubh line. Cp.

## 5. Stems in Sibilants.

## I. a. Stems in radical s and s.

339. In radical stems ending in s and s, the sibilants are identical in origin, both being alike etymologically based on the dental s, which remains after  $\tilde{a}$ , but is cerebralized after other vowels and after  $\tilde{a}$ . In the RV. there are of radical s-stems some 40 derived from about 15 roots; of radical s-stems, some 50 derived from about 15 roots; in both groups taken together there are nearly 20 monosyllabic stems, the rest being compounds. Masculine and feminine stems are about equally numerous; but there are altogether only 7 or 8 neuters.

a. The distinction between strong and weak forms appears in three words: pimāms and pums- 'male'; nás- and nas- 'nose'; uktha-śās- and uktha-śás- 'uttering verses'. The A.pl. has the accentuation of weak stems in the masculines jñās-ás, pums-ás, mās-ás and in the feminines iṣ-ás, uṣ-ás, dviṣ-ás.

b. The stem ds- 'face' is supplemented in its inflexion by the an- stem  $\bar{a}s$ -dn-; the stem is- is supplemented before consonant endings by idd-i-; and dds- 'fore-arm' is

supplemented by dos-án- in the dual form dosánī (AV. IX. 77).

c. Transitions to the a- or  $\bar{a}$ -declension appear in forms made from  $\bar{a}s$ - 'face', is- 'refreshment',  $k\bar{a}s$ - 'cough',  $n\bar{a}s$ - 'nose',  $m\bar{a}s$ - 'month',  $\bar{a}$ -sás- 'hope', ni-mis- 'winking'. I. From  $\bar{a}s$ , beside and probably through the influence of the I. sing.  $\bar{a}s$ - $\bar{a}$ , is formed the adv.  $\bar{a}say\bar{a}$  'before the face of' (as from a stem  $\bar{a}s\bar{a}$ -, and with adverbial shift of accent instead of \* $\bar{a}s\bar{a}y\bar{a}$ ). — 2. Forms like G. is-ds gave rise to  $ip\bar{a}$ -mis, and the supplementary stem  $ip\bar{a}$ - probably started from the I. sing. ip- $\bar{a}$ , which itself was probably due to ip-the form assumed by is- before bh- endings; the stem is- further shows a transition to the i- declension in the D.  $ip\bar{a}ye$ . — 3. From  $k\bar{a}s$ - 'cough' there is the transition V.  $k\bar{a}se$  (AV.). — 4. The strong dual form  $n\bar{a}s$ - $\bar{a}$  furnished a transition to an  $\bar{a}$ - stem, from which is formed the dual  $n\bar{a}se$  (AV.). — 5. As  $p\bar{a}d$ -am gave rise to a new N.  $p\bar{a}d$ -as, so from  $m\bar{a}s$ -am arose the new stem  $m\bar{a}sa$ -, from which are formed the N. sing.  $m\bar{a}s$ -s and the A. pl.  $m\bar{a}s$ - $a\bar{a}s$ - in the RV. the stem  $\bar{a}$ - $i\bar{a}s$ - alone is used; but in the AV. appears the A.  $\bar{a}s\bar{a}s$ - (perhaps a contraction for  $\bar{a}$ - $i\bar{a}s$ -am) which, understood as  $\bar{a}s\bar{a}s$ -m, was probably the starting point of the  $\bar{a}s\bar{a}s$ -, the only stem in the later language. — 7. From m-mis-winking' there appear, beside the regular compound forms A.  $\bar{a}$ -nimis-am, I.  $\bar{a}$ -nimis-am, in  $\bar{a}$ -nimis-am, in  $\bar{a}$ -am, which is accent (90 B c).

#### Inflexion.

340. In the N. sing. the sibilant is of course dropped if preceded by a consonant, as  $an ext{-}aik$  'eyeless',  $pim\bar{a}n$  'man'. Otherwise s remains, while s becomes  $t^2$ . Before bh- endings, s becomes d in two forms which occur  $(m\bar{a}d\text{-}bhis$ ,  $m\bar{a}d\text{-}bhy\acute{a}s)^3$  and r in the only other one  $(dor\text{-}bhy\acute{a}m)$ ; while s becomes d in the only example occurring (vi-pridd-bhis).

The forms actually occurring, if made from más-4 m. 'month' as an

s- stem, and from dvis- f. 'hatred' as a s-stem, would be as follows:

Sing. N.5 más; dvíţ. A. másam; dvíṣam. I. māśā; dviṣā. D. māsé; dviṣé. Ab. māsás; dviṣás. G. māsás; dviṣás. L. māsí; dviṣí.— Du. N. A. másā; dviṣā. G. māsós. L. māsós (AV.TS.).— Pl. N. másas; dviṣas. A. māsás; dviṣas and dviṣás. I. mādbhís; dviḍbhís. D. mādbhyás (AV.). Ab. mādbhyás (AV.). G. māsām; dviṣām. L. māssú (AV.).

The forms actually occurring are:

<sup>1</sup> As kṣáp- and kṣíp- by kṣapā- and kṣípā- respectively.

3 Cp. J. SCHMIDT, KZ. 26, 340.

5 The only V. occurring is pumas.

<sup>&</sup>lt;sup>2</sup> It becomes k only in the n. form dadhr'k 'boldly', used as an adv. from dadhr's, if the word is derived from dhr's 'be bold'; but the word is perhaps more probably derived from dr'h 'be firm', see BR. s. v. dadhr'k, and cp. BARTHOLOMAE, IF. 12, Anzeiger p. 28.

<sup>4</sup> In this word (derived from  $m\bar{a}$ - 'measure') the s is really secondary, probably representing the suffix -as ( $m\bar{a}s$ -  $= m\bar{a}$ -as-); cp. Brugmann, Grundriss 2, p. 398.

Sing. N. r. m. púmān¹ 'male'; candrá-mās 'moon', dūré-bhās² 'shining to a distance', su-dás³ 'worshipping well'. — f. á-jñās 'having no kindred', ā-śis⁴ 'prayer'. — n. bhās 'light', mās 'flesh'; dós 'arm', yós 'welfare', śam-yós 'luck and welfare'. — 2. m. an-ák⁵ 'blind', edhamāna-dvit' 'hating the insolent'. —

f. vi-průt (AV.) 'drop'.

A. I. m. måsam 'month', půmāṃsam; a-yásam 'dexterous', uktha-śásam¹ 'uttering verses', su-dásam, su-bhásam 'shining beautifully', sv-āsiṣam⁴ 'well-praising', sv-ásam 'fair-mouthed'. — f. kásam³ (AV.) 'cough'; ā-śiṣam⁴ 'pra-śiṣam⁴ 'precept'ゥ. — 2. m. ghṛta-priṣam 'sprinkling ghee', jara-dviṣam 'hating decrepitude', brahma-dviṣam 'hating sacred knowledge', viśvā-pliṣam 'all-nourishing'. — f. iṣam 'refreshment', dviṣam 'hatred', pṛkṣam 'satiation'; á-nimiṣam 'non-winking', doṣaṇi-śriṣam (AV.) 'leaning on the arm', hṛdaya-śriṣam (AV.) 'clinging to the heart'. Also the adverbial A. ā-vy-uṣám (AV.) 'till the dawn'. — n. dadhṛk 'boldly' as adv.

I. i. m. māsá. — f. kāsá (AV.), nasá (AV.) 'nose', sāsā 'ruler' 'o'; abhi-sásā 'r 'blame', ava-sásā (AV.) 'wrong desire', ā-sásā 'hope', ā-síṣā, niḥ-sásā 'blame', parā-sásā (AV.) 'calumny', pra-síṣā (AV. VS.). — n. āsá 'mouth', bhāsá. — 2. m. viśva-phṣā '2. — f. iṣá, tviṣá 'excitement'; á-nimiṣā, prā-rṛṣā (AV. TS.)

'rainy season', presá 13 'pressure'. — n. ghṛta-pruṣā.

D. I. m. punsé (AV.); su-dåse. — n. bhāsé (VS. XIII. 39). — 2. m. ú-prā-yuṣe<sup>I4</sup> 'not careless'; á-vi-dviṣe (AV.) 'for non-enmity', rṣi-dviṣe 'hating the seers', brahma-dviṣe; gav-iṣe 'wishing for cows', paśv-iṣe 'wishing for cattle'; sākam-ilkṣe<sup>I5</sup> 'sprinkling together'. — f. iṣé<sup>I6</sup>, tviṣé, prkṣé, riṣé 'injury', préṣe (VS. v. 7).

Ab. r. m. puṃsás. — f. kāsás (AV.) — n. āsás. — 2. f. isás, trisás,

dvisás, risás; abhi-śrisas 'ligature', ni-misas 'winking'.

G. I. m. pumsás; a-sásas 'not blessing', su-dásas, sv-ásas. — f. ā-síṣas (TS. IV. 6.63). — 2. m. śṛṅga-vṛṣas '7 a man's name. — f. iṣás, uṣás 'dawn', dviṣás, pṛṣṣās; abhra-pruṣas 'sprinkling of the clouds', ni-miṣas.

L. I. m. puṃsi, māsi. — f. upási 'in the lap', nasi (VS.); ā-sisi (AV.),

pra-sisi (AV.). — 2. f. ni-misi, prā-zirsi, zy-lisi 'dawn'.

V. m. pumas 18.

Du. N. A. I. m. uktha-śásā 19, súryā-másā 20 'sun and moon'. — f. násā 21. — I. I. n. dorbhyám (VS.xxv. 3). — G. I. f. nasós. — L. I. f. nasós (AV. TS.).

Pl. N. 1. m. a-yāsas, V. ayāsas, uktha-sāsas 19, su-saņsāsas 22 (AV.) 'well-directing'. — f. ā-sāsas; ā-sīṣas, pra-sīṣas, vi-sīṣas (AV.) 'explanations',

I On the Sandhi of this N. see LANMAN 495I.

<sup>2</sup> See Lanman 4951.

- 3 There are also the transition forms māsa-s and a-nimiṣā-s.
- 4 The root in  $\bar{a}$ -sis- and pra-sis-, being a reduced form of  $s\bar{a}s$  'order', is here treated as belonging to the s-class.

5 From an-ákṣ- 'eyeless'.

<sup>6</sup> The N. of is- would be \*it: its place is supplied by the extended form  $id\hat{a}$ .

7 Strong stem from sas- = sams- 'proclaim'.

8 Accented kāsám (AV. v. 2211).

- 9 Also the transition forms a-nimisám and  $\bar{a}\dot{s}\dot{a}m$  (AV.).
  - 10 Cp. LANMAN 495 (bottom).
  - II From sas- = sams- 'proclaim'.
- 12 There is also the transition form a-nimiséna.

13 Accented thus as a monosyllabic stem instead of  $pris\bar{s}$  (=  $pra-is-\bar{a}$ ).

14 From pra+yu-'separate' with s as root

determinative.

- 15 Perhaps also áram-ise (VIII. 4617) hastening near, Pada áram ise; cp. LANMAN 4961.
  16 Also the transfer to the i-declension isáye.
  - 17 In a compound vocative with napat.
- 18 In the f. are found the transfers to the  $\bar{a}$ -declension h/e and  $k\bar{a}se$  (AV.).
  - 19 Strong forms; Pp. uktha-śásā, -śásas.
- 20 This might be from the transition stem -masa-.
- <sup>21</sup> There is also the transition form násc (AV.).
- <sup>22</sup> There are also the transition forms māsās, a-nimiṣās.

saṃ-ś/ṣas (AV.) 'directions'; vi-srásas' (AV.) 'falling apart', su-srásas (AV.) 'falling off easily', svayaṃ-srásas (AV.) 'dropping spontaneously'. — 2. m. mákṣas 'flies', máṣas 'mice'; anrta-dvíṣas 'persecuting untruth', V. a-saca-dviṣas 'hating non-worshippers', gav-ṭṣas, ghrta-prúṣas, pari-prúṣas 'sprinkling', brhad-úkṣas 'shedding copiously', brahma-dvíṣas, yajña-múṣas (TS. III. 5. 4¹) 'sacrifice stealer', váta-tviṣas 'having the impetuosity of the wind'. — f. 'iṣas, tviṣas, pṛkṣas; án-ā-dhrṣas (AV.) 'not checking', ghṛta-prúṣas, ni-miṣas (AV.), nemann-iṣas² 'following guidance', pati-dviṣas 'hating her husband', vy-úṣas (AV.), sam-iṣas 'darts', sākam-úkṣas, su-pṛkṣas 'abounding with food'.

A. I. m. jñāsás 'relatives', puṃsás, māsás ³; an-āsas 'faceless', án-ūrdhva-bhāsas 'whose splendour does not rise', a-yásas, a-sísas, hrtsv-ásas 'throwing into the heart'. — f. ā-sásas; ā-sísas, pra-sísas. — 2. m. brahma-dvísas. — f. isas and isás⁴, usás, dvísas and dvisás⁵, pṛkṣas; camrísas⁰, vi-prúsas (AV.).

I. i. m. mādbhýás (AV.). — D. i. m. mādbhyás (AV.). — Ab. i. m. mādbhyás (AV.). — G. i. m. puņsám (AV.), māsám, vasám<sup>8</sup> 'abodes'; a-yásām. — 2. f. iṣám, dviṣám. — L. i. m. puṇsh<sup>9</sup> (AV.).

### 1. b. Stems in derivative -s.

## a. Stems in -is and -us.

341. The stems formed with the suffixes -is and -us may best be treated together, as their inflexion is identical. The -is stems, numbering about a dozen, consist primarily of neuters only 13; these when they are final members of compounds are secondarily inflected as masculines also, but only in a single form (N. sing. svá-śocis 'self-radiant') as feminine. The -us stems, numbering sixteen (exclusive of compounds) in the RV., include primary masculines (two also as f.) as well as neuters; three of the latter as final members of compounds are also inflected as feminine. Eleven of the -us stems are neuter substantives, all but one accented on the radical syllable; four of these are also used as m. adjectives 11 accented in the same way (árus-, cákṣus-, tápus-, vápus-). Three of those -us stems which are exclusively m. are adjectives accented on the suffix, while two are substantives accented on the root (náh-us-, mán-us-) 12.

a. The N. A. pl. n. are distinguished as strong forms by lengthening and nasa-

lizing the vowel of the suffix (as in the -as stems), e. g. jyôtīmṣi and cákṣūmṣi.

b. Among these stems appear a number of transitions to, and a few from, other declensions. I. The N. sing. n., as in śoc-is and cákṣ-us, having in some passages the appearance of a N. sing. m. śoci-s and cákṣ-us, led to formations according to the i- and u-declension. Such are N. pl. śocáyas (AV.) 'flames', V. sing. pāvaka-śoce 'shining brightly', bhadra-śoce 'shining beautifully', śukra-śoce 'shining brilliantly'; N. pl. arcáyas 'beams', l. pl. arci-bhis. The form of krav-is- 'raw flesh' in the compound â-kravi-hasta- 'not having bloody hands' is probably due to the same cause. From cákṣ-us- 'eye' is once formed the Ab. cákṣo-s and the V. sahasra-cakṣo (AV.) 'thousand-eyed'. From táp-us- 'hot' is once

<sup>2</sup> neman- is here probably a locative.

The Mss. read vi-srasas; see Whitney's note on AV. XIX. 343.

<sup>3</sup> There is also the transition form māsān.

<sup>4</sup> işas occurs 63 times, işás 7 times in the RV.

<sup>5</sup> dvisas occurs 39 times, dvisás 4 times in the RV.

O The meaning of this word is perhaps 'libations in ladles'.

<sup>7</sup> There is also the transition form *iṣābhis* as an I. pl. of *iṣ*-.

<sup>8</sup> This word, occurring in this form only, might be a f.

<sup>9</sup> māssu- occurs Pañc. Br. IV. 4. I and māsú (like pumsú for pums-sú) TS. VII. 5. 22. The f. transition form idāsu occurs as the L. pl. of is-.

There seems no reason why am-is-occurring in L. s. only, should exceptionally be regarded as m. (BR., LANMAN, GRASS-MANN).

<sup>11</sup> One of these, tápus- 'hot', has a single f. form, A. du. tápuṣā.

<sup>12</sup> See above p. 84, 19.

formed the G. táto-s; from van-us-'desiring', as if vanú-s in N., the A. sing. vanú-m and pl. vantin; from ay-us- 'life' occurs not only the L. sing. ayu-n-i, but several compound forms, V. dirghāyo 'long-lived', adabdhāyo (VS.) 'having unimpaired vigour', A. vṛddhāyu-m 'full of vigour', n. viśváyu 'all-quickening', A. m. viśváyu-m, D. viśváyave, G. viśváyo-st. -2. There are also some transition forms from three masculines in -us, by extension of the stem, to the a- declension: from náh-us- 'neighbour', starting perhaps from the G. náhus-as taken as a N. sing. náhusa-s, are made the G. náhusa-sya and the L. náhuse: from mán-us- 'man', starting from the N. pl. mánus-as taken as a N. sing. mánusa-s, come the D. mánuṣāya and the G. mánuṣa-sya; from váp-us-'beauty', once D. vápuṣāya beside the frequent vápus-e. — 3. On the other hand, there are a few transitions from the declension of i- and u- stems to that of stems in -is and -us. Beside su-rabhi- 'fragrant', the superlative form su-rabhis-tamam2 occurs once; and beside numerous compounds formed with tuvi- appear the stems tivis-mant- 'powerful' and tuvis-tama- 'strongest'3. Beside the G. dhákto-s and dákso-s+ 'burning', there appears once the form daksús-as 5, which is doubtless due to the false analogy of forms like tasthúsas. Though mán-us-'man' may be an independent formation beside mán-u-, the probability is rather in favour of regarding it as secondary (starting from a N. manu-s), because manu-shows eight case-forms, but manus- only three 6. The stem a-prayus-, occurring only once beside the less rare á-prāyu-, probably represents a transition from the latter stem.

### Inflexion.

342. The final s becomes s before vowel endings, and r before -bh. The inflexion of the n. is the same as that of the m. except in the A. sing, N. A. du. and pl. The only f. forms occurring are in the N. or A. They are the following: N. sing. svá-śocis 'self-radiant'; cákṣus 'seeing', á-ghora-cakṣus 'not having an evil eye', hradé-cakṣus 'reflected in a lake'; citráyus 'possessed of wonderful vitality'; A. du. tápuṣā 'hot'; A. pl. gɔ-vapuṣas 'having the form of cows'.

The actual forms occurring, if made from socis- 'glow' in the n., and from -socis- in the m. (when it differs from the n.), and from cákṣus- 'eye' as n. and 'seeing' as m., would be as follows:

- 1. Sing. N. śocis. A. śocis; m. -śocisam. I. śocisā. D. śocisa. Ab. śocisas. G. śocisas. L. śocisi. V. śocis. Pl. N. A. śocinsi; m. -śocisas. I. śocirbhis. D. m. -śocirbhyas. G. śocisām. L. śocissu.
- 2. Sing. N. cáksus. A. cáksus; m. cáksuṣam. I. cákṣuṣā. D. cákṣuṣe. Ab. G. cákṣuṣas. L. cákṣuṣi. Du. N. A. cákṣuṣī; m. cákṣuṣā. D. cákṣurbhyām (VS.). Pl. N. A. cákṣūṃṣi; m. cákṣuṣas. I. cákṣurbhis. D. cákṣurbhyas (VS.). G. cákṣuṣām.

The forms which actually occur are the following:

Sing. N.m. 1. á-havis 'not offering oblations', krsná-vyathis 'whose path is black'; citrá-jyotis (VS. XVII. 80) 'shining brilliantly', śukrá-jyotis (VS. XVII. 15) 'brightly shining', satyá-jyotis (VS. XVII. 80) 'truly brilliant', su-jyótis (VS. XXXVII. 21) 'shining well'; citrá-socis 'shining brilliantly', duróka-socis 'glowing unpleasantly', śukrá-socis 'bright-rayed'; jīvá-barhis (AV.) 'having a fresh litter', su-barhis (VS. XXI. 15) 'having a goodly litter', stīrnú-barhis 'who has strewn the litter'; svá-rocis 'self-shining'; sv-arcís 'flashing beautifully'. — 2. cákṣus 'seeing', vápus beautyful', vidús 'attentive' ; á-dabdha-caksus (AV.) 'having undamaged sight', kṣitāyus 'whose life goes to an end', dīrghāyus 'long-lived', duḥ-śāśus 'malignant', vi-parus (AV.) 'jointless', viśvátaś-cakṣus 'having eyes on all sides', sárva-parus (AV.) 'having all joints', sahásrāyus (AV.) 'living a thousand years'.

There is probably insufficient reason to assume a primary independently formed stem -ay-u- beside ay-u-; cp. Lanman 569 (bottom).

<sup>&</sup>lt;sup>2</sup> Retaining the s of the N. like *indras*vant.

<sup>3</sup> tww-is- as an independent formation would be irregular, since the radical vowel otherwise shows Guna before the suffix is (134).

<sup>4</sup> Desiderative adj. from dah- 'burn'.

<sup>5</sup> The Pada text has dhaksiisas.

<sup>6</sup> Cp. Lanman 570 (bottom).

<sup>7</sup> There are also the transition forms arci-s and soci-s, the neuters becoming masculines of the i- declension.

<sup>8</sup> Also the transition forms cákṣu-s, tapú-s.
9 This may be an u-stem: vidú-s.

N. A. n. 1. arcís 'flame', kravís (AV.) 'raw flesh', chadís 'cover', chardís 'fence', jyótis 'light', barhís 'litter', vartís 'circuit', vyáthis 'course', śocís 'lustre', sarpís 'clarified butter', havís 'oblation'; vaiśvānará-jyotis (VS. xx. 23) 'light of Vaiśvānara', śukrá-jyotis (TS. IV. 1. 93), svàr-jyotis (VS. v. 32) 'light of heaven'. — 2. árus (AV.) 'wound', áyus 'life', cákṣus 'eye', tápus 'glow', dhánus 'bow', párus 'joint', yájus 'worship', vápus 'beauty', śásus 'command'; indra-dhanús (AV.) 'Indra's bow', sv-āyús¹ (VS. IV. 28) 'full vigour'.

A. m. i. á-grbhīta-śociṣam 'having unsubdued splendour', ajirá-śociṣam 'having a quick light', ūrdhvá-śociṣam 'flaming upwards', citrá-śociṣam, dīrgháyu-śociṣam 'shining through a long life', pāvaká-śociṣam 'shining brightly', śīrá-śociṣam 'sharp-rayed', śukrá-śociṣam, śrśṣṭha-śociṣam 'most brilliant'; citrá-barhiṣam 'having a brilliant bed', vṛktá-barhiṣam 'having the litter spread', su-barhiṣam, stīrṇá-barhiṣam (VS. XIV. 49); dákṣiṇā-jyotiṣam (AV.) 'brilliant by the sacrificed gift', hiraṇya-jyotiṣam (AV.) 'having golden splendour'. — 2. janúṣam 'birth', dīrgháyuṣam, pūrv-āyúṣam 'bestowing much vitality', śatāyuṣam² 'attaining the age of a hundred'.

I. n. arciṣā, kraviṣā, chardiṣā (VS. XIII. 19), jyótiṣā, barhiṣā (VS. XVIII. 63; TS.), rociṣā 'brightness', śociṣā, sarpiṣā, haviṣā. — m. manthi-śociṣā (VS. VII. 18) 'shining like mixed Soma', śukrá-jyotiṣā (VS.). — 2. n. āyuṣā, cākṣuṣā, januṣā, tāpuṣā, dhānuṣā (Kh. III. 9), pāruṣā, yājuṣā, śatāyuṣā, samiṣṭa-yajuṣā (VS. XIX. 29) 'sacrifice and formula', sv-āyuṣā (VS. IV. 28) 'full vigour of life'. — m. tāpuṣā, nāhuṣā 'neighbour', mānuṣā 'man', vanuṣā

'eager'.

D. I. n. arcise (TS. VS. XVII. II), jyśtise (VS. AV.), barhise (VS. II. I), śocise, havise. — m. tigmá-śocise 'sharp-rayed', pāvaká-śocise, śukrá-śocise, vṛktá-barhise, stīrná-barhise, rātá-havise 'liberal offerer', su-hávise 'offering fair oblations'. — 2. n. áyuse (VS. AV.), cákṣuṣe, janiiṣe, tápuṣe (AV.), yájuṣe (VS. I. 30), vápuṣe. — m. cákṣuṣe, mánuṣe, vaniiṣe³.

Ab. i. n. jyítisas (AV.), barhíṣas, havíṣas. — 2. n. áyuṣas (TS. iv. i.  $4^3$ ), cáksuṣas (TS. v. 7.  $7^1$ ), janúṣas, páruṣas (TS. iv. 2.  $9^2$ ), vápuṣas. — m. náhuṣas,

mánusas, vápusas.

G. i. n. kravisas, chardisas, jyótisas, barhisas, śocisas, sarpisas, havisas.—
m. pāvaká-śocisas, vrddhá-śocisas 'blazing mightly', vásu-rocisas 'shining brightly', vrktá-barhisas '.— 2. n. áyusas, cáksusas, tápusas, tárusas 'superiority', párusas, vápusas.— m. cáksusas, náhusas, mánusas, vanúsas 's istá-yajusas (VS.VIII. 12) 'having offered the sacrificial verses'.

L. r. n. arciși, ámiși 'raw flesh', jyótiși, barhiși, sádhiși (VS. XIII. 53) 'resting-place', haviși; tri-barhiși 'with threefold litter'. — 2. n. áyuși, táruși,

párusi, vápusi.

V. 1. n. barhis<sup>8</sup>; deva-havis 'oblation to the gods' (VS. VI. 8). — 2. m. lkāyus<sup>9</sup> 'first of living beings'.

Du. N. A. 2. n. cákṣuṣī (AV., Kh. IV. 11<sup>11</sup>), janúṣī. — m. cákṣuṣā, jayúṣā 'victorious'. — D. 2. n. cákṣurbhyām (VS. VII. 27).

<sup>2</sup> Also the transition forms vanú-m, vrddháyu-m, viśváyu-m.

3 Transition forms: viśvāyave; mánuṣāya, vápuṣāya; á-prāyuṣe 'not careless'.

I Also the transition form viśvayu 'allquickening'.

<sup>4</sup> Also perhaps a transition form śocé-s; cp. LANMAN 568.

<sup>5</sup> Also the transition forms tápos, viśväyos; náhusasya; mánusasya; dhaksúsas (341b, p. 222).

<sup>6</sup> Accounted a m. by BR., Grassmann, Lanman.

<sup>7</sup> Also the transition form áyuni; and m. náhuse.

<sup>8</sup> Also the transition forms pāvaka-śoce, bhadra-śoce, śukra-śoce.

<sup>9</sup> Also the transition forms adabdhāyo (VS.), dīrghāyo, sahasra-cakṣo (AV.).

Pl. N. m. I. ágrbhīta-śocisas, ajirá-śocisas, váta-dhrājisas (Kh. I. 33) 'having the impulse of wind', rrktá-barhisas, V. vrkta-barhisas, súdma-barhisas. 'preparing the litter', V. su-barhisas, su-jystisas and su-jyotisas, svá-rocisas'. — 2. náhusas, mánusas, V. manusas, vanúsas, vápusas.

N. A. n. 1. arcinsi, jyótimsi, barhímsi (VS. XXVIII. 21), śocimsi, havimsi. — 2. áyūmsi, cáksūmsi, janúmsi, tápūmsi, párūmsi (TS. VS. AV.), yájūmsi

(VS. AV.), vápūmsi.

A. m. I. su-jystisas. — 2. náhusas, mánusas, vanúsas².

I. I. n. havírbhis 3. — 2. n. dhánurbhis (AV.), yájurbhis (VS.IV.I), vápurbhis. — D. I. m. ūrdhvá-barhirbhyas (VS. XXXVIII. 15) 'being above the litter'. - 2. n. yájurbhyas (VS. XXXVIII. 11).

G. I. n. jyótisam, havísam (AV.). — 2. n. cáksusam (AV.), janúsam, yájuṣām (AV.), vápuṣām. — m. vanúṣām, viśvá-manuṣām 'belonging to all men'.

L. I. n. havissu.

## $\beta$ . Stems in -as.

- 343. Primarily this declension consists almost entirely of neuters, which are accented on the root, as  $m \acute{a}n$ -as-'mind'; but these as final members of adjective compounds may be inflected in all three genders, as N. m. f. su-mánās, n. su-mánas 'well-disposed'. There are besides a few primary masculines, which are accented on the suffix, being either substantives, as raks-ás- 'demon', or adjectives, some of which occur in the f. also (as well as n.), as ap-ás- 'active'; and one feminine, us-ás- 'dawn' 4.
- a. Strong cases are regularly distinguished only in the N. A. pl. n., where the vowel of the suffix is lengthened and nasalized 5 (as in the -is and -its stems), as ámhāmsi 'troubles'. Otherwise the stem uṣás- shows in the A. sing., N. A. du., N. V. pl., strong forms with lengthened vowel in the suffix, which occur beside the unlengthened forms 6, the latter being nearly three times as frequent in the RV. The long vowel is here required by the metre in 20 out of 28 occurrences, and is favoured by the metre in the rest 7; so that the lengthening may be due to metrical exigencies. The strong form usāsas 8 occurs once (x. 391) for the weak usāsas as the G. sing. or A. pl. There is further the single strong form N. du. m. tośasa 9 'bestowing abundantly' 10.

b. Supplementary stems ending in -as beside -an are phhvas- 'skilful' (as well as

this.) beside this and sikvas- 'strong' (as well as sikva-) beside sikvan-.

c. There is here a large number of transition forms both to and from the adeclension. Many pairs of stems in -a and -as are common in both forms and seem therefore to be of independent derivation. But there are also a good many such doublets of which the one is the normal stem, while the other has come into being through mistaken analogy or metrical exigency. I. In the transitions to the a- declension several may be explained as starting from the misleading analogy of contracted forms. To this group belong the following: from ángiras-, a name of Agni, L. sing. ángire beside N. pl. ángirās; from án-āgas- 'sinless', A. pl. án-āgān beside A. sing. án-āgām and N. pl. án-āgās; from ap-sarás- 'water-nymph', apsarábhyas (AV.), apsarásu (AV.), apsarā-patés (AV.) beside apsarám (AV.); from usás 'dawn', N. du. usé (VS.), usábhyām (VS.), beside A. sing. usám and pl. uṣās; from jarās- m. 'old age', f. sing. N. jarā (AV. VS.), D. jarāyai (AV.), beside

<sup>2</sup> Also the transition form vanun.

3 Also the transition form arci-bhis.

in -as is obscure; as upás- 'lap' (only L. sing.), and risadas- 'destroying enemies'.

5 On the origin of this form as a combination of  $-\bar{a}n-i$  and  $-\bar{a}s-i$  see Johansson, BB. 18, 3 and cp. GGA. 1890, p. 762.

8 The Pada text has usásah.

9 Here the long vowel appears in the 4 The derivation of a few stems ending Pada text also. This is the only form made from the stem tosás- (from tus- 'drip').

> 10 The form sa-psarāsas 'enjoying in common(?), occurring once, must be the pl. of sa-psará- (BR., GRASSMANN), not of \*sarsarás- (LANMAN 546, GELDNER, VS. 3, 197), because ·as is never accented in Bahuvrihi compounds; see WACKERNAGEL 21, p. 301 d, note. su-medhás- 'very wise' is not a Bahuvrihi.

Also the transition forms arcayas, śocá vas.

<sup>6</sup> The lengthened vowel never occurs in the Pada text in these forms (excepting of course the N. uṣās).

<sup>7</sup> See ARNOLD, Vedic Metre, p. 130, 11 (a); cp. LANMAN 546.

A. jarám I; from sa-jóṣas- 'united', N. du. sa-jóṣau beside pl. sa-jóṣās. There is a further group of transitions to the a-declension starting not from contracted forms, but from the N. sing n. understood as m.2. From ávas- 'favour' is thus formed I. ávena; from krándas-'battle-cry', D. krándāya 3 (AV.), and the compound śúci-kranda-m 'crying aloud'; from śárdhas- n. 'troop' the m. forms śárdha-m, śárdhena, śárdhaya, śárdha-sya, śárdhān4; from hédas- n., once (I. 9412) héla-s N. m., hence A. héda-m (AV.), L. héle; also the compound forms N. f. du. a-dvesé 'not ill-disposed', beside dvésas- 'hate'; dur-ska-m (VII. 43) 'unwonted' beside ókas- 'abode'; vi-dradhé (IV. 3223) 'unclothed'(?) beside drádhasī (TS.) 'garments'; pṛthu-jrāya-m (IV. 441) 'far-extending' beside jrāyas 'expanse'; puru-pēšāsu 'multiform' beside pésas 'form' 5.

2. The second class, comprising transitions to the -as declension, consists of the two groups of transfers from the radical  $-\bar{a}$  stems and the derivative -a stems. The former group embraces forms of compounds made from kṣā- 'abode', pra-jā- 'offspring',  $-d\bar{a}$ - 'giving',  $-dh\bar{a}$ - 'bestowing', besides  $m\bar{a}$ -s 'moon', starting from the N. in  $\bar{a}$ -s which is identical in form with that of stems in -as. The forms of this type are the following: N.pl. divá-kṣas-as beside N. sing. divá-kṣā-s 'having an abode in heaven'; A. sing. á-prajas-am (AV. VS.) 'childless', A. pl. f. ida-prajas-as (TS. MS.), A. sing. su-prajas-am (AV.), N. pl. m. su-prajás-as (AV. TS.) 'having a good son' beside N. sing. m. su-prajá-s; V. dravino-das 6 beside N. sing. dravino-da-s, A. dravino-da-m 'wealth-giving'; varco-das-au (VS.) 'granting vigour'; reto-dhás-as (VS.) ':mpregnating' beside N. sing. m. reto-dhá-s; A. vayo-dhás-am (VS.), I. vayo-dhás-ā (VS.), vayo-dhas-e (VS.), V. vayo-dhas, N. pl. vayo-dhás-as (AV.) beside N. sing. vayo dhá-s 'bestowing vigour'; D. sing. varco-dhás-e (AV.) beside N. sing. varco-dhá-s (AV.) and A. sing. f. varco-dhā-m (VS.); of candrá-mīs-7 'moon' all the forms occurring, except the N. sing, which is their starting-point, are transfer forms: A. candrá-masam (VS. XXIII. 59), I candrá-masī (AV.), D. candrá-mase (VS.), G. candrá-masas, L. candrá-masi (AV.), V. candramas (AV.), N. du. candrá-masā, sūryā-candra-másā and sūryā-candra-másau.

There are further several sporadic transition forms from -as stems occurring beside the ordinary corresponding -a stem. These may sometimes have started from an ambiguous N. sing., but they seem usually to be due to metrical exigencies. Such forms are the following: dákṣas-e, dákṣas-as, pūtá-dakṣas-ā and pūtá-dakṣas-as beside very frequent forms of dákṣa- 'skill'; doṣás-as 8 (AV.) once beside forms of doṣá- 'evening'; (viśvāyu)-posas-am beside the common póṣa-; N. sing. sá-bharās, A. viśvá-bharas-am beside the frequent bhára- 'supporting'; veśás-as 9 (AV.) beside veśá- 'neighbour'; śépas as A. sing. in AV. (XIV. 238) for the sépam of the RV., from sépa- m. 'tail', N. sing. sépa-s; N. sing. m. su-sévās occurs in the AV. as a variant for su-séva-s 'very dear' of the RV.; sahásra-sokās occurs once as N. sing. m. beside the common soka 'flame'; A. sing. tuvi-svanas-am and N. pl. tuvi-svanás-as, beside svaná- 'sound'; A. pl. f. gharmá-svaras-as beside svará- 'roaring'; also the D. dhruvás-e (VII. 701) for dhruváya to which it is preferred owing to the metre and the influence of infinitives in -ase, and similarly vrdhase (v.645) parallel to vrdhaya (VIII. 836).

4. There are besides a few quite abnormal transition forms. The occurrence of the very frequent N. pl. m. of vi- 'bird' with a singular verb (I. 1418) and once as an A. pl. (i. 1041) may have produced the impression of a n. collective váyas- and thus led to the n.pl. váyāmsi (AV.), helped perhaps by the existence of the very frequent n. stem váyas- 'food'. The isolated form N. sing. m. sv-áñcās is probably lengthened for sv-áñca-s (like su-śévās for su-śévas) which started from the A. sing. m. sv-áñc-am. G. du. ródas-os occurs once (IX. 225), evidently on account of the metre instead of the ordinary ródasī-os 10.

I LANMAN 552 thinks that medhá- 'wisdom' in N. medhá, I. medháyā, N. pl. medhás, s belongs to the stem. It is formed probably I. medhábhis started from medhám as contracted A. of medhas- found in su-medhás-. This seems doubtful to me.

<sup>2</sup> In VI. 666 *rókas* might be taken as N. sing. m. (as Grassmann takes it) beside

3 Cp. also the D. caráyai (VII. 771) beside caráse (I. 924, V. 474), and tárāya (II. 1312) beside tárase (III. 183).

4 Cp. Lanman 353 and 554, 8.

5 There is also an -as stem extended with -a in the D.  $\bar{a}$ -jaras $\hat{a}$ ya (x.  $85^{43}$ ) 'till old age', based on the adv. compound ā-jaras-ám (B.)

6 Cp. Brugmann, Grundriss 2, p. 398. Indo-arische Philologie. I. 4.

8 In usáso dosásas ca (AV. XVI. 46) obviously due to parallelism with usásas.

9 Clearly owing to the metre instead of vešásas.

10 Similarly aks-ós occurs in AV. v. 1110 (but contrary to the metre) for akṣī-ôs. On the transition forms of the -as declension cp. Lanman 546-558.

<sup>7</sup> From mās- (A. mās-am, etc.), where the with -as from  $m\bar{a}$ - 'measure' ( $m\bar{a}$ -as), being thus in origin a contracted -as stem, in which, however, the N. mas giving rise to the transition forms was understood as the lengthened form of \*mas.

#### Inflexion.

344. The N. sing. m. f. lengthens the vowel of the suffix; e. g. m. dingirās<sup>1</sup>, f. uṣās. In about a dozen compounds the long vowel appears (owing to the influence of the m.) in the n. also; e. g. urna-mradas 'soft as wool'. Before endings with initial bh the suffix as becomes -o2. The forms actually occurring, if made from ápas- n. 'work' and apás- m. f. 'active', would be as follows:

Sing. N. ápas; apás. A. ápas; apásam. I. ápasā; apásā. D. ápase; apáse. Ab. ápasas; apásas. G. ápasas; apásas. L. ápasi; apási. V. ápas; άρας. — Du. N. A. V. άραςῖ; αράςῖ and αράςαυ³. D. αρύρληςτη (VS.). G. ápasos (VS.). — Pl. N. ápāmsi; apásas. A. ápāmsi; apásas. I. ápobhis; D. ápobhyas; apíbhyas. Ab. ápobhyas. G. ápasām; apásām. apobhis. L. ápassu; apássu<sup>4</sup>.

The forms actually occurring are as follows:

Sing. N. m. ángirās an epithet of Agni, dámūnās 'domestic', nodhās name of a seer, yaśás 'glorious', rakṣás 'demon', vedhás 'ordainer'; compounds: a-cetás 'senseless', áty-amhās (VS. XVII. 80) 'beyond distress', ádribarhās 'fast as a rock', á-dvayās 'free from duplicity', án-āgās6 'sinless'. an-ūdhās 'udderless', anūna-varcās 'having full splendour', an-enās 'guiltless', á-pracetās 'foolish', abhibhūty-ójās 'having superior power', ámitaujās 'almighty', a-rapās 'unhurt', avayāta-helās 'whose anger is appeased', asamāty-ojās 'of unequalled strength', ā-hanās 'exuberant', uru-cākṣās 'far-seeing', uru-vyácās 'widely extending', /si-manās 'of far-seeing mind', rsvúujās 'having sublime (rsvá-) power', kāril-dhāyās 'favouring the singer', kṛtti-vāsās (VS. III. 61) 'wearing a skin', kéta-vedās 'knowing the intention', khādo-arnās 'having a devouring flood', gabhīrá-vepās 'deeply moved', gūrtá-manās 'having a grateful mind', gūrtá-śravās 'the praise of whom is welcome', gó-nyoghās 'streaming among milk', ghṛtá-prayās 'relishing ghee', jātá-vedīs 'knowing created beings', tád-apās 'accustomed to that work', tád-okās 'rejoicing in that', tád-ojās 'endowed with such strength', tarád-dvesās 'overcoming foes', tigmá-tejās (VS. 1. 24) 'keenedged', tri-vayās 'having threefold food', dabhrá-cetās 'little-minded', dasmávarcās 'of wonderful appearance', dīrghá-tamās N. of a seer, dīrghápsās 'having a long fore-part', dur-vṣās 'hard to excite', devá-psarās 'serving the gods as a feast', devá-śravās 'having divine renown', dvi-bárhās 'doubly strong', ná-vedās 'cognisant', nr-cákṣās 'watching men', nr-mánās 'mindful of men', ny-òkās 'domestic', pāvaká-varcās 'brightly resplendent', purū-rávās (VS. v. 2) N., pṛthu-jráyās 'widely extended', pṛthu-pājās 'far-shining', prá-cetās 'attentive', prá-vayās 'vigorous', bāhv-òjās 'strong in the arm', brhác-chravās 'loudsounding', bṛhád-ravās (VS. v. 22) 'loud-sounding', bṛhád-vayās (TS. 1. 5. 102) ,grown strong', bodhín-manās 'watchful-minded', bhári-retās (VS. XX. 44) 'abounding in seed', bhúry-ojās 'having great power', mádhu-vacās 'sweetvoiced', máno-javās 'swift as thought', mahā-yasás (Kh. IV. 88) 'very glorious', mitrá-mahās 'rich in friends', raghu-pátma-jamhās 'having a light-falling foot',

The stems svá-tavas- and sv-ávas- form the irregular N. svá-tavān and sv-ávān, VS.

<sup>&</sup>lt;sup>2</sup> Except in f. uṣádbhis and m. svátavadbhyas (VS.); cp. Brugmann, Grundriss 2, p. 713 (bottom).

<sup>3</sup> The ending -au is here very rare and occurs chiefly in the later Samhitas. m. apásu if for apássu.

<sup>5</sup> The s of the N. sing. is perhaps lost in usánā; but this form may be a transition, starting from the A.  $u\dot{s}\dot{a}n\bar{x}m$  (=  $u\dot{s}\dot{a}nasam$ ) after the analogy of the f.; another instance is perhaps an-chā (x. 6112).

<sup>6</sup> The form an-avayas (AV. VII. 903), meaning perhaps 'not producing concepcurs chiefly in the later Samhitās.

4 Represented in f. by apsarássu (Kh.) and WHITNEY's note. LANMAN 443, places it under radical -ā stems.

ráthaujās (VS. xv. 15) 'having the strength of a chariot', riśádās 'destroying enemies', vásu-śravās 'famous for wealth', váta-ramhās 'fleet as wind', ví-cetās 'clearly seen', vi-manās 'very wise', viśvá-cakṣās 'all-seeing', viśvá-dhāyās 'allsustaining', viśvá-bharās 1 (VS. XI. 32)' all-supporting', viśvá-bhojās 'all-nourishing', viśvá-manās 'perceiving everything', viśvá-vedās 'omniscient', viśvá-vyacās (VS. XIII. 56) 'embracing all things', visvaujās 'all-powerful', vi-hāyās 'mighty', vīļudvésās 'hating strongly', vīļú-harās 'holding fast', rṛddhá-mahās 'of great might', vrddhá-vayās 'of great power', vrddhá-śravās 'possessed of great swiftness', śatá-tejās (VS. 1. 24) 'having a hundredfold vital power', śatá-payās (TS. VS.) 'having a hundred draughts', śukrá-varcās 'having bright lustre', śraddhá-manās 'true-hearted', śrź-manās (VS.) 'well-disposed', sá-canās 'being in harmony with', sú-cetās 'unanimous', sa-júṣās 'united', satyá-rādhās 'truly beneficent', satyáujās (AV. VS. TS.) 'truly mighty', sa-práthās 'extensive', sám-okās 'dwelling together', sahásra-cakṣās 'thousand-eyed', sahásra-cetās 'having a thousand aspects', sahásra-pāthās 'appearing in a thousand places', sahásra-retās 'having a thousandfold seed', sahásra-śokās' 'emitting a thousand flames', sahásrāpsās 'thousand-shaped', su-dámsās 'performing splendid actions', su-mánās 'welldisposed', su-medhás 2 'having a good understanding', su-rádhās 'bountiful', su-reknās 'having fair possessions', su-retās 'having much seed', su-varcās 'splendid', su-vāsās 'having beautiful garments', sóma-cakṣās (TS. 11. 2. 124) 'looking like Soma', stóma-vāhās 'receiving praise', spārhá-rādhās 'bestowing enviable wealth', sv-áñcās 'going well', sv-ápās 'skilful', svábhūty-ojās 'having energy from inherent power', svá-yasās 'glorious through one's own acts', svàr-cakṣās 'brilliant as light', svàr-canās 'lovely as light', sv-vjās 'very strong'.

f. uṣás 'dawn'; áti-cchandās (TS., VS. xxi. 22) a metre, á-dvayās, ap-sarās 'water-nymph', a-repās 'spotless', ā-hanās, uru-vyácās, úrṇa-mradās 'soft as wool', dvi-bárhās, nīcā-vayās 'whose strength is low', nr-mánās, prá-cetās, mádhu-vacās, yāvayád-dveṣās 'driving away enemies', vi-cchandās (TS. v. 2. 11¹) 'containing various metres', vi-hāyās, vṛṣa-maṇās 'manly-spirited', śukrá-vāsās 'bright-robed', sá-cetās, sá-cchandās (TS. v. 2. 11¹) 'consisting of the same metres', sa-jóṣās, sa-práthās, sá-bharās¹ 'furnished with gifts' (?), sahá-yaṣās (TS. iv. 4. 12²) 'glorious', su-dáṇsās, su-péṣās 'well-adorned', su-mánās, su-medhās², su-váṣās.

N. A. n. ánhas 'distress', áñjas 'ointment', a-dvesás 'without malevolence', ánas 'cart', an-ehás 'without a rival', ándhas 'darkness' and 'plant', ápas 'work', apás 'active', ápnas 'property', ápsas 'hidden part of the body', ámbhas 'water', avas 'metal', a-raksás 'harmless', a-rapás, árnas 'flood', ávas 'favour', agas 'sin', apas 'religious ceremony', uras 'breast', udhas 'udder', enas 'sin', ókas 'abode', ójas 'strength', ksódas 'rushing water', cánas 'delight', cétas (VS. XXXIV. 3) 'intellect', chándas 'metrical hymn', jámhas 'course', júvas 'quickness', jráyas 'expanse', tád-apas, tápas 'heat', támas 'darkness', táras 'velocity', téjas 'sharp edge', tyájas 'abandonment', dámsas 'marvellous power', dúvas 'worship', drávinas 'property', dvésas 'hostility', nábhas 'vapour', námas 'obeisance', páksas 'side', páyas 'milk', pásas (VS. xx. 9) 'penis', pájas 'vigour', páthas 'place', pívas 'fat', puru-bhójas 'greatly nourishing', pésas 'ornament', práthas 'width', práyas 'enjoyment', psáras 'feast', bhárgas 'radiance', bhásas 'light', mánas 'mind', máyas 'joy', máhas 'greatness', mahás 'great', mídhas 'disdain', médas 'fat', yásas 'fame', rákṣas 'damage', rájas 'region of clouds', rápas 'infirmity', rábhas 'violence', rádhas 'bounty', réknas 'wealth', rétas 'flow', répas 'stain', ródhas 'bank', váksas 'breast', vácas 'speech', váyas 'bird' and

r Probably a transition form (p. 225, 3, 4). -as stem occurs only in su-medhásam (once)
2 Perhaps a transfer form from medhá-,
since the latter stem is common, while the

'food', várivas 'space', várcas 'vigour', várpas 'figure', vāg-ýjas (VS. XXXVI. 1) 'speech-energy', vásas 'garment', váhas 'offering', védas 'wealth', vépas 'quivering', zvácas 'expanse', vráyas 'superior power', sárdhas 'troop', sávas 'power', síras 'head', sésas 'offspring', śrávas 'renown', sa-jósas, sádas 'seat', sánas (Kh. III. 1515) 'gain', sa-práthas, sa-bádhas 'harassed', sáras 'lake', sáhas 'force', saháujas (VS. xxxvi. 1) 'endowed with strength', su-rétas, srótas 'stream', svá-tavas 'inherently strong', háras 'flame', hélas 'passion', hváras 'crookedness'. — Ending in -ās² (like m.): asrī-váyās³ (VS. XIV. 18), uru-práthās (VS. xx. 39) 'far-spread', úrṇa-mradās, gūrtá-vacās 'speaking agreeably', devávyacās 'affording space for the gods', dvi-bárhās, viśvá-vyacās (AV.), víspardhās (VS. xv. 5) 'emulating', vīrá-peśās 'forming the ornament of heroes', vīli-harās, sa-práthās (AV. VS. TS.), sumánās (TS. IV. 5. 12)4.

A. m. jarásam 'old age', tavásam 'strong', 'strength', tyajásam 'offshoot', dámūnasam, párīnasam (160) 'abundance', bhiyásam 'fear', yasásam, raksásam, vedhásam; a-cetásam, ánasta-vedasam 'having one's property unimpaired', ánāgasam, ánu-gāyasam 'followed by shouts', an-enásam (TS.1.8.53), an-ehásam, apásam, á-pratidhrsta-śavasam 'of irresistible power', abhibhūty-ijasam, arámanasam 'obedient', a-rādhásam 'not liberal', a-repásam, arcanánasam 'having a rattling carriage' (N. of a man), ā-hanásam, úccais-sravasam (Kh. v. 145) 'neighing aloud' (N. of Indra's horse), upāká-cakṣasam 'seen close at hand', uru-cáksasam, uru-jráyasam 'extending over a wide space', uru-vyácasam, úrna-mradasam (VS. II. 2), ūrdhvá-nabhasam (VS. VI. 16) 'being above the clouds', kṣctra-sādhasam 'who divides the fields', gāthá-śravasam 'famous through songs', gāyatrá-cchandasam (VS. VIII. 47) 'to whom the Gāyatrī metre belongs', gāyatrá-vepasam 'inspired by songs', gir-vanasam 'delighting in invocations', gir vāhasam 'praised in song', gūrtá-śravasam, gś-arņasam 'abounding in cattle', gi-dhāyasam 'supporting cows', cikitvin-manasam 'attentive'. citrá-mahasam 'possessing excellent bounty', citrá-rādhasam 'granting excellent gifts', júgac-chandasam (VS. VIII. 47) 'to whom the Jagatī metre belongs', jātá-vedasam, tuvi-rádhasam 'granting many gifts', tuvi-svanásam' 'loud-sounding', tuvy-jjasam 'very powerful', tristup-chandasam (VS. VIII. 47), dandukasam 'delighting (okas-) in a sacrificial meal', dyuksd-vacasam 'uttering heavenly words', dvi-bárhasam, dvi-śavasam 'having twofold strength'. dhṛṣnvvjasam 'endowed with resistless might', náryāpasam 'doing manly (nárya-) deeds', nr-cákṣasam, pankti-rādhasam 'containing fivefold gifts', puru-pésasam 'multiform', puru-bh'jasam, puru-várpasam 'having many forms', puru-vépasam 'much-exciting', prá-cetasam, prá-tvakṣasam 'energetic', bráhma-vāhasam 'to whom prayers are offered', bhūri-cakṣasam 'much-seeing', bhūri-dhīyasam 'nourishing many', máno-javasam (TS. 11. 4. 7<sup>1</sup>), yajñá-vanasam 'loving sacrifice', yajñá-vāhasam 'offering worship', riśādasam6, vāja-śravasam 'famous for wealth', vi-cetasam, vi-josasam 'forsaken', vi-dvesasam 'resisting enmity', viśvádhāyasam, viśvá-bharasam<sup>7</sup>, viśvá-vedasam, viśvá-vyacasam, viśváyu-posasam<sup>7</sup> 'causing prosperity to all men', viśvāyu-vepasam 'exciting all men', vi-hāyasam, vīti-rādhasam 'granting enjoyment', sá-cetasam, sa-júsasam, satyá-girvāhasam 'getting true praise', satyá-rādhasam (VS. XXII. 11), satyá-savasam 'truly vigorous',

I Though sánas does not otherwise occur (sana- m. is found as last member of a in  $\bar{a}$ -s, Lanman 445 (mid). compound), the context in Khila III. 1515 seems to require an A.: ahám gandhárva- ously tuvis-manásam. rūpeņa sána ā vartayāmi te.

<sup>&</sup>lt;sup>2</sup> Cp. Lanman 560.

<sup>3</sup> Of doubtful meaning; the form may possibly be N. pl. of asrīvi-. Cp. BR.

<sup>4</sup> Cp. Lanman 560; see also the neuters

<sup>5</sup> For this form, TS. III. 3. II2 has errone-

<sup>6</sup> Also the transition form vayo-dhásam (VS.) 'bestowing strength'.

<sup>7</sup> Probably to be explained as a transition form (p. 225, 3).

sádma-makhasam 'performing sacrifice in a sacred precinct', sa-práthasam (VS. XXI. 3), samudrá-vāsasam 'concealed in the waters', samudrá-vyacasam 'extensive as the sea', sárva-vedasam (VS. XV. 55; TS. IV. 7. I34) 'having complete property', sahásra-vaksasam, sahásra-bharnasam 'a thousandfold', sahásra-varcasam 'having a thousandfold power', su-citasam 'very wise', su-dámsasam, su-pésasam, su-prayásam 'well regaled', su-bhójasam 'bountiful', su-medhásam', su-rádhasam, su-rétasam, su-várcasam (TS. III. 2. 85), su-śrávasam 'famous', srprá-bhojasam 'having abundant food', svá-yasasam, sv-ávasam 'affording good protection', hári-dhāyasam 'giving yellow streams', hári-varpasam 'having a yellow appearance'. — Contracted forms: uśánām N. of a seer, mahám, vedhám.

f. usásam and usásam², dhvarásam 'deceiving'; án-āgasam, an-ehásam, a-rakṣásam, a-repásam, áśva-peśasam 'decorated with horses', úd-ojasam 'exceedingly powerful', uru-vyácasam, cikitvín-manasam, puru-bhójasam, yāvayád-dveṣasam, vája-peśasam 'adorned with precious gifts', viśva-dóhasam 'yielding all things', viśvá-dhāyasam, viśvá-peśasam 'containing all adornment', viśvá-bhojasam, śatárcasam 'having a hundred supports' (rcás-), śúci-peśasam 'brightly adorned', sahásra-bharnasam, svá-yašasam, hári-varpasam. — Contracted forms: uṣām, jarām, medhām 'wisdom', vayām 'vigour'; án-āgām, ap-sarām (AV.)3.

f. usásā, yajásā 'worshipping'; áti-cchandasā (VS. 1. 27), a-repásā, uru-

cákṣasā (VS. IV. 23).

n. áñjasā, ánasā, ándhasā, ápasā, apásā, a-rakṣásā, árṇasā, ávasā, irasā (VS.TS.), énasā, ójasā, óhasā 'prospect', kṣódasā, gó-arṇasā, cákṣasā 'brightness', cétasā, chándasā (VS. TS.), jávasā and (once) javásā5 'with speed', tánasā 'offspring', tápasā, támasā, tárasā, téjasā, tyájasā, tvákṣasā 'energy', dáṃsasā, dóhasā 'milking', dháyasā 'nourishing', dhrájasā 'gliding power', nábhasā, námasā, páyasā, pájasā, pívasā, péśasā (VS. XX. 41), práyasā, bāhvòjasā, bhrájasā 'lustre', mánasā, máhasā, médasā, yaśásā6 'glorious', rákṣasā, rájasā, rápasā, rádhasā, rékṇasā, rétasā, vácasā, vánasā 'enjoyment', váyasā¹, várcasā, várpasā, vásasā, váhasā, védasā, vépasā, śávasā, śírasā (Kh. I. 9¹), śéṣasā, śrávasā, sáhasā, su-dáṃsasā, su-rétasā, srótasā, hárasā, héṣasā 'vigour'8.

D. m. taváse, duváse 'worshipper', yasáse, raksáse, vedháse, síkvase 'adroit', sáhase 'mighty'; abhísti-savase 'granting powerful aid', ukthá-vāhase 'offering verses', uru-vyácase, rtá-pesase 'having a glorious form', gāyatrá-vepase, gír-vaṇase, gír-vāhase, ghorá-caksase 'of frightful appearance', jātá-vedase, tád-apase, tád-okase, dīrghá-yasase 'renowned far and wide', dīrghá-śravase 'famous far

<sup>2</sup> In Pada text usásam.

<sup>4</sup> Also contracted to *bhīṣā* with adverbial shift of accent occurring 3 times (*bhiyāsā* 11

times).
5 In IV. 27<sup>1</sup>.

6 Cp. Grassmann, s. v. yaśás-.

9 Also the transition form candrá-mase (VS. XXX. 21).

r Perhaps to be explained as a transition form starting from N. su-medhá-s.

<sup>3</sup> Cp. J. Schmidt, Heteroklitische nominative singularis auf -ās in den arischen sprachen, KZ. 26, 401—409; 27, 284; Collitz, BB. 7, 180; Prellwitz, BB. 22, 83.

<sup>7</sup> Also the transition form vayo-dhásā (VS. XV. 7).

<sup>8</sup> A few forms in -as appear to have the value of instrumentals as agreeing with a word in that case: vácas (I. 262 etc.), yajña-vacás (AV. XI. 319), śávas (I. 814); édhas (AV. XII. 32); cp. BLOOMFIELD, SBE. 42, 645; see LANMAN 562, and cp. CALAND, KZ. 31, 261.

and wide', dyumná-śravase 'producing a clear sound', nr-cákṣase, ny-ùkase, purā-rávuse, pṛthu-pájase, vertavase, vertavase, vi-hāyase, carrying off what is injured', N. of a seer, yajāá-vāhase¹, viśvá-cakṣase, vi-hāyase, satyá-rādhase, sahásra-cakṣase, svá-tavase, svá-yaśase.

f. usáse, vrdháse 'furtherance'; áti-cchandase (VS. XXIV. 13), dur-vásase

'ill-clothed', parjánya-retase 'sprung from the seed of Parjanya'.

n. apáse, a-pesáse 'formless', ávase, újase, cákṣase, javáse, tápase, támase, tárase, téjase (VS. xv. 8), dákṣase 'ability', dháyase, dhruváse 'stopping', nábhase (VS. vii. 30), námase, pájase, práyase, psárase, mánase, máhase (VS. xix. 8), yáśase (VS. xx. 3), yádase (VS. xxx. 20) 'voluptuousness', rákṣase, rádhase, rétase, vácase, várcase, sárase (VS. xxxviii. 15) 'skin of boiled milk', sávase, srávase, sáhase, svá-yaśase, hárase.

Ab. m. a-rādhásas, jarásas, tavásas, párīņasas, rakṣásas², sáhasas. — f. uṣásas. — n. áṃhasas³, ánasas, ándhasas, úpasas, árṇasas, ágasas (TS.IV.7. 15²), énasas, ókasas, ójasas, kṣódasas, jráyasas, tápasav, támasas, dráviṇasas, páyasas, pájasas, práthasas, bháṃsasas 'intestine', mánasas⁴, rájasas, rádhasas,

védasas, sádasas, sárasas, sáhasas.

G. m. ángirasas, apásas, ápnasas, tavásas, párīnasas, rakṣásas, vedhásas; án-āgasas, ápāka-cakṣasas 'shining from afar', abhí-vayasas 'refreshing', a-rakṣásas, upamá-śravasas 'most highly famed', kṛṣṇá-jaṃhasas 'having a black track', jātá-vedasas, dānápnasas 'having abundance of gifts', dirghá-śravasas, dvibárhasas, nṛ-cákṣasas, pári-dveṣasas 'enemy', puru-bhójasas, pṛthu-śrávasas 'farfamed', prá-cetasas, prá-mahasas 'very glorious', prayásas (TS. IV. I. 8²), bhátvakṣasas 'having the power of light', ví-cetasas, vidmanápasas 'working with wisdom', viśvá-manasas, vṛka-dvarasas 5, satyá-rādhasas (TS. III. 3. II¹), satyá-savasas (VS. IV. I8) 'having true impulsion', sa-bádhasas, su-prayásas (VS. XXVII. 15), svá-yaśasas. — f. uṣásas 6.

form: nṛ-máṇās (x. 92 14).

L.m. ángirasi¹o (VS.IV.10), gó-arnasi, jātá-vedasi, dámūnasi, pṛthu-śrávasi, yajñá-vāhasi (VS.IX.37), satyá-śravasi 'truly famous', N. of a man. — f. uṣási. — n. ámhasi, áñjasi, apási, ávasi, ágasi, ókasi, krándasi 'battle-cry', cákṣasi, támasi, námasi, páyasi, páthasi (VS. XIII. 53), mánasi, rájasi, rádhasi, rétasi, śrávasi, sádasi, sárasi, héḍasi (TS. III. 3. 114).

V. m. ángiras, nodhas, vedhas; uktha-vāhas, upama-sravas, kāru-dhāyas,

<sup>2</sup> Also the transition form reto-dhásas (VS.

VIII. 10).

4 Also the adv., in the sense of the Ab.,

medas-tás (VS. XXI. 60).

7 This, as well as the D. n. dákṣase, is a transition form (p. 225, 3).

8 The stem śávas in VIII. 36 may be used for the G. Perhaps also sádas-páti- stands for sádasas-páti-. Cp. LANMAN 563<sup>4</sup>.

9 Transition forms are śárdhasya, niravásya; candrá-masas, reto-dhásas (VS.); dákşasas, dosásas (AV.).

10 Also the transfer forms ángire, héle; candrá-masi (AV.).

<sup>&</sup>lt;sup>1</sup> Also the transition form vayo-dháse (VS. XXVIII. 46).

<sup>3</sup> In VI. 31 ámhas is probably the stem used instead of the very frequent Ab. ámhasas, rather than the Ab. of ámh, as this would be the only form from such a stem, and the accent would be irregular.

<sup>5</sup> Of uncertain meaning.

<sup>6</sup> Once the strong form ususas (x. 391) for the weak.

gir-vaṇas, gir-vāhas¹, jāta-vedas, deva-śravas, dhṛṣan-manas 'bold-minded', nṛ-cakṣas, nṛ-maṇas, purū-ravas, pra-cetas², brahma-vāhas, mitra-mahas, vāja-pramahas 'superior in strength', viśva-cakṣas, viśva-dhāyas, viśva-manas, vṛṣa-maṇas, satya-rādhas, su-draviṇas 'having fine property', su-mahas 'very great', sva-tavas, sv-ojas³. — f. uṣas; ā-hanas, tigma-tejas (AV. VS.). — n. dravinas, śárdhas.

Du. N. A. V. m. apásā, tavásā, tvśāsā 4 'showering', yaśāsā, vedhasā; a-repásā, āśu-hésasā 'having neighing horses', īya-cakṣasā 'of far-reaching sight', uktha-vāhasā, uru-cáksasā, krsty-ojasā 'overpowering men', gambhīracetasā 'of profound mind', gú-parīnasā, jātá-vedasā, tád-okasā, na-vedasā, nṛ-cákṣasā, nṛ-vāhasā 'conveying men', puru-dáṇṣasā 'abounding in wonderful deeds', puru-bhojasā, pūtá-daksasā5 'pure-minded', prthu-páksasā 'broadflanked', prá-cetasā, prá-mahasā, bodhín-manasā, mata-vacasā 'heeding prayers', mano-javasā, yajna-vāhasā, rishādasā, vatsa-pracetasā 'mindful of Vatsa', vicetasā, vi-pakṣasā 'going on both sides', vipra-vāhasā 'receiving the offerings of the wise', viśvá-bhojasā, viśvá-vedasā, vy-enasā 'guiltless', śréstha-varcasā 'having most excellent energy', sa-júṣasā, V. sátyaujasā (TS. IV. 7. 152), sá-manasā 'unanimous', samāná-varcasā 'having equal vigour', sám-okasā, sá-vayasā 'having equal vigour', sá-vedasā 'having equal wealth', síndhu-vāhasā 'passing through the sea'(?), su-dámsasā, su-prayásā, su-rādhasā, su-rétasā, su-vácasā 'very eloquent', sv-ávasā, hitá-prayasā 'who has offered an oblation of food', hiranya-peśasā 'having golden lustre'6. — With au: a-repásau, V. jāta-vedasau (TS. t. 3. 72), nr-cáksasau, prá-cetasau (VS. XXVIII. 7), visvás'ardhasau 'forming a complete troop', sá-cetasau (VS. v. 3; Kh. III. 15<sup>13</sup>), sajósasau (VS. XII. 74), sá-manasau (TS. I. 3. 7<sup>2</sup>), sám-okasau (TS. I. 3. 7<sup>2</sup>)<sup>7</sup>. f. usásā and usásā<sup>8</sup>, náktosásā 'night and morning', an-ehásā, uru-vyácasā, nr-cákṣasā (AV.), bhúri-retasā, bhúri-varpasā 'multiform', viśvá-peśasā, sácetusā, sá-manasā, su-dámsasā9, su-pisasā. — With -au: ap-sarásau (AV.), a-repásau, usásau (VS. XXI. 50), yasásau; nr-cáksasau, visvá-sardhasau, vyènasau (AV.)10. — n. ándhasī, krándasī, jánasī, drádhasī (TS. III. 2. 22) 'garments', nábhasī (AV.), nádhasī 'refuges', pákṣasī (AV.), pájasī, rájasī, vácasī, vásasī (TS. 1. 5. 10<sup>1</sup>).

D. m. sa-j\(\sobhy\bar{a}m\) (VS. VII. 8).

G. n. dīksā-tapásos<sup>II</sup> (VS. IV. 2) 'consecration and penance'.

Pl. N. V. m. ángirasas, apásas, tavásas, dámūnasas, duvásas 'restless', mrgayásas 'wild animals', yasásas, rakṣásas, vedhásas, síkvasas; á-giraukasas 'not to be kept back by hymns' (girá), a-cetásas, a-codásas 'unurged', ádbhutainasas 'in whom no fault (énas) is visible', an-avabhrárādhasas 'giving undiminished wealth', án-āgasas, an-ehásas, a-repásas, á-vicetasas 'unwise', a-śeṣasas 'without descendants', áśva-rādhasas 'equipping horses', á-sāmi-śavasas 'having complete strength', ā-hanasas, ukthá-vahasas, úd-ojasas, uru-vyácasas (VS. XXVII. 16), kṣetra-sádhasas, gambhīrá-vepasas,

In VI. 246 GRASSMANN would read girvavāhas, as N.; cp. LANMAN 5642.

<sup>&</sup>lt;sup>2</sup> TS.1.5.11<sup>3</sup> has praceto rājan; the original passage, RV.1.24<sup>14</sup>, has pracetā rājan (Pada, pracetah); see Lanman 564<sup>3</sup>.

<sup>3</sup> Transition forms are sá-pratha (TB.), candra-mas (AV.), vayo-dhas, dravino-das.

<sup>4</sup> With lengthened vowel.

<sup>5</sup> Probably to be explained as a transition form (p. 225, 3).

<sup>6</sup> Also the transition forms candrámasā, sūryā-candramásā.

<sup>7</sup> Also the transition forms sūryā-candramásau, varco-dásau (VS. VII. 27), sa-jôṣau.

<sup>8</sup> In the Pada text usásā.

<sup>9</sup> In VII.  $73^{z}$  puru-dámsā is perhaps a contracted form.

<sup>10</sup> Also the transition forms usé (VS.), a-dvesé, vi-dradhé.

<sup>11</sup> There are also in the f. the transition forms uṣābhyām I. and ródasos G.

ghrsvi-rādhasas 'granting with joy', ghorá-varpasas 'of terrible appearance', citrá-radhasas, tád-okasas, tuvi-svanásas i, dvi-bárhasas, dhṛṣṇv-òjasas, nú-redasas, nr-cáksasas, pathi-ráksasas (VS. XVI. 60) 'protecting roads', pūtúdaksasas i, prthu-pajasas, prá-cetasas, prati-jūti-varpasas 'assuming any form according to impulse', prá-tavasas, prá-tvaksasas, prá-śravasas 'farfamed', bāhzdiasas, bhalanásas N. of a people, mádhu-psarasas 'fond of sweetness', mádhyecchandasas (TS.IV. 3. 113) 'sun' or 'middle of the year' (Comm.), yajña-vāhasas, vutá-dvesasas 'delivered from enemies', risádasas, rukmá-vaksasas 'wearing gold ornaments on the breast', váruna-ścsasas 'resembling sons of Varuna', vátaramhasas, váta-svanasas 'roaring like the wind', ví-cetasas, vidmanápasas. vidylin-mahasas 'rejoicing in lightning', vipra-vacasas 'whose words are inspired', vi-mahasas 'very glorious', visvá-dhāyasas, visvá-mahasas 'having all splendour', viśwa-wedasas, vi-spardhasas 'vying', wi-hāyasas, weddha-śawasas 'of great strength', śróstha-varcasas, sá-cetasas, sa-jósasas, satya-śavasas, sabharasas<sup>1</sup>, sá-manasas, sám-okasas, sá-vayasas, sá-srotasas (VS. XXXIV. 11) 'flowing', sahá-cchandasas 'accompanied by metre', sahásra-pājasas 'having a thousandfold lustre', saháujasas (VS. x. 4), su-cákṣasas 'seeing well', su-cetasas, su-dámsasas, su-pīvasas 'very fat', su-pesasas, su-pracetasas 'very wise', su-prajásas² (TS.I.6.21; AV.) 'having a good son', su-mánasas, su-mahasas, su-medhasas3, su-rádhasas, súra-caksasas 'radiant as the sun', súrya-tvacasas (VS. x. 4) 'having a covering bright as the sun', súrya-varcasas (VS. x. 4) 'resplendent as the sun', stóma-vāhusas 'giving praise', svá-tavasas, sv-ápasas, sv-ápnasas 'wealthy', svá-yasasas, sv-ávasas, hitá-prayasas. — Contracted forms: ángirās, án-āgās4, návedās, sajóṣās. — f. apásas, uṣásas and uṣásas5, yaśásas; agni-bhrājasas 'fire-bright', an-ehásas, ap-sarásas, uru-vyácasas (TS. IV. 1. 82), trşu-cyávasas 'moving greedily', dhánv-arnasas 'overflowing the dry land', nr-pésasas 'adorned by men', prá-cetasas, prá-sz-ādasas 'pleasant', mádhzarnasas 'having a sweet flood', vi-cetasas, su-pésasas, súda-dohasas 'milking sweetness', sv-ápasas, svá-yaśasas. — Contracted forms: medhás; á-josās 'insatiable', ná-vedās, su-rādhās.

N. A. n. ámhāmsi, ánkāmsi 'bends', ándhāmsi, ápāmsi, árnāmsi, ávāmsi, ágāmsi, enāmsi, ókāmsi, ójāmsi, kárāmsi 'deeds', chándāmsi, jávāmsi, jráyāmsi, támāmsi, tvákṣāṃsi, dáṃsāṃsi, dívāṃsi, dvéṣāṃsi, páyāṃsi, pājāṃsi, pāthāṃsi (VS. XXI. 46), péśāņsi, práyāņsi, bhásāņsi, mánāņsi, máhāņsi, rákṣāṇsi, rájāmsi, rápāmsi, rádhāmsi, rétāmsi, ródhāmsi, róhāmsi 'heights', vákṣāmsi, vácāmsi, váyāmsi, várāmsi 'expanses', várivāmsi, várcāmsi (VS. IX. 22), várpāmsi, vásāmsi, sárdhāmsi, sávāmsi, srávāmsi, súdāmsi, sárāmsi, sáhāmsi, skándhāmsi 'branches', hélāmsi, hvárāmsi.

A. m. ángirasas<sup>6</sup>, dhvarásas, yasásas, raksásas, vedhásas; án-āgasas, an-ehásas, á-pracetasas, a-rādhásas, uru-cákṣasas, tuvi-rádhasas, pūtá-dakṣasas7, prá-cetasas, brhác-chravasas, yajñá-vanasas, risádasas, ví-mahasas, ví-spardhasas, sa-jóṣasas (VS. <sup>1</sup> Probably a transition form (p. 225, 3). <sup>2</sup> Probably a transition form (p. 225, 2).

<sup>3</sup> Probably a transfer form; seep. 227, note 2. 4 Perhaps also an-ehas (x. 6112); see LAN-

MAN 5511.

<sup>5</sup> In the Pada text usásas.

sa A. pl. m. without ending.

<sup>7</sup> Probably a transition form (p. 225, 3). 8 Also the transition forms sárdhān, án-

āgān. 9 It is somewhat doubtful whether this is a contracted A. pl. (VII. 913).

<sup>10</sup> Once also usasas. In III 67 and VIII. 6 In I. 11218 LANMAN would take ángiras 413 LANMAN (566) would take usas as A. pl. without ending.

rewarded', vája-śravasas, viśvá-dohasas, viśvá-dhāyasas, su-péśasas. — Contracted form:  $us\bar{d}s$  (IX. 415).

I. m. ángirobhis; agni-tápobhis 'having the heat of fire', svá-yasobhis. f. svá-yasobhis; with -ad- for -o-: usádbhis (44 a, 3).

n. á-yavobhis (VS. XII. 74) 'dark halves of the month', árnobhis, ávobhis, újobhis, chándobhis (Kh.v.34), tápobhis, támobhis, tárobhis, dámsobhis, dvésobhis, dháyobhis, nábhobhis, námobhis, páksobhis (VS. XXIX. 5; TS. v. 1. 112), páyobhis, práyobhis, máhobhis, rájobhis, rádhobhis, vácobhis, váyobhis, várobhis, sávobhis, śrávobhis, sáhobhis.

D. m. ángirobhyas; with -ad- for -o-: svá-tavadbhyas (VS. XXIV. 16). n. médobhyas (VS. XXXIX. 10), ráksobhyas, váyobhyas (AV.), sárobhyas (VS. XXX. 16). — Ab. n. dvésobhyas.

G.m. áigirasām, apásām, tavásām, yaśásām, vedhásām; ádbhutainasām, dasmá-varcasām, mahā-manasām 'high-minded', stíma-vāhasām. — f. apásām, uṣásām; ap-sarásām, náksatra-śavasām 'equalling the stars in number'. n. chándasām, tárasām (AV.), mídasām (VS. XXI. 40), rákṣasām (VS. II. 23), rādhasām, védasām².

L. f. ap-sarássu (Kh. IV. 83). — n. ámhassu<sup>3</sup> (AV.), hdhassu, rájassu, váksassu, váyassu (AV.), śrávassu, sádassu4.

## γ. Stems in -yāms.

345. The primary suffix  $-y\bar{a}ms$  (137)<sup>5</sup> is used to form comparative stems. It is added either directly or with connecting -ī- to the root, which is always accented. There are seven duplicate stems formed in both ways: táv-yāms- and tứu-ĩyāṃs- 'stronger'; náu-yāṃs- and náu-ĩyāṃs- 'new'; pán-yāṃs- and pánīyāṃs- 'more wonderful'; bhūyāṃs- and bhūvīyāṃs- 'more'; rábhyāṃs- and rábhīyāms- (VS.) 'more violent'; vásyāms- and vásīyāms- 'better'; sáh-yāms- and sáhī-yāṃs- 'mightier'. Strong and weak forms are regularly distinguished. In the latter the suffix is reduced by loss of the nasal and shortening of the vowel to -yas. These stems are declined in the m. and n. only, as they form their f. by adding -ī to the weak stem; e. g. préyas-ī- 'dearer'. No forms of the dual occur, and in the plural only the N. A. G. are found.

## Inflexion.

346. The V. sing. m. ends in -as6. The forms actually occurring, if made from kánīyāms- 'younger', would be as follows:

Sing. N. m. kánīyān, n. kánīyas. A. m. kánīyāņsam, n. kánīyas. I. m. n. kánīyasā. D. m. n. kánīyase. Ab. m. n. kánīyasas. G. m. n. kánīyasas. L. m. kánīyasi. V. m. kánīyas. — Pl. N. m. kánīyāņsas. A. m. kánīyasas. N. A. n. kánīyāmsi. G. m. kánīyasām.

The forms which occur are the following:

Sing. N. m. á-tavyān<sup>7</sup> 'not stronger', ójīyān 'stronger', kánīyān, jávīyān 'swifter', jyāyān 'mightier', tārīyān<sup>8</sup> 'easily passing through', tāvīyān 'stronger', távyān 'stronger', dhávīyān 'running fast', návīyān 'new', mánhīyān 'more bountiful', yájīyān 'worshipping more', yódhīyān 'more warlike', vánīyān 'imparting more', várīyān 'better', vársīyān (VS. XXIII. 48) 'higher', vásyān

<sup>(</sup>TS. 1. 5. 61; MS. 1. 5<sup>3</sup>, p. 70).

<sup>&</sup>lt;sup>2</sup> The form vayam is perhaps contracted for vayásām (1. 16515 etc.); see LANMAN IF. 12, 201 f. 552<sup>3</sup>.

<sup>3</sup> All the Mss. read amhasu; see WHITNEY's note on AV. VI. 352.

<sup>4</sup> The form apásu (VIII. 414) is perhaps

I Also the transition forms ida-prajasas for m. apássu; cp. WACKERNAGEL I, p. III, note.

<sup>5</sup> Cp. J. SCHMIDT KZ. 26, 377-400; HIRT,

<sup>6</sup> As in the -mant, -vant and -vams stems. 7 On the Sandhi of these nominatives see

Lanman 514 (middle). 8 Cp. REICHELT, BB. 27, 104f.

'better', védīyān 'knowing better', śréyān 'better', sánīyān (TS. III. 5. 5<sup>3</sup>) 'winning much', sáhīyān 'mightier', skábhīyān 'supporting more firmly'.

N. A. n. /jīyas 'straighter', újīyas, kánīyas', jyāyas, távīyas, dávīyas 'farther', drāghīyas 'longer', návīyas, návyas, nédīyas 'quite near', préyas 'dearer', bhūyas' 'more', várīyas, várīyas, vásīyas (TS. VS.), vásyas, śréyas (TS. VS.), svádīyas 'sweeter'.

A. m. jyāyāmsam, távyāmsam, drāghīyāmsam, návyāmsam, pányāmsam 'more wonderful', vársīyāmsam (AV.), sásīyāmsam³ 'more frequent', śróyāmsam,

sáhīyāṃsam (AV.).

I. m. jávīyasā, návyasā, bhhyasā, sáhīyasā (Kh. I. I¹). — n. týīyasā 'keener', tváksīyasā 'very strong', návīyasā, návyasā, pányasā, bhávīyasā 'more abundant', bhhyasā, vásyasā, sáhīyasā.

D.m. távyase, návīyase, pánīyase, pánīyase, bálīyase (AV.) 'mightier', várṣīyase (VS. xvi. 30), śréyase (VS. xxxi. 11), sányase 'older', sáhīyase<sup>4</sup>, sáhyase, hánīyase (VS. xvi. 40) 'more destructive'. — n. návīyase, návyase, sányase.

Ab. m. távīyasas, rábhyasas 'more violent', sáhīyasas, sáhyasas. — n. bháyasas.

G. m. kánīyasas, jyāyasas, távyasas, návīyasas, návyasas, bháyasas. — n. návyasas.

L. m. vársīyasi (VS. VI. 11), sáhīyasi. — V. m. ójīyas, jyáyas.

Pl. N. m. tikṣṇīyāṃsas (AV.) 'sharper', bhūyāṃsas (TS. VS. AV.), śrɨyāṃsas. — n. nāvyāṃsi.

A. m. kánīyasas, nédīyasas, bhňyasas, rábhīyasas (VS. XXI. 46), vársīyasas (AV.), vásyasas, váhīyasas 'driving better', śróyasas (VS. TS.).

G. m. á-stheyasām 'not firm' (137). The f. form návyasīnām is twice used owing to metrical exigencies instead of návyasām in agreement with marútām5.

### $\delta$ . Stems in - $v\bar{a}ms$ .

347. The suffix  $-v\bar{a}ms^6$  is used to form the stem of the perfect participle active. Strong and weak stem? are regularly distinguished; but the latter assumes two different forms according as it is followed by a vowel or a consonant. The suffix is reduced before vowels, by loss of the nasal and Samprasāraṇa, to -us which becomes -us; before a consonant (i. e. bh), it is reduced, by loss of the nasal and shortening of the vowel, to -vas, which becomes -vat. The latter form of the stem occurs only three times in the RV. There are thus three stems employed in the inflexion of these participles:  $-v\bar{a}ms$ , -vat, -us. The weakest form of the stem (-us) appears instead of the strong twice in the A. sing. m. and once in the N. pl. m. The accent rests on the suffix in all its forms except in compounds formed with the negative a- or with su- 'well' and dus- 'ill', where it shifts to these particles. This declension is restricted to the m. and n., as the f. is formed by adding  $-\bar{v}$  to the weakest stem, as  $jagmus_{-\bar{v}}$ - 'having gone'. There are altogether (including compounds) about 75 stems in  $-v\bar{a}ms$  in the RV.

#### Inflexion.

348. No specifically n. forms occur except two in the A. sing. No L. has been met with in any number; all the other weak cases are wanting in

The form jávīyas occurs in VS. XL. 4 (Īśā Up.).

<sup>&</sup>lt;sup>2</sup> Once to be read *bhávīyas*: LANMAN 514<sup>4</sup>.

3 Comparative of the root from which

sás-vat- 'constant' is derived.

<sup>4</sup> To be read sáhyase in 1. 714.

<sup>5</sup> See Lanman 515.

 $<sup>^6</sup>$  On this suffix cp. J. Schmidt, KZ. 26, 329-377.

<sup>7</sup> On the formation of this perfect stem, see above 181 and below 491.

<sup>8</sup> This form was transferred to the N.A. sing. n. in which no consonant (-bh or -s) followed; cp. 44 a, 3.

the dual as well as the D. Ab. in the plural. The V. sing. m. is regularly formed with -vas1. The forms actually occurring, if made from cakrvánus-'having done', would be the following:

Sing. N. m. cakrván. A. m. cakrvánsam, n. cakrvát. I. cakrúsā. D. m. cakrúse. Ab. cakrúsas. G. cakrúsas. V. m. cakrvas. — Du. N. A. m. cakrvámsā. — Pl. N. m. cakrvámsas. A. m. cakrúsas. I. m. cakrvádbhis. G. m. cakriisām.

The forms actually occurring are the following:

Sing. N. m.  $\hat{a}$ -cikitv $\bar{a}n^2$  'not knowing',  $\hat{a}$ -prosiv $\bar{a}n$  'not gone away', á-rarivān 'not liberal', á-vidvān 'not knowing', cakrván 'having done', cikitván 'having noticed', jaganván 'having gone', jaghanván 'having slain', jajñiván<sup>5</sup> 'having recognized', jigīvān6 'having conquered', jujurvān 'having grown old', jujusván 'having enjoyed', jūjuván 'having sped', tatanván 'having stretched', tasthiván 'having stood', dadaśván? 'having bitten', dadasván 'become exhausted', dadrśván 'having seen', dadván 'having given', dadhanván 'having streamed', dadhrsván 'having become bold', dāśván4 'worshipping', dīdiván 'having shone', nir-jagmiván (TS. IV. 2. 14) 'having gone out', papiván 'having drunk', pupusván 'having made abundant', babhūván 'having become', bibhīván 'having feared', mamṛvān 'having died', mtdhvān4 'bountiful', yayivān 'having gone', rariván 'having given', rurukván 'having shone', vavanván 'having accepted', vidván knowing', vivikván having divided', vividván having found', vividhván having wounded', susukván having shone', susruván, 'having heard', sasaván 'having won', sāsahván 'having conquered', sāhván4 'having overcome'.

A. m. īyivāṇṣsam 13 'having gone', cakṛvāṇṣsam, cakhvāṇṣsam 14 'stretching out', cikitvāmsam, jāgrvāmsam 'waking', jūjuvāmsam, tastabhvāmsam 'having held fast', tasthivāmsam, dāśvāmsam', dīdivāmsam, dúr-vidvāmsam 'ill-disposed'. papivámsam 15, paptivámsam 'having flown', pīpivámsam 'having swelled', mamyvámsam, ririhvámsam 'having licked', vavyvámsam 'having enclosed', vāvṛdhváṃsam 'having grown strong', vidváṃsam+, (pra-)viviśiváṃsam (TS. IV. 7.151), śūśuvámsam 'having increased', sasavámsam, sasrvámsam 'having sped', sāsahvāmsam, sú-vidvāmsam 'knowing well', susupvāmsam 'having slept', suṣuvāṃsam 'having pressed (Soma)'. — Weak forms for strong: cakrúsam (x. 1371) for cakrvámsam; emusám (vIII. 6610) 16 'dangerous'.

A. n. tatanvát 'extending far', sam-vavrtvát 'enveloping'.

I. m.  $\acute{a}$ -bibhyus $\bar{a}$  'fearless', cikitus $\bar{a}$  'wise', vidus $\bar{a}$ 4. — n.  $\acute{a}$ -bibhyus $\bar{a}$ , bibhyusā.

D. m. á-raruse, ūcúse 17 'pleased', cakrúse, cikitúse, jagmúse 'having gone', jigyúse, dadāśúse 'worshipping', dāśúse¹8, bibhyúse, mīļhúse¹8, vidúse¹8, sedúse¹9 'having sat down'.

Ab. m. á-rarusas, jujurúsas. — n. tasthúsas<sup>20</sup>.

<sup>&</sup>lt;sup>1</sup> Cp. the -mant and -vant stems (316) and the  $-y\bar{a}ms$  stems (346).

<sup>&</sup>lt;sup>2</sup> On the Sandhi of these nominatives see LANMAN 512.

<sup>3</sup> From pra and vas- 'dwell'.

<sup>4</sup> Without reduplication.

N. m. á-vidvāmsas, cakrvāmsas, cikitvāmsas, jaksivāmsas (TS. 1. 4. 442) 'having eaten', jaganvámsas, jagrvámsas, jigīvámsas, tasthivámsas, titireámsas. tustuvāmsas 'having praised', dadrvāmsas 'having burst', dāśvāmsas 5, papivāmsas (TS. I. 4. 442), paptivámsas, mīdhvámsas, ririkvámsas6 'having abandoned', vidvāmsas 5, susukvāmsas, sūsuvāmsas, sasavāmsas, sasrvāmsas, sāsahvāmsas, sāhvāmsas, sú-vidvāmsas (TS. IV. 6. 52), susupvāmsas. — Weak form for strong: á-bibhyusas? (1. 115). The AV. has the hybrid form bhaktivámsas8.

A. m. cikitusas, jagmusas, jigyusas, tasthusas, dāsusas, mīļhusas,

vidusas 5, sedusas.

I. m. jāgrvádbhis. — G. m. á-dāśuṣām5, jigyúṣām, dadúṣām, mīļhúṣām5, vidusām5.

## 2. Radical Stems in -ś.

349. This declension comprises only radical stems, both monosyllabic and compound, formed from some dozen roots, numbering altogether about sixty. Some forty of these occur in the m., nearly thirty in the f., and half a dozen in the n. Nine monosyllabic stems are f., viz. dáś- 'worship', diś-'direction', dṛś-'look', náś-'night', páś-'sight', piś-'ornament', práś-9 'dispute', viś- 'settlement', vriś- 'finger'; but only two m., viz. ńś- 'lord' and spáś- 'spy'; all the rest are compounds, about 20 of which are formed from drs-. The inflexion is the same in all genders: the only n. forms which would differ from the m. and f. (N. A. du. and pl.) do not occur.

a. The only trace of the distinction of strong and weak forms appears in the nasalization of the stem in the N. sing. m. of some half dozen compounds of -dr.s-'look' 10.

b. As the s represents an old palatal (40), it normally becomes the cerebral d before terminations beginning with bh, as vid bhis; but in dis- and -dris- it becomes a guttural, owing doubtless to the influence of the & in the N. sing. and L. pl. It regularly becomes k before the -su of the L.pl., where it is phonetic (43 b 2); it usually also becomes k in the N. sing. (which originally ended in s). But in four stems it is represented by the cerebral t, e. g. vii, owing to the influence of forms in which the cerebral is phonetic. In pure- $d\hat{a}s$  'sacrificial cake', the palatal is displaced by the s of the N. s

syllable.

That is, -drn, which in its three occurrences in the RV. appears before vowels and doubles the n: -drin.

II It cannot, however, have been directly ousted by the N. -s (the former existence of which in consonant stems must have been long forgotten), but was doubtless due to edition bhaktivamsah syama the Paipp. has the influence of a- stems, such as dravino-

<sup>\*</sup> Unreduplicated form from jñā- 'know'. <sup>2</sup> With anomalous additional reduplicative

<sup>3</sup> AV. VII. 971 for cikitvas of the corresponding verse of the RV. (III. 2916), as if from a -vant stem.

<sup>4</sup> From uc- 'be wont'.

<sup>5</sup> Without reduplication.

<sup>6</sup> From ric- 'leave'. 7 See LANMAN 5133.

<sup>8</sup> In AV. vi. 793 for the reading of the bhakşīmahi.

<sup>9</sup> From pras- 'question'. LANMAN would correct the reading of AV. II. 277 to prási, explaining the word as a compound (pra-as-), where the accent prāsi would be regular.

c. There are two transition forms to the a declension from puro  $d\ddot{a}\dot{s}$ : puro  $d\ddot{a}\dot{s}$  and puro  $d\ddot{a}\dot{s}\dot{s}$  and puro  $d\ddot{a}\dot{s}\dot{s}$  are a calf'. The D. infinitive  $dr\dot{s}\dot{a}ye$  is a transition to the i-declension, for  $dr\dot{s}\dot{s}\dot{s}$ .

#### Inflexion.

350. The normal forms actually occurring, if made from vii- f. 'settlement', would be as follows:

Sing. N. V. vít. A. vísam. I. visá. D. visé. Ab. visás. G. visás. L. visí. — Du. N. A. vísā and vísau. — Pl. N. vísas. A. vísas. I. vidbhís. D. Ab. vidbhyás. G. visám. L. víksú.

Forms which actually occur are the following:

Sing. N. m. i. with nasalized stem:  $k\bar{\imath}$ - $d/n^2$  'of what kind?', sa- $d/n^3$  'resembling'; in VS. XVII. 81:  $any\bar{a}$ -d/n 'of another kind',  $\bar{\imath}$ -d/n 'such', prátisadrn 'similar' +. — 2. ending in -k:  $\bar{\imath}$ -d/n (AV.),  $et\bar{\imath}$ -d/n 'such',  $t\bar{\imath}$ -d/n 'such', divi-sp/k 'touching heaven', ni- $sp/k^5$  'caressing',  $y\bar{\imath}$ -d/n 'of what kind',  $ranv\acute{a}$ -samdrk 'appearing beautiful', svar-d/n 'seeing light', hiranya-samdrk 'resembling gold', hrdi-sp/k 'touching the heart'. — 3. ending in -t:  $sp\acute{a}t$ ; vi- $sp\acute{a}t$  'spy'. — 4. ending in -s: puro-d/as 'sacrificial cake' (occurs twice).

f. 2. ending in -k: dik (VS. AV.), nák; án-apa-sprk (AV.) 'not refusing', upa-drk 'aspect', ranvá-samdrk, sam-drk 'appearance', su-dr'sīka-samdrk 'having a beautiful appearance'. — 3. ending in -t: vít; ví-pāt ('fetterless') N. of a river.

N. A. n.  $et\bar{x}$ - $dr/k^6$ , su-samdr/k 'handsome';  $t\bar{a}$ -dr/k may be a neuter in v. 446.

A. m. spásam; puro-dásam; upari-spŕsam 'reaching above', divi-spŕsam, hrdi-spŕsam; tvesá-samdrsam 'of brilliant appearance', piśánga-samdrsam 'of reddish appearance', ranvá-samdrsam, su-samdrsam; dūre-dŕsam 'visible far and wide', su-dŕsam 'well-looking', svar-dŕsam; dūrá-ādisam' 'announcing far and wide'. — f. dísam, prásam (AV.), vísam; ā-dísam 'intention', rta-spŕsam 'connected with pious works', piśánga-samdrsam (AV.), pra-dísam 'direction', vi-pāsam, śukra-písam 'radiantly adorned', sam-dŕsam.

I. m. viśva-piśā 'all-adorned', su-saņīdrśā 8. — f. dās'ā', diśā, piśā, viśā;

pra-díśā. — n. divi-spṛśā, dūre-dṛśā.

D. m. ánar-više 'seated on the car',  $\bar{\imath}$ -dŕśe, divi-spŕśe, dū-dáśe (AV.) 'irreligious', dūre-dŕśe. — f. diśé (AV. VS.), višé; sam-dŕśe<sup>10</sup>.

Ab. m. svar-dŕśas. – f. diśás (AV.), viśás; sam-dŕśas, sam-spŕśas (VS.

XXXVIII. 11).

G. m. upa-spṛśas (AV.) 'touching', divi-spṛśas, práti-prāśas <sup>1</sup> (AV.) 'counter-disputant', su-dṛśas, svar-dṛśas, hiranya-saṇdṛśas, hṛdi-spṛśas. — f. diśás (AV.), viśas. — n. sādana-spṛśas 'coming into one's house'.

L. m. divi-spṛśi. — f. diśi (AV.), dṛśi, prāśi (AV.), viśi; pra-diśi, vi-pāśi,

sam-dŕśi. – V. m. tvesa-samdrk.

Du. N. A. V. m. rta-sprśā, divi-sprśā and divi-sprśā, mithū-dṛśā 'appearing alternately', svar-dṛśā. — f. mithū-dṛśā. — With -au: viśau.

Pl. N. m. spášas; upari-spṛśas (AV.), ṛta-spṛśas, divi-spṛśas, mandi-ni-spṛśas 'fond of Soma', ratha-spṛśas 'touching the chariot', hṛdi-spṛśas; dūre-

4 Also sadrn: all four before ca. Cp.

LANMAN 4561 and 4631.

<sup>&</sup>lt;sup>1</sup> Cp. Lanman 490<sup>1</sup>.

 <sup>2</sup> kādfin i- (x. 1083).
 3 sadfin always before a- in RV. In TS.
 II. 2. 85 (B) the final k is preserved before s: sadfink samānáis.

<sup>5</sup> From ni-spŕś., BR., GRASSMANN, LANMAN; from ni-spŕh- 'desirous of' (loc.), BÖHTLINGK (pw.).

<sup>6</sup> The form manānák (x. 616), perhaps the same as manāk 'a little', is explained by GRASSMANN as manā-nás 'dispelling wrath'.

<sup>7</sup> For dūrė-ā-disam. 8 In the Īsā Upaniṣad (VS. XL. I) also occurs īśā.

<sup>9</sup> Cp. Lanman 490 (bottom).

<sup>10</sup> There is also the transition form dršáye. 11 Cp. WHITNEY's note on AV. II. 271. The accent should be prati-prášas.

dŕśas, yakṣa-dŕśas 'having the appearance of a Yakṣa', su-dŕśas, svar-dŕśas; tveṣá-saṇdrśas, su-saṇdŕśas; viśva-píśas, su-píśas 'well adorned'; sú-sadṛśas 'handsome'. — f. díśas, viśas; ā-díśas, ud-díśas (VS. vi. 19) 'upper quarters', upa-spŕśas, pra-díśas, vi-díśas (VS. vi. 19) 'intermediate quarters', saṃ-dŕśas.

A. m. spásas; ahar-dísas 'beholding the day', bhīmá-samdrsas 'of terrible appearance', svar-dísas, híranya-samdrsas. — f. dísas, vísas, vísas; ā-dísas,

pra-disas, sam-drsas.

I. m. su-saṃdígbhis. — f. paḍbhis¹ (ɪv. 2¹²) 'with looks', viḍbhis. — D. f. digbhyás (VS. vi. 19). — Ab. f. digbhyás, viḍbhyás. — G. f. diśắm, viśắm; ā-diśām. — L. f. dikṣú (AV. VS.), vikṣú.

### 6. Radical stems in -h.

35r. This declension comprises some 80 stems formed from about a dozen roots. All three genders appear in its inflexion; but the neuter is rare, being found in only two stems and never in the plural. Of monosyllabic stems six or seven are f., one m., and one n. All the remaining stems are compounds, about three-fourths of which are formed from the three roots druk-, vah- and sah- (over 30 from the last). The origin of the two stems usnih- (AV.) a metre, and saráh-2 'bee' is obscure.

a. The distinction of strong and weak appears in compounds of vah- and sah-3, the vowel being lengthened in the N. A. sing. and N. pl. m.; also in the N. A. du. m. forms indra-vāhā, indra-vāhau, anad-vāhau; and in the f. sing. N. dakṣiṇā-vāṭ and A. havya-vāham. The strong stem -vāh- twice appears in weak cases, while it is metrically shortened 18 times in strong cases the word anad-vāh- 'ox' (lit. 'cart-drawer') distinguishes three stems, the strong one being anad-vāh-, and the weak anad-úh- before

vowels and anad-ut-5 before consonants.

b. As h represents both the old guttural aspirate sh and the old palatal jh, it should phonetically become s and d respectively before bh. But the cerebral appears for both in the only two case-forms that occur with a -bh ending: sarádhhyas from saráh, and anad-údhhyas (AV.) from anad-váh-, where the dental d takes the place of the cerebral by dissimilation. Before the -su of the L. pl., k would be phonetic; but here again, in the only form occurring, the cerebral appears: anadútsu 6. On the other hand the phonetic k appears in the N. sing. in the six forms -dhak, -dhúk, -dhrúk, -rhik, -sprh, usnik (AV.)8; while the unphonetic t appears in the two forms -våt and -såt? The word anad-váh- forms, instead of \*anad-vát, the anomalous anadván as if from a stem in -vant.

c. The stem mahá- is perhaps a transfer to the α-declension from the far more frequent but defective máh- 'great'. Several cases are formed from it: sing. N. mahá-s, G. mahásya, L. mahé; pl. N. mahá and maháni, n., G. mahánām. The D. sing. maháye, used as an infinitive, is a transfer to the i-declension from máh-.

#### Inflexion.

352. The forms actually occurring, if made from sáh- 'victorious', would be as follows:

p. 15—19.

<sup>2</sup> That the h here represents an original guttural is shown by the N. pl. sarághas (SB.) and the derivatives sarághā- and sāragha- (TB.).

3 The Pada text has always  $v\bar{a}h$  on the one hand, but  $s\bar{a}h$  on the other.

4 Cp. Lanman 498 (middle). 5 For anad-úd- by dissimilation.

<sup>6</sup> The dental again by dissimilation for the cerebral *t*.

<sup>8</sup> The derivation of this word (AV. VS.), is uncertain; it occurs in the RV. only in the extended form of  $usyih\bar{a}$ .

9 When the final h becomes t, the initial

s is cerebralized.

I BLOOMFIELD is of opinion that here, as well as in the 5 other passages in which this form occurs in the RV., it means 'with feet': Johns Hopkins University Circular, 1906, p. 15—19.

<sup>7</sup> Occurring respectively in uśú-dhak 'burning with eagerness', in three compounds of duh- 'milk', and in five compounds of druh- 'injure'. These three forms, together with uṣar-bhút, are the only examples of the restoration of initial aspiration in the declension of the RV.

Sing. N. sát. V. m. f. sāt. A. m. f. sáham. I. sahá. D. sahé. Ab. sahás. G. sahás. L. sahí. — Du. N. A. V. m. f. sáhā and sáhau. N. A. n. sahí. — Pl. N. V. m. f. sáhas. A. m. sáhas and sahás, f. sáhas. D. m. f. sad-bhyás . G. m. sahám. L. m. satsú.

The forms actually occurring are the following:

Sing. N. m. r. with -k: uśá-dhak 'burning with eagerness'; go-dhúk 'milkman', prati-dhúk² (AV. TS.) 'fresh milk'; akṣṇayā-dhrúk 'injuring wrongly', a-dhrúk 'free from malice', antaka-dhrúk 'demon of death', abhi-dhrúk 'inimical', asma-dhrúk 'inimical to us'.

2. with -t: ṣắt; abhī-ṣắt 'overpowering', ṛṣi-ṣắt 'overcoming the seer', janā-ṣắt 'overcoming men', turā-ṣắt 'overpowering quickly', niṣ-ṣắt 'overpowering', nīṣ-ṣắt 'overpowering', nīṣ-ṣắt 'overpowering', nīṣ-ṣắt 'overpowering', nīṣ-ṣắt 'overpowering', nīṣ-ṣắt 'finishing swiftly', bhuri-ṣắt 'bearing much', rayi-ṣắt 'ruling over wealth', vane-ṣắt 'prevailing in woods', virā-ṣắt 'ruling men', viśvā-ṣắt (AV.) 'all-conquering', vṛthā-ṣắt 'conquering easily', satrā-ṣắt (AV.) 'overcoming foes', satrā-ṣắt 'always conquering'; turya-vắt (TS. IV. 3. 3²) 'four-year-old ox', ditya-vắt (VS. XIV. 10; TS. IV. 7. 10¹) 'two-year-old ox', paṣṭha-vắt (VS. XIV. 9) 'four-year-old ox', madhyama-vắt 'driving at middling speed', havir-vắt 'conveying the oblation', havya-vắt 'conveying the offering'. — Irregular form: anad-vắn (AV. TS. VS.) 'ox' 10.

f. i. uṣṇlk (VS. AV.) a metre, gartā-rúk 'i 'ascending the car-seat', sabar-dhúk 'yielding nectar'. — 2. dakṣiṇā-vāṭ 'borne to the right' 12. — n. i. puru-sprk 'much desired'.

A. m. 1. Strong forms with -váham and -sāham (after ă) or -sāham (after ĭ or r): anaḍ-váham, turya-vāham (VS. XXVIII. 28), ditya-vāham (VS. XXVIII. 25), paṣṭha-vāham (VS. XXVIII. 29), vīra-vāham 'conveying men', svasti-vāham 'bringing welfare', havya-vāham (also f.); pra-sāham 'victorious', yajñā-sāham 'i mighty in sacrifice', viśvā-sāham, satrā-sāham; abhimāti-sāham 'conquering adversaries', rtī-sāham 'subduingassailants', nṛ-sāham 'overcoming men', pṛtanā-ṣāham '4. — With metrical shortening of -sāh- or -ṣāh-: rtī-ṣāham, pṛtanā-ṣāham 'a carṣaṇī-sāham '5 'ruling over men', prā-sāham, vibhvā-sāham 'overcoming the rich', sadā-sāham 'always holding out'. — 2. a-drūham, puru-spṛham. — f. gūham 'hiding-place', drūham 'fiend', mīham 'mist'; uṣṇīham (VS. XXVIII. 25); parī-ṇāham 'enclosure'.

I. m. dhanvā-sáhā 'skilled in archery', puru-spṛhā, viṣu-drúhā 'injuring in various parts'. — f. guhā¹⁶, druhā, mahā 'great'; uṣnhhā (VS. XXI. 13); prā-sáhā¹⁷ 'might', vi-srúhā 'plant'. — n. mahā.

D. m. druhé<sup>18</sup>, mahé; a-drúhe, abhi-drúhe, abhimūti-ṣāhe<sup>19</sup> (TS. v. 2. 7³), carṣaṇī-sāhe<sup>15</sup>, satrā-sāhe<sup>20</sup>. — f. mahé; uṣṇthe (VS.XXIV. 1 2); go-dùhe<sup>21</sup>. — n. mahé.

- 3 For ni-sát.
- 4 For bhūri-sat.
- 5 For vīra-sāt.
- 6 For viśva sát.
- 7 For satru sat.
- 8 Here ditya- seems to be = dvitiya-.
- 9 Probably from paṣtha- pṛṣṭha- 'back'. The TS. (IV. 3. 3<sup>2</sup> etc.) has paṣṭha-vất with dental t for cerebral t.
- 10 There is also the transfer form mahá-s, supplying the place of a N. of máh-.

II For garta-rick.

13 For yajña-sáham.

14 With unphonetic cerebral after  $\tilde{u}$  owing to the influence of the N. pṛṭanā-ṣāṭ.

- 15 The s is here not cerebralized after  $\tilde{\iota}$ .
  16 gúhā which occurs 53 times (beside guhā, once) is used adverbially, 'in secret', with retracted accent.
  - 17 From prā-sáh, beside pra-sáh-.
  - 18 This form is perhaps f.
  - 19 Strong form for weak.
- <sup>20</sup> Strong form for weak (II. 21<sup>2</sup>), but the Pada text has satrā-sáhe.
- <sup>21</sup> There is also a transfer to the *i*-declension: maháye (as an infinitive).

To be inferred from anadúdbhyas and anadútsu.

<sup>&</sup>lt;sup>2</sup> There is no evidence to show the gender of this word.

<sup>12</sup> The N. of saráh-'bee', occurs as saráf in TS. v. 3. 122 (B) and in SB. XIII. 3. 14.

Ab. m. druhás, mahás; rtī-sáhas. — f. druhás . — n. mahás.

G. m. druhás, mahás²; a-drúhas, anadúhas (AV.), pṛtanā-sáhas; with strong form: abhimāti-ṣāhas3. — f. druhás, mihás; prā-sáhas. — n. mahás: puru-sprhas.

L. m. anadúhi (AV.)4. — f. upā-náhi (AV.) 'shoe', parī-náhi (AV.).

V. I. m. turā-ṣāṭ (VS. x. 22), pṛtanā-ṣāṭ (AV.), havya-vāṭ. — 2. m. godhuk (AV.). - f. á-dhruk5.

Du. N. A. V. I. m. anad-váhau, indra-váha and indra-váhau 'conveying Indra', dhūr-sāhau (VS.IV.33) 'bearing the yoke'; shortened: carsanī-sahā, rathā-sáhā 'drawing the chariot'. — 2. m. a-drúhā, án-abhidruhā 'not inimical'. puru-spṛhā. — f. a-drúhā, a-druhā. — n. mahī.

Pl. N. V. I. m. anad-vāhas (AV.), indra-vāhas, turya-vāhas (VS. XXIV. 12), ditya-váhas (VS.), pastha-váhas (VS.), prsti-váhas (AV.) 'carrying on the sides', vajra-vāhas 'wielding a thunderbolt', vīra-vāhas, saha-vāhas 'drawing together', susthu-vāhas 'carrying well', havya-vāhas; abhimāti-sāhas, satrū-sāhas; shortened: V. carsanī-sahas. — 2. m. drúhas, mahás<sup>6</sup>; a-drúhas. V. a-druhas. go-dúhas, puru-sprhas, V. puru-sprhas.

f.7 mihas, rúhas 'sprouts'; a-drúhas, ā-rúhas (AV.) 'shoots', ghrta-dúhas 'giving ghee', puru-driihas 'injuring greatly', puru-sprhas, pra-riihas (AV.) 'shoots',

mano-withas (AV.) 'bewildering the mind', vi-srithas.

A. m. druhás<sup>8</sup>, mahás<sup>8</sup>, a-drúhas, anadúhas (AV.), puru-spŕhas. — f. drúhas, níhas<sup>9</sup> (AV. VS.) 'destroyers', míhas, rúhas (AV.); akṣā-náhas 'tied to the axle', a-drilhas, upā-rilhas 'shoots', pra-rilhas (AV.), sam-dilhas

D. m. anadúdbhyas (AV.) — f. sarádbhyas 'bees'. — G. m. mahám 10. carsanī-sáhām (VS. XXVIII. 1). — L. m. anadútsu.

# 7. Stems in semivowels: r, y, v.

353. This group forms a transition from the consonant to the vowel declension inasmuch as the stem often assumes a vocalic form before endings with initial consonant, and in some cases takes endings which otherwise appear in the vowel declension only. The -r stems are nearest the consonant declension as their radical division conforms almost without exception to that type; their derivative division, however, has several points in common with the inflexion of vowel stems.

# 1. Stems ending in -r.

354. A. Radical stems. Here the stems ending in radical r must be distinguished from those in which the r belongs to a suffix. The radical stems numbering over 50 are formed from some sixteen roots, the vowel of which is nearly always i or u. Only three of these stems contain a and only two ā. Nearly a dozen are monosyllabic, but the rest (numbering over 40) are compounds, almost a dozen of which are formed with -tur.

<sup>2</sup> There is also the transition form

mahásya.

6 With irregular accent.

7 There are no neuters except the trans-

mahānām.

i ámhas (VI. 31) is probably not an Ab. of ámh- 'distress' (which does not occur elsewhere), but by haplology for ámhas-as, which ition forms mahā and mahāni. is very frequent.

<sup>3</sup> The Pada text has -sáhas. 4 There is also the transition form mahé (m. n.).

<sup>5</sup> See WHITNEY's note on AV. VII. 736.

<sup>8</sup> With irregular accent as if weak forms. Cp. above 94, note 6 and LANMAN 501 (middle). 9 The derivation of this word is uncertain:

it is explained by Mahidhara as = nihanty. WHITNEY (AV. 11. 65) would emend to nidas. 10 There is also the transition form

The inflexion is the same in all genders except the N. A. neuter. A peculiarity is the lengthening of the radical i and u when a consonant ending follows or originally followed.

a. The distinction of strong and weak appears in dvdr- f. 'door', which is reduced to ddr- in weak cases; in tdr- and stdr- 'star', from which are made tdr-as and stf-bhis; and in the n. svdr 'light' two weak cases, the D. and G. sing., are formed from the contracted stem sdr-.

b. There are here a few transitions to the a-declension: satá-durasya and satá-duresu 'having a hundred doors', which started from weak cases like dúras; su-dhúra-s, N. sing. m. 'well-yoked', due to the A. su-dhúr-am; perhaps also the A. sing. f. du-apa-sphur-ām 'not pushing away', which occurs beside the N. pl. án apa-sphur-as². On the other hand the N. pl. m. vandhúr-as 'car-seats' seems to be a transition from the a-declension, as vandhúra- is probably the older stem.

c. The form yan-túr-am 'guide', which occurs twice for yan-tấr-am has been formed as if from -túr owing to the parallelism with ap túram which once appears beside it<sup>3</sup>.

## Inflexion.

355. The forms actually occurring, if made from pir- f. 'stronghold', would be as follows:

Sing. N. pár. A. púram. I. purá. D. puré. Ab. purás. G. purás. L. purí. — Du. N. A. púrā and púrau. — Pl. N. V. púras. A. púras. I. pūrbhís. D. pūrbhýás (VS.). G. purám. L. pūrṣú.

The forms actually occurring are as follows:

Sing. N. m. gir 'praising', vār4 'protector'; muhur-gir 'swallowing suddenly'; dir-āsīr 'badly mixed'; rajas-tūr 'traversing the air', ratha-tūr 'drawing a chariot', viśva-tūr 'all-surpassing', su-pra-tūr 'very victorious' 5.—f. gir 'praise', dvār (AV.) 'door', dhūr 'burden', pūr; amā-jūr 'aging at home', ā-sīr 6 (AV. TS.) 'mixture'.

N. A. n. vár 'water', súar' 'light' 8, súvar (TS. 11. 2. 121).

A. m. thram 'promoter'; ap-thram' 'active', āji-thram' victorious in battles', rajas-thram, ratha-thram, vrtra-thram 'conquering enemies'; a-jhram 'unaging', apa-sphhram 'bounding forth', rta-jhram 'grown old in (observing) the law', gåvāsiram 'mixed with milk', yåvāsiram 'mixed with corn', sahásra-dvāram 'having a thousand doors', su-dhhram 'well yoked' 10. — f. giram, dvāram (AV.), dhhram, phram; ā-shram, upa-sthram 'cover', sam-giram 'assent'.

I. m. bándhurā II (AV.) 'binder'(?). — f. girá, dhurá, purá; abhi-pra-múrā

'crushing', abhi-svárā 'invocation', ā-sírā. — n. viśva-túrā.

D. m. giré; nis-ture 'overthrowing'. — f. upa-stire. — n. sūré.

Ab. f. dhurás; ni-júras 'consuming by fire'.

G. m. gávāsiras, yávāsiras, radhra-túras 'encouraging the obedient'. — f. amā-jūras. — n. sūras 12; rásāsiras 'mixed with juice'.

That is, the s of the N. sing. m. and f. This rule also applies in v dr (L. 1323) if Grassmann is right in explaining this form as a N. sing. m. meaning 'protector', from v dr (vr- 'cover'); but BR., s. v. v dr-, regard this form as a corruption.

<sup>2</sup> In the later language dvār- f. and púr- f. went over to the α- declension as dvāra- n. and pura- n., while vār- n. went over to the i-

declension as vāri-.

3 See Lanman 486 (bottom).

- 4 If this form is not a corruption.
- 5 There is also the transition form sudhiura-s.
  - 6 From sy- 'mix'.

- 7 This is the only declensional form of this word occurring in the AV.
- 8 Neuter compounds ending in -r are avoided; thus the AV. has the transition form náva-dvāra-m, N. n.
  - 9 For ap-(a)-s-tiram 'getting over work'.

    There is also the anomalous form
- yanturam for yantaram.
- 11 Probably a transfer from the a-declension.
- 12 With the accentuation of a dissyllabic stem (súar). In VIII. 61<sup>17</sup> for súra  $\dot{a}$  the Pada text has sứre  $\dot{a}$ , but it is probably the G. sứras. In 1. 66<sup>10</sup>, 69<sup>10</sup> the uninflected form súar seems to be used in a G. sense.

L. f. dhuri, puri. - n. súar.

Du. N. A. m. vṛtra-túrā, sanā-júrā 'long grown old', su-dhúrā. — f. dvārā; mithas-túrā 'alternating'; with au: dvārau, dhúrau.

Pl. N. V. m. giras, giras, miras 'destroyers'; ap-tiras, ā-miras 'destroyers'; gávāsiras, try-àsiras 'mixed with three (products of milk)', dádhy-āsiras 'mixed with curds'; dur-dhiras 'badly yoked', dhiyā-jiras 'grown old in devotion', nis-tiras, bandhiras (AV.), vandhiras 'seat of the chariot', vytra-tiras (VS.vi. 34).—f. gíras, giras (AV.), táras 'stars'², dvāras³, dvāras, p'iras; án-apasphuras 'not struggling', amā-jiras, mithas-tiras.

A. m. giras; ā-miras, gávāśiras, mithas-tiras, yávāśiras, sam-gíras, su-dhúras. — f. gíras, diras<sup>4</sup>, dhúras, púras, psiras<sup>5</sup> 'victuals'; ni-púras<sup>6</sup> (VS. AV.), parā-púras<sup>6</sup> (VS. AV.), vi-stiras 'expansion', sam-stiras 'con-

traction'.

I. m. ratha-tūrbhis. — f. gūrbhis, pūrbhis, stifbhis sistars. — D. n. vārbhyás (VS.). — G. m. sám-āsirām 'mixed'. — f. girám, purám. — L. m. tūrṣủ. — f. gūrṣủ, dhūrṣủ, pūrṣủ. — n. pṛtsu-tūrṣu sivictorious in battle'.

356. B. Derivative stems. — Derivative stems ending in r consist of two groups, the one formed with the suffix -ar, the other with -tar. The former is a small group containing only eight stems, the latter is a very large one with more than 150 stems. Both groups agree in regularly distinguishing strong and weak cases. The strong stem ends in -ar or  $-\bar{a}r$ , which in the weak forms is reduced to r before vowels and r before consonants. Both groups further agree in dropping the final of the stem in the N. sing. m. f., which case always ends in  $-\bar{a}^{10}$ . They resemble the vowel declension in adding the ending -n in the A. pl. m., and -s in the A. pl. f. and in inserting n before the  $-\bar{a}m$  of the G. pl. They have the peculiar, ending -ur in the G. sing. 11.

## a. Stems in -ar.

357. There are only five simple m. and f. stems in -ar, viz. uṣ-ár- t. 'dawn', dev-ár- m. 'husband's brother', nánānd-ar- f. 'husband's sister', nár-12 m. 'man', svásar-13 f. 'sister'; and the two compounds svàr-nar- m. 'lord of heaven' and saptá-svasar- 'having seven sisters'. Of these, uṣár- shows only case-forms according to the consonant declension, while nár- and svásar- have some according to the vowel declension also. Of nánāndar- only the G. and L. sing. and of devár- only the A. sing. and the N. and L. pl. occur. Nearly all case-forms are represented by these five stems taken together. There are also the three neuters áh-ar- 'day', ńdh-ar- 'udder', and vádh-ar- 'weapon', which occur in the N. A. sing. only. The first two supplement the -an stems áh-an- and ûdh-an- in those cases.

<sup>2</sup> Strong form of tár- = stár- 'star'. The gender is uncertain.

3 Once the weak form duras.

5 Occurring only in x. 263; it is a n. sing.

according to BR.

9 With L. pl. ending kept in the first member.

 $^{\text{ro}}$  In this they resemble the N. m. of nouns of the -an declension.

11 Except nár-as and usr-ás.

12 This word is probably derived with the suffix -ar; cp. Brugmann, Grundriss 2, p. 359.

11 Here -sar is probably a root; cp.

Brugmann, op. cit., 2, p. 8, footnote.

This form is used 5 times as a L. singdropping the -i like the -an stems, as áhan beside áhani.

<sup>4</sup> The strong form dvaras is once used. The accentuation of a weak case, duras, occurs once.

<sup>6</sup> The meaning and derivation of these two words is uncertain; see Whitney's note on AV. XVIII. 228.

<sup>7</sup> From pur- 'stronghold' and pur- 'abundance'.

<sup>8</sup> Weak form, accented like a dissyllabic stem. In Kh. I. 116 normally accented, but spelt with ri as stribhis.

#### Inflexion.

358. Sing. N. m. hatá-svasā (AV.) 'whose sisters have been slain'. — f. svásā; saptá-svasā 'having seven sisters'. — n. áhar, údhar, vádhar.

A. m. deváram, náram. — f. svásāram. — I. f. svásrā. — D. m. náre; svàr-nare. — f. svásre. — Ab. f. svásur<sup>1</sup>. — G. m. náras. — f. usrás, nánāndur (AV.), svásur. — L. m. nári. — f. usrí² and usrám³, nánāndari⁴. — V. f. uṣar.

Du. N. A. m. nárā, V. narā and narau. — f. svásārā and svásārau. — L. f. svásros.

Pl. N. m. deváras, náras, V. naras, suar-naras. — f. svásāras. — A. m.  $n\bar{r}n^5$ . — f. usrás, svás $\bar{r}s$ . — I. m.  $n\bar{r}bhis$ . — f. svás $\bar{r}bhis$ . — D. m.  $n\bar{r}bhyas$ . — Ab. m.  $n\bar{r}bhyas$ . — G. m.  $narám^6$  and  $nrnám^7$ . — f. svás $r\bar{a}m^6$  and svás $\bar{r}n\bar{a}m$ . — L. dev $\bar{r}su$ ,  $n\bar{r}su$ .

### b. Stems in -tar.

359. This group includes two subdivisions, the one forming its strong stem in -tar, the other in -tar. The former consists of a small class of five names of relationship: three masculines, pi-tár- 'father',  $bhr\dot{a}$ -tar- 'brother',  $n\dot{a}p$ -tar-8' 'grandson', and two feminines, duhi-tár- 'daughter', and  $m\bar{a}$ -tár- 'mother'; and the m. and f. compounds formed from them. The second class consists of more than 150 stems (including compounds), which are either agent nouns accented chiefly on the suffix, or participles accented chiefly on the root. These are never used in the f., which is formed with - $\bar{\iota}$  from the weak stem of the m., e. g.  $j\dot{a}nitr$ - $\bar{\iota}$ - 'mother' (377).

a. This declension is almost restricted to the m. and f. gender. The only n. stems are dhar-tár- 'prop', dhmā-tár- 'smithy', sthā-tár- 'stationary', vi-dhar-tár- 'meting out'; and from these only about half a dozen forms occur. The only oblique cases met with are the G. sthātúr and the L. dhmātárī (Pada-tárī). The N. A. sing. which might be expected to appear as -tár, seems to have attained to no fixity of form, as it was of extremely rare occurrence. It seems to be represented by the following variations: sthātar (VI. 496), sthātír (I. 726), sthātír (I. 585, 681, 707), dhartári (IX. 8642; II. 2317), vi-dhartári (VIII. 592; IX. 474)9.

#### Inflexion.

360. The inflexion is exactly the same in the m. and f. except that the A. pl. m. ends in  $-t\bar{r}n$ , but the f. in  $-t\bar{r}s$ .

The forms actually occurring, if made from mātár- f. 'mother', as representing a name of relationship, and from janitár- m. 'begetter', as representing an agent noun, would be as follows:

Sing. N. mātá; janitá. A. mātáram; janitáram. I. mātrá; janitrá. D. mātré; janitré. Ab. māthr; janithr. G. māthr; janithr. L. mātári; janitári. V. mátar; jánitar.

Du. N. A. mātárā and mātárau; janitárā and janitárau. I janitíbhyām (VS.). D. janitíbhyām. G. mātrós; janitrós. L. mātrós; janitrós.

The ending -ur in this declension appears to represent original -rz through declension -rr; cp. Lanman 426, Brugmann, KG. p. 381 the stem. (middle).

<sup>2</sup> The metre requires usári. As to the sr

- cp. 57, I  $\alpha$ .

  3 The ending  $-\bar{a}m$  is a transfer from the  $\bar{i}$  declension. The metre requires  $u_{\bar{i}} a \bar{n} m$  in which  $-\bar{a}m$  is added direct to the stem.
- 4 The metre requires nánāndri (x. 8546). 5 On nrn as a metrically shortened form for other cases see PISCHEL, VS. I, p. 42f.
- <sup>6</sup> The only two forms in the derivative -(t)ar declension in which  $-\bar{a}m$  is added direct to the stem

7 Often to be read as nṛṇām; see LAN-MAN 43.

8 In the RV. this stem occurs in weak forms only, being supplemented in the strong by nápāt. The TS. (I 3.41) however has the strong form náptāram with long vowel, like svásāram.

9 See LANMAN 422 f.

. .

16\*

Pl. N. mātáras; janitáras. A. mātŕs; janitŕn. I. mātŕbhis; janitŕbhis. D. māti bhyas; janiti bhyas. Ab. māti bhyas; janiti bhyas. G. māti nam; janitṛṇām. L. mātṛṣu; janitṛṣu. V. mātaras; janitāras.

Forms actually occurring are the following:

Sing. N. r. m. pitá, bhrátā; dákṣa-pitā (TS. w. 3. 41; VS. xw. 3) 'having Dakṣa as father', tri-mātā 'having three mothers', dvi-mātā 'having two mothers', hatá-bhrātā (AV.)/ whose brothers have been slain', hatá-mātā (AV.) whose mother has been slain'. — f. duhitā, mātā; a-bhrātā 'brotherless', síndhumātā' 'having a stream as mother'.

22. m. anv-ā-gantā (VS. XVIII. 59)3, avitā 'protector', upa-sattā (TS. VS. AV.) 'attendant', krostā 'jackal' ('yeller'), janitā, jaritā 'praiser', trātā 'protector', tvásta 'fashioner', dītá 'giver', dhartá 'supporter', netá 'leader', prati-grahītá (VS. VII. 48) 'receiver', prati-dharta (VS. XV. 10) 'one who keeps back', pra-

vaktá (Kh. IV. 88) 'speaker', vodhá and výdhā 'driving'; etc.

A. I. m. pitáram, bhrátaram; ádri-mātaram 'having a rock for a mother', já-mātaram 'son-in-law', síndhu-mātaram. — f. duhitáram, mātáram, saptá-

mātaram 'having seven mothers'.

- 2. m. adhi-vaktāram 'advocate', anu-ksattāram (VS. XXX. 11) 'doorkeeper's mate', abhi-sektüram (VS.XXX.12) 'consecrator', abhi-sartūram (VS.) 'assistant', avasātāram 'liberator', avitāram, ástāram 'shooter', ā-yantāram 'restrainer', is-kartāram 'arranging', upa-manthitáram (VS. XXX. 12) 'churner', upa-sektáram (VS. XXX. 12) 'pourer-out', kártāram 'agent', kṣattáram (VS.XXX.13) 'door-keeper', gántāram 'going', goptāram (Kh.v.33) 'protector', céttāram 'attentive', janitāram (VS.XIII. 51), jaritāram, jetūram victorious', jostāram (VS. XXVIII. 10) cherishing', tarutāram 'victor', trātāram, tvāstāram, dātāram 'giver', dātāram 'giving', dhartāram, nidātāram 'one who ties up', nis-kartāram (TS.1v. 2. 73) 4, netāram 'leader', panitāram 'praising', pari-veṣṭāram (VS. XXX. 12) 'waiter', pavitāram 'purifier', pura-etāram (VS. XXXIII. 60) 'leader', pesitáram(VS. XXX. 12) 'carver', pra-karitáram (VS. XXX. 12) 'sprinkler', pra-netāram 'leader', pra-dātāram (VS. vii. 46; TS.) 'giver', prahetáram 'impeller', bodhayitáram 'awakener', bhettáram (TS.1.5.64) 'breaker', mandhātāram 'pious man', marditāram 'comforter', yantāram 'ruler', yantāram 'restraining', yātāram 'pursuer', yoktāram (VS. XXX. 14) 'exciter', rakṣitāram 'protector', vanditáram 'praiser', vi-bhaktáram 'distributor', vi-moktáram (VS.xxx. 14) 'unyoker', śamitáram (VS. XXVIII. 10) 'slaughterer', śrtam-kartáram (TS. III. 1. 44) 'cooking thoroughly', śrotáram 'hearer', sanitáram 'bestower', samcddhāram5 'kindler', savitāram 'stimulator', stotāram 'praiser', hantāram 'slayer', has-kartáram 'inciter', hétāram 'driver', hótāram 'invoker'.
- I. i. m. náptrā, pitrá, bhrátrā (AV.). f. duhitrá, mātrá (VS. AV.). 2. m. ástrā, tvástrā (AV.), dhātrā 'establisher', pra-savitrā (VS.x.30) 'impeller', savitrá.
- D. I.m. náptre, pitré. f. duhitré, mātré. 2. m. ástre (AV.), kartré (AV.), krostré (AV.), jaritré, jóstre (VS. XVII. 56), tvástre (VS. XXII. 20), dütré, dhartré (VS. XVII. 56; TS. IV. 6. 32), dhātré (AV.), prati-grahītré (VS. VII. 47), rakṣitré (AV.), vi-dhātré (AV.) 'disposer', samitré (TS. 1V. 6. 33), savitré, stotré, hantré (VS. XVI. 40), hótre.
- Ab. 1. m. pitúr, bhrátur, ví-jāmātur 'son-in-law'. f. duhitúr mātúr. 2. m. ástur, tvástur (AV.), dhātúr, savitúr, hótur.

 $<sup>-\</sup>bar{a}$  see Lanman 423-5.

<sup>&</sup>lt;sup>2</sup> The nominatives of the m. agent nouns are so numerous (140 in the RV. alone) that is-kartaram in the same passage. examples only can be given here.

<sup>3</sup> Used with the A., an example of in-

<sup>1</sup> On the Sandhi of these nominatives in | cipient use as a periphrastic future: = 'will follow'.

<sup>4</sup> RV. x. 1405 and VS. XII. 110 have

<sup>5</sup> For \*edh-tāram, from idh- 'kindle'.

G. I. m. náptur, pitúr, bhrátur. — f. duhitúr, nánāndur (AV.), mātúr. — 2. m. abhi-ksattúr 'carver', avitúr, ástur, utthātúr (AV.) 'resolving', kartúr (Kh. IV. 5<sup>6. 10</sup>), cettúr (AV.), janitúr, jaritúr, trātúr, tvástur, dātúr, dhātúr (VS. TS. AV.), ni-dhātúr 'one who lays down', netúr, néstur 'leader', mandhātúr, yantúr (VS. IX. 30), vanditúr, vāvátur 'adherent', vódhur' 'draught-horse', sanitúr, sanitúr, savitúr, sotúr 'presser of Soma', stotúr, hítur.

L. I. m. pitári. — f. duhitári, mātári. — 2. m. netíri, vaktári (AV.) 'speaker', sotári. — With metrically protracted -ī: etárī², kartárī, vaktárī³.

V. I. m. jāmātar, pitar, bhrātar. — f. duhitar, mātar. — 2. m. avaspartar 'preserver', avitar, janitar, jaritar, trātar, tvastar, dartar 'breaker', doṣā-vastar 'illuminer of the dark', dhartar, dhātar, netar, neṣṭar, pra-netar, pra-yantar 'bringer', yajña-hotar 'offerer at a sacrifice', vi-dhartar 'ruler', vi-dhātar, vi-sastar (AV.) 'slaughterer', sanitar, savitar, su-sanitar 'liberal giver', sotar, stotar (VS.XXIII.7; TS.VII.4.20), sthātar 'guider', hotar.

Du. N. A. V.<sup>4</sup> I. m. pitárā, bhrátarā; ihéha-mātarā 'whose mother is here and there', dákṣa-pitarā, mātárā-pitárā<sup>5</sup> 'father and mother', síndhu-mātarā. — f. duhitárā, mātárā, sam-mātárā 'twins'. — With -au: m. pitárau, sam-mātárau (AV.). — f. duhitárau (AV. Kh. III. 15<sup>13</sup>), mātárau. — 2. m. avitárā, a-snātárā 'not (fond of) bathing', uṣṭárā 'ploughing bulls', gántārā, coditárā 'instigators', janitárā, dhartárā, ni-cetārā 'observers', pretārā 'lovers', yantárā 'guides', rakṣitárā, samitárā, sthátārā, hstārā. — With shortened vowel: manotárā 'disposers'. — With -au: anu-ṣṭhātárau (AV.) 'undertakers', kṣattárau (AV.) 'carvers', goptárau (AV.), dātárau, rakṣitárau, hstārau (VS. XX. 42), hotārau (TS. IV. I. 8²). — With shortened vowel: dhánutarau 'running swiftly', savātárau (VS. XXVIII. 6) 'having the same calf' 7.

I. 2. m. hótrbhyām (VS. XXI. 53). — D. 1. m. pitřbhyām 8. — G. 1. m. pitrós. — f. mātrós. — 2. m. pra-sāstrós (VS.) 'directors'. — L. 1. m. pitrós. — f. mātrós 9.

Pl. N. I. m. pitáras, V. pitaras, bhrātaras; dákṣa-pitaras, dákṣa-pitāras <sup>10</sup> (TS. I. 2. 3<sup>1</sup>), gó-mātaras 'having a cow for mother', pṛśni-mātaras 'having Pṛśni for a mother', sindhu-mātaras, su-mātáras 'having a beautiful mother'. — f. duhitáras, mātáras, V. mātaras; a-bhrātáras and a-bhrātaras (AV.). — 2. m. agni-hotāras 'having Agni for a priest', abhi-kṣattáras, abhi-svartáras 'invokers', dstāras, upa-kṣetáras 'dwelling near', gántāras, cetáras 'avengers', jaritáras, joṣtáras, trātáras, daditáras (VS. VII. 14) 'keepers', dātáras, dhartáras, dhátāras, ni-cetáras 'observing' and 'observers', ninditáras 'scorners', nṛ-pātáras 'protectors of men', ntāras and netáras, panitáras, pari-veṣtáras (VS. VI. 13), pavītáras 'purifiers', pura-etáras (VS. XVII. 14; TS. IV. 6. 14), pra-jñātáras 'conductors', pra-netáras, prāvitáras 'promoters', pretáras, yantáras, rakṣitáras, vantáras 'enjoyers', vi-dhātáras, vi-yotáras 'separators', samitáras, sritāras, sanitáras, sotáras, stotáras, sthātáras, sváritāras 'roanng', htāras, hhāras <sup>11</sup>.

on AV. v. 276.

I For \*váh-tur, from vah- 'draw'.

<sup>&</sup>lt;sup>2</sup> GRASSMANN takes this form (V. 41<sup>10</sup>; VI. 12<sup>4</sup>) as a N. f. of *ctár*- 'one who approaches or asks'.

<sup>3</sup> The Pada text has i in all these forms. Cp. NEISSER BB. 20, 44.

<sup>4</sup> In the RV. the ending -ā occurs 176 times, -au only 10 times: LANMAN 427 (mid.).

<sup>5</sup> A Dvandva compound in which both members are inflected.

<sup>6</sup> The shortening is probably metrical.

<sup>7</sup> This is the interpretation of the commentator; but the derivation of the word is obscure.

<sup>&</sup>lt;sup>8</sup> No form in -bhy $\bar{a}m$  with the Ab. sense occurs.

<sup>9</sup> These G. L. forms as well as svásros must be pronounced trisyllabically in the RV. except mātrós in VII. 39. See LANMAN 428.

<sup>10</sup> With long grade yowel.
11 The form vasu-dhātaras (AV. V. 276) may be N. pl. with shortened vowel, but Whitney regards it as a comparative N. sing. 'greater bestower of wealth'. See his note

A. I. m. pitṛ́n¹; dákṣa-pitṛn, pṛ́sni-mātṛn. — f. mātṛ́s². — 2. m. ástṛn, a-snātṛ́n, kartṛ́n (AV.; Kh. IV. 5³°), goptṝn (AV.), jaritṛn, trātṛn, dātṛ́n, pātṛ́n (AV.) 'drinkers', pra-voḍhṛ́n 'carrying off', stotṛ́n, sthātṛ́n, hótṛn.

I. z. m. n'iptṛbhis, pitṛbhis, bhrātṛbhis; saptā-mātṛbhis. — f. mātṛbhis. — 2. m. ástṛbhis, kartṛbhis, dhātṛbhis, partṛbhis 'with aids', sctṛbhis 'bindings',

sotibhis and sótybhis, hetibhis, hót;bhis.

D. I. m. pitŕbhyas. — f. mātŕbhyas. — 2. m. ksattŕbhyas (VS. XVI. 26) 'charioteers', raksitŕbhyas (AV.), stotŕbhyas, saṃ-grahītŕbhyas (VS. XVI. 26) 'drivers'.

Ab. I. m. pitibhyas. — f. mātibhyas.

G. m. i. pitṛṇām³. — 2. unnetṛṇām (VS. vi. 2) kind of Soma priests, jaritṛṇām, dātṛṇām⁴ (AV.), dhātṛṇām, stotṛṇām, hótṛṇām. — With ṛ: i. pitṛṇām (TS. i. 3. 6¹ etc.); 2. dhātṛṇām (TS. iv. 7. 14³), netṛṇām (TS. i. 3. 6¹)⁵.

L. 1. m. pitisu (AV.). — f. mātisu. — 2. m. hótisu.

## 2. Stems in y and v.

36r. These stems, of which there are only five, form a transition to the vowel declension because, while taking the normal endings like the ordinary consonant declension, they add -s in the N. sing. m. f. and show a vowel before the endings with initial consonant. There are no neuter forms 6.

# a. Stem in $-\bar{\alpha}y$ $(-\alpha i)$ .

362. This type is represented by only one word, usually stated in the form of  $r\acute{a}i$ , which never appears in any case. This word, which is both m. and (rarely) f., means 'wealth', being in origin doubtless connected with the root  $r\bar{a}$ - 'give'. The stem appears as  $r\bar{a}y$ - before vowels and  $r\bar{a}$ - before consonants. The forms occurring are: Sing. A.  $r\acute{a}m$ . I.  $r\ddot{a}y\acute{a}$ . D.  $r\ddot{a}y\acute{a}$ . Ab.  $r\ddot{a}y\acute{a}s$ . G.  $r\ddot{a}y\acute{a}s$ ? - Pl. N.  $r\acute{a}yas$ . A.  $r\ddot{a}y\acute{a}s$ 8. G.  $r\ddot{a}y\acute{a}m$ .

a. The inflexion of rāy- is supplemented by rayi-, m. f., from which occur the additional cases sing. N. rayis, A. rayim, I. rayyā and rayinā; pl. I. rayibhis. G. rayīnām.

b. There are three forms which seem to be irregular compounds of  $r\bar{a}j$ : sing. G.  $rdh\dot{a}d$ -rayas ('increasing wealth') N. of a man, D.  $brh\dot{a}d$ -raye 'having much wealth', and du. N.  $\dot{s}at\dot{a}$ - $r\bar{a}$  'having a hundred goods'. In the first two forms the vowel of the stem has probably been shortened metrically ; in the third form, the stem as it appears before consonants has been used.

# b. Stems in $-\alpha v$ (-o) and $-\bar{\alpha}v$ (-au).

363. There are two stems in  $-\alpha v$ , viz.  $g\dot{\alpha}v$ - m. 'bull', f. 'cow', and  $\dot{\alpha}y\dot{\alpha}v$ - m. f. 'heaven', 'day'. Both distinguish strong forms, in which the vowel is lengthened; both take -s in the N. sing. before which the end of the stem assumes the form of  $-\alpha u$ . Both show various irregularities in their inflexion.

<sup>2</sup> Once with m. ending matrn (x. 352).

4 See WHITNEY's note on AV. v. 24<sup>3</sup>.

6 Except the isolated dyavī occurring once as V. du. of dyáv- 'heaven'.

9 According to BR. and GRASSMANN, they are formed from the stems by had-ri- and ydhad-ri-. Cp. LANMAN 431.

On the Sandhi of these accusatives see LANMAN 429.

<sup>3</sup> With n before the ending  $-\bar{a}m$  as in the vowel declension, and accent shifted to the ending as in the i- and u- declension when those vowels are accented.

<sup>5</sup> Also udgātrnām (TS. III. 2. 9<sup>5</sup>) and bhrātrnām (TS. II. 6. 6<sup>2</sup>). See Benfey, Vedica, p. 1—38; IS. 13, 101; LANMAN 430.

<sup>7</sup> The G. a few times has the irregular accent i ayas.

<sup>&</sup>lt;sup>8</sup> Accented thus 22 times as a weak case in the RV., and four times rayas as a strong case (also VS. II. 24). The SV. I. 4. I. 4<sup>I</sup> has the A. pl. ras in the variant adhad rah for adhata of RV. VIII. 96<sup>I3</sup>.

The inflexion of  $g\dot{a}v$ -, which is almost complete (the only forms not represented being the weak cases of the dual) is as follows:

Sing. N. gáus. A. gám. I. gávã. D. gáve. Ab. gós. G. gós. L. gávi. — Du. N. A. gắvā and gắvau. — Pl. N. gắvas. A. gắs. I. góbhis. D. gśbhyas. G. gávām and gśnām. L. gśsu. V. gāvas.

a. Three of these forms, gắm, gắs, gós must, in the RV., be read as dissyllables in a few instances, though this is doubtful in the case of gas i.

b. The normal G. pl. gávām, which is by far the commoner, occurring 55 times in the RV., is found only 3 times at the end of a Pada (which in two of these instances ends iambically); the irregular G. ginām2. occurring 20 times in the RV., is found at the end of a Pada only. The use of the latter form thus seems to have arisen from metrical exigencies.

c. It is to be noted that from the point of view of accentuation the stem is not treated as a monosyllable, since the Udatta never shifts to the ending in weak cases.

d. There are three compounds formed from this stem: á-gos 3 G. sing. m. having no cows'; pṛśni-gāvas 4 N. pl. m. 'having dappled cows'; rúśad-gavi L. sing. f. 'having bright cows'.

**364.** The strong form of dy dv- (in which the y has often to be read as i) is dyáv-, which appears as dyíu- before the -s of the N., and with loss of the final u, in the A. sing.  $dy dm^5$ . The normal stem dy dv-appears in weak cases only, in the contracted Ab. G. dv/s<sup>6</sup> and the L. dv/avi; it is otherwise entirely displaced by the Samprasarana form div- (from which the accent shifts to the ending in weak cases) before vowels and dyil- before consonants.

The weak grade stem div- has not only entirely ousted dydv- from the I. D. sing., and largely from the Ab. G. L. sing., but has even encroached on the strong forms: divam occurring (21 times) beside dyam (79 times), and divas (once) beside dyávas (22 times) in the N. pl. Similarly dyú-7 has displaced dy dv- in the weak plural forms: A. dy dn (for \*dy dv as) and I. dy db his(for \*dyó-bhis).

The inflexion of  $dy\dot{a}v$  is less complete than that of  $g\dot{a}v$ , the D. Ab. G. L. pl. being wanting as well as all the weak cases of the dual. The forms occurring are the following:

Sing. N. dyáus. A. dyám; dívam. I. divá. D. diví. Ab. dyós; divás 8. G. dyśs; divás?. L. dyávi; diví10. V. dyáus and dyáus 11. — Du. N. A. V.  $dy\bar{d}v\bar{d}^{12}$ ;  $dyav\bar{\iota}^{13}$ . — Pl. N. V.  $dy\bar{d}vas$ ;  $divas^{14}$  (once). A. m.  $dy\bar{u}n$ ; f.  $divas^{15}$ (twice). I. m. dyúbhis 16.

a. The A. dyám seems to require dissyllabic pronunciation in a few instances. The form dyáus occurs once (1. 718) as an Ab. instead of dyás. The form dívam doubtless made its way into the A. sing. owing to the influence of the very frequent weak cases divás etc., which taken together occur more than 350 times in the RV.

See Lanman 431 (bottom). The form gavas is actually used for the A, in Kh. 11. 6<sup>15</sup>.

<sup>&</sup>lt;sup>2</sup> Formed on the analogy of the vowel declension.

<sup>3</sup> This might be formed from the reduced stem á-gu-.

<sup>4</sup> There is also from the reduced stem -gu- the A. sing. m. pr'sni-gum, as the N. of

<sup>5</sup> For  $*dy\bar{a}[u]m$  like  $g\bar{a}m$  for  $*g\bar{a}[u]m$ .

<sup>6</sup> Like gós for \*gávas.

<sup>7</sup> Based on diu.

<sup>8</sup> In the RV. dyós occurs only twice as or in verses borrowed from the RV. Ab., divás 50 times.

<sup>9</sup> In the RV. dyós occurs 4 times as G., divás 180 times.

<sup>10</sup> dvávi occurs 12 times, divi 118 times in the RV.

II dyàus, that is, diaus occurs only once and is to be read as a dissyllable.

<sup>12</sup> In the G. du. of the Dvandva divásprthivyos, the G. sing. takes the place of the G. du., which would be divos.

<sup>13</sup> The neuter form used once for the m.

<sup>14</sup> Also twice in AV.

<sup>15</sup> Also 3 or 4 times in AV.

<sup>16</sup> dyūn and dyúbhis occur only in the RV.

b. Starting from div-ds etc. a transition stem divá- according to the a- declension came into being. From this occur the forms divá-m 'heaven' and divé-dive 'every dav'. and in compounds tri-devá-m (AV.) 'third heaven', tri-divé, su-devá-m (AV.) 'bright day'.

c. It is to be noted that the accentuation of forms from div- follows the rule of monosyllables, while that of forms from dyáz- and dyú-, as may be inferred from dyázi

and dyribhis, does not, being the same as that of gav-.

d. The following case-forms of compounds of dyáv- occur: sing. N. pra-dyáus (AV.) 'highest heaven', I. pra-divā, Ab. pra-divas, L. pra-divi; áhar-divi 'day by day'; du. N. A. prthivi-dyāvā 'earth and heaven', dyāvā-ksāmā, dyāvā-prthivi, dyāvā-bhūmī 'heaven and earth', vṛṣṣṭi-dyāvā 'having a raining sky'; pl. N. vṛṣṭi-dyāvas, su-divas.

365. There are two stems in -āv, viz nav- (nau-) f. 'ship', and glav- (glau-) m, or f. 'lump'. The inflexion is very incomplete, as no dual and only two plural forms are found; but as far as can be judged from the forms occurring it is quite regular, the accentuation being that of monosyllabic stems. The forms of  $n\dot{q}_{7'}$  are:

Sing. N. náus. A. návam, su-návam 'good ship' (VS. XXI. 7). I. nāvā'.

G. nāvás. L. nāví. — Pl. N. návas. I. naubhís.

From gláv- occur only the two forms N. sing. gláus (AV.) and I. pl. glaubhis (VS. xxv. 8)2.

## B. Vowel stems.

366. The vowel declension comprises stems ending in  $\alpha$ , i, u, both long and short. These differ considerably in their inflexion according as they are radical or derivative. The radical stems, which virtually all end in the long vowels  $\bar{a}$ ,  $\bar{z}$ ,  $\bar{u}^3$ , are allied to the consonant declension in taking the normal endings: but they add -s in the N. sing. m. f. The derivative stems, which end in both long and short vowels, modify the normal endings considerably; though they for the most part add -s in the N. sing. m. f., those in -cz and -z regularly drop it.

1. a. Stems in radical  $-\bar{a}$ .

367. Radical ā- stems are frequent in the RV., but become less common in the later Samhitās where they often shorten the final vowel to  $\check{\alpha}$  and are then inflected like derivative  $\alpha$ -stems. The great majority of the forms occurring are nominatives or accusatives, other cases being rare and some not occurring at all. In the RV, the N sing, forms with  $\bar{a}$  occur ten times oftener than those with the shortened vowel a, and five times oftener than the forms with  $\bar{a}$  in the AV. On the other hand, the AV. has only slightly more forms with  $\bar{a}$  than with  $\dot{a}$ , and no m. forms at all from  $\bar{a}$ - stems in the oblique cases. This tendency to give up the a forms in the later Samhitas may be illustrated by the fact that the forms of the RV. N. sing. carraniprå-s 'blessing men', nāma-dhá-s 'name-giver', prathama-já-s 'first-born', V. somapā-s 'soma-drinker', are replaced in the AV. by carsani-prá-s, nāma-dhá-s, prathama-já-s5, V. soma-pa respectively.

This declension includes stems formed from about thirty roots. Of these, four appear as monosyllables in the m.:  $i\dot{\alpha}$ - 'child',  $tr\dot{\alpha}$ - 'protector',  $d\dot{\alpha}$ - 'giver', sthá- 'standing'; and seven in the f.: kṣá-6 'abode', -khá- 'well', gná-7 'divine

4 See Lanman 4351.

There is also the transition form accord- | consonant declension by almost always ing to the a-declension I sing. navaya, the adding the root determinative -t. accentuation of which indicates that it started from nāvá.

<sup>&</sup>lt;sup>2</sup> The N. pl. glāvas also occurs in the occurs in the AV.

<sup>3</sup> These, however, by being shortened often appear secondarily as a, i, ii, when root \*gan- and sometimes to be pronounced they are inflected like derivative stems. as a dissyllable (gana-), but inflected as if Radical i u and r stems have joined the a radical stem.

<sup>5</sup> The form prathama-ja-s, however, also

<sup>6</sup> From kṣā- = kṣi- 'dwell', 'rule'.

<sup>7</sup> Perhaps formed with suffixal  $\bar{a}$  from a

woman',  $j\dot{d}$ - 'child',  $jy\dot{d}$ - 'bowstring',  $m\dot{d}$ - 'measure',  $vr\dot{d}$ - 'troop'; the rest appear only at the end of compounds: -krá-2 'doing', -krá-3 'scattering', -ksá- 'ruling', -khá-'digging', -khyá-'seeing', -gá-'going', -gá-'singing', -já-'born', -jňá-'knowing', -jyá- 'power', -tā- 'stretching', -dá- 'giving', -drá- 'sleeping', -dhá- 'putting', -dhá-'sucking', -pá- 'guarding', -pá- 'drinking', -prá- 'filling'+, -bhá- 'appearing', -má-'measuring', -yā- 'going', -vā- 'blowing', -sā- 'winning's, -sthā- 'standing', -snā-'bathing',  $-\hbar\hat{a}$ - 'starting'.

These stems are inflected in the m. and f. only. There are no distinctively n. forms<sup>6</sup>, as the stem shortens the radical vowel to  $\alpha$  in that gender and is

consequently inflected according to the derivative  $\alpha$ -declension.

a. Three anomalously formed m. derivative stems in  $-\bar{a}$  follow the analogy of the radical  $\bar{a}$ -stems. I. From the adverb  $t\hat{a}$ -th $\bar{a}$  'thus' is formed the N. sing.  $\hat{a}$ -tath $\hat{a}$ -s 'not saying "yes". 2. uśánā-, N. of a seer, forms its A. uśánīm and D. uśánē7; the N. sing. saying yes . 2. its na., N. of a seet, forms its A. value and D. value, the L. sing. being irregularly formed without -s, has the appearance of a N. sing. f. from a derivative  $\bar{a}$  stem 8. 3. The strong stem of pathi- 'path' is in the RV. panthā-only: N. sing. panthā-s (+ AV.), A. panthā-m (+ AV.), N. pl. panthās. The AV. also uses the stem panthān-, from which it forms N. sing. panthā (once), A. panthānam (once), and N. pl. panthānas. Though the stem panthān-neer occurs in the RV., the evidence of the Avesta points to its having been in use beside pánthā- in the Indo-Iranian period 9. The A. pánthām 10, as a contraction of pánthānam, may have been the starting point of the N. sing. pánthā-s.

Inflexion.

368. The forms occurring in the oblique cases are so rare that some endings, such as those of the L. sing., G. L. du. and G. pl. are not represented at all. The m. always takes -s in the N. sing., but the f. often drops it, doubtless owing to the influence of the f. of derivative  $\bar{a}$ -stems. Excepting the few forms occurring in the D. and G. sing. ", the N. sing. with -s is the only case in which the inflexion of the radical stems can be distinguished in the f. 12 from that of the derivative  $\bar{a}$ -stems in form <sup>13</sup>. The forms actually occurring would, if made from  $j\vec{a}$ - 'offspring', be the following:

Sing. N. m. f.  $j\dot{\alpha}$ -s, f. also  $j\dot{\alpha}$ . A. m. f.  $j\dot{\alpha}$ -m. I. f. j- $\dot{\alpha}$ . D. m. f. j-e.

G. m. j-ás. V. m. já-s.

Du. N. A. V. m.  $j\hat{a}$ ,  $j\hat{a}u$ . I.  $j\hat{a}$ -bhy $\bar{a}m^{14}$ .

Pl. N. m. f. jás. A. f. jás. I. m. f. já-bhis. D. f. já-bhyas. Ab. m. jά-bhyas. L. f. já-su.

The forms actually occurring are the following:

Sing. N. m. jā-s 15 'child', dā-s 16 'giver', sthā-s 'standing'. — dadhi-krā-s 17,

- 'surround'.
  - <sup>2</sup> An extension with  $-\bar{a}$  of kr- 'do'.
  - 3 An extension with  $-\bar{a}$  of  $k\bar{r}$  'scatter'.
- 4 The root mlā- 'soften' occurs in the modified form of -mnā- in carma-mnā-
- 5 Four of these roots, khā-, gā-, jā-, sā-, are collateral forms of others ending in a nasal, khan-, gam-, jan-, san-; cp. Delbrück, Verbum, p. 92 f., LANMAN 442.

6 Five N. sing. m. forms with -s are found

in agreement with n. substantives.
7 There is also a L. sing. uśáne, which is

formed as if from an a-stem.

- In the radical syllable throughout.

  15 LANMAN 443 thinks gā-s in X. 1278 is a N. sing. 'singer' (gā-'sing'), but it is probably the A. pl. of go-'cow'.

  A. form mánthā-m.

  11 There are other.

I From an extended form of the root vy- ition forms L. sing. apayayam, N. of a river,

- and puro-dhayam (AV.).

  12 The N. sing. with -s is about as common as that without it in the RV., the latter occurring in late hymns; in the AV. the former are less common.
- 3 But on etymological grounds other cases may commonly be distinguished as belonging to either one group or the other; thus A. f. á-gopām 'having no herdsman' must be regarded as a radical  $\bar{a}$ -form, because the m. is almost without exception go-pā-m, and not as a derivative f. from go-pa-.

<sup>14</sup> Contrary to the rule generally applicable to monosyllable stems, the accent remains on the radical syllable throughout.

II There are otherwise only the f. trans- ing to the alphabetical order of the roots.

N. of a divine horse. — phu-kṣā-s 'lord of the Rbhus'. — bisa-khā-s 'digging up lotus fibres'. – agre-gá-s (VS. XXVII. 31; Kh. v. 61) 'going before', an-ā-gú-s 'not coming', puro-sā-s 'leader', samana-sā-s 'going to the assembly'. — sāmagá-s 'singing chants'. — adri-já-s 'produced from stones', apsu-já-s 'born in the waters', ab-jā-s 'born in water', abhra-jā-s (AV.) 'born from clouds', rta-jā-s 'truly born', !te-já-s 'produced at the rite', go-já-s 'born from the cow', tapo-já-s (VS. XXXVII. 16) 'born from heat', divi-jā-s 'born in the sky', deva-jā-s 'godborn', dvi-já-s 'twice-born', naksatra-já-s (AV.) 'star-born', nabho-já-s 'produced from vapour', nava-jā-s 'newly born', purā-jā-s 'primeval', pūrva-jā-s 'born before', prathama-jā-s 'first-born', bahu-pra-jā-s 'having numerous progeny'. manusya-jā-s 'born of men', vane-jā-s 'born in woods', vāta-jā-s (AV.) 'arisen from wind', sana-já-s 'born long ago', saha-já-s 'born together', saho-já-s 'produced by strength', su-pra-jā-s 'having good offspring', hiranya-jā-s (AV.) 'sprung from gold'. — rta-jna-s 'knowing the sacred law'. — parama-jva-s 'holding supreme power'. — apāna-dā-s (TS. VS.) 'giving the downward air', ātma-dā-s 'granting breath', āyur-dā-s (TS. VS) 'granting long life', āsīr-dā-s (VS. XVIII. 56) 'fulfilling a wish', ojo-dá-s 'granting power', go-dá-s 'giving kine', caksur-da-s (TS.IV.6.15) 'giving sight', dravino-da-s 'giving wealth', dhana-da-s 'giving booty', prāṇa-dā-s (VS. TS.) 'life-giving', bala-dā-s 'giving power', bhūrida-s 'giving much', rāstra-da-s (VS.x.2) 'giving dominion', varivo-da-s (VS. TS.) 'giving space', varco-dá-s (VS. TS.) 'giving vigour', vasu-dá-s (AV.) 'giving wealth', vyāna-dá-s (VS. TS.) 'giving breath', sahasra-dá-s 'giving a thousand', saho-dā-s 'giving strength', svasti-dā-s 'giving happiness', havir-dā-s (AV.) 'giving oblations', hiranya-dá-s 'yielding gold'. — abhi-dhá-s (VS. XXII. 3) 'surrounding', kiye-dhā-s 'containing much', cano-dhā-s (VS. VIII. 7) 'gracious', dhāma-dhā-s 'founder of dwellings', dhiyam-dhā-s 'devout', nāma-dhā-s 'namegiving', bhāga-dhá-s (TS. IV. 6. 31) 'paying what is due', ratna-dhá-s 'procuring wealth', rcto-dha-s 'impregnating', vayo-dha-s 'bestowing strength', varco-dhā-s (AV.) 'granting vigour', viśvá-dhā-s (VS. 1.2) 'all-preserving', sarvadhā-s 'all-refreshing'. — adhi-pā-s 'ruler', apāna-pā-s (VS. xx. 34) 'protecting the downward breath', abhisasti-pá-s 'defending from imprecations', abhistipá-s i 'protecting with assistance', āprīta-pá-s (VS. VIII. 57) 'guarding when gladdened', āyuṣ-pā-s (VS. xxII. 1) 'life-protector', rta-pā-s 'guarding divine order'; go-pā-s 'herdsman', á-gopā-s 'lacking a cowherd', devá-gopā-s 'having the gods for guardians', su-gopá-s 'good protector', sóma-gopā-s 'keeper of Soma'; cakṣuṣ-pá-s² (VS. 11. 6) 'protecting the eyesight', tanū-pá-s 'protecting the person', nidhi-pā-s (AV. VS.) 'guardian of treasure', paras-pā-s 2 'protecting afar', paśu-pā-s 'keeper of herds', prāṇa-pā-s (VS. xx. 34) 'guardian of breath'. vrata-pá-s 'observing ordinances', śevadhi-pá-s 'guarding treasure', sti-pá-s 'protecting dependents', sva-pá-s3 (AV.) 'protector of his own'. — án-rtupā-s 'not drinking in time', rtu-pā-s 'drinking at the right season', pūrva-pā-s 'drinking first', suta-pá-s 'drinking the Soma-juice', soma-pá-s 'drinking Soma', hari-pā-s 'drinking the yellow (Soma)'. - antariksa-prā-s 'traversing the air', kratu-prá-s 'granting power', carsani-prá-s 'satisfying men', rodasi-prá-s4 'filling heaven and earth'. - rna-yá-s 'exacting obligations', eva-yá-s 'going quickly', tura-yá-s 'going swiftly', deva-yá-s 'going to the gods'. ap-sá-s 'giving water', aśva-sá-s 'giving horses', dhana-sá-s "winning wealth', vāja-sá-s 'winning booty', śata-sá-s 'gaining a hundred', sahasra-sá-s 'gaining a thousand'; go-sá-s 'acquiring cattle', nr-sá-s 'procuring men', su-sá-s 'gaining

<sup>1</sup> In abhistipási (II. 202), where the Pada text reads abhisti-pá asi. See Lanman 443 sva-páh; but the correct division may be (bottom).

2 On the Sandhi in this compound cp. 78 c. 4 For rodasī-prā-s.

easily', svar-ṣá-s 'winning light'. — ádhara-sthā-s¹ (Kh. II. 8²) 'subordinate', rta-sthá-s (AV.) 'standing right', rocana-sthá-s 'abiding in light', sūpa-sthá-s² (VS. XXI. 60; TS. I. 2. 2³) 'forming a good lap'; ange-sthá-s (AV.) 'situated in a member of the body', adhvare-sthá-s 'standing at the sacrifice', giri-sthá-s 'mountain-dwelling', ni-sthá-s 'excelling', puru-ni-sthá-s 'excelling among many', bhuvane-sthá-s³ (AV.) 'being in the world', manhane-sthá-s 'liberal', madhyame-sthá-s (AV. VS. TS.) 'standing in the middle', rathe-sthá-s 'standing on a car', vandane-sthá-s 'mindful of praises', vandhure-sthá-s 'standing on the car-seat', savya-sthá-s⁴ (AV.), hari-sthá-s 'borne by bay horses'. — glirta-sná-s 'sprinkling ghee'. — Also the abnormal forms á-tathā-s 'not saying "yes"', pánthā-s 'path'.

f. kṣá-s 'abode', gná-s 'divine woman', vrá-s<sup>5</sup> (I. 124<sup>8</sup>) 'troop'. — rta-pá-s, rto-já-s, kula-pá-s (AV.) 'chief of a family', go-dhá-s<sup>6</sup> 'sinew', go-pá-s (AV.) 'female guardian', go-ṣá-s, divi-já-s, divo-já-s 'born from heaven', vane-já-s, vayo-dhá-s (AV.), vasu-dá-s (AV.), śata-sá-s, samana-gá-s, sahasra-sá-s<sup>7</sup>. — Without -s in the Pada but with hiatus in the Samhitā<sup>8</sup>: jyá 'bowstring'; ni-drá 'sleep', pra-pá 'place for watering', śrad-dhá 'faith', sva-dhá<sup>9</sup> 'self-power'; un-má (TS.) 'measure of height', prati-má (TS.) 'counter-measure', pra-má (TS.) 'fore-measure', vi-má (TS.) 'through-measure'<sup>10</sup>. — Without -s as in the derivative ā- declension: já (AV.), má (TS.IV. 3.7¹) 'measure'. — ápa-gā <sup>11</sup> (AV.) 'going away', abhi-bhá 'apparition', á-sanjñā (AV.) 'discord', upa-já (AV.) 'distant posterity', go-dhá¹², dur-gá (AV.) 'hard to go upon', devá-gopā, dyu-kṣá 'heavenly', pra-já 'offspring', prati-má 'image', pra-pá (AV.)III. 30<sup>6</sup>), pra-má 'measure', madhu-dhá¹³ 'dispensing sweetness', śrad-dhá (AV.), sana-já, svá-gopā 'guarding oneself', sva-dhá.

n. With -s and agreeing with n. substantives: sthá-s 'stationary'; indra-já-s (AV.) 'descended from Indra', śata-sá-s, su-pra-yá-s 'pleasant to tread on', soma-já-s '4 (AV.) 'Soma-born'.

A. m. jám, trám 'protector', sthám. — dadhi-krám, rudhi-krám N. of a demon. — tamo-gám 'roaming in the darkness', tavā-gám 'moving mightily', svasti-gám 'leading to prosperity'. — sāma-gám. — agra-jám 'first-born', ab-jám, nabho-jám, purā-jám, prathama-jám, bhareṣu-jám 'existing in battles'. — án-aśva-dām 'not giving horses', án-āśīr-dām 'not giving a blessing', a-bhikṣa-dám¹5 'giving without being asked', upa-dám (VS. xxx. 9) 'giving a present', jani-dám 'giving a wife', dravino-dám, dhana-dám, rabho-dám 'bestowing strength', vasu-dám, saho-dám, havir-dám (AV.). — ratna-dhám (AV., VS. IV. 25), reto-dhám (VS. VIII. 10), vayo-dhám, varivo-dhám 'granting space', varco-dhám (VS. IV. 11), vipo-dhám 'inspiring'. — abhiśasti-pám, go-pám, tanū-pám, ni-ṣikta-pám 'protecting the infused (semen)', vrata-pám. — añjas-pám 'drinking instantly', śrta-pám 'drinking boiled milk', soma-pám. — antarikṣa-prám, kakṣya-prám 'filling out the girth',

<sup>1</sup> The Ms. reads ádhira-sthā nīnasat.

<sup>&</sup>lt;sup>2</sup> That is, su-upa-sthā-s.

<sup>3</sup> While Kh. III. 222 has in the same verse bhūmane-ṣṭhāḥ (sic).

<sup>4</sup> The Pada reads savya-sthah; see APr. II. 95, and cp. WHITNEY's note on AV. VIII. 8<sup>23</sup>. 5 N. sing. Grassmann and Lanman, N. pl. ROTH and SAVANA.

<sup>6</sup> The derivation is uncertain.

<sup>7</sup> The above are the only N. sing. f. forms written with -s in the Pada text.

 $<sup>^{8}</sup>$  It may therefore be assumed that the N. was formed with -s.

<sup>9</sup> Cp. RPr. II. 29. With regard to sva-dhā, as n. (344). the Samhitā text is inconsistent, writing it contracted with a following vowel in svadhāsī! ('destroying').

<sup>(</sup>I. 1656) and svadhāmitā (V. 341), where it must be pronounced with hiatus.

<sup>10</sup> All these four compounds of  $m\tilde{a}$ -'measure' occur in TS. IV. 4. II<sup>3</sup>; see TPr. X. I3, IS. I3, I04, note <sup>2</sup>.

II BR. would accentuate  $apa \cdot g\hat{a}$ ; cp. WHITNEY's note on AV. 1.  $34^5$ .

<sup>12</sup> Probably go-dhās in X. 2811; cp. LANMAN

<sup>13</sup> Also  $mary\hat{a}d\bar{a}$  'limit' if  $mary\hat{a}d\bar{a}$ , but the derivation is doubtful.

<sup>14</sup> These forms must be regarded as m. used as n. Cp. the  $-\bar{a}s$  forms of -as stems used as n. (344).

<sup>15</sup> According to the Pada text abhi-kṣa-dām

carsani-prám, ratha-prám 'filling a car', rodasi-prám'. — ap-sám, urvarā-sám 'granting fertile land', ksctra-sam 'procuring land', dhana-sam, sadā-sam 'always gaining', sahasra-sám; go-sám, svar-sám. — rocana-sthám, sv-asa-sthám (VS.II. 2) 'offering a good seat'; giri-sthám, narc-sthám 'serving for a man2 to stand on', ni-sthám, karma-nisthám 'diligent in religious acts', pathi-sthám (AV.) 'being on the way', pathe-stham's 'standing in the way', pari-stham 'surrounding', parvate-stham 'dwelling on the heights', barhi-stham 4 'standing on the sacrificial grass', rathe-sthám, rayi-sthám (AV.) 'possessed of wealth', hari-sthám. — Also the abnormal derivative forms pánthām, mánthām 'churning-stick'.

f. kṣám, khám 'well', gnám, jám, jyám, vrám. — á-gopām, antarikṣaprám, ava-sám 'liberation', áśva-sám, upa-vám (AV.) 'act of blowing upon', uru-ṣām 'granting much', rta-jñām, tiro-dhām (AV.) 'concealment', dur-dhām 'disarrangement', dhana-sam, pra-jam, prati-dham (AV.) 'draught', pratisthám 'standpoint', pra-vám (AV.) 'blowing forth', pra-hám 'advantage', yakşmoalhams (AV.) 'maker of disease', vāja-sām, śrad-dhām, sabhām6 'assembly', su-prajám, sva-jám 'self-born', sva-dhám, svar-sám.

I. f. apa-dhά 'concealment', abhi-khyά 'splendour', a-sthά 'without standing',

āśīr-dā (VS.) 'fulfilment of a wish', prati-dhā, prati-sthā's, sva-dhā.

D. m. dé; kīlāla-pé 'drinking (the beverage called) kīlāla', dhiyaṇ-dhé 'devout', paśu-se' 'bestowing cattle', rīyas-peṣa-de' (VS. v. 1) 'granting increase of wealth', śuci-pi' 'drinking the clear (Soma)', śubham-yi' 'flying swiftly along', havir-dé.

f. kṣé; śrad-dhé9. — Also the infinitives pra-khyái 'to see', vi-khyái 'to look about'; parā-dái 'to give up'; vayo-dhái 'to strengthen'; prati-mái 10 'to imitate'; ava-yái 'to go away', a-yái 'to approach', upa-yái 'to come near', pra-yái 'to go forward; ava-sái 'to rest' 12.

G. m. kṛṣṭi-prás 'pervading the human race', paśu-ṣás 13.

V. m. ṛta-pā-s (TS.III.2.81), ṛtu-pā-s, puro-gā-s (TS.V. I. I I 4), bhūri-dā-s, śukra-pūta-pā-s 'drinking bright and purified (Soma)', śuci-pā-s, śrotra-pā-s (VS.

XX. 34) 'protecting the ear', suta-pā-s, soma-pā-s 14.

Du. N. A. V. m. kaksya-prá, go-pá, gharmye-sthá 'being in a house', chardis-på 'protecting a house', jagat-på 'protecting the living', tanū-på, tapuṣ-på 'drinking warm beverage', dravino-dā 15, paras-pā, purā-jā, piru-trā 'protecting much', vāja-dā 'bestowing vigour', śuci-pā, su-gopā, soma-pā, sti-pā. — With -au: á-krau 16 'inactive', a-doma-dháu (AV.) 'not causing inconvenience', adhvagáu 'travelling', go-páu, go-pau, madhu-pau 'drinking Soma', rayi-dáu 'bestowing wealth', suta-pau17.

I For rodasī-prām.

retained in the compound.

4 barhi- for barhis-: see 62.

- 5 With the N. case-form retained in the  $|j\hat{a}y\hat{a}s$ . compound; see Whitney's note on AV.IX.89.
  - 6 The derivation of this word is uncertain. 7 Used adverbially = 'at once'.
- 8 Cp. Lanman 447<sup>1</sup>. There are also the transition forms jyáyā, prajáyā.

9 Also the transition form prajāyai.

- The infinitive prati-me is probably a
- II These dative infinitives are formed by combining the full root with the ending -e, while in the ordinary datives the radical  $\bar{a}$  | seat'. is dropped before the ending.

- 12 See below, the Dative Infinitive, 584.
- <sup>2</sup> The D. case form of *mp* 'man' being tained in the compound.

  3 The form /ās- in /ās-fati-(1. 1858) 'ford of the family' is probably a f. G. of /ā-; and gnās probably G. of gnā- in gnās-pāti-'husband of a divine woman'. There are also the transition forms judyās and fra-

14 There are also in the f. the transition forms gainge, śrad-dhe, tiro-dhe (AV.) 'conceal-

15 The Pada text reads dravino dáu.

16 Some of these duals in -au may be formed from radical stems with shortened -ă; cp. Lanman 4501.

17 There are also the f. transition forms rdū-pė 'drinking what is sweet', pūrva-jė 'born before', sv-āsa-sthe 'sitting on a good

retained in the compound.

I. Only four compounds of  $-p\bar{a}$  in TS. III. 2. 10<sup>1</sup>:  $kratu-p\bar{a}bhy\bar{a}m$  'watching one's intentions',  $caksus-p\bar{a}bhy\bar{a}m$ ,  $v\bar{a}k-p\bar{a}bhy\bar{a}m$  'protecting speech',  $srotra-p\bar{a}bhy\bar{a}m^{T}$ .

- Pl. N. V. m. rbhu-kṣās. agni-jās (AV.) 'fire-born', á-pra-jās 'childless', apsu-jás (AV.), oṣadhi-jás (AV.) 'born among herbs', khala-jás (AV.) 'produced on a threshing-floor', deva-jás, purā-jás, prathama-jás, pravāte-jás 'grown in an airy place', raghu-jás 'produced from a racer', śaka-dhūma-jás (AV.) 'produced from cow-dung', su-pra-jás, sva-jás. — rta-jñás, rta-jñās, pada-jñás 'knowing the track'. — aśva-dás 'giving horses', āśīr-dás (VS. VIII. 5), go-dás, dravino-dás, dhana-das, vara-das (AV.) 'granting boons', vastra-das and vasv-das 'giving garments', hiranya-dās. — jani-dhās² (x.295), dhiyam-dhās, ratna-dhās, retodhás, vayo-dhás. — payo-dhás 'sucking milk'. — kula-pás 'heads of the family'; go-pās, indra-gopās 'protected by Indra', devá-gopās, vāyú-gopās 'protected by Wind', su-gopás; tanū-pás, paśu-pás, vrata-pás. — agre-pás 'drinking first', añjas-pās, payas-pās 'drinking milk', manthi-pās (VS. VII. 17) 'drinking the stirred Soma', soma-pās, sóma-pās (AV.), havis-pās 'drinking offerings'. carma-mnas 4 'tanners'. — jma-yas 'going on the earth'. — dhana-sas, sada-sas, sahasra-sás. — prthivi-sihás 5 'standing on the earth', rathe-sihás 6, harmye-sihás 6 'dwelling in the house'. — ghrta-snás 'sprinkling ghee'. — Also the abnormal derivative pánthās?
- f. gnás, vrás. á-gopās, ava-sthás 'female organs', áhi-gopās 'guarded by the dragon', á-tās 'frames', rta-jñás (AV.), giri-jás 'mountain-born', jaraṇi-prás², devá-gopās, deva-yás, pada-jñás (AV.), pra-jás, prathama-jás, pra-yás 'advance', manuṣya-jás (AV.), vakṣaṇe-ṣṭhás 'being in Agni'(?), vāja-dás, śuṣma-dás 'bestowing strength', su-gopás, soma-pás, svayaṇ-jás² 'self-born'.
- A. m. There is no certain example: vane-jás (x. 797) is possibly one? f. kṣás, gnás, jás. án-agni-trās 'not maintaining the sacred fire', anusthás 'following in succession', aśva-dás, deva-yás, pari-jás (AV.) 'places of origin', pari-ṣṭhās 'impediments', pra-jás, manusya-jás, vi-ṣṭhás 'positions', sahá-gopīs 'accompanied by herdsmen', su-gás 'easy to traverse', sva-dhás.

I. m. agre-pābhis. — f. gnābhis; rtu-pābhis, ratna-dhābhis, prajābhis,

śrad-dhábhis, sva-dhábhis.

D. f. pra-jābhyas. — Ab. m. bhūri-dābhyas 10.

L. f. kṣāsu, gnāsu, jāsu; ā-tāsu<sup>11</sup>, pra-jāsu, sabhāsu.

#### rb. Stems in Radical -q.

369. These consist almost entirely of stems in radical  $\bar{a}$  which has been shortened to  $\check{a}$ . With the exception of  $kh\dot{a}^{-12}$  'aperture' they occur at the end of compounds only. They are: - $k\dot{s}\dot{a}$ - 'dwelling',  $kh\dot{a}$ -, - $g\dot{a}$ - 'going', - $g\dot{a}$ - 'singing',  $\dot{j}\dot{a}$ - 'born', - $\dot{j}\dot{y}a$ - 'bowstring', -ta- 'stretching', - $tra^{-13}$  'protecting', - $d\dot{a}$ - 'giving' ' $\dot{a}$ - 'binding', - $d\dot{a}\dot{a}$ - 'putting', - $p\dot{a}$ - 'guarding', - $p\dot{a}$ - 'drinking', - $pr\dot{a}$ - 'filling', - $mn\dot{a}$ -

<sup>2</sup> Of doubtful meaning.

4 From Vmlā-: 'softening hides'.

5  $Prthivi- = prthiv\bar{\imath}$ .

6 With the L. ending retained in the first member of the compound.

9 Cp. LANMAN 4514.

10 In the G. occur the f. transition forms pra-jūānām (AV.) 'fore-knowing', vi-bhānām 'radiant'.

<sup>11</sup> Probably from  $t\bar{a}$ - = tan- 'stretch'.

<sup>12</sup> The nominatives  $dr\dot{a}$ -s and  $vr\dot{a}$ -s in AV. XI. 73 (also  $ny\dot{a}$ -s, 74) are of unknown meaning (see Whitney's note).

13 Cp. GARBE in KZ. 23, 476, 480.

14 Perhaps also dra- running in krsua-drá-m (AV.).

In the L. du. there also occur the f. transition forms jangháyos (AV.) and sva-dháyos.

<sup>3</sup> The stem is manthi-pá-according to BR.

<sup>7</sup> The form pánthāsas also occurs once. It is doubtful whether the plurals dyn-kṣāsas and priya-sāsas are to be regarded as formed from ā-stems. Such plurals are probably made from a-stems.

 $<sup>^8</sup>$  There is also the f. transition form  $\it n\'ava\mbox{-}gv\bar{a}s.$ 

'thinking', -mla-1 'softening', -sá- 'winning', -sthá- 'standing'; also -grá-2 'swallowing', -gva-3 'going', -há-+ 'slaying'.

These stems are inflected in the m. and n. only. This is the form

assumed in the n. by all radical  $\bar{a}$ -stems (367).

### Inflexion.

370. The inflexion of the radical  $\alpha$ -stems is identical with that of the derivative a-stems (371). The forms which occur are the following:

Sing. N. m. dyu-kṣá-s 'dwelling in heaven'. — su-khá-s 'having a good (axle) hole'. — agre-gá-s 'going in front', āśuņ-gá-s (AV.) 'swift-going', rju-gá-s (AV.) 'going straight on', patam-gá-s5 'going by flight', vala-gá-s (AV.) 'hidden in a cave'o, sitim-gá-s (AV. x1. 512) 'white-goer', su-gá-s 'easy to traverse'. — dásagva-s7 'going in tens', náva-gva-s7 'going in nines' 8. — a-jú-s 'unborn', adhrí-ja-s 'irresistible', eka-já-s (AV.) 'produced alone', jarāyu-já-s (AV.) 'viviparous', ni-já-s (AV.) 'familiar'9, prathama-já-s (AV.) 'first-born', samudra-já-s (AV.) 'sea-born', stamba-já-s (AV.) 'shaggy' (?). — an-ānu-dá-s 'not giving way', dānu $d\acute{a}$ -s 'dripping',  $d\ddot{a}$ y $\ddot{a}$ - $d\acute{a}$ -s (AV.) 'receiving ( $\ddot{a}$ -da-) inheritance ( $d\ddot{a}$ ya-)',  $pr\ddot{a}$ na- $d\acute{a}$ -s 'life-giving'. — nāma-dhá-s (AV.) 'name-giver'. — ākūti-prá-s (AV.) 'fulfilling wishes', kāma-prá-s (AV.) 'fulfilling desire', carṣaṇi-prá-s (AV.) 'satisfying men', pṛthivī-prá-s (AV.) 'earth-filling' 10. — apnali-sthá-s 'possessor', gw-sthá-s (AV.) 'cow-pen', puru-nisthá-s 'excelling among many'. — śatru-há-s (AV.) 'slaying enemies', sahasra-hú-s (AV.) 'slaying a thousand'.

N. A. n. khám 'aperture'. — a-doma-dám (AV.) 'not causing inconvenience', antári-kṣam 'air', kṛṣṇa-drám (AV.) 'black runner'(?)", tưvi-kṣám 'destroying many', dur-gám 'impassable', dyu-kṣám, prathama-jám (AV. VS.), váta-gopam (AV.) 'guarded by the wind', vytra-hám 'slaying foes', satrā-hám 'always destroying', sadhá-stham 'abode', su-gám, su-mnám 'benevolent'.

A. m. atithi-gvám ('to whom guests go') N. of a man, an-ānu-dám, arāti-hám (AV.) 'destroying adversity', aśva-pám (VS. XXX. 11) 'groom', á-svagam (AV.) 'homeless', eka-jám, garbha-dhúm (VS. TS.) 'impregnator', grhapám (VS. xxx. 11) 'guardian of a house', go-pám 'herdsman', carma-mnám (VS.) 'tanner', tri-sthám 'having three seats', dása-gvam, dāva-pám (VS. xxx. 19) 'forest-fire guard', dyu-kṣám, pataṃ-gám, prathama-jám (VS. XXXIV. 51), madhupám 'honey-drinker', vana-pám (VS. XXX. 19) 'wood-ranger', vala-gám (AV.), vitta-dhám (VS. XXX. 11) 'possessing wealth', su-khám, su-gám (AV.), hasti-pám (VS. xxx. 11) 'elephant-keeper'.

I. m. rathe-sthéna 'standing on a car'. — n. antári-ksena, rtá-jyena 'whose bowstring is truth', kāma-préna, su-géna (AV.), su-mnéna.

D. m. atithi-gváya, dyu-kṣáya, patam-gáya, rathe-ṣṭháya<sup>12</sup>. — n. paráspāya (VS.) 'protecting from afar', su-mnāya. — Ab. m. rsya-dāt (x. 398) 'pit for antelopes'. — n. antári-kṣāt<sup>13</sup>, dur-gát, sadhá-sthāt.

2 An extension of gr- 'swallow'; cp. -krā-

and  $vr\bar{a}$ - among the radical  $\bar{a}$ - stems.

reduced form -gu- appears in vanar-gu- forest-

4 A reduced form of han- 'slay'.

5 See Bartholomae, BB. 15, 34 and cp. BB. 18, 12.

6 The etymology and meaning are somewhat doubtful; cp. IS. 4, 304.

7 These two compounds as well as atithigvá- and éta-gva-, are with more probability strictor' (from svaj- 'embrace'). derived from a reduced form of go-'cow' by 13 See LANMAN 337.

In the form of-mna-in carma-mná-'tanner'. BLOOMFIELD, AJPh. 17, 422-27; cp. above p. 153 (mid.).

8 The compound puro-gavá-s 'leader' pos-3 In its original form perhaps -gva-; a sibly = \*puro-gva-s; but it is probably a governing compound; cp. above, p. 1761.

9 See WHITNEY's note on AV. 111. 52. 10 Also paśu-sá-s (v. 411) if it is N. sing.

and not a G. of pasu-sá-. <sup>11</sup> Cp. WHITNEY's note on AV. IX. 7<sup>4</sup>.

12 svajāya (AV.) is analyzed by the Commentator as sva-jaya 'self-born', but is explained by WHITNEY (AV. VI. 562) as 'con-

G. m. a-jásya, atithi-gvásya<sup>1</sup>. — n. antári-kṣasya, asthi-jásya (AV.) 'produced in the bones', tanū-jásya (AV.) 'produced from the body', su-mnásya.

L. m. dása-gve, náva-gve, ratha-samgé 'encounter of war-cars', sam-sthé 'presence', sam-ge' 'conflict', su-khe', svar-ge' 'going to heaven'. - n. antári-kṣe, khć. — karanja-hć 'pernicious to the Karanja tree', dur-gć, bhayá-sthe 'perilous situation', sadhá-sthe, su-mné. — V. m. eka-ja, dyu-kṣa, patam-ga (AV.), soma-pa (AV.) 'drinking Soma'.

Du. N. A. m. 2 éta-gvā 'going swiftly'. — A. n. sadhá-sthe.

Pl. N. V. m. ājya-pās (VS. xxi. 40) 'drinking clarified butter', éta-gvās, tanū-jās (AV.), tapo-jās (AV.) 'produced by austerity', dáśa-gvās, náva-gvās, patam-gás, vala-gás (AV.), su-gás. — Also four forms with asas: dása-gvāsas, dyu-ksásas, náva-gvāsas, priya-sásas<sup>3</sup> 'granting desired objects'.

N. A. n. 1. ámsa-trā 'armour protecting the shoulder', antáriksā, dur-gā, prathama-jā<sup>4</sup> (AV.), sadhá-sthā, su-gá, su-mná. — 2. kháni. — antári-kṣāṇi,

ararin-dāni<sup>5</sup>, dur-gāṇi, sadhá-sthāni, su-gáni, su-mnáni.

A. m. go-pān, tapo-jān, dur-gān (AV.), pataņ-gān, pūrva-jān (TS.) 'born before', sirta-pān 'drinking boiled milk', saha-jān (TS.) 'born at the same time', su-gán, soma-pán (AV.).

I. m. 1. tuvi-grébhis 'swallowing much', mithó-avadya-pebhis 'mutually averting calamities', ratna-dhébhis 'preserving wealth', sāma-gébhis (AV.) 'reciting chants', su gébhis. — 2. á-tais 6 'frames', dása-gvais, náva-gvais, dhana-sáis 'winning wealth', náva-gvais, patam-gáis, su-kháis. — n. 1. madhu-pébhis, su-gébhis, su-mnébhis. — 2. su-mnáis.

D. m. pūrva-jėbhyas. — G. m. dvi-janām (AV.) 'twice-born', sākamjánām 'being born together'. — L. m. dravino-désu 'giving wealth', su-khésu. n. dur-géşu, sadhá-sthesu, su-géşu, su-mnésu.

## 2 a. Derivative stems in -a.

BENFEY, Vollständige Grammatik p. 293-317. - WHITNEY, Grammar 326-334 (p. 112-116). - LANMAN, Noun-Inflection 329-354.

371. This is the most important of the declensions as it embraces more than one-half of all nominal stems. It is also the most irregular inasmuch as its ending diverge from the normal ones more than is elsewhere the case. This is the only declension in which the N. A. n. has an ending in the singular. Here the I. D. Ab. G. sing. are peculiar; and in the plural, the A., the G., one of the forms of the I. and of the N. A. n. do not take the normal endings. The final vowel of the stem is also modified before the endings with initial consonant in the du. and pl. Three of the peculiar case-endings of the sing. (I. Ab. G.) are borrowed from the pronominal declension, while in the pl. two of the case-endings (G. and N. A. n.) are due to the influence of the stems in -n. This is the only declension in which the Ab. sing., as a result of taking the pronominal ending, is distinguished from the G. As elsewhere in the vowel declension, the N. sing. m. here adds the ending -s throughout; but the V. sing. shows the bare stem unmodified. This declension includes

<sup>2</sup> Some of the m. duals given under the ing radical ā- stems. radical  $\bar{a}$ -declension ought possibly to be

1 svajásya in AV. x. 410. 15 is according to pánthāsas, occurring once beside the ordinary WHITNEY 'constrictor', not sva-jásya 'self- panthās formed from the anomalous derivative ā- stem pánthā-, proves nothing regard-

4 This is the reading of the Pada text, the Samhita having -jä r- (70 a).

5 A word of uncertain meaning.

born'; cp. p. 254, note 12.

<sup>3</sup> There is no reason to suppose that any of these are plurals of  $\bar{a}$ - stems, since the first three appear as a stems only and formed from the f. stem of this word, a ta-, priya-sā- does not otherwise occur. The pl. which is probably a radical ā- stem.

<sup>6</sup> Two other forms, atas and atasu are

m, and n, stems only, as the corresponding f. follows the derivative  $\bar{a}$ -declension. There is here no irregularity in the accent, which remains on the same syllable in every case except the V., where it of course shifts to the first.

## Inflexion.

372. The inflexion of the n. differs from that of the m. in the N. sing. and the N. A. du. and pl. only. In the G. L. du. y is inserted between the final -a of the stem and the ending -os. The forms actually occurring, if made from privá- 'dear', would be the following:

Sing. N. m. priyá-s, n. priyá-m. A. priyá-m. I. priyéna and priyá.

D. priyáya. Ab. priyát. G. priyásya. L. priyé. V. príya.

Du. N. A. m. priyā and priyau, n. priye. V. m. priyā and priyau.

I. D. Ab. priyábhyām. G. L. priyáyos.

Pl. N. m. priyās and priyāsas, n. priyā and priyāni. A. m. priyān, n. priya and priyani. I. priyais and priyabhis. D. Ab. priyahvas. G. priyanam. L. priyesu. V. priyas and priyasas.

Owing to the enormous number of words belonging to this declension, only forms of commonest occurrence will be given below as examples under

each case.

Sing. N. m. This case is formed in the RV. by 1845 a-stems and occurs more than 10000 times. The most frequent substantive is indras N. of a god, found more than 500 times; next in order come simas (220) N. of a plant, devás (203) 'god', mitrás (132) N of a god, várunas (94) N. of a god.

A. m. After the N. sing. m., the A. sing. m. is the commonest declensional form in the RV., being made from 1357 stems and occurring nearly 7000 times. The nouns most frequently found in this case are indram (335), simam, (212), yajňám (183) 'sacrifice', vájam (123) 'vigour', súryam (90) 'sun', hávam (88) 'invocation', vṛtrám (82) N. of a demon, stómam (77) 'praise'2.

N. A. n. This is the only declension in which these cases take an ending. They here add -m, being thus identical in form with the A. sing. m.3. They are very frequently used, being formed from about 950 stems and occurring, taken together, more than 4000 times. Examples are: rtim (70) 'sacred order', ghrtám (47) 'clarified butter', padám (46) 'step', rátnam (44) 'wealth', sakhyám (43) 'friendship', drávinam (41) 'wealth', satyám (40) 'truth'4.

I. m. n. r. The usual form of this case ending in -ena is very frequent, being formed from more than 300 stems nearly equally divided between m. and n. The commonest forms are: m. súryena (37), indrena (34), vájrena

(33) 'thunderbolt', yajñéna (13). — n. ghṛténa (31)5.

a. The final vowel appears lengthened in about twenty-five forms: amrtenā (AV.) 'ambrosia', á-sivenā 'malevolent', ájyenā 'melted butter', rténā, kávyenā 'wisdom', kúlišenā 'axe', pétvenā 'ram', tavisenā 'strong', dáksinenā 'right', dáivyenā 'divine', bákureņā 'bagpipe', bhadreņā (AV.) 'excellent', mártyenā 'mortal', mārutenā 'consisting of storm-gods', raváthenā 'roar', váruņenā, vithurenā 'staggering', vi-ravenā 'roar', vīryenā 'heroic power', vrjanenā 'might', vṛṣabhéṇā 'bull', sahasyènā 'mighty', sáyakenā 'missile', sáryenā, skámbhanenā

occur 509 and 259 times respectively in LANMAN 331 (middle). the RV.

fore iva and subsequent contraction, see LANMAN 331.

<sup>3</sup> For this reason there is in some in- (1. 1105). stances not sufficient evidence for deter-

The pronominal forms tâm and yâm mining whether a word is m. or n.; cp.

<sup>4</sup> On occasional elision of the final -m <sup>2</sup> On the occasional elision of the -m be- and subsequent contraction, see Lanman 331. 5 The final vowel is twice nasalized:

ghanénam ékas (1. 334) and léjanenam ékam

'support''. These forms regularly occur where the metre at the end of a Pada favours a long vowel; e. g. skámbhanenā jánitrī (III. 3112), but kámbhanena skábhīyān (X. 1115); on the other hand, the long vowel appears to be used arbitrarily at the beginning of a Pada, though the short vowel here is much more frequent. Hence the  $\bar{a}$  seems to be a survival and not to be due to metrical exigencies.

2. There are also more than a dozen forms made with the nominal ending -ā. In the m. there are no quite certain examples beyond yajīnā; possibly also krānā 'acting', ghanā 'club', dīnā 'gift'2, camasā 3 'cup'. The n. forms are kavitvá and kavitvaná 'by wisdom', taranitvá 'by energy', mahitvá and mahitvaná 'by greatness', ratna-dhíyī 'by distribution of wealth', ráthyā 'belonging to a car', vīryà 'with heroism', sakhyā 'with friendship', sarva-ratha with the whole line of chariots, su-hava with good invocation'4. — This ending is also preserved in a few instrumental adverbs: and 'hereby', ucca 'above', paica 'behind', sanī 'from of old's.

D. m. n. This case, which has the abnormal ending -æya, is of very frequent occurrence, being formed in the RV. from over 300 stems in the m. and from nearly 150 in the n. The commonest forms are: m. indraya (188), mád īya (76) 'exhilaration', deváya (26), mártyāya (25), mitráya (23), várun īya (23), yájamānāya 'sacrificing', sviryāya (11); n. suvitāya (34) 'welfare', sakhyáya (29), tokáya (21) 'offspring', tánayāya (18) 'line of descendants'6.

a. The normal form would have been for example  $*yaj\tilde{n}di = yaj\tilde{n}de^{7}$ . This would in Sandhi have become \*yajnāy, which was ultimately extended with -a, owing to the frequent combination with a following a in Sandhi (e. g. yajñāy-a pi for yajñāy api), or with the shortened form of the preposition  $d^8$ .

Ab. m. n. These are the only nominal stems in which the Ab. is formally distinguished from the G. Instead of the normal ending -as, they take the -d which appears in the pronominal declension (e.g. md-d 'from me'), lengthening the -a of the stem before it<sup>9</sup>. This Ab. in  $-\bar{a}d$  is formed in the RV. from over 200 stems, nearly equally divided between m. and n. Some of the n. forms are used as adverbs. Forms of common occurrence are: m. samudrāt (15) 'sea', upásthāt (9) 'lap', indrāt (8); n. antári-kṣāt10 (15) 'air'; dūrāt (19) 'from a distance', paścāt (26).

G. m. n. These are the only nominal stems in which the G. sing. does not end in -s11. Instead of the normal ending -as, they add -sya12 which is

short final vowel a; see RPr. VIII. 21 and cp. Al'r. 111. 16. The pronominal forms tenā, yénā, svénā also appear, and always with the in the pronominal declension, e. g. túsmai short vowel in the Pada text; on the other hand, end is always end in the Pada, while the unaccented enā, beside ena, has the short vowel in the Pada. See LANMAN 332 (bottom).

<sup>&</sup>lt;sup>2</sup> See LANMAN 334 (middle).

<sup>3</sup> Nasalized in camasam iva (x. 254), Pada camastn. On these forms see LANMAN 335.

<sup>4</sup> This form of the instrumental also appears a few times in the pronoun tva beside the usual tváyā; it also occurs in a few compounds, as två-datta- and två-data- 'given by thee'; cp. Lanman 334 (middle).

<sup>5</sup> Perhaps also nīcā 'below', cp. nīcāis; but it may be the I. of nyañc-.

<sup>6</sup> Such D. forms are twice nasalized be-

In all these forms the Pada text has the fore vowels: tad-vasayam esú (II. 142) and saváyam evá (I. 1131).

<sup>7</sup> The normal ending -e is actually used = tásma-e.

<sup>8</sup> See Johansson, BB. 20, 96 ff. and Bar-THOLOMAE, Arische Forschungen 2,69; 3,63. 9 Cp. JOHANSSON, BB. 16, 136 and BRUG-

MANN, Grundriss 2, 588. 10 This is really a radical a- stem; see

II In the G. sing. of stems in -ar and -tar, the final r seems to represent original -s; see above 358, note on svásur.

The y is never to be read as i; possibly however about five times in the pronominal asyá. The final -a in two or three instances undergoes protraction of a purely metrical character: see Lanman 3383.

<sup>17</sup> 

otherwise found in the pronominal declension only. This case is very common. being formed in the RV. from over 500 stems in the m. and 175 in the n., occurring altogether over 3300 times. Among the frequent forms 2 are: m. indrasya (123), súryasya (93), sómasya (88), devásya (60), yajňúsya (55), sutásya (53) 'pressed'; n. rtásya (187), bhúvanasya (39) 'world', amítasya (35)3.

L. m. n. This case is formed with the normal ending -i, which combines with the final -a of the stem to -e. It is formed in the RV. from 373 stems in the m., and over 300 in the n., occurring altogether about 2500 times. Among the frequent forms are: m. adhvaré (68) 'sacrifice', suté (53), upá-sthe (49), máde (48), dáme (40) 'house', indre (33), yajñé (28), jáne (26) 'man', grhé (23) 'house'; n. vidáthe (49) 'assembly', ágre (43) 'front', sádane (35)

'seat', padé (33), duroné (31) 'abode', mádhye 'middle' (29).

V. m. n. In this case the bare stem (always accented on the first syllable) is employed. It is formed in the RV, from about 260 stems, occurring about 2500 times in the m.; but in the n. there is no undoubted example 4. The AV. however has four or five n. vocatives. Among the commonest forms are: m. sóma and soma (240), deva (132), śūra (94) 'hero', pavamāna (63) 'bright Soma', puru-hūta (49) 'much invoked', varuņa (45), mitra (35), yavistha (29) 'youngest', vrsabha (27) 'bull', ugra (23) 'mighty', amrta (12)5; n. antariksa6 (AV. VI. 1304), tráikakudu 'coming from the threepeaked (mountain)' and devānjana (AV. XIX. 446) 'divine ointment', talpa (AV. XII. 249) 'couch', visa (AV. IV. 63) 'poison' 7.

Du. N. A. V. m. The ending of these cases in the RV. is ordinarily  $-\bar{a}$ , much less frequently  $-au^8$ . The former is taken by over 360 stems occurring about 1150 times, the latter by fewer than 90 stems occurring about 170 times. The ending  $-\bar{a}$  is therefore more than seven times as common as -au. The rule is that  $-\bar{a}$  appears before consonants 9, in pausa at the end of a Pāda 10, or within a Pāda in coalescence with a following vowel; while -au 11 occurs in the older parts of the RV. only before vowels in the Sandhi form of  $-\bar{a}v$ , within a Pada. Examples of this rule are  $t\bar{a}$   $v\bar{a}m$  (1. 1841); rtīvṛdhī | (I. 473b); dasrāt<sup>12</sup> (I. 116<sup>10c</sup>) for dasrā āt; mitrāgnim (I. 143) for mitra agnim; but tav 13 aparam (1.1841). Hiatus, when the metre requires two

tásya, vásya, vísvasya occur over 900 times in the RV.; cp. LANMAN 338.

<sup>2</sup> The commonest G. in -sya is the pronominal asyá which (accented or unaccented) three times (32) as common as -au (12). occurs nearly 600 times in the RV.

3 The final vowel is once nasalized at the end of a Pāda in rtásyam ékam (VIII. 895); ср. RPr. п. 31.

4 Cp. LANMAN 339.

5 There are two instances of the final -a being nasalized: ugram okas (VII. 254) and puru-stutam éko (VIII. 153. 11); cp. RPr. XIV. 20. There is a purely metrical lengthening of the final vowel in vrsabhā (VIII. 4522. 38), simā (VIII. 41), and hāriyojanā (1. 6116); perhaps also maryā (I. 63); cp. LANMAN 339.

6 Properly a radical a- stem.

7 By a syntactical peculiarity the N. indras ca is some ten times coupled with a vocative vayo, agne etc. See Lanman 340 (top).

8 In the AV. -au is more than twice as

common as in the RV.; it is there some-

<sup>1</sup> The pronominal genitives asya and asyá, times a various reading for  $-\bar{a}$  of the RV. In the independent Mantra portions of the TS. there are at least seven forms in  $-\bar{a}$  and fourteen in -au. In the Khilas -ā is nearly

> 9 -au occurs 23 times before a consonant within a Pāda; mostly in passages showing signs of lateness. Cp. LANMAN 576.

> 10 -au occurs 5 times at the end of an odd Pāda before a consonant; and 4 times as -āv at the end of an odd Pāda before a vowel. At the end of an even Pada -au occurs 4 times.

11 LANMAN 343 enumerates the forms in -au which occur in the RV.

12 At the end of an odd Pāda -ā is always written in the Samhita contracted with a following vowel, but must always be read with hiatus.

13 This is the normal use of -au, which in 70 per cent of its occurrences is found as -āv before a vowel within a Pāda; in the AV. the percentage is only 26.

syllables, is thus removed by the use of  $-\bar{a}v$ , except when u or  $\bar{u}$  follows. In the latter case the Samhitā text writes  $-\bar{a}u^{-3}$ , e. g. ubha  $up\bar{x}msh$  (x. 837), though the Pada always has -auu.

There are seven or eight passages of the RV. in which  $-\bar{a}$  is written with hiatus before other vowels  $(a-i-o-)^4$ , but those passages are all obscure or corrupt<sup>5</sup>.

- a. About a dozen forms, occurring altogether some 20 times, shorten the dual  $-\bar{a}$  to a, mostly owing to the metre, but in a few instances against the metre. In the forms asura,  $\bar{a}ditya$ , deva, dhyta-vrata, mitra, varana, nutra varana, mitra-varana b the Pada text has  $-\bar{a}$ ; but in  $p\acute{a}ura$  (v.  $74^4$ ) and  $v\bar{v}ra$  (vI.  $63^{10}$ ) the short vowel appears in the Pada also 7. A similar shortening occurs in the first member of the dual compounds  $indr\bar{a}$ - $v\bar{x}y\bar{n}$  (I.  $2^4$ ) and  $mitr\bar{a}$ - $r\bar{a}j\bar{a}n\bar{a}$  (v.  $62^3$ ).
- N. A. n. This form takes the normal ending -7, which combines with the final -a of the stem to -e. It is made in the RV. from about 30 nominal stems. The vocative does not occur. Only seven of these n. forms are found more than once, strige 'two horns' being the commonest (5) 8.
- a. The n.  $n\acute{a}kta$  'night' is irregular in forming its du. N. as a m. in the compound  $u\acute{s} \acute{a}s \bar{a}$ - $n\acute{a}kt \bar{a}$  'dawn and night', in agreement with which a f. adjective is used, owing doubtless to the predominance of Dawn', in the combination. In 11. 39<sup>4</sup>, sugéva nábhyeva 'like two yokes, like two naves', though analyzed by the Pada as sugá iva and nábhyā iva, must be explained as regular n. forms sugé and nábhye+va.
- I. D. Ab. Before the normal ending  $-bhy\bar{a}m^9$  which forms these cases, the final -a of the stems is lengthened, e.g.  $n\dot{a}saty\bar{a}bhy\bar{a}m$ . In the RV. this form is made from only about a dozen nominal stems in the m. and three in the n. The cases can of course only be distinguished exegetically.
- I. m. kárnābhyīm (AV.) 'ears', dánṣṭrābhyām (TS. AV.) 'teeth', dakṣina-savyābhyām (AV.) 'right and left', dáṣā-ṣākhābhyīm 'having ten fingers', mitrā-várunābhyām¹o, yuktābhyām 'yoked', vrīhi-yavābhyām (AV.) 'rice and barley', subhrābhyām 'shining', sūryā-candramásābhyām (AV.)¹o 'sun and moon', hástābhyām 'hands', haryatābhyīm 'desirable'. n. rk-sāmābhyīm 'hymn and chant', sŕngābhyām (AV.).

D.m. tveṣābhyām 'violent', nāsatyābhyām 'truthful', nicirābhyām 'attentive'.

Ab. m. āṃsābhyām 'shoulders', kārṇābhyām. — n. pārśvābhyām (AV.) 'sides', prā-padābhyām 'tips of the feet', māta-snābhyām certain internal organs.

G. L. These cases take the normal ending -os, between which and the stem y is inserted. In the RV. only eight nominal  $^{11}$  forms occur with the genitive sense, and twelve with the locative sense. One form, *dhvasráyos* (IX. 583), seems to be used as an Ab. There are one or two others which anomalously drop the final -a of the stem, instead of inserting y, before the ending  $-os^{12}$ .

<sup>2</sup> There are 40 instances of this in the RV.; see LANMAN 575.

4 See LANMAN 3414.

8 These neuter duals are enumerated by Lanman 343.

9 To be read - $bhi\bar{a}m$  in two or three forms.

TO In this compound only the second dual takes the proper case-ending.

II There are also the pronominal forms G.I.m. ayós, ubháyos, táyos, yáyos; táyos also as G. n

12 Also the pronominal forms av-5s, en-2s, y-6s. Cp. Lanman 344.

<sup>&</sup>lt;sup>1</sup> In two instances hiatus is removed by nasalization: upásthām ckā (1.356) and jánām ásamā (VI. 671).

<sup>3</sup> This is also the practice of the Brāhmaṇas; see AUFRECHT, AB. 427; cp. Sarvānukramaṇī, ed. MacDonell, p. x. In the AV. (as in the later language) -āv u- is regularly written (except muṣkā upāvadhūt, xx. 1362).

<sup>5</sup> Except vii. 704 where devā oṣadhīṣu (Pada devau) is written, o- being treated like u-, perhaps owing to its labial character.
6 See RPr. iv. 39, 40.

<sup>7</sup> The shortening of the du.  $-\bar{x}$  at the end of odd Pādas before  $\gamma$ , occurring in four passages (II. 37; VI. 682; VIII. 6611; X. 6613) is due to Sandhi; see 70.

The forms occurring are:

G. m. indrā-varuņayos, īśānáyos 'ruling', deváyos, mitráyos, mitrá-várunayos. vamáyos 'twins', várunayos, vaikarnáyos 'descendants of Vikarna'. - n. pāsy-òs (for \*pasya-y-os) 'pressing stones', purān-y-os' (for \*purāna-y-os) 'ancient'.

L. m. ámsayos, ásvayos, upākáyos 'closely connected', kárnayos (AV.). iámbhayos (TS. IV. 1. 10) jaws', tuvi-jātáyos 'of powerful nature', dámstrayos (AV.), nadáyos 'roarers', mitráyos, muskáyos 'testicles', várunayos, váhisthayos

'drawing best', vi-vratayos 'refractory', sthūráyos 'strong', hástayos.

Pl. N. V. m. Here there are two forms. In the more common form the normal ending -as coalesces with the final of the stem to -ās, e. g. devás. The less common form appears to be made by adding the normal ending -as over again<sup>2</sup>, e. g. devás-as. The form in -as is about twice as frequent in the RV. as that in -asas3, the former being made from 808 stems, the latter from 403. In the original parts of the AV. - as is 24 times as frequent as -asas, the former occurring 1366 times, the latter only 57 times+. Both forms frequently occur side by side, the choice of the one or the other being often no doubt determined simply by the metre; e. g. byhán vadema vidáthe suvirāh (11. 116) 'abounding in heroes we would speak aloud in the assembly', but suviraso vidátham á vadema (II. 1215) 'abounding in heroes we would speak to the assembly'.

Examples of the most frequent forms made with the two endings are: 1. devāsas (86), jūnāsas (41), somīsas (41), sutāsas (29), ādityāsas (24) 'Ādityas', yajniyāsas (21) 'holy', amitīsas (11). — 2. divīs and derīs (311), simās (42),

 $\bar{a}dity\dot{a}s$  (39), sut $\dot{a}s$  (27),  $j\dot{a}n\bar{a}s$  (24),  $am\dot{j}t\bar{a}s$  (22),  $ya\dot{j}i\dot{l}ya\bar{l}s$  (10).

N. A. n. 5 Here, as in the N. m. there are two forms, a shorter and a longer, the former being the older and original, as well as the more frequent one. The older form is made not by adding the normal ending -i, but by lengthening the final -a of the stem, e.g. havyá 'oblations' . The later form ends in -ani and is doubtless due to transitions from the stems in  $-an^7$  which form the n. pl. N. A. with both  $-\bar{a}$  and  $-\bar{a}ni$ , e. g.  $n\bar{a}m\bar{r}$  and nāmāni. The form in -ā is in the RV. made from 394 stems, that in -āni from 280, the proportion of the occurrences of the former being roughly three to every two of the latter. The proportion in the AV, is almost exactly reversed, the form in -a being there made from 102 stems, that in -ani from 1588. The two forms are so common side by side that when two n. plurals occur in the same Pada, the one generally ends in  $-\bar{x}ni$  and the other in  $-\bar{x}^{\alpha}$ ; e. g. yā te bhīmāni āyudhī (IX. 6130) 'thy terrible weapons'. This phenomenon

<sup>2</sup> See Brugmann, Grundriss 2, p. 661, where several examples are given of endings being repeated in other languages.

3 The form in -asas seems to be an Indo-Iranian innovation, as there are no certain traces of it in other Indo-European languages; cp. Brugmann 1. c.

With y inserted though -a is dropped. a collective; this would account for the agreement of the singular verb with this pl. in Greek; cp. also sarvā tā ... astu (RV. 1. 1628); see Brugmann, Grundriss 2, D. 682.

7 The G. ahanam is an example of the transference of another case from an -an

stem.

<sup>4</sup> In the original Mantra portions of the TS. the pl. in -ās is very numerous, but I have noted only 11 forms in -asas. In the Khilas, forms in  $-\bar{a}s$  are three times (30) as numerous as in -āsas (10).

<sup>5</sup> There is no example of a V. in the RV., and only one, cittani (III. 24), in the AV. where the Mss. have cittani.

to have started from a N. sing. f. in -ā as | -īmṣi, -ūmṣi; e. g. bhūrīṇi bhadrā (i. 16610);

<sup>8</sup> In the independent Mantra portions of the TS. the forms in  $-\bar{a}$  seem to outnumber those in  $-\bar{a}ni$  in about the same proportion as in the RV.: there are at least 20 forms of the former and 14 of the latter. In the Khilas the two forms are almost equally divided, as 10 examples of  $-\bar{a}$  and 12 of  $-\bar{a}m$ 

<sup>9</sup> Similarly, the form in -7 appears beside 6 This form in -ā is commonly supposed n. pl. forms in -īni, -ūni or even -āmsi,

is clearly due to the influence of metre. The  $-\bar{\alpha}$  here seems never to be shortened to  $-\bar{\alpha}$ , as is so frequently the case in the N. A. n. pl. of  $-\alpha n$  stems <sup>1</sup>. Nor does it avoid hiatus (like the  $-\bar{\alpha}$  of the N. A. du. m.), though coalescence with a following vowel sometimes takes place <sup>2</sup>.

Examples of the commonest forms are: 1. havyá (44), bhúvanā (36), duritá (31) 'distresses', sávanā (30), ukthá (25) 'praises'. — 2. bhhvanāni (57), vṛṭrāṇi (36) 'foes', vṛṭāṇi (34) 'laws', havyāṇi (25), kṛṭāṇi (20) 'done'.

I. m. n. In this case there are two forms, the one adding the normal ending -bhis (before which the final vowel of the stem becomes -e), while the other ends in -ais (which does not appear in any other declension). The form in -ais is only slightly commoner in the RV., being made from 221 stems, while that in -bhis is made from 211. In the AV., however, the former is 5 times as frequent as the latter<sup>5</sup>. The two forms<sup>6</sup> often appear in the same Pāda; e. g. upamēbhir arkáis (1.33²) 'with highest songs'. The choice is often due to the metre; e. g. yātám áśvebhir aśvinā (VIII. 5<sup>7</sup>) 'come with your steeds, O Aśvins', and ādityáir yātam aśvinā (VIII. 35¹³) 'with the Ādityas come, O Aśvins'.

In the RV. the m. forms are roughly twice as numerous as the n. Examples of the most frequent forms are: 1. arkúis (43), ukthúis (35), yajñáis (34), deváis (31), úśvais (30), stímais (25). — 2. devébhis (52), stímebhis (26), vájebhis (21).

D. m. n. This case is formed with the normal ending -bhyas, before which the final -a of the stem appears as -e. In the RV. it is made from over 40 stems in the m., but from only one in the n. In about half the forms occurring the ending has to be read as a dissyllable -bhias. The forms occurring are: ajárebhyas 'unaging', ámavattarebhyas 'mightier', áranebhyas (Kh. v. 1²) 'foreign', arbhakibhyas 'small', ādityibhyas, āśinibhyas 'aged', āśv-àpastarebhyas 'working more quickly', ámebhyas 'helpers', gárbhebhyas 'infants', gṛhibhyas, jánebhyas, jīvibhyas 'living', jñātibhyas (Kh. III. 16¹) 'known', tāvakibhyas 'thy', dáśa-kakṣyebhyas 'having ten girths', dáśa-yoktrebhyas 'having ten traces', dáśa-yojanebhyas 'having ten teams', devibhyas, pajribhyas 'strong', párvatebhyas 'mountains', paspṛdhānebhyas 'striving', pitu-kṛttarebhyas 'procuring more nourishment', piśunebhyas 'treacherous', putribhyas 'sons', pūruṣebhyas 'men', pūrvebhyas 'former', bādhitibhyas 'oppressed', bharatebhyas 'descendants of Bharata', mártye-

sávanā purūni(III. 368); ūrdhvā šocimsi prásthitā rájāmsi (III. 44); rabhasā vápūmsi (III. 18).

I There seems no sufficient reason to assume that in visvêd áha (1.923) as compared with áhā viśvā (1.1302), áha is formed from the transition stem áhar-rather than from áhar-; cp. Lanman p. 348.

<sup>&</sup>lt;sup>2</sup> On some probable mistakes made by the Pada in contracted forms see LANMAN

<sup>3</sup> This lengthening is at least Indo-Iranian: Brugmann, Grundriss 2, p. 6722.

<sup>4</sup> See above 77; and cp. Lanman 346 on the Sandhi of -ān in general.

<sup>5</sup> In the independent Mantra portions of the TS. the proportion is about the same as in the AV. The following four forms with -bhis occur: £taŝebhis (I. 2. 4¹), devêbhis (III. 1. 4³), rudrêbhis (II. I. II²), su-yāmebhis (IV. 7. 15³). In the Khilas 5 forms in -ais to 7 in -ebhis occur. The latter are: amīva-cātanebhis (I. 117), ārtavebhis (III. 16°), ukthēbhis (V. 6³), rsvēbhis (III. 17), kārvarebhis (I. 5¹), rāthebhis (I. 117), sāraghtbhis (I. 117). In the later language the form in -bhis survives in the pronominal ebhis alone.

<sup>6</sup> On the origin of the two forms cp. Brugmann, Grundriss 2, p. 717.

bhyas, mānavebhyas 'men', mánusebhyas 'men', mánebhyas 'descendants of Māna', yajatebhyas 'adorable', yajñlyebhyas, ráthebhyas 'chariots', vidhstarebhyas 'very wise', viprebhyas 'seers', vy-ìsvebhyas 'horseless', sasamānebhyas 'toiling', suvidatriyebhyas 'bountiful', sima-rabhastarebhyas 'intoxicated with Soma', somyebhyas 'preparers of Soma', stevēbhyas 'thieves'. — n. bhivanebhyas 'beings'.

Ab. m. n. This case is formed like the D. with the normal ending -bhyas from nearly two dozen stems in the RV. about equally divided between the m. and n. In more than half of these forms the ending must be pronounced as a dissyllable. The forms occurring are: m. ántebhyas 'ends', ásurebhyas 'divine spirits', ugrébhyas, grhébhyas, jánebhyas, jīnebhyas 'living beings', devebhyas, párvatebhyas, makhébhyas 'vigorous', viprebhyas, śárebhyas, śvenébhyas 'eagles'. — n. anyi-kṛtebhyas 'done by others', āntrébhyas entrails', duritébhyas, nakhébhyas 'nails', padébhyas, párthivebhyas 'terrestrial spaces', bhúvanebhyas, mṛdhrébhyas 'contempt', vánebhyas 'forest trees', harmyébhyas 'houses'.

G. m. n. Instead of the normal ending  $-\bar{a}m$  these stems almost invariably add the ending  $-n\bar{a}m$ , before which the final vowel is lengthened as in the -i, -u and -r stems. This ending (like  $-\bar{a}ni$  in the n. pl.) must have been due to the influence of the -n stems. The case is thus formed in the RV. from over 100 stems in the m. and over 20 in the n. In nearly half these forms the final syllable may be metrically read as  $aam^2$ . Two-thirds of these resolutions are, however, not necessary as they occur at the end of octosyllabic Pādas which may be catalectic; but many undoubted resolutions are required within the Pāda³. Among the forms of most frequent occurrence are m. devắnām (148), jắnānām (34),  $yaj\~niyānām$  (12), ādityắnām (11), adhvarānām (10). — n. dhánānām (13).

a. The organic form e. g. from devá- would have been devám (== devá-ām). Not more than three or four examples of this survive in the RV, and only two of these seem undoubted: yūthyām áśvānām (viii. 56<sup>4</sup>) 'of horses belonging to the herd' and caráthām in gárbhaś ca sthātām gárbhaś caráthām (i. 70³) 'offspring of things that are stationary, offspring of things that move'<sup>4</sup>. There are further some half dozen forms written with final -ān or -ān which seem to stand for the G. pl. in -ām: deván jánma (i. 71³; vi. 11³) 'the race of the gods' (Pada deván); deván jánmanā (x. 64¹4) 'with the race of the gods' (Pada deván); viśa á ca mártān (iv. 2³) 'and hither to the dwellings of mortals' (= mártām); coskūyāte viša indro manusyān (vi. 47¹6) 'Indra protects the tribes of men'.

L. m. n. This case adds the normal ending -su before which (as before -bhis and -bhyas) -e takes the place of the final vowel of the stem and cerebralizes the following sibilant. It is formed from some 123 stems in the m. and some 92 in the n. 5 It is almost invariably 6 to be read with hiatus, even before u-7.

Among the most frequently occurring forms are: m. devėsu (99), vėjesu (41), yajūėsu (35), adhvarėsu (27), martyesu (25), sutėsu (16). — n. vidathesu (33), vanesu (20), savanesu (14), bhivanesu (12), ukthėsu (10).

<sup>2</sup> Lanman (352, bottom) enumerates the forms in which resolution takes place.

<sup>\*</sup> See Lanman 352 c; Brugmann, Grundriss 2, p. 691.

<sup>3</sup> LANMAN 352+, gives a list of the forms in which resolution is required; cp. ARNOLD, Vedic Metre 142 (p. 02)

Vedic Metre 143 (p. 92).

4 Perhaps also himsānām (x.1421) if G. pl. of a participle himsānām, and sāsām if G. of āsā-6 'ruler' (11. 2312). vanām (x. 465) is G. pl. of vān- rather than vāna-. Cp. Lanman 353.

<sup>5</sup> The gender is doubtful in some in-

<sup>&</sup>lt;sup>6</sup> The only undoubted exception to this rule in the RV. occurs in a late hymn (X. 1218), where devişv ádhi must be read. Cp. LANMAN 354.

<sup>7</sup> On the probable origin of the ending -su cp. BRUGMANN, Grundriss 2, p 700.

## 2 b. Derivative Stems in $-\bar{a}$ .

LANMAN, Noun-Inflection 335-365. - WHITNEY, Sanskrit Grammar p. 131-137. -Cp. Collitz, die herkunft der ā-deklination, BB. 29, p. 81-114.

373. The derivative  $\bar{a}$ -declension corresponds to the derivative a-declension, for the m. adjectives of which it furnishes the f. stems. It includes more feminines than any other declension. Like the  $\alpha$ -declension it has many irregularities of inflexion, every case in the singular, except the A., and two cases in the plural showing some abnormal feature. The N. sing. shares with the derivative z-declension the peculiarity of not adding the ending -s; the I. sing. has an alternative form borrowed from the pronominal declension; the D. Ab. G. L. sing. are formed under the influence of the derivative zstems; and the V. sing. ends in -e instead of appearing in the form of the bare stem. In the plural the N. has to a limited extent the same alternative form in -asas as the m. of the a-declension, and the G. is similarly formed with  $-n\bar{\alpha}m$ .

As in the  $\alpha$ -declension, the accent remains in the same position throughout except the V., where it of course shifts to the first syllable.

#### Inflexion.

374. The forms actually occurring, if made from privá- 'dear', would be as follows:

Sing. N. priyā. A. priyām. I. priyā and priyayā. D. priyāyai. Ab. G. triyāyās. L. priyāyām. V. priye.

Du. N. A. priyé. I. Ab. priyábhyām. G. L. priyáyos.

Pl. N. priyās and priyāsas. V. priyās. A. priyās. I. priyābhis. D. Ab.

privábhvas. G. privánām. L. privásu.

Sing. N. This case never adds the normal ending -sr. It is formed in the RV. from 424 stems and occurs more than 1000 times. Examples of the most frequent forms are: y/sā (24) 'maiden', dákṣiṇā (24) 'good milch cow', iļā (17) 'refreshment', jāyā (17) 'wife', su-bhágā (13) 'beautiful', sūnṛtā (10) 'joyful', citrá (9) 'brilliant'.

a. At the end of odd Pādas the final  $-\bar{a}$  of this N. is regularly written with Sandhi, but must always be read with hiatus; coalescence with e- and r- is, however, twice

avoided by nasalization2, while twice3 the  $-\bar{a}$  is shortened before r.

b. Within a Pāda the  $-\bar{a}$  is written with Sandhi in 160 instances in the RV., but is pronounced (unlike the  $-\bar{a}$  of the N. A. du. m.) with hiatus in 23 of these instances; while the nominatives  $\bar{\iota}_{\bar{s}}\hat{a}$  'car-pole' and  $man\bar{\imath}_{\bar{s}}\hat{a}$  'devotion' are written as well as pronounced with hiatus 4, the former once, the latter four times.

A. This case, which is formed with the normal ending -m, is in the RV. made from over 200 nominal stems occurring more than 400 times. Examples of the most frequent forms are: manīṣām (21), jāyām (11), ámīvām (9) 'distress', yóṣām (7), yóṣaṇām (6) 'maiden'.

a. This case is often identical in form with the L. sing. f. of stems in -ī; thus pūrvyām may be the A. of pūrvyā-'previous' or L. of pūrvī- 'much'. In one instance at least elision of the -m, followed by contraction, takes place 5: satatamāvivesīh (VII. 195) for

2 śaśadanam eși (I. 12310) and yan rnamcaye

4 tṣá ákṣo (VIII. 529); mantṣá abhi (1. 1017); see LANMAN 356.

dissyllabic, came to be regarded as a radical ā-stem and accordingly forms its N. sing. gná-s (IV. 9<sup>4</sup>).

<sup>3</sup> privá r. (1. 1514), rju-hásta r. (v. 4115).

<sup>\*</sup> The stem gnā-'woman', though originally | manīṣā iyām (V.II<sup>5</sup>; VII. 70<sup>7</sup>); manīṣā asmāt (VII. 341); cp. RPr. II. 29. LANMAN 356 suggests that the comparative frequency of this hiatus justifies the restoration of the augment in Padas short of a syllable; e.g.  $pr\acute{a} s\acute{a} [a] v\bar{a} ci (VII. 58^6)$ .

<sup>5</sup> On some contractions in which -m has probably been elided but explained wrongly by the Pada as containing nominatives in -a,

 $\delta atatam \acute{a}m$  arrivestly. In two or three instances the metre seems to require  $- \ddot{a}m$  to be read as - aam r.

I. There are two forms of this case. In the one, the normal ending  $-\bar{a}$  is added directly to the stem and, by contracting with its final  $-\bar{a}$ , produces a form identical in appearance with the N., e. g.  $jihva\dot{a}$  (=  $jihva\dot{a}-\bar{a}$ ) 'tongue'. In the other, y is interposed between the ending  $-\bar{a}$  and the final  $-\bar{a}$  of the stem, which is shortened, e. g.  $jihva\dot{a}-y-\bar{a}$ . The latter form is due to the influence of the regular pronominal I. sing. f., e. g.  $tay\bar{a}^2$ . This form is already slightly the more common in the RV.3, being made from 113 stems acompared with 95 which take the older form with  $-\bar{a}$ . In the later Samhitās the I. in  $-\bar{a}$  is very rare in original passages, the AV. using only five such forms independently 5. Both forms are (unlike the N. pl. m. in  $-\bar{a}sas$  and  $-\bar{a}s$ ) comparatively seldom made from the same stem, as  $jihva\dot{a}$  and  $jihva\dot{a}ya\dot{a}$ . Two thirds of the total number of 95 stems which have the older form, end in the suffixes  $-t\bar{a}$  and  $-y\bar{a}$ , as  $purus\dot{a}-t\bar{a}$  'after the manner of men', hiranyaya' 'golden'. The choice of the alternative forms is, as elsewhere, often determined by the metre'.

Examples of the commonest forms are: **1.** doṣā (13) 'evening', barhāṇā (13) 'might', manīṣā (13), maṇhāṇā (11) 'willingness', śravasyā (7) 'desire to praise'?. — Also āśīr-dāyā (TS. III. 2. 8!) 'fulfilment of blessing', riśwá-psnya (TS. I. 5. 3<sup>3</sup>; VS. XII. 10) 'omniform'. — **2.** dhárayā (53) 'stream', jihváya (24), māyáyā (20) 'craft'.

a. There are some instrumentals sing. f. formed from derivative a- stems, which are used as adverbs with shift of accent to the ending. Such are: a-datrayā 'without a gift' (a-datra-), ubhayā 'in both ways' (ubhāya-), rtayā 'in the right way' (rtā-), dakṣiṇā 'on the right' (dākṣiṇa-), naktayā 'by night' (nākta-), madhyā 'in the middle' (mādhya-), samanā 'together' (sāmana-), svapnayā (AV.) 'in dream' (svāpna-)8.

D. This case is anomalously formed by adding -yai to the stem, e. g. jará-yai. It is not of common occurrence, being made from only 14 nominal to stems in the RV. The forms occurring are: a-gitāyai 'lack of cows', a-viratāyai 'lack of sons', ukhāyai (TS.IV. 1.93) 'pot', uttānāyai (TS.IV. 1.4<sup>1</sup>; Kh.V. 164) 'supine', ghiṣāyai N. of a woman, carāyai 'for going', jarāyai (AV.) 'old age', tvā-yatāyai 'presented by thee', ducchināyai 'mischievous demon', putrā-kāmāyai (Kh.IV. 13<sup>1</sup>) 'desiring sons', pūtā-kratāyai N. of a woman, manāyai 'eagerness', vispālāyai N. of a woman, śīvāyai 'auspicious', śīvātanāyai 'dawn', sūnṛtāyai 'joy', sūryāyai 'sun-goddess'.

a. Two forms have been preserved in which the D. is made by adding the normal ending -e directly to the stem with the -ā of which it coalesces to -ai: mahīyāi (1.1136) 'greatness', sv-apatyāi'<sup>1</sup> (1.54<sup>11</sup>) 'accompanied with fair offspring'. These are formed like the D. infinitives from radical ā-stems such as vi-khyāi (584).

b. In one passage (VII. 119) the form a virale, for a virala ai 'lack of sons',

1 See LANMAN 357 (top).

<sup>2</sup> Cp. Brugmann, Grundriss 2, p. 629, 783.

3 The corresponding later form in the Avesta is much commoner than the older: Brugmann 2, p. 629.

+ This number given by LANMAN 357 includes some pronominal stems. Brugmann's statement (2, p. 629) that the form in  $-ay\bar{a}$  is less common than the form in  $-\bar{a}$  in Vedic, is not applicable even to the RV.

5 The forms are dakṣiṇā, devátā, doṣā, sumnayā, vitta-kāmyā; only the last is peculiar

to the AV.

6 Euphony also has some influence; thus hiranyayaya does not occur.

8 These forms may have been due to the influence of the pronominal adverb a-y a in this way' (with adverbial shift of accent, cp.  $\iota \dot{a} y \bar{a}$  etc.); see J. Schmidt, Pluralbildung 212 ff., and BRUGMANN, Grundriss 2, p. 629; otherwise BARTHOLOMAE, BB. 15, 20 f.

9 Formed in the Indo-Iranian period, probably under the influence of the derivative stems in -ī originally -yā, i. e. -yái for -yā-c.

10 Also sváyai from the possessive pronoun

11 BRUGMANN, Grundriss 2, p. 600, thinks this form may be shortened for sv-apatyāyai.

<sup>7</sup> Lanman 358 enumerates the homophonous instrumentals.

takes the ending -e direct, but with elision of the stem vowel, as in the radical  $\bar{a}$ -declension  $r_{\bullet}$ 

Ab. This case is formed anomalously by adding the ending -y.īs to the stem<sup>2</sup>. It is rare, being made in the RV. from only seven stems, the AV. having three additional examples. The forms occurring are:  $\bar{\iota}_{I}rdh\nu\dot{d}y\bar{\tau}s$  (AV.) 'upright',  $kan\dot{d}y\bar{a}s$  'maiden',  $jihv\dot{d}y\bar{a}s$ ,  $diksin\bar{\tau}y\bar{s}s$ ,  $dur-\dot{v}v\bar{\sigma}y\bar{\tau}s$  'ill-disposed',  $dur-\dot{h}\dot{u}u\bar{\sigma}y\bar{\sigma}s$  'mischief'.  $d\dot{u}ivy\bar{\sigma}y\bar{\tau}s$  'divine',  $dhruv\dot{\sigma}y\bar{\tau}s$  (AV.) 'firm',  $nid\bar{\tau}y\bar{\tau}s$  'disgrace',  $vy-adhv\dot{\sigma}y\bar{a}s$  (AV.)<sup>3</sup> 'lying half-way'.

G. This case is formed in the same way as the Ab., but is much more frequent, being made from 26 stems in the RV. The forms occurring are: aghnyāyās and aghnyāyās 'cow (not to be killed)', //āyās, ukhāyās, usriyāyās 'ruddy cow', ārmyāyās 'night', kanāyās, kāṣṭhāyās 'course', jihvāyās, dákṣṭnāyās, darsatāyās 'conspicuous', dārvāyās 'Dūrvā grass', dhiṣāṇāyās 'offering', dhiṣamāṇāyās 'longing', pājrāyās 'vigorous', pāri-takmyāyās 'wandering', māhināyās 'mighty', rasāyās a mythical river, vayāyās 'branch', vispālāyās, sasārattamāyās 'most recent', siphāyās N. of a river, sucāyās 'pure', sabar-dhghāyās 'yielding nectar', sehānāyās' victorious', shrāyās 'intoxicating liquor', sūryāyās.

L. This case is formed by adding the anomalous ending -yām to the stem, e. g. bhadrá-yām. It is not common, being formed from only 16 or 17 stems in the RV. The forms occurring are: āpayāyām<sup>6</sup> N. of a river, āmāyām 'raw', uttānāyām 'outstretched', usriyāyām, (ā)-gatīyām 'come', grīvāyām 'neck', jūrṇāyām 'ancient', nāvāyām 'new', piri-takmyāyām, bhadrāyām 'beneficent', yaminīyām N. of a river, varatrāyām 'thong', vāšāyām (Kh.II. 105) 'cow', siņsāpāyām N. of a tree, sirināyām 'night', sabhāyām (TS.1. 8. 3') 'assembly', sūrāyām, su-simāyām<sup>7</sup> N. of a river, hariyūpiyāyām N. of a locality.

V. This case has the abnormal ending  $-e^8$  and is in the RV. formed from over 50 stems; e. g. aśve. The original form must have been the bare stem with the final vowel shortened; e. g. \*áśva, but of this there is no certain survival. The form amba which occurs in the RV. three times (unaccented) may originally have been an exclamation, and it can have this sense alone in one of the three passages of the RV. (x. 97²), where it is used with a plural. In the two other passages it may very well mean 'O mother' (11. 41¹6; x. 86²). The VS. (xxiii. 18) and the TS. (vii. 4. 19¹) have the V. ámbe as from a stem ámbā 'mother'o.

The forms occurring are:  $dghny\bar{a}sye^{10}$  (Kh. IV.  $5^{26}$ ,  $3^2$ ) 'cow-faced', aghnye, apve N. of a disease, amartye 'immortal', dmbike (TS. VS.) 'mother', ambitame 'most motherly', asve 'mare',  $asva-s\bar{u}nrte$  'rich in horses',  $dditya-varne^{11}$  (Kh. II.  $6^6$ ) 'sun-coloured',  $\bar{a}rj\bar{\iota}k\bar{\iota}ye$  N. of a river, ile goddess of devotion, istake (TS. IV. 2.  $9^2$ ) 'brick', ugra-putre 'having mighty sons', uttare 'mightier',  $utt\bar{\iota}na-parne$  'having extended leaves', uru-vraje 'extending afar',  $\bar{\iota}rmye$ , rsve 'exalted', kadha-prive 'ever pleased',  $k\bar{\iota}ne$  'one-eyed',  $k\bar{\iota}ma-dught$  (TS. IV. 2.  $9^6$ ) 'cow of plenty', krtye (Kh. IV.  $5^{25}$ ) 'magic',  $ghvru-r\bar{\iota}pe$  (Kh. IV.  $5^{26}$ ) 'of awful form', gaige 'Ganges', ghore 'awful', citre,  $citr\bar{\iota}-maghe$  'having brilliant gifts',  $j\bar{\iota}ye$ ,  $d\bar{\iota}rve$  (TS. IV. 2.  $9^2$ ),  $deva-j\bar{\iota}te$  'impelled by the gods'

This forms a transition to the consonant declension like devátāte beside devátātaye; cp. LANMAN 359<sup>2</sup>.

<sup>&</sup>lt;sup>2</sup> Like the D. it is due to the influence of the stems in derivative -*ī*, to the fuller form of which, -*yā*-, the normal ending -as was added.

<sup>3</sup> Also the pronominal svayas 'own'.

<sup>4</sup> Participle, perhaps desiderative, of dhī-'think'.

<sup>5</sup> Perfect participle middle of sah- 'conquer'.

6 A transition form from the radical ā-declension, see p. 249, note II.

<sup>7</sup> Also the pronominal form svåyām.

<sup>8</sup> The origin of this ending is uncertain; cp. BRUGMANN 2, 541.
9 This is a common stem in post-Vedic Sanskrit.

<sup>10</sup> The ed. has aghnyasye.

<sup>11</sup> The ed. has ādityá-varne.

devi-tame<sup>1</sup> 'most divine', dhisane 'goddess of devotion', nadī-tame 'best of rivers', pathye 'path' (as goddess), pastye 'goddess of the house', putra-kāme, puru-priye 'much beloved', pṛthu-jāghane 'broad-hipped', pṛthu-ṣṭuke 'having broad braids of hair', priye (TS. VII. I. 68), brahma-saṃśite 'sharpened by prayer', marud-vṛdhe N. of a river, yamune, rāke N. of a goddess, vapuṣṭame (Kh. IV. 77) 'most beautiful', vɨra-rūpe (Kh. IV. 526) 'of excellent form', vi-kaṭe 'monstrous', vivasvad-vāte (TS. IV. 4. 124) 'desired by Vivasvat', viśva-rūpe (TS. IV. 2. 52) 'omniform', viśva-vāre 'possessed of all goods', śaravye 'arrow', śītike 'cool', ślinge (Kh. V. I58) N. of a goddess, śubhre 'shining', sa-dānve 'associated with demons', sarame N. of a goddess, sīte 'furrow', su-jāte 'well-born', su-putre 'having good sons', su-bhage, su-lābhike 'easy to win', su-snuṣe 'having fair daughters-in-law', sū-nṛte, sūrya-varne (Kh. IV. 77) 'sun-coloured', sūrye, stima-trayastriṇiśc (TS. IV. 4. 124), hāriklike (Kh. V. I51) 'yellowish', hiraṇya-parṇe (Kh. IV. 77) 'gold-winged', hlādike 'refreshing'.

**Du. N. A. V.** These cases are identical in form, having final -e which doubtless contains the same dual ending  $-\overline{r}$  as N. A. V. du. of the  $\alpha$ - declension<sup>2</sup>. They are of frequent occurrence, being made from over 130 stems in the RV. The ending -e is Pragrhya, being distinguished by the Pada text with an appended *iti* from the e of the V. sing. f.; e. g. V. du. f. *subhre iti*, but V. sing. f. *subhre*.

Examples of the most frequent forms are: ubhi (66) 'both', su-mike<sup>3</sup> (8) 'well-established', devá-putre (7) 'having gods as sons', vi-rūpe (7) 'of different forms', sipre (5) 'cheeks'. The compound sitāsite 'black and white' occurs in a Khila (p. 1715).

- I. Ab. These cases, made with the ending  $-bhy\bar{a}m$ , are identical in form with the I. D. Ab. m. n. of the a- declension. They are represented by only two forms in the RV.:  $s'lpr\bar{a}bhy\bar{a}m$  (x. 1055) which seems to be I.4, and  $n\dot{a}sik\bar{a}bhy\bar{a}m$  (x. 1631) 'nostrils', Ab. No form with a D. sense occurs.
- **G.** L. Both these cases add, with interposing -y-, the normal ending -os to the final  $-\bar{\alpha}$  of the stem, which is shortened. They are thus identical in form with the G. L. du. m. n. of the  $\alpha$  declension. There are only four nominal forms in the RV. and AV.: in the G. sense jánghayos (AV.) 'legs', yamáyos 'twins'; and in the L. sense uttīnáyos, svadháyos 'homestead' 5.
- P1. N. V. The regular form ends in  $-\bar{a}s$  and is very common, being formed from nearly 260 stems in the RV. Examples of the commonest forms are:  $bhadr\acute{a}s$  (19),  $dh\acute{a}r\bar{a}s$  (16),  $man\bar{s}s\acute{a}s$  (10).

There is, however, a second form in -āsas which occurs nearly 20 times in the RV. Considering the rarity of this form here, while it is the commoner as N. pl. m. in the a- declension, the probability is that its introduction was due to those very numerous masculines. The forms occurring are: á-tandrāsas 'indefatigable', a-mṛtāsas (AV.) 'immortal', dur-mitrāsas 'unfriendly', paspṛdhānāsas 'vying' 7, pārthivāsas 8 'terrestrial', pāvakāsas 'pure', bhejānāsas 9 'having obtained', vanvānāsas 10 (SV.) 'having obtained', vasāsas,

shortened as in the simple vocative devi.

<sup>&</sup>lt;sup>2</sup> Cp. Brugmann, Grundriss 2, 286 (p. 643).
<sup>3</sup> Cp. Windisch in Festgruss an O. v. Böht-

LINGK 114f.
4 The pronominal form tābhyām (x. 88<sup>15</sup>) has a locative meaning.

<sup>5</sup> There are also the pronominal forms of the RV. ayós and yáyos. In III. 542 the Pada text reads āyós probably for ayós.

<sup>6</sup> In two or three passages the Pada text seems to confuse forms in  $-\bar{a}s$  with others in  $-\bar{a}$ ; see LANMAN 362.

<sup>7</sup> Perfect participle middle of Vsprdh.

<sup>8</sup> Cp. LANMAN 362.

<sup>9</sup> Perfect participle middle of bhaj- 'share'.

10 The variant of the SV. for bhejānāsas of the RV.

vāśrāsas 'roaring', vidānāsas 'being found', vrdhāsas 'helping', ā-suṣāṇāsas 'stimulating', sūghanāsas 'swift', sāmmitāsas (AV.) 'corresponding', smáyamānāsas

'smiling', hávamīnīsas 'calling' 4.

A. This case is formed with the normal ending -as which coalesces with the final of the stem to -\bar{a}s, e.g. sanft\bar{a}s. It is very frequent, being made from more than 160 stems in the RV. Examples of the commonest forms are: m\bar{a}v\bar{a}s (22), fitan\bar{a}s (13) 'battles', usr\bar{a}s (12) 'dawns', dh\bar{a}r\bar{a}s (11), usr'y\bar{a}s (10)^5. Two instances occur of forms in -\bar{a}sas being wrongly used as A. pl. f.: sanvid\bar{a}n\bar{a}sas (x. 30^{14}) 'united' and aran-gam\bar{a}sas (AV. xiii. 2^{13}) 'ready to help'.

I. This case is always formed by adding the ending -bhis directly to the stem, e. g. sānṛtā-bhis. It is made from over 80 stems in the RV. Examples of the most frequent forms are: māyābhis (13), citrābhis (8), dhārābhis (7), hhtrābhis (7) 'libations', ilābhis (6). The form drāghishhābhis (III. 62<sup>17</sup>) 'for

longest times'6 is used adverbially.

D. Ab. These cases are formed with the same ending -bhyas (sometimes to be read as two syllables) added directly to the stem. In the RV. only 4 datives and 11 ablatives occur from nominal stems? The forms occurring are: D. aghnyábhyas, usríyābhyas, ducchúnābhyas, devátābhyas (TS. IV. 2. 9°) 'deities', vṛtábhyas 'movements'. — Ab. ádharābhyas 'lower', áśābhyas 'regions', úttarābhyas, uṣṇihābhyas 'nape of the neck', kikasābhyas 'cartilages of the breast-bone', gṛlaābhyas 'intestines', gṛīvábhyas, daṃsánābhyas 'wondrous powers', dhiṣánābhyas 'Soma bowls', vakṣánābhyas 'bellies', syāvyābhyas 'darkness'.

G. This case being made with the abnormal ending  $-n\bar{\alpha}m$  is identical in form with the G.pl.m. of the a-declension. It is formed in the RV. from 22 stems. There is no certain example here of forms with the normal ending  $-\bar{\alpha}m$  which is found in a few genitives of the a-declension (372). There are only a couple of instances in which the resolution of the final syllable as -aam seems required by the metre 8. The G. of  $kany\bar{x}$ - 'girl' always appears in the contracted form of  $kanln\bar{\alpha}m^9$  (occurring five times) in the RV. 10

The forms actually occurring are: ákṣarānām 'speech', ághnyānām, a-niveśanánām 'affording no place of rest', á-bhayānām 'free from danger', áśma-vrajānām 'whose pen is a rock', áśānām (TS. IV. 4. 12'), urvárāṇām 'arable fields', usránām, usriyāṇām, káṣthānām, kṛtyắnām (Kh. IV. 5³°), jihmánām 'transverse', divyánām 'heavenly', dighānām 'milch kine', devátānām (Kh. II. 4'), deva-senánām 'hosts of the gods', dhiṣáṇānām, návāṇām, navyānām 'navigable rivers', pastyànām 'abodes', manīṣáṇām, rámyāṇām 'nights', sámānām 'years', sūnftānām 'songs of joy', stiyānām 'still waters'.

L. This case is formed by adding the ending -su directly to the stem. The final -u though always combined with a following vowel both at the end of an internal Pāda or within a Pāda, is invariably to be read with hiatus

<sup>2</sup> Participle middle of Vivas-.

7 There are also the pronominal forms ābhyás and ābhyas, tābhyas, yābhyas.

Participle middle, with passive sense, of vid- 'find'.

<sup>3</sup> This word (AV.) is of uncertain derivation.

<sup>4</sup> There are besides two or three doubtful instances which may be m.; see LANMAN 362.

<sup>5</sup> In several instances  $-\bar{a}s$  is most probably to be read where the Pada text has  $-\bar{\tau}$ , see I.ANMAN 363. In a few forms the resolution of  $-\bar{a}s$  as -aas or  $-a\bar{a}s$  seems necessary; LANMAN I. c.

<sup>6</sup> Cp. aparibhyas 'for future times'.

<sup>8</sup> dhānānām in VIII. 59<sup>12</sup> and pṛṭanānām in VIII. 59<sup>1</sup>. In sūnṛṭānām (I. 3<sup>11</sup>) the metre seems to require the shortening of the final of the stem: sūnṛṭānām; LANMAN 364.

<sup>9</sup> This is a form of some importance as showing how the suffix  $-\bar{\imath}$  arose from  $-y\bar{a}$ , to It also occurs once in Kh. I.  $5^7$ .

in the RV.; e. g. svásu urvárasu (x. 503) for svásūrvárasu. This case is formed from over 50 nominal stems in the RV. The forms occurring are: aghāsu 'evil', amftāsu, ávarāsu 'later', āmāsu, ártanāsu 'uncultivated', úparāsu 'neighbouring', urvarāsu, usriyāsu, armyāsu', kásthāsu, kṛṣṇāsu 'black', grīvāsu (TS. IV. 2. 53), cittá-garbhāsu 'visibly pregnant', citrásu, jagmānāsu2 'having gone', jātasu 'born', tigryāsu 'descended from Tugra', diryāsu 'abodes', devátāsu (TS. 1. 6. 43), dhisnyāsu 'fireplaces', dhruzásu 'unchangeable', návāsu, pathyasu, pádyasu 'footsteps', pastyāsu, pānca-janyāsu 'relating to the five tribes', puru-piśāsu 'multiform', púrvāsu 'earlier', pitanāsu, pradhanyasu 'forming the spoil', privasu, madvasu 'fond of exhilaration', madhyamasu 'middlemost', manusyasu 'human', mandrasu (TS.IV. I.82), mártyāsu 'mortal', mahínāsu 'mighty', yajníyāsu 'devout', (prá-)yatāsu 'presented', yosanāsu, rāmyāsu, repanākāsu a kind of bird, vaksanāsu 'bellies', vyddhasu 'great', vydhasanasu' 'growing', sayasu 'resting-places', śúskāsu 'dry', śyāvāsu 'nights', śrutāsu 'famous', sánayāsu 'old', saptá-śivāsu 'blessing the seven (worlds)', sirásu 'streams', su-vrjánāsu 'dwelling in fair regions', hávyāsu 'to be invoked'.

## 3. a. Stems in radical -ī.

LANMAN, Noun-Inflection 365-400. - WHITNEY, Sanskrit Grammar 348-359.

375. This declension consists primarily of fewer than 50 m. and f. nouns derived from 9 roots. Only four of these words appear as monosyllables, the rest being compounds. The analogy of this primary group (A) is closely followed both in inflexion and accentuation by a second group of about 80 polysyllabic stems which, though formed with derivative -ī, are for the sake of clearness best treated as a division (B) of this declension. The normal endings as they appear in the inflexion of consonant stems are taken throughout this declension. The G. pl., however, with the exception of a single form occurring only once  $(dhiy\bar{a}m)$ , takes the ending  $-n\bar{a}m$ ; and the N. sing. always adds -s. Accentuation on the final syllable of the stem is characteristic of this declension; and except in monosyllabic stems the acute remains on that syllable throughout4. Before vowel endings the -ī is split to -iy in the monosyllabic nouns; e.g. dhiy-am; this is also the case in compounds formed with these nouns, except -dhī when it is accented, e. g. jana-śrivam, nánādhiyas, but ā-dhiam; in compounds formed with roots it is split only when two consonants precede; e. g. yajña-priyam, but yajña-níam; in the secondary group it is split in samudrí- and partly in cakrí-, e. g. samudríyas and cakriyau, but cakrias. Otherwise the z is always written as y, but is in the RV. invariably 5 to be pronounced as a vowel; e.g. nady in pronounced nadiam6.

A. The stems belonging to the primary group are: 1. the monosyllabic feminines dhí-'thought', bhí-'fear', śrí-'glory'; and the m. ví-'receiver' (which occurs only once in the N. sing.). — 2. Compounds (mostly Bahuvrīhis) formed with the first three:  $\bar{a}$ -dhi-f. 'care', itthá-dhī-'right devout', dīrghādhi-

<sup>&</sup>lt;sup>1</sup> Cp. the L. pl. of the a-declension.

<sup>&</sup>lt;sup>2</sup> Perfect participle middle of gam- 'go'.

<sup>3</sup> Participle middle from vydh- 'grow'.

<sup>4</sup> There are one or two exceptions to this rule in compound words in the A group, and a few others, in the AV., in the B group.

RV.: A. sing. staryam (VII. 688) in a late the ī of the stem always appears as iy or y.

verse (cp. Lanman 3791) and N. pl. nadyàs (vii. 504). The AV. has six such forms: asvataryàs, nadyàs, naptyàs, nādyàs, pippalyàs, vrksa-sarpyàs.

<sup>6</sup> The resolved forms are therefore always given below, spelt with i in this declension. This will not lead to any confusion with the There are only two exceptions in the written forms of the Samhita text in which

'having a far-reaching mind' (ā-dh'-), dur-ā-dh'- 'malevolent', dūrd-ādhī- 'longing for the distance', sv-īdhi-'attentive', dū-dhi-'a'maleyolent', nānā-dhī-'of various intent', viśváto-dhī- 'all-attending', su-dhí- 'devout'; avadya-bhí- f. 'fear of blame'; agni-śri- 'fire-bright', adhvara-śri- 'adorning the sacrifice', kṣatra-śri- 'blessing dominion', glirta-śri- 'glittering with ghee', jana-śri- 'blessing men', darśata-śri-'of beauteous splendour', márya-śrī- 'adorned like a wooer', yajňa-śrź- 'beautifying the sacrifice', su-śr.- 'glorious', hari-śr.- 'of golden glory'. - 3. Compounds; formed with the roots krī- 'buy', nī- 'lead', prī- 'love', mī- 'diminish', vī- 'move' and 'cover', sī- 'lie', srī- 'mix': pra-krī- (AV.) 'purchasable', sadyahkri-(AV.) 'bought on the same day'; agre-ni- (VS.) 'leading', rta-ni- 'leading the rite', grāma-n'i- 'leading the community', pada-n'i- (AV.) 'following the steps of another', pra-ni- f. 'furtherance', pra-neni-4 'powerfully furthering', mana-ni-'spirit-leading', yajň z-nź- 'leading the sacrifice', vasa-nź- m. 'commander', vratant- 'carrying out the ordinance', sadha-nt- 'accompanying', sen \(\bar{\text{t}}-n'\)- m. 'leader of an army', skambha-ní-(VS.) 'furnishing a prop'; abhi-prí- 'gladdening', kadhaprī- 'gladdening whom?', pari-pri- 'dear', brahma-pri- 'prayer-loving', yajña-pri-'sacrifice-loving'; manyu-mi-'rage-obstructing', vaita-pra-mī-'surpassing the wind'; takva-vi- m. '(swiftly darting) bird', deva-vi- and devā-vi- 'god-refreshing', padavi- m. 'leader', parṇa-vi- 'moving with wings', pratī-vi-5 'gladly accepting', hiranya-vi- 'gold-bringing'; pra-vi- (VS.) 'wound round'; jihma-si- 'lying prostrate', patsu-tas'-s'i-6 'lying at the feet', madhyama-s'i-'lying in the midst', syona-s'i-'lying on a soft couch'; abhi-śri-1 'admixture', gana-śri-1 'mixing in troops'.

B. This secondary group comprises upwards of 80 polysyllabic stems, accented on the final vowel, which are all substantives except about half a dozen. It includes fewer than a dozen masculines. Of the remainder, which are feminine, more than half are names of female beings; about 30 are the f. form of m. stems that are not accented on the final vowel, as purus woman' beside plirusa- 'man'. There are also some f. adjectives corresponding to m. in -ya, as svari- beside svaryà- 'resounding'. This derivative group closely follows the analogy of the third division of the radical group (compounds ending in roots with final accented -\(\bar{\epsilon}\)); it joined the radical declension doubt-

less owing to the accentuation of the final vowel.

The m. stems are: ahi-'serpent', upāvi-(VS.)8 'encouraging', dakṣī-9 'flaming'; prāvi-8 'attentive', duṣ-prāvi- 'unfriendly', su-prāvi- 'very attentive'; yayi-10 'going'; rathi- 'charioteer', d-rathī- 'not a charioteer'; sahásra-starī- 'having a thousand

barren cows', hiranya-vāsī- 'wielding a golden axe'.

The f. stems are: athari- 'flame', atharvi- 'priestess' (m. átharvan-), á-durmangalī- 'not unlucky', apari- pl. 'future days' (m. ápara-), apasi- (VS.) 'industrious' (m. apásya-), ambī- 'mother', arāyi- 'demoness' (m. árāya-), aruni- 'dawn', aśvatari- (AV.) 'she-mule', asṭa-karni- 'cow with notched ear', ā-pathi- 'impediment', eni- 'doe' (m. éta-), oni- 'breast', kalyāni- 'fair woman' (m. kalyāṇa-), kavasi- 'creaking' (m. kaváṣa-), kilāsi- 'spotted deer' (m. kilāsa-), kumāri- (AV.) 'girl', kūd- (AV.) 'fetter', kṛṣṇi- 'night', kṣoṇi- 'flood', khāri- 'measure', gandharvi- 'female Gandharva', gauri- 'buffalo cow', cakri- 'wheel', tandri-

I For duré-ādhi-.

² From aus-dhi-.

<sup>3</sup> Mostly Tatpurusas, generally with accusative sense; some Karmadhārayas.

<sup>4</sup> An intensive formation from nī-flead'.

<sup>5 &#</sup>x27;Coming towards', práti, with lengthened dakṣi, Pada text dhakṣi.

<sup>6</sup> From patsu-tás, an adverb anomalously in origin.

formed by adding the suffix -tas to the L. pl. of pád- 'foot'.

<sup>7</sup> Formed directly from the root irimix', and not from the substantive iri-

<sup>8</sup> From upa and pra+av- 'favour'.

<sup>9</sup> To be assumed as the stem of the V. dakşi, Pada text dhakşi.

To The final vowel is here perhaps radical

(AV.) 'weariness' (m. tándra-), tapaní- 'heat' (m. tápana-), tila-piñji- (AV.) N. of a plant (m. tila-pinja-), tiksna-śrngi- (AV.) 'sharp-horned' (m. tiksnáśringa-), dāti- 'messenger', dehi- 'dam', nadi- 'stream', napti- 'daughter' (m. náptr-), nādi- 'pipe', nāndi- 'joy', nistigri- N. of Indra's mother, palāli- (AV.) 'stalk', pippali- (AV.), 'berry' (m. pippala-), purusi- 'woman' (m. pirusa-), prapharvi-'voluptuous girl', mandūki-'female frog' (m. mandūka-), mayūri- 'peahen' (m. mayūra-), mahi-nadī- 'great stream', mahisi- (TS.) 'buffalo cow', meṣi- 'ewe', yami-'Yamī', yayi-2' quick', yātudhāni-'sorceress' (m. yātudhāna-), rathi-'female charioteer' (m. rátha- 'car'), laksmí- 'mark', lalāmí- 'speckled mare' (m. lalāma-), vakṣí-'flame', vi-kest- (AV.) 'shaggy hog', vibāli- N. of a river, vi-lipti- (AV.) 'cow', vi-lūdhi- (AV.) 'female monster', viśva-rūpi- 'brindled cow' (m. viśvi-rūpα-), zyrki- 'she-wolf' (m. v/ka-), zyrksa-sarpi- (AV.) 'tree-serpent', zveśi- 'needle', vyasta-keśi- (AV.) 'shaggy hog', śakaṭi- 'cart' (śitkaṭa-), śabali- (TS.) 'cow of plenty' (m. śabála-), sakthi- 'thigh' (n. sákthi-), sasarpari- 'trumpet', sahasraparnt- (AV.) N. of a plant (m. sahásra-parna-), simh - 'lioness', su-mangali-3 'lucky woman' (m. su-mangala-), sūrmi- 'pipe', sṛṇi- 'sickle', stari- 'barren cow', sphigi- 'hip', hastini- (AV.) 'female elephant', hiranya-keśi- 'gold-haired' (AV.) (m. hiranya-kesa-).

a. There are further a few f. adjectives in -z from m. stems in -ya: úpz-'watery' (m. ápya-), samudrí-5 'belonging to the sea' (m. samudríya-), svarí-'resounding' (m. svaryà-).

a. There are a few transition forms from the i-stems: karkaryàs (AV.) from karkari- lute' (karkari-); N. sing. ario (VS. VI. 36) from ari- laithful beside the usual ari-; and the stems yayi-, sakthi-, syni- also occur beside yayi-, sakthi-, syni- respectively. The only certain transition from the derivative i- declension to the radical i- declension is represented by stri- woman', originally a dissyllable from which occur the forms A. sing. striyam, N. A. pl. striyas, I. strībhis. Other transition forms are probably trianias G. sing. N. pl., yahvias A. pl., suparnias N. A. pl.

#### Inflexion.

376. The forms actually occurring if made from dhi- 'thought', yajna-śri- m. f. 'adorning the sacrifice', senā-ni- m. 'leader of an army', rathi- m. f. 'charioteer' respectively, would be the following:

A. I. sing. N. dhis. A. dhiyam. I. dhiya. D. dhiye. G. dhiyas. —

Pl. N. dhíyas. A. dhíyas. I. dhībhís. G. dhīnām10. L. dhīşú.

2. sing. N. yajña-śris. A. yajña-śriyam. I. yajña-śriyā. D. yajña-śriye. G. yajña-śriyas. — Du. N. A. yajña-śriyā and yajña-śriyau (AV.). — Pl. N. yajña-śriyas. A. yajña-śriyas. I. yajña-śribhis.

3. sing. N. senā-nís. A. senā-níam. D. senā-níe. G. senā-nías. — Du. N. A. senā-níā. G. senā-níos. — Pl. N. senā-nías. A. senā-nías. D. senā-

nībhyas. G. senā-nīnām.

B. Sing. N. rathis. A. rathiam. I. rathiā. D. rathie. G. rathias. V. rathi. — Du. N. A. rathiā. I. f. rathibhyām. G. f. rathios. L. rathios. — Pl. N. rathias. A. rathias. I. rathibhis. D. f. rathibhyas. G. rathinām. L. f. rathisu.

<sup>2</sup> The final vowel in this word is perhaps radical in origin (from  $y\bar{a}$ - 'go').

6 See WHITNEY on AV. 1v. 375.

7 See Lanman 3713.

8 In 1. 1227 staris seems to be the equivalent of stri. See pw. s. v.

In these words the accent is shifted to a vowel ending in weak cases.

<sup>3</sup> The V. pl. su-hastias (IX. 464), presupposes a stem su-hasti, but as the form is a m., the reading ought perhaps to be emended to suhastiās with BR.

<sup>4</sup> hastini- (1x. 317) means 'having a hand'. the RV., dhiyam only once.

<sup>5</sup> GRASSMANN regards this as a f. of an adjective samudiá-.

<sup>9</sup> Cp. LANMAN 3722.

<sup>10</sup> The form dhīnām occurs 7 times in he RV., dhiyām only once.

The forms actually occurring are the following:

Sing. N. A. I. m. vís. — f. dhís, bhís, śrís. — 2. m. itthádhīs, kṣatraśris, ghṛta-śris, darśata-śris, dūrá-ādhīs, márya-śrīs, viśváto-dhīs, sv-ādhis. f. abhi-śris. — 3. m. agre-nis (VS. VI. 2), grāma-nis, takva-vis, deva-vis and devā-vis, patsu-taš-šis, pada-nis (AV.), pada-vis, pari-vis (VS. VI. 6), parņa-vis, pra-kris (AV.), pra-nenis, madhyama-sis, manyu-mis, yajña-nis, yajña-pris (VS. XXVII. 31), vaša-nīs, sadyaḥ-krīs, senā-nīs, skambha-nīs (VS. 1. 19), syona-šīs. f. pra-krís (AV.), vrata-nís. — B. m. á-rathīs, prāvís, su prāvís, rathís² sahásra-starīs, híranya-vāsīs. — f. á-dur-mangalīs, aruņīs, kalyāņīs, kṛṣṇīs, ksonis 3, gandharvis, gauris, jātris 4 (AV.), tandris (AV.), dūtis, naptis, nādis, mahiṣis (TS. I. 2. 122), yamis, yātudhānis (AV.), rathis, lakṣmis, lalāmis, viśva-rūpis (TS.1.5.62), vṛkis, śakaţis, śabalis (TS.1v. 3.115), sasarparis, simhis (TS. I. 2. I2<sup>2</sup>), su-mangalis<sup>6</sup>, staris<sup>7</sup>.

Acc. A. I. f. dhiyam, bhiyam, śriyam. — 2. m. dur-ādhiam, sv-ādhiam, adhvara-śriyam, ksatra-śriyam, ghrta-śriyam, jana-śriyam, yajňa-śriyam, suśriyam, hari-śriyam8. – f. abhi-śriyam. – 3. m. gāthā-niam, grāma-ņiam (VS. XXX. 20), yajňa-níam; devā-víam, pratī-víam; abhi-priyam, ghrta-priyam (AV.), brahma-priyam. — f. devā-viam<sup>9</sup>. — B. m. rathiam, su-prāviam. f. atharviam, arāyiam, kumāriam (AV.), kūdiam (AV.), gauriam, nadiam, naptiam, nāndiam, prapharviam, yamiam, laksmiam (AV.), lalāmiam (AV.), vibāliam, viliptiam (AV.), vilīdhiam (AV.), viśva-rūpiam, vrkiam, siņhiam, sūrmiam, stariam 10, sphigiam, svariam.

 A. I. f. dhiyā, bhiyā, śriyā. — 2. m. dū-dhiā. — f. avadya-bhiyā<sup>11</sup>  $\bar{a}$ -dhi $\dot{a}$ <sup>12</sup> (AV.). — B. m. rathi $\bar{a}$ . — f. tila-piñji $\dot{a}$ <sup>12</sup> (AV.), pal $\bar{a}$ li $\dot{a}$ <sup>12</sup> (AV.), mandūkiā, vešiā, sahasra-parniā<sup>12</sup> (AV.), sūrmiā, sphigiā. — The form tapant may be a contraction for tapaniā13.

D. A. I. f. dhiy!, śriyé. — 2. m. itthå-dhiye, dur-ādhie, dū-dhie. f. ā-dhie. — 3. m. gaṇa-śriye (VS. XXII. 30), yajña-priye; jihma-śie, senā-nie (VS. XVI. 17). — B. m. rathie, su-prāvie<sup>14</sup>. — f. nāndie, meṣie, vṛkie.

G. 15 A. I. f. dhiyás. — 2. m. dū-dhias, su-dhias. — n. sv-ādhias 16. — 3. m. gaņa-śriyas; gāthā-nias, manyu-mias 17. — B. m. ahias, su-prāvias. f. atharías, ápias 18, nadías, nisti-grías, préanias, mesias, srnías.

L. f. gaurt (IX. 123) and sarast (VII. 1032) may be locatives containing the normal ending -i.

I There is also the transition form aris (VS. vi. 36).

2 On rathiva occurring once or twice for rathir iva, cp. LANMAN 375 (bottom).

3 The N. sing. once (1.1805) appears without the -s as kṣon $\bar{z}$ . This word has other forms also according to the derivative  $\bar{\imath}$ - declension; cp. Lanman 372 (bottom).

4 The reading of the Mss. in AV. xx. 482 is jātrīs; the edition has jánis.

5 This is a transition from the derivative ī- declension for the máhiṣī of the RV.

6 The AV. has su-mangali three times; cp. Lanman 377 (top).

7 There are also the transition forms árātīs (VI. 45), śakvarís (TS. IV. 4. 41), devis (AV. VI. 592); vartants (1. 1409) is a purely metrical

lengthening; cp. LANMAN 3772. 8 This form is also once (Val. II. 10) used tracted for arunias. in agreement with a neuter substantive (gotrám).

9 In agreement with tvácam (1x. 745).

This form is once (VII. 688) pronounced staryam, being one of the two only examples in the RV. of the z in this declension being pronounced as y before a vowel.

11 Accented as if -bhiyā were used independently; the form occurs in a late hymn (x. 1073).

12 Irregular accentuation of the ending.

13 Otherwise it may be an I. of the derivative z-declension.

<sup>14</sup> Cp. LANMAN 382<sup>3</sup>.

15 There is no example of an ablative. 16 This seems to be the only actual n. form of this declension in the RV.

17 The form ahi-ghnyás (AV.) is a transition form with shift of accent from the derivative z-declension.

18 The form arunis (1. 1213) may be con-

V. B. m. daksi . — f. arāyi, mahe-nadi , yami, laksmi (AV.).

Du. N. A. A. 2. f. abhi-śriyā, ghṛta-śriyī. — 3. m. mana-nɨä, sadha-niä; senānī-grāmanyàu (VS. xv. 15). — f. abhi-śriyau (AV.). — B. m. rathiā. f. cakríyā, nadiā, naptiā, yamiā, sakthiā, srniā; cakríyau (SV.), nūdyàu (AV.). sakthiau (AV.)3.

I. B. f. ksonībhyām. — G. A. 3. m. yajňa-níos. — B. f. onios 4, cakrios. —

L. B. f. onios, naptios.

Pl. N. V. A. I. f. dhiyas, śriyas<sup>5</sup>. — 2. m. dīrghādhiyas, durādhias, dūdhias, nānā-dhiyas, su-dhiyas, sv-ādhias; agni-śriyas, adhvara-śriyas, suśriyas. — f. ādhias, vyādhias6 (AV.). — 3. m. grāma-nias (AV.), devā-vias, pada-vias, sadha-nias; abhi-priyas, kadha-priyas, gana-śriyas, pari-priyas. f. abhi-śriyas, ā-priyas (AV.), pra-nias, váta-pramiyas. — B. m. ahias. āpathias, rāthlas, su-hastias1. — f. apasias (VS. x. 7), arāyias (AV.), aruņias, enlas, kalyāņias, kavasias (VS. XX. 40, 60), gaurias, tīksņa-šriigias, nadias, nādias (AV.), mayūrias, yātu-dhānias (AV.), rathias, laksmias (AV.), vaksias, vi-kešias (AV.), vyasta-keślas (AV.), samudriyas, sahasra-parnias (AV.), starias. — With  $\bar{I}$  pronounced as y: once nadya, (vit. 504) and 6 forms in the AV., aśwataryàs, nadyàs, naptyàs, nādyàs, pippalyàs, wyksa-sarpy is.

Acc. A. I. f. dhiyas, bhiyas (AV.), bhiyas (TS. IV. I.  $7^3 = VS. xxvII. 7$ ). s'riyas. -- 2. m. durādhīas, dūdhias, su-sriyas. -- f. ādhias (AV.). -- 3. m. sadha-nias.—B.m. ahlas, dusprāvias, rathias.— f. arāvias (AV.), usta-karnias, kilāsias, khārias, dehias, nadias, naptias, mesias, yamias, yatu-dhānias, samudriyas, sambādha-tandrias (AV.) 'affliction and exhaustion', starias9.

I. A. I. f. dhībhis, śrībhis 10. — 2. m. sv-ādhibhis. — 3. m. gana-śribhis 11. — B. m. híranya-vāsībhis. — f. kalyānībhis, ksonībhis, nadibhis, naptībhis.

D. 12 A. 3. m. rta-nibhyas 11, śwa-nibhyas 11 (VS. XVI. 27), senā-nibhyas 11 (VS. XVI. 26). — B. f. aparibhyas, nadibhyas (VS. XXX. 8).

G. A. I. f. dhīnām and dhiyām, śrinām. — 3. f. hiranya-vinām. — B. m. ahinām, nadinām 'invokers', rathinām'i. — f. aruninām, kriminām (AV.), nadinām, purusiņām, svarinām.

L. A. I. f. dhīṣú. — B. f. aparişu, arunisu, nadisu<sup>14</sup>.

# 3. b. Stems in derivative -ī.

Lanman, Noun-Inflection 365-400. - Whitney, Sanskrit Grammar 362-366.

377. I. This declension embraces a very considerable number of stems which are formed by means of the suffix -7 (originally -ya) and, except seven masculines, are restricted to the f. gender. It largely supplies the f. form of words requiring inflexion in more than one gender. Feminine stems are thus made from nouns in -a, e. g. devi- (m. devá-); from adjectives in -u; e. g. pṛtha-i- (m. pṛthi-); from present participles in -ant; e. g. mid ant-i-

2 Treated as a compound in the Pada | xvii. 56) worshipping the gods'. (VIII. 7415) though make is V.

5 Also the transition form striyas.

tive  $\bar{i}$ -declension deva-siris (TS. IV. 6.  $3^2 = VS$ .

9 Also the transition form stripas; on

10 Also the transition form strībhis (accented as a monosyllabic stem).

II Metrical shortening; see LANMAN 3723.

12 There is no example of an Ab. m. or f.

13 The accent of the G. atasinam 'beggars' would seem to require a stem atasi- and

14 There is also the transition form strīşů

<sup>1</sup> Pada dhaksi; cp. RPr. IV. 41.

<sup>3</sup> The AV. shows no example of -iā. It yahvias and suparnias see 375 a α. has three transition forms andiau, phálgunyau, akşyàu.

<sup>4</sup> Cp. APr. 111. 61.

<sup>6</sup> This would be zyā-dhiyas in the RV. where in compounds ending in -dhī- the ī if unaccented is split.

<sup>7</sup> See above, 375 B.a α, note 3.

<sup>8</sup> Also the transition form to the deriva- accented as a monosyllable.

(m. mádant-), -ánt, e. g. adat-t- (m. adánt-), or -at, e. g. piprat-ī- (m. piprat-); from perfect participles in -vāṃs, e. g. jagmis-ī- (m. jaganvāṃs-); from comparatives in -yāṃs, e. g. návīyas-ī- (m. návīyāṃs-); from words in -tar (-tr), e. g. avitr-t- (m. avitár-); from adjectives in -mant, e. g. dhenu-mát-ī- (m. dhenu-mánt-), and -vant, e. g. áma-vat-ī- (m. áma-vant-); from nouns in -an, e. g. sam-rájñ-ī- (m. rájan-), -van, e. g. rtá-var-ī- (m. rtá-van-); from adjectives i in -in, e. g. arkiṇ-ī- (m. arkin-); from compounds ending in -añc, e. g. arvāc-ī- (m. arvānc-), in -drs', e. g. su-dr's-ī-, in -pad, e. g. α-pád-ī-, and in -han, e. g. ά-pati-ghn-ī-.

2. There is besides a large group of miscellaneous f. stems of an independent character, having no corresponding m.², e. g. śác-ī- 'might'.

3. The seven m. stems<sup>3</sup>, of which five are proper names, are: Tiraścź-, Námī-, Pṛṭhī-, Mātalī-, Sūbharī-; rāṣṭrī- 'ruler', sirź- 'weaver'.

a. The stems of this declension (in contrast with those of the B group of the radical 7- declension) do not normally accent the suffix. The exceptions to this rule are of a definite character.

2. Again, the miscellaneous group of feminines hardly ever accents the final -\bar{\text{o}} of the stem except when it is a proper name, a shift of accent having here probably taken place to indicate a change of meaning; thus aranyānī- Forest goddess', arundhatī-\bar{\text{o}} (AV.) N. of a plant and a star, indrānī- Indra's wife', rodasī- N. of the Aśvins' wife, vadhrinatī- N. of a mythical female, varunānī- 'Varuna's wife', savasī- N. of Indra's mother, sinīvālī- N. of a goddess; and the river names añjasī-, asiknī- 8 (but ásiknī- 'black' and

'night'), go-mat-i- (but gó-mat-i- 'rich in cows'), sutudri-.

#### Inflexion.

378. The inflexion of the derivative  $\bar{r}$ - stems stands in marked contrast with that of the radical  $\bar{r}$ - stems in three respects: (r) no -s is added in the N. sing. masculine or feminine; (2) the endings diverge considerably from the normal ones, the Sing. A. taking -m, the D. -ai, the Ab. G. - $\bar{a}s$ , the L. - $\bar{a}m$ , the du. N. A. - $\bar{i}$ , the pl. N. A. -s; (3) stems accented on the final vowel shift the acute to the ending in the weak cases of the sing., in the G. L. du., and the G. pl.

<sup>2</sup> A list of these is given by GRASSMANN,

Wörterbuch 1722-23.

4 Beside pāpā. The great majority of Indo-arische Philologie. I. 4.

\* Adjectives ending in -a do not form adjectives and all participles ending in -a eir f. in  $-\bar{a}$  unless they are accented on the form their f. with  $-\bar{a}$ .

6 Similarly varūtý- 'protector', f. várūtr-ī-.
7 Originally a present participle \*á-rundhat-ī'not hindering'.

8 ásiknī- also occurs once as the N. of the river.

T Adjectives ending in -a do not form their f. in -ī unless they are accented on the final syllable, when the accent almost always shifts to the first syllable; e. g. áruṣī-from aruṣā-; but pāpā- has pāpī- beside pāpā-.

<sup>3</sup> Cp. Zubatý, zu den altindischen männlichen z-stämmen, Sitzungsberichte d. Böhm. Ges. d. Wiss. 1897, XIX (treats also of the radical z-stems used in the masc.).

<sup>5</sup> This is the converse of the accentuation in the B group of the radical  $-\bar{i}$  declension, where the m. in unaccented -a throws the acute on the final  $-\bar{i}$  of the f.

The forms actually occurring, if made from devi- 'goddess', would be as follows:

Sing. N. deví. A. devím. I. devyá. D. devyái. Ab. devyás. G. devyás. L. devvám. V. dévi.

Du. N. A. deví, V. dévī. D. Ab. devíbhyām. G. L. devyós.

P1. N. devis. A. devis. I. devibhis. D. devibhyas. Ab. devibhyas. G. devīnām. L. devisu. V. devīs.

Forms actually occurring are the following:

Sing. N. The m. forms are: námī, pṛthī, mātalī, rāṣṭrī, sábharī. The f. forms are very common, being made from nearly 300 stems in the RV. Among the most frequent are: prthiví 'earth' (57), deví (48), sárasvatī (43) N. of a goddess, mahí 'great' (35), ucchántī 'shining' (16), yatí 'going' (14), jánitrī 'mother' (10), bṛhatí 'great' (10), ghṛtácī 'filled with ghee' (9), maghont 'bountiful' (9), strit 'woman' (3)2.

A. m. námīm. — The f. is formed from over 100 stems in the RV. Among the commonest forms are: pṛthivim (62), mahim 3 (35), devim (18),

távisīm (13), urvím (9) 'wide', pipyúṣīm4 (9) 'swelling'5.

I. This case is formed with the normal ending  $-\bar{a}$ . The only m. form is nimyā. But there are about 40 f. forms in the RV. In more than two-thirds of these the suffix is pronounced as a vowel<sup>6</sup>  $-i\vec{a}$  (in oxytones  $-i\vec{a}$ ), in the rest as a semivowel  $-y\bar{a}$  (in oxytones  $-y\dot{a}$ ). The stem  $\dot{s}\dot{a}m\bar{\iota}$  'labour' has, beside sámyā, the contracted form sámī, which also appears in the compound su-sámī 'with great care'. At the end of a Pada and before vowels7 this I. súmī is shortened to śámi. The forms occurring are: 1. ánvyā 'subtile', aśvābhidhānyā (AV.) 'halter', áśvāvatyā 'furnished with horses', ásiknyā (AV.), kundrnácyā 'house lizard', kumbhyá (TS.111.2.84) 'jar', gātū-mátyā 'spacious', gāyatryá (TS. II. 2.48) a metre, ghrtácyā, citántyā 'observing', citáyantyā 'appearing', jágatyā (TS. II. 21. 48), a metre, tmányā 'by oneself', dávidyutatyā 'glittering', devácyā 'directed towards the gods', dáivyā (AV.) 'divine', návyasyā 'new', pátnyā 'wife', mádhu-matyā 'accompanied by sweetness', róhinyā, vásīyā 'good', vájavatyā 'rich in treasure', vάsyā (AV.) 'knife', viśvά-bheṣajyā (AV.) 'all-healing', viśvάcyā 'universal', viśvyā 'everywhere' (adv.), śácyā 'might', śámyā, śarmayántyā 'protecting', s'imyā 'work', satrācyā 'attentive', samīcyā (Kh. 111. 105) a goddess, sárasvatyā (AV.), sóma-vatyā 'accompanied with Soma', stíbhantyā 'praising', hárinyā 'yellow', hiranyáyā 10 'golden'. — Oxytones with shift of accent: annādyā (AV.) 'proper food', asiknyā, devyā, purānyā 'ancient', prthivyā, mahyá, samānyá 'similar', sādhāranyá "common', sūcyá 'needle', sautrāmanyá (AV.) a kind of Indra sacrifice. The TS. and VS. also have  $urvy\acute{a}$  as an adverb 'afar', which in the RV. appears only in the modified form urviyā.

D. The ending looks like -ai, e. g. devy-ái; but it is doubtless in origin the normal ending -e fused with the suffix  $-y\bar{a}$ , i. e.  $-yai = -y\bar{a}-e^{-z}$ . Only 13 forms (all f.) occur in the RV. These are, besides a few others from the later

1. 1805 kṣont has perhaps dropped its -s owing to the following s.

3 Perhaps to be read uncontracted as mahiam in X. 505; vānīm (II. II8) is also to be read as vāniam.

4 Perfect participle of pī- 'swell'.

5 There is also the transition form nadim (AV.).

8 The compound su-sámi also occurs once in the TS. VS. as well as the RV.

9 Probably an error for ásiknyās; see WHITNEY on AV. v. 138.

10 For hiranyáyyā.

II Cp. LANMAN 368 (top).

12 An indication of this origin is perhaps to be found in the fact that of the 13 stems 6 The vocalic pronunciation seems to be the in the RV. taking this dative only one, commoner in the AV. also; cp. LANMAN 381. -patnyai, has the vocalic pronunciation -iai

<sup>&</sup>lt;sup>1</sup> Cp. WIEDEMANN, BB. 27, 211, footnote. <sup>2</sup> In the AV. there are also the transition forms á-durmangalī, su-mangalī, nadī. In RV.

<sup>7</sup> This also occurs in the compound  $urvi-\bar{u}tih$  (VI. 242), if uvi- = the adv. instr. urvyā.

Samhitās: 1. arvācyai (VS. XXII. 24) 'hitherward', ávācyai (VS. XXII. 24) 'downward', ú-vyatvai 'not desiring', ívatvai 'so great', údīcvai (VS. XXII. 24) 'northern', jágatvai (VS. XXIV. 12), jāryái (TS. III. 2. 22) 'mistress', júryantyai 'aging', jyáyasyai 'elder', dhenumátyai 'vielding milk', pariánya-patnyai' 'having Parianya for a husband', paśumátyai 'consisting of cattle', praticyai (VS. XXII. 24) 'western', prácyai (VS. XXII. 24) 'eastern', yaśo-bhaginyai (VS.II. 20) 'rich in glory', rātryai (VS.XXIV. 25) 'night', vájavatyai, viś-pátnyai, sahá-patnyai (AV.) 'united with the husband'. — 2. Oxytones: indrānyái (VS. XXXVIII. 3), urvyái (VS. XXII. 27), kalyānyái² (AV.) 'good', gāyatryái (VS.XIII. 54), deryái, prthizyái, brhatyái, mahyái, rājāsandyái (VS. XIX. 16) 'Soma stand', sinīvālvái, strivái3 (AV.), hiranva-keśvái4 (AV.) 'gold-haired'.

The ending looks like -ās, e. g. prthivy-ás; but it is doubtless the normal ending -as fused with the suffix  $-y\bar{a}$ , i. e.  $-y\bar{a}s = -y\bar{a}-as^5$ . Only five forms occur in the RV., besides a few others in the later Samhitas: avadyávatyās (AV.) 'disgraceful', urvásyās N. of a nymph, jágatyās (VS. XIII. 56), jivantyās biving, dur-admanyás (VS. II. 20) bad food, pátantyās 'flying', prthizyás, brhatyás (AV.), mahvás6.

G. The ending is the same as in the Ab. and of similar origin. m. tiraścyás<sup>7</sup>, pfthyās, sóbharyās. — f. The forms occurring in the RV.8 are: 1. amśu-mátvāsº N. of a river, amhu-bhédvās (VS.XXIII.28) 'having a narrow slit'. uśīnárānyās N. of a people, ūrjáyantyās 'vigorous', ósadhyās (VS.I. 25) 'plant', távisyās, dānumatyās 'rich in drops', māms-pácanyās 'flesh-cooking', rātryās, vivásvatyās 'shining', sámyās, sóśucatyās 'shining', súsyantyās 'about to bear'. — 2. urvyás 'earth', devyás, prthivyás, mahatyás 'great', yatyás, yātyás 'going', vadhrimatyás N. of a woman, strivás 10.

**L.** This case seems to be formed with the ending  $-\bar{a}m$ , e. g. devy- $\hat{a}m$ ; but it may be due to the fusion of a particle \*-am is with the suffix - $y\bar{a}$ . It is formed from 15 stems in the RV., where the pronunciation -iam is considerably less than half as common 12 as -yīm. Forms occurring are: 1. ásiknyām, ucchántyām, údīcyām (TS. 11. 4. 141), jágatyām (VS. XXXVIII. 18), jahnávyām 'race of Jahnu', drsádvatyām N. of a river, náryām (Kh. IV. 133) 'woman', párusnyām N. of a river, prácyām (TS. 11. 4. 141), yazyávatyām 'rich in streams', rātryām, varanāvatyām (AV.) N. of a river, vasāvyām 'treasury', śácyām, sárasvatyām N. of a river, soma-kráyanyīm (VS. VIII. 54) 'serving as the price of Soma'. — 2. aranyānyām, āstryām 'fire-place', āsandyām (AV.) 'stool', gavīnyām (Kh. IV. I 33) 'groin', gāyatryām (VS. AV.), catvāriņsyām 'fortieth', jyeşthaghnyám (AV.) N. of an asterism, devyám, narācyám (AV.) N. of a river, prthivyām, striyām (AV.) 13.

sonants).

I To be pronounced -iai.

2 This is an emendation for the reading kalyānyài of the edition; cp. Lanman 3832.

3 With split  $\bar{i}$  as in the radical  $\bar{i}$ - stems. 4 There are also the transition forms bhiyái, śriyái (VS. XIX. 94), hriyái (VS. XIV. 35) from the radical i-declension, and from the i- declension devá-hūtyai, turyái, nirrtyai, pustyái, bhujyái, bhrtyái, śrútyai.

5 -yas is read -ias 4 times out of 25 in the RV.: pṛthiviās 3 times and jīvantiās once, always for metrical reasons, cp. Lanman 384

6 There are also the transition forms from the i-declension, nābhyās, bhūmyās, hetyās; and from the AV. ú-bhūtyās, á-rātyās, á-sastyās,

(and here the i is preceded by two con- | āhūtyās, kṛṣyās, deva-hetyās, rātryās. šīrṣaktyās; probably also yinyās (VI. 1214), Pada yönyā. 7 Pronounced tiraścias. But cp. ROTH, ZDMG. 48, 115 (bottom).

8 This case is formed from more stems in the AV. than in the RV.; cp. LANMAN 355. 9 In about 15 per cent of the following genitives the ending is pronounced -iās.

There are also half a dozen transition forms from the i- declension in the RV .: anumátyās, árātyās, nirrtyās, prsnyās, bhūmyās (once with crasis in bhamyopari x. 753), yuvatyās; there are many others in the AV.; as jāmyās (also Kh. v. 519); see Lanman 3852.

11 Cp. Brugmann, Grundriss 2, 265 (p. 619). 12 It is much less common than this is in the AV.

13 There are also two transition forms

- V. This case is formed, by shortening the final, from 38 stems (all f.) in the RV. Examples are: devi (23), sarasvati (16), prthivi (11), maghoni (9), vibhāvari 'radiant' (8), mahi (6). From the TS.: ámbāli (VII.4.191) 'mother', kāmpīlarasini (VII. 4. 191; VS.) 'living in Kāmpīla', darvi (1.8.41) 'ladle', patni (IV. 4. 124), mándūki (IV. 6. 12; VS.) 'frog', deva-yajani (VS.) 'whereon gods are adored'.
- Du. N. A. V. This form in the RV. ends in -ī exclusively, being made probably with the ending -i (like the f. du. of the derivative -ā stems), which coalesces with the -ī of the stem . There is only one m. form, the V. mādhvī 'fond of sweetness', an epithet of the Asvins. The f. is very frequent, being made from 76 stems in the RV. and from over 20 in the VS. The commonest forms in the RV. are: ridasī (87) 'the two worlds', dyāvā-pṛthivī (65) 'heaven and earth', mahi (27), urvi (20), prthivi (20), devi (13), samīci (11) 'united', brhatí (10), yahví (6) 'active', aksí (6) 'eyes', prthví (5). From the TS.: N. chándasvatī 'desiring' and súrya-patnī (IV. 3. I I I) 'having the sun as husband', V. úrvī, rodasī, patnī (IV. 7. 156).
- a. The -i is twice metrically shortened in prthivi (II. 315; III. 544) and in mahi (1v. 56<sup>9</sup>; x. 93<sup>1</sup>).

  b. In the AV. three stems of this declension form transition duals 2 according to the radical F-declension: aksyàu, āndyàu, phálgunyau<sup>3</sup>; in other texts: gavīnyàu (TS. III. 3. 101) 'the groins', pátnyau (VS. XXXI. 22), rébhatyau and su-párnyau (Kh. 1. 37).
- I. akṣībhyām (AV.), kumbhībhyām (VS. XIX.27), jóṣṭrībhyām (VS. XXI.51) 'cherishing', mādhūcībhyām (VS.) 'sweetness-loving', mādhvībhyām (VS.).
  - D. ródasībhyām. Ab. akṣibhyām, dyāvāpṛthivibhyām (VS. XXXVII. 18).
- G. aksyús (AV.; TS. III. 2.55), artniyos (TS. IV. 5. 23) 'ends of the bow', ártnyos (VS. xvi. 9), divas-prthivyós, ninyós 'secret', pari-nítantyos (AV.) 'dancing round', ródasyos?. – L. aksyós (AV.), arányos, árjunyos, dyávāpṛthivyós (VS. XX.10), pútantyos, ródasyos, samīcyós.
- Pl. N. V. The ending seems to be simply -s, but it is doubtless the normal ending -as, which originally coalesced with the suffix  $-y\bar{a}$  to  $-y\bar{a}s$ , the latter then contracting to -Ts. In the m. the only example is siris. But the f. is very frequent, being formed from 166 stems in the RV., and occurring in the independent parts of the TS. at least 25 and of the VS. at least 40 times. The commonest forms are: devis (43), pūrvis (36) 'many', oṣadhīs (27), váṇīs (12) 'songs', pátnīs (11), mahís (11), bhūtis (8) 'shining', ya/vis (7), devayantīs (6) 'serving the gods', vásvīs8 (6). In the Khilas occur the 7 forms a-lakşmis (11.66), ānis (11.85), devis (111.102), pāvamānis (111.101) N. of certain hymns, bahvīs (II. 84 etc.) 'many', svastyáyanīs (III. 101), hiraņyáyīs (V. 1511).
- a. Transitions from this to the radical i- declension are almost unknown to the RV.: striyas is the only certain example, and pršanyas and suparnyas are probably such; the tendency to use such transition forms is only incipient even in the AV.9, where urvyàs 10 (once) and rudatyàs (once) occur 11. In the Khilas also, occur the three forms ghrtacyas

from the radical i- declension: śriyam (AV.) and dūtyām; five from the i- declension: puramdhyam, bhūmyam, bhrtyam, yuvatyām, sámgatyām; besides at least 10 additional ones from the AV.: ávyām, ākūtyām, cittyām, devá-hūtyām, nābhyām (+ VS. XXIV. 1), pṛṣṭyām, bhūtyām, yónyām (+VS.), védyām, sámityam.

- <sup>1</sup> Cp. Brugmann, Grundriss 2, 287 (p. 644). 2 There are also the transition forms from the radical i- declension kṣoṇi and once nadi.
- 3 This form in -yau becomes universal in
- the post-Vedic language.
  4 The Mss. in AV. v. 410 read aksós; see WHITNEY's note.

5 With the first member of the Dvandva inflected in the sing. G.

6 Either the G. of nini- (m. ninyá-) or shortened for ninyáyos.

7 Once (VI. 243) used in the sense of an

8 éka-patnīs (AV. x. 839) 'having one husband' is N. pl. f., not N. sing. m.

9 There seem to be no such transitions in the TS.; but there are at least 3 to the ideclension: oṣadhayas (IV. 1.44), revatayas (IV. 2. 111), pátnayas (V. 2. 112).

10 Beside urvis which occurs 9 times.

II And yet this form is the only one in the post-Vedic language.

(II. 8<sup>4</sup>), bahīyās (III. 11<sup>2</sup>), pāramānyās (III. 10<sup>3</sup>). The VS. has about 10 such forms: devyās (XXXVII. 4) beside devīs, pātnyas (XXIII. 36) beside pātnīs (VI. 34), phālavatyas (XXII. 22), bahīyās (XIX. 44) beside bāhīs, mahānāmnyas (XXIII. 35), maitrāvarunyās (XXIV. 2), maitryās (XXIV. 8), ratsalaryās (XXIV. 5), V. vamryas (XXXVII. 4), vaišvadevyās (XXIV. 5), sārasvatyās (XXIV. 4).

b. There are no transitions from the radical \$\vec{i}\$ declension to this one in the RV., and in the AV. only nadis (beside nadyàs) and laksmis (beside laksmyàs). But the transitions from the i- declension are numerous: angulis (AV.), axánis, ājánis, nitis, rshis (AV.), dhamānīs (AV.), náktīs, nāhhīs (AV.), nírytīs, niskrtīs, pārsnīs (AV.), purandhīs, prshis (AV.), bhūmīs, visca-krystīs, srejūš, sayonis.

A. This case is identical in form with the N., and its origin is doubtless similar. It is very frequent, being made from more than 100 stems in the RV. The commonest forms are: pūrvis (40), isadhīs (24), mahis (18), brhatis (12), dāsīs (9) 'demonesses', pátnīs (7), pṛṣatīs (7)' 'dappled mares'.

I. This case is fairly frequent, being made from 32 stems in the RV. The commonest forms are: śácībhis (36), táviṣībhis (13), śámībhis (8), śṣadhībhis (6), pṛṣatībhis<sup>3</sup> (5). The TS. has also śimībhis (v.2.12<sup>1</sup>), sūcībhis (v.2.11<sup>1.2</sup>); the VS. arunibhis (XII.74), jágatībhis (1.21), sthālibhis (XIX.27) 'cooking-pots'.

D. This case is rate, being formed from only three stems in the RV. and a few others in the later Samhitās: āvyādhínībhyas (VS.xvi.24) 'assailing bands', oṣadhībhyas, keślnībhyas (AV.) 'hairy', gandharvá-patnībhyas (VS. AV.) 'having Gandharvas for spouses', ghoṣlnībhyas (AV.) 'noisy', táviṣībhyas 'tṣṭhantībhyas (VS. xxii. 25) 'standing', trṇhatībhyas (VS. xvi. 24) 'piercing', mānusībhyas (TS. iv. i. 43; VS. xi. 45) 'human', vṛṣaṇyántībhyas 'desiring a male', śaśvatībhyas (AV.) 'everlasting', srávantībhyas (VS. xxii. 25) 'flowing', hrādlinībhyas (VS. xxii. 26) 'hail'.

Ab. Only three forms of this case occur in the RV.: Isadhībhyas, padvātībhyas 'possessed of feet', brhatībhyas.

G. This case, which as is usual in the vowel declension takes the ending -nām, is found in only one m. form, sibharīṇām; but it is fairly common in the f., being formed from 34 stems in the RV. The oxytones which number only six6, throw the accent (as in the i-declension) on the ending: bahvīnām, bhañjatīnām'breaking', bhātīnām, bhuñjatīnām'gladdening', mahīnām', yatīnām. This rule does not, however, hold in the SV. and VS., which have mahīnām (VS. 1. 70; 1v. 3); nor in the AV. where the forms nārāśaṃsinām 'eulogies' and rāthajiteyinām 'chariot-conquering' occur. Of the remaining 28 genitives in the RV. 8 the commonest are: śáśvatīnām (10), śṣadhīnām' (9), mānuṣīṇām (8), śácīnām (4), īyúṣīṇām' (3) 'having departed'. From the VS.: āvyādhlnīnām (XVI. 21).

L. This case is fairly common, being formed from 30 stems (all f.) in the RV. The most frequent forms are: oṣadhīṣu (20), mānuṣīṣu (8), nāhuṣīṣu 'neighbouring', jāgatīṣu (2) 'females', tāviṣīṣu (2), yahvīṣu (2), rōhinīṣu '1 (2). The rest occur only once each '2. From Khila III. 15<sup>17</sup>: shādha-dantīṣu 'white-toothed'.

<sup>2</sup> Also the transitions from the radical *ī*-declension aruņīs and yātudhānīs (AV.).

3 The stems forming this case in the RV. are enumerated by LANMAN 396.

4 nārī- 'woman', by shortening its final vowel, forms its D. according to the i-declension: nāribhyas.

5 Irregularly accented on the final of the stem, otherwise, śáśvati.

6 Or 7 including stri-: strīnām.

Perfect participle of i- 'go'.

<sup>&</sup>lt;sup>1</sup> This form should perhaps be read as srėnayas in V. 597.

<sup>7</sup> On the exceptions mahinām (x. 1341), yatīnām (1. 1586), devayatīnām (1. 361), see LANMAN 398 (bottom).

<sup>&</sup>lt;sup>8</sup> The G. návyasīnām is once used in agreement with the m. marútām.

<sup>9</sup> kaninām, with contracted -yā-, is the only G. pl. of kanyā- in the RV., kanyānām occurs once in the AV.; see Lanman 399 (top).

II There is also the transfer form from the *i*-declension svāhākytīṣu, in which the long vowel is perhaps metrical. On the other hand strīṣu (accent) is a transfer to the radical ī-declension.

<sup>12</sup> LANMAN enumerates the stems, 399 bottom).

# 4. a. Radical stems in -/.

379. No nominal *i*-stems are derived from roots originally ending in -i, as these (some six or seven) have all joined the consonant declension by adding a determinative -t. There are, however, about a dozen stems in which i is probably radical in a secondary sense, as representing a reduced form of roots ending in  $-\bar{a}^2$ . These are with one or two exceptions m. compounds formed with  $-dhi = dh\bar{a}$ - 'put': api-dhi- 'covering',  $\bar{a}$ -dhi- 'pledge', utsa-dhi- 'receptacle of a spring', uda-dhi- 'receptacle of water', upa-dhi- 'part of the wheel between nave and felly', garbha-dhi- 'nest', ni-dhi- 'treasury', pari-dhi- 'fence', prati-dhi- 'cross-piece of car-pole', pra-dhi- 'felly', 'cva-dhi- 'treasure', sa-dhi- 'abode'; perhaps also 'sa-dhi- f. as a shortened form of 'sa-dhi- 'plant'. Besides these there is prati-sthi- f. 'resistance', from  $sth\bar{a}$ - 'stand', and probably the reduplicated stem y.y.y.- 'speeding', in which the -i is secondarily reduced through the older form yay- from the  $-\bar{a}$  of the root  $y\bar{a}$ - 'go'. These few stems have nothing distinctive in their inflexion, which follows that of the derivative i-stems in every particular.

The forms which occur from these words are the following:

Sing. N. ā-dhi-s, óṣa-dhi-s, nidhi-s, pari-dhi-s, prati-ṣḥhi-s, yayi-s, sá-dhi-s.—
A. utsa-dhi-m, uda-dhi-m, óṣa-dhi-m, garbha-dhi-m, ni-dhi-m, pari-dhi-m, pra-dhi-m, seva-dhi-m.— I. yayinā.— Ab. uda-dhis.— Du. N. upa-dhi, pra-dhi.— Pl. N. óṣa-dhayas, ni-dhayas, pari-dhayas, prati-dhayas, prati-dhayas, prati-dhayas.— A. api dhin, uda-dhin, ni-dhin, pari-dhin, pra-dhin.— I. ni-dhibhis.— G. ni-dhīnām.— L. ni-dhisu.

# 4. b. Derivative stems in -i.

LANMAN, Noun Inflection 365-400. — WHITNEY, Grammar 335-340, 343. — Cp. REICHELT, Die abgeleiteten /- und u-stämme, BB. 25, 238-252.

380. This declension embraces a large number of m. and f. stems. There are comparatively few neuter stems; and, except the N. A. sing. and pl., neuter forms are rare, not occurring at all in several cases. The regular inflexion is practically the same in all genders, except that the N. A. sing. and pl. n. differ from the m. and f., and the A. pl. m. and f. differ from each other. There are several peculiarities here as regards the formation of the stem, the endings, and accentuation. The final vowel of the stems shows Guna in three of the weak cases of the singular (D. Ab. G.) as well as in the V. sing. and the N. pl. m. f., while it is abnormally strengthened in the L. sing. The normal ending -as of the Ab. G. sing. is reduced to -s, while that of the L. sing. is lost. Oxytone stems, when the vowel is changed to y, throw the accent on a following vowel not as Svarita but as Udātta; and even on the -nām of the G. pl., though the stem vowel in that case does not lose its syllabic value.

a. The only word which distinguisher strong forms is såkhi- 'friend', which takes Vrddhi in its strong stem : . . ll.es: strong forms are frequent: Sing. N. såkhā 3, A. såkhāyan. Du. N. A. sákhāyā 4 and sákhāyan. Pl. N. sákhāyan. This word has two further irregularities, the simple stem sákhi- adding -v in the D. sákhy-v, and the abnormal ending -uv in the Ab. G. sákhy-uv. The other forms occurring are regular: Sing. I. sákhvā, V. sákhe. Pl. A. sákhī, I. sákhibhis, D. Ab. sákhibhyas, G. sákhīnām. Eight compounds in the RV. 5 are inflected in the same way (also sóma-sakhā, VS. 1v. 20); but of four others, which have joined the a- declension, there occur the forms A. drāvayál-sakha-m (X. 39¹0), N. yāvayat-sakhá-s (X. 26⁵), A. patay át(-sakha-m) and mandayát-sakha-m (I. 4⁻).

<sup>1</sup> See above, stems in derivative -t (307).

<sup>&</sup>lt;sup>2</sup> Cp. Lindner 56 and Lanman 453.

<sup>3</sup> See J. Schmidt, KZ. 29, 526, note 1.

<sup>4</sup> sákhāyā occurs 6 times (also VS. XXVIII. 7), sákhāyau only once.

<sup>5</sup> See Lanman 4003.

b. r. The stem páti-, when it means 'husband' and is uncompounded, shows irregular inflexion in the Sing. D. and G. (like sákhi-) and the L.: D. fátye, G. pátyuri, L. pátyau. When it means 'lord' 2 or is compounded, it is regular: D. pátaye, bý haspátaye. G. pátes, prajá-pates (TS.), L. gó-patau. — 2. The stem jáni- 'wife' also takes the abnormal ending -ur in the G. sing.: janyur. This stem has the further irregularity of forming its N. sing. jánī according to the derivative ī- declension. — 3. The stem ari- 'devout' is irregular in forming several cases like the radical i- stems (except in accentuation): Sing. A. aryám (beside arim), G. aryás<sup>3</sup>. Pl. N. A. m. f. aryás. The VS. has also the N. sing. aris beside the aris of the RV.

c. Twenty-seven stems in the RV. show forms according to the derivative i- declension in the D. Ab. G. L. sing. f.4, perhaps from a desire to add a distinctively f. ending in a declension which does not distinguish genders in these cases. There is a steady increase of such forms in the later Samhitās; thus while the RV. has only 7 datives in -ai

from i- stems, the VS. has about 40.

d. In the RV. 4 or 5 stems show the influence of the n-declension in the incipient use of the ending -nī in the N. A. n. du., and (ī)-ni in N. A. n. pl.; and in the I. sing., stems taking the ending -nā are already 5 times as numerous as those adding the normal  $-\tilde{a}$ .

#### Inflexion.

38r. The N. sing. m. f. always takes -s<sup>5</sup>, the A. simply -m. The D. Ab. G. V. gunate the suffix, to which the Ab. G. add only -s instead of -as. The L. sing, has an altogether abnormal form ending in -ā or -au. The N. pl. m. f. gunates the -i, to which the normal ending -as is added. The A. pl. in the m. adds -n, in the f. -s, before which the vowel is lengthened. The G. pl. always takes -nām, lengthening the preceding vowel. The frequent adjective silci- 'bright' may be used to illustrate the forms actually occurring in the three genders:

Sing. N. m. f. śúcis, n. śúci. A. m. f. śúcim, n. śúci. I. m. śúcyā, śúcinā, f. ślicyā, ślicī, ślici. D. m. f. n. ślicaye. Ab. m. f. ślices. G. m. f. n. ślices.

L. m. f. n. śúcā, śúcau. V. m. f. śúce.

Du. N. A. V. m. f. n. śúcī. I. m. f. n. śúcibhyām. D. m. śúcibhyām. Ab. m. f. ślicibhyām. G. m. f. ślicyos. L. m. f. n. ślicyos.

Pl. N. m. f. śúcayas. N. A. n. śúcī, śúci, śúcīni. A. m. śúcīn, f. śúcīs. I. m. f. ślicibhis. D. m. f. ślicibhyas. Ab. m. f. n. ślicibhyas. G. m. f. ślicīnām. L. m. f. n. śúcisu.

Forms actually occurring are the following:

Sing. N. m. This form is very frequent, being made from nearly 250 stems in the RV. The commonest examples are: agnis (389) 'fire', kavis (90) 'sage', háris (58) 'tawny', bṛhas-pátis (52) 'Lord of Prayer', śúcis (38) 'bright', rsis (32) 'seer', bráhmanas-pátis (23) 'Lord of Prayer', átithis (20) 'guest'o.

a. The stem vi- 'bird', besides the regular N. vi-s, which occurs 6 times, has the anomalously gunated form vé-s7, which occurs 5 times in the RV.

b. The pronominal forms ná-ki-s (50) and má-ki-s (13) 'no one' are old nominatives

which have become indeclinable.

N. f. This form is frequent, being made from 136 stems in the RV. The commonest examples are: áditis (78) 'freedom', su-matis (22) 'benevolence', rātis (22) 'gift', nābhis (19) 'navel', matis (18) 'thought', vuvatis (18) 'maiden', bhámis (12) 'earth', prá-matis (11) 'providence' 8.

<sup>2</sup> The VS., however, has pátye visvasya bhūmanas 'lord of the whole world'.

3 Cp. BB. 25,242; OLDENBERG, ZDMG. 54,

4 Cp. REICHELT, BB. 25, 234-238, and J. SCHMIDT, KZ. 27, 382.

7 Cp. REICHELT, BB. 25, 250.

I This ending is probably due to the analogy of the words of relationship, pitier f. jánī (jánis in AV. XX. 482 is an emendation). etc.; cp. KZ. 25, 289 and 242 f.

<sup>5</sup> Except the irregular m. sákhā and the

<sup>6</sup> There is also the transition form from the radical z- declension vésa-śri-s beautifully adorned' (TS.).

<sup>8</sup> Also the transition forms from the ideclension aranyanis, osadhis, naptis (AV.), rátris (AV., VS. XXXVII. 21).

N. A. n. This form has no ending I. It is made from 37 stems in the RV. The commonest examples are:  $m\acute{a}hi$  (84) 'great',  $b\acute{h}\acute{u}ri$  (47) 'much', sv-ast' (35) 'welfare',  $h\acute{a}rdi$  (9) 'heart'?. From other Samhitās:  $\acute{a}n$ -abhisʿasti (VS.v.5) 'blameless', a-meni (VS.xxxvIII.14) 'not casting',  $\acute{a}sthi$  (AV., VS.) 'bone', a-sthūr' (VS. II. 27) 'not single-horsed',  $\~{a}tma$ -sáni (VS. XIX. 48) 'life-winning',  $\acute{c}ka$ -neni (AV.) 'having one felly',  $kr\acute{t}vi$  (VS.X.20) 'active' (?), ksatra-váni (VS.I.17) 'devoted to warriors',  $g\~{a}y$ atrā-vartani (TS.III. I.10'; VS.XI.8) 'moving in G $\~{a}y$ atr $\~{a}$ -wartani (AV., VS., Kh.III.16') 'sour milk', pasʿu-sáni (VS.XIX.48) 'cattle-winning', pf $\acute{s}ni$  (AV.) 'dappled', brahma-váni (VS.I.17) 'devoted to Brahmans', loka-sáni (VS. XIX. 48) 'causing space', vádhri (AV.) 'emasculated', vári (VS. XXI. 61) 'choiceworthy', saj $\~{a}ta$ -váni (VS. I. 17) 'conciliating relations'.

A. m. This form is very frequent, being made from 205 stems in the RV. and occurring more then 1200 times. The commonest examples are: agnim (269), rayim (180) 'wealth', yinim (61) 'receptacle', pátim (49) 'lord' or 'husband', áhim (40) 'serpent', ádrim (30) 'rock', kavim (28), átithim (25), bihaspátim (25), hárim (24), ūrmim (23) 'wave', párandhim (8) 'bountiful',

yayim (2) '(speeding) cloud', arim 4 (2) 'devout'5.

f. This is a frequent form, being made from 156 stems in the RV. and occurring more than 600 times. It is thus about half as common as the m. The examples occurring oftenest are: su-matim (41), su-stutim (35) 'excellent praise', vrstim (26) 'rain', matim (22), rātim (20), bhūmim (19), pūramāhim (5),

rayim  $(4)^6$ .

I. m. This case is formed in two ways. I. Five stems in the RV. add the normal ending  $\bar{a}$ , before which the -i is generally pronounced as y, but half a dozen times as a vowel:  $p\acute{a}ty\bar{a}$  'husband',  $s\acute{a}khy\bar{a}$ ,  $\bar{u}rmy\acute{a}$ ,  $pary\acute{a}$  'felly',  $rayy\acute{a}$ . — 2. Owing to the influence of the n-declension 25 stems in the RV. add -nā instead of the normal -ā:  $agnin\bar{a}$ ,  $\acute{a}ighrin\bar{a}$  (VS. II. 8) 'foot',  $\acute{a}drin\bar{a}$ ,  $asin\bar{a}$  'sword',  $\acute{a}hin\bar{a}$ ,  $\bar{u}rmin\bar{a}$ ,  $kavin\bar{a}$ ,  $k\bar{a}sin\bar{a}$  'fist', kiki- $d\bar{u}vin\bar{a}$  'blue jay',  $jam\acute{a}dagnin\bar{a}$  N. of a seer,  $dev\acute{a}pin\bar{a}$  N. of a man,  $dh\bar{a}sin\bar{a}$  'draught',  $panin\bar{a}$  'niggard',  $p\acute{a}tin\bar{a}$  'lord',  $p\acute{a}prin\bar{a}$  'delivering',  $paridhin\bar{a}$  (VS.xvIII. 63; TS.v.7.7') 'fence',  $p\bar{a}nin\bar{a}$  (VS.I.16) 'hand',  $p\acute{r}sini\bar{a}$  (Kh.III.157),  $b\acute{r}has$ - $p\acute{a}tin\bar{a}$ ,  $manin\bar{a}$  'gem',  $yayin\bar{a}$ ,  $rayin\bar{a}$ ,  $rasmin\bar{a}$  'rein',  $v\acute{a}dhrin\bar{a}$ ,  $vavrin\bar{a}$  'vesture',  $vastin\bar{a}$  (VS.xxv.7) 'bladder',  $v\acute{r}sa$ - $n\bar{a}bhin\bar{a}$  'having strong naves',  $vrsnin\bar{a}$  'strong',  $s\acute{u}cin\bar{a}$ ,  $s\acute{a}snin\bar{a}$  'bountiful'.

f. This case is formed in two ways. 1. About 30 stems in the RV. add the normal ending -ā, before which the -i is pronounced as a vowel in about three-fourths of the occurrences of this form, and as y in the rest? The forms occurring are (a) oxytones: asityá 'eighty', ūtyá 'aid', kūrtyá 'o (AV.) 'fame', panktyá (VS. XXIII. 33) a metre, pītyá 'draught', pustyá (AV. TS.) 'prosperity', matyá, mithatyá 'emulation', vasatyá 'abode', vrstyá, sanyá (VS. v. 7; TS. IV. 2. 12) 'gain', su-kīrtyá 'praise', su-matyá, su-stutyá, svastyá (VS.

<sup>2</sup> LANMAN 377 enumerates the forms.

4 Also aryám formed like a radical zstem (though differently accented).

5 There are also the transitions from the i-declension prthim and sobharim.

The only i- stem taking -m is the pronominal ki-m, probably owing to the false sákhiō. analogy of ká-m.

<sup>3</sup> The Pada text reads vāri. According to BR. vāry ā here stands for vāryam ā.

<sup>6</sup> Also the transfers from the ī-declension aranyānim, onim, oṣadhim, rātrim (AV.), snihitim (SV.).

<sup>7</sup> Pronounced *ūrmiā*, sometimes also *pātiā*, sākhiā.

<sup>8</sup> ghṛnīva (II. 336) possibly stands for ghṛnī-iva (Pada -i-iva), ghṛnī then possibly being a contracted I. for ghṛnyā; cp. LANMAN 379 (middle).

<sup>9</sup> On the other hand  $y\bar{a}$  is pronounced 5 times as often as  $-i\bar{a}$  in the AV.; see LANMAN 380.

zo All the Mss. but one read kirtyā or kūrtyā; see Whitney's note on x. 627.

- vIII. I 5; TS. I. 4. 44<sup>T</sup>); **(b)** otherwise accented: abhi-śastyā (AV.) 'curse', árātyā (AV.) 'malignity', ávartyā 'distress', aśányā 'thunderbolt', ákātyā 'purpose', ábhātyā 'ability', iṣṭyā 'sacrifice', jálpyā 'whispering', tṛṭtyā (AV.) 'satisfaction', tviṣyā 'brilliance', devá-hātyā 'invocation of the gods', dhrājyā 'impulse'; nābhyā (VS. XXV. 9), pārṣṇyā 'heel', piraṇdhyā, piṣṭyā (TS. III. I. 5¹), prā-matyā, bhūtyā (AV.) 'growth', bhūmyā, rāṃhyā 'speed', rifyā 'direction', riucyā (AV.) 'lustre', vīcyā 'seduction', śáktyā (VS. XI. 2; TS. IV. I. 5³) 'power', sú-bhūtyā (AV.) 'welfare', sṛṇyā 'sickle', svádhityā (AV.) 'knife', hárṣyā 'excitement'.
- 2. A contracted form in -ī' is made by 35 stems in the RV. and occurs more than twice as often as the uncontracted -yā. The forms occurring are: d-cittī 'thoughtlessness', d-prabhūtī 'little effort', a-vyathī 'sure-footedness', áhutī 'oblation', ūtī, rju-nītī 'right guidance', cittī 'understanding', jūṣṭī 'favour', dīdhitī 'devotion', du-ṣṭutī and dū-ṣṭutī 'faulty hymn', dhītī² 'thought', n/-ṣitī 'kindling', pári-viṣṭī 'attendance', pur-jitī 'previous acquisition', prá-nītī 'guidance', prá-bhūtī 'violence', prá-yatī 'offering', prá-yutī 'absence', matī, vartanī 'felly', viṣṭī 'effort', vīṭī 'enjoyment', vṛṣṭī, śaktī and śāktī, śruṣṭī³ 'willingness', sā-hūtī 'joint invocation', su-ātīt 'bright radiance', sū-nītī 'good guidance', su-matī, sū-mitī 'being well fixed', su-ṣastī (Kh.II. 10²) 'good recitation', su-ṣtutī, hāsta-cyutī 'quick motion of the hand'. Also su-paptanī (I. 1825) 'with swift flight' (in Pada with -i); perhaps also the two forms hetī (VI. 1810) 'missile' and -iṣṭī (I. 1804) 'desire', which occurring before r- are given by the Pada as hetili and -iṣṭī.
- a. This form is further shortened to -i in about a dozen words in the RV., occurring altogether some 25 times: isáni 'setting in motion', ilpa-śruti 'giving ear to', upābhṛti 'bringing near', tri-viṣṭl 'thrice' (= adv.), nl-tikti 'haste', prá-yukti 'impulse', váṣat-kṛti 'exclamation vaṣaṭ', sadhá-stuti 'joint praise', su-vṛkti 'excellent praise', su-śasti 'good praise', sv-asti, haviṣ-kṛti 'preparation of the oblation'. Perhaps also á-smṛti (AV.VII.1061) 'through forget-fulness'.
- b. A few forms follow the analogy of the m. in adding  $-n\bar{a}$ :  $dh\bar{a}sin\bar{a}$  'abode',  $n\bar{a}bhin\bar{a}$ ,  $pr\acute{e}tin\bar{a}$  (VS. xv. 6) 'advance'.

n. There is no certain instance of a neuter I.:  $\dot{sucin}\bar{a}$  (II.  $38^8$ ) is perhaps an example, but it may be taken as a masculine.

- D. m. The stem regularly takes Guna before adding the normal ending -e; e. g. rṣay-e. This is a form of frequent occurrence, being made from 44 stems in the RV. The commonest examples are: agnáye (48), átraye (12) N. of a seer, sanáye (12), ghṛṣvaye (6) 'gladdening', dabhitaye (5) N. of a man 7. From the VS.: brāhmaye 'holy', bhuvantáye (xvi.19) 'earth-extender'(?), vṛṣṭi-vánaye (xxxviii.6) 'rain-winning', sandháye (xxx.9) 'agreement'.
- a. The only two stems not taking Guṇa are páti- 'husband' and sákhi-, which make pátye and sákhye<sup>8</sup>. When compounded páti- 'lord' forms its D. regularly as -pataye; e. g. bý-has-pátaye<sup>9</sup>, prajā-pataye (VS. XI. 66) 'Lord of Creatures', amhasas-patáye

<sup>2</sup> This is the only contracted form occurring in the independent parts of the AV.

3 The form sadhri (II. 132) is probably an adverb 'to the same goal' from sádhri-(LINDNER p. 112), or it might be an inst. f. of sadhri- (LANMAN 3803).

4 See RPr. VII. 15.

9 This is the only compound in the RV. formed with the D. of páti-.

This form is, except in two instances, written with y before  $\vec{a}$ , but is to be read with hiatus; it coalesces in the written text with i or  $\vec{\imath}$ , but is not always to be so pronounced.

<sup>5</sup> Cp. Lanman 3804.

<sup>6</sup> These occur eight times at the end of a line or stanza, four times at the end of an internal Pāda before vowels, two or three times within a Pāda before vowels.

<sup>7</sup> The stems which form this dative are enumerated by LANMAN 382.

<sup>8</sup> These words are never pronounced as pátie and sákhie.

(VS. VII. 30) 'Lord of distress', bhivana-fataye (VS. II. 2) 'Lord of the world', bhiva-fataye (VS. II. 6) 'Lord of the atmosphere', vācās-pātaye (VS. VII. 1) 'Lord of speech', saṃvešā-pātaye VS. II. 20) 'I ord of rest'; also in the expressions kṣith asya pātaye (AV) 'Lord of the Field' and bhūtāsya pātaye (AV.) 'Lord of the world', which are virtually compounds!; similarly diśām pātaye (VS. XVI. 17)²; but pātye 3 visrasya bhūmanas (VS. XVII. 78) 'Lord of all the earth'.

f. This form is made like the m.; e.g. iṣṭáy-e. It is very frequent, being formed from 50 stems and occurring over 500 times in the RV. The commonest examples are: ūtiye (88), pītāye (67), sóma-pītaye (49) 'draught of Soma', vāja-sātaye (34) 'winning of booty', sātāye (34) 'acquisition', vītāye (31), devā-vītaye (22) 'feast for the gods', iṣṭāye (20) 'impulse'4.

a. The form uti is frequently used as a dative, similarly  $an-\bar{u}ti$  'no help' once and  $v\bar{t}ti$  twice. svasti occasionally has this value at the end of a Pāda and when it alter-

nates with sziastáye in v. 5112. 13, but it may be intended for an adverb 5.

b. In the RV. seven stems in -i (all but 2 of which occur in Mandala X), follow the analogy of derivative i-stems and take the ending -ai: turyāi 'victory', devā-hūṭṛai 'invocation of the gods', nirṛṭṛai 'dissolution', pugṛāi, bhūṭṛai 'favour', bhṛṭṛai 'support', srūṭṛai 'blessing'. The AV. forms such datives from at least 11 stems; the TS. has ā-samarṭṛai (III. 3.82) 'non-injury', dūr-iṣṭṛai (III. 2.83) 'failure in sacrifice', śākṭṛai (V. I. II); the VS. has nearly 40: ā-kṣiṭṛai (VI. 28) 'imperishableness', dāṭṛai (I. 30) 'Aditi', ānu-maṭṛai (XXIV. 32) 'assent', ā-bhitṭṛai (XI. 64) 'not bursting', abhī-sasṭṛai (II. 5), ā-bhitṭṛai (XXX. 17) 'wretchedness', ā-rādāhṇai (XXX. 9) 'mischance', ā-rṣṭṭṛai (XXX. 12) 'distress', ā-hantṛai (XXX. 9) 'mischance', ā-rṣṭṭṛai (XXX. 9.17) 'trouble', ntkrānṭṛai (XV. 10) 'urṣṭṛiding', 'd' ai (XXVII. 45) 'arrival', kṛṣṇṭai (XX. 22) 'tillage', dūr-iṣṭṭṛai (XII. 58), prāṭṭ-ṣṭhiṭṭai (XV. 10) 'firm footing', prā-siṭṛai (XXX. 9) 'atonement', paikṭṛai (XXXIX. 12) 'expiation', prēṭṛai (XXVII. 45), bhūṭṇai (XII. 65), bhūṇṇa (XXX. 26), maṭṛai (XXXII. 28), maḥṇai (XIII. 20), raṇṇai (XXII. 45), bhūṭṇai (XXX. 13) 'separation', rṛṣṭṛai (XXIII. 28), vēdṇai (XIX. 16) 'altar', rṇṇaṣṭai (XXII. 34) 'dawn', rṇṛadhṇai (XXI. 18) 'missile'.

n. The only form which seems to occur is sucaye.

Ab. m. The stem takes Guna, to which -s only, instead of -as, is added; e. g. ádres. It is not common, being formed from only 8 or 9 stems in the RV.: agnés (TS. IV. 2. 104; Kh. IV. 65), áhes, udadhés 'water-receptacle', girés 'mountain', ghŕnes 'heat', thraści-rājes (AV.) 'striped across', parna-dhés (AV.) 'feather-holder', prajápates (TS. IV. I. II4), plāśés (AV.) 'intestine', yónes, vrsā-kapes 'man-ape', śatá-m-ūtes' 'granting a hundred aids', sám-rtes 'conflict'.

- f. This form is made in the same way as in the m. from 11 stems in the RV.: ádites, ápītes 'entering (iti-) into (api)', abhi-sastes, abhi-hrutes 'injury', ámates 'indigence', árātes, áhutes (AV.), dhāss's 'abode', dhūrte's 'injury', nṛtes '(AV.), pári-ṣūtes 'oppression', bhāmes (AV.), vasate's, srute's 'course'.
- a. The RV. has three forms according to the derivative  $\bar{\iota}$  declension:  $n\bar{a}bhy\bar{a}s$  (x. 9014),  $bh\bar{u}my\bar{a}s$  (1. 804),  $hety\bar{a}s$  (x. 8719). Besides these the AV. has:  $a\cdot bh\bar{u}ty\bar{a}s$ ,  $a\cdot r\bar{a}ty\bar{a}s$ ,  $a\cdot sasty\bar{a}s$  'imprecation',  $\bar{a}huty\bar{a}s$ ,  $krsy\bar{a}s$ ,  $deva-hety\bar{a}s$  'divine weapon',  $s\bar{i}rsahty\bar{a}s$  'headache'; probably also  $y\delta ny\bar{a}s$  in  $y\delta nyeva$  (VI. 1214) for  $y\delta ny\bar{a}s$  iva.
- G. m. The regular form of this case is identical with that of the Ab., but is much more frequent, being made from 42 stems in the RV. The commonest examples are: agnés (55), vés (14), ádres (10), panés (8), béhas-pátes (6), sūrés (5) 'patron', átres (4), kavés (4), dhāsés (4) 'draught', bhúres (4); pátes 'lord'

<sup>2</sup> And a number of other epithets in VS. xVI. 17-23.

3 pátye otherwise means 'husband'.

7 Cp. RICHTER, IF. 9, 5.

Equivalent to kṣetra-pati- (K.) and bhūtapáti- (AV.).

<sup>4</sup> LANMAN 382 enumerates the stems which take this dative.

<sup>5</sup> Cp. LANMAN 383 (top).

<sup>6</sup> Used in the sense of the ablative with pāhi 'protect from'.

<sup>8</sup> This form nites is probably an error for dites 'skin'; see WHITNEY's note on AV. VI. 183.

occurs once. Elsewhere are found: jamád-agnes (VS. III. 62; Kh. v. 36), prajápates (TS. III. 1. 41; Kh. III. 1513), yayısı (Kh. I. 102).

- a. The two stems ari- and ávi- 'sheep' do not take Guna, and add the normal ending -as:  $ary\acute{a}s^2$  which occurs nearly 40 times, and ávyas which occurs nearly 20 times. The stem páti-, when meaning 'husband', and  $s\acute{a}khi$  do not take Guna either, but add the anomalous ending -ur:  $p\acute{a}tyur$ ,  $s\acute{a}khyur^3$ .
- f. This case, identical in form with the m., is made from 11 stems in the RV.: ddites, abhl-sastes, âmates, istés, kṛṣtés 'tillage', devd-vūtes, niṛṛtes, puṣtés, pṛṣnes, vṛṣtés, vṛatâtes 'creeper'. This form is also made by at least 8 stems in the AV.
- a. Six stems in the RV. form genitives according to the derivative  $\bar{\imath}$  declension, occurring 17 times altogether:  $\acute{a}nu-maty\bar{a}s$ ,  $\acute{a}r\bar{a}ty\bar{a}s$ ,  $nirrty\bar{a}s$ ,  $pf\acute{s}ny\bar{a}s$ ,  $bh\acute{a}nny\bar{a}s$ ,  $ynvaty\dot{a}s$ . In the AV such forms are made from at least 16 stems and occur over 50 times:  $j\bar{a}my\dot{a}s$  'akin' etc. One of these,  $\acute{a}dity\bar{s}s$ , occurs also in the TS. (I. 6. 51) and VS. (I. II).
  - n. The only example is bhires, which occurs 16 times.
- L. This case in all genders ends very anomalously in -ā or -aulatter ending occurs more than twice as often as the former in the RV. (272 times to 126), while in the N. A. dual  $-\bar{a}$  is nearly 7 times as frequent as -au (1145 times to 171)4. The general conditions under which the parallel I. forms  $-\bar{a}$  and -au occur<sup>5</sup> are the same as apply to the dual  $-\bar{a}$  and -au:  $-\bar{n}$  appears before consonants, -au (as  $-\bar{a}v$ ) before vowels, e. g. vir yónā vasativ iva (IX. 6215) 'a bird in the receptacle as in a nest'. But while the dual -ā is the regular form at the end of a Pāda, the L. -au is almost exclusively found in that position 6. As in the dual N. A. and the perfect sing. 1 and 3, the  $\bar{a}$ -form is doubtless the earlier. It is most probably derived from a locative form with Guna (like the D. Ab. G. V. sing.), e. g. \*agnáy-i, which dropped the ending (like some other locatives), \*agníy then losing its  $y^7$  before consonants and lengthening its -a:  $agn\dot{a}$ . The later form agnáu must have been due to the influence of the u-stems, the inflexion of which is closely parallel to that of the i-stems, through the Sandhi form  $-\bar{\alpha}$  which is common to both<sup>8</sup>.
- m. I. The  $-\bar{\alpha}$  form is made from 7 stems and occurs 40 times in the RV:  $agn\bar{\alpha}$ ,  $\bar{\alpha}j\bar{\alpha}$  'contest',  $\bar{\alpha}rm\dot{\alpha}$ ,  $kuks\dot{\alpha}$  'belly',  $gh\dot{r}n\bar{\alpha}$ ,  $su-rabh\dot{\alpha}^9$  'fragrant'. The AV. TS. VS. have no  $-\bar{\alpha}$  form in independent passages, but Kh. III. I 5 19 has  $agn\dot{\alpha}$ .
- 2. The form in -au is taken by 27 stems in the RV.: agnáu, ádrau, aratáu<sup>10</sup> 'manager', aratnáu 'elbow', ājáu, ānáu 'pin of the axle', ūrmáu, gábhastau 'hand', giráu, gó-patau 'lord', jīráu<sup>11</sup> 'stream', trksáu N. of a prince, dhvasánau 'sprinkler', námucau N. of a demon, nípātithau N. of a man, panáu, prt-sutáu 'hostile attack', médhyātithau N. of a seer, yajñá-patau 'lord of sacrifice', yónau, ráthavītau N. of a man, vánas-pátau<sup>12</sup> 'lord of

I Emendation for yayáis.

<sup>2</sup> Once or twice to be pronounced ariás.

<sup>3</sup> Cp. Wackernagel, KZ. 25, 289 f.

<sup>4</sup> Cp. Lanman 514.

<sup>5</sup> See Lanman 385 ff.; and cp. for the dual 340 ff. and 574-576.

<sup>6</sup> The L. -ā appears only 5 times at the end of a Pāda, and then only in the two forms devátātā and sárvatātā.

<sup>7</sup> Cp. the N. sákhā for \*sákhāy. The old L. may be preserved in feminines like agnāy-ī- 'she who is beside Agni'; cp. IF. 12, 3.

<sup>8</sup> Cp. MERINGER, BB. 16, 224.

<sup>9</sup> LANMAN 3882, suggests the possibility of restoring ajáyi in I. 11210 and yónayi in X. 466. The n. L. a-pratā is used adverbially without recompense' (VIII. 3216); cp. BARTHOLOMAE, IF. 9, 255 f.

<sup>10</sup> BR. would read aratnáu.

<sup>11</sup> jui- may be f. as there is nothing to show the gender of the word.

<sup>12</sup> The form vánaspátau occurs in Kh. II. 10<sup>5</sup> also.

the forest', śalmaláu 'silk-cotton tree', sánitau 'attainment', sánvaranau 'descendant of Samvarana', syáma-raśmau N. of a man, svádhitau. The AV. also forms the L. in -au from at least 16 stems; among them appears the uncompounded pátau (AV. III. 183) 'husband' 1 as a variant for jáne in the corresponding passage of the RV. (x. 1454). The TS. has áhau (y. 6. 12 = AV. III. 131).

f. I. The form in -ā is made from 21 stems in the RV.: avánā 'riverbed', āja, úditā 'sunrise', kṣétra-sātā 'acquisition of land', gó-ṣātā 'winning of cows', toká-sātā 'attainment of offspring', devá-tātā 'worship of the gods', dyumná-sātā 'obtainment of strength', nábhā, ní-ṣātā 'capture of men', nemádhitā 'conflict', pītā, prá-bhrtā 'offering', medhá-sātā 'receiving the oblation', yáma-hūtā 'invocation by prayer', śūra-sātā 'battle', sám-rtā, sarvá-tātā 'perfect prosperity', sātā², srutā, svàr-ṣātā 'attainment of heaven'. The AV. has nābhā (VII. 62¹); and the SV. reads śámtātā 'beneficent', as a variant for śántāti of RV. VIII. 187. The TS. and VS. have no independent L. f. in -ā.

2. The form in -au is more than twice as frequent, being made from 49 stems in the RV. The commonest examples are sātáu (17), vája-sātau (16), vyùṣṭau (16) 'flush of dawn', abhiṣṭau (10) 'help', su-matáu (14), gáviṣṭau (7) 'fight', iṣṭáu (6), rātáu (5), pūrvá-hūtau³ (5) 'first invocation'. The AV makes this form from 7 stems in independent passages. The TS. has hditau (1.8.12³), pūrvá-cittau (1V.2.10²) 'first thought'; the VS. ratha-nābháu (XXXIV.5) 'chariot nave', rātrau (XXIII.4) 'night'; and Kh. I. II⁴ śńra-sātau.

a. There are 5 locatives f. formed according to the derivative \(\bar{\bar{\pi}}\)- declension with the ending  $-\bar{a}m$ : furamalhy\(\bar{a}m\), bh\(\bar{u}m\)y\(\bar{a}m\), bh\(\bar{u}t\)y\(\bar{a}m\), cilty\(\bar{a}m\), viviaty\(\bar{a}m\), prity\(\bar{a}m\) rib', bh\(\bar{u}t\)y\(\bar{a}m\), y\(\delta\)y\(\bar{a}m\), v\(\delta\)y\(\bar{a}m\), v\(\delta\)y\(\delta\), \(\delta\) any\(\delta\), v\(\delta\) \(\delta\).

(VII. 54).

b. The locative  $v \neq d\tilde{t}^4$  occurring twice (VI. 1<sup>10</sup>; II. 3<sup>4</sup>) is the only one formed from an *i*-stem with the normal ending -i (=  $v \neq d\tilde{t}$ -i). The form  $prdn\tilde{t}d\tilde{t}$  may also possibly be

a L. in 111. 517.

**L. n.** The only form in  $-\bar{a}$  is  $a\text{-prat}\hat{a}$  (viii.  $32^{16}$ ) 'without recompense' (used adverbially), and the only one in -au is  $sapt\hat{a}\text{-rasmau}$  (AV. IX.  $5^{15}$ ) 'seven-rayed'

V. This case regularly gunates the final vowel in the m. and f. It is very frequent in the m., being formed from 72 stems and occurring over 1100 times in the RV. In the f. it is not common, being formed from only

11 stems and occurring only 27 times in the RV.

m. The commonest examples are: ágne<sup>5</sup> (799), pate (35), bihas-pate<sup>6</sup> (32), kave (26), brahmaṇas-pate (17), vanas-pate (14), āghṛṇe (13) 'glowing', sat-pate (13) 'lord of the seat', sakhe (11)<sup>7</sup>. In Kh. 1. 5<sup>7</sup> the anomalously formed compound bhuvanas-pate<sup>8</sup> 'lord of the world' occurs; in the VS. aighāre (1V. 27) a guardian of Soma, dite (XXXVI. 18) 'bag', drāpe (XVI. 47) 'causing to run', bāmbhāre (IV. 27) a guardian deity of Soma, bhuvas-pate (IV. 34) 'lord of the earth', sâtesudhe (XVI. 13) 'hundred-quivered', sapte (XXIX.2) 'steed'.

a. The V. sobhare is a transfer from the  $\bar{\imath}$ - declension; and the compounds pāvaka-śoce, bhadra-śoce, śukra-śoce are transfers from the -is declension, doubtless meant to avoid the unusual form -śocis in the V.

8 Formed like vanas-pate.

The RV. has only the form pátyau

<sup>&</sup>lt;sup>2</sup> For this form in VI. 46<sup>1</sup> the SV. and VS. have the variant sātáu.

<sup>3</sup> This form occurs also in AV. v. 11.

<sup>4</sup> Cp. RPr. I. 28; II. 35.

<sup>5</sup> Written with Pluti VS. VIII. 10: ágnásí.

<sup>6</sup> Once (IX. 801) with double accent by has-

<sup>7</sup> In mahe-mate 'O great-souled' (Indra), the first member is anomalously gunated as well as the second; cp. mahe-nadi 'O great stream'.

- f. The forms occurring in the RV. are: adite, anumate, asu-nīte 'spirit-world', iṣṭe, upa-māte 'granting (of wealth)', rjīte 'radiant', bhūme, mate, yuvate, satyatāte 'truth', sv-angure 'fair-fingered'. The AV. has darve 'spoon'; the VS. svadhite.
  - a. There is also the transfer osadhe from the z- declension.
- Du. N. A. V. This form ends in  $-\bar{\imath}^3$  and can be used in all genders alike. The m. is very frequent, being made from 72 stems in the RV. The commonest examples are:  $indr\bar{\imath}gn\hat{\imath}$  (78) 'Indra and Agni',  $h\acute{a}r\bar{\imath}$  (78),  $p\acute{a}t\bar{\imath}$  (33),  $s\acute{u}bh\acute{u}s$ - $p\acute{a}t\bar{\imath}$  (21) 'lords of light'. Elsewhere also occur: sa- $t\acute{a}t\bar{\imath}$  (TS.III. 2. 2°) 'continuous';  $bh\acute{u}ri$ -rasmi (Kh.IV. 22°) 'many-rayed'; visva- $v\acute{u}par\bar{\imath}$  (Kh.IV. 22°) 'extending (?) everywhere'. The final vowel is shortened in  $saks\acute{a}ni$  (x. 32°) 'united'.
- f. The forms occurring in the RV. are: itá-ūtī 'extending from hence', ūtī, 'jītī, jāmī, dárvī, dyávā-bhámī 'heaven and earth', dhārayát-kavī 'protecting the wise', púraṃdhī, bhujī 'patrons', yuvatí, vásu-dhitī 'treasuries', śúcī, sá-yonī 'of the same origin', su-prátūrtī 'very victorious', srutí.
- n. The only two regular forms are sile and tigmá-hetī (AV.) 'having a keen thrust'; also  $m\acute{a}hi$  (with shortened final). There are besides one or two secondary forms with  $-n\bar{\iota}$  made under the influence of the n-declension:  $\acute{a}ksin\bar{\iota}$  (AV.) 'eyes' and perhaps  $h\acute{a}rin\bar{\iota}$  (IX. 707) from  $h\acute{a}ri\acute{o}$ .
- I. m. indrāgnibhyām, dámpatibhyām (AV.) 'husband and wife', háribhyām.—
  f. vartanibhyām, śrónibhyām (VS.xxv.6) 'hips'.— n. sákthibhyām 'thighs'.
- **D.** m. indrāgnibhyām, indrā-bṛhaspátibhyām (VS. VII. 23) 'Indra and Bṛhaspati', háribhyām?.
- Ab. m. kuksibhyām (AV. VS.) pāṇibhyām (AV.). f. pārṣṇibhyām, sróṇibhyām. G. m. indrāgnyós, háryos. f. yuvatyós.
- L. m. kukṣyós, gábhastyos<sup>8</sup>, háryos. f. jāmyós; gavīnyós (AV.) 'groins', párṣṇyos (AV.). n. sákthyos (VS. xxiv. 1).
- P1. N. V. This form gunates the final vowel of the stem, adding the normal ending -as in the m. and f.; e. g. agnáy-as, ūtáy-as. It is of very frequent occurrence, but is nearly twice as common in the m. as the f.
- m. This form is made from 109 stems in the RV. and occurs 523 times. The commonest examples are: kaváyas (45), váyas (38), sūráyas (36), hárayas (31), agnáyas (27), ádrayas (26), ŕsayas (26), súcayas (18), pátayas (16), rasmáyas (16), váhnayas (15) 'conveyers'. In the VS. also occur: ajāváyas 'goats and sheep' (111. 43), vŕṣa-pāṇayas (XXIX. 44) 'strong-hoofed', vrīháyas (XVIII. 12) 'rice-plants'.
- a. The stem ar/-, being the only *i*-stem that does not take Guṇa, forms its N. pl. like the B group of the radical  $\bar{i}$ -stems (except the accent); ary-ás, which occurs 16 times in the RV.
- b. The form á-hrayas 'shameless' is a transfer from the radical  $\bar{\imath}$  declension, and sibharayas 'descendants of Sobhari' from the derivative  $\bar{\imath}$  declension.
- f. This form is made from 66 stems and occurs 290 times in the RV. The commonest examples are: ūtáyas (42), dħītáyas (21), matáyas (20), árātayas (18), rātáyas (18), kṛṣṭáyas (17), kṣitáyas (13) 'races', jánayas (12), vṛṣṭáyas (12).
- a. The stem ari- has the same anomalous form as in the m.: ary-ás, which occurs 4 times in the RV.

Agreeing with agne.

<sup>&</sup>lt;sup>2</sup> The VS. (II. 49) has darvi from dárvi—
dárvi. The VS. (VIII. 43) also has vi-śruti
which seems to be an irregular V. for viśrute; cp. pw. s. v.

<sup>3</sup> The derivative -i, -u and  $-\bar{i}$  stems are the only ones which do not take  $-\bar{a}$  or -au in the dual.

<sup>4</sup> Occurring in X.85<sup>12</sup> and possibly Iv. 56<sup>5</sup>.

<sup>5</sup> Occurring x. 9754 and perhaps also IV. 565.
6 BR. and GRASSMANN place this form

under hárita.
7 No n. forms occur in the D. Ab. dual.

<sup>7</sup> No n. forms occur in the D. Ab. dual. 8 This word may be f. also.

b. About 10 i- stems in the RV. have also N. pl. forms according to the derivative I- declension: avanīsi 'streams', apānīs 'births', ūtisi, nāktīs 'nights', nirtīs, niskrtīs, pāramdhīs, bhāmīsi, višvā-kṛṣtīsi 'dwelling among all men', sā-yonīs. The AV. also has: angūlīs, ṛṣtīs 'spears', dhamānīs 'tubes', nābhīs, pārsnīs, fṛṣtīs.

The stems payi- 'speeding', subhri- 'shining', karkari- 'lute' form their N. pl.

according to the radical 1-declension: yayiyas, subhriyas (AV.), karkaryas (AV.).

d. Some 7-stems have transfer forms according to the r-declension: ambáyas, arunáyas, kionáyas; ésadhayas, súkvarayas (TS. V. 4. 122; VS. XVIII. 22). The TS. has also: garbhinayas (II. 1. 26), pátnayas (V. 2. 112 etc.), revátayas (V. 2. 1111), várūti ayas (V. 1. 62).

- N. A. n. r. The normal form, in which the ending -i coalesces with the final of the stem to -ī, is made from 4 stems in the RV.: a-prati<sup>2</sup> 'irresistible', kriidhmī 'irascible', tri 'three', silot. The final vowel of this form is further shortened in six stems: aprati, a-sthūri 'not single-horsed', jāmi, bhūri, śāmi³ 'work', surabhi. The AV. has also māhi (besides aprati and bhūri). The forms in -ī and -i (which are of about equal frequency) taken together occur about 50 times in the RV.
- 2. There is a secondary form (following the analogy of the *n*-stems) in -īni, which is taken by 4 stems having the primary form also: apratini, bhārīṇi, śhēni, surabhīṇi. These forms occur about 14 times. The AV. has also ákṣīṇi and ásthīni; the latter form occurs in the TS. as well (v. 7. 2¹); the VS. has śhōni (xxxxx. 8) 'entrails'.
- A. m. The ending -n here (as in the -a and -n declension) represents original -ns, which in one half (42) of the total occurrences (84) of these forms in - $\bar{n}n$  in the RV. is preserved as -ms or (before vowels) -mr. This A. is made from 31 stems in the RV4. The commonest examples are  $s\bar{u}rin$  (14), vanas-patin (11), panin (9), rasmin (6),  $sakh\bar{n}n$  (5), girin (4). The TS. also has adhi-patin (1.6.6) 'lords',  $ah\bar{n}n$  (1v. 5. 12; VS. xvi. 5); the VS. has  $tittir\bar{n}n$  (xxiv. 20) 'partridges',  $ah\bar{n}n$  (xxiii. 8) 'parched grain',  $ah\bar{n}n$  (xxiii. 8) 'groats'.
- a. The stem ari is the only one which does not take -n, but adds the normal ending -as instead, the A.  $ary \acute{a}s$  (which occurs 7 times in the RV.) being thus identical with the N. pl. The stem vi in its only occurrence (I. 104 $^{\rm I}$ ) in the A. pl. uses the N. pl. form  $v\acute{a}yas$ .
- f. This form, which is made by adding simple -s (instead of -as), e. g. bhūmīs, occurs from 42 stems in the RV. The commonest examples are árātīs (16), kṛṣṭṭs (16), kṛṣṭṭs (8), caṛṣaṇṭs (7) 'people', phraṇahīs (7), avānīs (6), áśastīs (5). The TS. has abhiṣṭis (v.4.14²), ámatīs (III.1.4⁴), yūnīs (1.5.3³), vyùṣṭīs (1v.3.11⁴); and śácīs occurs in a Khila (p. 171, 6) °.
- a. As in the m., the stem ari- has aryás (occurring 4 times). Two N. forms, citrótayas (x. 1403) 'granting wonderful gifts' and sucayas (AV. v. 13), appear to be used for the A.
- I. m.<sup>9</sup> This form is made with the regular ending -bhis from 40 stems in the RV. The commonest examples are ádribhis (43), raśmibhis (36), pathibhis (28) 'paths', háribhis (23), sákhibhis (15), sūribhis (14), agnibhis (10), añfibhis (10) 'ornaments', ŕṣibhis (10), vibhis 10 (9). From the VS.: plāśibhis (xxv. 8).

<sup>2</sup> The Pada text has aprati.

6 Written with pluti in the text as lajian, sacian.

9 No n. form occurs.

<sup>&</sup>lt;sup>1</sup> Beside avánayas, ūtáyas, bhūmayas, viśvákṛṣṭayas.

<sup>3</sup> BR. set up a n. stem śámi- beside f. śámī-. Grassmann recognizes śámī- only, making śámi always the I. sing. with shortened final vowel. Cp. the I. sing. of śámī-above (p. 274).

<sup>4</sup> LANMAN 395 enumerates the stems which take this accusative.

<sup>5</sup> On the Sandhi of the final -n in this form see LANMAN 394 f.

<sup>7</sup> The stems which take this form in the RV. are enumerated by LANMAN 3953.

8 See SCHEFTELOWITZ' note, p. 171 (bottom).

<sup>10</sup> Not accented as a monosyllabic stem.

- f. This form is made in the same way as the m. from 48 stems in the RV. The commonest examples are: ūtlbhis (100), svastibhis (82), matibhis (37), dhītibhis (27), su-vyktibhis (18).
- a. The form  $\bar{u}t\hat{i}$  is used 9 times as an I. pl. in the RV., as is shown both by the sense and by the forms agreeing with it; e. g. tvåbhir  $\hat{u}t\hat{i}$  (II. 202) 'with thine aids'. b. A transfer from the  $\bar{i}$ -declension is aranibhis 'tinder-sticks'.
- D. m. This form is made with -bhyas from 9 stems in the RV.: áśva-patibhyas (VS. xvi. 24) 'masters of horses', ŕsibhyas', gaṇḍ-patibhyas (VS. xvi. 25) 'lords of troops', dáśāvanibhyas 'having ten courses', pátibhyas, yátibhyas N. of a race, raśmibhyas (VS. xxii. 28), vi-bhyas², vráta-patibhyas (VS. xxii. 25) 'lords of companies', śuċibhyas, śvá-patibhyas (VS. xxiv. 28) 'masters of dogs', sákhibhyas, sanibhyas, sandhibhyas (VS. xxiv. 25), sūríbhyas.

f. ksitibhyas, carsanibhyas, deva-jāmibhyas (VS. XXIV. 24) 'sisters of the gods'. There is also the transfer from the *ī*-declension nāribhyas 'women'.

Ab. m. This case, identical in form with the D., is made from 12 stems in the RV.: agnibhyas, átribhyas, kavāribhyas 'niggardly', giribhyas, panibhyas, pavibhyas, plāšibhyas, yonibhyas (VS. XIII. 34), vánas-pátibhyas, vibhyas², sákhibhyas, sanibhyas, sthivibhyas 'bushels'. — f. amhatibhyas 'distresses', angúlibhyas (AV.), kṣitibhyas, carṣanibhyas, jánibhyas, dhamánibhyas (AV.) 'blasts'. — n. asthibhyas³ (AV. II. 33°).

G. m. This form is made from 28 stems in the RV.: (a) oxytones are agninām, kavīnām, girīnām, carṣaṇīnām, deva-jāmīnām (AV.), nidhīnām 'treasures', paṇīnām, pathīnām, maṇīnām (AV.), mathīnām ', rayīṇām, vāpīnām '6 (AV.), vīnām, sanīnām'6; (b) otherwise accented: átrīṇām, ávīnām, áhīnām, ŕṣīṇām, gandhārīṇām N. of a people, caráṇīnām 'active', tuviṣváṇīnām 'loudroaring', dhinīnām 'roaring', mahi-ṣváṇīnām 'very noisy', minīnām 'seers', vánas-pátīnām, vi-mahīnām 'very great', vyátīnām 'steeds', ślicīnām, sákhīnām, hárīṇām, havir-máthīnām' 'disturbing sacrifices'. Also grhā-patīnām (VS. IX. 39) 'householders', dhárma-patīnām (VS. IX. 39) 'guardians of law'.

f. This form is made from 18 stems in the RV.8: (a) oxytones: kavīnām, kṛṣṭīṇām, kṣṭṭīṇām, carṣaṇṭṇām, jāmīnām, dur-matīnām 'hatred', dhautīnām 'wells', puṣṭīṇām, matīnām, rayīṇām, su-kṣṭṭīṇām, su-matīnām, su-ṣṭutīṇām; (b) otherwise accented: arātinām<sup>9</sup> (Kh. 1. 5<sup>5</sup>), úpa-stutīnām 'invocations', jānīnām, nirṛṭṭṇām, marīcṭṇām 'particles of light', śhcīnām.

L. m. This form is made with the ending -su, which becomes -su, from 16 stems in the RV.: á-kavişu 'not wise', agnişu, añjişu, á-samātişu 'incomparable', ājişu, āpişu 'kinsmen', fṣiṣu, khādiṣu 'rings', girişu, nidhiṣu, pathiṣu, paviṣu,

yónisu, rasmísu, subhrísu, sūrisu.

f. This form is made from 21 stems, all but three of which (a-vyathi-, jāmi-, śubhri-) end in -ti-: abhi-mātiṣu 'plots', a-vyathiṣu, iṣṭiṣu, ūtiṣu, ṛṣṭiṣu, kṛṣṭiṣu, kṣṭtiṣu, gáv-iṣṭiṣu, jāmiṣu, div-iṣṭiṣu 'devotions', devá-hūtiṣu, páriṣṭiṣu 'distresses', puṣṭiṣu, prá-nītiṣu, prá-tūrtiṣu 'speedy motions', prá-yuktiṣu, prá-śastiṣu (TS.1.7.7'; VS.1x.6) 'praises', yáma-hūtiṣu, rātiṣu, vyùṣṭiṣu, śubhriṣu, sātiṣu. The form nắriṣu to is a transfer from the ī- declension.

n. The only example that occurs is bhūrisu.

asthábhyas (VS. XXIII. 44).

6 Also the numeral trīṇām.

necessary in 4 out of 98 occurrences.

9 Wrong accent for aratinam.

Once accented rsibhyas in Vālakhilya XI. 6, doubtless an error.

<sup>Not accented as a monosyllabic stem.
With wrong accent for asthibhyas; cp.</sup> 

<sup>4</sup> Vāl. 58; BR. and GRASSMANN would read matīnām, which is actually the reading of the Kashmir Ms.: Scheftelowitz, Die Apokryphen des Rgyeda 40.

<sup>5</sup> See Whitney's note on AV. XIX. 246.

<sup>7</sup> In about a dozen out of 128 occurrences resolution of  $-\bar{a}m$  to -aam seems necessary.

8 Resolution of  $-\bar{a}m$  to -aam seems to be

<sup>10</sup> On the other hand svåhā-kṛtīṣu is a transfer from this to the ī-declension.

# 5. a. Radical ū-stems.

LANMAN, Noun-Inflection 400-419. - WHITNEY, Grammar 348-352.

382. This declension comprises strictly speaking only m. and f. stems; for the few distinctively n. forms which occur are made only from stems in which the  $\bar{u}$  is shortened and which therefore in form belong to the  $\bar{u}$ -declension. The normal endings, as they appear in the inflexion of consonant stems, are taken throughout. The G. pl., however, adds the ending  $-n\bar{a}m$  to compound stems<sup>1</sup>; and the N. sing. always has -s.

This declension contains seven monosyllabic stems, one of which is m., five f., and one m. and f.; two reduplicated f. substantives and one adjective; and about 60 compounds, almost exclusively adjectives, made with the roots jū- 'speed', dyū- (diu-) 'play', pū- 'purify', bhū- 'be', śū- 'swell', sū- 'bring forth', hū- 'call', and with the modified forms krū-, gū- 'go', drū- 'run', snū- 'drip', which may be treated as roots. The stems occurring are: I. monosyllables: m. jú- 'speeding', 'steed', sū- 'begetter'; f. dū- 'gift', bhú- 'earth', bhrú- 'brow', sti- 'mother', syti- 'thread' (VS.), srti- 'stream'. 2. reduplicated stems: juhū- 'tongue', juhū- 'sacrificial spoon', jogū- 'singing aloud'. 3. compounds (in the alphabetical order of the roots):  $ap\bar{t}$ - $j\dot{u}$ -'impelling',  $ka\dot{s}o$ - $j\dot{u}$ -'hastening to the water (?)', N. of a man, dhī-jū- 'inspiring the mind', nabho-jū- 'cloudimpelling', mano-jh- 'swift as thought', yātu-jh- 'incited by 'demons', vayo-jh-'stimulating strength', vasū-jū- 'procuring goods', viśva-jū- 'all-impelling', sadyo-jú- 'quickly speeding', senā-jū- 'swift as an arrow'. — eka-dyū- m. N. of a seer, kama-dyá- f. N. of a woman. — agre-pú-2 'drinking first', uda-pú-'purified by water', keta-pú- (VS. TS.) 'purifying the will', ghṛta-pú- 'clarifying ghee', madhu-ph-'purifying itself by sweetness', vāta-ph-'purified by the wind', viṣṇā-pū- m. N. of a man, su-pū- 'clarifying well', sva-pū- 'broom'. — anābhū- 'disobedient', abhi-bhū- 'superior', ā-bhū- 'present', pari-bhū- 'surrounding', punar-bhú- 'being renewed', puro-bhú- 'being in front', pra-bhú- 'excelling', mayo-bhû- 'causing pleasure', vi-bhû- 'far-extending', viśvū-bhû- 'being everywhere', viśvá-śambhū- 'beneficial to all', śam-bhū- 'beneficent', saca-bhū- 'associate', su-bhú- 'good', svayam-bhú- 'self-existing', sv-ābhú- 'helping well'.  $sur\bar{a}$ - $s\dot{u}$ - 'exultant with liquor'. — a- $s\dot{u}$ - 'not bringing forth', a- $s\bar{u}$ s $\dot{u}$ - (AV.) 'barren', nava-sú- 'having recently calved', pūrva-sú- 'bringing forth first', prā-sú-'bringing forth', yama-sú- 'bringing forth twins', raha-sú- 'bringing forth secretly',  $r\bar{a}ja$ -sú-'king-creating', visva-sú-'all-generating',  $v\bar{\imath}ra$ -sú-'herobearing', sakṛt-sú- 'bringing forth once', su-sú- 'bringing forth easily'. — ā-hú-'invoking', u-há-3 'crying aloud', varṣā-há- (VS.) f., sumna-há- (TS.) 'invoking favour', su-hú- (VS.) 'invoking well'. — mitra-krú- f. a kind of demon. agre-git-4 'moving forwards'. — raghu-drú- 'running swiftly' 5. — ghrta-snú-'dripping ghee'6.

a. Vocalic pronunciation. Before vowels the  $\bar{u}$  has regularly a vocalic value in pronunciation. In monosyllabic stems it is always written as -uv; generally also in compounds even when preceded by a single consonant. In the minority of compounds (some 9 stems in the RV.) it is written as v, but pronounced as a vowel. In the latter instances it is always given as u below; e. g.  $vibhv\bar{a}$  as  $vibhu\bar{a}$ .

b. Accentuation. Except in the monosyllabic stems, which follow the general rule, the accent remains throughout on the same syllable, which is almost always the radical one.

r The monosyllabic and the reduplicated stems, on the other hand, added -ām, as far as can be inferred from bhuvām and jóguvām, the only examples which occur.

<sup>&</sup>lt;sup>2</sup> - $p\bar{u}$ - here = - $p\bar{a}$ - 'drink'.

<sup>3</sup> Perhaps an onomatopoetic word.

<sup>4 -</sup> $g\bar{u}$ - here =  $g\bar{a}$ - 'go'.

<sup>5</sup> Cp. Lanman 402.

<sup>6</sup> About a dozen of the above compounds (all but 3 or 4 of them being formed with bhū-) also shorten the final of the stem, which is then inflected like an ž- stem.

#### Inflexion.

383. The inflexion is identical in the m. and f. Several of the cases do not occur at all in the m., viz. Ab. L. V. sing., I. D. Ab. G. L. du., D. Ab. pl. In the monosyllabic stems several cases are wanting in both genders, viz. A. D. V. sing., and all the cases of the pl. except the N. A. G. The forms actually occurring, if made from bhû- f. 'earth' and the adjectives ā-bhā- 'present' and vi-bhā- 'far-reaching', would be as follows:

1. Sing. N. bhás. I. bhuvá. Ab. bhuvás. G. bhuvás. L. bhuví (VS.). Du. N. bhíwā. I. bhūbhyām (VS.). L. bhuvss. Pl. N. bhíwas.

G.  $bhuv\bar{\iota}m$  (VS.).

2. Sing. N. ābhás; vibhás. A. ābhúram; vibhúam. I. ābhúvā; vibhúā.

D. ābhúve; vibhúc. Ab. f. vibhúas (AV.). G. m. ābhúvas.

Du. N. A. ābhúvā. Pl. N. ābhúvas; vibhúas. A. m. f. ābhúvas; f. vibhúas. I. m. f. ābhābhis. G. m. f. ābhānām. L. m. f. ābhāsu.

The forms actually occurring are:

Sing. N. m. jús (VS. IV. 17), sús; eka-dyús. – uda-pús (AV.), keta-pús (VS. IX. I; TS. IV. I. I<sup>3</sup>), madhu-pús (AV.), vāta-pús (AV.). — abhi-bhús, pari-bhús, puro-bhūs, pra-bhūs (AV.), mayo-bhūs, vi-bhūs (AV.), viśvá-śambhūs, śam-bhūs (VS. AV.), sacā-bhūs, su-bhūs (VS. AV.), svayam-bhūs. — sumna-hūs (TS. IV. 6. 34), su-hás (VS. 1. 30) 'invoking well'. — f. bhás, sás, syás (VS. v. 21); juhás (AV. VS.). — kama-dyńs. — abhi-bhńs (AV.), punar-bhńs, pra-bhńs (VS. AV.), mayobhis, sam-bhis (AV.). — pra-sis (AV.), yama-sis, raha-sis, vīra-sis, su-sis. varṣā-hás (VS. XXIV. 38) 'frog'.

A. m. 1. kaśo-júwam, mano-júwam, wasū-júwam; abhi-bhúwam (AV.), ā-bhilvam, mayo-bhilvam, visvá-sambhuvam, sambhilvam, sacā-bhilvam, svābhúvam; 2. viṣṇī-púam; vi-bhúam, su-bhúam. — f. juhúam 'sacrificial spoon'; I. kama-dyúvam, visva-júvam, sacā-bhúvam; 2. a-súam<sup>1</sup>, visva-súam (AV.),

sakrt-silam.

I. m. 1. mano-júvā, senā-júvā, sv-ābhúvā; 2. vi-bhúā. — f. bhuvá; juhúā 'tongue' and 'spoon'; I. punar-bhiivā (AV.), mayo-bhiivā (TS. I. 8. 31; VS. III. 47). — n. i. mayo-bhíivā; 2. su-piiā (VS. I. 3).

D. m. 1. abhi-bhúre, vi-bhúre (VS. XXII. 30), viśvā-bhúve, sacā-bhúve;

2. visnā-pue, vi-bhue, su-bhue.

Ab. f. bhuvás; a-sūsúas (AV.). — G. m. śam-bhúvas, sacā-bhúvas². —

f. bhuvás. — L. f. bhuví (VS.). — V. f. júhu (AV.).

Du. N. A. m. mano-júvā; mayo-bhúvā, śam-bhúvā, sacā-bhúvā; ghṛtasnúvā3. — f. srúvā; apī-júvā; punar-bhúvā, viśvá-sambhuvā, viśvá-sambhuvau (VS. x. 9), śambhúvā, sacā-bhúvā. — I. f. bhrūbhyám (VS.). — L. f. bhruvós.

Pl. N. m. júvas; 1. á-duvas, ā-bhúvas, u-húvas, nabho-júvas, pari-bhúvas, mano-jiwas, mayo-bhiwas, raghu-driwas, wayo-jiwas, sam-bhiwas, V. sacabhuvas (VS. III. 47), sadyo-júvas, su-bhúvas, sv-ābhúvas 4; 2. vi-bhúas, su-bhúas; surā-śúas. — f. dúvas, bhiwas; juhúas 'tongues' and 'spoons'; 1. V. agre-guvas (VS.), V. agre-puvas (VS.), dhī-jiwas, punar-bhiwas, mayo-bhiwas, mitra-kriwas; V. viśva-śambhuvas (VS. IV. 7); 2. ghṛta-phas, nava-shas, pra-shas, vi-bhhas, su-bhilas.

A. m. án-ābhuvas, mayo-bhúvas. — f. dúvas, bhúvas; ā-bhúvas, ā-húvas,

The transition form a-sum (VS.) under the influence of the derivative ī-stems also occurs. The form ayogum (VS. xxx. 5) is u-declension a-prayuvas, madhyayuvas, mitraperhaps of the same kind.

<sup>&</sup>lt;sup>2</sup> The AV. has also the transition form punar-bhúv-ās.

<sup>3</sup> Cp. LANMAN 413 (middle).

<sup>4</sup> There are also the transfers from the yúvas, śramayúvas.

<sup>5</sup> In II. 143 jus is perhaps contracted for jūas.

ghṛta-suhvas, mayo-bh'was, sanā-jilwas; pra-suas, rāja-s'ias (VS. x. 1) 'king-creating', vi-bh'ias'.

I. m. ā-bhábhis. — f. juhábhis 'tongues' and 'spoons'; sva-pábhis.

G. m. jóguvām; yātu-júnām. — f. bhuvām² (VS. XXXVII. 18); pūrva-sánām.

L. m. ā-bhūṣu, puru-bhūṣu 'appearing to many'. — f. pra-sūṣu.

### 5. b. Derivative u- stems.

LANMAN, Noun-Inflection 400-419. - WHITNEY, Sanskrit Grammar 355-359, 362-364.

384. This declension is almost entirely restricted to f.3 stems, which (like the derivative or B group of the radical 7- declension) accent the final vowel and in inflexion are practically identical with the radical stems. The f. stems which it comprises may be divided into two groups. The first contains about 18 oxytone f. substantives corresponding in several instances to m. or n. stems in -u accented on the first syllable: a-grú- (m. á-gru-) 'maid', kadrú- (m. kádru- 'brown') 'Soma vessel', kuhú- (AV.) 'new moon', guggul: (n. gˈ/ggulu-) (AV.) N. of an Apsaras, guigti- N. of a goddess. camá- 'bowl', jatá- (n. jatu-) (AV. VS.) 'bat', tanú- 'body', dhaná- (dhánu-) 'sandbank' (AV.), nabhanú- 'well', nrtú- 'dancer', prdūkú- (m. pṛdūku-) 'serpent' (AV.), prajanú- (AV.) 'organ of generation', vadhú- 'bride', śvaśrú- (m. śváśura-) 'mother-in-law', sarany.'- N. of a goddess; also kyámbū-4 (n. kiyámbu-) an aquatic plant (AV.). The second group comprises oxytone f. adjectives corresponding to m. oxytones: amhová- 'troublesome', aghīyá- 'malicious', apasy 1- 'active', abhi-dipsii- 'wishing to deceive', arasy ii- 'desiring favour', asita-jñú- (AV.) 'black-kneed', āyú- 'active', udanyú- 'seeking water', caranyú-'movable', cariṣṇū- 'moving', jighatsū- 'hungry', tanā- 'thin', didhiṣū- 'wishing to gain', dur-haṇāy t- 'meditating harm', duvasyti- 'worshipping', devayti- (VS.) 'devoted to the gods', dravitnú-'speeding', patayālú-'flying', panasy í- 'glorious', pārayiṣṇā- 'victorious', prtanīyā- 'hostile', pṛṣanāyā- 'tender', phalgā- 'reddish', babhrú- 'reddish brown', bībhats.í- 'loathing', makhasyú- 'cheerful', madhú-5 'sweet', mandrayú- 'gladdening', mahīyú- 'joyous', mumukṣú- 'wishing to free', vacasyú- 'eloquent', vi-panyú- 'admiring', śundhyú- 'radiant', san.īyú-'wishing for gain', sūdayitná-'yielding sweetness'; also su-drá-'having good wood' (dru-)6.

a. Vocalic pronunciation. Before vowels the  $-\bar{u}$  has almost invariably a vocalic value in pronunciation. It is written as uv in the substantives  $a_S r \bar{u}$ - and  $ka_d r \bar{u}$ -, and in adjectives when the  $-\bar{u}$  is preceded by y, also in  $b\bar{v}bhats\bar{u}$ -7. Otherwise though always written as v it is (except four or five times at the most in the RV.)8, here also to be pronounced as a vowel. Hence the forms written in the Samhitā with simple v are given below with u.

b. Accentuation. The derivative  $\bar{n}$ -stems not only accent the final syllable 9 but

2 In the V. víśvāsām bhuvām pate.

5 The corresponding m. in this instance is not oxytone, mádhu-.

7 This is the regular practice in the TS. even when a single consonant precedes the  $-\bar{u}$ , e. g. tanúv-am; cp. IS. 13, 105 f.

8 tanvàs 3 times, camvòs once, tanvàm perhaps once; cp. Lanman 408 (top).

9 Except the f. kyāmbū- (AV.) and the two m. Bahuvrihis átapta-tanū- and sárva-tanū-.

v VS. XXIV. 25 has the form scar-pins a kind of bird.

<sup>3</sup> There are only five m. forms: N. prāšūs 'guest', ātapta-tanūs 'whose body is not cooked', sārva-tanūs (AV.) 'whose body is entire'; A. kṛka-dūšūam a kind of demon; I. pl. makṣūbhis 'swift'.

<sup>4</sup> This is the only f. stem in this declension not accented on the final vowel; but TA. vt. 4<sup>th</sup> has the normally accented kyāmbū.

<sup>6</sup> Also as a substantive f. 'good beam'. BR. and pw. however regard su-drúam as A. of a m. substantive su-drú- 'starkes Holz'.

retain the accent on that syllable throughout their inflexion. In this respect they agree with the B group of the radical 7- declension and differ from the ordinary derivative

c. Transition forms. There is an incipient tendency here to be affected by the analogy of the derivative i-stems. The only certain example in the RV. is the L. śwaśruam (x. 8546) for \*śwaśrui; the I. dravitnua is perhaps another instance I. But the AV, has at least 10 such forms: A. kuhūm, tanūm, vadhūm; D. agrivai, vadhvai, švašruai; Ab. punar-bhivās; G. urvāruās² 'gourd', prdākuās, śvašruās; L. tanūām. The VS. has A. pumscalum, D. tanvai, G. tanvas.

### Inflexion.

385. In the L. sing. the -i may be dropped in the RV. In the later Samhitās -m sometimes appears in the A. for -am, and -ai, -ās, -ām are occasionally taken as the endings of the D. G. L. respectively. The ending -ām appears once in the RV. also. The forms actually occurring, if made from tanú- f. 'body', would be as follows:

Sing. N. tanús. A. tanúam. I. tanúā. D. tanúe. Ab. tanúas. G. tanúas.

L. tanúi and tanú. V. tánu.

Du. N. A. tanúā. D. tanúbhyām. L. tanúos.

Pl. N. tanúas. A. tanúas. I. tanúbhis. D. tanúbhyas. G. tanúnām. L. tanúsu.

The forms actually occurring are:

Sing. N. m. prāśńs, á-tapta-tanūs, sárva-tanūs (AV.). — f. asita-jñús (AV.), kuhús (TS. AV.), kyámbūs 3 (AV.), guggulús (AV.), gungús, jatús (VS.), tanůs, dhanůs (AV.), nrtůs, patayālůs (AV.), prdākůs (AV.), phalgůs (VS. XXIV. 4), madhús (AV.), vadhús, śundhyús, śvaśrús, saranyús.

A. m. krkadāśúam4. — f. cariṣnúam, jighatsúam (AV.), tanúam5, prdākúam6 (AV.), vadhúam, su-drúam1; avasyúvam, dur-haṇāyúvam, devayúvam (VS. I. 12), makhasyúvam, vacasyúvam, śundhyúvam, su-drúvam (SV.). - With ending -m for -am: kuhûm (TS. AV.), tanûm (TS. AV.), puṇscalám (VS. XXX. 5), vadhám (AV.; Kh. IV. 51).

I. f. tanúā<sup>8</sup>, vadhúā; duvasyúvā. — D. f. tanúe<sup>9</sup>. — With ending -ai: agrílvai (AV.), tanvài (VS. XXIII. 44), babhrvái (VS. XX. 28), vadhvái (AV.), śvaśruái (AV.). — Ab. f. kadrúvas; tanúas.

G. f. agrilvas, sundhyilvas; tanilas 11, vadhilas. — With ending -ās: tanvās (VS. III. 17), prdākuās (AV.), svasruās (AV.).

L. f. camúi, tanúi 2. — Without ending: camú 3, tanú 4. — With ending -ām: śvaśruźm; tanvām 15 (AV.), tanúvām 10 (TS. 1. 7. 122).

V. f. bábhru, vádhu.

- ending as in the derivative z- declension; cp. Lanman 404.
  - <sup>2</sup> See Lanman 4111.
- 3 The TA. has the normal accentuation kyāmbū-; the corresponding stem in the RV. is *kiyāmbu*- n.
- 4 That the word is m. is probable because sárvam seems to agree with it (1. 297). The A. m. ábhīruam 'fearless' is a transfer from the u- declension.
- 5 The AV. has tanvàm once, tanúam 16 times. The TS. regularly has tinúvam (I. 8. 102, etc.).

6 The Mss. all read prdakvám; see WHITNEY'S note on AV. X. 417.

- wood'; as a subst. in X. 288 'good beam'.
- 7 As an adj. in VII. 3220, 'made of good

<sup>1</sup> Because the accent is shifted to the times. The TS. has tanúvā (I. I. 10<sup>2</sup> etc.) In RV, x. 241 camū is once perhaps a contracted I.; see LANMAN 409.(top).

9 The AV. has tanue 6 times, tanvè 7 times. The TS, has tanuve.

10 The AV, has vadhvái and vadhvái once

11 The AV. has tanúas 10 times, tanvàs 4 times. The TS. has tanúvas.

12 Three or four times tanúi, metrically lengthened (the Pada has i); cp. LANMAN 41 I (bottom). The TS. (IV. 3. 131) has tanúvi.

13 camú occurs 6 times, camúi once.

14 tanú occurs once, tanúi 3 times. 15 This should doubtless be read tanvām; see Lanman 412.

16 This form in TS. IV. 2. 63 is a variant 8 The AV. has tanúā 4 times, tanvā 5 | for the G. sing. tanvàs of RV. X. 9710.

Du. N. A. f<sup>1</sup>. camhā, tanhā. — D. f. hanhbhyām<sup>2</sup> (TS. VII. 3. 16<sup>1</sup>). —

- Pl. N. f. 1. agrivas; camias, jatias (AV.), tanias 4, praikias (AV.). prajanúas (AV.). — 2. amho-y'was, apasyúvas, avasyúvas, āyúvas, udanyúvas, caranylivas (AV.), didhishas, panasylvas, pārayisnhas, prtanāylvas, pršanāylvas, bibhatsiwas, makhasyiwas, mandrayiwas, mahtyiwas, mumuksiias, sanāviiwas, sūdavitnias. — yuva-yis (IV. 418), agreeing with N. f. dhiyas, appears to be a contracted form for -y/\(\hat{n}\)-as 5.
- A. f. 1. agrivas; tanhas<sup>6</sup>, nabhanhas, vadhhas<sup>7</sup>. 2. abhi-dipshas. dravitnias; vi-panyivas, śundhyiwas. — I. m. maksúbhis. — f. tanúbhis. — D. f. tanúbhyas. — G. f. 1. tanúnām, vadhúnām — 2. aghāyúnām 10 (AV.), babhránām, bībhatsánām.
  - L. f. 1. camūsu, tanūsu. 2. babhrūsu.

### 6. a. Radical u- stems.

386. There are not many u- stems derived from roots originally ending in -u, as several of these (about nine) have joined the consonant declension by adding the determinative -t11. Some eight stems are, however, formed from roots in -u, all of them but one (dy/t-) being compounds. These are: dyli- 'day', abhl-dyu- 'heavenly'; mitá-dru-12 'firm-legged', raghu-drli- 'running swiftly'; á-prā-yu-13 'assiduous'; ádhri-gu-14 'irresistible', vanar-gú-'forestroaming'; su-stil- 'highly praised' 15. There are besides some 12 stems in which u is radical in a secondary sense as representing the shortened form of the vowel of three roots ending in -ū 16. These are: dhī-ji/- 'inspiring the mind', from jū- 'impel'; su-pú- 'clarifying well', from pū- 'purify'; and compounds of bhū- 'be': á-pra-bhu- 'powerless', abhi-bhú- 'superior', ā-bhú- 'empty', ud-bhú- 'persevering', pari-bhú- 'surrounding', puru-bhú- 'appearing in many places', pra-bhú- 'powerful', mayo-bhú- 'delighting', vi-bhú- 'far-extending'. śam-bhú- 'beneficent', su-bhú- 'good'.

387. The inflexion of these words is identical with that of derivative

u- stems. Forms which occur are the following:

Sing. N. m. ádhri-gus, á-pra-bhus, pra-bhús, mayo-bhús, mitá-drus, vanar-gús, vi-bhús, śam-bhús $^{17}$ . — n. á-pra-bhu, á-prāyu, ā-bhú, ud-bhú (AV.), pra-bhú, mayo-bhú, raghu-drú, vi-bhú, śam-bhú, su-bhú.

A. m. ádhri-gum, abhí-dyum, abhi-bhúm (AV.), ā-bhúm, pra-bhúm, vi-bhúm 18. I. m. mayo-bhinā. — n. su-pinā (AV.).

There are also two m, transfers from the u- declension, madhūyuvā and paśvā; the stem vowel (Pada ŭ). cp. Lanman 403 and 413 (mid).

<sup>2</sup> This is really a transition form from the derivative u- declension.

3 camúos occurs 14 times, camvos possibly once (IX, 9621).

4 Once tanvàs; see LANMAN 408 (top). The TS. has tanúvas.

5 On ratha-yús (x, 705) standing possibly for  $-y\bar{u}s = y\bar{u}$ -as, see Lanman 4152.

6 RV. 20 times, AV. 3 times tanúas; RV. twice, AV. once tanvàs. The TS. has tanúvas. On Weber's conjecture (IS. 13, 58) viśvàs as A. pl. of \*viśū- see Lanman 4163.

7 The Mss. of the AV, once read badhvàs

(= vadhúas).

8 On ratha-yús (VII. 25) for  $-y\ddot{u}s = y\ddot{u}as$ , see Lanman 4163. The VS. (XXI. 25) has jatus. 9 This is only a metrical lengthening of

10 Cp. LANMAN 4183.

11 See above, stems in derivative -t (307). 12 From dru- 'run'. On sádru- see WHIT-NEY's note on AV. XV. 71.

13 From yu- 'separate', 'keep away'.

- 14 'going unrestrained', from gu- 'go' =  $g\bar{a}$ -. 15 The words sabar-dhu- 'yielding nectar', and a-smrta-dhru- 'not caring for enemies', seem to be compounded with -duh (-dhuk)
- and -druh (-dhruk: see pw.). 16 They are therefore transfers from the radical u- declension, all the N. A. neuters of which are thus formed.
- 17 sabar-dhús (VS. V. 26; Kh. IV.  $5^{20}$ ) = sabar-dhuk.
  - 18 sabar-dhum A. f. = sabar-duham.

D. m. ádhri-gave, abhi-dyave.

G. m. pra-bhús, su-stús. — L. n. ud-bháu (VS. XV. 1), mitá-drau.

V. m. adhri-go, pra-bho (AA. IV.  $I = Kh. V. 4)^{T}$ .

Du. N. A. V. m. ádhri-gū², abhi-dyū (Kh. I. 3<sup>4</sup>), pari-bhú (AV.), purubhū, puru-bhū, vanar-gū, sam-bhū, sam-bhū.

Pl. N. m. ádhri-gāvas³, abhí-dyavas, dhī-jávas, mitá-dravas⁴, vi-bhávas,

V. ví-bhv-as5. — n. mayo-bhú. A. m. mayo-bhūn, dyūn, vi-bhūn (VS. xx. 23).

I. m. dyúbhis; á-prā-yubhis, abhí-dyubhis, vanar-gúbhis (AV.), vi-bhúbhis.

### 6. b. Derivative u- stems.

LANMAN, Noun-Inflection 400-419. — WHITNEY, Sanskrit Grammar 335-346.

388. This declension embraces a large number of nouns of all genders. The masculine stems greatly preponderate, being about four times as numerous as the feminine and neuter stems taken together; while the neuters considerably outnumber the feminines. Thus the N. and A. sing, are formed by about 430 stems in the m., by 68 in the n., and by 46 in the f. in the RV. The normal inflexion which is practically the same in all genders, except the N. A. sing. du. pl. n., is closely parallel to that of the i- stems (380). The stem takes Guna in the same cases; but while in the i- declension only one word (ari-) ever uses the unmodified stem, 8 or 9 words may do so here. The endings, too, are closely analogous; but while in the i-declension the ending of the L. sing. is always dropped, it is here retained in several words; and while the n- declension has affected only the I. sing. of the ideclension, it has here affected all the other cases of the singular which take vowel endings. Finally, the accentuation is exactly parallel to that of of the i- stems.

a. Adjectives in -u often use this stem for the feminine also; e.g. caru- 'dear'; otherwise they form the f. in -ū, as tanú- m., tanú- f. 'thin'; or in -ī, as urú- m., urv-t- f. 'broad', pṛthú- m., pṛthv-t- f. 'broad', bahú- m., bahv-t- f. 'much', mṛdú- (AV.) m., mṛdv-t- (VS.) f. 'soft'.

b. The 8 stems which are analogous to ari- in having forms that attach the normal endings to the unaltered stem are: paśú-, pitú-; křtu-, krátu-, mádhu-, vásu-, śiśu-,

sahásra-bāhu-.

c. Oxytone stems when the final vowel is changed to z, throw the accent on a following vowel not as Svarita but as Udātta; they also shift it to the -nām of the G. pl. even though the stem vowel does not in that case lose its syllabic value; e.g. paśū-nām.

d. Transition forms. 1. There are in the RV, only three forms which follow the analogy of the derivative I- declension: D. isv-ai, G. isv-ās, su-vāstv-ās, all in late passages; the AV. also has rájjv-ām<sup>6</sup>. — 2. Transitions to the  $\bar{n}$ - declension appear in the A. á-bhīvam, from á-bhīvu-, and in several words formed with the suffix -yu which make their N. pl. or du. as -yuvas, -yuvā. — 3. Besides some 46 I. forms m. and n. sing., there are several transitions to the n-declension in the remaining cases of the sing., all neuter forms (except the m. G. carunas): D. madhune; Ab. madhunas, sanunas; G. carunas, danunas, drunas, madhunas, vásunas; L. ayuni, sanuni; also a few other forms from the later Samhitas.

#### Inflexion.

389. The N. sing. m. f. always takes -s, the A. simply -m. The D. Ab. G. sing. sometimes attach the normal endings to the unmodified stem; but

5 See LANMAN 4142.

In the f. V. prthu-sto 'broad-tufted', the the radical  $\bar{u}$ - declension  $\hat{a}$ -prayuvas, raghudriwas. u of the stem stu =  $stuk\bar{a}$ - 'tust' may be radical.

² á-smṛta-dhrū = ásmṛta-druhā. 3 For adhri-gavas owing to the false ana-

<sup>6</sup> The Mss. in AV. VI. 1212 read rájvām. logy of gavas 'cows'. the only form of this word which occurs in 4 There are also the forms according to the RV. is the N. sing. rájjus.

they generally gunate the stem, which then adds only -s instead of -as in the Ab. G. The L. sing. sometimes gunates the stem and adds -i, but generally takes Vrddhi without an ending. The V. always gunates the stem. The N. pl. m. f. nearly always gunates the -u, to which the normal ending -as is added. The A. pl. in the m. adds -n, in the f. -s, before which the vowel is lengthened. The G. pl. always takes -nām, lengthening the preceding vowel. The N. A. V. du. m. f. have no ending, simply lengthening the final vowel. The adjective mádhu- 'sweet' may be used to illustrate the forms actually occurring:

Sing. N. m. f. mádhus, n. mádhu. A. m. f. mádhum, n. mádhu. I. m. f. n. mádhvā, m. n. mádhunā. D. m. f. n. mádhave, m. mádhve. Ab. m. f. n. mádhos. m. n. mádhvas, n. mádhunas. G. m. f. n. mádhos, m. n. mádhvas; n. mádhunas. L. m. f. n. mádhau, m. n. mádhavi, n. mádhuni. V. m. f. mádho, n. mádhu.

Du. N. A. V. m. f. mádhū, n. mádhvī. I. m. mádhubhyām. D. m. mádhubhyām. Ab. m. n. mádhubhyām. G. m. mádhvos, n. mádhunos (AV.). L. m. f. mádhvos.

Pl. N. V. m. f. mádhavas; mádhvas. N. A. n. mádhū, mádhu; mádhūni. A. m. mádhūn; mádhvas, f. mádhūs; mádhvas. I. m. f. n. mádhubhis. D. m. f. n. mádhubhyas. Ab. m. f. mádhubhyas. G. m. f. n. mádhūnām. L. m. f. n. mádhusu.

The forms actually occurring are the following:

Sing. N. m. This form is very frequent, being made from 250 stems in the RV. and occurring nearly 900 times. The commonest examples are: índus (64) 'drop', vísnus (34) 'Visnu', su-krátus (32) 'skilful', vásus (25) 'good', ketús (23) 'brightness', rbhús (21) 'deft', vāyús (20) 'wind', viśváyus (18) 'kind to all men', sūniis (18) 'son', sindhus (17) 'river', carus (16) 'dear', asmaylis (16) 'desiring us', devayus (15) 'devoted to the gods', mánus (15) 'man'. isus 'arrow', otherwise f., is once (VIII. 667) m.

a. The form yús 'moving' is perhaps a corruption in VIII. 18<sup>13</sup>, where BLOOMFIELD (JAOS. 1906, p. 72) would read, for rinisīsta yúr, rinisīstāyūr = rinisīsta āyūr.

b. In VII. 863 didiksupo perhaps stands for didiksus+upo; but the Pada reads didykşu, and desiderative adjectives otherwise accent the final syllable; cp. LANMAN 405 (bottom).

- f. This form is made from 31 stems and occurs 73 times in the RV. The commonest examples are dhenis (22) 'cow', sindhus (11), sárus (4) 'arrow', vasūyús (3) 'desiring goods', isus (2), gūtús (2) 'course', cárus (2), jīvātus (2) 'life' 1.
- N. A. n. This form, which has no ending, is made from 68 stems and occurs over 400 times in the RV. The commonest examples are mádhu (77) ('sweetness'), vásu (77) 'wealth', urú (51) 'wide', cáru (27), sánu (18) 'summit', pṛthú (15) 'broad', tri-dhấtu (13) 'threefold', purú (13) 'much'. The RV. once has pásu and the VS. (XXIII.30) pasú 'animal'. In other Samhitās occur tálu (VS.) 'palate', trápu (AV. VS.) 'tin'.

a. The final -u is metrically lengthened in purt (12 times), mithu (twice) 'wrongly',

and  $ur\tilde{u}$  (once)<sup>2</sup>.

b. The metre seems to require the forms  $\tilde{a}yu$  (III. 49<sup>2</sup>),  $jar\tilde{a}mrtyu$  (AV. XIX. 30<sup>1</sup>), jiṣṇii (AV. III. 191), pārayiṣṇii (AV. VIII. 228), bahii (AV. XX. 13512), instead of the corresponding forms with -s, ayus etc., of the Samhita text.

A. m. This form is made from 179 stems and occurs over 700 times in the RV. The commonest examples are: krátum (55) 'ability', ketúm (34), gātúm (33) 'course' and 'song', Indum (27), sísum (26) 'child', síndhum (22),

LANMAN 406 enumerates the stems which <sup>2</sup> The Pada text here always has puru, form this N. mithú, urú. Cp. RPr. VII. 9, 19, 31; IX. 3.

ลิร์น์ท (20) 'swift', นาน์ท (18), manyún (18) 'wrath', บลิงน์ท (18), amร์น์ท (17) 'shoot', sūnim (17), dásyum (15) 'fiend', pasiim (15), bhānim (15) 'lustre', hujvúm (15) N. of a man, sátrum (15) 'enemy'.

f. This form is made from 15 stems and occurs 50 times in the RV.: á-dhenum 'yielding no milk', aruná-psum 'of ruddy appearance', isum, krúmum N. of a river, cárum, jásum 'resting-place', jigatnúm 'speeding', jīrádānum 'sprinkling abundantly', jīvātum, dhanum 'sandbank', dhenim, bhujvim 'viper',

vasūyum, śárum, sindhum.

- I. m. This case is formed in two ways. I. Four stems in the RV. add the normal ending -a, before which the -u is almost invariably pronounced as  $v: paras v - \acute{a}$  'axe',  $pas v - \acute{a}$ ;  $kr \acute{a} t v - \vec{a}$ ',  $s' \acute{s} v - \vec{a}$ . Owing to the influence of the x-declension 30 stems in the RV. add  $-n\bar{\alpha}$  instead of the normal  $-\bar{\alpha}$ : amsiinī, aktiinā 'light', an-āsiinā 'not swift', a-bandhiinā 'kinless', indunā, isunā (Kh. IV. 73)2, urunā, rjunā 'straight', rtunā 'fixed time', ketimā, krátunā3, cetinā 'heed', jisninā 'victorious', tri-dhātunā, dhūmá-ketunā 'smokebannered', dhṛṣṇ'mā 'bold', paśinā, bhāninā, manunā, manyinā, ripinā 'deceiver', vagn'ınā 'roar', vahatunā 'bridal procession', vāyunā, vi-bhind'unā 'splitting', viṣṇunā, vṛṣa-psunā 'of strong appearance', sādhinā 'straight', sucet'nā 'benevolence', sétunā (TS. III. 2. 2 1) 'bridge', stanayitn'nā 'thunder', snúnā 5 'summit'.
- f. This form is made from 7 stems in the RV. by adding the normal ending  $-\bar{a}$ , before which the u is pronounced as a vowel in five stems: cikitvå (AV.), panvá 'praise'; á-dhenvā, iṣvā (AV.; Kh. IV. 5 3 1), mádhvā, mehatnvá N. of a river, rájjvā (AV.) 'rope', sárvā, su-sártvā N. of a river, hánvā 'iaw'.
- a. Six oxytone stems and also mithu- form instrumentals with interposed -y-; they are used adverbially with shift of accent to the ending: anu-s. huyā immediately', amuyā 'thus', āśuyā 'quickly', chrsnuyā boldly', raghuyā 'swiftly', sīdhuyā 'rightly'; mithuyā 'falselv'.
- n. This case is made in two ways. 1. The normal ending  $-\bar{a}$  is added directly to the stem. Of this formation there is only one example: mádhvā4 'honey'. — 2. Owing to the influence of the n-declension 15 stems in the RV. add -nā: urúṇā, kṛdhúnā 'defective', ghṛtá-snunā 'dripping with ghee', jarāyuṇā 'after-birth', titaünā 'sieve', trṣuṇā 'greedy', tri dhātunā, dānunā 'fluid', drimā' 'wood', dhrsninī, purūrinā 'far and wide', prthinī, mádhunī, vásun t, sanunā, svādunā 'sweet'.
- D. m. This case is formed in two ways. 1. The ending -e is added to the unmodified stem in three words in the RV.: krátve<sup>6</sup>, sísve, sahásra-bāhve<sup>7</sup> 'having a thousand arms'. — 2. The ending e is added to the gunated final vowel in over 60 stems in the RV. The commonest examples are: mánave (36), vāyáve (23), visnave (13), manyáve (12), āyáve (10) 'living', sūnáve (10), dásyave (9), ripáve (7), mrtyáve (6) 'death', pūráve (5)8 'man'.
- f. This case is made in the same way as the second form of the m. from only three stems in the RV.: jīvātave, dhenāve, śārave.
  - n. This case is formed in three ways. 1. The ending -e is added to the

Twice out of 59 occurrences pronounced krátuā. The form krátvā occurs VS. xxx!!!. tuated as monosyllabic stems because they 72 and twice in the Khilas (III. 162; v. 63); are the reduced form of the dissyllables and in Kh. 1v.536 kartvá is perhaps meant sánu- and dáru-. for krátvā.

<sup>&</sup>lt;sup>2</sup> For the işvā of AV. v. 54.

<sup>3</sup> The form krátunā occurs 12 times, krátvā 59 times, in the RV.

<sup>4</sup> This form also occurs in VS. xx. 56 etc., TS. IV. I. 81 (twice) and Kh. V. 64.

<sup>5</sup> The words snú- and drú- are not accen-

<sup>6</sup> krátve also occurs VS. xiv. 8; xxxviii. 28.

<sup>7</sup> Pronounced -bahue.

<sup>8</sup> Lanman 409 enumerates the stems which take this dative.

unmodified stem in one word:  $p\acute{a}\acute{s}v\text{-}e^{\imath}$ . — 2. The ending -e is added to the gunated stem in two words:  $ur\acute{a}ve$ ,  $vi\acute{s}v\acute{a}yave$ .

3. Owing to the influence of the *n*-declension -ne is added to the stem in one word in the RV.: mádhune. The AV. also has kasípune 'mat'.

Ab. m. This case is formed in two ways. I. The normal ending -as is added to the unmodified stem in one word only: pitv-ás 'draught'. — 2. The ending -s is added to the gunated stem in 20 words in the RV.: amhôs 'distress', adhvaryôs 'officiating priest', rt's, krśános N. of a divine archer, ksipanôs 'archer', gántos 'course', tanayitnôs 'thundering', tanyatôs 'thunder', devayôs, ninitsôs 'wishing to blame', pūrôs, babhrôs (Kh. v. 15<sup>11</sup>) 'brown', manyôs, mrtyôs, ririkṣôs 'wishing to injure', vanisthôs 'intestine', vāyôs, viṣṇos, śátros, síndhos, snôs.

f. This case is made in the same way as the second form of the m. The only two examples are: dhános and vástos 'dawn'. There is also one transition form due to the influence of the  $\bar{\tau}$ - declension:  $/sv-\bar{a}s$ .

n. This case is made in three ways. 1. The ending -as is added to the unmodified stem in one word only: mádhvas. — 2. The ending -s is added to the gunated stem: urós, drós², mádhos (Kh. IV. 12¹; TS. IV. 4. 12¹), sános, svādós. — 3. Under the influence of the n- declension -nas is added to the stem: mádhunas, sánunas.

G. m. This case is made in two ways. I. The ending -as is added to the unmodified stem in six words: paśvás, pitvás; krátvas, mádhvas, vásvas, śśźvas<sup>3</sup>. — 2. The prevailing form is made by adding -s to the gunated stem, and appears in 70 words. The commonest examples are  $^4$ : ay0s (22), v1sy0s (14), síndhos (13), akt0s (11), vay0s (10), dásy0s (8), mános (8), sátros (5), kār0s (4) 'singer'.

a. There is a single transition form according to the n- declension  $c\bar{a}$  i u i u, which occurs only once (VIII.  $5^{14}$ ).

f. This case is formed in one way only, like the second form of the m., from 5 stems: aktós, dhenós, vástos, saráyos N. of a river, síndhos.

n. This case is made like the Ab. n. 1. mádhvas<sup>5</sup>, vásvas. — 2. The commonest form, made from 8 stems in the RV.: urós, ksós 'food', gúggulos (AV.) 'bdellium', cáros, mádhos (+AV.), vásos (+AV.), vástos (+AV.) 'dwelling', sādhós, svādós. — 3. cáruṇas, dánunas, drúṇas<sup>6</sup>, mádhunas<sup>7</sup>, vásunas<sup>8</sup>.

L. m. This case is formed in two ways. I. The normal ending -i is added to the gunated final vowel in 7 stems: ánavi 'non-Aryan man', trasádasyavi N. of a king, dásyavi, druhyávi N. of a man, pávīravi N. of a man, vísnavi, sūnávi. — 2. More usually the ending is dropped, leaving the final stem vowel with Vrddhi instead of Guna. This form of the L. is taken by 19 stems in the RV: aktáu 'at night', āyáu, uráu, krátau, caráu 'pot', druhyáu, pársau N. of a man, pasáu,

The stem pásu- occurs once in the N. as a neuter, and pásue must owing to the accent be taken as the D. of that stem; the m. stem is pasú-, D. pasáue.

<sup>&</sup>lt;sup>2</sup> The form drós also occurs in Kh. IV. 5<sup>11</sup>.

<sup>3</sup> Possibly 4 other words written with -os, should be pronounced with -uas: ahrsnias (x. 223), ripias (1v. 313), pipruas (vi. 227), visnuas (viii. 3110).

<sup>4</sup> Lanman 410 gives a list of the stems taking this form of the genitive.

<sup>5</sup> Pronounced mádhuas twice out of 67 occurrences.

<sup>6</sup> There is no certain evidence as to the gender of dri- 'wood', but, as it is a reduced form of dāru- which is n., it may be assumed to be n. There is also the form dris,

<sup>7</sup> mádhvas occurs 67 times, mádhos 13 times, mádhunas 9 times in the RV. The VS. has all three forms in independent passages.

<sup>8</sup> vásvas occurs 38 times, vásos 8 times, vásunas 11 times in the RV.

plisti-gau N. of a man, pūtá-kratau N. of a man, pūráu, mánau and manáu', y.ádau N. of a man, srústi-gau N. of a man, síndhau, sétau 'bond', svárau' 'sacrificial post'.

f. This case is made in one way only, like the second form of the m. The only example in the RV. is sindhau; the AV. has siarau<sup>3</sup> and siarau<sup>4</sup> birth'.

n. This case is formed in three ways. I. With the ending -i added to the gunated stem only in sắnavi, which occurs 9 times. When the adjective ávya- or avyiya- 'made of sheep's wool' immediately follows, the L. of this word appears as sắno. The Pada here always has sắnau, but as the metre requires a short syllable it seems likely that the ending has been dropped to avoid a disagreeable sequence of syllables in sắnavy ávye, but without leaving the lengthened form of the stem (sắnāv) because of the metre. A parallel form appears to be vásto in the formula vásta usrás 'at break of dawn', which occurs 5 times in the RV.4.— 2. As in the m., the usual form is that in -au formed from 8 stems: a-rajjáu 'not consisting of ropes', uráu, ghírṣau 'lively', pṛtháu, mádhau, vásau, vīļáu 'stronghold', sắnau.— 3. According to the n- declension: áyuni, dắruni (AV.), drúni (Kh. I. 5 10), sắnuni 5.

V. m. This case, which gunates the final vowel, is formed from 58 stems. The commonest examples are: indo (144), vaso (62), śata-krato (47) having a hundred powers', vāyo (43), sūno (36), su-krato (22)6.

f. This case which has the same form as the m., is made from 6 stems: adri-sāno 'dwelling on mountain tops', dur-hano 'ugly-jawed', prthu-sto 'having a broad tuft of hair', sindho, su-bāho 'having strong arms', sva-bhāno 'self-luminous'.

n. The V. n. seems to have been identical in form with the N. judging by the only example which occurs: gilggulu<sup>7</sup> (AV. xix. 38<sup>2</sup>).

- Du. N. A. V. m. This form, which is made by lengthening the final vowel, occurs from 69 stems. The commonest examples are:  $indra-v\bar{a}y\hat{n}$  (22) 'Indra and Vāyu',  $v\bar{a}jin\bar{\imath}-vas\bar{\imath}$  (21) 'rich in swift mares',  $b\bar{a}h\hat{n}$  (20) 'arms',  $vi\gamma sav-vas\bar{\imath}$  (18) 'possessing great wealth',  $indr\bar{\imath}-visn\bar{\imath}$  (13) 'Indra and Viṣṇu'. The TS. has also  $dgn\bar{\imath}-visn\bar{\imath}$  (1.8.221) 'O Agni and Viṣṇu'. There are besides two forms in which the final vowel is shortened 8: jigatni' (VII. 651) 'speeding' and  $su-h\hat{\imath}ntu$  (VII. 194)9 'easy to slay'.
- f. This form is made in the same way as the m. but is much rarer, occurring from 5 stems only:  $jigatn\acute{a}$ ,  $dhen\acute{a}$ ,  $s\acute{a}$ - $bandh\bar{u}$  'akin',  $sam\bar{u}$ n'abandh $\bar{u}$  'having the same kin',  $h\acute{a}n\bar{u}$ .
- n. This form adds the regular ending  $-\bar{\imath}$ . The only example in the RV. is  $urv \hat{\imath}$ . The VS. has according to the n-declension  $j\tilde{\alpha}nu-n-\bar{\imath}$  (xx. 8) 'knees'.
- I. m. aniśúbhyām (VS. VII. 1), an-āmayitnúbhyām 'curative', nṛ-bāhúbhyām 'man's arms', bāhúbhyām. f. hánubhyām (VS. XI. 78)10.
- D. m. indra-vāylibhyām (VS. vII. 8), indrā-viṣṇubhyām (VS. vII. 23), bāhlibhyām.

T Accented manáu only when followed by adhi.

<sup>&</sup>lt;sup>2</sup> A possible m. L. with n would be  $r\acute{a}jjuni$ , an emendation for rajani of the Mss. (AV. XX. 1333). For the reading of AV. XX. 131<sup>12</sup> vanisth\acute{a}u the Mss. have  $vanisth\acute{a}u$  which, if correct, would be a unique example of  $-\vec{a}$  in the L. of the u- declension.

<sup>3</sup> Emendation for sárau of the Mss.; see Whitney's note on AV. v. 251.

<sup>4</sup> See KAEGI, Festgruss an Böhtlingk 48 f.

<sup>5</sup> sắnavi occurs 9 times, sắna (ávye) 8 times, sắnau 10 times, sắnuni once.

 $<sup>^6</sup>$  The V.  $\emph{vibhávaso}$  in Kh. II.  $S^2$  is wrongly accented.

<sup>7</sup> The Mss. read guggulú or guggulú. See Whitney's note on the passage.

<sup>8</sup> In both Samhitā and Pada text.

<sup>9</sup> The RV, three times has the curious A. m. du,  $b\bar{a}h\acute{a}v\bar{a}=b\bar{a}h\acute{n}$  apparently from a stem  $b\bar{a}h\acute{a}va$ .

<sup>10</sup> hánūbhyām, a transition to the ñ- stems, in TS. IV. 1. 102; VII. 3. 161.

Ab. m. ūrūbhyām 'thighs', bāhūbhyām. — n. jānubhyām (AV.).

G. m. ūrvis, bāhvis.— n. according to the n- declension: jānunos (AV.). L. m. ūrvis (AV.), bāhvis.— f. hánvos.

P1. N. V. m. This case is formed in two ways. I. The ending -as is added to the unmodified stem. Of this formation the only example is mádkv-as (occurring 4 times). — 2. The ending -as is added to the gunated stem, e. g. aktáv-as. This form is very frequent, being made from 161 stems and occurring over 700 times in the RV. The commonest examples are: indavas (67), rbhávas (57), vásavas (46), sudánavas (42) 'bounteous', sindhavas (34), āśávas (30), adhvaryávas (27), āyávas (27), kārávas (18), mitá-jñavas (2) 'firm-kneed'.

f. This case is formed in the same two ways as the m. I. Of this formation there are only two examples: mádhv-as, sata-kratv-as. — 2. The regular form is made from 15 stems in the RV.: an-aśrávas 'tearless', á-bhīravas 'fearless', a-renávas 'dustless', iṣavas, tri-dhátavas, dhenávas, párśavas, vasūyávas, sáravas, saniṣyávas 'desirous', sá-manyavas and sa-manyávas 'unanimous', síndhavas, su-ketávas, svá-setavas 'forming one's own bridge', hánavas.

N. Å. n. This form is made in two ways. I. Twelve stems take no ending, four of them also lengthening the final vowel sometimes. These forms occur 76 times altogether in the RV., 48 times with short, 28 times with long vowel. The words occurring are: uri, rji, cáru, tri-dhátu, puri². bahi, mádhu, vásu, vīļi, sánu, su-dhátu 'manifold', su-hántu; uri, puri³, vásū³, vīļi. The Pada text always has the short vowel. — 2. The more usual form follows the n- declension, adding -ni, before which the final vowel is lengthened. It is made by 14 stems⁵ and occurs 127 times altogether in the RV.: aghāyūni (Kh. Iv. 5³) 'malicious', anáni (AV.) 'minute', alábūni (AV.)⁶ 'gourds', áśrūni (AV.) 'tears', karkándhūni (VS. XIX. 23) 'jujube berries', cárūni, tri-dhátūni, dánūni 'fluid', dárūni, devayāni, purāṇi, prthāni, bahāni, mádhūni, yuvayāni 'longing for you both', vásūni, vástūni, śmáśrūṇi, sánūni.

A. m. This case is made in two ways. 1. The normal ending -as is added to the unmodified stem. The only two examples of this formation are paśv-ás and kŕtv-as i 'times'. — 2. The usual form is made from 43 stems with the ending -n, before which the vowel is lengthened. The original ending -ns still survives as -nr 45 times before vowels and once as -ns before ca i. The commonest examples are śátrūn (43), dásyūn (27), síndhūn (23), aktūn (9), rtūn (8), paśūn (5). From the VS.: ākhūn (xxiv. 26) 'moles', nyánkūn (xxiv. 27) 'antelopes', madgūn (xxiv. 22) 'diver-birds', malímlūn (xi. 78; TS.) 'robbers', rūrūn (xxiv. 27) 'antelopes'. From the Khilas: iṣūn (III. 16 i).

f. This like the m. is formed in two ways. 1. The only example is  $m\acute{a}dhv$ -as, which occurs twice. — 2. The ending -s is added, before which the vowel is lengthened. The only two examples in the RV. (occurring 5

r To be pronounced ūruss, bāhuss, hánuss in the RV.

<sup>&</sup>lt;sup>2</sup> furit seems to be the only form of this kind in the AV., where it occurs once (XIX. 491).

<sup>3</sup> purů occurs 24 times, purů 12 times (all but once at the end of a Pada).

<sup>4</sup> vásū occurs twice, vásu 19 times (12 times at the end of a Pāda),

<sup>5</sup> Half of these also take the form without form this A. n in the RV.

<sup>6</sup> The Mss. in AV. XX. 1341 read álābūni.
7 The A. of a noun kṛtu- 'making', used adverbially: bhūri kṛtvas (111. 184) 'many

times', śáśvat kýtvas (III. 541) 'innumerable times', dáśû kýtvas (AV. XI. 29) 'ten times'.

8 On the Sandhi of these accusatives in -ūn see Lanman 415 (bottom) and 416

<sup>(</sup>top).
9 LANMAN 416 enumerates the stems which form this A

times) are: /ṣūs and dhenis. The Khila after RV. x. 9 has the form várenya-kratūs 'intelligent', but the text of Kh. III. 13 reads várenya-kratus r.

I. m. This form is frequent, being made from 50 stems and occurring over 200 times. The commonest examples 2 are: vásubhis (24), aktúbhis (17), rtúbhis (15), āśúbhis (12), pāyúbhis (12) 'protectors', índubhis (11), bhānúbhis (7), rbhúbhis (6), síndhubhis (5), snúbhis (5).

f. This case, formed in the same way as the m., is rare, only 3 examples occurring in the RV.: <code>kka-dhenubhis</code> 'excellent cows', <code>tri-dhatubhis</code>, <code>dhenubhis</code>.

n. a-renlibhis 'dustless', áśrubhis (VS. xxv. 9), karkándhubhis (VS. xxi. 32), jaráyubhis (AV.), bahlibhis, mádhubhis (Kh. I. 117), vásubhis, śmáśrubhis (VS. xxv. 1; SV.) 'beards', su-mántubhis 'benevolent'.

D. m. a-śatriibhyas 'foeless', rtiibhyas (VS. XXII. 28), rbhiibhyas, guigiibhyas 'descendants of Guigu', trtsubhyas 'the Trtsus' (a tribe), dáśābhīśubhyas, 'having ten reins', dásyubhyas, paślibhyas, pūrlibhyas, bahlibhyas, mrgaylibhyas (VS. XVI. 27) 'hunters', vásubhyas, sindhubhyas.

f. There is no example in the RV. The AV. has two: isubhyas, dhenibhyas.

— n. sānubhyas (VS. xxx. 6).

Ab. m. aktilbhyas, jatrilbhyas 'cartilages of the breast bone', jighatsilbhyas (AV.) 'seeking to devour', dásyubhyas, bahibhyas, bhígubhyas 'Bhrgus', mṛtyilbhyas

(AV.), sá-bandhubhyas (AV.). — f. dhánubhyas, síndhubhyas.

G. m. This case is formed from 23 stems in the RV., 12 being oxytones and 11 otherwise accented: 1. rtūnām, rbhūṇām, rṣūṇām 'flames', carūṇām, devayūnām, paśūnām (AV. VS. TS.), pitūnām, purūṇām, prāśūnām 'very swift', babhrūṇām, bahūnām, yātūnām 'spectres', ripūṇām, stāyūnām (VS.) 'thieves'. — 2. abhi-kratūnām 'insolent', abhiśūnām 'reins', ahy-árṣūṇām 'gliding like a snake', krátūnām, titsūnām, dásyūnām (AV.), plyārūṇām (AV.) 'mischievous', bhigūṇām, mánūnām, vásūnām, sátrūṇām, sá-bandhūnām (AV.), sindhūnām, svárūṇām 'sacrificial posts'. — f. dhenūnām; sindhūnām. — n. mádhūnām, yāśūnām 'embraces', vásūnām.

L. m. ansiisu (VS. VIII. 57), aktiisu, ánusu, ūsiisu, druhyiisu, pasiisu (AV.), pūriisu, bāhiisu, yidusu, vi-bandhusu (AV.) 'kinless', visvá-bhānusu 'all-illumining', sátrusu, sindhusu. — f. vástusu, sindhusu+. — n. uriisu, vástusu, smásrusu, sánusu, sníisu<sup>5</sup> (VS. TS.).

#### II. Pronouns.

Benfey, Vollständige Grammatik 773—780 (p. 333—340). — Whitney, Sanskrit Grammar 490—526 (p. 185—199). — Pischel, ZDMG. 35, 714—716. — Delbrück, Syntaktische Forschungen 5, 204—221; cp. Brugmann, KG. 494—525, and Die Demonstrativa der indogermanischen Sprachen, Leipzig 1904.

390. The pronouns occupy a special position in declension, as being derived from a limited class of roots with a demonstrative sense, and as exhibiting several marked peculiarities of inflexion. These peculiarities are in some degree extended to a certain number of adjectives.

#### 1. Personal Pronouns.

391. These are the most peculiar of all, as being for each person derived from several roots or combinations of roots, as being specially anomalous in inflexion, as not distinguishing gender and, to some extent,

The m. A. sindhūn occurs once (x. 35<sup>2</sup>) in the sense of a f.

<sup>&</sup>lt;sup>2</sup> Lanman 416 (bottom) enumerates the stems taking this case.

<sup>3</sup> Accentuated like a dissyllable as elsewhere.

<sup>+</sup>  $\bar{a}y''i\bar{s}u$  (1.583) is perhaps a transfer form for  $\bar{a}y'''\bar{s}u$ ; cp. Lanman 4191.

<sup>5</sup> With dissyllabic accent as usual.

not even number. Some resemble neuters in form; a few have no apparent case-ending; in two of them the acc. pl. masc. does duty as fem. also.

The forms of the first and second person which occur are:

1. Sing. N. ahám². A. mắm, mā. I. máyā. D. máhyam, máhya, me³. Ab. mád⁴. G. máma, me. L. máyi⁵.

Du. N. vám (RV1).6. A. nau. D.7 nau. Ab. āvád (TS.). G.8 nau.

Pl. N. vayám. A. asmán<sup>9</sup>, nas<sup>3</sup>. I. asmábhis. D. asmábhyam, asmé (RV.), nas. Ab. asmád. G. asmákam<sup>10</sup>, asmáka<sup>11</sup> (RV<sup>1</sup>.), nas. L. asmé, asmásu<sup>12</sup>.

2. Sing. N. tvám <sup>13</sup>. A. tvám, tvā. I. tváyā, tvá (RV.). D. tlíbhyam, tlíbhya, te<sup>14</sup>. Ab. tvád. G. táva, te. L. tvé<sup>15</sup> (RV. VS.), tváyi (AV. VS. TS.).

Du. N. yuvám. A. yuvám, vām. I. yuvábhyām, yuvābhyām. D. vām. Ab. yuvád (RV<sup>1</sup>.). G. yuvós (RV. and Kh.I.12<sup>1</sup>), yuváyos (TS.III.5.4<sup>1</sup>), vām.

Pl. yūyám<sup>16</sup>. A. yuṣmấn<sup>17</sup>, f. yuṣmấs (VS<sup>2</sup>.), vas<sup>18</sup>. D. yuṣmábhyam, vas. Ab. yuṣmád. G. yuṣmákam<sup>10</sup>, yuṣmáka (RV<sup>2</sup>.), vas. L. yuṣmé.

a. The usual stems representing these personal pronouns in derivation or as first member of a compound are ma-, asma-; tva-, yuva-, yuşma-; e. g. mā-vant- 'like me', asma-drúh- 'hating us', tvā-vant- 'like thee', tvā-yata- 'presented by thee'; yuva-yú- 'desiring you two', yuvā-duta- 'established by you two', yuvā-duta- 'given by you two'; yuṣma-yánt- 'desiring you', yuṣmā-ūta- 'supported by you'; yuṣmā-datta- 'given by you'19.

b. The forms mad, asmad, tvad-occur a few times as first member of compounds; thus mát-kṛta-'done by me', mát-sakhi- 'my companion', mat-tás (AV.) 'from me'; asmát-sakhi- 'having us as companions', asmád-rāta- (VS.) 'given by us'; tvát-pitṛ- (TS.) 'having thee as father'; tvád-yoni- (AV.) 'derived from thee', tvád-vvācana- (TS.) 'having thee as

umpire'.

c. aham-, mām-, mama-; asmē-; tvām- are also sometimes found as first member of compounds; thus aham-uttará- (AV.) 'struggle for precedence', aham-pārvá- 'eager to be first', aham-yú- 'proud'; mām-paśyá- (AV.) 'looking at me'; mama-satyá- dispute as to ownership'; asmē-hiti- 'errand for us'; tvām-kāma- 'desiring thee', tvām-āhuti- (TS.) 'offering to thee'.

#### 2. Demonstrative Pronouns.

392. Tá- 'that', which also serves as the personal pronoun of the third person, 'he', 'she', 'it', is typical, in its inflexion, of the adjectival pronoun. It has the special peculiarity of using the stem sa- for the nom. masc. and fem. sing. and, in the RV., for the loc. sing. masc. and neut. The general peculiarities of the adjectival pronominal declension, as distinct from

<sup>1</sup> Cp. GAEDICKE, Akkusativ 12-14.

<sup>2</sup> On the formation of ahám cp. J. SCHMIDT, KZ. 36, 405 ff. — All the nominatives of the personal pronouns are formed with -am as also the N. sing. of the demonstrative ayám and the reflexive svayám.

3 The unaccented forms of the personal pronoun (85) may be accompanied by accented words in agreement with them; e. g. te jáyatah 'of thee when conquering'; vo vrtábhyah 'for you that were confined'; nas tribhyáh 'to us three'.

4 mád is two or three times unaccented in the AV.

5 Cp. Bartholomae, ZDMG. 50, 725.

6 This seems to be the only nom. form  $(vI. 55^{\circ})$  occurring in the Samhitās. The nom. in the SB. is  $\bar{a}v\acute{a}m$ , in the AB.  $\bar{a}v\~{a}m$ ; the acc. in the SB. is  $\bar{a}v\~{a}m$ . The form  $v\~{a}m$  must be an abbreviation of  $\bar{a}v\~{a}m$ .

7 The AB. has āvābhyām.

8 The SB. has āváyos.

9 asmán and yusmán are new formatives

according to the nominal declension; cp. BRUGMANN, KG. 519, 2, note.

10 asmākam and yusmākam are properly acc. n. of the possessives asmāka, yuşmāka; cp. Brugmann, KG. 524, 4.

11 Occurs only in I. 17310.

12 asmāsu is a new formation according to the inst. asmā-bh s.

13 tvám must often be read as túam.

14 te, originally only loc., is used as dat. and gen.; similarly me; the loc. asmé is also used as dat.

15 Cp. BARTHOLOMAE, loc. cit.

Originally \*yūš-ám where y was substituted for the sibilant owing to the influence of vayám; cp. Bartholomae, op. cit. 726, note; Brugmann, KG. 513 and note 3, 518.

17 yuşman is a new formation according to the nominal declension (like asman).

<sup>18</sup> The inst. was originally in all probability yuşmā (like tvā), which later became yuşmābhis (like asmābhis).

19 This compound may preserve the old inst.

the nominal a-declension, are that r. in the singular they take -d instead of -m in the nom. and acc. neut.; the element -sma- in the dat., abl., loc. masc. and neut.; the element -sya- in the dat., abl, gen., loc. fem.; the suffix -in in the loc. masc. and neut.  $\dot{z}$ ; 2. in the plural they take -e for - $\bar{a}s$  in the nom. masc.; s for n in the gen. before  $-\bar{\alpha}m$ .

r. The inflexion of  $t\dot{a}$ - accordingly is as follows:

Sing. N. m.  $s\acute{a}$ -s<sup>2</sup>, f.  $s\acute{a}$ , n.  $t\acute{a}$ -d. A. m.  $t\acute{a}$ -m, f.  $t\acute{a}$ -m, n.  $t\acute{a}$ -d I. m. ténã3, f. táyā. D. m. n. tá-smai, f. tí-syai. Ab. m. n. tá-smāt, f. tá-syās. G. m. n. tá-sya, f. tá-syās. L. tá-smin<sup>4</sup>, sá-smin (RV.), f. tá-syām.

**Du.** N. A. m.  $t\hat{a}$ ,  $t\acute{a}u$ , f.  $t\acute{e}$ , n.  $t\acute{e}$ . I. m. f.  $t\acute{a}$ -bhy $\bar{a}m^5$ . Ab. m.  $t\acute{a}$ -bhy $\bar{a}m$ .

G. m. n. táyos. L. m. táyos.

Pl. N. m. té, f. tás, n. tá, táni. A. m. tán, f. tás, n. tá, táni. I. m. n. té-bhis, táis (AV.; Kh. II. 104), f. tá-bhis. D. m. n. té-bhyas, f. tá-bhyas. G. m. té-sām, f. tā-sām. L. m. té-su, f. tā-su.

a. The stem tá- is frequently used in derivation, especially that of adverbs; e.g. tá-thā 'thus', ta-vant- 'so great', tá-ti (AV.) 'so many', and in the compound tā-dṛ's- 'such'.

- b. The neuter form tad is often used as the first member of a compound; thus tád-anna- 'having that food'; tád-apas 'accustomed to that work'; tad-id-artha- 'having just that as an object'; tád-okas- 'delighting in that'; tád-ojas- 'possessing such power'; tad-vasá- 'having a desire for that'; tad-vid- (AV.) 'knowing that'.
- 2. Two other demonstrative pronouns are formed from tá.. a. One of them, etá-, formed by prefixing the pronominal element  $e^{-6}$ , means 'this here'. It is inflected exactly like  $t\acute{a}$ - and is of common occurrence. The forms which occur are:
- m. Sing. m. N. esás or esá<sup>2</sup>. A. etám. I. eténa. D. etásmai (TS.). Ab. etásmāt (AV.). G. etásya (AV.). – Du. N. etá, etáu. – Pl. N. eté. A. etán. I. etébhis, etáis (AV.). D. etébhyas.
- f. Sing. N. esá. A. etám. I. etáyā. L. etásyām. Du. N. eté. Pl. N. etás. A. etás. I. etábhis (AV.). L. etásu (AV.).

n. Sing. N. etád. - Pl. N. etá (+ VS.), etáni.

- a. The stem used in derivation and composition is eta-; thus eta-vant- 'so great'; etā-dr's- 'such'.
- b. The other secondary demonstrative,  $ty\dot{a}$ -, is derived from  $t\dot{a}$  with the suffix -ya7 and means 'that'. It is common in the RV., but rare in the later Samhitās<sup>8</sup>. It is used adjectivally, being nearly always accompanied by its substantive. It is never found at the beginning of a sentence except when followed by u, cid,  $n\dot{u}$ , or  $s\dot{u}^9$ .

The forms occurring are:

- m. Sing. N.  $sy\acute{a}^{10}$  (+ VS.). A.  $ty\acute{a}m$ . G.  $ty\acute{a}sya$ . Du. N.  $ty\acute{a}\dot{t}$ . Pl. N. tyé. A. tyán. I. tyébhis.
- f. Sing. N.  $sy\dot{a}$ . A.  $ty\dot{a}m$ . I.  $ty\dot{a}$  (for  $ty\dot{a}y\bar{a}$ ). G.  $ty\dot{a}sy\bar{a}s$ . Du. N.  $ty\dot{e}$ . — Pl. N. tyás. A. tyás.

n. Sing. N.  $ty\acute{a}d$  (+TS.). — Pl.  $ty\acute{a}$ ,  $ty\acute{a}ni$ .

393. The demonstrative which appears as ayám in in the nom. sing. masc. and means 'this here', employs the pronominal roots  $\alpha$ - and (in various modifications) i- in its inflexion, the latter being used in nearly all the

<sup>2</sup> On the Sandhi of sá- and esá- see

3 The Pada text always reads tena.

6 According to Brugmann, KG. 495, 6, note 3, originally loc. sing. of a-.

- 7 Cp. Brugmann, KG. 401 and 495, 2.
- 8 It occurs two or three times also in B. 9 Cp. Grassmann, s. v. tyá-.
- 10 syá- and tyá- are often to be read with Vyūha.

This suffix is once found in the RV., in the form of -min, attached to yadr's- having a loc. sense; see LANMAN 3434. what appearance', though the stem ends in a consonant.

<sup>4</sup> sásmin occurs nearly half as often as tásmin in the RV.

<sup>5</sup> In IX, 662 this form (f.) seems to have

nom. and acc. forms, the former in the other cases. The acc. sing. masc. and fem. starts from i-m', the acc. of i-, and is followed by the nom. acc. du. and pl., all these forms having the appearance of being made from a stem ima. The nom. sing. fem. is formed from  $i^{-2}$ , and the nom. acc. sing. neut. from i-d (the N. A. n. of i-), both with the suffix -am added. The nom. sing. masc. is formed from a- with the suffix -am and interposing -y-. The remaining cases formed from  $a^{-3}$  are inflected throughout like  $t\dot{a}$ -. The inflexion of this pronoun is accordingly as follows:

Sing. N. m. a-y-ám, f. i-y-ám, n. i-d-ám. A. m. im-ám, f. im-ám, n. i-d-ám. I. m. e-ná3, f. ayá4. D. m. a-smái5, f. a-syái. Ab. m. a-smát6, f.  $\alpha$ -syās. G. m.  $\alpha$ -syā $\gamma$ , f.  $\alpha$ -syās. L. m.  $\alpha$ -smin, f.  $\alpha$ -syām.

Du. N. A. m. imá, imáu, f. imé, n. imé. D. m. ā-bhyám (RV<sup>1</sup>.). Ab. m.

 $\bar{a}$ -bhy $\dot{a}$ m. G. m. a-y- $\dot{o}$ s (RV.) $^{\delta}$ . L. m. a-y- $\dot{o}$ s (RV.).

Pl. N. m. imé, f. imás, n. imá, imáni. A. m. imán, f. imás, n. imá, imáni. I. m. e-bhís, f. ā-bhís 10. m. e-bhyás, f. ā-bhyás. G. m. e-sám, f.  $\bar{a}$ -s $\hat{a}$ m. L. m. e-s $\hat{u}$ , f.  $\bar{a}$ -s $\hat{u}$ .

394. The corresponding demonstrative employed to express remoteness, 'that there', 'yon', appears in the nom. sing. masc. fem. as asáu. The pronominal root employed throughout its inflexion is a-, but always in an extended form only. The fundamental stem used in every case, excepting the nom. sing., is a-m, acc. masc. of a-; this is extended by the addition of the particle u to amu-, which has become the stem in the oblique cases of the sing. (with long u in the acc. fem.); in the plur.  $am\dot{x}$  is the fem. and  $am\dot{z}$ the masc. stem (except the acc.). The nom. sing. forms are quite peculiar. In the masc, and fem, the pronominal root a- seems to be compounded with sa- extended by the particle u: a- $s\acute{a}$ -u and a- $s\acute{a}$ -u<sup>11</sup>; while the neut. has the pronominal -d extended with the suffix -as: a-d-ús. Only one dual form has been noted, and several plural case forms are wanting. The forms found in the Samhitas are the following:

m. Sing. N. asáu. A. amím. I. amínā (VS.). D. amí-smai. Ab. amúsmāt (AV. TS.). G. amú-sya $^{12}$ . L. amú-smin (AV.). — Pl. N. am $i^{13}$ . A. amún (AV.). D. amībhyas (AV.). G. amī-sām.

f. Sing. N. asáu. A. amúm. I. amuyá<sup>14</sup>. D. amú-syai (VS.). G. amúsyās (AV.). — Du. N. amú (AV.). — Pl. N. amús. A. amús.

n. Sing. N. adás. — Pl. N. amú (AV.).

395. A defective unaccented pronoun of the third person meaning 'he', 'she', and in the AV. 'it', is e-na-15. It occurs almost exclusively in the

<sup>1</sup> Cp. Brugmann, KG, 495, 10.

<sup>2</sup> From *i*- is also formed the acc. *ī*-m and | clension, *āt*, is used as a conjunction. the neut.  $i \cdot d$ , both used as particles.

3 The Pada text always reads ena (the unaccented ena occurs twice). This and all other oblique cases formed from a-, when used as nouns may lose their accent; see S5 β 3; cp. GRASSMANN, s. v. idám. On ayám see Brugmann, KG. 498, 3.

4 This inst. is fairly frequent in the RV.; instead of it anáyā occurs twice (IX. 6512.27), being probably a later correction to obviate the hiatus. Otherwise no forms of ana-(anéna, anáyā, anáyos) occur in the Samhitas. But anéna (n.) occurs in Kh. 111. 167.

5 asmai and asya are accented on the first syllable, the former four or five times, 'one', e-vá 'thus'; cp. BRUGMANN, KG. 495, 6. the latter about ten times, when specially emphatic at the beginning of a Pada in the RV.

7 The form imásya also occurs once.

8 To be read as āyós.

9 Seems to be wrongly read as ayos in the Pada text; cp. LANMAN 3443.

10 ābhis occurs ten times in the RV.; it is thrice accented  $\dot{a}bhis$  and thrice unaccented: cp. note 5.

11 Cp. Brugmann, KG. 495, 6; 498, 4.

12 This is the only instance of -sya being added to any but an a- stem.

13 This form is Pragrhya (70). On its origin cp. IF. 18, 64, note.

14 Used adverbially, with shifted accent. 15 The same e- (loc. of a-) as in é-ka-

<sup>6</sup> The abl, according to the nominal de-

acc. (the great majority of occurrences being masc. sing.). Otherwise it is found only twice in the inst. sing. and three or four times in the gen. dual. The forms occurring are; m. Sing. A. enam. I. enena (AV.). — Du. A. enau (AV.). G. enos (RV.), enayos (AV.). — Pl. A. enān.

f. Sing. A. enīm¹. Du. A ene. Pl. A. enīs. — n. N. enad (AV.; Kh. IV. 65).

- 306. Another demonstrative found nearly twenty times in the RV., but otherwise occurring only once in the AV., is the unaccented pronoun tva-2 meaning 'one', 'many a one', generally repeated, in the sense of 'one another'. The forms occurring are: m. Sing. N. tvas. A. tvan. I. tvena. D. tvasmai. Pl. N. tve3. — f. Sing. N. tvā. D. tvasyai. — n. Sing. N. tvad.
- a. The pronoun avá-4 'this' is found two or three times in the RV., and only in the gen. du. form. avis in combination with vām, meaning 'of vou two being such' (used like sa, e.g. sá tvám 'thou as such').

b. The pronoun áma-5 'this' occurs only once in the AV.: ámo 'hám asmi (XIV. 271), 'this am I'.

### 3. Interrogative Pronoun.

397. The interrogative ka-, 'who?', 'which?', 'what?' used both as substantive and adjective, is quite regular in its declension, excepting the alternative neuter form ki-m6, which instead of the pronominal -d has the nominal -m (never elsewhere attached to a stem in -i). The forms occurring are:

m. Sing. N. kís. A. kám. I. kéna. D. kásmai. Ab. kásmāt (AV.). G. kásya. L. kásmin. — Du. káu. — Pl. N. ké. I. kébhis. L. késu (VS.).

f. Sing. N. kā. A. kām. I. kíyā. G. kásyīs (AV. VS.). — Pl. N. kās. A. kás. L. kásu.

n. Sing. N. A.  $k\acute{a}$ -d (RV.) and  $k\acute{i}$ -m. — Pl. N. A.  $k\acute{a}$  and  $k\acute{a}ni$ .

a. In forming derivatives, which are numerous, the stem of the interrogative employed is not only ka-, but also ki- and ku-; e.g. ká-ti 'how many?'; ki-yant- 'how great?'; kú-ha 'where?'. The neuter form kim is twice used in this way: kim-yú- 'desiring what?'; kim-máya- 'consisting of what?'.

b. In the formation of compounds kad occurs twice as first member: in kat-payá-'greatly swelling', and kád-artha- 'having what purpose?'. kim is similarly used a few times in the later Samhitas; thus kim-śilá- (VS. TS.) 'being in stony ground', kim-kará-

(AV.) 'servant'.

### 4. Relative Pronoun.

398. The relative pronoun ya- 'who', 'which', 'what' is perfectly regular in its declension. The forms occurring are:

m. Sing. N. yás<sup>8</sup>. — A. yám. I. yénã o and yéna. D. yásmai. Ab. yásmāt<sup>10</sup>. G. yásya. L. yásmin. — Du. N. A. yá, yáu. D. yábhyām. G. yáyos. L. yáyos and yós II (RV.). - Pl. N. yé. A. yan. I. yébhis, yáis (AV.; Kh. I. 92). D. yébhyas. G. yésām. L. yésu.

- This form occurs once (VIII. 619) at the field form in ná-kis and má-kis 'no one', beginning of a sentence and is then accented
- <sup>2</sup> The unaccented adverb tvadānīm (MS. IV. 22) 'sometimes', is derived from this
- 3 See Whitney's note on AV. viii. 99 in his translation.
- 4 This pronoun also occurs in the Avesta; yéna (cp. LANMAN 332). cp. Brugmann 495, 10.
- 5 From this pronoun are derived the inst. and abl. adverbs (with shifted accent) ama 'at home' and a nat 'from near at hand'.
  - 6 The nom. masc. is preserved as a petri-

- 'nothing', 'never'.
- 7 The relative frequency of kád to kím in the RV, is as 2 to 3.
- 8 yás is the commonest declensional form in the RV., occurring more than 1000 times.
- 9 yénā is twice as common in the RV. as yéna; the Pada text, however, always reads

10 The ablative according to the nominal declension, yat, is used as a conjunction.

11 yés for yáyos, like yuvás for yuváyos;

cp. BB. 23, 183; ZDMG. 50, 589.

- f. Sing. N. yā. A. yām. I. yáyā. G. yásyās. L. yásyām. Du. N. yé (TS. AV.). G. yáyos. L. yáyos. Pl. N. yās. A. yās. I. yābhis. D. yābhyas. G. yāsām. L. yāsu.
  - n. Sing. N. A. yád. Du. yé. Pl. yá, yáni.
- a. The stem of  $y\acute{a}$  is used in the formation of many derivatives; e. g.  $y\acute{a}$ -th $\ddot{a}$  'as'; it also appears as first member of a compound in  $y\ddot{a}$ -df's- 'which like'. The neuter form yad is once used similarly in the RV.:  $y\acute{a}$ -th $\ddot{a}$ ma- 'desiring what'.
- b. The relative receives the indefinite meaning of 'whoever' by the addition of kás ca, kás cid, or cid alone; e. g. yád vo vayám cakymá kác cid ágah (II. 27<sup>14</sup>) 'whatever sin we have committed against you'; yút kím ca duritám máyi (I. 23<sup>12</sup>) 'whatever sin (there is) in me'; yé cid dhí tvám rsayah půrva ūtáye juhūré (I. 48<sup>14</sup>) 'whatever early seers have called on thee for aid'.

### 5. Indefinite Pronouns.

- 399. a. In the RV. there are found the two simple indefinite pronouns sama (unaccented) 'any', 'every' and simá- 'every', 'all'. The six forms of the former which occur are: m. Sing. A. samam. D. samasmai. Ab. samasmāt. G. samasya. L. samasmin. Pl. N. same. From simá- are met with the five forms: Sing. V. síma. N. simás. D. simásmai (neut.). Ab. simásmāt. Pl. simí.
- b. Compound indefinite pronouns are formed by combining the particles ca, caná, or cid with the interrogative; thus kás ca 'any', 'any one'; kás caná 'any one soever', 'every'; kás cid 'any', 'some'; 'any one', 'some one'.

#### 6. Reflexive Pronouns.

- 400. I. The reflexive adjective is svá- 'own', which refers to the first and second as well as the third person of all numbers; e. g. yád, indrāgnī, mádathaḥ své duroṇé (I. 1087) 'when, O Indra and Agni, ye rejoice in your own abode'.
- 2. The substantive reflexive is  $sva-y-\acute{a}m$  'self', which is derived from  $sv\acute{a}$  with the suffix -am and interposing y (as  $a-y-\acute{a}m$  from a-). It is properly used as a nom. referring to all three persons; e. g.  $svay\acute{a}m$  yajasva  $div\acute{i}$ , deva,  $dev\acute{a}n$  (x.  $7^6$ ) 'do thou thyself, O god, worship the gods in heaven'. Sometimes, however, the nominative nature of the pronoun is forgotten and  $svay\acute{a}m$  is used agreeing in sense with another case; e. g.  $vats\acute{a}m$ .  $svay\acute{a}m$   $g\bar{a}t\acute{u}m$ .  $icch\acute{a}m\bar{a}nam$  (iv.  $18^{10}$ ) 'the calf himself seeking a way'.
- 3. Other cases than the nom. are regularly expressed in the RV. by  $tan\dot{u}$  'body'; e. g.  $svay\acute{am}$   $g\bar{a}t\acute{um}$   $tanv\grave{a}$   $icch\acute{a}m\bar{a}nam$  (IV.  $18^{10}$ ) 'himself seeking a way for himself  $(tanv\grave{e})'$ ; yajasva  $tanv\grave{a}m$  (x.  $7^{\circ}$ ) 'worship thyself';  $m\ddot{a}$   $h\bar{a}smahi$   $praj\acute{a}y\bar{a}$ ,  $m\ddot{a}$   $tan\acute{a}bhi\dot{h}$  (x.  $128^{\circ}$ ) 'may we suffer no harm with (regard to our) offspring or ourselves'. The reflexive adjective and a possessive gen. may be added; e. g.  $\acute{a}gne$ ,  $y\acute{a}jasva$   $tanv\grave{a}m$   $t\acute{a}va$   $sv\acute{a}m$  (VI. II<sup>2</sup>) 'Agni, worship thine own self'<sup>2</sup>.
- 4. There are one or two instances in the RV. of the incipient use of ātman- 'soul' in a reflexive sense; thus bálam dádhāna ātmáni (IX. II3¹) 'putting strength into himself'; yáksmam sárvasmād ātmánas.. ví vṛhāmi (X. I636) 'I expel the disease from (thy) whole self'. The acc. ātmánam, though not met with in the RV. as a reflexive, is frequently found so used in the later Samhitās³; also in Kh. III. Io³.
- a. In the formation of compounds sva- several times appears in the substantive as well as the adjective sense as first member; e. g. svá-yukta- 'self-yoked'; sva-yúgvan-'own companion'. svayám is also thus used in a few compounds; thus svayam-já- 'self-born'; svayam-bhū- 'self-existent'.

<sup>&</sup>lt;sup>1</sup> Cp. Delbrück, Syntaktische Forschungen 2 Cp. Delbrück op. cit. 135, and Grass-5, 569—570.

MANN, s. v. svá- and tanú-.

<sup>3</sup> See Delbrück op. cit. 155.

### 7. Possessive Pronouns.

401. Possessive pronouns are of rare occurrence because the genitive of the personal pronoun is generally used to express the sense which they

convey.

a. The possessives of the first person are mámaka-(RV.) 'my', māmaká'my', (both formed from the genitive of the personal pronoun máma)<sup>1</sup>, and
asmáka-'our'. The commonest form of the latter is the N. A. neut. asmákam,
which is used as the gen. plur. of the personal pronoun<sup>2</sup>. The other forms
occurring are asmákena, asmákāsas, and asmákebhis. The VS. also has the
form āsmākás (IV. 24) 'our' from a secondary derivative<sup>3</sup>.

b. The possessives of the second person are  $t\bar{a}vak\acute{a}$ - (RV.) 'thy', (from  $t\acute{a}va$ ), met with only in the form  $t\bar{a}vak\acute{e}bhyas$ ;  $tv\acute{a}$ -4 (RV.) 'thy', found only in the inst. pl.  $tv\acute{a}bhis$  (II. 20<sup>2</sup>); and  $yuşm\acute{a}ka$ - 'your', the N. A. neut. of which is used as the gen. pl. of the personal pronoun of the second person; it otherwise occurs only in the RV. in the two forms  $yuşm\acute{a}kena$  and

yusmākābhis.

c. Besides being used reflexively, svá- is fairly often employed as a simple possessive, generally as that of the third person, 'his', 'her', 'their', but also of the second, 'thy', 'your', and of the first, 'my', 'our'. It is, however, inflected like an ordinary adjective, having only two isolated forms according to the pronominal declension<sup>5</sup>. The forms which occur are:

m. sing. N. svás. A. svám. I. svéna and svénā<sup>6</sup>. D. sváya. Ab. svát. G. svásya. L. své and svásmin (RV.). — Pl. N. svás (AV.). A. sván (AV.). I. svébhis and sváis. D. svébhyas (Kh. v. 1<sup>2</sup>). G. svánām (AV.; Kh. II. 10<sup>4</sup>).

L. svésu.

f. sing. N. svá. A. svám. I. sváyā. D. sváyai. Ab. sváyās. G. svásyās (RV.). L. sváyām. — Pl. N. svás. A. svás. I. svábhis. L. svásu.

n. sing. N. A. svám. — Pl. A. svá.

# 8. Pronominal derivatives and compounds.

402. A certain number of derivatives are formed from the roots or stems of simple pronouns by means of suffixes which modify the pronominal sense. There are also a few pronominal compounds.

a. With the suffix -ka, conveying a diminutive or contemptuous meaning, derivatives are formed from the pronouns tá-, yá-, sá-, and asáu; thus ta-ká- (RV.) 'that little', of which the forms A. sing. m. taká-m and n. taká-d occur; yá-ka- 'who', 'which', the only forms met with being N. m. yakás, f. yaká (VS. XXIII. 22, 23), and N. pl. m. yaké (RV.); sa-ká- (RV. AV.) 'that little', of which only N. sing. f. saká occurs; N. sing. f. asakáu 'that little' (VS. XXIII. 22, 23).

b. With the comparative suffix -tara derivatives are formed from i-,  $k\acute{a}$ -, and  $y\acute{a}$ -; and with the superlative suffix -tama, from the latter two; thus i-tara- 'other'; ka-tará- 'which of two?'; ya-tará- 'who or which of two'; ka-tamá- 'who or which of many?', ya-tamá- 'who or which of many'.

c. With -ti derivatives with a numerical sense are formed from kd-, td-, and yd-; thus kd-ti 'how many?', td-ti (AV.) 'so many'; yd-ti 'as many'. No inflected forms of these words occur.

Indo-arische Philologie. I. 4.

<sup>&</sup>lt;sup>1</sup> Cp. Brugmann, KG. 524, 2.

<sup>&</sup>lt;sup>2</sup> Op. cit. 524, 4.

<sup>3</sup> Formed like māmaká- beside mámaka-.

the influence of svá-; cp. Brugmann, op. cit. 524, 2.

<sup>5</sup> That is, svásyās and svásmin.

<sup>4</sup> Used as a possessive probably under 6 The Pada text always reads sv/na.

d. With -yant, expressing the quantitative meaning of 'much', derivatives are formed from *i*- and *ki*-: *i*-yant- 'so much' (n. N. sing. *iyat*, pl. *iyānti*; f. D. sing. *iyatyai*); *ki-yant*- 'how much?' (sing. N. n. adv. *kiyat*, D. m. *kiyate*,

L. kiyāti for kiyati; N. f. kiyatī).

e. With -vant are formed derivatives from personal pronouns with the sense of 'like', 'attached to', and from others in the quantitative sense of 'great'; thus tvā-vant- 'like thee', mā-vant- 'like me'; yuvā-vant- (RV.) 'devoted to you two' (only D. yuvāvate); yuṣmā-vant- (RV.) 'belonging to you' (only L. pl. yuṣmāvatsu); etā-vant- and tā-vant- 'so great'; yā-vant- 'as great'; i-vant- 'so great' (sing. N. n. ivat, D. m. n. ivate, G. ivatas; pl. A. m. ivatas); ki-vant- 'how far?' (G. kivatas).

f. With -drś, -drśa, -drkṣa are formed the following pronominal compounds:  $\bar{\imath}$ -drkṣa- (VS.) and  $\bar{\imath}$ -drś- (VS. TS.) 'such';  $et\bar{\alpha}$ -drkṣa- (VS.) and  $et\bar{\alpha}$ -drś- 'such' (N. sing. n.  $et\bar{\alpha}$ drk);  $k\bar{\imath}$ -drś- 'what like' (N. sing. m.  $k\bar{\imath}$ dr'n);  $t\bar{\alpha}$ -drś- 'such' (N. sing. m.  $t\bar{\alpha}$ -drk);  $v\bar{\alpha}$ -drś- 'what like' (sing. m. N.  $v\bar{\alpha}$ drk, L.

yādŕśmin).

# g. Pronominal Adjectives.

403. Certain adjectives derived from pronominal roots or allied to pronouns in sense conform in varying degrees to the pronominal declension.

1. The adjectives which strictly adhere to the pronominal type of inflexion are anyá- 'other', and (as far as can be judged by the few forms occurring and by the usage of the later language) the derivatives formed with -tara and -tama from kά- and yά-. The specifically pronominal cases of the latter which have been met with are: sing. N. n. katarád (AV.), yatarád; katamád, yatamád (AV.); D. m. katamásmai (VS.); G. f. katamásyās (AV.); L. f. yatamásyām (AV.); Pl. N. m. katamé (AV.), yatamé (AV.). No such form of itara- has been found. The forms of anyá- which occur are:

m. sing. N. anyás. A. anyám. I. anyéna. D. anyásmai (AV.). G. anyásya. L. anyásmin. — Pl. N. anyé. A. anyán. I. anyébhis and anyáis.

D. anyébhyas (AV.). G. anyésām. L. anyésu.

f. sing. N. anyā. A. anyām. I. anyáyā. D. anyásyai. G. anyásyās. L. anyásyām. — Du. N. anyé. — Pl. N. anyás. A. anyás. I. anyábhis. G. anyásām. L. anyásu.

n. sing. N. anyád. — Du. I. anyábhyām (AV.). — Pl. N. anyá.

- 2. The three adjectives <code>lka-</code> 'one', <code>vlśva-</code> 'all', <code>sárva-</code> 'whole' are partially pronominal, following this declension except in the nom. acc. sing. neut., which takes the nominal <code>-m</code>. Thus sing. G. f. <code>lkasyās</code>, L. m. <code>lkasmin¹</code>, pl. N. m. <code>lka</code>, but sing. N. n. <code>lkam</code>; sing. D. <code>vlśvasmai²</code>, Ab. <code>vlśvasmāt²</code>, L. <code>vlśvasmin²</code>, pl. N. m. <code>vlśve</code>, G. m. <code>vlśveṣām</code>, f. <code>vlśvāsām</code>, but sing. N. n. <code>vlśvam</code>; sing. D. m. <code>sárvasmai</code> (AV.), f. <code>sárvasyai</code> (AV.; AA. III. <code>25</code>), Ab. m. <code>sárvasmāt</code>, pl. N. m. <code>sárve</code>, G. <code>sárveṣām</code> (AV.), f. <code>sárvāsām</code> (AV.), but sing. N. n. <code>sárvam</code>.
- 3. More than a dozen other adjectives which have pronominal affinities in form or sense occasionally show pronominal case-forms (but never -d in the N. A. sing. n.).
- a. A few adjectives formed with the comparative and superlative suffixes -ra and -ma have such endings; thus ápara- 'lower' has ápare in the N. pl m. beside áparāsas; úttara- 'higher', 'later', forms the L. sing. f. úttarasyām

¹ The AV. once has éke as a loc. sing.; see Whitney's note on AV. XIX. 56² in his riśwāya, Ab. viśvāt, L. viśve, once each; translation.

(AV.), N. pl. m. úttare; Ab. L. sing. úttarasmāt and úttarasmin beside ittarāt and ittare; ipara- 'lower' has ipare beside iparās and iparāsas in the N. pl. m.; avamá- 'lowest' has L. sing. f. avamásyām; upamá- 'highest' has sing. L. f. upamásyām; paramá- 'farthest' has sing. f. G. paramásyās and L. paramásyām (+ VS.); madhyamá- 'middlemost' has sing. L.f. madhyamásyām.

b. A few other adjectives with a comparative or pronominal sense have occasional pronominal endings. Thus pára- 'ulterior' has sing. D.m. párasmai (AV.), Ab. m. párasmāt (+ AV. VS.), G. f. párasyās, G. pl. m. páresām; L. sing. m. párasmin beside páre; and N. pl. m. páre beside párāsas. pūrva- 'prior' has sing, m. D. púrvasmai, Ab. púrvasmāt, G. pl. m. púrvesām, f. púrvāsām; and the N. pl. m. parve is very common beside the very rare parvāsas. néma- 'other' 1 has m. L. sing. némasmin, N. pl. néme, but N. sing. n. némam and G. pl. m. nemānām (unaccented). svá- 'own', otherwise following the nominal declension. has once sing. G.f. svásyās and once L.n. svásmin. samāná- 'similar', 'common', has once Ab. sing. n. samānásmāt beside samānát.

c. A few adjectives which are numerical in form or meaning have occasional pronominal forms; thus prathamá-'first', has G. sing. f. prathamásyās (AV.); trtiya- 'third' has L. sing. f. trtiyasyām² (AV.); ilbhaya- 'of both kinds' has m. pl. G. libhayeṣām, and N. libhaye beside libhayāsas and libhayās³;

kévala- 'exclusive' has once N. pl. m. kévale.

### III. Numerals.

BENFEY, Vollständige Grammatik 764-771. - WHITNEY, Sanskrit Grammar 475-488. - Cp. Brugmann, KG. 441-451.

404. The series of the numerals is based on the decimal system of reckoning. The names of the first ten cardinals, which are of an adjectival character, form the foundation of the rest either by compounding or derivation; the ordinals and numerical adverbs being further derived from the corresponding cardinals.

### Cardinals.

405. The names of the first ten cardinals are: éka- 'one'; dvá- 'two'; tri- 'three'; catiir- 'four'; páñca 'five'; sás- 'six'; saptá 'seven'; astá 'eight'; náva 'nine'; dása 'ten'.

a. The numbers intermediate between 'ten' and 'twenty' are Dyandva compounds formed by prefixing the accented unit to dása 'ten': ékā-dasa ' ('one and ten') 'eleven';  $dv\bar{\alpha}$ -dasa 5 'twelve';  $tr\dot{\alpha}yo$ -dasa 6 (AV. VS. TS.) 'thirteen'; cátur-daśa' 'fourteen'; páñca-daśa 'fifteen'; só-daśa (VS. TS.) 'sixteen'; saptá-daśa (TS.) 'seventeen'; astá-daśa (TS.) 'eighteen'; náva-daśa (VS.) 'nineteen'.

b. The remaining cardinals are substantives. The names of the decades from 'twenty' to 'ninety' are either old Dvandva compounds or derivatives formed with the suffix -ti. They are vim-sati- 'twenty'; trim-sat 'thirty';

<sup>1</sup> Cp. Neisser, BB. 30, 303.

4 With ékā- for éka- under the influence of dvá-daša.

5 Here the N. m. du. form dvā is retained

7 As first member of a compound catieris regularly accented cátur-.

8 For sas-daša, see above 43, b, 3; 56, b.

<sup>&</sup>lt;sup>2</sup> The pronominal endings are recognized instead of the stem form dva. as alternative in the later language as regards dvitiya- and trtiya-; the Brhaddevata (VIII. 95) has prathamasyām as well as dvitīyasyām.

<sup>3</sup> ubhá- 'both' is declined in the dual only: N. A. m. ubhá and ubháu, f. ubhé, I. ubhábhyam (once in RV.), G. ubháyos (twice in RV.).

<sup>6</sup> In this and other numeral compounds the N. m. plural form remains in every case; e. g. tán ... tráyas-trimsatam á vaha (1. 452) 'bring those thirty-three'.

catvārim-śát 'forty'; pañcā-śát 'fifty'; saṣ-ṭi- 'sixty'; sapta-ti- 'seventy'; aśī-ṭi-'eighty'; nava-ti- 'ninety'. The last four are abstract fem. nouns derived from the simple cardinal (except asi-ti-) and meaning originally hexad etc. (of tens)'. The others are fem. compounds, the first member of which is 'two', 'three', 'four', or 'five', and the second a remnant of the IE. word for 'ten': thus trim-sát meant 'three tens'. vimsatí- was probably in origin an old dual of this formation which ended in -7 but was transformed by the influence of sasti- etc. to a singular fem. in -ti<sup>2</sup>.

c. The numbers intermediate between these decades are Dyandya compounds formed by prefixing the accented unit to the decade; thus astávimsati- (VS.) 'twenty-eight'; éka-trimsat (VS.) 'thirty-one'; tráyas-trimsat 'thirtythree'; náva-catvārimśat (TS.) 'forty-nine'; náva-sasti- (TS.) 'sixty-nine'; návāsīti- (TS.) 'eighty-nine'; páñca-navati- (TS.) 'ninety-five'; sán-navati- (TS.) 'ninety-six'; aṣṭā-navati- (TS.) 'ninety-eight'.

a. In the TS., the number preceding a decade is also expressed by ékān ná 'by one not' = 'minus one'; thus ékān ná vimšati- 'twenty less one' = 'nineteen'; ékān ná catvārimsát 'thirty-nine'; ékān ná sasti- 'fifty-nine'; ékān násīti- 'seventy-nine'; ékān ná satám 'a hundred less one', 'ninety-nine'3.

β. Intermediate numbers may also be expressed by adding together unit and decade with or without ca; e. g. náva ca navatím ca 'ninety and nine'; navatím náva 'ninety-nine'.

d. The numbers expressing 'a hundred' and its multiples are s'atá-'100'; sahásra- '1000'; a-yiíta- (AV. TS.) '10000'; ni-yiíta- (TS.; Kh. IV. 128) '100000'; pra-yúta- (VS. TS.) '1 000 000'; árbuda- (TS.; Kh. IV. 128) '10 000 000'; nyàrbuda-(AV. VS. TS.) '100000000'4.

a. Intermediate numbers are compounded in the same way with satá- as with the preceding decades; e. g. éka-satam 'a hundred and one'; cátuh-satam 'a hundred and four';

trimśac-chatam 'a hundred and thirty'.

β. Multiples may be expressed in two ways. Either the larger number is put in the dual or plural multiplied by the smaller one used adjectivally; e. g. dvé šaté (VII. 1822) 'two hundred'; saṣṭiṃ sahásrā (VI. 266) 'sixty thousand'; trini śatā trī sahásrāni trimśac ca náva ca (III. 99) 'three thousand three hundred and thirty-nine'. Or the multiplier may be prefixed to the larger number, forming with it a possessive compound accented on the final syllable; e. g. tráyastrimsat trisatáh satsahasráh (AV.) six thousand three hundred and thirty-three'. Numbers below a hundred are sometimes used multiplicatively in these two ways; e. g. navatir nava (1. 8413) 'nine nineties' = 'eight hundred and ten'; tri-sattá-5 'thrice seven'; tri-navá- (VS.) 'having thrice nine'.

#### Inflexion.

406. With regard to their inflexion, which in many respects is peculiar, the cardinals may be divided into three groups.

a. The first group comprises the first four numerals. These are the only cardinals which, like other adjectives, distinguish the genders. They also distinguish the numbers as far as the sense admits: éka- 'one', while inflected chiefly in the singular, forms a plural also in the sense of 'some'; dvá-'two' is of course inflected in the dual only; and tri- 'three' and catiir- 'four' in the plural only.

I. éka- is declined like the second group of pronominal adjectives. The only form of the abl. sing.3 met with follows the nominal declension,

<sup>2</sup> Cp. Brugmann, KG. 443, 1.

4 In TS. VII. 220 these numerals, followed inst. trisaptáis. by samudrá-, mádhya-, ánta-, parārdhá-, occur

5 Inflected according to the a- declension:

6 See above 403, 2.

<sup>3</sup> In the TS. (B.) are also met with ékasman ná pañcāsát and ékasyai ná pañcāsát (VII. 4. 73) 'forty-nine': WHITNEY 477, b.

r asi- is radically related to astáu, cp. in succession: we may infer from the first few that each successive number is equal to ten times the preceding one; cp. WHITNEY 475, c. The contents of TS, VII, 2, 11-20 are almost entirely numerals.

viz. ékāt, used in the compound numerals ékān ná trimsát 'twenty-nine' etc. occurring in the TS. A single dual case, from cka- in the sense of 'a certain', appears in éke yuvati (AV. x. 742) 'a certain pair of maidens'. The forms to be found in the Samhitas are: m. sing. N. ékas. A. ékam. I. ékena. G. ékasya. L. ékasmin; pi. N. éke. D. ékebhyas. — f. N. ékā. A. ékām. I. ékayā. G. ékasyās; du. N. éke (AV.); pl. N. ékās (AV.). — n. N. sing. ékam; pl. ckā.

2. dvá- 'two', declined in the dual only, is quite regular. The forms occurring are: m. N. dvá, dváu. I. dvábhyām. G. dváyos. L. dváyos. f. N. dvé. I. dvábhyām. — n. N. dvé. L. dváyos.

- a. The dual form  $dv\bar{d}$  is retained in the first member of the numeral compound dvā-daša 'twelve'. Otherwise dvi- is used as the stem of dva- in derivation, e. g. dvi-dhā 'twofold'; and as the first member of compounds, e. g. dvi-pád- 'biped'.
- 3. The cardinal tri- 'three' is, in the masc. and neut., inflected like a regular i- stem. The fem. stem is tisf-: the gen. pl. is once (v. 692) written tisrnám (though the r is actually long metrically). The forms occurring are: m. N. tráyas. A. trin. I. tribhis. D. tribhyás. G. trīnám. L. trish. f. N. tisrás. A. tisrás. I. tisŕbhis. D. tisŕbhyas. G. tisřnám². L. tisŕsu. n. N. A. tri, trini.
- a. The stem used in derivation and compounding is regularly tri-, e.g. tri-dhā 'in three ways'; tri-pád- 'three-footed'. But tr- appears in tr-tá- (AV.) 'third', as a N., and in the secondary ordinal tr-t-tva- 'third'; and in numeral compounds trum appears in trim-sát 'thirty', and tráyas in tráyo-dasa 'thirteen', and tráyas-trimsat 'thirty-three'.
- 4. catúr- 'four' has the stem catvár- in the strong forms of the masc. and neut. In the gen. it has the peculiarity of taking n before the ending ām, though the stem ends in a consonant3. The fem. stem is cátasr-, which is inflected like tist- and shifts its accent like páñca. The forms occurring are: m. N. catváras. A. catúras. I. catúrbhis. D. catúrbhyas (AV.). G. caturnám+. f. N. cátasras. A. cátasras. I. catasíbhis. — n. N. A. catvári.
- a. The stem used in derivation and compounding is regularly catur-; e. g. catur-dhā 'in four ways'; catur-dasa 'fourteen'; catus-pad-6 'four-footed'. But it is once catvārim- (from the n. pl.) in the numeral compound catvārimsát 'forty'.
- b. The second group, comprising the cardinals from 'five' to 'nineteen', though used adjectivally, does not distinguish gender, and takes no ending in the nom. and acc. These numerals also share the same peculiarities of accentuation 7.
  - 5. N. A. páñca 'five'. I. pañcábhis. D. pañcábhyas. L. pañcásu.
  - 6. sás- 'six': N. A. sát. I. sadbhís. D. sadbhyás8.
  - 7. N. A. saptá 'seven'. I. saptábhis. D. Ab. saptábhyas. G. saptánám.
- 8. That the cardinal for 'eight' was an old dual 9 is indicated by its forms in the N. A. astá, astáu and in the only other cases occurring. I. astābhís, D. aṣṭā-bhyás (TS.). According to the analysis of the Pada text in a late passage of the RV. (x. 2715), astóttaráttat contains the N. astá, doubtless because it is preceded by saptá and followed by náva and dása.
- a. The stem used in compounding has mostly the dual form astā; thus astā-pad-'eight-footed', aṣṭā-vandhura- 'eight-seated' 10; aṣṭā-daśa- (TS.) 'eighteen', aṣṭā-vimśā- (AV.)

<sup>1</sup> See above 12, 13; cp. BENFEY, Vedica und Verwandtes 4.

<sup>&</sup>lt;sup>2</sup> On the accentuation, see 94, 2 a.

<sup>3</sup> It shares this peculiarity with san-nam, the gen. plur. of sas-, which however does not seem to occur in any of the Samhitas.

<sup>4</sup> With accent on the final syllable like the genitives of páñca etc.

<sup>6</sup> On the Sandhi, see above 78.

<sup>7</sup> That is, of accenting  $-\dot{a}$  before the terminations -bhis, -bhyas, -su, and the final syllable in the gen. See above, 93.

<sup>8</sup> Cp. note 3.

<sup>9</sup> Cp. Brugmann, KG. 441, 8.

<sup>10</sup> These are the only two occurrences in the RV., for in asia-karná- (x. 627) the first 5 G. catasrnam and L. catasrsu occur in B. member is doubtless a past participle.

'twenty-eightfold', aṣṭā-cakra- (AV.) 'eight-wheeled', aṣṭā-pakṣa- (AV.) 'eight-sided', aṣṭā-yogā- (AV.) 'yoke of eight'. The form aṣṭa-begins to appear in the AV. in the derivative aṣṭa-dhā 'in eight ways'; and in the compounds aṣṭa-kṛrtvas 'eight times', aṣṭā-yoni- 'having eight wombs', aṣṭa-vṛṣā- 'eight times chief'.

- g. N. A. náva 'nine'. I. navábhis. D. navábhyas (TS.). G. navānám.
- 10. N. A. dása 'ten'. I. dasábhis. D. dasábhyas (TS.). G. dasānām. L. dasásu.
- II. N. A. ékādaśa 'eleven'. D. ekādaśábhyas (TS.).
- 12. N. A. dvádasa 'twelve. D. dvādasábhyas (TS.).
- 13. N. A. tráyodaśa 'thirteen'. I. trayodaśábhis (TS.). D. trayodaśábhyas (TS.).
- 14. N. A. cáturdasa 'fourteen'. D. caturdasábhyas (TS.).
- 15. N. A. páñcadaśa 'fifteen'. D. pañcadaśábhyas (TS.).
- 16. N. A. súdasa (VS.) 'sixteen'. D. sodasábhyas (TS.).
- 17. 18. The N. of the cardinals for 'seventeen' and 'eighteen' does not seem to occur in Mantras. D. saptadasábhyas (TS.); astādasábhyas (TS.).
- 19. N. A. návadaśa (VS.) 'nineteen'. I. navadaśábhis (VS.). D. ékān ná viṃśatyái (TS.).
- c. The third group of cardinals, comprising the numbers from 'twenty' onwards, are substantives inflected regularly according to the declension of the stem final; e. g. N. vinsati-s 'twenty', A. vinsati-m, I. vinsaty-å; N. trinsåt 'thirty', A. trinsåt am, I. trinsåt ā, L. trinsåt-i. The decades 'twenty' to 'ninety' and their compounds are fem. and nearly always inflected in the sing.; but if the sense requires it they may be used in the plural; e. g. nåva navatih 'nine nineties'; navānām navatīnām (I. 1911) 'of nine nineties'.
- a. śatá- 'a hundred' and sahásra- 'a thousand' are neuters, which may be declined in all numbers; e. g. ἀνέ śaté 'two hundred'; saptá śatáni 'seven hundred'.

# Syntactical employment of the Cardinals.

- 407. a. The numerals from 'one' to 'nineteen' are used adjectivally; e. g. tráyo vīrāḥ (III. 568) 'three heroes'; saptábhiḥ putráiḥ (X.72°) 'with seven sons'; jánesu pañcásu (III. 379) 'among the five races'. The bare stem (in the numerals of the second group) is, however, sometimes used in the oblique cases; e. g. saptá hótrbhiḥ (III. 104) 'with seven priests'; ádhi páñca kṛṣṭiṣu (II. 21°) 'over the five tribes'.
- a. Exceptionally these numerals are, however, to be met with governing a genitive; e. g. dáša kalášānām (IV. 3219) 'ten jars'.
- b. The third group of numerals (from 'twenty' upwards), as singular substantives, is treated in two ways.
- 1. They may govern a genitive; e. g. pañcāśátam áśvānām (v. 185) 'fifty horses'; saṣṭim áśvānām (viii. 46<sup>29</sup>) 'sixty horses'; śatáṃ gónām (i. 126<sup>2</sup>) 'a hundred kine'. So also when śatá- and sahásra- are in the du. or pl.; e. g. gávāṃ śatáni (vii. 103<sup>10</sup>) 'hundreds of kine'; sahásrāṇi gávām (viii. 51<sup>2</sup>) 'thousands of kine'.
- 2. They may, remaining singular, agree in case with the following plural, being then used adjectivally (not appositionally, because they always precede the substantive in this use); e. g. trimśád deváh (III. 99) 'thirty gods'; trimśátam yójanāni (I. 1238) 'thirty leagues'; trimśátā háribhih (II. 185) 'with thirty bays'; śaténa háribhih (II. 186) 'with a hundred bays'; śatám phrah (IV. 271) 'a hundred forts'; sahásram hárayah (IV. 463) 'a thousand bays'. The following word, agreeing with sahásra-, may be in the singular as a collective; thus śúnaś cic chépam niditam sahásrād yūpād amuñcah (V. 27) 'Sunahśepa, who was bound, thou didst release from a thousand posts'.
- a. śatá- and sahásra- have, in their adjectival use, the peculiarity of sometimes either being put in the plural themselves or retaining the N. A. neuter sing. form (like páñca) when in agreement with an inst. pl.; e. g. śatā púraḥ (1.538) 'a hundred forts'; sahásrāny

ádhirathāni (x. 989) 'a thousand wagonloads'; śatám pūrbhih (vi. 488) 'with a hundred

forts'; sahásram r'sibhih (1. 1898) 'with a thousand seers'.

β. The numeral pronouns káti 'how many?', táti 'so many', yáti 'as many', remain uninflected in agreement with nominatives and accusatives plural, which are the only cases found occurring with them in the Samhitas 1.

#### B. Ordinals.

- 408. The ordinals, being all adjectives ending in -a, are declined throughout in the masc, and neut, according to the nominal  $\alpha$ -declension. The feminine is formed with  $-\bar{\iota}^2$ , except in the first four, which take  $-\bar{a}$ , viz. prathamá-3, dvitíyā-, tṛtíyā-3, turíyā- (TS.). The ordinals may best be divided into four groups according to the formation of their stems.
- 1. The ordinals from 'first' to 'tenth' are formed with various suffixes, viz. (-t)-íya, -tha, -thamá, -má, the first four in a somewhat irregular manner.
- a. pra-thamá- 'first' was doubtless formed from pra- with the superlative suffix -tama4, meaning 'foremost', the initial of the suffix being probably changed under the influence of other ordinals formed with -tha (sasthá-, etc.).
- b. The next three ordinals are formed with the suffix -tya: dvit-tya-'second', trt-tya- 'third', secondarily through dvi-tá- 'second', and tr-tá- 'third', both used as names; tur-tya- 'fourth' for \*ktur-tya- (beside catur-thú-). The latter when used in the fractional sense is accented therefore. (AV.) 'quarter'5.
- c. The ordinal for 'sixth', besides the alternative forms for 'fourth' and 'seventh', is formed with -tha: sas-thá- (AV. VS.), catur-thá- (AV. VS.), saptá-tha- (RV.).
- d. The ordinals for 'fifth' and 'seventh' to 'tenth' are formed with -ma: pañca-mú- (AV. VS.), sapta-mú- (VS.) beside saptú-tha-, asta-mú-, nava-mú-, daśa-má-.
- 2. The stems of the ordinals for 'seventh' to 'nineteenth' are the same as those of the cardinals, except that they are accented on the final syllable. In inflexion they differ from the cardinals in following the ordinary nominal a- declension; thus from ekādaśá- 'eleventh' are formed: sing, m. A. ekādaśám; pl. N. ekādaśásaļ, A. ekādaśán, I. ekādaśáis.
- 3. The ordinals for 'twentieth' to 'ninetieth' (including their compounds) seem, judged by some three examples met with in the Samhitas (and some four others in B.), to have been abbreviated forms of the cardinals, ending in -á: eka-vimsá- 'twenty-first' (B.) 'consisting of twenty-one' (VS.), catvārimsá-(RV.) 'fortieth', astā-catvārimsá-(VS.) 'forty-eighth'; catus-trimsá-(B.) 'thirty-fourth', dvā-pañcāśá- (B.) 'fifty-second', eka-saṣṭá- (B.) 'sixty-first'.
- 4. The ordinals for 'hundredth' and 'thousandth' are formed with the superlative suffix -tama: śata-tamá-; but sahasra-tamá- has been noted in B. passages only (TS. SB.).

### C. Numeral Derivatives.

- 409. A number of derivatives, chiefly adverbs, are formed from the cardinals.
- a. There are a few multiplicative adjectives derived with the suffixes -a, -ya, -taya, -vaya; thus tray-á- 'threefold' (from tri-); dva-yá- 'twofold'; dása-taya- 'tenfold'; cátur-vaya- 'fourfold'.
  - b. Multiplicative adverbs are formed in three different ways. 'Once'

<sup>&</sup>lt;sup>2</sup> Inflected like stems in derivative -7: 377. Specially'. See Brugmann, KG. 447, I. 5 Similarly in B. passages Attention. form each according to the pronominal de- trtīja- 'third'. clension in the AV. (403, 3, c).

is expressed by sa-kit, which originally seems to have meant 'one making'. The next three are formed with the suffix -s: dvi-s 'twice'; tri-s 'thrice', catús (AV.) 'four times' (for \*catúr-s, cp. Av. čathru-š)1. Others are expressed by the cardinal and the form kétvas 'times' (probably = 'makings', acc. pl. of \*kétu-), which, except in asla-krtvas (AV.) 'eight times', is a separate word; thus dása krtvas (AV.) 'ten times', bhúri krtvas (RV.) 'many times' 2.

c. Numeral adverbs of manner are formed with the suffix -dha: thus dvi-dhā 'in two ways or parts'; similarly tri-dhā and tre-dhā, catur-dhā, pañca-dhá (AV.), sodhá3, sapta-dhá (AV. VS. TS.), asta-dhá (AV.), nava-dhá

(AV.), sahasra-dhā.

# VII. THE VERB.

BENFEY, Vollstandige Grammatik 788-920. - WHITNEY, Sanskrit Grammar 527-1073. - DELBRÜCK, Das altindische Verbum, Halle 1874. - AVERY, Contributions to the history of verb-inflection in Sanskrit, JAOS. x. (1876), 219-276; 311-324. — Jul. v. Negelein, Zur Sprachgeschichte des Veda. Das Verbalsystem des Atharva-Veda, Berlin 1898.

- 410. General characteristics. The verbal system comprises the two groups of forms which include, on the one hand, the finite verb and. on the other, the nominal formations connected with the verb. The former group represents the forms made with personal endings, viz. indicative, subjunctive, injunctive, optative, and imperative. The latter group consists of infinitives (nouns of action) and participles (agent nouns). These differ from ordinary nouns inasmuch as they participate in the characteristics of the verb, governing cases, being connected with particular tenses, being used in different voices, and being liable to tmesis when compounded with prepositions.
- A. The finite verb distinguishes the primary conjugation of the root and the secondary conjugation of derivative formations, viz. desiderative, intensive, causative, and denominative. The latter class does not, however, differ in origin from the former; but doubtless because (in contrast with the present stems of the primary conjugation) it preserves the distinctive meaning of the stem, it extends the form of the present stem beyond the present system to the whole conjugation.

The finite verb further distinguishes voice, tense, mood, number, and person.

- There are two voices, active and middle, which are distinguished throughout the inflexion of the verb (largely also in the participle, though not in the infinitive). The middle forms may be employed in a passive sense, except in the present system where there is a special passive stem inflected with middle terminations. Some verbs are conjugated in both active and middle; e. g. kṛnú-ti and kṛṇu-te' 'makes'; others in one voice only, e. g. ás-ti 'is'; others partly in one and partly in the other; e.g. pres. várta-te 'turns', but perf. vavárt-a 'has turned'.
- b. There are five tenses in ordinary use, viz. the present, the imperfect, the perfect, the agrist, and the future. The terms imperfect, perfect, and agrist are here used in a purely formal sense, that is, as corresponding in formation to the Greek tenses bearing those names. No Vedic tense has an imperfect meaning, while the perfect sense is generally expressed by the aorist.
- c. Beside the indicative there are four mocds, the subjunctive, the injunctive, the optative, and the imperative, all formed from the stem of the

<sup>&</sup>lt;sup>1</sup> Cp. Brugmann, KG. 450, 1.

<sup>3</sup> For sas-dhá; cp. above 43, b, 3; 56, b; <sup>2</sup> Cp. WHITNEY 1105, 2. and p. 307, note 8.

present, the perfect, and the agrist. The imperfect has no moods; and the only modal form occurring in the future is the unique subjunctive karisyās, from kr- 'make'.

d. The finite verb is, as in other languages, used in three persons in all tenses and moods excepting the imperative, where the first persons are supplied from the subjunctive. As in declension, the three numbers, singular, dual, and plural, are in regular use throughout.

B. The nominal verb-forms comprise:

a. Participles. The tense-stem of the present, future, agrist, and perfect each forms an active and a middle participle; e. g. gácchant-, gáccha-māna-'going'; karisyánt- 'going to do', yaksyá-māṇa- 'going to sacrifice'; kránt-, krāṇá- 'making'; cakṛváṃs-, cakrāṇá- 'having done'. Besides these, there are passive participles, present, perfect, and future. The present form is made from the passive stem in -ya; e. g. stūyá-māna- 'being praised'. The perfect passive participle, on the other hand, is formed from the root; e. g. kṛ-tá- 'made'; as is also (with few exceptions) the future passive participle or gerundive; e. g. vánd-ya- 'praiseworthy'.

b. Gerunds. These are stereotyped cases (chiefly instrumentals) of verbal nouns, and have the value of indeclinable active participles with a prevailingly

past sense; e. g. gatví and gatváya 'having gone'.

c. Infinitives. There are about a dozen differently formed types of infinitives, which are cases of verbal nouns made directly or with a suffix from the root, and hardly ever connected with a tense stem; e. g. idh-am 'to kindle'; gán-tavái 'to go'.

### A. The Finite Verb.

411. All forms of the finite verb may be classed under four groups: (1) the present system, comprising the present tense together with its moods and participles, and its augmented past tense, the imperfect; (2) the perfect system, comprising the perfect tense together with its moods and participles, and its augmented past tense, the pluperfect (494); (3) the aorist system, comprising the agrist tense together with its moods and participles; (4) the future system, comprising the future tense<sup>3</sup> together with its participles, and its augmented past form, the conditional.

# Personal Endings.

412. The characteristic feature of the finite verb is the addition of personal endings5. These are divided into active and middle; in each of which groups, again, primary and secondary forms are to be distinguished. The primary forms appear throughout the present and future indicative, but in the middle only of the perfect indicative 6. The secondary forms appear in augmented indicatives, in injunctives (which are identical in form with unaugmented past indicatives), in the imperative (several forms of which are identical with the injunctive)7, and in the optative. The subjunctive fluctuates between the primary and the secondary endings, but the latter are about

<sup>1</sup> Over 18000 occurrences of verb-forms have been noted by AVERY (221) in the this formation in the Samhitas.

<sup>&</sup>lt;sup>2</sup> This term is used in a purely formal | 771-798. sense, as this rare tense has not a pluperfect meaning.

<sup>3</sup> There is no periphrastic future in the

<sup>4</sup> There is only a single occurrence of

<sup>5</sup> Cp. Avery 225 f.; Brugmann, KG.

<sup>6</sup> The 3. pl. has here the peculiar ending

<sup>7</sup> Cp. Brugmann, KG. 729.

twice as frequent as the former'. The perfect indicative active has some of the regular secondary endings (-va, ma, -ur), but the rest are of a peculiar type.

# Active endings.

Primary. Sing. 1. -mi2. 2. -si. 3. -ti3. Du. 1. -vas4. 2. -thas5. 3. -tas5. Pl. 1. -masi, -mas6. 2. -tha, -thana7. 3. -anti8.

Secondary. Sing. 1. -m. 2. -s9. 3. -t10. Du. 1. -va. 2. -tam. 3. -tam. Pl. 1. -ma. 2. -ta, -tana 11. 3. -an, -ur 12.

# Middle endings.

Primary. Sing. 1. -e. 2. -se 13. 3. -te 14. Du. 1. -vahe 15. 2. -āthe 16. 3. -āte 16. Pl. 1. -mahe<sup>17</sup>. 2. -dhve<sup>18</sup>. 3. -ante<sup>19</sup>.

a. Beside the perfect endings containing r, act. du. 2. -athur, 3. -atur, pl. 3. -ur, middle -re, some verbs have endings with initial r in the 3. pl. mid. ind. and opt. of most tenses. These endings are -re and -rate in the pres. ind.; -rire in the perf. ind.; -ran in the opt. pres. and the ind. imperfect, pluperfect, and aorist; -ram in the ind. aor.; -ranta in the pluperfect; -rata in the opt. In the AV. -rām and -ratām appear in the 3. pl. impv. mid. 26.

b. More than twenty roots have forms in which certain endings are added to the root with the connecting vowel i or less commonly i. These roots are an- 'breathe', am- 'injure', as- 'be', Id- 'praise', Is- 'rule', cud- 'impel', jan- 'beget', tu- 'be strong', dhvan-'sound', bru- 'speak', vam- 'vomit', vas- 'clothe', vrs- 'rain', snath- 'pierce', sru- 'hear',

I AVERY 227 (middle).

<sup>2</sup> The subjunctive has -āni and instead of it (13 times)  $-\tilde{a}$ ; cp. AVERY 225 (mid.) and BRUGMANN, KG. 772.

3 The perf. ind. has the peculiar endings 1. -a or -au, 2. -tha, 3. -a or -au in the

4 This ending does not occur in the RV.;

cp. Delbrück, Verbum p. 24.
5 The perf. act. du. has the peculiar endings 2. -athur, 3. -atur.
6 -masi occurs 109 times in the RV., being

more than 5 times as frequent as -mas (cp. WHITNEY 548; AVERY 226), but in the AV. -mas has become commoner than -masi in the proportion of 4 to 3. On these endings | junctive in the RV. and AV. cp. Neisser, BB. 30, 311-315.

7 In the RV. -tha occurs more than 6 junctive. times as often as -thana (AVERY 226). The perf. ind. has the peculiar ending -a.

8 The an is replaced by a (for the sonant nasal) in reduplicated verbs and a few others treated as such; cp. Delbrück, Verbum p. 51

9 The impv. act. adds -dhi, -hi, -āna, -tāt or no ending.

10 The 3. impv. has -tu instead of -t; in the RV. and TS. also -tat; see 418 b.

II In the RV. -ta occurs more than 4 times as often as -tana (560 occurrences to 125: AVERY 226).

12 In the ind. perf., the ind. s-aorist, and the optative, -ur always appears, sometimes also in the imperfect; cp. Delbrück, Verbum p. 52. The impv. has -antu, which loses its n under the same conditions as -anti.

13 In the AV. -sai is the only form of the subjunctive (WHITNEY 561, a).

14 -tai occurs once in the RV. for -te in the subjunctive; it is the usual form in the AV. In the RV. -c sometimes occurs for -le in the ind. pres.; it is the only ending in the perf. ind.

15 The subjunctive has -vahai.

16 In the a- conjugation -cthe and -cte; aithe and -aite appear in the RV. as subjunctives in several forms; -aite occurs once as an indicative; cp. Whitney 547, c and 561, a; Delbrück, Verbum 106 and p. 45

17 -mahai is the usual form in the sub-

18 In the RV. once -dhvai in the sub-

19 In the impv. -antām and -atām.

20 In the optative  $(\bar{\imath}y)$ -a.

21 In the impv. -sva.

22 In the impv. -tām.

23 In the a-conjugation -ethām and -etām.

24 Once -dhva in the RV.

25 In the impv. -antām; both this ending and -anta lose their n under the same conditions as -anti. The perf. ind. has -re.

<sup>26</sup> See Delbrück, Verbum 76-78; AVERY 226; BRUGMANN, KG. 797; cp. also Bollen-SEN, ZDMG. 22, 599; KUHN, KZ. 18, 400; BENFEY, Ueber die Entstehung und Verwendung der im Sanskrit mit ranlautenden Personalendungen, Abh. d. Ges. d. Wiss. zu Göttingen 15, Göttingen 1870; WINDISCH, Berichte der sächsischen Gesellschaft d. Wiss. 1889, p. 1 ff.; ZIMMER, KZ. 30, 224 ff.

315

śwas- 'breathe', sidh- 'repel', stan- 'thunder', stambh- 1 'prop'. There are also a few 3. plurals in -i-re, viz. rnvire, pinvire, srnvire, sunvire and hinvire, in which the connecting vowel i appears 2.

# The Augment.

413. The augment<sup>3</sup> (originally doubtless an independent temporal particle) consists of the syllable a-, which is prefixed to the imperfect, pluperfect, aorist, and conditional, giving to those forms the signification of past time. It invariably bears the acute when the verb is accented, like the preposition immediately preceding a verb in a principal sentence (III). The augment sometimes appears lengthened before n, y, r or v, the only examples being á-nat, from naś- 'attain'; á-yunak (beside a-yunak), á-yukta (beside á-yukta), and a-yukṣātām, from yuj- 'join'; a-rinak and a-raik, from ric- 'leave'; a-var, from vr- 'cover'; ā-vrni, from vr- 'choose'; ā-vrnak, from vrj- 'turn'; ā-vidhyat (beside á-vidhyat), from vyadh-'wound'. The only one of these forms written with  $\bar{a}$  in the Pada text is  $\hat{a}$ -var (but once also a-var). There is also one passage (II. 17.9) in which the metre seems to require that vás the 'vidhat should be read vás ta ávidhat.

a. With the initial vowels i, u, r the augment irregularly contracts to the Vrddhi vowels ai, au, ar; e. g. áicchas, 2. sing. imperf. of is- 'wish'; aunat, 3. sing, imperf. of ud-'wet'; arta, 3. sing, aor. of y-'go'. This appears to be a survival of a prehistoric contraction of  $\bar{a}$  with i, u, r to  $\bar{a}i$ ,  $\bar{a}u$ ,  $\bar{a}r$ ,

which is otherwise almost invariably represented by e, o,  $ar^5$ .

b. The augment is very often dropped. This optional loss is to be explained as a survival from the Indo-European period when, being an independent particle, the augment could be dispensed with if the past sense was clear from the context. In the RV. the number of examples in which the augment is wanting (about 2000) is considerably more than half that of forms in which it is prefixed (about 3300), more than one half of these unaugmented forms being agrists. In the AV, the number of forms which lose the augment is less than half that of those which retain it, more than four fifths of these unaugmented forms being aorists. In sense, the forms which drop the augment are either indicative or injunctive. The indicatives have for the most part a past, but often also (generally when compounded with prefixes) a present meaning. In the RV., the indicative and injunctive unaugmented forms are about equal in number6; the injunctives being used in nearly one-third of their occurrences with the prohibitive particle  $m\dot{a}$ . In the AV. about nine-tenths of the unaugmented forms are injunctive, some fourfifths of these being construed with  $m\hat{\alpha}$ .

#### Formation of the Moods.

414. 1. Subjunctive 7. The subjunctive is a very common mood in the RV. and the AV., occurring three or four times as often as the optative. It is formed from the present, the perfect, and the aorist8. The stem is formed by adding  $\alpha$  to the indicative stem. When a strong and weak stem are distinguished, the a is attached to the former; while it coalesces to  $\bar{a}$  with Thus the subjunctive stem of the final of the stem in the a- conjugation.

8 Only a single form of the future sub-

<sup>1</sup> AVERY 226.

<sup>5</sup> Cp. above 19 a, 4. 5. 6 WHITNEY 587, a. According to AVERY 225, the unaugmented forms of the RV. junctive occurs.

have a historical sense in 488 instances

<sup>7</sup> See especially W. NEISSER, Zur vedischen Verballehre (Inaugural-Dissertat.), Göttingen 1882 = BB. 7 (1883), 211-241.

In the middle, (1) the only secondary ending is found in the 3. pl., -anta, which occurs beside and more frequently than -ante; (2) the ending -ai, which is normal in the 1. sing. (being = a + e), has spread from that person to forms in which e would be normal. Thus the 1. du. has  $-\bar{a}vahai$  only; in the 1. pl.,  $-\bar{a}mahai$  is the usual form in the RV. and AV. beside the rarer  $-\bar{a}mahe$ ; in the 2. sing., -sai always appears for -se in the AV., though it does not occur in the RV.; in the 2. pl., -dhvai occurs once for -dhve3 in the RV.; in the 2. 3. du., -aithe and -aite occur several times in the RV., being doubtless intended for subjunctive modifications4 of the indicative -ethe and -ete of the a- conjugation; in the 3. sing., -tai occurs once in the RV. for -te, and is the usual form in the AV.

a. The subjunctive endings in combination with the -a of the stem are accordingly the following:

Active Middle du. sing. du. pl. sing. -ā-vahai -ā-mahai, -ā-mahe I. āni, -ā -ā-va` -ā-ma I. -ai 2. -a-si<sup>5</sup>, -a-s<sup>6</sup> -a-thas -a-dhve, -a-tha 2. -a-se, -a-sai -aithe -a-dhvai 3.  $-a-ti^{7}$ , -a-t-a-tas -a-11 3. -a-te, -a-tai -aite -a-nte,

415. Injunctive. The unaugmented forms of past tenses used modally, are sometimes called improper subjunctives<sup>8</sup>, but they are more suitably termed injunctives, as they appear to have originally expressed an injunction. This is borne out by the fact that since the IE. period the second and third persons imperfect (except the 2. sing. act.) had come to be used as regular imperatives expressing a command<sup>9</sup>. But the unaugmented forms of the imperfect that could be distinguished from the regular imperative (as bháras, bhárat, bharan) and especially unaugmented aorists 10, are often used in a sense fluctuating between that of the subjunctive (requisition) and of the optative (wish) 11. Thus bháratu 'let him bear', but bhárat 'may he bear', bhát 'may he be'.

416. Optative. This mood, which is comparatively rare in the Samhitās, is formed from the present, the perfect, and the aorist. The stem is formed with  $-y\acute{a}$  or  $-\bar{\imath}$ , which, when strong and weak stem are distinguished,

<sup>&</sup>lt;sup>2</sup> Cp. Whitney 560e; Brugmann, KG.719. 7 In the 2 The subjunctive in ā is in origin an old in the RV.

injunctive: Brugmann, KG. 716 (end).
3 In the form mādayādhvai 'may ye rejoice'.
4 kṛṇvaite, however, appears once as an

indicative; see Delbrück, Verbum p. 45.
5 In the aor. subj., -si occurs only once in the RV.

<sup>6</sup> In the a-conjugation  $\bar{a}$  appears throughout:  $-\bar{a}si$ ,  $-\bar{a}s$ , etc.

<sup>7</sup> In the aor. subj., -ti occurs only six times in the RV.

<sup>8</sup> WHITNEY 563.

<sup>&</sup>lt;sup>9</sup> The 3. sing. and pl., e. g. bhárat-u and bhárant-u, are explained as injunctives and the particle u: BRUGMANN, KG. 729, I.

<sup>10</sup> The aorist injunctives were probably used originally with the prohibitive particle  $m\dot{a}$  only: BRUGMANN, KG. 716, 2 (end).

<sup>11</sup> Cp. WHITNEY 575.

are attached to the latter. In the a- conjugation  $-\bar{\imath}$  is added (coalescing with a to e) throughout; in other verbs -ī is added in the middle only, and -yā (often to be read as  $-i\bar{\alpha}$ ) in the active only  $\bar{\alpha}$ .

a. Roots ending in \$\hat{a}\$ usually change that vowel to \$e\$ before \$-y\hat{a}\$: e. g. \$de-y\hat{a}m\$ (perhaps to be explained as dā ijām)? I would give'. But ā is sometimes retained, as

in yā-yām 'I would go'.

b. The endings are the secondary ones. There are, however, some irregularities in the I. sing. and the 3. pl. I. The 3. pl. mid. always takes ran instead of an. 2. The 3. pl. act. always takes -ur, before which the  $\bar{a}$  of  $-y\bar{a}$  is dropped, while in the a- conjugation y is interposed between  $e^3$  and -ur. 3. The 1. sing mid, has the peculiar ending a with y interposed between it and the modal -1. 4. The 1. sing. act. of the a- conjugation attaches -am instead of -m (the termination -em being unknown), interposing y between it and the e3 of the stem.

a. The endings of the optative in combination with the modal suffix are accordingly the following:

		r. Grade	d conjugation	1.	
	Active		• •	Middle	
sing.	du.	pl.	sing.	du.	p1.
1yá-m	-yā́-va	-yá-ma	1. <i>-ī-y-á</i>	-ī-váhi	-ī-máhi
2yá-s	-yá-tam	-yấ-ta	2ī-thās	-ī-y-āthām	-ī-dhvám
3. <i>-yā-t</i>	-yấ-tām	-y-úr	3 <del>ī-t</del> á	-ī-y-ātām	-ī-r-án
		2. a-	conjugation.		
Iе-у-ат	-e-va	-e-ma	1e-y-a	-e-vahi	-e-mahi
2e-s	-e-tam	-e-ta	2e-thās	-e-y-āthām	-e-dhvam
3e-t	-e-tām	-e-v-ur	3. <i>−e-ta</i>	-e-v-ātām	-e-r-an.

417. Precative. This is a form of the optative which adds an -s after the modal suffix in several persons, and is made almost exclusively from aorist stems. In the RV. there occur a few forms of the precative in three persons (1. 3. sing., 1. pl.) active, and in two persons (2. 3. sing.) middle; thus active: 1. sing.  $bh\bar{u}-y\bar{a}-s-am$  (aor.) 'may I be'; 3. sing.  $as-y\bar{a}s$  (for \*as'-yā-s-t) 'may he attain' (aor.); babhū-yās 'may he be' (perf.); 1.pl. kri-yā-s-ma 'may we do' (aor.); middle: 2. sing. man-s-ī-s-ṭhās (aor.) and 3. sing. man-s-ī-s-ta (aor.), from man- 'think'.

418. Imperative. This mood has no mood-sign of its own, as all the first persons are subjunctives and the second and third persons are mostly old injunctives. The purely injunctive forms are the 2. 3. du. and 2. pl. active and middle, ending in -tam, -tam, -ta; -atham, -atam, -dhvam. The 3. sing. pl. act. in -tu4 and -antu5, and the 3. pl. mid. in -antām5 may be modifications of injunctives. The imperative has, however, distinctive forms of its own in the 2. sing. act.: -dhi, -hi, -āna, -tāt; and in the middle: 2. sing. -sva and 3. sing. -tām or -ām.

a. The 2. sing. act. in the a-conjugation has no ending, employing the bare stem (like the vocative singular of the a- declension); e.g. bhára 'support'; neṣa 'lead' (aor. of  $\sqrt{n\bar{\imath}}$ ). In the graded conjugation, when a strong and weak stem are distinguished, the ending is attached to the latter: -dhi is added after both consonants and vowels, -hi (the later form of -dhi) after vowels only; thus ad-dhi 'eat'; sru-dhi and srnu-dhi 'hear'; i-hi 'go', jāgr-hi 'awake', pipr-hi 'save', sṛṇu-hi hear'. In the  $n\bar{a}$ - class, -hi is added

On the accentuation cp. above 9 and 24 a.

<sup>&</sup>lt;sup>2</sup> Cp. Brugmann, KG. 555 (bottom).

<sup>3</sup> The e (for a) is here probably due to Brugmann, KG. 728.

<sup>4</sup> Cp. Brugmann, KG. 729, 1; IF. 18, 71; DELBRÜCK, Vergl. Syntax 2, p. 357.

<sup>5</sup> The ending -antu and -antam lose their the influence of the other forms -es, -et, etc.: | n under the same conditions as -anti (p. 314, note 8).

only when the root ends in a vowel, but  $-\bar{\alpha}n\alpha^{T}$  when it ends in a consonant;

thus pu-nīhi 'purify', but as-āna 'eat'.

b. The ending -tāt occurs some twenty times in the RV. When strong and weak stem are distinguished, it is added to the latter; e. g. vit-tát 'thou shalt regard', dhat-tāt 'thou shalt place', kṛṇu-tāt 'thou shalt make', punī-tāt 'thou shalt purify', etc.2 Its use is almost restricted to the 2. sing. It is, however, once3 found in the RV. and once in the TS. in the sense of the 3. sing., once as 2. du. in the RV., once as 2. pl. in the TS., and once as I. sing. in AV.4. It appears to have the value of a future imperative, expressing an injunction to be carried out at a time subsequent to the present. It may originally have been identical with the abl. tād 'after that', 'then'; kṛnu-tāt would thus have meant 'do (it) then's.

# I. The Present System.

419. This group consists of a present indicative together with a subjunctive, an injunctive, an optative, an imperative, and participles, besides a past augmented tense called the imperfect because formed analogously to the Greek tense. This is the most important system, as its forms are about three times as common as those of the three other systems taken together<sup>6</sup>. Hence roots are generally classified according to the manner in which their stems are formed in the present system. Here two distinct conjugations may be conveniently distinguished.

The first or  $\alpha$ - conjugation, all the stems in which end in  $-\alpha$ , retains the stem unaltered (like the a- declension) in every tense, mood, and participle, accenting the same syllable throughout the present indicative, its moods and participles, as well as the unaugmented imperfect?. The secondary conjugations in -a (desideratives, intensives, causatives, denominatives) as well as

the future 8, follow this conjugation in their inflexion.

The second or graded conjugation is characterized by shift of accent between stem and ending, accompanied by vowel gradation. Minor differences consist in the loss of n in the 3. pl. middle, in the addition of another suffix (-āna instead of -māna) in the middle participle, in the employment of an ending in the 2. sing. impv. act., and in vowel gradation, with shift of accent, in the modal suffix of the optative.

# a. The first or $\alpha$ - conjugation.

420. The special characteristics of this conjugation are:

- 1. The -a of the stem is lengthened before the endings of the 1. du. and pl. which begin with v and m; e. g. jayamasi 'we conquer'; while the initial a of the endings of the 3. pl. -anti, -ante, -an, -anta, is dropped; e.g. bhára-nti 'they bear'.
- 2. The optative sign is throughout  $-\overline{\iota}$ , which combines with the -a of the present stem to e; e. g. bháves.
- 3. The 2. sing. impv. act. has no ending except the comparatively few instances (about sixteen) in which -tat is added.

4 WHITNEY, loc. cit.

6 WHITNEY 600, a.

<sup>8</sup> Also agrist stems ending in -a.

I On the origin of this peculiar imperative | 5 Brugmann, KG. 732. form cp. Brugmann, KG. 839, 5.

<sup>&</sup>lt;sup>2</sup> See Delbrück, Verbum 38. 5 times in the RV. as a 3. sing.

<sup>7</sup> But when the augment was added, it 3 Op. cit. 77; WHITNEY 571, b. AVERY, received the accent just like the verbal prehowever (225, bottom), states that it occurs position in a principal sentence (the verb itself remaining unaccented).

- 4. The 2.3. du. mid. substitute e for the  $\bar{a}$  of the endings  $-\bar{a}the$ ,  $-\bar{a}te$ ; e. g. 2. vahethe 'ye two travel', 3. vardhete 'they two thrive'.
  - 5. The middle participle regularly ends in -māna.
- a. Five classes or types may be distinguished in the present stems of the a- conjugation. These are: 1. Stems in which the radical syllable has a strong grade accented vowel; e. g.  $bh\acute{a}ra$ -ti, from bhr- 'bear'. 2. Stems in which the radical syllable has a weak grade vowel, the thematic a being accented?; e. g.  $ruj\acute{a}$ -ti, from ruj- 'break'. 3. Stems formed with the suffix -ya, being either (a) ordinary transitive or intransitive verbs  $^3$ , e. g.  $\acute{a}s$ -ya-ti 'throws'; or (b) passives, e. g.  $n\bar{t}$ -y $\acute{a}$ -te 'is led'. 4. Stems ending in -aya, being either (a) causatives (- $\acute{a}ya$ ) or (b) denominatives (- $ay\acute{a}$ )  $^4$ . 5. Stems formed with the suffix -sa, added to the reduplicated root, being desideratives; e. g.  $\rlap/{b}$ - $\rlap/{p}\bar{a}$ -sa- 'desire to drink'. The last two classes, which retain the present stem throughout their inflexion, constitute three of the secondary conjugations which will be treated separately below (541-570).

# 1. The radically accented α- class (bhάνα-).

- 421. This is by far the commonest type of the a-conjugation, about 300 such present stems occurring in the Samhitās<sup>5</sup>. The radical vowel takes Guna, unless it is medial and long by nature or position; thus from ji-'conquer': jáy-a-; nī-'lead': náy-a-; bhū-'be': bháv-a-; budh-'awake': bbdh-a-; srp-'creep': sárpa-; but jinv- 'quicken': jinv-a-; krīḍ- 'play': krīḍ-a-. Roots with medial a remain unchanged, e.g. vad- 'speak': vád-a-.
- a. There are, however, several irregularities in the formation of the present stem: I. \$\vec{uh}\$- 'consider' takes Guna: \$\delta ha-\$ (but \$\vec{uh}\$- 'remove' remains unchanged: \$\vec{uh} ha-\$); \$yuh-\$ 'hide' lengthens its vowel: \$y\vec{uh} ha-\$; \$kram-\$ 'stride' lengthens its vowel in the active: \$kr\vec{uh} na-\$ (but \$krama-\$ in the middle); \$krp-\$ 'lament' retains its vowel unchanged: \$krpa-\$.— 2. The roots dans-\$ 'bite' and \$sa\vec{uh}\$- 'hang' lose their nasal: \$d\vec{sh} sa, \$sa|\vec{u}-3.\$, \$\vec{um}\$- 'go', \$yam- 'reach', \$yu-\$ 'separate' form their stem with the suffix \$-cha-\$: \$g\vec{uc} cha-\$, \$y\vec{uc} cha-\$, \$y\vec{uc}
- 422. Present indicative. The forms of this tense which actually occur, if made from bháva-, would be as follows:

Active. Sing. 1. bhávā-mi, 2. bháva-si, 3. bháva-ti. Du. 1. bhávā-vas (TS.), 2. bháva-thas, 3. bháva-tas. Pl. 1. bhávā-masi and bhávā-mas, 2. bháva-tha<sup>11</sup>, 3. bháva-nti.

Middle. Sing. 1. bháv-e, 2. bháva-se, 3. bháva-te<sup>12</sup>. Du. 1. bhávā-vahe, 3. bháv-ete. Pl. 1. bhávā-mahe<sup>13</sup>, 2. bháva-dhve, 3. bháva-nte.

The forms which actually occur are the following:

- The first class of the Indian gramma-
- <sup>2</sup> The sixth class of the Indian grammarians.
- 3 The fourth class of the Indian grammarians.
- 4 The nominal a preceding the -ya is here sometimes dropped or changed to  $\bar{a}$  or  $\bar{\imath}$ . See below 562. Some of these verbs in -aya, having lost their special stem meaning, are treated as a class (the tenth) of primary verbs.
  - 5 See Whitney 214—216, cp. 744.
    6 dád-a- occasionally appears for the

regular dádā-, from dā- 'give'.

- 7 See Rozwadowski, BB. 21, 147.
- 8 A reminiscence of its reduplicative origin is the loss of the nasal (the sonant becoming a) in the ending of the 3. pl.: sášcati, sašcata.
- 9 rnv- $\dot{a}$ -, beside r- $n\delta$ -ti from r- 'send', is a similar transfer to the sixth class.
  - 10 See WHITNEY, Roots, under pinv.
- 11 váda-thana is the only example of the ending -thana in the indicative of the aconjugation.
- 12 The RV. once has sibhe as 3. sing, for sibhate.
- 13 DELBRÜCK, Verbum p. 30 (top), AVERY p. 235, WHITNEY 735, b, and GRASSMANN, under man 'think', give manāmahé (IX. 412),

### Present Indicative.

Active. Sing. I. acāmi, árcāmi, avāmi, ūhāmi (AV. VS.), khánāmi, gácchāmi (AV.), carāmi, codāmi, jánāmi, jayāmi, tapāmi (AV.). tiṣṭhāmi (AV.), dahāmi, dhávāmi (AV.), náyāmi (AV. # 2. The suffixally accented \( \delta \)- class (tud\( \delta \)-) 13.

- 429. Nearly one hundred roots belong to this class. The radical vowel is almost always medial, being regularly i, u or r. If the vowel is final, which is very rare, it is almost invariably short. As the  $-\alpha$  is accented, the radical vowel appears in its weak form; e g. huv-á- (but according to the radically accented class,  $h \dot{a} v - a - 1$  from  $h \bar{u} - call'$ .
- a. There are, however, some irregularities in the formation of the present stem. I. Several roots instead of appearing in their weak form, are nasalized: krt-'cut': krntá-; trp- 'be pleased' : trmpá-; tis- 'adorn' : pimsá-; muc- 'release' : muñcá-; lip- 'smear' : limpá-; lup- 'break' : lumpá-; vid- 'find': vindá-; sic- 'sprinkle' : siñcá-. A few other roots occasionally have nasalized forms according to this class: thus tundate, beside the regular tudáti etc., from tud- 'thrust'; drmhéthe, beside drmhata, etc., from drh- 'make firm'; sumbhant',

- I Transfer form from the reduplicating
- 2 Transfer from the -nu class.

3 árcān (1V. 552; V. 315) and várdhīn are given as indicatives by DELBRÜCK 91, followed by AVERY 249. Cp. p. 322, note 10.

4 From sthiv-'spue'. originally \*sthiv-: cp. v. NEGELEIN 24, note 6: the root is there wrongly given as stiv.

5 asthan (AV. XIII. 15) is given by v. NEGE-LEIN 18, note 1 as imperfect of as; but see WHITNEY'S note on AV. XIII. 15.

6 akrpran being formed with the ending -ran (DELBRÜCK 124) is doubtless an aorist; cp. WHITNEY, Roots under Vkrp. See below, 500.

7 sran (IV. 219) according to DELBRÜCK, Verbum 89 (p. 63, middle), followed by AVERY 249, for \*asara-n; but avasran is 3. pl. aor.

less an agrist: see Whitney, Roots, under of vas- 'shine' with ending -ran (not ava-sran: accent!). Cp. WHITNEY, Roots, under vas 'shine'.

8 DELBRÜCK 176 and AVERY 247 give akrnvata as (once) a 3. sing. If this is correct, the form would be a transfer for akrnuta.

- 9 ámata is given by DELBRÜCK 101 and AVERY 247 as belonging to this class (presumably from the root am-), but it is doubtless 3. sing. mid. aor. of man- 'think'; see WHITNEY, Roots, under Vman.
  - 10 From iks- 'see'.
  - 11 From bhyas- 'fear'.
  - 12 VII. 1815: from dhav- 'run' = dhanv-.
- 13 Cp. E. LEUMANN, Die Herkunft der 6. Praesensklasse im Indischen (Actes du x. Cong. Intern. Orient. II. 1, 39-44; IF. 5, Anz. 109; KZ. 34, 587 ff.).

beside súmbhate and sobhate, from subh- 'shine'; srnthati (TS1.), beside the regular srathnās etc., from stath- 'loosen'. - 2. Four roots form their stem with the suffix chá: is- 'wish': i-cchá-; r- 'go' : r-cchá-; práś- i 'ask' : prcchá-; vas- 'sbine' : u-cchá-. - 3. Two stems are transfers from the nasal class of the second conjugation: pruá, beside pr-uā, from pr-'fill'; mṛṇá-, beside mṛ-ṇā-, from mṛ- 'crush'; rɨŋá- 'stretch' has become the regular stem beside 3. pl. rijate; and 2. pl. umbha-ta (AV.), appears beside ubh-nā-, from ubh-'confine'. — 4. Beside the normal -nu stem r-nu, the root r- also has the transfer stem rnv-á-. — 5. While roots ending in i or ži change these vowels into iy or uv before -á (e. g. kṣiy-á-, from kṣi- 'dwell', juw-á- from ju- 'join'), the TS. has kṣy-ánt- beside RV. kṣiyánt 'dwelling'. b. The present stems chyá- (AV.) 'cut up', dyá- (AV.) 'divide', syá- 'sharpen', syá-'bind', though regarded by the Indian grammarians as belonging to the ya class, should most probably be classified here, because the a is accented, i appears beside  $\bar{a}$  in various forms from these roots, and  $y\dot{a}$  is here often to be read as -ia, while this is never the case in the -ya class.

430. The inflexion is exactly the same as that of bháva. The forms which actually occur are the following:

### Present Indicative.

Active. Sing. 1. icchámi, ukṣāmi (AV), kirámi (AV.), khidāmi (AV.). girāmi² (AV.), crtāmi (AV.), tirāmi, dyāmi (AV.), diśāmi (TS. AV.), dhuvāmi (AV.), prochámi, muñcámi, rujāmi, limpāmi (AV.), vindámi, viśāmi (AV.), vyścámi (AV.), vyhāmi, siñcámi, sulāmi (TS.VII.4.194), suvāmi, syjámi, spyšāmi. syāmi (AV. TS.).

<sup>&</sup>lt;sup>1</sup> The fem. is regularly formed from the strong stem in -ant; but the weak stem in -at appears in siñcat-i, beside siñcánt-i-.

#### 3. The ya- class 1.

437. The present stems formed with this suffix fall into two groups. In the first, consisting of about 70 transitive or intransitive verbs, the suffix is unaccented; in the second, consisting of rather more than 80 verbs with a passive meaning, the suffix is accented. In all probability both groups were identical in origin, with the accent on the suffix. This is indicated by the fact that the root though accented in the first group appears in its weak form; and that this group consists largely of intransitive verbs and to some extent of verbs with a passive sense. The latter are manifestly transfers from the -yá or passive group with change of accent. Thus jáyate 'is born' is an altered passive beside the active janati 'begets'. The accent moreover occasionally fluctuates. Thus the passive *mucyáte* 'is released' once or twice occurs (in the RV. and AV.) accented on the root; and there is no appreciable difference of meaning between kṣiyate and kṣīyáte 'is destroyed'; jiyate and jīyáte 'is overcome'; pácyate and pacyáte 'is cooked'; míyate and mīyáte (AV.) 'is infringed'2.

#### A. The radically accented ya- class.

- 438. The root nearly always appears in a weak form. Thus roots that otherwise contain a nasal, lose it: dṛnh- 'make firm' : dṛh-ya-. The root vyadh- 'pierce' takes Samprasāraņa: vidh-ya-. The root spas- 'see' loses its initial:  $p\acute{a}\acute{s}$ -ya-. Several roots ending in  $\bar{a}$  shorten the vowel before the suffix: dhā- 'suck' : dhaya-; mā- 'exchange' : maya-; νā- 'weave' : νάγα-; νyā- 'envelope':  $vy\dot{a}ya$ -;  $hv\bar{a}$ - 'call':  $hv\dot{a}ya$ -3.
- a. Several other roots usually stated as ending in  $\vec{a}$  remain unchanged:  $g\vec{a}$  'sing': gāya-; glī- 'be weary' : glāya- (AV.); trū- 'save' : trāya-; pyū- 'fill up' : ṭyāya-; rū- 'bark' : rāya-; vā- 'blow' : vāya-; śrā- 'boil' : śrāya-4.

b. The root sram- 'be weary' lengthens its vowel: sramya-5.

- c. The final of roots in  $\bar{r}$  sometimes becomes both  $\bar{v}^6$  and  $\bar{u}r$ ; thus  $j\bar{r}$  waste away' becomes jūrya- and jīrya- (AV.); tr- 'cross': tūrya- and tīrya- 7 (AV.). The root pr- 'fill' because of its initial labial becomes purya- only.
  - 439. The forms actually occurring in this class are the following:

#### Present Indicative.

Active. Sing. 1. asyāmi (AV.), iṣyāmi, nahyāmi, páśyāmi (AV.), vidhyāmi (AV.), hváyāmi.

ásyasi, isyasi, ucyasi (Vuc-), gāyasi, násyasi, pásyasi, púsyasi, rányasi,

rāyasi, risyasi, haryasi.

3. ásyati, íyati (RV<sup>1</sup>.), ísyati, krudhyati (AV.), gāyati, jīryati (AV.), jūryati, tanyati, dásyati, dáhyati (AV.), dīyati, dívyati (AV.), duşyati (SA. XII.23), dhayati, nasyati, nétyati (AV.), pásyati, půsyati, ranyati, risyati, vayati (AV.), vāyati, vidhyati, vyayati, simyati (TS. v. 2. 121), susyati (Kh. Iv. 538), sidhyati, haryati, hṛṣyati, hváyati.

Du. 2. díyathas, ranyathas. — 3. asyatas (AV.), nasyatas, pásyatas,

púsyatas, risyatas (AV.), vayatas (AV.), vāyatas, śrāmyatas (AV.).

<sup>1</sup> Cp. Lorentz, IF. 8, 68—122. grammarians as ending in -ai and belonging <sup>2</sup> Also in Brāhmana passages of the TS. to the a-class. The latter form is preferable ricyate 'is left' beside ricyate (V.), hipyate is from the point of view of gradation. Cp. lost' beside lupyáte (AV.), hiyate 'is left' beside '27, a, 1; BB. 19, 166. hīyáte (V.).

3 These are reckoned by the native gram- roots in -am. marians as ending in e and belonging to the 6 In the  $\acute{a}$ - class - $\ddot{r}$  becomes -ir, e. g. a-class. This seems preferable from the tr-: tirá-.

5 In B. this analogy is followed by several

point of view of vowel gradation: see 27, a, 3. 7 Only in an emendation ava-tiryatī (AV. 4 Such roots are reckoned by the native XIX. 98) for avatīryatīs, Pada avatīt yatīt.

Pl. 1. asyāmasi, páśyāmasi and paśyāmas (AV.), vidhyāmas (AV.), vyayāmasi (AV.TS.), haryāmasi, hváyāmasi.

2. ásyatha, pásyatha, púsyatha, risyatha, háryatha.

3. ásyanti (AV.), áryanti, gáyanti, jūryanti, dasyanti, dīyanti, dháyanti (AV.), nasyanti (AV.), náhyanti, nŕtyanti (AV.), pásyanti, puṣyanti, rányanti, riṣyanti, váyanti, vāyanti, vidhyanti (AV. TS.), śrāmyanti, háryanti, hváyanti.

Middle. Sing. I. isye, padye (AV.), gáye, nahye (TS. I. I. 101), mánye,

mrsye, vyaye (AV.), hvaye.

2. íyase (i-'go'), jáyase, tráyase, dáyase, pátyase, pyayase, mányase, míyase,

mucyase.

3. isyate, íyate, rjyate, kṣīyate, jáyate, jíyate, tṛṣyate (AV.), dáyate, dīpyate (AV.), pácyate, pátyate, pádyate, pásyate, púṣyate (AV.), budhyate (AV.), manyate, mīyate, mṛṣyate, riyate, haryate.

Du. 3. jāyete (AV.), hváyete.

Pl. 1. hváyāmahe. — 2. trāyadhve. — 3. tyante, ksíyante, jāyante, trāyante, pádyante, manyante (AV.), mayante, mrsyante, yúdhyante, rīyante, hváyante.

#### Present Subjunctive.

440. Active. Sing. I. páśyāni (AV.). — 2. páśyāsi, haryāsi (AV.); paśyās (AV.); ríṣyās, háryās. — 3. riṣyāti; páśyāt, píiṣyāt, ríṣyāt (TS.I.6.2¹).

Pl. 1. pásyāma (AV). — 3. pásyān.

Middle. Sing. 1. ylıdhyai. — 2. paśyāsai (AV.). — 3. manyāte, micyātai (AV.). — Pl. 1. hvayāmahai (AV.).

### Present Injunctive.

Active. Sing. 2. džvyas. — 3. gáyat, dīyat, páśyat, vidhyat. — Pl. 3. páśyan. Middle. Sing. 2. manyathās. — 3. jāyata, manyata. — Pl. 3. dáyanta.

# Present Optative.

Active. Sing. 1. vyayeyam. — 2. paśyes. — 3. dasyet, dhayet (AV.), rlsyet. — Du. 3. hvayetām (TS. III. 2. 4'). — Pl. 1. páśyema, púsyema, búdhyema (AV.), risyema.

Middle. Sing. 3. paśyeta, manyeta (AV.), mīyeta (SA. XII. 20). — Pl. 1.

jáyemahi.

# Present Imperative.

441. Active. Sing. 2. asya, gấya, dīya, drhya, naśya, nahya (AV.), nrtya (AV.), páśya, yudhya, vaya, vidhya, śuṣya (AV.), sīvya (AV.), harya, hvaya. — With ending -tāt: asyatāt (AV.).

3. asyatu, ucyatu (AV.), tṛpyatu (AV.), naśyatu, nṛtyatu (AV.), rádhyatu

(AV.), vidhyatu (AV.), śusyatu, sīvyatu, hváyatu (AV.).

Du. 2. asyatam, isyatam (AV.), dīyatam, nahyatam (AV.), pusyatam (AV.), vidhyatam, háryatam. — 3. asyatām (AV.TS.), nahyatām (SA.XII. 32), vidhyatām.

- Pl. 2. isyata, gāyata, jasyata, náśyata (AV.), nahyata (AV.), páśyata, pusyata, muhyata (AV.), vayata, vídhyata, haryata. With ending -tana: nahyatana.
- 3. gāyantu (AV.), tṛpyantu (AV.), naśyantu (AV.), puṣyantu, mihyantu, médyantu, vyayantu (AV.), śimyantu (TS.v. 2. 11¹), haryantu (AV.), hváyantu (AV.).

Middle. Sing. 2. jáyasva, tráyasva, dayasva, drhyasva, nahyasva (AV.), padyasva, paśyasva, pyāyasva, budhyasva (TS. AV.), manyasva (TS. AV.), vyayasva, hvayasva (AV.).

3. rdhyatām, jāyatām, tráyatām, dīpyatām (TS.IV.7.134), padyatām (AV.), pyāyatām (TS. AV.), manyatām (TS. AV.), medyatām (AV.), rádhyatām (AV.), siyatām (AV.) 'lie', hvayatām (AV.).

Du. 2. trāyethām, manyethām, hvayethām (AV.). — 3. trāyetām.

Pl. 2. asyadhvam, jūyadhvam (AV.), trāyadhvam, dayādhvam, nahyadhvam (AV.), budhyadhvam, sīvyadhvam.— 3. jūyantām, trāyantām, padyantām (AV.), pyāyantām, manyantām (AV. TS.), vyayantām (TS. III. 3. 113), hvayantām (TS. III. 2. 41).

### Present Participle.

442. Active. ásyant-, ísyant-, íjyant-, (á-)kupyant- (AV.), ksúdyant-, gáyant-, gádhyant-¹, tísyant-, díyant-, nítyant-, pásyant-, písyant-, púsyant-, yásyant-, vídhyant-(AV.), váyant-, vídhyant-(AV.), výdyant-, símyant- (TS. v. 2. 12¹), sívyant-, háryant-; and the compound án-ava-glāyant-(AV.) 'not relaxing'.

Middle. iyamāna-, kāyamāna-, cāyamāna-, jāyamāna-, trāyamāṇa-, dāyamāna-, nāhyamāna-, pātyamāna-, pādyamāna-, pāsyamāna-, pāryamāṇa-, pyāyamāna-, bildhyamāna-, mānyamāna-, yildhyamāna-, rādhyamāna- (AV.),

vásyamāna- (AV.), háryamāṇa-, hváyamāna-.

### Imperfect Indicative.

443. Active. Sing. I. adīyam, ápaśyam, avyayam. — 2. apaśyas, áyudhyas. — 3. agāyat, adhayat, anrtyat (AV.), ápaśyat, ayudhyat, avayat (AV.), ávidhyat, avyayat, áharyat, áhvayat; ásyat.

Du. 3. ápasyatām.

Pl. 1. ápasyāma. — 3. ajūryan², ápasyan, ávayan (AV.), ahvayan (AV.); ásyan (AV.).

Middle. Sing. 2. ájāyathās, aharyathās; jáyathās. — 3. ájāyata, apatyata, amanyata, arajyata (AV.); jāyata.

Du. 2. áhvayethām (AV.). — 3. áhvayetām.

Pl. 3. ájāyanta, ánahvanta (AV.), apadyanta (AV.), ápaśyanta, ámanyanta, ahvayanta; jāyanta, dáyanta.

# B. The suffixally accented yá- class (passive).

Delbrück, Verbum 184 (p. 166–169). — Avery, Verb-Inflection 274—275. — Whitney, Sanskrit Grammar 768—774; Roots 230—231. — v. Negelein 38—40.

- 444. Any root that requires a passive forms its present stem by adding accented  $-y\acute{a}$  (which never needs to be pronounced -ia). The root appears in its weak form, losing a nasal and taking Samprasāraṇa; thus  $a\~nj$  'anoint': aj- $y\acute{a}$ -be anointed'; vac- 'speak': uc- $y\acute{a}$  'be spoken'. Final vowels undergo the changes usual before -ya in verbal forms: final i and u being lengthened,  $\bar{a}$  mostly becoming  $\bar{\imath}$ , r being generally changed to ri, and  $\bar{r}$  becoming  $\bar{\imath}r^3$ . Thus mi- 'fix':  $m\bar{\imath}ya$ -; su- 'press':  $s\bar{\imath}uy\acute{a}$ -;  $d\bar{\imath}a$  'give':  $d\bar{\imath}$ - $y\acute{a}$  (but  $j\~n\bar{\imath}a$  'know':  $j\~n\bar{\imath}a$ - $y\acute{a}$ -); kr- 'make': kri- $y\acute{a}$ -;  $s\bar{\imath}r$  'crush':  $s\bar{\imath}rya$ -.
- a. The root tan- 'stretch' forms its passive from  $t\bar{a}$ -:  $t\bar{a}$ -yá-. Similarly jan- 'beget' makes its present stem from  $j\bar{a}$ -:  $j\bar{a}ya$ -te, which has, however, been transferred to the radically accented ya- class. mri-yá-te 'dies' (Vmr-) <sup>4</sup> and dhriyáte (Vdhr-) 'is steadfast', though passives in form, are not so in sense <sup>5</sup>.
- 445. The inflexion is identical with that of the radically accented yaclass in the middle, differing from it in accent only. No forms of the optative are found in the RV. or AV. The forms actually occurring are the following:

2 AVERY 249 adds adhayan(?).
3 No example of  $\bar{u}r$  seems to occur in in the Samhitās, but  $\bar{p}\bar{u}r$ -ya- from  $p\bar{r}$ - 'fill' is found in the -ya class.

AV. in  $mr\bar{u}\bar{u}a$ .
5 Cp.

<sup>\*\*</sup> avatīryatīs (AV.XIX.98) is a corrupt reading: see Whitney's Translation; cp. p. 331, note ?.

<sup>4</sup> This root has a transitive sense ('crush') only in its secondary form mrn-, and in the AV. in the imperative forms mrnīhi and mrnīha.

<sup>5</sup> Cp. above 437.

#### Present Indicative.

Sing. I.  $h\bar{i}ve$  ( $h\bar{a}$ - 'leave'). — 2. acvase ( $a\tilde{n}c$ - 'bend', AV.), ajváse ( $\sqrt{aj}$ and Vañi-), idhyáse, ucyáse (Vvac-), nīvase, pūvase, badhyáse (AV.), mucyáse (AV.), mrjyáse, vujyáse, ricyase, rudhyase (rudh- 'hinder'), sasyáse (V'sams-). sicváse, stāvase, hāváse (hū- 'call'). — 3. ajváte (Vaj- and Vañj-), asvate (AV.), idhyate, ucyate (Vvac-), udyate (ud-'wet' and vad-'speak'). ubvate (Vzap-), uhvate (Vvah-), reváte (arc- 'praise'), kriváte, ksīváte 'is destroved'. gamyáte (AV.), grhyate (AV.), chidyate (AV.), jīváte (AV.), tapyate. tīváte, tujváte, dabhvate, dīváte 'is given' (AV.), dīvate 'is divided' (AV.) duhvate, dr'svate, dhamvate, dhīvate (dhā-'put'), dhrivate, nīváte, pacváte, pīvate 'is drunk' (AV.), pūvate, prováte, badhyáte (V bandh-)2, mathyáte (AV.), mucváte. mrjyáte, mriyáte, vujváte, ricvate, ribhyate3, lupyáte (AV.), vacváte (Vvañc-). vidvate 'is found', vrjyate+, sasyate (V says-), sisyate, sīryate, srūyate, sicyate, sūyáte 'is pressed', (V su-), srjyáte, hanváte, hūváte 'is called'.

dā- 'give'.

<sup>&</sup>lt;sup>1</sup> From  $Vjy\bar{a}$ - or  $Vj\bar{i}$ - 'scathe'.

<sup>2</sup> bhidyate, AV. XX. 1311, is an emendation. the reading of the text.

<sup>3</sup> līyate, AV. XX. 1343 4, is an emendation.

appear occasionally to stand for vrscyate, vrscyante, vrscyantam in the AV. See v. NEGE-LEIN 40; BLOOMFIELD, SBE. 42, 418.

<sup>5</sup> Emendation in AV. II. 313, for uchisātai,

<sup>6</sup> A 3. pl. mid. in -antai once occurs in 4 The forms vrscate, vrscante, vrscantām the TS. in the form jāyantai: WHITNEY 760 a. 7 From the weak present stem dad- of

vīvámīna- (AV.), sasyámāna-, sicyámīna-, srjyámīna-, stūvámāna-, hanyámīna-(ÁV.), himsvámāna-, hūvámāna-(hū-'call'); from the causative of V bhaj-:bhījyámāna- (AV. XII. 428).

Imperfect Indicative.

448. Sing. 3. anīvata, ámucvata, aricvata. — Pl. 3. átapvanta (AV. TS.), apacyanta, aprevanta, ásicyanta (AV.); acyanta.

## b. The second or graded conjugation.

- 449. The chief characteristic of this conjugation is vowel gradation in the base consequent on shift of accent. The base has a strong grade vowel in the singular indicative (present and imperfect) active, throughout the subjunctive, and in the 3. sing, imperative active. Minor peculiarities are: I. loss of n in the endings of the 3. pl. mid. (-ate, -ata, -at7m): 2. formation of the 2. sing imperative active with a suffix, generally -dhi; 3. vowel gradation in the modal suffix of the optative (act. -yā; mid. -ī); 4. formation of the middle participle with -āna.
- a. The second conjugation comprises five distinct classes falling into two main groups in which a) the vowel of the root (simple or reduplicated) is graded;  $\beta$ ) the vowel of the suffix (nearly always containing a nasal) is graded.

#### a. I. The root class.

450. The base is formed by the root itself, to which the personal endings are directly attached (in the subjunctive and optative with the intervening modal suffix). The radical vowel is accented and takes Guna in the strong forms. More than a hundred roots are comprised in this class<sup>2</sup>.

a. A good many irregularities are met with in this class, with regard to both the base and the endings. I. Vrddhi is taken in the strong forms by mrj- 'wipe' (e. g. māi/-mi), and before consonants by roots ending in -n, i. e. by kṣṇu-'whet', nu- praise', yu- 'unite' (AV.), stu- 'praise'; e. g. stáu-mi³, á-stau-t⁴, but á-stav-am. — 2. The Guna vowel, along with the accent, is retained in the root of st 'lie' (middle) throughout the weak forms; e.g. sing. I. sáy-e, 2. sé-se. In the 3. pl. this verb at the same time inserts r before the endings: st-rate, st-ra (AV.), st-ratīm, a-se-rata, a-se-ratā. — 3. Several roots form a base with the connecting vowel i or 16 before consonant endings. The roots an-7 'breathe', rud-8 'weep', vam 'vomit', śras- 'blow', svap-9 'sleep' insert i before all terminations beginning with a consonant, except in 2. 3. impf., where they insert  $\bar{\imath}$ : e.g. áni-ti, ánī-t; avamī-t; svasi-ti. The roots  $\bar{\imath}$ d- 'praise' and  $\bar{\imath}$ s- 'rule' add i in some forms of the 2. pers. middle:  $\bar{\imath}$ d-sva;  $\bar{\imath}$ si-se (beside  $\bar{\imath}$ k-se),  $\bar{\imath}$ si-duve. The 3. pl.  $\bar{\imath}$ si-re is, owing to its accent 10, probably to be accounted a present rather than a perfect 11. Occasional (imperative sing.) forms with connecting a from other roots also occur: jáni-sva 'be born', vasi-şva 'clothe', sna'hi-hi 'pierce', stani-hi 'thunder'. The root brū- 'speak' regularly inserts 7 in the strong forms before terminations beginning with consonants; e. g. brávī-mi. The same ī also appears in the form tavī-ti from tu- 'be strong'; in amī-ṣi and in the TS. 12 amī-ti, amī-sva, āmī-t from am- 'injure'; and in śamī-ṣva (VS.), from śam-

<sup>1</sup> Cp. Brugmann, KG. 211.

<sup>&</sup>lt;sup>2</sup> Several roots of this class show transfers to the a- conjugation: cp. WHITNEY 625 a.

<sup>3</sup> The RV. has once 2. sing. sto-si (X. 224), a form which AVERY 275 takes to be a 3. sing. aor. pass. injunctive.

<sup>4</sup> Vrddhi on the other hand once appears even in the weak form 3. pl. impf. anāvan. On the Vrddhi in these verbs, cp. v. NEGE-LEIN 10 a.

<sup>5</sup> There are some transfer forms according to the a- conjugation from the stem śáy-a-, including the isolated active form áśayat, MS. aiśa (like aduha), cp. Whitney 630. which is common. Nearly a dozen roots 12 Whitney 634.

besides si- retain the accent on the radical syllable throughout. See 97, 2 a.

<sup>6</sup> This z is, however, in reality originally part of a dissyllabic base: cp. BRUGMANN, KG. 212, 2.

<sup>7</sup> The AV. has also forms according to the a- conjugation: ána-ti, etc.

<sup>8</sup> The RV. has no such forms from rudand svap-.

<sup>9</sup> The AV., however, has the form svap-tu.

<sup>10</sup> See 97, 2 a and 484.

The 3. sing. impf. of this verb is in the

'labour'. — 4. A few roots undergo peculiar shortenings in the weak forms: as-'be' loses its vowel [except where protected by the expression of the weak forms loses its n before [et al. [et

#### Present Indicative.

451. A final or prosodically short medial radical vowel takes Guna in the singular; elsewhere it remains unchanged, excepting the changes of final vowels required by internal Sandhi, and the irregular shortenings mentioned above (450, a 4). The ordinary endings are added directly to the root. But the 3. sing. mid. ends in -e nearly as often as in -te; and anomalous endings appear in the 3. persons of the roots  $\bar{t}$ 5'-, duh-,  $5\bar{a}$ 5-,  $5\bar{t}$ - 11.

The forms actually occurring would, if made from i- 'go' and  $br\bar{u}$ - 'speak',

be as follows:

Active. Sing. 1. ¿-mi. 2. ¿-ṣi. 3. ¿-ti. — Du. 2. i-thás. 3. i-tás. — Pl. 1. i-mási and i-más. 2. i-thá and i-thána. 3. y-ánti.

Middle. Sing. 1. bruv-é. 2. brū-sé. 3. brū-té and bruv-é. — Du. 2. bruv-āthe. 3. bruv-áte. — Pl. 1. brū-máhe. 2. brū-dhve. 3. bruv-áte.

The forms which actually occur are the following:

Active. Sing. 1. ádmi, ásmi, émi, kṣṇaumi, dvéṣmi (AV.), pāmi 'protect', mārjmi, yāmi, yaumi (AV.) 'join', vaśmi, vāmi, śāsmi (AV.), staumi (AV. TS.), hanmi, harmi. — With connecting T-: brávīmi.

2. átsi, ási, ési, kárşi (AV.), cakşi (= \*cakṣ-ṣi), chantsi (V chand-), dárşi (dr- 'pierce'), párşi (pr- 'pass'), pási ('protect'), bhási, yási, vakşi (vas- 'desire'), véşi (Vv $\bar{i}$ -), ś $\bar{a}$ ssi, sátsi, stoṣi '², hámsi. — With imperative sense '³: kṣéṣi (kṣi- 'dwell'), jéṣi, jóṣi (= \*joṣ-ṣi : juṣ- 'enjoy'), dárṣi, dhákṣi (dah- 'burn'), nakṣi (naś- 'attain'), néṣi, párṣi, pr $\bar{a}$ si, bhakṣi (bhaj- 'divide'), matsi, māsi, yákṣi (yaj- 'sacrifice'), yámṣi (yam- 'reach'), yāsi, yótsi (yudh- 'fight'), rátsi (rad- 'dig'), rási, vákṣi (vah- 'carry'), véṣi (Vv $\bar{i}$ -), śróṣi, sakṣi (sah- 'prevail'), sátsi, hoṣi (hu- 'sacrifice'). — With connecting  $\bar{i}$ -: am $\bar{i}$ ṣi, bráv\bar{i}ṣi.

r It is, however, preserved in an altered form in the 2. sing. impv. act.: e-dhi for \*az-dhi (62, 4, 6, p. 57). This verb has the further anomalies of losing its s in the 2. sing. pres. a-si, and in inserting \(\bar{\tau}\) in the 2. 3. sing. impf. \(\delta sir\)-t. It has no middle.

2 Cp. v. Negelein 83; van Wijk, IF. 18, 59.

<sup>3</sup> Limited to the active in this conjugation in the RV.

<sup>4</sup> The only middle form.

<sup>5</sup> There are also some transfer forms according to the  $\alpha$ - conjugation: 3. sing.  $s\bar{a}sati$ .

<sup>6</sup> Similarly from das-'worship' the part. das-at-.

<sup>7</sup> In the middle participle the h of the root reverts to the guttural gh: dúgh-āna.

<sup>8</sup> Transfer to the a- conjugation.

<sup>9</sup> The MS. has further anomalous endings in the imperf. mid.: 3. sing. a-duh-a and 3. pl. a-duh-ra, probably as parallel to the present duhe and duhre: WHITNEY 635.

To Excepting the few forms of roots which may take connecting i or  $\bar{i}$  (450, a 3).

<sup>&</sup>lt;sup>11</sup> See above 450, a 2, 3, 5; cp. Johansson, KZ. 32, 512; Neisser, BB. 20, 74.

<sup>&</sup>lt;sup>12</sup> See 450, a I, note <sup>3</sup>.

<sup>&</sup>lt;sup>13</sup> Some of these have no corresponding root present or root aorist; cp. WHITNEY, Sanskrit Grammar 624; BARTHOLOMAE, IF. 2,271; NEISSER, BB. 7, 230 ff., 20, 70 ff.; BRUGMANN, IF. 18, 72; DELBRÜCK, Verbum 30; Syntaktische Forschungen 5, 209.

2. átti. ásti, éti. kseti. takti (tak- 'rush'), dāti (dā- 'share'), dāsti (dās-'worship'), dvésti, páti, bhárti, bháti, mārsti (SA. XII. 9), váti, rásti (rāj- 'rule'), rélhi (rih- 'lick'), vasti (vas- 'desire'), váti, véti, stauti (AV.; Kh. v. 32), hánti. — With connecting -i- or -ī-: ániti, śvásiti; amīti (TS. VS.), tavīti (tu- 'be strong'), brávīti.

Du. 2. ithás, krthás, pāthás, bhūthás, vāthás, vīthás, sthás (as-'be'). hathás (Vhan-).

3. attas, etas (AV.), ksitás, dvistas (AV.), pātas, psātás (AV.), bhūtas, vātas, vātas, stas, snātas, hatás, hnutas.

Pl. I. admasi (AV.), imási, uśmási² (Vvaś-), stumási, smási, hanmasi (AV.); dvismás, brūmás (AV.), mrjmas (AV.), yāmas, rudhmas (AV.), vidmas (Kh. IV. 533), stumas (AV.), smas, hanmas.

2. itha, krtha, gathá (RVI.)3, nethá4, pāthá 'protect'5, vāthá, stha,

hathá; pāthána, yāthána, sthána.

3. adanti, amánti, usánti, ksivánti, ghnánti (V han-), dánti (dã- 'cut'), duhanti, dvisánti (AV.), pānti6, bruvánti, bhānti, mrjánti, vánti, vánti, rihánti, rudánti, vānti, vyánti (Vvī-), sánti.

Middle. Sing. I. iye (i- 'go'), ife, ise, uvé<sup>7</sup>, duhe, bruve, mrje (AV.),

vuié, vuve (vu- 'join'), suve (sū- 'beget')8, hnuve.

2. tkse, krse, cakse (= \*caks-se), dhukse (AV.), brūse, vitsé (vid- 'find'),

sése. — With connecting -i-: tsise.

3. áste, ítte (Vīd-), īrte, íste (Vīś-), cáste (Vcaks-), brūté, váste, śāste, śinkte9 (V śiñj-), sūte, hate (SA. XII. 27). — With ending -o: tśe10. cité (cit-'perceive'), duhé, bruve, vidé ('finds'), s'áye 11.

Du. 2. ásāthe, ísathe, caksathe, vasāthe. — 3. āsāte, iyāte, duhāte, bruváte,

savāte, silvāte.

Pl. I. ásmahe (AV.), ímahe, Ismahe (AV.), mrjmáhe (AV.), vujmahe, śāsmahe, śémahe (AV.), hūmáhe. — 2. With connecting -i-: zśidhve (AV.). — 3. ásate, írate, ílate, ísate, óhate (Vūh-), grhate<sup>12</sup>, cáksate, duhate<sup>13</sup>, dvisáte (AV.), nimsate, bruvate, rihate 13, vasate, sasate, suvate. — With ending -re: duhré, sére (AV.); with -rate: duhrate, sérate (AV. TS.).

## Present Subjunctive.

**452.** In the AV, several forms are irregularly made with  $\bar{a}$ , as if following the a- conjugation. No examples of the 2. du. and pl. mid. are found. The forms which actually occur, if made from brū- 'speak', would be:

Active. Sing. 1. brávāni, brávā. 2. brávasi, brávas. 3. brávati, brávat. — Du. 1. brávāva. 2. brávathas. 3. brávatas. — Pl. 1. brávāma. 2. bravatha. 3. brávan.

Middle. Sing. 1. bravé. 2. bravase. 3. brávate. — Du. 1. bravāvahai. 3. brávaite. — Pl. 1. brávāmahai, bravāmahe. 3. brávanta.

The forms which actually occur are the following:

Active. Sing. I. ásāni (AV.), brávāni; ayā, bravā, stávā.

I With irregular strong radical vowel.

<sup>2</sup> Once anomalously smási.

3 With loss of nasal as in 1/han-.

4 With irregular strong radical vowel: cp. V. NEGELEIN 33.

5 Once from  $p\bar{a}$ - 'drink', in 1. 861?

6 Thirteen times from pā- 'protect', once mid. perfect. (II. III4) from pā- 'drink' (probably subj. aor.).

7 This form occurring only once in the NEISSER, BB. 20, 74. RV. seems to be formed from a doubtful root u 'proclaim'; cp. WHITNEY, Roots, under u. under the agrist of Vgrah.

8 huvé, sing. 1. and 3., should perhaps be 123 With irregular accent. Indo-arische Philologie. I. 4.

placed here rather than in the  $\acute{a}$ - class; on this form cp. Oldenberg, ZDMG. 59, 355 ff.; NEISSER, BB. 25, 315 ff.

9 sinte (AV.). 10 AVERY 234 gives ise only, apparently instead of ise. The form ise would be 3. sing.

11 On these forms cp. v. NEGELEIN 102;

12 Placed by WHITNEY, Roots, doubtfully

2. ayasi (AV.), ásasi, bravasi; áyas (AV.), ásas, ksáyas (kṣi- 'dwell'), phásas, dánas, parcas, bravas, védas, śákas, hánas; with -ā-: áyās (AV.).

3. áyati, ásati, vayati ( $\sqrt{v\bar{v}}$ -), védati, hanati; adat (AV.), áyat, ásat, źrat<sup>1</sup>, kṣayat, ghasat, cayat, déhat, dohat (I. 164<sup>26</sup>), dvéṣat (AV.), pāt ('protect'), brávat, védat (vid- 'know'), stávat, hánat (AV. TS.); with -ā-: ayāt (Kh. III. 1<sup>8</sup>), asāt (AV.), rodāt (Kh. 2. 11<sup>1</sup>).

Du. I. hánāva. — 2. ásathas, vedathas. — 3. pátas 'protect' (IV. 557).

Pl. 1. ayāma, ásāma, kṣáyāma, dveṣāma (AV.), brávāma, stávāma, hánāma.

— 2. ásatha², stavatha; with -ā-: bravātha (AV.), hanātha (AV.). — 3. ayan, ásan, brávan, yavan ('join', AV.III. 17²), hánan (AV.); with -ā-: ádān (AV.), ayān (AV.).

Middle. Sing. 1. stuṣé³. — 2. āsase. — 3. āsate, idhaté⁴, dóhate, dvéṣate (TS. IV. 1. 10³), várjate; with -tai: áyātai (AV.), ásātai (AV.); with secondary ending -ta: īśata. — Du. 1. bravāvahai. — 3. brávaite. — Pl. 1. flāmahai, brávāmahai; īļāmahe. — 3. hánanta.

### Present Injunctive.

Active. Sing. 2. vés. — 3. vet (x. 539), staut; without ending: dán, rát, han. — Pl. 3. yan, san.

Middle. Sing. 3. vasta, sūta. — Pl. 3. īļata, vasata.

### Present Optative.

453. Active. Sing. 1. iyām, yāyām, vidyām, syām. — 2. syās. — 3. adyīt (AV.), iyīt, brūyāt, vidyāt, syāt, hanyāt (AV.).

Du. 2. brūyātam (TS. IV. 7. 156), vidyātam, syātam. — 3. syātām.

Pl. 1. iyāma, turyāma, vidyāma, syāma, hanyāma. — 2. syāta; syātana. — 3. adyūr, vidyūr, syūr.

Middle. Sing. 1. iśīya, śáyīya (AV.). — 3. āsīta, īļīta, īśīta, duhīta, bruvīta, śáyīta, stuvītá. — Pl. 1. bruvīmahi, vasīmahi, stuvīmahi.

## Present Imperative.

454. The endings are added directly to the root, which appears in its weak form except in the 3. sing. act., where it is strong and accented 5. In the 2. sing. act., -dhi is added to a final consonant, -hi to a vowel;  $-t\bar{a}t$ , which occurs only three times, may be added to either a consonant or a vowel. In the mid.,  $-\bar{a}m$  3. sing.,  $-r\bar{a}m$  and  $-rat\bar{a}m$  3. pl., occasionally appear for  $-t\bar{a}m$  and  $-at\bar{a}m$ 6.

Active. Sing. 2. addhí, edhi (as-'be'),  $t\bar{a}lhi$  ( $\sqrt{taks}$ -),  $ps\bar{a}hi$  (AV.), mrddhi (AV.), viddhi ('find' and 'know'),  $s\bar{a}dhi$  ( $\sqrt{s\bar{a}s}$ -); ihi,  $jahi^7$ ,  $p\bar{a}hi$  'protect',  $br\bar{u}hi$ ,  $bh\bar{a}hi$ ,  $y\bar{a}hi$ ,  $v\bar{a}hi$ ,  $vihi^8$ ,  $v\bar{v}hi$ , stuhi,  $sn\bar{a}hi$  (AV.); with connecting -i-: anihi (VS. IV. 25), snathihi, svasihi (AV.), stanihi; with  $-t\bar{a}t$ :  $br\bar{u}t\bar{a}t$  (TS. I. 6.43),  $vitt\bar{a}t$ ,  $v\bar{v}t\bar{a}t$ .— 3. attu, astu, atu, atu

<sup>2</sup> vidátha, AV. I. 32<sup>1</sup>, seems to be a corruption for védatha; cp. WHITNEY's note.

3 For stus-a-i: cp. AVERY 238; DELERÜCK, Verbum p. 1813; NEISSER, BB.27,262—280; OLDENBERG, ZDMG. 55, 39.

6 In duhām, vidām (AV.), śayām (AV.);

duhrām (AV.), duhratām (AV.).

AVERY 230 here adds rdhat, which I regard as a root aor. subjunctive.

<sup>4</sup> With irregular accent and weak root (VII. 18) for \*indhate, beside inádhate formed from Vidh- according to the infixing nasal class.

<sup>5</sup> This is also irregularly the case in six or seven forms of the 2. pl., before both -ta and -tana: éta, neta, stota; étana, bravītana, sotana, hantana.

<sup>7</sup> For \*jha-hi, from han-'slay': see 32, 2 c, and cp. v. Negelein, Zur Sprachgeschichte 8.

8 Metrically shortened for vīhi, from Vvī-.

Du. 2. attam (AV.), itam (AV. TS.), pātám 'protect', brūtam (AV.), vātám, vittám, vītám, stam (as-'be'), stutam, hatám. — 3. itām, dugdhām (1/duh-), pātām 'protect', sastām, stām (AV.), hatām (AV.).

Pl. 2. attá, itá and éta, pātá 'protect', brūta, yātá, s'asta (s'as-'cut'), sta (VS. AV.), stota, hatá; with -tana: attana, itana and étana, yātána, śāstána, sotana (su- 'press'), hantana; with connecting -ī-: bravītana.

3. adantu, ghnantu, drāntu, pāntu 'protect', bruvantu, yantu, yāntu, vāntu (AV.), vyántu (Vvī-) and viyantu (TS.), sásatu (TS.v.2.121), svásantu (AV.), santu, svápantu (AV.).

Middle. Sing. 2. īrṣva, cakṣva (= \*cakṣ-ṣva), trásva, dhukṣva , mṛkṣva ( / mṛj-, AV.), stuṣvá (AV.); with connecting -i-: thiṣva, jániṣva, vásiṣva.

3. āstām, yutām (AV.), vastām, setām (AV.); with -ām: duhām, vidām

(vid- 'find', AV.), sayām (AV.).

Du. 2. īrāthām, cakṣāthām (TS.), duhāthām (AV.), vasāthām (TS.). — 3. duhātām (AV.). — Pl. 2. ādhvam² (Vās-), īrdhvam, trādhvam, mṛḍḍhvam (AV.). — 3. īratām, stuvatām (AV.); with -rām: duhrām (AV.); with -ratām: duhratām (AV.).

### Present Participle.

455. The active participle is formed by adding -ánt<sup>3</sup> to the weak root; thus y-ánt- from i- 'go'; duh-ánt- from duh- 'milk'; s-ánt- from as- 'be'. The strong stems of the participles of  $d\bar{a}s'$ - 'worship' and  $s\bar{a}s$ - 'order' lose the n: dás-at-4 and sás-at-5. The middle participle is formed by adding the suffix -āná to the weak form of the root; thus iy-āná- from  $\sqrt{i}$ ; uś-āná- from Vvaś-; ghn-āná- (AV.) from Vhan. In a few examples, however, the radical vowel takes Guṇa; thus *oh-āná-* from ūh- 'consider'; yodh-āná- from yudh-'fight';  $\dot{s}\dot{a}y$ - $\bar{a}na$ - from  $\dot{s}\bar{\iota}$ - 'lie';  $\dot{s}tav$ - $\bar{a}n\dot{a}$ - from  $\dot{s}tu$ - 'praise'. The final of  $\sqrt{duh}$ reverts to the original guttural in digh-ana- beside the regular dihana-. The root ās- 'sit' has the anomalous suffix -īna in ās-īna- beside the regular  $\bar{a}s$ - $\bar{a}n\acute{a}$ -. Several of these participles in  $-\bar{a}na$  alternatively accent the radical vowel instead of the final vowel of the suffix; thus vid-āna- beside vid-āná-'finding'.

Active. adánt-, anánt-, usánt-, kṣiyánt-6 'dwelling', ghnánt- ( / han-), duhánt-, dvisánt-, dhṛṣánt-, pánt- 'protecting', bruv-ánt-, bhánt-, yánt-, yánt-, rihánt-, rudánt-, vánt- $^{7}$  (AV.), vyánt- ( $\sqrt{v}\bar{\imath}$ -), sánt-, sasánt-, stuvánt-, snánt-, svapánt-; with loss of n: dásat-, sásat-.

Middle. adāná-, āsāná- and ásīna-, índhāna-, iyāná- (VS. x. 19; TS. 1. 8. 14<sup>2</sup>), tlāna-, trāṇa-, tśāna- and (once) īśāná-, uśāná-<sup>8</sup>, uṣāṇá-<sup>9</sup> (vas- 'wear'), óhāna- and ohāná- (Vūh-), kṣṇuvāná- 10, ghnāná- (AV.), dihāná-, dighāna- and duhāná- and dúhāna-, dhṛṣāná-(AV.), nijāná-, bruvāṇá-, mṛjāná-, yuvāná- ( yu-

<sup>1</sup> DELBRÜCK 61 and AVERY 242 wrongly give this form as duksva.

<sup>&</sup>lt;sup>2</sup> In AV. (IV. 14<sup>2</sup>) and TS. (IV. 6. 5<sup>1</sup>) some Mss. read āddhvam. VS. XVII. 65 has ādhvam.

<sup>3</sup> The feminine is formed with  $-\bar{i}$  from the weak stem; thus ghnat-i-, duhat-i-, yat-i-, yāt-t-, bhāt-t-, rudat-t-, sat-t- (AV.), snāt-t-. But the AV. has yanti- (beside yati-) and svapanti-; see Whitney, Index Verborum 3744.

<sup>4</sup> The verb das- may have lost its nasal in the 3. pl. act., but there is no evidence of this, as the only form preserved according | by Grassmann as a participle. to the root class is 3. sing. dasti.

<sup>5</sup> As in 3. pl.

<sup>6</sup> ksyántam TS. IV. 1. 25.

<sup>7</sup> apa-ván AV. XIX. 504 is probably N. sing. of this part.; see WHITNEY's note and cp. LANMAN 4842.

<sup>8</sup> The RV. has once the transfer form usámāna-.

<sup>9</sup> Once, beside the regular vásāna. The RV. has also once the transfer form usámāna-.

The form grhāṇá (x. 10312), doubtless 2. sing. impv. of the  $n\bar{a}$ - class, is regarded

'join'), vodhāná-, rihāná-, vásāna-'wearing', vídāna- and vidāná-, vyāná-( $Vv\bar{\imath}$ -), sáyāna-, sásāna- (AV. TS.), sívāna- (sū- 'bring forth', AV.), stuvāná- and stavāná-, svāná- (su- 'press', SV.)<sup>\*</sup>.

### Imperfect Indicative.

456. Active. Sing. I. adoham (Kh. v. 15<sup>14</sup>),  $ap\bar{a}m$  ('protect'), abravam, avedam, ahanam;  $\bar{a}dam$  (VS. XII. 105), ayam, asam, airam ( $\sqrt{r}$ -).

2. άρās, άyās; áis (AV.); ves ( \(\forall v\bar{\text{\$\vec{\gamma}\$}}\), with connecting -\(\bar{\ell}\)-: abrav\(\bar{\text{\$\sigma\$}}\)

(AV.); āsīs; without ending: áhan; han.

3.  $\acute{a}p\bar{a}t$ ,  $\acute{a}y\bar{a}t$ ,  $av\bar{a}t$  (AV.), astaut;  $\acute{a}it^2$ ; with connecting  $-\bar{i}-$ :  $\acute{a}brav\bar{\iota}t$ ,  $avam\bar{\iota}t$ ;  $\acute{a}n\bar{\iota}t$ ,  $\acute{a}s\bar{\iota}t^3$ ; without ending: adhok,  $\acute{a}vet$  (AV.),  $\acute{a}han$ ;  $\bar{a}s$  (= \* $\bar{a}s$ -t, from as- 'be');  $han^4$ .

Du. 2. áyātam, ahatam; ástam, áitam; yātam (AV.). — 3. abrūtām (AV.);

āttām (VS. XXI. 43), ástām, aitām (AV. VS.).

Pl. 1. atakṣma, ápāma. — 2. ataṣṭa; áita; abravīta; áyātana, ásastana; áitana; ábravītana. — 3. ádihan (AV.), anāvan, abruvan, avyan ( $\sqrt{vi}$ -); áyan (i-'go'), ásan; asan⁵ (as-'throw'), -ghnan (Kh.I.2²); with ending -ur: atviṣur, apur ( $p\bar{a}$ -'protect'); asur (as-'throw', I. 179²); cákṣur, duhur.

Middle. Sing. 3. acasta, atakta, ávasta (AV.), ásūta; áiṭṭa ( V ūḍ-);

mṛṣṭa (I. 1744), sūta.

Pl. 2. árādhvam. — 3. aghnata (AV.), acakṣata, ajanata, ámrjata (AV.), aśāsata; āsata, áirata. With ending -ran: aduhran (AV.), áśeran.

#### a. 2. The Reduplicating Class.

457. This class is less than half as frequent as the root class, comprising fewer than 50 verbs. The endings are here added to the reduplicated root, which is treated as in the root class, taking Guna in the strong forms. The stem shows the same peculiarity as the desiderative in reduplicating  $\tilde{r}$  (= ar) and  $\tilde{a}$  with i. Here, however, this rule is not invariable. All the roots with r except one reduplicate with i. They are r-'go': i-y-ar-6; ghr-'drip': jighar-; tr- 'cross': titr-; pr- 'fill' and pr- 'pass': pipar-; bhr- 'bear': bibhar-; sr- 'run': sisar-; prc-'mix': piprc-; but vrt-'turn': vavart-. While nine roots reduplicate  $\bar{a}$  with a, thirteen do so with i. The latter are:  $g\bar{a}$ - 'go':  $jig\bar{a}$ -;  $ghr\bar{a}$ -'smell' : jíghrā-; pā- 'drink' : píba-; mā- 'measure' : mímā-; mā- 'bellow' : mímā-; śā- 'sharpen': śiśā-; sthā- 'stand': tiṣṭha-; hā- 'go forth': jihī-7; vac- 'speak': vívac-; vas- 'desire': vivas-8; vyac- 'extend': vivyac-; sac- 'accompany': sisac-9; han- 'strike': jighna-. Three of these, however, pā-, sthā-, han-, have permanently gone over to the a- conjugation, while a fourth, ghrā-, is beginning to do so. Contrary to analogy the accent is not, in the majority of verbs belonging to this class, on the root in the strong forms, but on the reduplicative syllable. The latter is further accented in the 3. pl. act. and mid., as well as in the 1. du. and pl. mid. Doubtless as a result of this accentuation, the verbs of this class lose the n of the endings in the 3. pl. act. and mid.; e. g. bibhr-ati 10 and jihate.

To be pronounced thus in the RV., though always written suvāná.

<sup>&</sup>lt;sup>2</sup> The form *aitat* (AV. XVIII. 34°) seems to be a corruption of *áit*; see WHITNEY's note in his Translation.

<sup>3</sup> Cp. v. Negelein 8<sup>1</sup>; Reichelt BB. 27, 89. VS. VIII. 46 has the transfer form āsat. 4 árudat (AV.) is a transfer to the α-con-

<sup>4</sup> árudat (AV.) is a transfer to the a-conjugation. In I. 772 vés, 3. sing., seems to be an aor. form = \*vé-s-t.

<sup>5</sup> Unaugmented form IV. 31.

<sup>6</sup> With -y- interposed between reduplication and root.

<sup>7</sup> With  $\bar{\imath}$  for  $\bar{a}$ ; inflected in the middle only.

<sup>8</sup> Also vavaś.

<sup>9</sup> Also saśc.

That is, a replaces the sonant nasal.

a. There are a number of irregularities chiefly in the direction of shortening the root in weak forms. I. Roots ending in  $\tilde{a}$  drop their vowel before terminations beginning with vowels  $\bar{z}$ : e. g.  $\sqrt{m\bar{a}}$ : mim-e, 3. pl. mim-ate.  $\sqrt{d\bar{a}}$ - and  $\sqrt{dh\bar{a}}$ -, the two commonest verbs in this class, drop the  $\bar{a}$  in all weak forms. — 2. The root vyac- takes Samprasāraṇa; e. g. 3. du. viviktás; analogously hvar- 'be crooked', makes some forms with Samprasāraņa, when it reduplicates with u; e. g. juhūthās, 2. sing mid. injunctive. — 3. The verbs bhas- 'chew', sac- 'accompany', has- 'laugh', syncopate the radical vowel; thus babhas-at, 3. sing subj., but báps-ati, 3. pl. ind.; sás-ati, 3. pl. ind. pres., sasc-ata, 3. pl. inj.; jákṣ-at-, pres. part. — 4 The  $\bar{a}$  of sā- 'sharpen', mā- 'measure', mā- 'bellow', rā- 'give', hā- 'go away' (mid.), and (in AV.) hā- 'leave' (act.)2, is usually changed to 7 before consonants; e. g. ši sīmāsi, mimīte, rarīthās3, jihīte, jahīta (AV.); while the roots dā- 'give' and dhā-'pui' dr op their vowel even here4; e. g. dád mahe, dadh máss. — 5. The initial of ci-'observe' reverts to the original guttural throughout; e. g. cikési (AV.). — 6. When the aspiration of dadh-, the weak base of dhā-, is lost before t, th, s, or dhv, it is thrown back on the initial; e. g. dhat-sva. - 7. The roots dī- 'shine', dhī- 'think', pī- 'swell', reduplicate with 1; e. g. ádīdet; ádīdhet; ápīpet. — 8. There are a number of transfers from this to other classes. Thus caky- 'see', originally a syncopated reduplicative base (= \*cakās-), has become a root inflected according to the root class; jaks- 'eat', also originally a reduplicated base (jaghas-), has become a root from which is formed the past passive participle jag-dhá-, and which in the later language is inflected both in the root class and the a- class. The weak bases dad- and dadh- show an incipient tendency to become roots 5, from which a number of transfer forms according to the a- conjugation are made, such as 3. sing. mid. dada-te, 3. pl. ind. act. dádhanti, 3. pl. impv. act. dadha-ntu, 3. sing. mid. dadha-te, 2. du. dadhethe (AV.). The roots pā- 'drink', sthā-, han-, form only transfer stems according to the a- class: piba-, tistha-, jighna-; while ghrā-, mā- 'bellow', rā-, bhas-, sac- make occasional forms from transfer stems according to the a- class: jighra-, mima-, rára-, bápsa-, sásca-.

Inflexion.

458. The forms actually occurring would, if made from bhr- 'bear', be the following:

Active. Sing. 1. bibharmi. 2. bibharsi. 3. bibharti. — Du. 2. bibhrthás. 3. bibhrtás. — Pl. 1. bibhrmási and bibhrmás. 2. bibhrthá. 3. bibhrati.

Middle. Sing. 1. bibhré. 2. bibhrsé. 3. bibhrté. — Du. 1. bibhrvahe. 2. bibhráthe. 3. bibhráte. — Pl. 1. bibhrmahe. 2. bibhrdhve. 3. bibhrate. The forms which actually occur are the following:

#### Present Indicative.

Active. Sing. I. iyarmi, jáhāmi, jígharmi, juhómi, dádāmi, dádhāmi, piparmi (fill', AV.), bibharmi, vivakmi ( $\sqrt{vac}$ -), sisāmi.

2. iyárşi<sup>6</sup>, cikéşi (AV.), jáhāsi (AV.), jígāsi, dádāsi, dádhāsi, piparşi, bibharşi, mamatsi, vavákşi (Vvaś-), vivekşi<sup>7</sup> (viṣ- 'be active'), sişakşi (V sac-), sisarşi<sup>8</sup>.

3. iyarti, jáhāti, jígāti, jigharti, juhóti, dádāti<sup>9</sup>, dádhāti, piparti 'fills' and 'passes', bábhasti (AV.), bíbharti and (once) bibhárti, mímāti 'bellows', mimeti (mā- 'bellow', SV.), yuyoti 'separates', vavarti (= vavart-ti, II. 386), vívakti, vivaṣṭi (Vvaś-), viveṣṭi (viṣ- 'be active'), sásasti (VS.) and sasásti (TS.VII. 4.19¹), síṣakti (Vsac-), sísarti.

Du.2. dhatthás, ninīthás, pipṛthas, bibhṛthás. — 3. dattás (AV.), dádhātas 10 (AV.), bibhītás (AV.), bibhṛtás, mimītas, viviktás (Vvyac-), vivistas.

Pl. I. juhūmási, dadmasi, dadhmási, bibhrmási, śiśīmási; jahimas <sup>11</sup> (AV.), juhumás, dadmas (AV.), dadhmas, bibhrmas (AV.), vivismas. — 2. dhatthá,

- This of course does not take place in the transfer verbs according to the a-conjugation.
- <sup>2</sup> In the RV.  $h\bar{a}$  'leave', has only forms with  $\bar{a}$  (never  $\bar{z}$ ).
  - 3 But rarāsva (AV.).
- 4 The vowel of  $h\bar{a}$ -'leave' is also dropped in the 3. pl. opt. act. jahyur (AV.).
- 5 From the former is made the past passive participle dat-tá- 'given'.
- 6 This is the accentuation in Max Müller's and Aufrecht's editions, both in Samhitā and Padapātha.
  - 7 Cp. Neisser, BB. 30, 303.
  - 8 With imperative sense.
  - 9 Also the transfer form dádati.
  - 10 With strong base, for dhattás.
  - II With base weakened to jahi- for jahī-.

pipṛthá, bibhṛthá. — 3. jahati, jighrati (AV.), júhvati, dádati, dádhati , dīdyati 2

(AV.), piprati, bapsati (V bhas-), bibhrati3, sáscati.

Middle. Sing. 1. juhvé, dadé (AV. TS.), dadhé, mime. — 2. datse (AV.), dhatsé. — 3. jihīte, juhuté, datté<sup>4</sup>, dhatté<sup>5</sup>, mimīte, śiśīte<sup>6</sup>; with -e: dadhé (+ AV.).

Du. 1. dádvahe. — 2. dadháthe. — 3. jihāte, dadháte<sup>7</sup>, mimāte<sup>8</sup> (v. 82<sup>6</sup>).

Pl. 1. dádmahe, mimīmahe (AV.). — 2. jihīdhve (AV.). — 3. jihate, dadhate<sup>9</sup>, mimate ('measure'), sisrate.

## Present Subjunctive.

459. Active. Sing. I. dadhāni, bibharāṇi (TS. I. 5. 101). — 2. juhuras, dádas, dadhas, dīdhyas (AV.), viveṣas. — 3. piprati; dadat, dádhat, didayat, dīdāyat 10 (AV.), babhasat, bibharat (AV.), yuyávat 'separate'.

Du. 2. dádhathas, bapsathas (Kh. I. III).

Pl. 1. jahāma, juhavāma, dadhāma. — 3. dádan (AV.), dádhan, yuyavan. Middle. Sing. 11 2. dádhase. — 3. dádhate; with -tai· dadātai (AV.). — Du. 1. dadhāvahai (TS. 1. 5. 101). — Pl. 1. dadāmahe. — 3. juhuranta 12.

### Present Injunctive.

Active. Sing. 2. dadās (AV.), bibhes (AV.). — 3. jīgāt, dadāt (AV.), vivyak.

Pl. 1. yuyoma 13 (AV.).

Middle. Sing. 2.  $juh\bar{u}rth\bar{a}s$  ( $\sqrt{hvr}$ -). 3.  $jih\bar{v}ta$ .

Pl. 3. saścata.

# Present Optative 14.

Active. Sing. 2. mimīyās (x. 56²). — 3. jahyāt¹⁵ (ŚA. XII. 11); juhuyất (AV.), dadyāt (AV.), bibhīyāt, bibhryāt, mamanyāt, mimīyāt (mā-'measure'). — Du. 3. yuyuyấtām. — Pl. 1. juhuyấma. — 3. jahyur¹⁵ (AV.).

Middle. Sing. 3. dádhīta and dadhītā. — Pl. 1. dadīmahi, dadhīmahi. — 3. dadīran.

# Present Imperative.

460. Active. Sing. I.  $j\acute{a}h\bar{a}ni$  (AV.). — 2.  $daddh\acute{i}$ , piprgdhi ( $Vprc\cdot$ ),  $mamaddh\acute{i}$ ,  $mamadh\acute{i}$ ,  $yuyodh\acute{i}$ ,  $vividdh\acute{i}$  ( $Vvis\cdot$ ),  $s\acute{i}s\~{a}dh\acute{i}$ . — With  $-h\acute{i}$ :  $cik\~{h}h\acute{i}$  ( $ci\cdot$  'note', AV.),  $did\~{i}h\acute{i}$  and  $d\~{i}dih\acute{i}$  ( $Vd\~{a}\cdot$ ),  $deh\acute{i}$  ( $Vd\~{a}\cdot$ ),  $dheh\acute{i}$ ,  $piprh\acute{i}$ ,  $bibhrh\acute{i}$  (AV. TS.),  $mim\~{i}h\acute{i}$  ( $m\~{a}\cdot$  'measure'),  $rir\~{i}h\acute{i}^{16}$  ( $Vr\~{a}\cdot$ ),  $s\acute{i}s\~{i}h\acute{i}$ . — With  $-t\~{a}t$ :  $jah\~{i}t\~{a}t$  (AV.),  $datt\~{a}t$ ,  $datt\~{a}t$ ,  $piprt\~{a}t$  (TS. IV. 4. 12 <sup>1</sup>). — 3. ciketu (TS. III. 3. 11 <sup>5</sup>),  $j\acute{a}h\~{a}tu$ ,  $j\acute{i}g\~{a}tu$ , juhotu (TS. III. 3. 10 <sup>1</sup>),  $d\acute{a}d\~{a}tu$ ,  $d\acute{a}dh\~{a}tu$ , pipartu ('fill' and 'pass'), bibhartu (AV. TS.),  $m\'{i}m\~{a}tu$ , yayastu, yuyotu,  $s\acute{i}s\~{a}tu$ ,  $sis\~{a}ktu$ .

I Also the transfer form dádhanti,

- 3 There is also a transfer form mimanti 'bellow'.
  - 4 Also the transfer form dadate.
- 5 Also the transfer form dadhate. 6 There is also the transfer form rarate from  $Vr\bar{a}$ .
  - 7 Also the transfer form dadhete (AV.).
- 8 By AVERY 2374 given as 3. sing. subunctive middle.
- 9 TS. 1. 5. 10<sup>4</sup>, III. 1. 8<sup>2</sup> has the transfer form dádante.
- 10 Pp. didayat; see Whitney's note on AV. III. 83.

- 11 śaśvacái (RV. III. 33<sup>10</sup>) is probably sing. I perfect subj. (p. 361); but occurring beside the aorist form namsai, it may be an aorist, to which tense WHITNEY, Roots, doubtfully assigns it.
- 12 dīdayante (AV. XVIII. 373) is perhaps a subjunctive.
- 13 With the strong base yuyo- for yuyu-.
- <sup>14</sup> AVERY 24I gives here several forms which it is better to class as optatives per-
- <sup>15</sup> With weak base jah, for  $jah\bar{\nu}$ , which here loses its final vowel like  $dad\bar{a}$  and  $dadh\bar{a}$ -.

<sup>16</sup> The only form in which  $\sqrt{r\bar{a}}$ - reduplicates with  $\dot{a}$ .

<sup>&</sup>lt;sup>2</sup> Regarded by Delbrück, Verbum p. 1333, as an intensive.

Du. 2. jahītam (AV.), jigātam, dattám, dhattám, pipṛtám, mimītám, yuyutám and yuyotam<sup>1</sup>, śisītám, sisṛtam. — 3. cikitām (ci-'note', AV.), dattām,

dhattām, piprtām, bibhrtām, mimītām, śiśītām.

Pl. 2. íyarta<sup>2</sup>, jahīta (AV.), jigāta, juhuta and juhúta<sup>3</sup>, dattá and dádāta<sup>4</sup>, dhattá and dádhāta5, ninikta (Vnij-), pipṛkta, pipṛtá, bibhīta (AV.), bibhṛtấ (TS. IV. 2. 3<sup>2</sup>), yuyóta<sup>1</sup>, śiśīta, siṣakta; jigātana, juhótana<sup>3</sup>, dadātana<sup>4</sup>, dhattana and dádhātana<sup>5</sup>, pipartana<sup>6</sup>, bibhītana, mamattána, yuyitana<sup>1</sup>, vivaktana. — 3. dadatu (AV.), dadhatu<sup>7</sup>.

Middle. Sing. 2. jihīṣva, datsva (AV.), dhatsva, mimīṣva (AV.),

rarāsva (AV.). — 3. jihītām8.

Du. 2. jihāthām (TS. 1. 1. 121), dīdhīthām (AV.), mímāthām, rarāthām.

Pl. 2. juhudhvam (TS. IV. 6. 15), rarīdhvam. — 3. jihatām, dadhatām, sisratām (Kh. I. 3°).

#### Present Participle.

46r. Active. As the suffix -ant drops its n (like the endings of the 3. pl. act.) strong and weak stem are not distinguished. The feminine stem of course lacks n also; e.g. bibhrat-ī-. Stems occurring are: cikyat- (ci- 'note'), jáhat-, j/gat-, j/hvat-, títrat- (tr. 'cross'), dádat-, dádhat-, dídyat-, dídhyat-, bápsat-, bíbhyat-, bíbhrat-, sascát- ('pursuer') and sáscat-10 ('helping'), sísrat-11.

Middle. jihāna-, jihvāna-, dádāna-, dádhāna-, dīdyāna-, dīdhyāna-, pipāna- (pā- 'drink', AV.) and pipāná-12, pipyāna-13 (Vpī-), mimāna-, rárāna-14,

šišāna-.

### Imperfect Indicative.

462. All the verbs of this class occurring in the 3. pl. act. take the ending -ur except bhr-, which has the normal -an. The verbs  $d\bar{a}$ -,  $dh\bar{a}$ -,  $h\bar{a}$ show the irregularity (appearing elsewhere also) of using the strong instead of the weak base in the 2. pl. act.

Active. Sing. 1. adadām, adadhām. — 2. ádadās, ádadhās 15, ádīdes. ávires (Vviș-); bibhes (AV.), vivés (Vviș-), sisās. — 3. aciket (Vci-), ájahāt, ajigat, ádad $at^{16}$ , ádadhat, ádadhat, ádadhat, ádadhat, ábibhar, abibhet, ávivya $k^{17}$ , asisat; vivés (Vvis-).

Du. 2. adattam, adhattam. — 3. áviviktām, ámimātām (AV.)<sup>18</sup>. Pl. 2. ádadāta<sup>19</sup>, ádadhāta<sup>19</sup> and ádhatta; ájahātana<sup>19</sup>, ádattana. — 3. abibhran; ajahur, ájuhavur, adadur, adadhur, ámamadur, avivyacur; jahur, dadur, dīdhyur (AV.), vivyacur.

Middle. Sing. 2. ádhatthās, ámimīthās; dīdīthās (AV.). — 3. ájihīta, adatta, adhatta, ápiprata<sup>20</sup>, ámimīta; šíšīta. — Pl. 3. ajihata, ájuhvata<sup>21</sup>.

with strong base yuyo- for yuyu-.

- 2 With strong base iyar- for \*iyr-; cp. v. Negelein 654 f.
  - 3 With strong base for weak.
  - 4 Strong base dádā- for dad-.
  - 5 Strong base dádhā- for dadh-.
  - 6 Strong base pipar- for pipr -.
  - 7 Also the transfer form dadhantu.
- 8 There is also the 3. sing. transfer form
- 9 cikyat (IV. 384), nom. sing. m., is given by v. Negelein 772 as cikyat and explained as a pluperfect form.
- 10 When compounded with the negative particle, sascat- remains unchanged in the fem. if accented a-saścát-, but has n if accented on the prefix: á-sascant-ī-.

312.

- 12 With irregular accent.
- 13 The anomalous transfer form bibhramāṇa- takes the place of \*bibhrāṇa-.

14 But perfect rarāṇá.

- 15 There is no sufficient reason for regarding ádadhās in x. 739, as a 3. sing. (AVERY 248; Delbrück, Verbum 50, 59).
- 16 There is also the transfer form dádat. v. Negelein 672 gives dádhāt (RV. AV.) which seems a misprint for dádhat.
- 17 There is also the unaugmented transfer form vivyácat.
- 18 WHITNEY, Sanskrit Grammar 665, quotes ajahitām from the TS. (mantra?).
  - 19 With strong base instead of weak. 20 Anomalous form instead of \*ápirria.
- 21 Also the transfer form adadanta. WHITNEY II For inflected forms of these stems see | 658 also mentions the unaugmented 3. pl. jihata.

### $\beta$ . I. The infixing nasal class.

- 463. This class, which includes fewer than 30 verbs, is characterized by the accented syllable ná preceding the final consonant of the root in the strong forms. That syllable in the weak forms becomes a simple nasal varying according to the class to which the following consonant belongs.
- r. The infix, appearing in forms outside the limits of the present stem, has become part of the root in anj- 'anoint', bhanj- 'break', and hims- 'injure'. - 2. There are a few transfers to the á-class, in which some of these verbs come to be inflected in the later language<sup>1</sup>, and in which several verbs are regularly nasalized in the present stem (429, a, 1). — 3. Instead of the regular -ná-, the root trh- 'crush' infixes -né- in the strong forms; thus 3. sing. true-dhi. - 4. In the 3. pl. ind. mid. irregular accentuation of the final syllable occurs exceptionally in each of the forms añjaté, indhaté, bhuñjaté 2.

#### Present Indicative.

**464.** The forms actually occurring, if made from yuj- 'join', would be the following:

Active. Sing. 1. yunájmi. 2. yunáksi. 3. yunákti. — Pl. 1. yuñjmas. 3. yuñjánti.

Middle. Sing. 1. yuñjé. 2. yunkse. 3. yunkté. — Du. 2. yuñjáthe. 3. yuñjáte. — Pl. 2. yungdhvé. 3. yuñjáte.

The forms which actually occur are the following:

Active. Sing. I. anajmi (AV.), chinadmi (AV.), trnadmi (V trd-), bhinadmi, yunájmi, runadhmi (rudh- 'obstruct'). — 2. prnáksi (Vprc-), bhinátsi, yunaksi, vrnáksi (vrj-'twist'). — 3. anakti, unátti (Vud-), krnatti (krt- 'spin'), grnatti 3 (AV. x. 743), chinátti (AV.), trnatti, pinásti (V pis-), bhanákti (V bhañj-), bhinátti, yunákti (AV.), rinákti (Vric-), runáddhi, vrnákti, hinásti (Vhims-, AV. SA.).

Pl. I. anjmas. — 3. anjánti, undánti, pimsánti, prncánti, bhindánti,

yunjanti, vincanti (vic- 'sift'), vrnjanti.

Middle. Sing. 1. añje, rñje (rj- 'direct'), prñce (AV.), yuñjé, vrñjé. — 2. yunkse (AV.). — 3. ankté<sup>4</sup>, indhé (= ind-dhé, V idh-), prnkté, yunkté<sup>5</sup>, rundhé (= rund-dhé, AV.), vrnkte, himste<sup>6</sup> (AV.). — With ending -e: vrñjé.

Du. 2. añjāthe (Kh. v. 64; VS. XXXIII. 33), yuñjāthe. — 3. añjāte (VS.

xx. 61), tuñjáte, vrñjāte (AV.).

Pl. 2. angdhvé. — 3. añjáte and añjaté, indháte and indhaté, rñjate, tuñjáte, prñcáte, bhuñjáte and bhuñjaté, yuñjáte, rundhate (AV.), vrñjate.

# Present Subjunctive.

465. The weak base is once used instead of the strong in the form  $a\tilde{n}j$ -a-tas for \*anaj-a-tas; and the AV. has once the double modal sign  $\bar{a}$  in the form trnáh-ān.

Active. Sing. 2. bhinádas. — 3. rnádhat, bhinádat, yunájat. — Du. I. rinácāva. — 3. añjatas. — Pl. 3. anájan, vunájan, vrnajan; trnáhān (AV.).

Middle. Sing. 3. inádhate, yunájate. — Pl. 1. bhunájāmahai, ruṇadhāmahai.

# Present Injunctive.

Active. Sing. 2. pinák (V pis-), bhinát. — 3. pinak, prnák, bhinát, rinak (Vric-).

Middle. Pl. 3. yuñjata.

I Thus ud- 'wet': unátti is inflected as | unda-ti in B. and S.; and yuj- 'join': yunákti ruption of the corresponding út kṛṇatti of

<sup>&</sup>lt;sup>2</sup> In the RV. añjaté occurs once, añjate 12 times, indhaté 4 times, indhate 15 times, while bhuñjaté and bhuñjáte occur once each.

<sup>3</sup> úd grnatti 'ties up', is here only a coras yunja-ti in U. and E., beside the old forms. | RV. x. 1302, seemingly a form of grath 'tie'.

<sup>4</sup> AV. anté. 5 AV. yunte.

<sup>6</sup> With irregular accent.

#### Present Optative.

Active. Sing. 3. bhindyāt (AV.). — Middle. Sing. 3. pṛñcītá.

#### Present Imperative.

466. The only ending of the 2. sing. act. is -dhi, no form with -tāt having been met with. As usual, the strong base sometimes appears in the

2. pl. act.: unátta, yunákta; anaktana, pinastana.

Active. Sing. 2.  $andhi^{T}(\sqrt{anj})$ , undhi(=unddhi), chindhi(=chinddhi), trndhí (= trnddhí), pràdhi (= pràgdhi), bhaàdhi (= bhaagdhi), bhiadhí (= bhinddhi), yundhi (= yungdhi, AV.), rundhi (= runddhi, AV.), vrndhi (= vrngdhi). — 3. anáktu, chináttu (AV.), trnéjhu² (AV.), prnáktu, bhanaktu (AV.), bhinattu (AV.), yunáktu (AV.), vinaktu (Vvic-, AV.), vrnaktu, hinástu (Kh. IV. 5<sup>15</sup>).

Du. 2. antam (= anktam, AV.), chintám (= chinttám, AV.), priktám. —

3. anktām (VS. II. 22).

Pl. 2. unátta<sup>3</sup>, bhintta (TS. IV. 7. I 3<sup>2</sup>), yunákta, vrňkta; anaktana, pinas-

tana. — 3. añjantu, undantu (AV.), yuñjántu (AV.), vṛñjantu (AV.).

Middle. Sing. 2. ankṣva (AV.), yunkṣvá, vṛnkṣva (AV.). — 3. indhām 5 (= inddhām, AV.), yuntām (= yunktām, AV.), rundhām (= runddhām, AV.). — Du. 2. yuñjáthām. — Pl. 2. indhvam (= inddhvam), yungdhvám. — 3. indhatām.

#### Present Participle.

467. Active. añjánt-, undánt- and udat-í- (AV.), rñjánt-, rndhánt-, krntatí-(AV.), pimṣati-, prñcánt- and prñcati-6, bhañjánt- and bhañjati-, bhindánt- and bhindatí- (AV.), bhuñjatí-, yuñjatí-, viñcánt-, (á-)himsant-.

Middle. añjāná-, indhāna-, tuñjāná-, tundāná-<sup>7</sup> (AV.), prũcāná-, bhindāná-,

yuñjāná- (TS. IV. I. II), rundhāná-, śumbhāná-8, híṃsāna-.

# Imperfect Indicative.

468. Active. Sing. 2. átrnat<sup>9</sup> (AV.), abhanas <sup>10</sup> (AV.), ábhinat, arinak (Vric-), avrnak; unap (Vubh-), rnak (Kh. IV. 69), pinak, bhinát. — 3. átrnat, aprnak (V prc-), ábhinat, ayunak and āyunak, avinak (V vic-, AV.), ávrnak (Vvrj-); áunat (Vud-); bhinát, rinák, vrnák. — Du. 2. atrntam (= atrnttam). — Pl. 3. átrndan, ábhindan, avrñjan; āñjan, āyuñjan (TS. 1. 7. 7<sup>2</sup>).

Middle. Sing. 3. ainddha (Vidh-, AV.). — Pl. 3. ayuñjata, arundhata

(AV.); unaugmented: añjata.

## $\beta$ . 2. The nu- class.

Delbrück, Verbum p. 154-157. - Avery, Verb-Inflection 232 ff. - Whitney, Sanskrit Grammar p. 254-260; Roots 213. - v. Negelein, Zur Sprachgeschichte 57-60; 63-64; 94.

469. More than thirty verbs follow this class in the Samhitas. The stem is formed by adding to the root, in the strong forms, the accented syllable -nj, which in the weak forms is reduced to -nu.

<sup>2</sup> Cp. v. NEGELEIN, Zur Sprachgeschichte

3 The AV. has the transfer form umbhata (Vubh-) according to the  $\acute{a}$ - class.

4 AV. XIX. 455: ākṣva emended to ā-ankṣva; see WHITNEY's note on the passage.

5 V. NEGELEIN 63, note 1, thinks this form may be the starting point of the ending  $-\bar{a}m$  | Cp. above 66, c,  $\beta$  2 (p. 61).

6 AV. also pṛñcatī.

7 Vtud- otherwise follows the  $\acute{a}$ - class.

8  $\dot{V}$ subh- otherwise follows the a- or  $\dot{a}$ class.

9 From Vtrd. The MSS. have átrinat: see Whitney's note on AV. XIX. 324.

10 For \*abhanak-s (\bar{bhanj}-): see WHITNEY, Grammar 555, and his note on AV. III. 63.

the root is regularly dropped before the ending -dhi.

For ang-dhi. The final consonant of in the imperatives 3. sing. vid-am and dúh-ām.

a. Several irregularities occur with regard to root, suffix, and ending. 1. The root sru- 'hear' is dissimilated to sr-1 before the suffix: sr-nu-, sr-nv-. - 2. The root vr- $\epsilon_{\text{COVer}}$  assumes the anomalous form of  $\bar{u}r$  (with interchange of vowel and semivowel): ur-nu-, beside the regular vr-nu-2. - 3. Four roots ending in -n, tan- 'stretch', man-'think', van- 'win', san- 'gain', seem to form their stem with the suffix -u, being assigned by the Indian grammarians to a separate class, the eighth; but this appearance has probably been brought about by the an of the root having originally been reduced to the nasal sonant: ia-nu- for \*in-nu-3. — 4. In place of the regular and very frequent kr-nu-, there appears in the tenth book of the RV. the anomalous stem kuru-, once in the form kur-mas (x. 517), 1. pl. pres. ind., and twice in the form kuru (x. 192, 1452), 2. sing. impv. act. The strong form of this stem, karó-4, which has the additional anomaly of Guna in the root, appears in the AV., where however the forms made from krnó. kynu- are still upwards of six times as common as those from karó-, kuru-5. The isolated form taru-te 'attains', which occurs once in the RV. (x. 762), seems to be analogous in formation to karó-ti, but it may be connected with the somewhat frequent nominal stem taru-6. - 5. The u of the suffix is dropped, in all the few forms which occur in the I. pl. ind. act. and mid., before terminations beginning with m: kur-más, krn-mási (AV.), tan-masi (TS.), hin-mas (AV.), hin-masi (AV.); krn-mahe, man-mahe 7. When the -nu is preceded by a consonant, the u becomes uv before vowel endings; e. g. aśnuv-anti (but sunv-anti). — 6. In the 3. pl. mid., six verbs of this class take the ending -re8 with connecting vowel -i-: inv-ire, rnv-ire, pinv-ire, srnv-ire, sunv-ire, hinv-ire. The connecting vowel -i- is also taken by sru- in the 2. sing. mid. srnv-i-se (for \*srnu-se) used in a passive sense. — 7. Five stems of this class, i-nu-, r-nu-, ji-nu-, hi-nu-, have come to be used frequently even in the RV. as secondary roots following the a-conjugation. Of these pinv-a- occurs almost exclusively in the RV. as well as the AV.; inv-a- alone is met with in the AV.; and jinv-a- and hinv-a- are commoner in the RV. than ji-muand hi-nu-.

#### Present Indicative.

470. The forms actually occurring, if made from kr- 'make', would be as follows:

Active. Sing. 1. krnómi. 2. krnósi. 3. krnóti. – Du. 2. krnuthás. 3. krnutás. – Pl. 1. krnmási and krnmás. 2. krnuthá. 3. krnvánti.

Middle. Sing. 1. krnvé. 2. krnusé. 3. krnuté and krnvé. — Du. 2. krnväthe. - Pl. 1. krnmahe. 3. krnváte10.

The forms which actually occur are the following:

Active. Sing. I. ūrņomi (AV.), rņomi, krņomi, kṣinomi (AV.TS.), minomi (mi- 'fix', AV.), vrnomi ('choose', Kh. II. 65), s'aknomi (AV.), s'rnómi, hinómi. — With -u-: karomi (AV. TS.), tanomi.

2. āpnóṣi (AV.), inoṣi, kṛṇóṣi, jinóṣi, stṛṇóṣi, hinóṣi; tanóṣi, vanóṣi.

3. aśnoti (aś- 'attain'), āpnóti (VS. AV.), inóti, unoti (RVI.), ūrnoti, rnoti, rdhnoti, krnóti, cinóti 'gathers', dāśnóti, dunoti (AV.), dhūnoti, minoti (AV.), vrnóti, šaknoti (AV.), šrnóti, sunóti, skunóti (AV.), hinóti; karoti (AV. TS. VS.), tanóti, vanoti, sanóti.

Du. 2. aśnuthas (Kh. I. 9<sup>2</sup>), ūrnuthas, kṛnuthás, vanuthás. — 3. aśnutás, ūrnutás, krnutas, sunutás; tanutas (Kh. III. 226).

Pl. 1. krnmási (AV.), hinmas (AV.), hinmasi (AV.); kurmás, tanmasi (TS. IV. 5. III). — 2. aśnutha, krnutha, dhūnutha, sunutha. — 3. aśnuvanti,

<sup>&</sup>lt;sup>1</sup> Cp. Delbrück, Verbum p. 154<sup>‡</sup>.

<sup>&</sup>lt;sup>2</sup> Cp. Brugmann, KG. 674.

<sup>3</sup> Cp. Brugmann, KZ. 24, 259; DELBRÜCK

<sup>4</sup> Perhaps starting from the aorist á-kar and following the analogy of krno-; cp. BRUGMANN, KG. 656, 3.

<sup>5</sup> WHITNEY 715.

<sup>6</sup> Occurring in taru- 'swift' (?), taru-tr- 'conqueror', táru-tra-'victorious', táru-sa-'victor', AV.) in which the stem pinu- appears. All others and the verbal stem tarusya-'cross', 'overcome'. are made from the transfer stem pinva-.

<sup>7</sup> Thus kṛṇ-mahe is not the only example of Sometimes accented kṛṇvaté.

<sup>(</sup>DELBRÜCK 174, BRUGMANN, KG. 673) of this phenomenon. There is no example in the Samhitas of the 1. du. in -vas and -vahe; but \*krn-vás, \*krn-váhe must be presupposed to account for the loss of the -u before -mas and -mahe: Brugmann, KG. 673.

<sup>8</sup> Like duh-re in the root class. 9 This is the only form (besides the participle pinv-āná- and pinv-ánt-, pinv-at-im in

rnvánti, krnvánti, cinvánti (TS.I.I.72), dabhnuvanti, dunvanti (AV.), prusnuvanti, śaknuvánti (AV.), śrnvánti, sunvánti, hinvánti; kurvanti (AV.), tanvánti.

Middle. Sing. 1. asnuve, kṛṇvé, hinvé; kurve (AV.), manvé (AV.), vanve.

2. aśnuse, ūrņuse, krņusé, cinusé, dhūnusé; tanuse (AV.). — With connecting vowel -i-: śrnv-i-sé.

3. aśnuté, ūrņuté, kṛṇuté, dhūnute, pruṣṇute, śṛṇute; kurute (AV.), tanute,

tarute, vanuté. — With ending -e: srnvé, sunvé, hinvé.

Du. 2. tanvāthe. — Pl. 1. kṛṇmahe, manmahe. — 3. aśnuvate, kṛṇváte, vrnváte and vrnvaté, sprnvaté, hinváte; kurváte (AV.), tanvaté and tanváte (AV.). — With ending -re: inv-i-re, rnv-i-re, pinv-i-re, śrnv-i-ré, sunv-i-ré, hinv-i-ré.

### Present Subjunctive.

471. Active. Sing. 1. kṛṇavā, hinavā; sanávāni (AV.). — 2. ṛṇávas, kṛṇávas, tṛpṇávas, śṛṇávas; karavas (AV.). — 3. aśnavat², kṛṇávat, cinavat, dhūnavat, prusnávat, srnávat, sunávat; vanávat. — With double modal sign ā: karavāt (AV.), krnavāt (AV. XX. 1325). — With ending -tai: aśnavātai 3 (AV.). — Du. I. aśnavāva, kṛnavāva.

Pl. 1. aśnávāma, kṛṇávāma, minavāma, śaknávāma, sunavāma, sprnavāma. — 2. sanávatha; with double modal sign: krnavātha (VS.). — 3. aśnavan, krnávan, srnávan.

Middle. Sing. 1. aśnavai (VS. XIX. 37), kṛṇávai, sunávai; manávai. — 2. krnavase; vanavase. — 3. krnávate; manávate.

Du. 1. kṛṇavāvahai; tanavāvahai. — 2. aśnávaithe. — 3. kṛṇvaite4.

Pl. 1. aśnávāmahai (x. 97 17)5, krnávāmahai, strnavāmahai (AV.). — 3. aśnavanta, kṛnávanta.

### Present Injunctive.

Active. Sing. 6 2. rnos. — 3. úrnot. — Pl. 3. rnvan, minván, hinván; vanvan.

Middle. Sing. 2. tanuthās. — 3. rnutá. — Pl. 3. krnvata; manvata.

# Present Optative.

Active. Sing. 1. sanuyām. — 3. śṛṇuyắt (AV.). — Pl. 1. cinuyāma, śrnuyāma; vanuyáma, sanuyáma.

Middle. Sing. 3. kṛṇvīta<sup>7</sup>; manvīta (AV.).

# Present Imperative.

472. Active. Sing. 2. srnudhi. — With ending -hi<sup>8</sup>: aksnuhi (aks-'mutilate', AV.), aśnuhi, āpnuhi (AV.), inuhi, ūrnuhi, krnuhi, cinuhi, trpnuhi, dabhnuhi (AV.), dhūnuhi, dhṛṣṇuhi, sṛṇuhi, spṛṇuhi, hinuhi; tanuhi, sanuhi. — With ending -tat: krnutat, hinutat. — Without ending: inú, ūrnu, krnu, dhūnu (AV.), sṛṇú, sunú, hinu; kuru, tanu. — 3. aśnotu, āpnotu (AV.), ūrṇotu (AV.), krnótu, cinotu, minotu, śrnótu, sunotu; karotu (TS. VS.), tanotu (AV.), sanotu.

Du. 2. aśnutam, krnutám, trpnutám, śrnutám, hinótam<sup>9</sup>. — 3. aśnutām (AV. TS.),  $krnut\bar{a}m$  (AV.).

<sup>2</sup> The form arnavat, AV. v. 28 (1/2-), is a on the passage. corruption of avrnot in RV.

3 The TS. has once asnavatai (WHITNEY vita in K. (WHITNEY 713). 701).

4 Irregular for krnávaite.

5 Omitted by AVERY 238.

7 ūrnvītá occurs in TS. vi. 1.33 and ūrņu-

8 Cp. WHITNEY 704. 9 With strong stem.

I skrnvanti after pari: pariskrnvánti (IX.I42), pári skrnvanti (IX. 6423).

<sup>6</sup> The injunctive form asnavam, AV. xix. 556, is a conjecture; see WHITNEY's note

Pl. 2. ūrnuta, kṛnutá and kṛnóta<sup>1</sup>, tṛpnuta, dhūnuta, śṛnutá and śṛnota<sup>1</sup>. sunutá and sunota<sup>1</sup>, hinuta (AV.) and hinota<sup>1</sup>; tanota<sup>1</sup> (AV. TS.). With ending -tana: kṛṇótana², śṛṇotana², sunótana², hinotana² (x. 307). — 3. aśnuvantu, ūrnuvantu, krnvántu, cinvantu (TS.v. 2. 112), śrnvántu, hinvantu; vanvántu, sanvantu.

Middle. Sing. 2. ūrņuṣva, kṛṇuṣvá, cinuṣva (AV.), dhūnuṣva (AV.), śrņuṣvá; tanuṣva, vanuṣva. — 3. aśnutām (AV.), kṛṇutām; tanutām (TS. 1.

6. 33), manutām, vanutām (AV.).

Du. 2. krnvāthām (AV.). — Pl. 2. krnudhvám, sunudhvam; tanudhvam. vanudhvam (AV.). — 3. rnvatām (AV.); kurvatām (AV.), tanvátām (AV.). vanvatām (AV.).

### Present Participle.

473. Active. ūrnuvánt- and ūrnvánt-, f.-vatí-, rnvánt-, krnvánt-3, f.-vatí-, cinvánt-, f. -vatí-, dunvánt- (AV.), dhūnvánt-, pinvánt- (AV.), minvánt-, vrnvánt-, śrnvánt-, f. -vatí-, sunvánt-, hinvánt-, f. -vatí-; kurvánt- (AV.), f. -vatí- (AV.). tanvánt-, f. -vatí- (AV.), vanvánt-.

Middle. ūrnvāná-, kṛṇvāná-, cinvāná- (TS.IV.2.101), dhūnvāná-, pinvāná-, sunvāná-, hinvāná-; kurvāná- (AV.), tanvāná-, manvāná-, vanvāná-.

## Imperfect Indicative.

- 474. Active. Sing. 1. aśrnavam; kṛṇavam. 2. ákṛṇos, ávṛṇos, áśrnos, ásaghnos, ainos, áurnos; akaros (AV.), ávanos, ásanos. — 3. ákrnot, ádhūnot, avrnot, apnot (AV. TS.), ardhnot (AV.), ainot, aurnot; akarot (VS. AV.), atanot, asanot. — Du. 2. akrnutam, adhūnutam.
- Pl. 2. akrnuta and akrnota; akrnotana. 3. ákrnvan, acinvan (AV.), asaknuvan, asrnvan (AV.); rnvan, minvan; akurvan (AV.), avanvan, asanvan.

Middle. Sing. 2. adhūnuthās; kuruthās (AV.). — 3. akṛnuta, ádhūnuta; kṛṇuta; akuruta (AV.), atanuta (AV.), amanuta.

Pl. 2. ákrnudhvam. — 3. ákrnvata 4, avrnvata; akurvata (AV.; Kh. II 135), átanvata, amanvata, avanvata (AV.).

# $\beta$ . 3. The $n\bar{a}$ - class.

Delbrück, Verbum p. 151-153. - Avery, Verb-Inflection 232 ff. - Whitney, Sanskrit Grammar p. 260-263; Roots 214. - v. NEGELEIN, Zur Sprachgeschichte 49-57. — Cp. J. SCHMIDT, Festgruss an Roth 179 ff.; BARTHOLOMAE, IF. 7, 50—81; BRUG-MANN, IF. 16, 509 ff.

- 475. Nearly forty verbs belong to this class in the Samhitas. The stem is formed by adding to the root, in the strong forms, the accented syllable  $-n\bar{\alpha}^5$ , which in the weak forms is reduced to  $-n\bar{\imath}$  before consonants and -nbefore vowels.
- a. There are some irregularities with regard to the root, the suffix, and the endings. I. The root shows a tendency to be reduced in various ways. The roots  $j\bar{\imath}$ - 'overpower',  $j\bar{\imath}$ - 'hasten',  $p\bar{\imath}$ - 'purify', are shortened; e.g. jinámi, junāsi, punāti. The root grabh- 'seize' and its later form grah- take

3 skrnvánt- in pari-skrnván (IX. 392).

I With strong stem instead of weak. Thus | in four out of seven verbs there is an alter-

<sup>&</sup>lt;sup>2</sup> Thus all the forms occurring with -tana have a strong stem. WHITNEY 704 also mentions karôta besides the 2. du. krnotam, but I do not know whether these forms displaced earlier -ni, KG. p. 512. occur in mantra passages.

<sup>4</sup> In x. 134 akrnvata has the appearance native strong form; and in one other (tanota) of being used for the 3. sing. (= akrnuta). the strong is the only form occurring. 5 The suffix may originally have been -nai of which -nī would be the weak grade (27); but Brugmann, Grundriss 2, 597, note, disagrees with this view. He thinks -nī has

Samprasāraṇa; e. g. grbhṇami and grhnami (AV.). Four roots which, in forms outside the present system appear with a nasal  $^{\dagger}$ , drop the nasal here; thus bandh- 'bind': badhnami (AV.); manth- 'shake': mathnami (AV.); skambh- 'make firm': skabhnati; stambh- 'prop': stabhnati (AV.). The root  $j\bar{n}\bar{a}$ - 'know', also loses its nasal; e. g.  $j\bar{a}$ - $n\bar{a}$ - $mi^2$ . — 2. The strong form of the suffix,  $n\bar{a}$ , appears in certain 2. persons impv. act., which should have the weak form  $n\bar{i}$ ; e. g. 2. pl.  $puna\bar{i}$ -ta for  $pun\bar{i}$ -ta. On the other hand  $n\bar{i}$  appears once instead of  $n\bar{a}$  in 3. sing. injv.  $min\bar{i}$  (AV.). — 3. A few roots ending in consonants take the peculiar ending  $-\bar{a}na$  in the 2. sing. impv. act.; e. g.  $grh-\bar{a}na$ . — 4. Transfers to the a- conjugation are made from five roots. These are rare in the case of gr- 'sing': grna-ta 2. pl. ind., grna-nta 3. pl. impf.; mi- 'damage': mina-t 3. sing. injv., amina-ta 2. pl. ind., grna-ta 3. pl. impf.; mi- 'damage': mina-ta 3. sing. injv., amina-ta 3. pl. impf.; fr- 'crush' only fr-ta and fr- 'damage': fr- 'fill' and fr- 'crush' form the regular fr- stems fr-fr- and fr- (beside fr-fr- and fr- 'crush' form the regular fr- stems fr- and fr- (beside fr-fr- and fr- 'crush' form the former, and five from the latter in the RV.

#### Present Indicative.

476. The forms actually occurring, if made from grabh- 'seize', would be the following:

Active. Sing. 1. grbhņāmi. 2. grbhņāsi. 3. grbhņāti. — Du. 2. grbhņīthas. 3. grbhņītās. — Pl. 1. grbhņīmāsi and grbhņīmās. 2. grbhņītha and grbhņīthāna. 3. grbhņānti.

Middle. Sing. 1. grbhné. 2. grbhnīsé. 3. grbhnīté. — Pl. 1. grbhnīmáhe.

3. gṛbhṇáte.

The forms which actually occur are the following:

Active. Sing. I. aśnámi ('eat', AV. VS.), iṣṇāmi (AV.), kṣinámi (AV.), gṛṇāmi (gr- 'sing'), gṛṇāmi (AV. VI. 71³, gṛ- 'swallow'), gṛbhṇāmi, gṛhṇāmi (AV. TS.), jānāmi, jināmi, punāmi, pṛṇāmi (AV.), badhṇāmi (bandh- 'bind', AV. TS.), mathnāmi (AV.), mināmi, riṇāmi (AV.), śṛṇāmi (AV.), sināmi (AV.), stabhnāmi, stṛṇāmi (AV.). — 2. aśnási (AV.), iṣṇāsi, junāsi, pṛṇási, riṇāsi, śṛṇāsi. — 3. aśnáti, krīṇāti, kṣiṇāti (kṣi- 'destroy'), gṛṇáti, gṛbhṇáti, gṛhṇáti (AV.), jānáti, jiṇāti, junāti, punáti, pṛṇáti, mināti, muṣṇāti (AV.), riṇáti, śṛnáti, sināti, skabhnáti, stabhnáti (AV.), hruṇāti.

Du. 2. rinīthas. — 3. grnītás, prnītas.

Pl. I. grņīnasi, junīmasi, minīmasi, śrņīmasi (AV.); jānīmas. — 2. jānītha; strņīthana (AV.). — 3. aśnanti (AV.), kṣiṇanti, grṇanti, grbhṇanti, grhṇanti (AV.TS.), jānanti, jinanti, junanti, punanti, prṇanti, prīṇanti, badhnanti (AV.), bhrīṇanti, minanti, riṇanti, śrīṇanti, strṇanti.

Middle. Sing. 1. grné, grbhne, grhné (AV.), vrné. — 2. grnīsé<sup>8</sup>, vrnīsé (AV.), śrīnīse, hrnīse. — 3. krīnīte (AV.), kṣinīte (AV.), grnīté, punīte, prīnīté,

rinīte, vrnīté, śrathnīté, strnīte, hrnīte. — With -e for -te: grne.

Pl. 1. grhņīmahe (TS. v. 7. 9<sup>1</sup>), punīmahe (Kh. 111. 10<sup>4</sup>), vṛṇīmáhe<sup>9</sup>. —

<sup>&</sup>lt;sup>1</sup> Cp. Brugmann, Grundriss 2, 627.

<sup>&</sup>lt;sup>2</sup> Originally \*janā- with nasal sonant, \*jnnā-; see Brugmann, KG. 666 (p. 511).

<sup>3</sup> On this form see v. NEGELEIN 56, note 1. 4 On the origin of this ending see BRUG-

MANN, Grundriss 2, p. 975.

5 Beside seven present stems of this class there appear denominative stems in -āya from the same roots. Cp. v.NEGELEIN 50—52.

<sup>&</sup>lt;sup>6</sup> Given, along with a number of cognate forms, as from the root  $b\bar{a}dh$ -, by v. NEGE-LEIN 57.

<sup>7</sup> The only form occurring of the root bhrī- 'consume'.

<sup>8</sup> The form gṛṇ̄ṣṣ́ also occurs in the RV. as a I. sing. ind., 'I praise', being formed from an anomalous acrist stem gṛṇ̄-ṣ-.

<sup>9</sup> According to WHITNEY 719, once vrnīmahé, with reference doubtless to RV. V. 203, where, however, vrnīmahé 'gne is only the Sandhi accentuation for vrnīmahe 'gne (see above 108 and p. 319, note 13).

3. aśnate<sup>1</sup>, grbhnate, grhnate (AV.), jānate, punáte (AV.) and punaté, badhnáte. rinaté, vrnáte.

### Present Subjunctive.

477. In the 2. 3. sing., subjunctive forms are indistinguishable from the indicative present, if formed with primary endings, and from the injunctive, if formed with secondary endings, as the modal sign a is merged in the strong stem; thus grbhnáti may be 3. sing. indicative or subjunctive; grbhnás may be 2. sing. injunctive or subjunctive. In such forms therefore the sense or construction of the sentence can alone decide their value. These as well as unmistakable subjunctives are rare in this class.

Active. Sing. 2. grbhnás, junás. — 3. prnāti (x. 24, cp. 25), prnāt (AV.). — Pl. 1. junáma, mináma.

Middle Du. I. krīṇāvahai (TS. I. 8. 41). — Pl. I. jānāmahai (AV.).

### Present Injunctive.

Active. Sing. 1. kṣinām. — 2. rinās (AV. XX. 13511). — 3. jānāt², minīt<sup>3</sup> (AV. VI. 110<sup>3</sup>). — Pl. 3. minan, rinán (VIII. 7<sup>28</sup>), s'camnan.

Sing. 2. hṛṇīthās. — 3. gṛṇīta, gṛbhṇīta, vṛṇīta. — Pl. 1. Middle. strnīmáhi4.

#### Present Optative.

In the middle some forms of the optative cannot be distinguished from unaugmented forms of the imperfect, as the modal sign -7 is merged in the suffix -nī. The forms actually occurring are very few, being found in the 2. 3. sing. only.

Active. 3. aśnīvāt (AV.), gṛhnīyắt (AV.), jinīyắt (AV.), pṛnīyắt. Middle. 2.  $j\bar{a}n\bar{\imath}th\bar{a}s$  (Kh. iv.  $5^{30}$ ). — 3.  $vrn\bar{\imath}ta$  (TS. i. i.  $2^{1}=vur\bar{\imath}ta$ , VS. iv. 8).

# Present Imperative.

478. The regular ending of the 2. sing. act. is -hi, while -dhi never occurs. Three verbs take -tat as well. One of these, grah-, and three others ending in a consonant, as-, bandh-, stambh-, take the peculiar ending -āná.

Active. Sing. 2. grṇāhi 5 (TS. IV. 4. 125), grṇāhi, grbhṇāhi (AV.), grhṇāhi 5 (AV.), jānīhi, punāhi6 (SV.), punīhi, prnīhi (AV.), mrnīhi, srnāhi6 (SV.), sṛṇīhi<sup>7</sup>, stṛṇīhi<sup>8</sup> (AV.). — With -tāt: gṛhṇītāt (AV.), jānītāt<sup>9</sup> (TS. AV.), punītāt. — With -āna: asāna10, grhāna10 (x. 10312), badhāna (AV.), stabhāná (AV.) — 3. grnātu, grhnātu, jānātu (AV.), punātu, prņātu (AV.), badhnātu (AV.), sṛṇātu (AV.), sinātu (AV.).

Du. 2. aśnītám, grnītam (TS. IV. I. 82), grhņītam (AV.), prņītám, śrnītám, strnītám. — 3. grnītām, punītām (AV.).

I grnaté (AV. IV. 212), given by v. NEGE-LEIN as a finite form grnate (unaccented), grhnihi. is the dat. sing. of the participle.

<sup>&</sup>lt;sup>2</sup> This form is accented janat in the Khila (III. 21) after RV. X. 103 (AUFRECHT's Rigveda2, 682), but it is correct in the corresponding passage of the AV. (III. 26).

<sup>3</sup> For mināt.

<sup>4</sup> There seems to be no certain example of a 3. pl. AVERY 240 gives grbhnata, but this form (IX. 147) appears to have an imperf. sense; he adds ornata with a query, but I the latter is regarded by GRASSMANN as a cannot trace the form.

<sup>5</sup> With strong base instead of grnīhi,

<sup>6</sup> With strong base and irregular accent. 7 Also the transfer form spna (AV. XIX. 451).

<sup>8</sup> WHITNEY 723 quotes stṛnāhi from the TS. [VI. 3. 12]. 9 v. NEGELEIN 57, line 6, seems to regard

jñātāt (AV. XIX. 156), given as jñātāt (unaccented), as an anomalous imperative; but it is the ablative of the past participle.

<sup>10</sup> Both forms are omitted by AVERY 243; participle.

Pl. 2. gṛṇīta<sup>1</sup>, gṛbhṇīta, jīnītá, punītí and punīta<sup>2</sup>, pṛṇītá, mathnīta (AV.), mṛṇīta (AV.), stṛṇīta (AV.). — With -tana: punītána, pṛṇītana, śrīnītana. — 3. aśnantu (AV.), grnantu (AV. TS.), grhnantu (AV.). jānantu (AV.), punántu, mathnantu (AV.), badhnantu (AV.), srnantu, srīnantu (AV.), sinantu (AV.).

Middle. Sing. 2. grbhnīsva (Kh. IV. 5<sup>26</sup>), prnīsva (Kh. II. 8<sup>1</sup>), vrnīsvá. —

3. strnītām, hrnītām.

Pl. 2. jānīdhvam (AV.), vṛnīdhvám. — 3. jānatām³, vṛnatām (AV.).

### Present Participle.

479. Active. aśnánt-, f. -atí- (AV.), iṣṇánt-, uṣṇánt-, gṛṇánt-, gṛṇántjīnánt-, f. -atí-, jinánt- (AV.), punánt-, f. -atí-, prnánt-4, prīnánt-, mathnánt-, minánt-, f. -atí-, musnant-, mrnánt-, rinánt-, srīnánt-, skabhnánt-, strnánt-, f. -atí- (AV.).

Middle. ápnāna-, iṣṇāná-, gṛṇāná-, gṛḥṇāná- (AV.), jānāná-, drūṇāná-, punāná-, prīṇāná-, mināná-, riṇāná-, vṛṇāná-, śṛṇāná-, śrathnāná- (AV.), śrīnāná-, strnāná-, hrnāná-,

### Imperfect Indicative.

480. Active. Sing. I. ajānām, āśnām. — 2. ákṣinās, agṛbhṇās, apṛṇās, áminās, amusnās, aramnās, arinās, astabhnās; ubhnás, rinās, śrathnās. — 3. agrbhnāt, agrhnāt (AV.), ajānāt (AV.), áprnāt, aprīnāt, ábadhnāt, ámathnāt, amināt, amusņāt, áramņāt, áriņāt, asrņāt, ástabhnāt, ástrņāt; āsnāt (AV.), aubhnāt; jānāt, badhnāt (AV.).

Du. 2. ámusnītam, arinītam, avrnītam. — Pl. 2. árinīta. — 3. akrīņan (AV.), agrbhnan, agrhnan (AV.TS.), ajānan5, apunan, ábadhnan, aśrathnan,

ástrnan; ásnan<sup>6</sup> (AV.); ásnan (x. 176<sup>1</sup>), rinán (x. 138<sup>1</sup>).

Middle. Sing. I. ávrni. — 3. ábadhnīta (TS.I.I.102), ávrnīta, áśrīnīta. — Pl. I. avrnīmahi. — 3. agrbhnata<sup>7</sup>, ájānata (TS. II. I. II<sup>3</sup>); grbhnata.

# II. The Perfect System.

BENFEY, Vollständige Grammatik p. 372-381. - Delbrück, Verbum 112-134. -AVERY, Verb-Inflection 249-253. - WHITNEY, Sanskrit Grammar p. 279-296; Roots 219-221. - v. NEGELEIN, Zur Sprachgeschichte 70-78.

481. Like the present system, the perfect has, besides an indicative, the subjunctive, optative and imperative moods, as well as participles and an augmented tense, the pluperfect. It is of very frequent occurrence, being taken by nearly 300 verbs in the Samhitās. It is formed in essentially the same way from all roots, its characteristic feature being reduplication.

# 1. The Reduplicative Syllable 8.

482. The reduplicative vowel is as a rule short. It is, however, long in more than thirty verbs. These are kan-'be pleased': cā-kan; klp-'be adapted' :  $c\bar{a}$ -k/p-; gr- 'wake' :  $j\bar{a}$ -gr-; grdh- 'be greedy' :  $j\bar{a}$ -grdh-; trp- 'be pleased' :  $t\bar{a}$ -trp-; trs- 'be thirsty':  $t\bar{a}$ -trs-; dhr- 'hold':  $d\bar{a}$ -dhr-; nam- 'bend':  $n\bar{a}$ -nam-;

<sup>2</sup> With strong instead of weak base.

I Also the transfer form according to the (the participle nom, sing, m, jānán is common).

6 In prasnan (AV. XI. 332) the Pada text reads pra-āsnan.

7 Also the transfer forms aminanta and grnanta (VIII. 37).

8 On the reduplicative syllable see v. NEGE-

form janan (RV. AV.), which I cannot trace LEIN 70; cp. BRUGMANN, Grundriss 2, 846.

á- class, grnáta (AV. v. 279).

<sup>3</sup> In Khila II. 106 wrongly jānātām. 4 With fem. prnánti-, a transfer to the

<sup>5</sup> v. Negelein 57 also gives the unaugmented

mah- 'be liberal':  $m\bar{\alpha}$ -mah-; mrj- 'wipe':  $m\bar{\alpha}$ -mrj-; mrs- 'touch':  $m\bar{\alpha}$ -mrs-: radh- 'be subject': rā-radh-; ran- 'rejoice': rā-raṇ-; rabh- 'grasp': rā-rabh-;  $va\tilde{n}c$ - 'be crooked':  $v\bar{a}$ -vak-; van- 'win':  $v\bar{a}$ -van-; vas- 'desire':  $v\bar{a}$ -vas-; vas-'clothe':  $v\bar{a}$ -vas-;  $v\bar{a}s$ - 'roar':  $v\bar{a}$ -vas-; vrj- 'twist':  $v\bar{a}$ -vrj-; vrt- 'turn':  $v\bar{a}$ -vrt-; vrdh- 'grow' : vā-vrdh-; vṛṣ- 'rain' : vā-vṛṣ-; śad- 'prevail' : śā-śad-; sah- 'prevail' :  $s\bar{a}$ - $sa\bar{h}$ -; skambh- 'prop':  $c\bar{a}$ -skambh-;  $d\bar{\imath}$ - 'shine':  $d\bar{\imath}$ - $d\bar{\imath}$ -;  $dh\bar{\imath}$ - 'think':  $d\bar{\imath}$ - $dh\bar{\imath}$ -;  $\phi\bar{\imath}$ - 'swell':  $\phi\bar{\imath}$ - $\phi\bar{\imath}$ -;  $h\bar{\imath}d$ - 'be hostile':  $j\bar{\imath}$ - $h\bar{\imath}d$ - (AV<sup>I</sup>.);  $j\bar{\imath}$ - 'be swift':  $j\bar{\imath}$ - $j\hat{\imath}$ -; tu-'be strong':  $t\bar{u}$ -tu-;  $s'\bar{u}$ - 'swell':  $s'\bar{u}$ -s'u-s'

a. The reduplication of r = ar and l = al is always  $\tilde{a}^2$ ; e.g. kr

'make': cakr-; grdh- 'be greedy':  $j\bar{a}$ -grdh-; klp- 'be adapted':  $c\bar{a}$ -klp-.

b. The reduplication of  $\bar{a}$ ,  $\bar{i}$ ,  $\bar{u}$  is made with  $\bar{a}$ ,  $\bar{i}$ ,  $\bar{u}$  respectively; e. g. khād- 'chew' : ca-khād-; bhī- 'fear' : bibhī-; budh- 'know' : bu-budh-.

There are, however, certain exceptions to this rule.

- 1. Roots containing γα or να and liable to Samprasarana in other forms (such as the past passive participle), reduplicate with i and u respectively 3. Those with ya are: tyaj- 'forsake': ti-tyaj-; 'sacrifice': i-yaj-; vyac- 'extend': vi-vyac-; syand- 'move on': si-syand- (AV.). Similarly cyu- 'stir': ci-cyu-4 (beside cu-cyu-), and dyut- 'shine': didyut-4. Those with va- are: vac- 'speak': u-vac-; vad- 'speak': u-vad-; vap- 'strew': u-vap-; vah- 'carry': u-vah-; svap- 'sleep': su-svap-. The three roots yam- 'reach', van- 'win', vas-'wear', however, have the full reduplication: ya-yam-, va-van-, va-vas-; and vac- 'speak' has it optionally: va-vac- beside u-vac-5. — a. The roots bhū- 'be', sū- 'generate', and  $\delta \bar{s}$ - lie', reduplicate with a: ba- $bh\bar{u}$ -; sa- $s\bar{u}$ - (beside su- $s\bar{u}$ -, AV.); sa- $s\bar{s}$ - (in the participle śa-śay-āná-)6.
- c. In roots beginning with vowels, the reduplication coalesces with the initial of the root to a long vowel; e. g. an- 'breathe': an-; av- 'favour': av-; as'- 'eat' :  $\bar{a}s'$ -; as- 'be' :  $\bar{a}s$ -; ah- 'say' :  $\bar{a}h$ -; r- 'go' :  $\bar{a}r$ - (= a-ar-);  $\bar{a}p$ - 'obtain' :  $\bar{a}p$ -:  $\bar{\imath}d$ - 'praise':  $\bar{\imath}d$ -;  $\bar{\imath}r$ - 'set in motion':  $\bar{\imath}r$ -;  $\bar{\imath}u$ h- 'consider':  $\bar{\imath}u$ h-. But if the root begins with i or u, the reduplicative syllable is separated, in the sing. act., from the strong radical syllable by its own semivowel: i- 'go': 3. pl. īy-úr, but 2. sing. i-y-έ-tha; uc- 'be pleased': 2. sing. mid. ūc-i-ṣέ, but 3. sing. act.  $u-v-\delta c-\alpha^7$ .
- $\alpha$ . Five roots beginning with prosodically long  $\alpha$ , reduplicate not with  $\alpha$ , but with the syllable an-. Only two of these, both containing a nasal, viz. amś- 'attain' and añj-'anoint', make several forms; the former, 3. sing. an-ams-a and an-as-a, pl. 1. an-as-ma, 2. ān-aś-á, 3. ān-aś-úr; mid. sing. I. 3. ān-aś-é; subj. pl. I. ăn-áś-ā-mahai; opt. sing. I. ān-aśyām8; the latter, ān-añja (VS. VIII. 29; TS. III. 3. 102); mid. sing. 1. ān-aj-i, pl. 3. ān-aj-re; subj. sing. I. ăn aj-ā; opt. 3. sing. ăn-aj-yāt. The root rdh- (reduced from ardh-) 'thrive', which has a nasalized present stem9, makes the forms an-rdh-ur (AV.) and an-rdh-e. Through the influence of these nasalized verbs, their method of reduplication spread to two others which show no trace of a nasal anywhere. Thus from arc- 'praise' occur the forms an-rc-ur and an-rc-e; and from arh- 'deserve', an-rh-ur (TSI) beside arh-ire (RV1.). There are besides two isolated forms of doubtful meaning, probably formed from

2 In most of the forms from a- and r-

roots, the Pada text has a.

The quantitative form of the stem is governed by the law that it may not contain y: ciu- and diut-. (except in the I. sing. act.) two prosodically short vowels; the only exceptions in the from the full to the Samprasāraņa redupliweak stem being the two irregular forms tatane, I. sing. mid., and jajanur, 3. pl. act. Thus sah- reduplicates sāsah- and once sasāh-(weak). Cp. BENFEY's articles 'Die Quantitätsverschiebungen in den Samhita- und Pada-Texten', GGA. 19 ff.

<sup>3</sup> These verbs originally had the full reduplication ya- and va- as is shown by the ing to the infixing nasal class. evidence of the Avesta, which has this only; cp. Bartholomae, IF. 3, 38 (§ 59).

<sup>4</sup> Due to the vocalic pronunciation of the

<sup>5</sup> This root thus shows the transition

<sup>6</sup> Cp. Brugmann, Grundriss 2, 846.

<sup>7</sup> These are the only two examples to be met with in the Samhitas of this form of reduplication.

<sup>8</sup> Beside āśatur, āśāthe, etc., from aś-, the unnasalized form of the same root. Cp. Brugmann, Grundriss 2, p. 12114.

<sup>9</sup> Thus rnádhat, rndhyām, rndhánt-, accord-

nasalized roots:  $\bar{a}n$ -rj-ur (AVI.), from rj- 'attain' (with present stem  $r\tilde{n}j$ -)I, and an- $a\tilde{a}h$ - $a^2$ , 2. pl. act., perhaps from amh- 'compress'  $\hat{a}$ .

This form of reduplication evidently arose from a radical nasal having originally been repeated along with the initial vowel, which is lengthened as in many other stems  $(c\bar{\imath}-kan)$ , etc.), while the root itself is shortened by dropping the nasal. In the modal forms ánaj-ā, ănaj-yāt, án-áś-āmahai the reduplicative vowel seems to have been shortened because  $\bar{a}n$ - came to be regarded as containing an augment (like  $\bar{a}nat$ , a orist of nas'attain')<sup>5</sup>.

- d. A few irregularities in regard to consonants also appear in the formation of the reduplicative stem. r. The root bhr- 'bear' reduplicates with j (as if from  $\sqrt{hr}$ -), making the stem ja-bhr-, forms from which occur nearly thirty times in the RV., beside only two forms from the regular stem ba-bhr-. — 2. In forming their stem, the five roots ci- 'gather', ci- 'observe', cit- 'perceive', ji- 'conquer', han- 'smite', revert to the original guttural (as in other reduplicated forms) in the radical syllable: ci-ki-, ci-kit-, ji-gi-, ja-ghan-.
- e. The root vid- 'know' loses its reduplication along with the perfect sense6. Thus véd-a 'I know'; vid-váms- 'knowing'. Some half dozen other roots show isolated finite forms without reduplication; and four or five more have unreduplicated participial forms. Thus taks- 'fashion' makes taks-athur and taks-ur; yam-'guide': yam-átur; skambh-'prop': skambh-áthur, skambh-ur'; nind- 'blame': nind-ima7; arh- 'be worthy': arh-ire; cit- 'perceive': cet-atur (AV. VS. SV.) 8. Three unreduplicated participles are common: dāś-váṃsand dāś-i-vāṃs- (SV.) 'worshipping', beside the rare dadāś-vāṃs-; mīḍh-vāṃs-'bountiful'; sāh-vāms- 'conquering', beside sāsah-vāms-. There also occurs once the unreduplicated jāni-vāṃs- (in the form vi-jānúṣ-aḥ) beside jajñivāṃs-'knowing' (from Viñā-); and the isolated vocative khid-vas may be the equivalent of \*cikhid-vas, from khid- 'oppress'9.

#### 2. The Root.

483. Like the present and imperfect, the perfect is strong in the sing. act. Here the root, as a rule, is strengthened, while it remains unchanged in the weak forms. But if it contains a medial  $\alpha$  or a final  $\bar{\alpha}$ , it remains unchanged in the strong forms (except that a is lengthened in the 3. sing.), while it is reduced in the weak.

In the strong stem, the radical vowel takes Guna, but in the 3. sing. a final vowel takes Vrddhi instead of Guna 10. Thus vis- 'enter' makes vives-; druh- 'be hostile', dudroh-; krt- 'cut', cakart-; but bhī- 'fear', 1. 2. bibhé-, 3. bibhái-; śru-'hear', 1. 2. śuśró-, 3. śuśráu-; kr-'make', 1. 2. cakár-, 3. cakár-<sup>11</sup>. In the weak stem, on the other hand, the root remains unchanged; thus vivis-, dudruh-, cakṛt-, bibhī-, susru-, cakṛ-.

a. Some irregularities occur in the treatment of the radical vowel. I. The verb

<sup>2</sup> Probably for \*ānaha; cp. the weak stem sasāh- beside sāsah-.

3 Cp. Delbrück, Verbum 145, and Whitney, Roots, under anh 'be narrow or distressing'.

4 Except in the form an-ámsa (cp. ήνεγκ- $\tau$ αι) beside  $\bar{a}n$ - $\bar{a}$ s'a (= -ήνοκ- $\epsilon$ ).

5 Cp. the Greek aor. inf. ἐν-εγκ-εῖν and the perfect έν-ήνεγκ-ται.

<sup>6</sup> Cp. Bezzenberger, GGA. 1879, p. 818; J. SCHMIDT, KZ. 25, 3; BRUGMANN, Grundriss 2,848.

\* According to both the infixing nasal root beside caskabh-āná- (AV.), and ninid-úr.

8 With strong radical syllable.

9 DELBRÜCK, Verbum 148, adds dabhur, but this is rather agrist (beside perf. debhur). 10 On the origin of this distinction between the I. sing. and the 3. sing. cp. J. SCHMIDT, KZ. 25, 8ff. and STREITBERG, IF. 3, 383-386.

This distinction is invariable in the RV., and the rule seems to be the same in the AV. WHITNEY 793 d mentions cakāra as an exception, but this form is 3. sing. in all the passages given in his AV. Index; and jagrāha (AV.III. 183) is evidently a corruption; see WHITNEY's note and cp. p. 356, note 9.

class, 3. pl. rnjate, and the á-class, 3. sing. rnjáti.

<sup>7</sup> With the strong (nasalized) form of the Indo-arische Philologie. I. 4.

mpj- 'wipe' takes Vṛddhi instead of Guṇa throughout the strong stem:  $mam\bar{a}rj$ - \(\text{\text{-}}\) 2. Two instances of the strong stem being used in weak forms occur in the RV.: pl. 1. Juj o c im a and 3.  $vive iur^2$  beside the regular viv iur. — 3. The radical vowel of  $bh\bar{u}$ - remains unchanged in the strong as well as the weak forms, interposing v before vowels; thus sing. 2.  $babh\bar{u}$ -tha, pl. 3.  $babh\bar{u}$ -v-ur. — 4. The weak stem of  $t\bar{r}$ - 'cross' appears in the RV. as tur- and tutur-; thus sing. 3.  $tat\bar{u}$ r-a, but pl. 3. titur-ur, part. titur-v ams-, opt. sing. 3. tutur-v at.

a. Roots containing medial  $\alpha$  leave the radical syllable unchanged in sing. 1. 2., lengthening the vowel in sing. 3.; they reduce it in the weak stem

by contraction, syncopation, or loss of nasal.

2. More than a dozen roots containing a between single consonants and reduplicating their initial without change, contract the reduplication and root to a single syllable with medial e. The type followed by these verbs was doubtless furnished by sad-'sit', which forms the weak stem sed- (= \*sazd-), beside the strong sa-sád-, and supported by yam-, with its weak stem yem-(= ya-im) beside the strong yayam-7. The other stems showing this contraction are formed from tap- 'heat', dabh- 'harm', nam- 'bend', pac- 'cook', pat- 'fall', yat- 'stretch', yam- 'guide', rabh- 'seize', labh- 'take', s'ak- 'be able', s'ap- 'curse', sap- 'serve'. The roots tan- 'stretch' and sac- 'follow' also belong to this class in the AV., but not in the RV. The root bhaj- 'divide' though not reduplicating with an identical consonant in its strong stem ba-bhaj-, follows the analogy of this group in forming the weak stem bhej-.

3. Four roots of this form, however, simply syncopate the radical a without contracting. These are jan-'beget': jajñ-, strong jaján-; pan-'admire': papn-, strong papan-; man-'think': mamn-8; van-'win': vavn-, strong vāvan-. Three others have this syncopated as well as the contracted form: tan-'stretch': tatn- and ten- (AV.); pat- 'fall': papt- and pet-; sac- 'follow': saśc- and sec- (AV.). Syncopation of medial a also takes place in four roots with initial guttural: khan- 'dig': cakhn- (AV.), strong cakhán-; gam- 'go': jagm-, strong jagám-; ghas- 'eat': jakṣ-, strong jaghás-; han- 'smite': jaghn-, strong jaghán-

4. In a few roots with medial a and a penultimate nasal, the latter is lost in the weak stem?. Thus krand-'cry out': cakrad-; tams-'shake': tatas-; skambh-'prop': caskabh- (AV.), strong cāskámbh-; stambh-'prop':

<sup>2</sup> Cp. Brugmann, Grundriss 2, p. 1223<sup>1</sup>.

3 Cp. v. Negelein 741.

The same irregularity appears in the present stem.

<sup>4</sup> But they had the full reduplication in the IIr. period; cp. BRUGMANN, Grundriss 2, p. 12203.

<sup>5</sup> In the one form yejé (beside ijé), yajfollows the analogy of yam-, preserving a
trace of the old reduplication ya-.

<sup>&</sup>lt;sup>6</sup> The analogy of *yam*- is followed by yaj- in the one form  $yej\ell$  (beside  $ij\ell$ ); cp. note <sup>5</sup>.

<sup>7</sup> See BARTHOLOMAE, Die ai. & Formen im schwachen Perfect, KZ. 27, 337—366; BRUGMANN, Grundriss 2, p. 1222; cp. v. NEGELEIN 713.

<sup>8</sup> The strong stem does not occur.

<sup>9</sup> Cp. Brugmann, Grundriss 2, p. 12174.

tastabh-, strong tastámbh-. Similarly, from dambh-, the nasalized form of dabh-¹ 'harm', is formed dadabh-, strong dadámbh- (AV.); and from rambh-, the nasalized form of rabh-² 'seize', rārabh-. From damś- 'bite', only the participle dadaśvāms- occurs. The root bandh- 'bind', both loses its nasal and contracts, forming the weak stem bedh- (AV.) beside the strong babándh- (AV.).

b. Roots with final  $\bar{a}$  retain that vowel in the strong stem, but in the weak reduce it to  $i^3$  before consonants and drop it before vowels. Thus  $dh\bar{a}$ 'put' employs  $dadh\dot{a}$ - in the strong forms, dadhi- and dadh- in the weak.

#### 3. Endings.

484. The endings in the indicative active are all peculiar (excepting the secondary -va + and -ma), while in the middle they are identical (excepting the 3. sing. -e and 3. pl. -re) with the primary middle endings of the present. They are the following:

	Active		Middle		
sing.	du.	pl.	sing.	du.	pl.
ıa	[-vá]	-mú	1é'	[-váhe]	-máhe
2tha	-áthur <sup>6</sup>	-cź	2. <i>-sé</i>	-āthe	-dhvé
3a	-átur <sup>6</sup>	-iir 7	3é	-áte	-ré

Roots ending in  $-\bar{a}$  take the anomalous ending  $-au^8$  in the 1. and 3. sing. act.; e. g.  $dh\bar{a}$ - 'put':  $da-dh\acute{a}u$ . The only exception is the root  $pr\bar{a}$ - 'fill', which once forms the 3. sing.  $pa-pr\acute{a}$  (I. 691) beside the usual  $pa-pr\acute{a}u$ .

- a. Consonant endings. These are, as a rule, added directly to the stem. No forms with -vá or -váhe occur in the Samhitās; -máhe is always added direct, as is also -dhvé in the only form in which it occurs, dadhi-dhvé. The remaining consonant endings, -tha, -ma, -se, -re, are nearly always added direct to stems ending in vowels, but frequently with the connecting vowel -i- to stems ending in consonants.
- r. Roots with final  $\tilde{a}$  always add the endings directly to the stem, which reduces the radical vowel to  $i^9$  in the weak forms; e. g.  $dad\acute{a}$ -tha; dadhi- $m\acute{a}$ , dadhi- $s\acute{e}$ , dadhi- $r\acute{e}$   $i^0$ .
- 2. Roots with final  $\tilde{I}$  and  $\tilde{u}$  also always add these endings direct to the stem; e. g. ji- 'conquer': jige-tha;  $n\bar{\imath}$  'lead':  $nin\acute{e}$ -tha; su- 'press':  $sus_{u}$ -má; su- 'move':  $sic_{u}$ - $sic_{e}$ - -

<sup>2</sup> From which is formed the weak stem

4 No perfect form with -va is, however, found in the Samhitas.

5 Both of these, however, occasionally appear in the present ind. mid.

6 The a is here probably not connecting vowel but identical with the a of the 2.pl.; a-tur getting its r from the 3.pl. -ur, and -a-thur being then formed like -thas beside -tas: cp. Brugmann, KG. p. 597.

7 That r (and not s) is here original is

shown by the evidence of the Avesta; cp. Brugmann, KG. 797 (p. 597).

8 This has not been satisfactorily explained;

cp. Brugmann, Grundriss 2, p.  $1223^3$ .

9 This i as the reduced form of  $\bar{a}$  (cp. hi- $t\acute{a}$ - etc., from  $dh\bar{a}$ -), occurring in such very common verbs as  $d\bar{a}$ - 'give' and  $dh\bar{a}$ - 'put', was probably the starting point for the use i as a connecting vowel in other verbs; but cp. Brugmann, Grundriss 2, p.  $1208^{\circ}$ ; cp. also IF. 8, 123—160.

10 The vowel is dropped before ré in dadh-re, which occurs once beside the very common dadh-ré. Similarly the stem of dā-give', is shortened before the ending -rire in dad-rire, which occurs once (with passive sense).

From which is formed the weak stem debh.

<sup>3</sup> See Delbrück, Verbum 147 (p. 120); Brugmann, Grundriss 2, 844 (p. 1206—8); cp. v. Bradke, IF. 8, 123—137; 156—160; Reichelt, BB. 27, 94.

- 3. Roots with final -p add the endings -tha, -ma, and -se direct (excepting two or three forms), but -re always with connecting -i-; thus kr- 'do' : cakár-tha, cakṛ-ma, cakṛ-sé, but cakr-i-ré. Connecting -i- before the other endings appears in ar-i-tha, ar-i-má (r- 'go'); and in jabhr-i-se (bhr- 'bear').
- 4. Roots with final consonant add -tha, -ma; se, -re direct if the last syllable of the stem is prosodically short, but with the connecting vowel -i- if that syllable is long. Thus tatán-tha; jagan-ma, jagrbh-má, yuyuj-ma; dadrk-sé, vivit-se; caklp-ré, tatas-ré, duduh-ré, pasprdh-ré, yuyuj-re, vivid-ré and others; but as-i-tha, uvóc-i-tha, vivéd-i-tha; ūc-i-má, papt-i-má, sed-i-ma; tatn-i-se; īj-i-ré, jagm-i-re, tataks-i-ré², yet-i-ré. The only exception is vét-tha, which as an old form inherited from the IE. period (Greek οίσ-θα) without reduplication, remained unaffected by the influence of reduplicated forms.
- a. Six roots ending in consonants add -rire 3 instead of -re: cikit-rire (beside the more usual cikit-ré), jagrbh-rire (once beside the usual jagrbh-ré), bubhuj-riré (once), vividrire (once beside vivid-ré), sasrj-rire (once), and duduh-rire (once in the SV. for the common duduh-re of the RV.)4.
- b. Vowel endings. Before terminations beginning with vowels final radical vowels are variously treated. I. if preceded by one consonant, becomes y, if preceded by more than one, iy: e. g. from bhī- 'fear', bibhyatur, bibhy-ur; but from śri- 'resort', śiśriy-e. - 2. Final ii ordinarily becomes นบ; e.g. yu- 'join' : yuyuv-é; śru- 'hear' : ร์นร์rนv-e; ร์น- 'swell' : ร์นิร์นะะ. But  $\bar{u}$  becomes v in  $h\bar{u}$ - 'call', e. g. ju-hv-e'; and  $\bar{u}v$  in  $bh\bar{u}$ - 'be' and  $s\bar{u}$ - 'bring forth', even in strong forms; e. g. 3. sing. ba-bhūv-a, sasūv-a. — 3. Final -r becomes r; e. g. from kr- 'make', cakr-á, cakr-é. But - becomes ir in titir-ur from tr- 'cross', and in 3. sing. tistir-e, part. tistir-and-, from str- 'strew' (the only root with a r vowel preceded by two consonants that occurs in the perfect).

#### Perfect Indicative.

485. The forms actually occurring, if made from kr- 'make', would be the following:

Active. Sing. 1. cakára?. 2. cakártha. 3. cakára. — Du. 2. cakráthur. 3. cakrátur. – Pl. 1. cakrmá. 2. cakrá. 3. cakrúr.

Middle. Sing. 1. cakré. 2. cakrsé. 3. cakré. — Du. 2. cakráthe. 3. cakráte. — Pl. 1. cakrmáhe. 2. cakrdhvé. 3. cakriré<sup>8</sup>.

The forms which actually occur are the following:

Active. Sing. I. āsa, uvápa (TS. I. 5. 32), cakara, ciketa (cit- 'observe'), jagama, jagrábha, jagráha (AV.)9, jaghása (AV. VI. 1172)10, jihīļa11, tatápa, dudríha, papana, babhūva, bibháya, mimaya (mī- 'diminish'), rarana, rirdbha, viveśa, véda 12, śiśraya, śuśráva. The TS. (III.5.5') has the Vṛddhi form vavāra (vr- 'cover').

This is in accordance with the rhythmic rule that the stem may not have two prosodically short vowels in successive syllables.

3 The additional r may have come into use under the influence of forms from roots | see Whitney's note on the passage. in r, like dadhr-ire from Vdhr-.

<sup>&</sup>lt;sup>2</sup> The strength of this rhythmic rule is well illustrated by the same root vac- having the two collateral forms vavak-se and ūc-i-se; cp. also the unique lengthening, in a weak the usual sāsah-) and the Guna in yuyop-i-má. note.

<sup>4</sup> The ending -rire is once also added to a root ending in a vowel: dad-rire, from  $Vd\bar{a}$ -.

<sup>5</sup> Instead of the normal av.

<sup>6</sup> This is the only perfect form of  $Vs\bar{u}$ occurring.

<sup>7</sup> The I. and 3. of dhā- 'put' would both be dadhau; of vid- 'find', both viveda. 8 The 3. pl. of vid-'find' would be vividré.

<sup>9</sup> AV. III. 183 reads jagraha, but this must form, of the radical a in sa-sāh-i-se (beside be emended to jagráha; see WHITNEY's

<sup>10</sup> jaghāsa here is a misprint for jaghāsa:

II Also in AV: IV. 325, but written jīhīda in the Samhita text, but ji- in Pada. See WHITNEY's note.

<sup>12</sup> Unreduplicated form.

2. iyatha and iyetha, cakartha, jagantha (gam-'go'), jaghantha, jabhartha, jigetha (ji- 'conquer'), tatántha, dadātha, dadhártha (dhy- 'hold'), dadhátha, ninetha, papātha (pā- 'drink'), paprātha 2, babhūtha, yayantha (yam- 'guide'), vavátha, vāvántha, vavártha (vr- 'cover'), vivyáktha (vyac- 'extend'), véttha 10, sasáttha (sad- 'sit'). — With connecting -i-: ápitha (AV.), áritha (r- 'go'), avitha (av- 'favour'), asitha (as- 'be'), uvicitha (uc- 'be pleased'), cakartitha (krt- 'cut'), tatárditha (tṛd- 'split'), dudohitha, dudrýhitha (AV.), babhávitha, rurójitha, rurodhitha, rurúhitha (AV.), vaváksitha, vivéditha (vid-'find'), vivesitha.

3. āna, ānáṃśa and ānāśa (aṃś- 'attain'); ápa, āra (ṛ- 'go'), āva, áśa (as- 'eat'), āsa (as- 'be' and as- 'throw'), āha (ah- 'say'), iyāya (i- 'go'), uvāca (vac- 'speak'), uvása (vas- 'shine'), uvāha, uvóca (uc- 'be pleased'), cakarta (krt- 'cut'), cakársa (krs- 'be lean', AV.), cakára, cakrāma, cakháda, cakhána (VS. v. 23), cacáksa, cácarta (crt-'bind', AV.), cacára (AV.), cacchanda, caskánda, cāskámbha, cikáya (ci- 'gather'), cikāya (ci- 'observe'), cikíta³ (cit- 'perceive'), jagáma, jagráha, jaghána, jaghása, jajána, jajára (AV.), jabhára+, jigáya (ji- 'conquer'), jujúsa, juháva (hū- 'call'), tatáksa, tatarda, tatarha (AV.), tatána, tatápa, tatāra, tatsāra (tsar- 'approach stealthily'), tastámbha, tātāna (RV1.), tityája, tutáva (tu- 'be strong'), tutúda, dadámbha (dambh- 'harm', AV.), dadársa, dadábha (dabh- 'harm'), dadára (dr- 'split'), dadása (dās-'worship'), dadharsa, dādhāra, dideva (dīv- 'play', AV.), didesa (AV.), didvóta (ÂV.), dīdāya (VS. XII. 34), nanāśa (naś- 'be lost'), nanāha (AV.), nānāma, nināya, papāca (AV.), papāta (AV.), papāda, paprā<sup>6</sup>, pipėsa, pipesa, pīpāya, pupisa, babandha (VS. AV.), babarha (bṛh- 'make strong', AV.), babháñja<sup>7</sup> (bhanj- 'break'), babhája, babháva, bibhāya, bibhéda, mamanda (mand-'exhilarate'), mamárşa, mamátha (math-'shake', AV.), mamáda (mad-'exhilarate'), mamāra (mṛ- 'die'), mamārja (mṛj- 'wipe', AV.), 1. mimāya (mā- 'bellow'), 2. mimáya (mi- 'fix'), 3. mimāya (mī- 'damage'), mīmáya (mī- 'damage', AV.), mimetha (mith-'alternate'), mimyákṣa, mumóda, yayāma, yuyója (AV.), yuyódha, yuyópa, rarákṣa, raráda, rarádha, riréca, ruroca, rurója, ruroha (AV.), vavakṣa, vavanda, vavárta, vavárdha, vavarha, vavāca8 (vac-'speak'), vavāra (vr-'cover'), vavrája, vāvárta, vāvāna, vivāya (vī-'be eager'), vivéda, vivésa, vivésa, vivyāca, véda 10, sasāka (AV.), sasāpa (AV.), sisrāya (śri- 'resort'), susoca, susrāva, sasarja, sasāda, sasāna, sasāra, sasūva, sāsāha, siņedha, siņāya, suņāva (su-'press'). — With the ending -au: tastháu, dadáu, dadháu, papáu (pā-'drink'), papráu, yayáu.

Du. 2. ārathur, āváthur, āsathur, īyathur, īṣáthur, ūpáthur ( V vap-), ūháthur (Vvah-), cakráthur, cakhyathur (khyā-'see'), jagrbháthur, jagmáthur, jigyathur (ji- 'conquer'), jijinváthur9, takṣathur¹o, tastháthur, dadáthur, dadhathur, ninyathur, papáthur (pā-'drink'), paprathur, pipinváthur 11, pipyathur (pī- 'swell'), petathur (√pat-), babhūváthur, mimikṣáthur, yayathur, yemáthur  $(\sqrt{yam})$ , riricáthur, vidáthur vi, vividáthur, vivyáthur (vyā- or vī- 'envelope'), sedáthur ( $\sqrt{sad}$ -), skambháthur<sup>10</sup>.

irregular accent ciketa.

is 3. sing. perfect of hā- 'leave' (cp. Delbrück, Verbum p. 124), like papra. PISCHEL, Vedische Studien 1, 163 f., thinks this word with the following kó should be read jáhāko 'abandoning'. Roth thinks (pw.) jahá is an interjection. a, 7.

<sup>1</sup> The irregularity of this form which occurs once in the RV. and once in the AV. | Vnah : AV. VI. 1331. beside the regular iyétha is hard to explain.

<sup>&</sup>lt;sup>2</sup> In VI. 177 this form stands for the 2. sing. jaha is a verbal form. of prath-'extend'; see NEISSER, BB. 30, 302.
3 Occurs twice in the RV. also with the

<sup>5</sup> Overlooked by WHITNEY, Roots, under

<sup>6</sup> The only occurrence of  $\bar{a}$  for au unless

<sup>7</sup> Omitted by AVERY 250.

<sup>8</sup> RVI. beside the ordinary wadca.

<sup>9</sup> From jinv- 'quicken', a secondary root 4 It is very doubtful whether jahā VIII. 4537 starting from the present stem ji-nu- of ji-'quicken'; see 469, a, 7.

<sup>10</sup> Unreduplicated form.

II From pinv- 'fatten', which started from a present stem of the -nu class; see 469,

Du. 3. āpatur, āvatur, āśatur (aś- 'attain'), āsatur, īyátur, ūhátur ( Vvah-). cakratur, cikyatur (ci- 'observe'), cetatur', jagmatur, jajňátur (jan- 'beget'), jahatur (hā- 'leave'), tatakṣátur, tasthátur, dadatur, paprátur (prā- 'fill'), petátur. babhūvátur, mamátur (mā- 'measure'), mimiksátur (miks- 'mix'), yamátur2, vematur (Vyam-), vavaksátur, vāvrdhatur, sasratur³ (Vsr-, AV.), sisicatur. sedátur (V sad-).

Pl. I. ānasma (ams- 'attain'); cakṛmá, jaganma, jagṛbhmá, tasthi-má ( \(\stha\alpha\), dadhi-má, yuyujma, rarabhmá, rari-má (r\alpha\cdot\'give\'), vavanmá, vidmá\(\dagma\), śuśruma (AV.), suṣuma. — With connecting -i-: ārimá, āsimá (as- 'be'. AV.),  $\bar{u}cim\acute{a}$  (Vvac-),  $\bar{u}dim\acute{a}$  (Vvad-),  $\bar{u}sim\acute{a}$  (vas- 'dwell', AV.),  $cerim\acute{a}$  (Vcar-, AV.), jaghnimá (V han-, AV.), jihimsimá (AV. TS.), dadāsimá, nindimas, nīnima 6 (TS.III. 2.83), paptima, babhūvima (AV.), yuyopimá 7, yemimá, vavandima,  $vidm\acute{a}^8$ ,  $\acute{s}ekim\acute{a}$  ( $\surd$   $\acute{s}ak$ -, AV.),  $sa\acute{s}cima$ , susudima ( $\surd$  sud-), sedima ( $\surd$  sad-).

2. anāha (RV1.), ānašá (amš- 'attain'); ūsá (vas- 'shine'), cakrá, jagmá 10 (AV. TS. VS.), dadá, babhūvá, yayá, vidá<sup>8</sup>, śaśāsá, seka (V śak-), sedá (V sad-).

3. ānasúr (amś- 'attain'), ānrcúr (Varc-), ānrdhúr (AV.), ānrhúr (TS. III. 2.83); āpúr, ārúr, āśur (aś- 'attain'), āsúr (as- 'be'), āhúr, īyúr, īsur (is-'send'),  $\bar{u}c\dot{u}r$ ,  $\bar{u}dur$  (und- 'wet', AV.),  $\bar{u}vur$  ( $v\bar{a}$ - 'weave'),  $\bar{u}s\dot{u}r$  (vas- 'shine'), ūhúr (Vvah-), cakramúr, cakrúr, cakhnúr (khan-, AV.), cākļpur (AV.), cikitur, cikyúr (ci- 'perceive'), cerúr (V car-, AV.), jagrbhúr, jagrhúr (AV.), jagmúr, jaghnúr (V han-, AV.), jajanúr i and jajňúr (jan-'beget'), jabhrur (V bhr-), jahur (hā- 'leave'), jaharur<sup>12</sup> (Vhr-, AV.), jāgrdhur, jigyur (ji- 'conquer'), jugupur $^{x_3}$ , jujusur, jūjuvur ( $\sqrt{j}$ ū-), taksur $^{x_4}$ , tataksur, tastabhur, tasthur, tātrpur (AV.),  $t\bar{a}trsir$ ,  $titirur(\sqrt{t\bar{r}})$ , tustuvir,  $dad\bar{a}sir$ , dadir, dadhir,  $d\bar{a}dhrsur(AV.)$ , didyutur (TS. II. 2. I 26), duduhur, dudruwur (AV.), debhur (dabh- 'harm'), nanakşlır, ninidlir, papur (pā- 'drink'), paptlır (pat- 'fall'), paprur (prā- 'fill'), pipisur, pipyur (Vpī-), babhūvur, bibhidur, bibhyur (bhī- 'fear'), bedhur (bandh-, AV.), mamur (mā-'measure'), mamrur (mṛ-'die'), māmrjur, māmṛślir, mimikṣlir (V myaks-), mimyúr (mi- 'fix'), yamur 14, yayur, yuyudhur, yemúr, rāradhur  $(\sqrt{radh})$ , riripur, ruruc'ir, ruruh'ir, vavakşiir, vavrjur, vavrur (vr. 'cover'), vāvasiir (vas- 'desire'), vāvṛtir, vāvṛdhur, vidur's, vividur, vivisiir and (once) vivešur 15. vivisur, šašāsur, šašramur, šāšadur, šūšuvur, šekur (Však-), sašcur, sasrůr, sisyadůr (V syand-, AV.), sisicur, susupur (V svap-), susuvur (VS. xx. 63), susruvur (AV.), sedür (Vsad-), sepur, skambhur 14.

Middle. Sing. I. ījé, īdhe (idh- 'kindle'), īṣé (īṣ- 'move'), ūhé (ūh- 'consider'),  $cak e'(k\bar{a}-kan-b')$  be pleased'), cakre, jigye (ji-b') conquer'),  $tatane^{10}$ , tasthe, titvise, dade, mame (mā- 'measure'), māmahe, raré (V rā-), sepé (V sap-), sasce.

<sup>2</sup> Unreduplicated form with present meaning

(vi. 671).

3 sisratur (RV1.) is an anomalous 3. du pres. ind. of sy-, according to the reduplicating class with perfect ending instead of \*sisrtás.

4 The form vivisma which AVERY gives with a query is probably an error for vivismas I. pl. pres. (VI. 23<sup>5.6</sup>).

5 Cp. IF. 3, 9f.; ZDMG. 48, 519.

8 Unreduplicated form.

in the RV., jajñúr twice. 12 WHITNEY on AV. 111. 96 would emend this irregular form, the reading of all the

Mss., to jahrur.

<sup>&</sup>lt;sup>1</sup> AV. III. 212; SV. I. 2. 2. 1<sup>10</sup>, explained by Benfey, SV. Glossary, as 3. du. perf. without a root amh- for \*anaha. reduplication. WHITNEY, note on AV.III. 212, thinks it is a corruption for cetatu, but quotes WEBER as taking it for 3. du. perf. from cat-'frighten into submission'.

<sup>6</sup> The metre requires ninīma (see BR. under nī- 'lead').

<sup>7</sup> With strong radical syllable.

<sup>9</sup> This form (VI. 485) may be 2. pl. from

<sup>10</sup> Cp. WHITNEY's note on AV. VI. 974. II This form without syncope occurs once

<sup>13</sup> This is the only finite form of this secondary root, and it occurs in a late hymn (VII. 1039); the past participle gupitá- also occurs twice in the tenth book. This Vgupwas doubtless evolved from the denominative gopā-yá- 'act as a cowherd'.

<sup>14</sup> Unreduplicated form occuring once.

<sup>15</sup> With irregular strong vowel.

<sup>16</sup> With unsyncopated vowel occurring once; 3. sing. tatne.

2. cakrsé, cicyusé, tasthi-se (AV.), dadrksé (drś- 'see'), dadhi-sé, paprse yuyuksé (V yuj-, AV.), rari-se, ririksé (V ric-), vavaksé (V vac-), vavrsé (vr-'choose'), vivitse (vid-'find'). — With connecting -i-: ūcisė (Vuc- and Vvac-),  $\overline{u}pi$ șe ( $\sqrt{vap}$ -),  $\overline{u}hi$ șe ( $\sqrt{vah}$ -),  $jaj\overline{n}i$ șé ( $\sqrt{jan}$ -), jabhrișe, tatnișe, bedhișe (AV.),

śepisé (Vśap-, AV.), sasāhise 1.

AV<sup>1</sup>.), papre<sup>1</sup> (Vprā-, AV.), paspašė (spaš- 'see'), pipišė, pipise, pipīle, pipye (pī-'swell'), pece (V pac-), babādhé, babhre (V bhr-), bedhé (V bandh-, AV.), bhejé (bhaj- 'divide'), mamé (mā- 'measure'), māmahe, māmrjé, mimiksé8, yuyujé, yuyuvé (yu- 'join'), yejé (Vyaj-), yeme (Vyam-), rarapsé, rārabhe (Vrambh-), riricé, rurucé, rebhé (Vrabh-, AV.), vavakṣé (Vvakṣ-), vavande, vavné (Vvan-), vavré (vr- 'cover'), vavase (vas- 'desire'), vavase (VIII. 48, vas-'clothe') 10, vāvrje, vāvrti, vāvrdhi, vidi (vid- 'know'), vividi (vid- 'find'), vivyi (vyā- 'envelope'), vivye (vī- 'be eager'), sasame (VS.xxxIII.87), sasrathe, sasre (śṛ- 'crush'), śiśriyé (śri- 'resort'), śuśruve, śūśuve (śū- 'swell'), śepé (V śap-, AV.), sasāhé<sup>11</sup> and sasāhe<sup>12</sup>, sasrjé, sasré (sr- 'flow'), sasvajé, sisice, sisyade (V syand-, AV.), susuvé (sū- 'bring forth').

**Du. 2.**  $\bar{a}$ 's  $\bar{a}$ the ( $\sqrt{a}$ 's-'attain'),  $\bar{i}$ j $\bar{a}$ the (AV.),  $\bar{u}$ hy  $\bar{a}$ the (IV. 566), cakram $\bar{a}$ the, cakráthe, cikéthe 14 (ci- 'note'), dadáthe, dadháthe, mamnáthe (V man-), rarathe

 $(r\bar{a}$ - 'give'), riricathe, sasrathe ( $\sqrt{sr}$ -).

3. åśāte<sup>15</sup>, cakrāte, dadhāte, pasprdhāte, bhejāte (bhaj- 'divide'), mamāte (mā- 'measure'), mamnāte (man- 'think'), yuyudhāte, yemāte (Vyam-), rebhāte (Vrabh-, AV.), vāvrdhāte16, sasvajāte.

Pl. 1. bubhujmáhe, mumucmáhe, vavrmáhe (vr. 'choose'), śāśadmahe (śad-'prevail'), sasrjmáhe. — 2. dadhidhvé.

3. ānajre (Vañj-); cākļpré, cikitré (Vcit-), jagrbhré 7, jahi-re (Vhā-, AV.), juhuré, juhūré, tatasré (V taṃs-), tasthi-re, dádrśre, dadhi-ré, dadhre, duduhré, nunudré, pasprdhré, pipiśre, mami-ré (mā-'measure'), mumucré, yuyujré, riricré,

2 With passive sense.

3 Omitted by AVERY 250.

4 From dhanv- a transfer root from dhan-'run'. Cp. WHITNEY, Roots 81.

5 From naks- 'attain', a secondary form of naś- 'attain'; cp. Whitney, Roots 87.

6 IV. 437. This form (which is perhaps rather to be taken as I. sing.) may be formed from praks, a secondary form of prach-'ask'; cp. Benfey, O. u. O. 3, 256; Del-BRÜCK p. 1264; WHITNEY, Roots, and BR. s. v.

7 papré, given by AVERY 250 with a query, does not seem to occur in the RV.

8 From miks-, a desiderative formation from mis-; cp. WHITNEY, Roots.

9 yeje occurs three times in the RV. (only with a- and pra-), ije occurs twice as 3. sing., once as I. sing.

10 WHITNEY, Roots, under vas- 'clothe'. This form is placed by BR. and GRASSMANN under a root vas- 'aim'.

- 11 X. 10410 (AVERY sāsahe), Pada text sasahé. 12 VIII. 9615, (AVERY säsähe), Pada text sasahe cp. RPr. 580, 582, 587, 589.
- 13 This seems to be an anomalous form for uhathe (uh- 'consider'; cp. Grassmann).
  - 14 Irregular form (RV1.) for \*ciky-āthe.
- 15 Thus irregularly accented v. 662. This form, āśāte, also occurs five times unaccented.
- 16 The AV. has also the transfer form vāvrdhéte.

17 See notes on AV. XVIII. 346 in WHITNEY'S Translation.

with strong radical vowel: cp. p. 356, note 2.

rurudhre, vāvakre (vañc- 'move crookedly')¹, vāvaśre² (vāś- 'bellow'), vivijre, vidre³, vividre¹, vivipre, viviśre, śāśadre! — With connecting -i-: arhire³, áśire (Kh. I. 11¹), ījire (Vyaj-), īdhire (Vidh-), īrire⁴¹, īṣire⁴⁵ (iṣ- 'send', AV.), ūcire (Vvac-, AV.), ūhire (Vvah-), cakrire, cacakṣire (VS.XL.10: Up.), jagmire, jajñire (Vjan-), jabhrire (Vbhr-), jihīļire (Vhīd-), tatakṣire, tatnire (Vtan-), tastrire⁶ (Vstṛ-, AV.), tenire (Vtan-, VS.TS. AV.), dadhanvire¹, dadhire (Kh.I. 4³), dadhrire (Vdhṛ-), papire (pā- 'drink'), bedhire (Vbandh-, AV.), bhejire (Vbhaj-), mimikṣire (Vmikṣ-'mix', and Vmyakṣ-), yetire (Vyat-), yemire (Vyam-), rurucire (Kh.I. 12¹), rebhire (Vrabh-), lebhire (Vlabh-), vavakṣire, vavandire, vavāśire, saścire (Vsac-), secire (Vsac-, AV.), sedire (Vsad-). — With ending -rire: cikitrire (Vci-), jagrbhrire, dadrire (Vdā-), bubhujrire, vividrire, sasṛjrire.

#### Moods of the Perfect.

486. Modal forms of the perfect are of rare occurrence in the Samhitās except the RV. They are made from the perfect stem in the same way as from the present stem. It is, however, not always possible to distinguish modal forms of the perfect from those of other reduplicated stems (present reduplicating class, reduplicated aorist, and intensive) either in form (because the reduplication is in many instances the same) or in meaning (because the perfect is often used in a present sense).

## Perfect Subjunctive.

487. The normal method of forming the stem is to add -a 8 to the strong perfect stem, accented on the radical syllable. In the active the secondary endings are more usual; e. g. tuṣṭáv-a-t. If the primary endings are added in the active, the reduplicative syllable is in several forms 9 accented, as jūjoṣ-a-si 10. In about a dozen forms, nearly all with secondary endings, the weak stem 11 is employed, but whether the reduplicative syllable was then accented is uncertain, because the examples that occur are unaccented. Middle forms, numbering not many more than a dozen, occur only in the 3. sing., with the ending -te, and in the 3. pl. with the ending -anta.

Active. Sing. 1. anajā 12. — 2. jújoṣasi, dīdáyasi, paprcāsi 13; cakradas, cākánas, cikitas (V cit-), jújoṣas, tatanas, dadāśas, dīdáyas, papráthas, piprayas, bubodhas, mamádas, māmáhas, mumucas 14, rāránas, sāsáhas, súṣūdas.

3. ciketati (V cit-), jiljoṣati, dádāsati, dadhárṣati, didesati 15, dīdáyati, bilbodhati, mumocati, vavártati; cākánat, cāklpat (AV.), ciketat (V cit-), jaghánat, jabhárat, jugurat (gur- = gr- 'greet'), jiljoṣat, jūjuvat 14, tatánat, tuṣtávat, dádāsat, dadhánat, dadhárṣat, papráthat, paspársat, pipráyat, mamádat (AV.), mamandat, dīdáyat, mumucat 14, mumurat (mur- = mr- 'crush'), mumbcat, rāráṇat, vavártat and vavṛtat 14, vāvanat (TS. II. 4. 51), vividat 14, suśravat, śūśuvat 14, sāsáhat, suṣūdat.

- I With reversion to the original guttural.
- <sup>2</sup> With shortening of the radical vowel.

3 Without reduplication.

- 4 In RV. regularly erire, Pp. ā-īrire (but in I. 64 for eriré the accentuation should be érire = ā īrire). The AV. has once sam-īhiré (XIV. 146).
- 5 isire with irregular accent is probably to be regarded as a present (450, 2).
  - 6 IF. 8, Anzeiger 13.
- 7 From the secondary root dhanv == dhan-'run'.
- <sup>8</sup> Two subjunctive forms with double modal sign -ā- occur: papr cāsi and vāvr dhāti.

- 9 Cp. the accentuation of the reduplicating class.
- 10 Except the forms dīdáyasi, dīdáyati, dadhárşati and vavártati.
- II The two roots muc- and dhrs- make subjunctive forms from both the strong and weak stem.
- 12 RV. v. 541: this form (Pp. anaja) is regarded by Delbrück 126<sup>b</sup> and AVERY 251 as a 2. pl. ind.
  - 13 With double modal sign -ā-.
  - With weak radical syllable.
     Always ā-dideśati in relative clauses.

Du. 2. ciketathas, jujosathas; ninīthas 1 (1. 1811).

Pl. I. cākánāma, tatánāma, śūśávāma. — 2. jújosatha, bubodhatha. —

3. jujuşan², jújoşan, tatánan, papráthan, mamádan.

Middle. Sing. I. śaśvacái 3 (V śvañc-). — 3. jújosate1, tatúpate, dadhṛṣate2, yuyójate, vāvrdhate², śaśámate (śam- 'labour'). — Pl. I. anáśāmahai.

## Perfect Injunctive.

488. There are a few singular active and 3. pl. middle forms which must be classed as injunctives, being identical in form with the corresponding unaugmented persons of the pluperfect. These are: Sing. 2.  $\dot{s}a\dot{s}\bar{a}s$  (=  $\dot{s}a\dot{s}\bar{a}s$ -s). — 3. dūdhot (dhū- 'shake'), siset (si- 'bind'); sasvár (= \*sasvar-t, from svar-'sound'); with connecting -ī-: dadharsīt.

Pl. 3. cákramanta, cākúnanta, tatánanta, dadabhanta, paprathanta,

māmahanta, rurucanta2, vāvrdhánta2, vivyacanta.

# Perfect Optative.

489. This mood is formed by adding the accented optative modal suffix combined with the endings (416a) to the weak perfect stem. The active forms are the commonest, occurring more than twice as often as those of the middle.

a. There are a few irregularities in the formation of this mood. r. The radical vowels of pā- 'drink', sru- 'hear', and kr- 'make', being treated as before the -ya of the passive (444), the stems of these roots appear before the optative suffix as papi-, susrā-, and cakri. - 2. The vowel of the reduplicative syllable an- is shortened (as if it contained the augment) in ănajyāt (Vañ)-). — 3. A connecting -ī- is interposed in jaks i yāt, while the radical i is combined with the ending in sisrīta. — 4. A transfer according to the analogy of the a- conjugation is rivises; possibly also siset 6.

Active. Sing. 1. ānaśyām; jagamyām, paprcyām, riricyām, vavrtyām.

2.  $cakriv\bar{a}s^7$ ,  $jugury\bar{a}s$  ( $gur = gr \cdot 'greet'$ ),  $pupusy\bar{a}s$ ,  $pup\bar{u}ry\bar{a}s$  ( $pur = pr - gr \cdot 'greet'$ ),  $pupusy\bar{a}s$ ,  $pup\bar{u}ry\bar{a}s$ 'fill'), babhūyās, rurucyās, vavrtyās, vivisyās, susrūyās 8.

3. anajyāt; cacchadyāt, jakṣīyāto (ghas-'eat'), jagamyāt, jagāyāt (gā-'go'), jagrbhyāt, juguryāt, tutujyāt, tuturyāt ( $\sqrt{tur} = t\bar{r}$ -), ninīyāt  $^{10}$ , papatyāt (AV.), papīyāt <sup>11</sup> (pū-'drink'), paprcyūt, babhūyāt, mamadyat, riricyāt, vavrtyāt, sasadyāt (AV.), sasrjyāt, sāsahyāt.

Du. 2. jagamyātam, śuśrūyātam.

Pl. 1. tuturyāma, vavrtyāma, śūśuyāma, sāsahyāma.

3. jagamyur, tatanyur, dadhanyur, mamrdyur, vavrjyur, vavrtyur.

Middle. Sing. 1. vavrtīya. — 2. caksamīthās, vāvrdhīthās. — 3. jagrasīta, dudhuvīta, māmrjīta, varrtīta, śiśrītá (śri- 'resort'), śuśucīta.

Pl. I. vavrtīmahi.

There also occurs in the middle one precative form: Sing. 2. sāsah-ī-s-thās.

# Perfect Imperative.

490. The regular perfect imperative is formed like the present imperative of the reduplicating class, the 3. sing. active being strong. Hardly more

strong radical vowel; cp. HIRT, IF. 12, 220. <sup>2</sup> With weak radical syllable.

<sup>3</sup> This form occurs only once (III. 3310) beside the s-aor. namsai, and may therefore be an irregular redupl. aorist, to which it is doubtfully assigned by WHITNEY 863 a. 4 SV. jujósate.

<sup>5</sup> This form, however, might be a transfer present optative from  $s\bar{a}$ - (the collateral form  $|\bar{a}|$  to  $\bar{i}$ .

Abnormal form without modal sign or of the root si-) according to the reduplicating class; or a reduplicated agrist injunctive (GRASSMANN and WHITNEY 868 a).

<sup>6</sup> See note 5 on this form.

<sup>7</sup> Cp. v. Negelein 66.

<sup>8</sup> With lengthened radical vowel.

<sup>9</sup> With interposed -i-. 10 Cp. HIRT, IF. 12, 220.

II With change of the final radical vowel

than twenty regular forms occur, nearly all of them being active. There are also some irregular imperatives, being transfer forms which follow the analogy of the  $\alpha$ - conjugation, made from either the strong or the weak perfect stem.

Active. Sing. 2. cākandhi, cikiddhi (V cit-), dididdhi (V dis-), piprīhi,

mumugdhi (Vmuc-), sasadhi (Vsas- 'order'), susugdhi (Vsuc-).

3. cākantu, didesṭu¹, babhūtu², mamáttu, mumoktu, rārantu.

Du. 2. jajastám³ (jas- 'be exhausted'), mumuktam, vavṛktam.

Pl. 2. jujustana, didistana (V diś-), vavrttana 4.

Middle. Sing. 2. dadhisvá, mimiksvá<sup>5</sup>, vavrtsva<sup>6</sup>.

P1. 2. dadhidhvam,  $vavrddhvam^7$  (VIII.  $20^{18}$ ). — 3. With the unique ending  $-r\bar{a}m$ :  $dadr sr\bar{a}m$  (AV<sup>1</sup>.)<sup>8</sup> 'let be seen'.

a. The transfer forms are:

Active. Du. 2. jujoṣatam, mumócatam. — Pl. 2. mumócata 9, rarāṇátā 10 (1. 1711).

Middle. Sing. 2. pipráyasva, māmahasva, vāvrdhasva, vāvrṣasva. — Pl. 3. māmahantām.

## Perfect Participle.

WHITNEY, Sanskrit Grammar 802—807. — DELBRÜCK, Verbum 229. — LINDNER 84 and 216.

491. There is an active and a middle participle, and both occur frequently. Both are formed from the weak stem of the perfect, being accented on the suffix. The strong form is made by adding the suffix -váns to the unstrengthened perfect stem; e. g. cakr-váns-, jaghan-váns-. If the stem is reduced to a monosyllable, the suffix is nearly always added with the connecting vowel -i- 11, as papt-i-váns- from pat- 'fall'. Unreduplicated stems, however, do not take the connecting vowel 12, as vidváns-. The weak stem of the active participle is identical in form with the 3. pl. ind. act. if written with -us instead of -ur; e. g. cakrus-. The middle participle is formed by adding the suffix -āná to the weak perfect stem; thus from cakr- is made cakr-āná-.

#### Active.

492. cakṛvāms-¹³, cakhvāms-¹⁴, cikitvāms- (f. cikit½ṣī-), jaganvāms- (f. jag-múṣī-), jagrbhvāms-, jagmivāms- (TS. IV. 2. I⁴ for RV. x. I¹ jaganvāms-), jaghanvāms- (f. á-jaghnuṣī-), jānivāṃs-¹⁵, jigīvāṃs- (ji- 'conquer'), jujurvāṃs-

\* WHITNEY, Roots 73, doubtfully assigns this and the cognate forms didesati, didista to the reduplicating present class.

<sup>2</sup> With u unchanged, as elsewhere in

strong forms.

3 Beside ind. jajāsa (AV.). WHITNEY, Roots 53, assigns this form to the reduplicated aor. beside 3. sing. ajījasata (ŚB.).

4 Given by AVERY 268 as a reduplicated agrist in the form of vavrtana (sic).

- 5 For \*mimiks-sva. WHITNEY, Roots 120, assigns this form to the reduplicating present class.
- 6 WHITNEY, Roots 164, assigns this form to the reduplicating present class.

7 Written vavrdhvam.

8 Cp. WHITNEY's note on AV. XII. 333.

9 Perhaps also susüdáta (AV. 1. 264) placed by WHITNEY, Roots 188, under the perfect, but, Sanskrit Grammar 871, doubtfully under the reduplicated agrist.

- 10 Owing to the strong radical vowel this should perhaps be regarded rather as a 2. pl. subjunctive. (The final vowel is long in the Pada text also.) The accent of these transfer forms was perhaps, except when the radical syllable was strong, normally on the thematic -a-. Cp. WHITNEY, Sanskrit Grammar 815.
- II Not, however, in dadvāms, nor in the problematic form cakhvāmsam (II. 14<sup>4</sup>), which seems to be formed from a root khā.

12 Except višivāms- (AV.).

13 With the weak stem in the acc. sing. cakrúsam (X. 1371).

14 Without connecting vowel.

15 Only the weak stem of this participle occurs in the form vi-jānúṣ-aḥ; op. above 482 e.

(jur-=jr-'waste away'), jujusvams-, jujuvams-, tatanvams-, tastabhvams-, tasthi-vāms- (f. tasthusī-), titirvāms-1, tustuvāms- (V stu-), dadasvāms- (dams-'bite'), dadasvāms-, dadāvāms-2 (AV.), dadīsús-, dadivāms- (AV.), dadrvāms-(f. dadrúsī-3, AV., dr-'pierce'), dadrśvāms- (f. dadrśúsī-), dadvāms- (dā-'give'). dadhanvāms-, dadhrsvāms-, dīdivāms-, papivāms- (pā- 'drink'), paprvāms-(f. paprúsī-; pṛ-'fill'), pīpivāms- (f. pipyúsī-; pī-'swell'), pupuṣvāms-, babhūvāms-(f. babhūvilsī-), bibhīvāms- (f. bibhyilsī-), mamandilsī-, mamrvāms- (f. mamrilsī-; mṛ- 'die'); yayi-vāṃs- (V yā-), rari-vāṃs- (f. rarissī-, AV.), ririkvāms-4 (V ric-). ririhváms-, rurukváms-4 (Vruc-), vavanváms-, vavarjúsī-5, vavrváms-6 (vr-'cover'), vavrtváms-, vavrdhváms-7, vivikváms-4 (vic-'sift'), vividváms-, vividhváms-(V vyadh-), śuśukváms-4 (V śuc-), śuśruváms-, śūśuváms-, sasaváms-8, sasrváms-(f. sasrúsī-), sāsahvāms-, susupvāms- (V svap-), susuvāms-, sedús- (sad- 'sit').

a. With connecting -i-: arivams- presupposed by f. arisī- (r- 'go'), īvivāms- (f. īvúṣī-), ūṣivāms- (vas- 'dwell'), ūṣúṣī- (TS. IV. 3. 115: vas- 'shine'), okiváms-9 (weak stem ūc-úṣ-, Vuc-), jakṣiváms- (ghas- 'eat', VS. AV. TS.), jajñivāms-10 (Vjñā-), paptivāms-, vivišivāms- (TS. IV. 7. 151). Also the negative

compound á-saścivāms- presupposed by the feminine á-saścuṣī-.

b. Without reduplication: dāśvāṃs-, vidvāṃs- (f. vidúṣī-), sāhvāṃs-; perhaps also khidvāms- in the voc. khidvas. Similarly formed is mīdhvāms-(f. mīļhúṣī-) 'bountiful', though the root is not found in independent use. With irregular connecting -i-: dīśivāms- (SV.), viśivāms- (AV.), and the negative compound á-varjivāins- presupposed by the f. á-varjusī- (AV.).

#### Middle.

493.  $\bar{a}ks\bar{a}n\acute{a}$ - ( $\sqrt{\acute{a}ks}$ -),  $\bar{a}naj\bar{a}n\acute{a}$ - ( $\sqrt{a}nj$ -),  $\bar{a}nas\bar{a}n\acute{a}$ - ( $\sqrt{a}ns$ -, AV.),  $\bar{a}r\bar{a}n\acute{a}$ -, āpāná-, ījāná- (Vyaj-), ūcāná- (Vvac-), cakamāná-11 (AV.), cakāná- (Vkā-), cakramāņá-, cakrāņá-, cakṣadāṇá-, caskabhāná- (AV.), cikitāná- (Vcit-), jagras- $\bar{a}$ ná-, jagmaná-, jajñaná- ( $\sqrt{jan-}$ ),  $j\bar{a}hr$ ,  $s\bar{a}$ ná-,  $jih\bar{\iota}l\bar{a}$ ná-, juju,  $s\bar{a}$ ná-,  $juhur\bar{a}$ ná-12 (Vhvr-), jūjuvāná-, tatrdāná-, tastabhāná-, tasthāná-, tātrpāná-, tātrṣāná-, titviṣāná-, tistirāná- (V stṛ-), tuṣṭuvāná-, tūtujāná-13, tepāná- (V tap-), dadāná-, dadrśaná-, dadraná- (dra- 'run'), dadrhaná-, didyutaná-, duduhaná-, papaná-(pā- 'drink'), paprathāná-, paspasāná-, pasprdhāná-, pipriyāná-, pīpyāná-, babrhāná-, babhrāná-, bubudhāná-, bhejāná-, māmahāná-, mumucāná- (AV.), yuyujāná-, yemāná- ( $\sqrt{yam}$ -), rarāná-, rārakṣāṇá-, rārahāná- (raṃh- 'hasten'), riricāná-, rurucāná-, rebhāná- (AV.), lebhāná- (Vlabh-), 1. vāvasāná- (vaś-'desire'), 2. vāvasāná- (vās- 'bellow'), 1. vāvasāná- (vas- 'wear'), 2. vāvasāná-(vas-'dwell'), 3. vāvasāná- (vas-'aim'), vāvṛdhāná-, vāvṛṣāná-, vivyāná- (\sqrt{vyā-}), śaśamāná-<sup>II</sup>, śaśayāná-<sup>II</sup> (śī- 'lie'), śaśāná- (śā- 'sharpen', AV.), śaśramāná-,

<sup>2</sup> With strong stem instead of weak.

5 With strong radical vowel.

7 There occurs once (IV. 217) the anomalous participle with pres. suffix vavrdhantas (Grassmann, Aorist).

<sup>8</sup> From san- 'gain'. The metre seems radical syllable and reduplication with a. almost invariably to require this participle

9 With strong radical vowel and reversion to the original guttural.

10 The i may here perhaps more correctly be regarded as a reduced form of the basic vowel, as in dadi-, tasthi- etc.

II The a is not syncopated in kam- or

12 Doubtfully assigned by WHITNEY, Roots, to the reduplicating class.

13 More frequently with the intensive accent tūtujāna -.

14 With the double irregularity of strong

from  $Vt\bar{r}$ -.

<sup>3</sup> Given under drā- 'run' in the AV. Index Verborum, but translated by WHITNEY, AV. V. 138, as from dr-'pierce'.
With reversion to the original guttural.

<sup>6</sup> The anomalous gen. sing. with an additional reduplicative syllable, va-vavrús-as appears once (I. 173<sup>5</sup>); cp. ZDMG. 22, 605.

There also occurs the weak stem tatarús, to be read sasanvāms- (cp. the f. sasanúsīin B.); see ARNOLD, Vedic metre p. 1442.

śáśadāna-1 (śad- 'prevail'), śiśriyāná- (śri- 'resort'), śuśucāná-, śúśujāna-2. ร์นิร์นบลิกล-3, sasrjāná-, sasrāṇá-4, sasvajāná-, sāsahāná-5, siṣmiyāṇá-, siṣvidāná-, susupāná- ( $\sqrt{svap}$ -), susvāṇá- (su- 'press'), sehāná- ( $\sqrt{sah}$ -)5.

## Pluperfect.

Benfey, Vollständige Grammatik p. 353. — Abhandlungen der königl. Gesellschaft der Wissenschaften zu Göttingen 15, p. 151-154. - Delbrück, Verbum 419. - Avery, Verb-Inflection 253. — WHITNEY, Sanskrit Grammar 817—820.

- 494. This tense, which is a pluperfect in form but not in meaning, is an augmented preterite made from the perfect stem. As in the perfect, the strong stem is used in the singular active, the weak elsewhere. The endings are the secondary ones; in the 3. pl. -ur always appears in the active and -iran in the middle. There is some difficulty in distinguishing this tense from the imperfect of the reduplicating class and from the reduplicating agrist<sup>6</sup>. Though its sense is the same as that of the imperfect, its forms may usually be distinguished (when the reduplication would be identical in both tenses) by the fact that the verb in question is not otherwise conjugated according to the reduplicating present class. On the other hand, the sense helps to distinguish the pluperfect from the agrist, when the reduplication would be identical in both tenses. With the aid of these criteria some sixty forms may be classed as belonging to the pluperfect. The augment is, as in other past tenses, dropped in several instances. The -s and -t of the 2.3. sing. are in some forms preserved by an interposed -7- (as in the aorist). Several transfer forms according to the a-conjugation are met with in this tense.
- 495. Active. Sing. I. acacaksam, ajagrabham, atustavam; ápiprayam? (TS. V. I. II3; VS. XXIX. 7); cakaram, ciketam (Vcit-), jagrabham (AV.).
- ájagan<sup>8</sup>; áiyes<sup>9</sup> (v. 2<sup>8</sup>); cākán, nanámas. With -7-: ábubhojīs. ávivesīs, ávivesīs; jihiņisīs 10 (AV.).
- 3. ájagan<sup>11</sup>, aciket (Vcit-); rārán<sup>12</sup>. With -Ī-: acucyavīt<sup>13</sup>, ájagrabhīt, arirecīt, ávāvacīt, avāvarīt14. — With thematic -a-: acakrat, acikitat and aciketat (Vcit-), adadhāvat 15 'ran', aśuśravat 10 (MS.), úsasvajat; cakradat, jagrabhat (VS. XXXII. 2), tastámbhat (I. 1213).

Du. 2. átatamsatam<sup>17</sup>, amumuktam; mumuktam. — 3. avāvašītām (vaś-'desire').

Pl. 2. ájaganta; ájagantana, ajabhartana 18. — With -ī-: acucyavītana 13. 3. ácucyavur, ásisrayur, asusravur 19, ábībhayur (Kh. 1. 75). Middle. Sing. 1. ásusravi. — 3. didista (V dis-).

Du. 2. ápasprdhethām 17.

with the intensive accent.

<sup>2</sup> With the intensive accent and regarded by Whitney, Roots 174, and by Lindner, Nominalbildung p. 54, as an intensive.

3 With the intensive accent and assigned by LINDNER, l. c., to the intensive, but by WHITNEY, Roots 175, to the perfect.

4 Once also anomalously with -mana: sasrmāná.

5 sāsahāná- once in RV., schāná- thrice,

from Vsah.

6 On such doubtful forms see specially DELBRÜCK, Verbum 158 (p. 135 f.).

7 WHITNEY 866 also quotes apiprayan from the TS.

8 For \*á-jagam-s.

9 BENFEY (p. 152) and DELBRÜCK, Verbum 19 These three are, however, class p. 123 and 128, regard this form as a plu- WHITNEY 861, and Roots, as acrists.

perfect of i- 'go' (= á-iy-e-s), WHITNEY, Roots, as pluperfect of is- or es- 'move' (= a-iy-es), ROTH and GRASSMANN as agrist of Vis-.

10 With irregular accent.

II For \*á-jagam-t.

12 From ran- 'rejoice' (I. 12212).

13 Cp. WHITNEY 868 a.

14 From vr- 'cover'; cp. Delbrück, Verbum

- 15 WHITNEY regards this form as an aorist, but the reduplicative vowel is that of the pluperfect, while the sense (IX. 877) does not seem decisive.
  - 16 WHITNEY 866.
  - 17 Transfer form.
  - 18 With strong radical vowel.

19 These three are, however, classed by

Pl. 3. ácakriran, ajagmiran, ápeciran (V pac-, AV.); avazytran; ásasygram. — Transfer forms according to the a-conjugation: átitvişanta, ádadrhanta, ádadrmhanta (TS. IV. 6. 24), ávāvašanta (vāś- 'bellow'); cakrpánta, dádhrsanta (AV.), vāvašanta (vāś- 'bellow'). — With ending -ranta: avavytranta.

## Periphrastic Perfect.

496. This formation made with the reduplicated perfect of kr- 'make' which governs the acc. of a fem. substantive in  $-\bar{\alpha}$  derived from a secondary (causative) verbal stem, is found only once in the Mantra portion of the Vedas: gamayām cakāra (AV. XVIII. 227) 'he caused to go' (lit. 'he made a causing to go'). In the Brahmana portions of the Samhitas (TS. MS. K.), such periphrastic forms (made even with an aorist) are occasionally met with.2

## III. The Aorist System.

497. The agrist is of frequent occurrence in the Vedas, being made from about 450 roots. An augmented tense taking the secondary endings and forming moods and participles, it is distinguished from the imperfect by lack of a corresponding present<sup>3</sup> (e. g. 3. sing. aor. á-kar, 3. sing. imp. á-krnot, 3. sing. pres. kṛṇḍti) and by difference of meaning (ákar 'he has done', ákṛṇơt, 'he did').

There are three distinct types of agrist.

- I. The simple agrist adds the endings to the root either directly or with the connecting vowel -a. It thus resembles the imperfect of the rootclass or of the accented  $\dot{a}$ - class. This type of a rist is formed by nearly 170 roots. Some nine or ten roots have, beside the regular forms of the simple aorist, a certain number of other forms which have the appearance of indicatives present. They seem to represent a transition to the formation of a new present stem. The most striking example is the agrist stem vocafrom which the 3. sing. vocati occurs several times.
- 2. The reduplicated agrist resembles the imperfect of the reduplicating present class. It is, however, distinguishable from the latter not only in meaning, but by a certain peculiarity of reduplication and by being nearly always formed with a connecting -a-. This type of agrist is taken by about 85 roots.
- 3. The sigmatic agrist inserts -s-, with or without an added - $\alpha$ , between the root and the endings. It is taken by rather more than 200 roots.

Thus each of the three types has one form following the analogy of the graded conjugation, and another following that of the a-conjugation. The sigmatic agrist has, however, further subdivisions.

Upwards of 50 roots take more than one form of the agrist. One verb, budh- 'wake', has even forms from five varieties of the agrist; from two of the first type, e. g. á-bodh-i and budhá-nta; from one of the second, e. g. a-būbudh-a-t; and from two of the third, e. g. á-bhut-s-i and bódh-i-s-a-t.

<sup>&</sup>lt;sup>1</sup> With reversion to the original gut-

<sup>&</sup>lt;sup>2</sup> See Whitney. Sanskrit Grammar 1073 a, b; beside the normal ones; thus the 2. du. pres. JACOBI, KZ. 35,578—587; BÖHTLINGK, ZDMG. &r-thás occurs besides the numerous regular 52, article 11; DELBRÜCK, Altindische Syntax forms of the mi-class. 426<sup>4</sup> f.; Ludwig, Sitzungsber. d. kgl. Böhm. Ges. d. W., phil.-hist. Kl. Nr. XIII.

<sup>3</sup> There are, however, sometimes sporadic forms from the same stem as the aorist

#### r. Simple Aorist.

### A. Root Aorist.

Benfey, Vollständige Grammatik 840. — Avery, Verb-Inflection 253-256. — Whitney, Sanskrit Grammar, 299—304; Roots 222 f.; AV. Index Verborum 380.

- 498. This form of the simple agrist is taken by about 100 roots (and by more than 80 of these in the RV.), the commonest being those with medial  $\alpha$  (nearly 30 in number). It is inflected in both the active and the middle voice. The root is strong in the indicative active singular, but weak elsewhere. Roots ending in vowels, however, show a tendency to retain the strong vowel throughout the indicative active except the 3. plural.
- a. Roots ending in  $\bar{a}$ , of which there are some eight, retain the  $\bar{a}$  throughout the indicative active except the 3. pl., where they drop it before the ending which in these verbs is invariably -ur. In the middle indicative, the radical vowel is weakened to  $i^{\mathrm{T}}$ .

The forms which occur from these roots, if made from sthā- 'stand', would be the following:

Active. Sing. 1. ásthām. 2. ásthās. 3. ásthāt. — Du. 2. ásthātam. 3. ásthātām. — Pl. 1. ásthāma. 2. ásthāta. 3. ásthur.

Middle. Sing. 2. ásthithās. 3. ásthita. — Pl. 1. ásthimahi. 3. ásthiran.

**b.** Roots ending in r, of which there are some ten, take Guna throughout the indicative active except the 3. pl. Roots ending in  $\bar{i}$  and  $\bar{u}$  (of which, however, few dual and plural forms occur) show the same tendency. The root  $bh\bar{u}$ - 'be' retains its  $\bar{u}$  throughout (as in the perfect), interposing v between it and a following a. The forms met with from kr- 'make' are the following:

Active. Sing. 1. ákaram. 2. ákar. 3. ákar. — Du. 2. kartam (AV.). 3. ákartām. — Pl. 1. ákarma. 2. ákarta. 3. ákran.

Middle. Sing. 1. akri. 2. ákrthās. 3. ákrta. — Pl. 3. ákrata. The forms which actually occur are the following:

#### Indicative Active.

499. Sing. 1. ákaram, ágamam², agām (gā-'go'), ágrabham, adhām, ápām³ (pā- 'drink'), abhuvam 4, abhedam, arodham (rudh- 'hinder'), ásravam, asthām (AV.); karam, gamam, gām (AV.),  $d\bar{a}m^5$ ,  $dh\bar{a}m$  (AV.),  $vam^6$  ( $v_{\bar{i}}$ - 'cover').

2. agās, adās7, ápās, aprās, ábhūs, ásres, ásthās; gās, dás, dhás, bhūs, sthās. — With loss of ending: akar, ákrān (V krand-), ágan8, ághas, avar (vr- 'cover'), aspar; anato, avar (vr- 'cover'); kar, kran to (\(\sqrt{kram}\)), bhet (V bhid-), vár, várk 11.

 $dg\bar{a}t$ ,  $acet^{12}$  (ci- 'collect'),  $dd\bar{a}t^{12}$ ,  $ddh\bar{a}t$  ( $dh\bar{a}$ - 'put'), (dhā- 'suck', AV.), ápāt, aprāt (AV.), ábhūt, áśret (V śri-), áśrot, ásthāt,

e. g. ta-sthi-se (AV.), and sthi-tá- from sthā-

<sup>2</sup> This might also be the sing. I. of the thematic agrist ágama-t etc.

3 No forms of pa- 'protect' are made according to this aorist, while pa- 'drink' (present stem piba-) has no forms from the root in the present system except pānti (RV1.) and pāthás (AVI.), but perhaps even these are rather to be taken as meant for aorist forms; cp. p. 369, note 1 and p. 368, note 10.

4 With the usual absence of Guna in this root; later abhūvam.

5 There is also the transfer form adam

As in the perfect before consonant | (I. 1262), which though not analyzed in endings and in the past passive participle, the Pada text, appears to stand for a-adam as indicated by both sense and accent.

6 For varam formed by false analogy as a first person to 2. sing. vah (for \*var-s) appearing as if formed with the -s of 2. sing.

7 There is also the transfer form adas (I. 1218), which though not analyzed in the Pada text, is shown by both sense and accent to stand for a-adas.

8 For \*á-gam-s.

9 For \*a-nas-s from nas- 'attain', where \*ának would have been phonetic (54, 6).

10 For \*kram-s.

II For \*varj-s from Vvrj-.

12 There is also the transfer form adat

asrat¹ (VS. VIII. 28); gāt, dắt, dhắt², bhūt, sthāt. — With loss of ending: ákar, akran³ (Vkram-), ákrān (Vkrand-), agan, aghas, ácet (cit- 'observe'), atan, adar (dr- 'pierce'), abhet, ábhrāṭ (Vbhrāṭ-), amok (Vmuc-, AV.), ámyak (Vmyakṣ-), ávart⁴, avrk⁵ (AV.), ástar; ánaṭ, ávar; kar, gan, naṭ (Vnaś- 'attain', AV.), bhét, vár, vark, skan (Vskand-).

Du. 2. agātam (AV.), ábhūtam, amuktam (Kh. 1. 126); kartam (AV.),

gātam (AV.), dātam, dhātam, spartam.

3. ákartām, agātām (AV.), ádhātām (VS. xx. 57), ánaṣṭām ('reach'), ápātām (VS. xxxviii. 13), abhūtām; gātām (AV.), dātām.

Pl. 1. ákarma, áganma, ágāma, ádarsma (TS. III. 2. 54), adāma 6, ápāma,

ábhūma<sup>7</sup>, asthāma (AV.), áhema (Vhi-); dhāma, bhūma (AV.).

2. ákarta, agāta (AV.), ábhūta; abhūtana, áhetana; karta (AV.) and

kṛta<sup>8</sup> (AV.), gāta (AV.), sthāta (AV.).

3. ákran (Vkṛ-), ákṣan³ (Vghas-), ágman, ábhūvan, avṛjan, avṛtan¹⁰ (AV.), avran, áśriyan (Vśri-), áśravan (AV.), aśvitan, ahyan (Vhi-), āsthan¹¹ (AV.); kran (AV.), kṣan (Vghas-), gman, vran. — With ending -ur: ákramur, águr, ádur, ádhur, apur (1. 164¹), áyamur, ásthur; gur, dabhúr, dúr, dhur, nṛtur¹², mandur, sthur.

#### Indicative Middle.

500. Sing. I. akri, ajani, ayuji, avri (vṛ- 'choose'), ahvi ( // hū-, AV.).

2. ákṛthās, agathās (VS. III. 19), adhithās, áyukthās, ásthithās.

3. akrta, ágata (AV.), ádista, adhita, aprkta (V prś-), ámata (V man-), amrta (AV.), áyukta, ávrkta (V vrj-), avrta ('choose' and 'cover'), ásrsta, askrta (x. 1273), ásthita, áspasta (V spaś-), ásīta (sī- 'sharpen'); áyukta; ārta (r- 'go'), āsta (aś- 'attain'); arta (r- 'go'), krta, gūrta (gur- 'greet'), gdha 13, mrta (AV.).

Du. I. gánvahi. — 3. adhītām 14 ( $\sqrt{dh\bar{a}}$ -).

Pl. 1. áganmahi, adimahi (TS. 1. 8.  $6^2$ ) and adīmahi <sup>14</sup> (VS. III. 58) <sup>15</sup>, adhīmahi <sup>14</sup> ( $\sqrt{dh\bar{a}}$ -), apadmahi (VS. IV. 29), ámanmahi, ayujmahi, áhūmahi; dhīmahi <sup>14</sup> ( $\sqrt{dh\bar{a}}$ -).

2. ácidhvam (ci- 'note'), ámugdhvam (√ muc-), ayugdhvam.

3. akrata 16, ágmata, atnata; ārata, ásata (aś- 'attain'); yujata. — With the ending -ran: akrpran 17, agrbhran, ajusran, ádrśran, apadran, abudhran, áyujran, avasran 18 (vas- 'shine'), áviśran, avrtran, ásrgran 19, ásthiran, asprahran. — With ending -ram: ádrśram, ábudhram, ásrgram 19.

(I. 1276, II. 124, v. 328) which, though not analyzed in the Pada text, appears to stand for å-adat.

1 For \*asras-t: see Sandhi p. 613.

<sup>2</sup> Also the transfer form (práti) dhat (IV. 27<sup>5</sup>).

3 For \*akram-t.

4 For \*avart-t from vrt- 'turn'.

5 Seemingly with anomalously weak root for \*avrk-t. But the form really stands by haplology for the 3. sing. mid. avrkta: ápāvrk támak (AV. XIII. 29) 'he has wasted away the darkness': see WACKERNAGEL, KZ. 40, 544—547.

6 That is, in ādāma (v. 30<sup>15</sup>), which though not analyzed in the Pada text, must stand

for a-adama.

7 arudhma is quoted in WHITNEY'S Roots as occurring in the MS. [I. 65: 94, 6].

8 Emendation for kṛtám (AV. XIX. 441).

9 For ágh(a)san.

10 Misprinted as acrtan in the text of AV.

III. 311: see WHITNEY's note.

11 Transfer form probably for asthur from sthā- 'stand'; see AJP. 12, 439; IF. 5, 388; KZ. 22, 435; WHITNEY, Sanskrit Grammar 847, and his note on AV. XIII. 15.

12 This form might be regarded as an un-

augmented perfect.

<sup>13</sup> For gh(a)s-ta, from Vghas-; cp. p. 56, 3.

<sup>14</sup> With  $\bar{i}$  for i; cp. Brugmann, Grundriss 2, p.896; v. Negelein  $6^{\text{I}}$ ; Oldenberg, ZDMG. 63, 297.

15 From da- 'share'.

16 There is also the transfer form kránta (I. 141<sup>3</sup>).

<sup>17</sup> Cp. BLOOMFIELD, Johns Hopkins University Circular, Dec. 1906, p. 10.

18 Cp. p. 327, note 7.

19 With reversion to the original guttural.

#### Passive Indicative of the Root Aorist.

Delbrück, Verbum 1814. — Avery, Verb-Inflection 275. — Whitney, Sanskrit Grammar 842-845; Roots 240. — v. Negelein, Zur Sprachgeschichte 4. — Cp. Osthoff, IF. 3, 390; HIRT, IF. 17, 64 f.

- 501. There is a peculiar middle form, made from about 45 roots in the Samhitās (40 of them occurring in the RV.), which is used with a predominantly passive meaning<sup>1</sup>. When it is formed from verbs with a neuter signification, like gam- 'go', the sense remains unaltered (as in the past passive participle). It is a 3. sing indicative, in which the augmented root takes the ending -i. This -i, otherwise the ending of the 1. sing. middle, appears to be used in the regular 3. sing. perfect middle (e. g. dadhe, 1. and 3. sing.), and sometimes in the 3. sing. present middle (e.g. saye, 1. and 3. sing.). The characteristic feature of this passive form is the strengthening of the root as compared with other middle forms, e. g. ákāri beside akri (1. sing. mid.) 2.
- a. A prosodically short medial i, u or r takes Guna, while a is normally lengthened; a final i, u or r takes Vrddhi, while final  $\bar{a}$  interposes a v before the ending. The accent in unaugmented forms is always on the root. The forms actually occurring are: Sing. 3. ákāri, agāmi, áceti, ácchedi, ájani3, ájňāyi, átāpi, ádarši, ádhāyi, ápādi (AV.), ápāyi ('drink'), aprāyi (AV. VS.), dbodhi, dbhrāji, amāyi ('measure'), ámodi, ámyakṣi, áyāmi, áyāvi+(VS.XXVIII.15), áyoji, árādhi, aroci, avahi (Kh. v. 153), avāci, ávāri ('cover'), avedi ('find'), áśoci, áśrāyi (Vśri-), ásarji, ásādi, ásāvi (Vsu-), ástāri, ástāvi, áhāvi; ceti, jáni, jāni, tāri, darsi, dāyi ('give'), dấyi ('bind'), dhấyi, pấdi, védi ('find'), sấdi 5. — Used injunctively: ghósi, ceti, chedi, tāri, dháyi, bhāri, bhedi (VS. XI. 64), móci (AV.), yoji, reci, roci, vandi, varhi, vāci, śaņsi, śāri, śeşi (śiṣ-'leave', AV.), śrávi, sarji, sādi, hāyi (hā- 'leave', AV.); also the unique form jārayāyi 'let him be embraced', from the secondary stem jāra-ya- 'play the lover'.

# Root Aorist Subjunctive.

502. Active. Sing. 1. kárāṇi, gamāni, gāni, bhuvāni. — 2. kárasi; káras, gamas, gás6, tárdas, dás, dhás, párcas, pás (IV. 204 'drink'), prás, bhívas7, yamas, váras ('choose'), śásas, sthás.

3. karati, jóṣati, darśati (AV.), dấti, dhấti, padāti<sup>8</sup>, bhédati, rādhati, varjati, stháti; kárat, gámat, garat (gṛ-'swallow', AV.), gāt, júṣat, dất, dhāt, padāt<sup>8</sup> (AV.), máthat<sup>9</sup> (AV. VII. 50<sup>5</sup>), yamat, yodhat, rādhat, várat ('choose'), vártat, śrávat, sághat, sāt, sthāt, spárat. — Without Guna: ŕdhat, bhívat, śriwat (RV1.).

Du. 2. karathas, gamathas, darśathas, pāthás 10 (AV. VII. 291), bhūthás 11, śravathas. — 3. karatas, gamatas, bhūtas 11, śrávatas, sthátas.

<sup>2</sup> Cp. Brugmann, Grundriss 2, 1054, 3.

4 From yu- 'separate'.

6 The 2. 3. sing. with secondary endings \*bhivathas and \*bhivatas.

In one or two passages this form seems | from roots ending in  $\bar{a}$  cannot be distinguished

7 Formed without Guna as in the ind. aor. and perfect.

8 With double modal sign -ā-.

9 This form has a subjunctive sense ('might shake'); it might otherwise be an injunctive of the a- aorist.

10 Assigned by WHITNEY, Roots, to the

present of the root class.

<sup>11</sup> Both bhūthás (VI. 675) and bhūtas (X. 277) seem to be meant for subjunctives formed anomalously without mood sign, instead of

to have a transitive meaning; cp. WHITNEY, from injunctives. Sanskrit Grammar 845 (end).

<sup>3</sup> This augmented form always occurs in the RV. with short radical vowel, beside the unaugmented jāni as well as jani.

<sup>5</sup> The form sváni (vi. 46<sup>14</sup>) may be the 3. sing. passive aorist (BR. and doubtfully WHITNEY, Roots 201), but GRASSMANN, s. v. sváni, regards it as a neut. substantive in -i. Cp. Neisser, BB. 30, 305 ff.

Pl. 1. kárāma, gamāma, gāma, dhāma, rādhāma. — 3. karanti, gámanti,

pānti<sup>1</sup> (II. 11<sup>14</sup>); káran, gáman, garan, dársan, bhúvan, vaman,

Middle. Sing. 2. kárase, josase (AV.). — 3. idhaté² (RV¹.), kárate, bhljate, yojate, várjate, stárate. — Du. 2. dhéthe³, dhaithe. — Pl. 1. kárāmahe, gámāmahai, dhāmahe, manāmahe (VS. IV. 11), starāmahe. — 3. yavanta (yu-'separate').

Root Aorist Injunctive.

503. Active. Sing. 1. karam (AV.), gām, dhām (VS. 1. 20), bhuvam, bhojam, yojam, sthām.

2. jes, bhūs, bhés ( $Vbh\bar{\imath}$ -, VS. I. 23 etc.; TS. IV. 5. Io<sup>1</sup>). — With loss of ending: kar (TS. I. 3.  $7^2$ ), dhak (dagh- 'reach'), bhet (Vbhid-), rok (Vruj-,

VS.), var ('cover'), vark (Vvrj-), star, spar.

3. bhút, śret, ut-thát (V sthā-, Kh.II. I I 3). — With loss of ending: gan (VS. XXVII. 31; TS. v. 6. I4), dhak (V dagh-), nak and nat (naś- 'attain'), vár, vark, skún (V skand-), stan4.

Pl. 1. gāma, chedma<sup>5</sup>, daghma, bhūma, bhema<sup>5</sup>, hóma<sup>5</sup> (hū-'call'). — 3. bhūvan, vrán. — With ending -ur: kramur, gur, dabhúr, dur, dhúr, sthur.

Middle. Sing. I. námśi (namś- = naś- 'attain'). — 2. dhrthās (AV.), nutthās, bhitthās (VS. XI. 68), mṛthās (mṛ- 'die'), mṛṣthās (V mṛṣ-), rikthās (V ric-), vikthās (V vij-, VS. I. 23). — 3. arta (Vr-), aṣṭa (aś- 'attain'), vukta (TS. IV. 3. I 14), vikta (V vij-), rṛṭa (rṛ- 'choose'). — Pl. I. dhīmahi (V dhā-). — 3. aśata (SA. XII. 19).

## Root Aorist Optative.

504. Active. Sing. I. aśyám (aś- 'attain'), rdhyām (AV.), deyām¹, dheyām¹, vṛjyām, śakyām. — 2. avyās, aśyās, rdhyās, gamyās, jñeyās, bhūyás, mrdhyās, sahyās. — 3. bhūyāt<sup>8</sup> (AV.).

Du. I. yujyāva. — 3. yujyátām.

Pl. 1. aśyáma, rdhyáma, kriyāma, bhūyáma, vrjyáma, sāhyáma<sup>9</sup>, stheyāma<sup>7</sup>.

— 3. aśyur (aś- 'attain'), dheyur, sahyur.

Middle. Sing. 1. asīya, murīya (mṛ- 'die', AV.). — 3. arīta (Vṛ-) uhīta-¹° (Vvah-), vurīta (vṛ- 'choose'). — Du. 2. ṛdhāthe.

Pl. r. asīmāhi, idhīmahi, rdhīmāhi, nasīmahi ('reach'), nasīmahi, prcīmahi, mudīmahi, yamīmahi, sīmahi 't (sā- 'bind').

a. Precative forms of the root agrist are common in the active, being

made from about twenty roots in the Samhitas.

Active. Sing. 1. āpyāsam <sup>12</sup> (AA. v. 3. 2<sup>3</sup>) rdhyāsam (VS. vIII. 9), jīvyāsam (AV. VS.), priyāsam <sup>13</sup> (AV.), bhūyāsam, bhrājyāsam (AV.), bhriyāsam (VS. II. 8), rādhyāsam (VS. XXXVII. 3), vadhyāsam (VS. AV.), śrūyāsam (AV.). — 3. avyās, aśyās ('reach'), rdhyās, gamyás, daghyās, peyās ('drink'), bhūyás, yamyās, yūyās <sup>14</sup> yu- 'separate'), vṛjyās, śrūyās, sahyās.

- r Assigned by WHITNEY, Roots, to the present of the root class.
  - <sup>2</sup> With weak and unaccented root.

3 A transfer form for \*dhathe.

- 4 This form may, however, perhaps preferably be classed as an imperfect injunctive along with *stanihi* as pres. impv., as in WHITNEY'S Roots. These are the only forms of the simple verb beside the aor. *astānīt* (AV.).
  - 5 With strong radical vowel.
- <sup>6</sup> Probably to be explained as the injunctive corresponding to the augmented indicative *adhīmahi* (see 500, note 14); it might, however, be the I. pl. opt. mid. with loss of  $\bar{a}$  before the modal  $-\bar{i}$ .

- 7 For dā-iyām, dhā-iyām, sthā-iyāma.
- 8 The RV. has no forms of the 3 sing. in yat, but only the somewhat numerous precatives in yas = \*-yas.

9 With irregular strong radical vowel, Padapātha sahyāma; cp. RPr. 1x. 30.

- 10 Aor. opt. in WHITNEY, Sanskrit Grammar 837 b, but pres. opt. in 'Roots' 157.
  - II With loss of  $\bar{a}$  before the modal  $-\bar{i}$ .

    12 Accented  $\bar{a}py\bar{a}sam$  in the ed. (B. I.).
- 13 WHITNEY, in AV. III. 54, would emend this form to *bhriyāsam*: see his note on that passage.

14 According to AVERY 241, 3. sing. pres.

Indo-arische Philologie. I. 4.

Du. 2. bhūyāstam (VS.II.7). — Pl. 1. rdhyāsma (AV.), kriyāsma, bhūyāsma (AV. VS.), rādhyāsma (AV.). — 2. bhūyāsta <sup>1</sup> (TS. III. 2. 5<sup>6</sup>).

Middle. Sing. 3. padīṣṭá, mucīṣṭa².

## Root Aorist Imperative.

505. The active forms of this mood are fairly numerous, occurring in all the 2. and 3. persons; but middle forms occur in the 2. pers. only, ten in the sing. and two in the pl. In the 2. persons active of all numbers, several forms irregularly strengthen the root, which is then nearly always accented.

Active. Sing. 2. kṛdhi, gadhi, bodhi³, yandhi (Vyam-), yódhi⁴, randhi (= rand-dhi; V randh-), viḍḍhi (V viś-, AV.), vṛdhi 'cover', śagdhi (V śak-), śrudhi, spṛdhi. — With ending -hi: gahi, pāhi (AV.), máhi 'measure',

sāhi 'bind'.

3. gantu, dātu, dhātu, pātu (AV.), bhútu, śrótu, sótu (su- 'press').

Du. 2. kartam<sup>5</sup> (AV.) and krtám, gatám and gantám<sup>5</sup>, jitam, dātam, dhaktam (V dagh-), dhātam, pātam (AV.), bhūtám, bhrtam (VS.XI. 30), yantám<sup>5</sup>, riktam (V ric-), varktam<sup>5</sup> (V vrj-), vartam<sup>5</sup> (vr- 'cover'), volhám<sup>6</sup>, saktam, srutám, sitam (si- 'bind'), sutám, sthātam, spṛtam.

3. gantām 5 (VS. IX. 19), ghástām (VS. XXI. 43), dātām, pātám, voļhám 6.

Pl. 2. kárta<sup>5</sup> and kṛta, gata and gánta<sup>7</sup>, gātá, dāta, dháta<sup>8</sup>, pāta (AV.), bhūtá, yánta<sup>5</sup>, varta<sup>9</sup> (Vvrt-), śasta (Vśams-), śruta and śróta<sup>10</sup>, sóta<sup>5</sup> (Vsu-), sthāta, heta<sup>5</sup> (Vhi-). — With ending -tana: kártana<sup>5</sup>, gántana<sup>5</sup>, gātana, dhātana, dhetana<sup>11</sup>, pātana (AV.), bhūtana, yantana<sup>5</sup>, sotana (Vsu-).

3.  $g \stackrel{\cdot}{a} mantu$ ,  $d \stackrel{\cdot}{a} ntu$   $(d \stackrel{\cdot}{a} - {}^{\prime} cut^{\prime}, AV. XII. 3^3)$ ,  $d \stackrel{\cdot}{h} a ntu$ ,  $p \stackrel{\cdot}{a} ntu$  (AV.),

śruvantu.

Middle. Sing. 2.  $kr sv\acute{a}$ ,  $dhisv\acute{a}$  ( $Vdh\bar{a}$ -),  $yuksv\acute{a}$ ; accented on the root:  $m\acute{a}tsva$ ,  $y\acute{a}ksva$ ,  $r\acute{a}sva$ ,  $v\acute{a}msva$  (van-'win'),  $s\acute{a}ksva$  <sup>12</sup> (I. 42 <sup>1</sup>, Vsac-); unaccented  $d\bar{v}sva$  ( $d\bar{a}$ -'give', VS. XXXVIII. 3),  $m\bar{a}sva$  'measure'.

Pl. 2. krdhvam, vodhvam 13 (VS.).

# Root Aorist Participle.

506. Of the active form of the participle of the root agrist few examples occur. But the middle form is common, nearly forty examples being met with in the RV. The accent here generally rests on the final syllable of the suffix  $-\bar{a}na$ , but in several examples it is on the radical syllable.

Active. rdhánt-, kránt-, gmánt-, citánt-, pánt-, bhidánt-, sthánt-; also

dyutánt-14 as first member of a compound.

Middle. arāná-, idhāná-, urāná- 'choosing', ilhāna- ( $\sqrt{vah}$ -), krāná-<sup>15</sup>, citāna-, cyávāna-, juṣāná-, tṛṣāná-, dṛṣāná- and dṛṣāna-, dyutāná- and dyltāna-, dhuvāná- (TS.IV. 4. 12<sup>5</sup>), nidāná-, piṣāná-, pṛcāná-, pṛathāná-, budhāná-, bhiyāná-, manāná-, mandāná-, (vi-)mána- (TS. IV. 6. 3<sup>3</sup>), yatāná- and yátāna-, yujāná-,

<sup>2</sup> The form grabhīṣṭa is a 2. pl. injv. beside the I. pl. ind. agrabhīṣṭa according to the

3 From both bhū- 'be' for \*bhū-dhi and budh- 'awake' for \*bbd-dhi instead of \*bud-dhi.

5 With strong root.

8 With the accent of strong forms. 9 For vart-ta (like varti for vart-ti).

¹ AV. XVIII. 486 has the corrupt reading bhūyāstha; see Whitney's note on that passage.

<sup>4</sup> For \*yôd-dhi instead of \*yuddhi.

<sup>6</sup> For vah-iam, vah-iām through \*vazh-iam, track'.
\*vozh-iām.

<sup>7</sup> Once (VI. 49<sup>II</sup>) accented gantá.

<sup>10</sup> Always śrutā or śrótā; also sótā (cp. RPr. VII. 14 f.).

II With e for  $\bar{a}$ .

<sup>12</sup> sākṣva (III. 377) is from Vsak-, being an s- aor. form, for \*sak-s-sva beside I. sing. mid. asākṣi and sākṣi.

<sup>13</sup> For vah-dhvam through \*vazh-dhvam.

<sup>14</sup> In dyutád-yāman- 'having a shining

<sup>15</sup> Cp. BB. 20, 89.

rucāná-, rithāṇa-, vásāna- 'dwelling', vipāná-, vrāṇá- 'covering', śubhānáand śúmbhāna-, śvitāná-, sacāná-, suvāná-1 and svāná- (SV.) (su-'press'), srjāná-, sprdhāná-, hiyāná-2. As members of compounds only, -cetāna- and -hrayāna-3 occur.

#### B. a- Aorist.

AVERY, Verb-Inflection 256 f. — WHITNEY, Sanskrit Grammar p. 305—308; Roots 224; AV. Index Verborum 380. — v. Negelein, Zur Sprachgeschichte 32-34.

507. This form of the simple aorist is taken by nearly 60 roots, chiefly by such as contain a medial vowel. In the RV less than half as many verbs form the a- aorist as form the root-aorist; and it is more frequent in the AV. than in the RV. The root generally appears in the weak form, the stem being made with an added -a, which in unaugmented forms is normally accented. This form of the aorist therefore resembles an imperfect of the é-class. Middle forms are of rare occurrence in this aorist.

a. A certain number of irregularities occur in the formation of the stem. I. The radical vowel of  $s\bar{a}s$ - 'order' is reduced to  $i^4$ , e. g.  $sisat^5$  (IV.  $2^7$ ). — 2. Some half dozen roots containing a medial  $\alpha$  followed by a nasal, drop the nasal; these are krand-'cry out'. tams- 'shake', dhvams- 'scatter', bhrams- 'fall', randh- 'make subject', srams- 'fall'. -3. On the other hand r- 'go' and sr- 'flow' take Guna and accent the radical syllable, as dranta (unaugmented 3. pl.) and sdrat. — 4. Several roots form transfer stems from the root aorist. Some half dozen do this by reducing a final radical  $\bar{a}$  to a. This is regularly the case in  $khy\bar{a}$  'see',  $vy\bar{a}$  'envelope',  $hv\bar{a}$  'call'; e. g. dkhyat, dvyat, dhvat; but from  $d\bar{a}$  'give',  $dh\bar{a}$  'put', and  $sth\bar{a}$  'stand', only occasional transfer forms occur; thus ddat; adhat (SV.) and dhat;  $\bar{a}sth\bar{a}t$  (AVI.). On the other hand, occasional transfer forms transfer forms are made from ky- 'make', and gam- 'go', in which the radical syllable remains strong; e. g. ákarat (AV.) and ágamat.

## Indicative.

508. The forms of the indicative actually occurring, if made from vid-'find', would be as follows:

Active. Sing. 1. ávidam. 2. ávidas. 3. ávidat. — Pl. 1. ávidāma. 2. ávidata. 3. ávidan.

Middle. Sing. 1. ávidc. 3. ávidata. — Pl. 1. vidāmahi. 3. ávidanta.

The forms which actually occur are the following:

Active. Sing. 1. ákhyam, agrbham (Kh. III. 155), átrpam (AV. TS.), atrham (AV.), anijam (AV.), ámucam (AV.), áruham (TS. VS. AV.), ávidam, ávrdham (Kh. IV. 85), aśakam (VS. II. 28), ásanam, ásaram, ahyam $^6$  ( $\sqrt{hi}$ -, AV.), ahvam (AV.); ápam (AV.); aram, vidam.

2. ákaras (AV.), ákṛtas (kṛt-'cut'), ákhyas (TS. AV.), áruhas, ávidas, asadas (TS. VS. AV.), ásaras; ápas; káras, guhas, druhas, bhúvas<sup>7</sup>, mucas (AV.), vidás.

3. ákarat<sup>8</sup> (AV.), akramat (AV.), ákhyat, ágamat<sup>8</sup> (AV.), ágrdhat, acchidat (AV.), atanat, átasat (VS. AV.), adrpat9 (AV.), adhat10 (V dhā-, SV.), ámucat,

pronounced svāná-.

<sup>2</sup> Hardly any of these participles occur in any of the other Samhitas: rucaná-(VS. XII. 1), rúhāṇa- (TS. IV. 1. 24), svāná-

3 In á-cetāna- 'thoughtless', and á-hrayāṇa-

4 As in the weak forms of the present

5 At the same time accenting the radical | a-dhāt. syllable.

6 Though the other forms from Vhi-

I Always written thus in the RV., but to be | follow the root-aorist (áhena, ahyan, etc.), this is probably to be regarded as a transfer form, since the regular form according to the root agrist ought to be \*áhayam.

7 A transfer form, bhiva-s, following bhuv-am as if from a stem bhuva.

8 Transfers from the root aorist, following the I. sing. ákar-am, ágam-am.

9 Emendation in AV. xx. 1365.

10 Transfer from the root agrist for

árudat (AV.), arudhat, áruhat, ávidat, avṛtat (AV.), avṛdhat, avyat  $(Vvy\bar{a})$ , áśakat (AV.), aśucat, áśramat (AV.), ásadat, ásanat, ásarat, ásicat (TS. III. 2.84), ásrpat (AV.), áhvat  $(Vd\bar{a})$ , ápat, ārat, āsthat (AV.), (AV.),

Pl. I. aruhāma (VS. VIII. 52), ávidāma, ásanāma, áhvāma; vṛdhāma 5

(AV. v. 19). — 2. ávyata 1; ārata.

3. akhyan, akraman (AV.), agaman (AV.), acchidan (AV.), ádrśan (TS. IV. 5. 13), arudhan (AV.), áruhan, ávidan, avrjan, avrdhan (VS. XXXIII. 60), aśakan (AV.), ásadan, asanan, asaran, asican; ápan, āran, āsthan (AV. XIII. 15); khyán, dhvasán , vidán, sadan.

Middle. Sing. 1. áhve; hve (AV.). — 3. akhyata, ávyata¹; ārata; vyata¹. — Pl. 1. śiṣāmahi (V śās-). — 3. avidanta (AV.), ahvanta; áranta, kránta¹.

# a- Aorist Subjunctive.

509. The forms of this mood are rare and almost restricted to the active.

Active. Sing. 2. vidási; vidás. — 3. mucāti; vidát.

Du. I. ruháva. — 2. vidāthas. — 3. gamātas (AV. x. 742).

Pl. 1. arāma; radhāma, riṣāma, sadāma. — 2. gamātha (AV.), riṣātha, vidātha; riṣāthana.

Middle. Sing. 3. mucāte, śiṣātai8 (śiṣ- 'leave', AV. II. 313).

Pl. 1. śisāmahe9 (AV. SV.).

# a- Aorist Injunctive.

510. Active. Sing. 1. aram, khyam, dáršam, radham, riṣam, ruhám, vidam, sanam.

2. kradas, krudhas (AV.), khyás, guhas, grdhas (AV. VS.), druhas (AV.), mucás, vidas, risas (VS.xi.68; TS.iv.1.9¹), śiṣas ('leave'), sadas, sṛpas (AV.).

3. kṣudhat (AV.), khyat, gṛdhat (AV.), tanat, tamat, tṛṣat (AV.), dasat, dhṛṣát (Kh.IV.I), bhraśat, mucat, riṣat, rudhat, rùhat<sup>IO</sup>, vidát, śiṣat<sup>II</sup>, śramat, śriṣat, śrŵvat<sup>II</sup>, saðat, sánat<sup>IO</sup>, sṛpat (AV.), sridhat.

Pl. 3. aran, khyan, gáman (VS. XVII. 78), trpán, trṣan (VS. VI. 31), drśan, druhan, riṣan, vidan, śakan (AV.).

Middle. Sing. 3. vidata (AV. XIII. 231).

Pl. 1. arāmahi (AV.); gṛhāmahi. — 3. aranta, budhánta, mṛṣanta, vidánta.

# a- Aorist Optative.

511. This mood is rare and confined to the active in the RV., though three or four middle forms occur in the later Samhitās.

Active. Sing. 1. āpeyam13 (AV.), gameyam, drśeyam, bhideyam (AV.),

3 See p. 327, note 5.
 4 práti dhat (IV. 27<sup>5</sup>).

<sup>6</sup> A transfer form from *Vsthā*-; cp. WHIT-

NEY's note on AV. XIII. 15.

II From sāṣ- 'order', with accent on the root.

13 In prāpeyam (AV. III. 20°), analyzed in the Pada text as prá ápeyam; cp. Whitney's

note on the passage.

I Transfer form.

<sup>&</sup>lt;sup>2</sup> A transfer form: see p. 366, note 12.

<sup>5</sup> WHITNEY, note on AV. v. 19, would instead of ávim vṛdhāma read (with Paipp.) ávīvṛdhāma.

<sup>7</sup> With loss of medial nasal, from Vahvans.

8 This form is probably a corrupt reading for the passive sisyátai: see Whitney's note on AV. II. 313.

<sup>9</sup> For siṣāmahi of RV. VIII. 241.

<sup>10</sup> With accent on the radical syllable.

<sup>12</sup> It is hard to decide whether this form, which occurs only once (I. 1273) beside the regular śrávat, should be classed here as an injunctive of the a-acrist, or as an irregular subjunctive of the root-class following the analogy of bhivat (cp. 502).

13 In prāpeyam (AV. III. 209), analyzed in

vidéyam¹ (AV.), śákeyam (Kh.IV.84), sanéyam. — 2. games (VS.). — 3. rdhet (AV.), gamét, yamet<sup>2</sup> (AV.), videt, sanet, set<sup>3</sup> (VS. IX. 5, 6).

Pl. 1. asema ('attain'), rdhema (AV.), gaméma, drsema (AV.), pusema, bhujema, ruhema, videma (AV.), śakéma, sadema, sanéma and sánema, srasema4.

Middle. Sing. 1. videya (VS. IV. 23). - Pl. 1. gamemahi. There is also one precative form: 3. sing. videsta (AV.) 'may she find'.

## a- Aorist Imperative.

512. This mood is also of rare occurrence and is restricted to the active, excepting two middle plural forms.

Active. Sing. 2. kara<sup>5</sup> (RV<sup>1</sup>.), bhuja (TS. IV. 5. I<sup>4</sup>), muca, ruha (AV.),

sada, sána<sup>6</sup>, sára. — 3. sadatu.

Du. 2. aratam, karatam? (RV1.), khyatam, ruhátam, vidatam, sádatam. 3. aratām, karatām<sup>8</sup>, sadatām.

Pl. 2. khyáta, sadata; sadatana. — 3. sadantu.

Middle. Pl. 2. mucadhvam. — 3. sadantām (AV.).

## a- Aorist Participle.

a. There are hardly more than a dozen certain examples of the participle of this agrist.

Active. tṛpánt-, dhṛṣánt-, riṣant- or riṣant-9, vṛdhánt-, śiṣánt- (śās- 'order'). śucánt-, sádant-10, sánant-10; and as first member of compounds: kṛtánt-, guhánt-, vidánt-11.

Middle. guhámāna-, dhṛṣámāṇa-, nṛtámāna-, śucámāna-; possibly also dásamāna-12. Probably three participles in -āna are to be regarded as belonging to this agrist: dhṛṣāṇá- (AV.), vṛdhāná-, sridhāná-.

#### 2. Reduplicated Aorist.

Delbrück, Verbum 143 f. - Avery, Verb-Inflection 266-268. - Whitney, Sanskrit Grammar 856-873; Roots 224; Atharvaveda, Index Verborum 380. — v. Negelein, Zur Sprachgeschichte 68 f.

513. This type of agrist is formed from nearly 90 verbs in the Samhitas. Though it has come to be associated with the secondary conjugation in -áya (causative), it is not in form (with a few slight exceptions) connected with that stem, being made directly from the root. It is, however, in sense connected with the causative, inasmuch as it has a causative meaning when the corresponding verb in -aya has that meaning. As an augmented reduplicated form, it has affinities with the imperfect of the reduplicating present class and with the pluperfect. It may, however, be distinguished from the imperfect by the long reduplicative vowel, by the thematic  $-\alpha$ - which nearly always appears in the stem, and often by the meaning; and from the

I Emendation in AV. XIX. 42 for vide yám; see WHITNEY's note.

<sup>&</sup>lt;sup>2</sup> A probable conjecture for yame in AV. XVIII. 23.

v. Negelein 34.

<sup>4</sup> With loss of the radical nasal, from

<sup>5</sup> A transfer from the root agrist (otherwise kṛdhi). AVERY 243 adds gama(?).

<sup>6</sup> With accent on the root instead of the second syllable; always sánā: cp. RPr. vII. 14, 19, 33.

<sup>7</sup> A transfer form from the root agrist (otherwise krtám).

<sup>8</sup> A transfer form from the root aorist. 9 Once with the short, six times with the

<sup>3</sup> From sā- 'gain', as if sa- (sa-īt). Cp. long vowel in the Samhitā text (Pp. always I): see APr. 583, 584, 588.

<sup>10</sup> With accent on the root as also risantand risant ..

II In krtád-vasu- 'disclosing wealth', guhádavadya- 'concealing faults', vidád-vasu- 'winning wealth'.

<sup>12</sup> As occurring beside the a- aorist injunctive form dasat (510).

pluperfect by difference of reduplication when the root contains a or r, and

often by meaning.

a. The characteristic feature of this aorist is the almost invariable quantitative sequence of a long reduplicative and a short radical vowel (\_o). The vowels  $\tilde{a}$ ,  $\tilde{r}$ ,  $l^{\tau}$ , as well as  $\tilde{i}$ , are reduplicated with  $i^2$ , which (unless it becomes long by position) is lengthened if the radical vowel is (or is made) prosodically short; e.g.  $\hat{a}$ - $\hat{r}$ -

In order to bring about this trochaic rhythm, the radical vowel has to be shortened or the nasal dropped in the roots  $v\bar{a}s'$ - 'bellow',  $s\bar{a}dh$ - 'succeed',  $h\bar{u}i$ - 'be hostile', krand- 'cry out', jambh- 'crush', randh- 'subject', syand- 'flow', srans- 'fall'; e. g.  $av\bar{v}as'at$ , acikradat. In  $j\bar{v}hvaratam$  (TS.) the reduplicative

vowel, being already long by position, is unnecessarily lengthened.

r. In a few forms the reduplicative vowel is, contrary to the prevailing rhythmic rule, left short: jigṛtám and jigṛtá (beside ájīgar); didhṛtam and ririsas (beside ririsas). On the other hand, in the isolated injunctive form didīpas³, the radical vowel remains long, and in ámīmet both the reduplicative and the radical syllable are long (beside mīmayat with the regular rhythm).

2. The p of the causative stems  $j\bar{n}\bar{a}$ -paya-,  $sth\bar{a}$ -paya-,  $h\bar{a}$ -paya- ar-paya- (r-'go'), is retained in the aorist, the radical vowel being at the same time reduced to i in the first three:  $a/(\bar{n}) + TS$ , atisthipat,  $j\bar{t}hipas$ ; the s of the causative stem  $bh\bar{t}saya$ - is also retained:

bībhis as (TS.).

3. The root dyut-'shine', reduplicates with i: adidyutat<sup>†</sup>. In the agrist formed from the causative stem arpaya-, the reduplicative i appears after, instead of before, the radical vowel, doubtless owing to the difficulty caused by the initial a and the augment:  $arp \cdot i \cdot p \cdot am$  (AV.). The initial a also led to the anomaly of reduplicating the whole of

the root am 'injure', and then prefixing the augment: am-am-at.

4. There are three anomalous agrists formed from naś- 'be lost', fat- 'fall', and vac- 'speak', in which besides an irregular reduplicative vowel, the radical a is syncopated (a-pap-t-at, á-ne-ś-an) or contracted (á-voc-at). As beside the former two the regular reduplicated agrists apppated and animasat occur, and as all three have the regular reduplicative vowel a of the perfect 5, they appear to have been originally pluperfects which before being shortened had the form of \*á-papat-at6, \*á-nanaś-at, \*á-vavac-at7. But they all came to be regarded as agrists. This is undoubted in the case of ávocat owing to its numerous mood forms; ápapt.t, moreover, has an imperative form beside it; and áneśan (TS VS.) has a distinctly agristic meaning.

- b. The reduplicated agrist in the great majority of forms makes its stems with a thematic -a-. Before this, a final r regularly, and  $\bar{\iota}$  and u in two or three forms, take Guna; e. g.  $ad\bar{\iota}dhar$ -a-t (Vdlr),  $b\bar{\iota}bhay$ -a-t  $(Vbh\bar{\iota})$ , cucyav-a-t (Vcyu),  $dudr\dot{\iota}v$ -a-t (Vdru). The inflexion of this agrist stem is like that of an imperfect of the a- conjugation.
- c. About a dozen roots, however, have occasional forms from stems made without thematic -a-, the inflexion then being like that of an imperfect of the reduplicating class. These roots are  $m\bar{a}$  'bellow'; sri- 'resort'; tu- 'be strong', dru- 'run',  $dh\bar{u}$  'shake', nu- 'praise',  $p\bar{u}$  'cleanse', yu- 'separate',

<sup>2</sup> In the reduplicating present class F is almost invariably, and a predominantly, re-

duplicated with i (457).

4 See 514, note 1.

In Valp., the only root in which it occurs.

<sup>3</sup> In form this might be a pluperfect. A similar reversal of the ordinary rhythm appears in the three forms átatamsatam (I. 120<sup>7</sup>), adadhāvat (IX. 877), vavákṣat (SV. I. 1, 2, 2, 3 var. lect. for vavákṣa of KV. X. 115<sup>1</sup>) each occurring once, but owing to the reduplicative vowel they should rather be accounted pluperfects. Cp. p. 364, note <sup>15</sup>.

<sup>5</sup> That is, nest for nanast, on the analogy of sed for \*sazd in the perfect: this form of contraction would be unique in an original aorist.

<sup>&</sup>lt;sup>6</sup> Like a-sasvaj-at; becoming a-papt-at like a-cakr-at beside cakar-am.

<sup>7</sup> The cause of the anomalous contraction may be due to the awkwardness of combining the augment with the reduced reduplicative syllable u- of the perfect (\*a-vvac-at). The accentuation of the augment would also favour the second syllable taking Samprasāraṇa: á-va-uc-at.

sū- 'generate', sru- 'flow'; gr- 'waken', dhr- 'hold'; svap- 'sleep'; e.g. asisret (TS.), ádudro-t, ájīgar, sísvap. Beside forms made thus, occur others made from several of these roots with the thematic -a-; and those made from the roots ending in  $\tilde{z}$  (the majority), cannot be distinguished in form from pluperfects. The number of forms of this type which can with certainty be classed as agrists is therefore very small.

d. Besides the indicative all the moods are represented in this agrist. but no participial form has been found.

# Reduplicated Aorist Indicative.

514. The forms actually occurring would, if made from jan 'beget' with thematic  $-\alpha$ , be the following:

Active. Sing. 1. ájījanam. 2. ájījanas. 3. ájījanat. — Du. 2. ajījanatam. — Pl. 1. ájījanāma. 2. ájījanata. 3. ájījanan.

Middle. Sing. 3. ájījanata. — Pl. 2. ájījanadhvam. 3. ájījananta.

The forms actually occurring (including those made without thematic-a-) are: Active. Sing. 1. acīkṛṣam, ajīgamam (TS. VS. AV.), ajījabham (AV.), atisthipam (AV.), adūdusam (AV.), anīnasam, apīparam (pr- 'pass', AV.), ámīmadam (AV.), avocam, áśīśamam (śam- 'be quiet', AV.); arpipam (AV.),

2. acikradas, ájījanas, átisthipas, átītaras (AV.), atītrpas (AV.), anīnasas ('be lost', AV.), apīparas (AV.), abūbhuvas (AV.), ámīmadas (AV.), arūrupas (AV.), ávīvṛdhas (AV.), áśīśamas (AV.); jihvaras (AV.), didyutas i, rūrupas (AV.), sūsucas (TS. IV. 1. 43), sisvapas. — Without thematic -a-: tūtos²,

susros; ajīgar³ (gr- 'swallow'), ájīgar (gr- 'waken'); dīdhar, sisvap.

3. acikradat, acīklpat (AV.), acīcarat (AV.), ácukrudhat, acucyavat (K.), ajijnipat (TS.II.I.II<sup>3</sup>), ájījanat, ájīhiḍat (AV.), átiṣthipat, ádidyutat<sup>1</sup>, adīdharat, adūdusat, ánīnašat, ápaptat and ápīpatat, abūbudhat, amūmuhat (AV.), árīramat, árūrucat, avīvasat ('has bellowed', √vās-), avīvipat, avīvṛtat, ávīvṛdhat, ávocat, aśiśriyat 5 (AV.), áśiśvitat, áśīśamat (AV.), asisyadat (V syand-); āmamat (Vam-); jíjanat, didyutat (VS. XXXVIII. 22), dīdharat, dudrávat, néśat<sup>6</sup>, bībhayat, vavṛtat, vócat, śiśnáthat. — Without thematic -a-: ádudrot, únūnot, ápupot. ámīmet<sup>7</sup> (mā-'bellow'), áśiśret<sup>8</sup>, asusot ( $\sqrt{s\bar{u}}$ -, MS.), ásusrot (VS. XVIII. 58; TS. v. 7. 71); tūtot, dūdhot (dhū- 'shake'); ájīgar (gṛ- 'waken'), aśiśnat (V śnath-); dīdhar. — Du. 2. árūrujatam (Kh. 1. 510).

Pl. 1. átītrpāma (VS. VII. 29), atītrṣāma, apaptāma (Kh. III. 19), apīpadāma (AV.),  $\dot{a}v\bar{v}rt\bar{a}ma$  (AV.),  $\dot{a}voc\bar{a}ma$ .

2. ájījapata 9 (VS. IX. 12), arūrucata (VS. XXXVII. 15).

3. ácikradan, ájíjanan, atitrasan (AV.), adīdharan (AV.), anīnaśan (AV.), ánešan (VS. xvi. 10; TS. iv. 5. 14),), apaptan, apīparan (pṛ- 'cross'), ámīmṛṇan (AV.), ávīvatan, avīvaran (AV.), avīvasan (vāś- 'bellow'), avīvipan, ávīvrdhan, ávocan, ásīsaman (AV.), ásūsubhan, asisrasan (Vsrams-, AV.), asīsadan (Vsad-, VS. XII. 54; TS. IV. 2. 44); jījanan, paptan.

3 Occurring only in RV. 1.  $163^7 = VS$ . XXIX. 18 = TS. IV. 6.  $7^3$ .

4 WHITNEY 866 (Mantra?).

pronunciation of the y (diut-) as in the perfect: see 482 a 1.

<sup>&</sup>lt;sup>2</sup> Classed by WHITNEY, Sanskrit Grammar 868 a, as an aorist, but Roots 63, as pluperfect; similarly tūtot below.

<sup>5</sup> This form occurs only once (AV. VI. 313), as a variant for dhīyate in RV. x. 1893 ji- 'conquer'.

Reduplicated with i owing to the vocalic | (= SV.) and for sisriye in TS. I. 5. 31. See WHITNEY'S note on AV. VI. 313.

<sup>6</sup> This form occurs once in the RV. (VI. 117) as a past tense (along with three other unaugmented forms: rocata, arta, tisthat) and twice as an injunctive. BARTHOLOMAE, KZ. 27, 360, note 1, regards it as a pluperfect.

<sup>7</sup> WHITNEY 868 a; v. NEGELEIN 691.

<sup>8</sup> Occurs TS. 1. 8. 102 with other agrists.

<sup>9</sup> From the causative stem japaya- of

Middle. Sing. 3. ávīvarata (vr- 'cover', AV.; TS. v. 6. 13). — With

ending -i for -ta: atītape.

Pl. 2. ávīvṛdhadhvam. — 3. átītṛpanta (VS. XIX. 36), ábībhayanta, ámīmadanta, ávīvasanta ( $\sqrt{v\bar{a}}$ s-), ávīvṛdhanta, ávocanta, ásiṣyadanta ( $\sqrt{v}$ syand-), ásūṣudanta (TS. I. 8. 10²); jījananta.

# Reduplicated Aorist Subjunctive.

515. This mood is of rare occurrence, only about a dozen forms having been noted. The active is represented in all the persons of the sing. and the r. pl. only; the middle by a single dual form.

Active. Sing. 1. rāradhā, vocā. — 2. tītapāsi (AV.), vocāsi (VS.XXIII.51).

— 3. cīkļpāti, pispṛśati¹, vócati², vocāti, sīṣadhāti³ (√sādh-).

Pl. 1. cukrudhāma, rīramāma, vocāma, sīṣadhāma (√sādh-).

Middle. Du. 1. vocāvahai.

# Reduplicated Aorist Injunctive.

516. Forms of this mood are of common occurrence in the active, in which voice more than fifty have been found; but in the middle only five have been noted.

Active. Sing. 1. cukrudham, jījanam, dīdharam, vocam.

2. cikradas, cikṣipas, jihvaras, jīhipas (caus.  $h\bar{a}$ -paya-), tītṛṣas (TS. III. 2.  $5^3$ ), didīpas, didyutas, didharas, nīnamas, nīnašas, paptas, pispṛśas, pīparas (pṛ-'cross'), bībhiṣas (TS. III. 2.  $5^2$ ), mīmṛṣas, rīradhas, rīriṣas, vīvijas, vocas, siśnathas, siśráthas, sūśucas (AV.), sīṣadhas ( $\sqrt{s\bar{a}dh}$ -).

3. cucyavat, tisthipat, dīdharat, dudravat, dūduṣat, neśat, paptat (AV.), piparat (pr- 'cross', RV'.) and pīpārat (pr- 'cross', RV'. = TS. 1. 6. 123), pīparat (pr- 'fill'), mīmayat4, rīradhat (V randh-), rīriṣat, vocat, śiśrathat, siṣvadat (V svād-). — Without thematic -a-: nūnot (nu- 'praise'), yūyot (yu- 'separate'), susrot.

Du. 2. jihvaratam<sup>5</sup> (VS.v.17) and jīhvaratam<sup>5</sup> (TS.I.2.13<sup>2</sup>), rīradhatam<sup>5</sup>.

Pl. 2.  $r\bar{t}radhata^5$ ,  $r\bar{t}risata^5$  (I.  $89^9 = VS. XXV. 22$ ).

3. cikṣipan (AV.), paptan, rīraman, vocan, śūśucan (VS. xxxv. 8).

Middle. Sing. 1. vice. — 2. bībhisathās6.

Pl. 3. jījananta, vocanta, sīṣapanta (sap- 'serve').

# Reduplicated Aorist Optative.

517. The forms of this mood are rare, numbering altogether (including a precative) not more than a dozen. The majority of these come from vac'speak', and the rest from two other roots, cyu- 'stir' and ris- 'hurt'.

Active. Sing. 1. vocéyam. — 2. ririses, vocés. — 3. vocet (AV.).

Du. 2. vocetam. — Pl. 1. vocéma7. — 3. vocéyur.

Middle. Sing. I. voceya. — Pl. I. cucyuvīmāhi<sup>8</sup>, vocemahi. — 3. cucyavīrata<sup>8</sup>, There is also the precative sing. 3. rīriṣ-ī-ṣ-ṭa<sup>9</sup> (VI. 51<sup>7</sup>) or ririṣ-ī-ṣ-ṭa (VIII. 18<sup>13</sup>).

<sup>2</sup> Like an indicative present in form.

4 This form seems to have an injunctive sense in RV. x. 27<sup>22</sup>, its only occurrence.

As if from an indicative 3. sing. \*apisprk.

<sup>3</sup> These forms refute the statement of HIRT, IF. 12, 214 f., that the reduplicated, as well as the root and a- aorist, has no subjunctive, but only injunctive forms. Cp. 502,509.

<sup>5</sup> Reckoned here an injunctive form (not imperative) because accompanied by mā: cp. Delbrück, Altindische Syntax p. 3611.

<sup>6</sup> Formed from the causative stem bhīṣáyaof bhī- 'fear'.

<sup>7</sup> This form occurs six times in the RV., three times unaccented and three times accented vocéma. AVERY 268 wrongly states vocéma to occur five times and vócema (sic) once.

<sup>8</sup> Without thematic -a-.

<sup>9</sup> In the Pada text ririsīsta.

## Reduplicated Aorist Imperative.

518. Forms of this mood are rare, numbering hardly more than a dozen. They occur in the active only.

Active. Sing. 2. vocatāt. — 3. vocatu. — Du. 2. jigrtám (gr. 'waken'), didhṛtam, vocatam. — Pl. 2. jigṛtá, didhṛtá, paptata (1.881), vocata, susūdáta (AV. I. 264)2. — 3. pūpurantu (pr. 'fill'), siśrathantu.

#### 3. Sigmatic Aorist.

510. The general tense sign of this agrist is an s added to the root. This s in the vast majority of verbs (more than 200) comes immediately before the endings. When such is the case, the stem may be formed in three different ways: the s being added I. direct to the root, e. g. a-jai-s-am (ii- 'conquer'); 2. with a connecting -i-, e. g. a-kram-i-s-am (kram- 'stride'); 3. with an additional s- prefixed to the connecting -i-, e. g. a-yā-s-i-s-am (yā-'go'). The inflexion of these three varieties (A) follows that of the graded conjugation. In a small number of verbs the stem is formed by adding -s extended with a thematic a; e.g. á-ruk-sa-t (ruh- 'mount'). The inflexion of this fourth form (B) of the sigmatic agrist is like that of an imperfect of the a- conjugation.

Of the four varieties of the sigmatic aorist, the first two, the s- aorist and the is- aorist, are very common, each being formed by nearly 100 roots. The other two are rare, the sis- aorist being made from only six, and the sa- agrist from only nine roots.

## A. r. The s- aorist.

Delbrück, Verbum 177-179. - Avery. Verb-Inflection 257-259. - Whitney, Sanskrit Grammar 878-897; Roots 225-226; Atharvaveda, Index Verborum 380. v. NEGELEIN, Zur Sprachgeschichte 83-84.

520. In this form of the sigmatic agrist, the radical vowel as a rule takes Vrddhi (a being lengthened) in the active. In the middle, on the other hand, excepting final i and u (which take Guna), the radical vowel remains unchanged. Thus in the active there occur the forms 1. sing. a-jai-sam (V ji-), a-bh $\bar{a}$ r-sam (V bhr-), 3. sing. a-raik (V ric-), 3. pl. a-cch $\bar{a}$ nt-sur (Vchand-); while in the middle we find 1. sing. a-vit-si (Vvid-), á-bhut-si (Vbudh-), a-srk-si (Vsrj-), a-nū-si (nū-'praise'), beside forms with Guna from roots ending in  $\tilde{i}$  or u such as 3. pl. a-he-s-ata ( $\sqrt{hi}$ -), a-ne-s-ata ( $\sqrt{n\bar{i}}$ -), 1. sing.  $\alpha$ -sto-si ( $\sqrt{stu}$ -).

a. There are, however, some irregularities. I. In a few active injunctive forms Guna appears instead of Vrddhi, e.g. sing. 2. je-s (V/i-), pl. 1. jé-sma. — 2. In two or three middle forms of sah- 'overcome', the  $\alpha$  is lengthened, e.g. sing. 1.  $s\bar{a}k$ - $si^3$ . — 3. The root is shortened in a few middle forms; thus the  $\bar{a}$  of  $d\bar{a}$ - 'cut', is reduced to i in sing. I. opt. di-s-zya, and the nasal of gam- 'go' and man- 'think' is dropped in the forms a-ga-smahi and ma-sīya. — 4. After a consonant other than n m r, the tense sign s is dropped before t, th, and dh; thus á-bhak-ta beside á-bhak-s-i (Vbhaj-); pat-thās (AV.) beside pat-s-i (Vpad-, AV.); á-sto-dhvam (Vstu-), where the s on becoming a cerebralized the following dental before disappearing (\*á-stv-z-dhvam).

In addition to the indicative, all the moods of this form of the agrist occur. There is also a participle, but it is rare.

I An imperative form like this justifies | 188), though the reduplicative vowel is the classification of apaptat etc. as an actual | short. Cp. p. 362, note 9. aorist, apart from its possible origin as a pluperfect.

to class this form here (cp. WHITNEY, Sanskrit | takes Guna only. Grammar 871) than as a transfer form of the perfect imperative from Vsud- (Roots ending -dhvam.

<sup>3</sup> Also in the active subjunctive form sākṣāma, where the a would normally remain <sup>2</sup> Pada text susudáta. It is perhaps better short, as the radical vowel in this mood

<sup>4</sup> The only example in this agrist of the

#### Indicative.

521. The only point in which the inflexion differs from that of the imperfect of the graded conjugation is that the 3. pl. active invariably ends in -ur.

a. The following peculiarities and irregularities are moreover to be noted. 1. In the active. in the RV. the endings -s and -t of the 2.3. sing. disappear, and the tense sign also, unless the root ends in a vowel; e.g.  $a \cdot h \bar{n}r$  (AV.), 3. sing. from  $\sqrt{hr}$ , = \* $a \cdot h \bar{n}r$ -s-t, but  $a \cdot h \bar{a}$ -s, 3. sing. from  $h \bar{a}$ - 'leave' = \* $a \cdot h \bar{a}$ -s-t. The AV. and TS., however, less often than not, insert a connecting -i- before these endings, thus preserving both the latter and the s of the tense stem; e. g. a-naik-ṣ-ī-t (Vnij-, AV.), a-tāṃ-ṣ-ī-t (Vtan-, TS.). In four forms in which the -ī- is not inserted, the -s and -t, as distinctive of the 2. and 3. persons, abnormally take the place of the -s of the stem or the final consonant of the root: a-śrai-t (AV.) for \*a-śrai-s-t (Vśri-); d-hai-t (AV.) for \*a-hai-s-t (Vhi-); a-vā-t (AV. VIII. 121) for \*a-vā-s-t² (vas- 'shine'); 2. sing. srā-s (AV.) for \*srāj-s-s-s³ (Vṣrj-). The RV. also has a yā-s for \*a-yāj-s-s (yaj-'sacrifice') beside the phonetically regular form in the 3. sing. a-yāt for \*a-yāj-s-t. — 2. In the middle nine first and one or two third persons singular appear in which the stem is made with the addition of -s, but which have both the ending and the meaning of the present; and the -s is added to a present stem and not to the agrist form of the root. Thus formed are from a present stem of I, the a- class: arca-s-e 'I praise', yaja-s-e 'I worship' (VIII. 251); 2. the á- class, nasalized:  $r\tilde{n}/a$ -s-e<sup>4</sup> 'I strive after'; 3. the ya- class:  $g\tilde{a}y$ -i-se<sup>5</sup> 'I sing'; 4. the  $n\tilde{a}$ - class:  $grn\tilde{\iota}$ -s-e<sup>6</sup> I praise'; punī-s-é I purify'; 5. the root class: kr-s-e I make', hi-s-e I impel', stu-s-é? "I praise's; 6. the intensive: cárkṛ-ṣ-e which (like stuṣć 9 in I. 1227) is a 3. sing. with a passive sense: 'is praised'.

522. The forms of the indicative actually occurring would, if made from bhr- 'bear' in the active and stu- 'praise' in the middle, be as follows:

Active. Sing. 1. ábhārṣam. 2. ábhār, abhārṣīs (AV.). 3. ábhār; abhārṣīt (AV.TS.). — Du. 2. ábhārṣṭam. 3. abhārṣṭām. — Pl. 1. ábhārṣma. 2. ábhārṣṭa. 3. ábharsur.

Middle. Sing. 1. ástosi. 2. ástosthās. 3. ástosta. — Du. 3. ástosātām. — Pl. 1. ástosmahi. 2. ástodhvam. 3. ástosata.

The forms which actually occur are the following:

Active. Sing.1. akūrṣam (AV.), ajaiṣam (V ji-), aprākṣam (V prach-, AV.), abhārṣam, áyāṃsam (Vyam-), ayāsam, áspārṣam (spr-'win'), áhārṣam (Vhr-).

- 2.  $akr\bar{a}n$  ( $\sqrt{krand}$ -),  $agh\bar{a}s^{10}$  ( $\sqrt{ghas}$ -, AV. XX. 129<sup>16</sup>),  $dh\bar{a}s$  ( $h\bar{a}$  'leave', AV. II. 107). — With irregular -s:  $ay\bar{a}s$  ( $\sqrt{yaj}$ -),  $sr\bar{a}s$  ( $\sqrt{srj}$ -, AV.). — With connecting -i-: arātsīs (rādh-'succeed', AV.), avātsīs II (vas-'dwell', AV.); bhaists (AV.).
- 3. With loss of the ending -t:  $ajais^{12}$  (Vji-),  $apr\bar{a}s$  ( $Vpr\bar{a}$ -),  $ah\bar{a}s$  ( $h\bar{a}$ -'leave'). — With loss of both tense sign and ending: ákrān<sup>13</sup> (1/krand-), ákṣār (V kṣar-), acait (V cit-), acchān (V chand-), atān (V tan-), atsār (V tsar-), ádyaut (V dyut-), adhāk (V dah-), aprāk (prc- 'mix', AV.), aprāt (V prach-),  $abh\bar{a}r$ ,  $ay\bar{a}t$  (Vyaj-),  $\acute{a}y\bar{a}n$  (Vyam-),  $araut^{14}$  (Vrudh-, AV.),  $\acute{a}v\bar{a}t$  (Vvah-),  $av\bar{a}t^{15}$  (vas- 'shine', AV.), asvait ( $\sqrt{s}vit$ -), asyān ( $\sqrt{s}yand$ -), ásrāk ( $\sqrt{s}rj$ -), ásvār ( $\sqrt{svar}$ ), ahār ( $\sqrt{hr}$ -, AV.); áraik ( $\sqrt{ric}$ -); dyaut, vāṭ ( $\sqrt{vah}$ -). —

<sup>1</sup> and the Kāthaka, WHITNEY S88.

the final s of the root, the form possibly standing for \*a-vāt-s-t; see above 44 a 2, and Whitney, Sanskrit Grammar 167.

<sup>3</sup> The phonetically regular form would be \*srāk. Cp. p. 61 (middle).

<sup>4</sup> Also the participle rñjas-āná.

<sup>5</sup> From gaya-, with -i- for -a-.

<sup>6</sup> From the weak stem.

<sup>7</sup> These three forms seem to represent the transition of agrist stems to employment as present stems.

<sup>8</sup> The form stusé is frequent as a I. sing.;

in one passage (I. 1227), however, it appears 2 In avat the t may, however, represent to be a 3. sing. with a passive sense: 'is praised'.

<sup>9</sup> On stusé in general, see OLDENBERG, ZDMG. 59, 355 ff., Neisser, BB. 30, 315-325. 10 Cp. above 499, ághas sing. 2. 3.

II Cp. v. Negelein 83, note 5; above 44, a I.

<sup>12</sup> For \*ajais-t.

<sup>13</sup> For \*ákrānd-s-t.

<sup>14</sup> For \*araudh-s.t.

<sup>15</sup> Cp. avāt-s-ī-s (AV.) from vas- 'dwell'. Cp. note 2 and p. 36 (top).

With irregular -t: aśrait (Vśri-, AV.), áhait (Vhi-, AV.). — With connecting -ī-: atāṃsīt (Vtan-, TS. IV. 7. 135; VS. XV. 53), anaiksīt (Vnij-, AV.); rautsīt (1/rudh-, Kh. IV. 75).

Du. 2. ásrāṣṭam¹ (√sṛj-, AV.). — 3. abhārṣṭām (VS.xxvIII. 17), asvārṣṭām

(V svar-).

Pl. I. ájaisma, ábhaisma. — 2. ácchānta² (V chand-), anaista (TS. v. 7. 24). — 3. ácchāntsur, ábhaisur, amatsur (V mad-), ayāsur, ávākṣur (V vah-, AV.)3.

Middle. Sing. I. ádikṣi ( $\sqrt{di}$ s-), ádiṣi+ ( $d\bar{u}$ - 'give', AV.), anūṣi ( $\sqrt{n\bar{u}}$ -), ábhaksi (V bhaj-), ábhutsi (V budh-), ámāsi (mā- 'measure', AV.), ámuksi (V muc-, AV.), avitsi (vid- 'find'), asāksi (V sah-), asrksi, astosi; mamsi (V man-), vrksi6 (V vrj-, AV.), saksi5.

2.  $\acute{a}j\tilde{n}\bar{a}sth\bar{a}s$  (AV.),  $\acute{a}tapth\bar{a}s^{\gamma}$  (AV.IX.  $5^{6}$ ),  $aprkth\bar{a}s$  ( $\sqrt{prc}$ , AV.),  $\acute{a}mukth\bar{a}s$ 

( $\sqrt{muc}$ -, AV.).

3. aprkta (Vprc-), ábhakta (Vbhaj-), ámamsta (VS. v. 40), amatta (V mad), ayansta (V yam), ayasta (V yaj), áransta (V ram), árabdha (Vrabh-), asakta (Vsaj-), ásrsta (Vsrj-), astosta.

Du. 3. anūsātām, amamsātām (VS. XXXVIII. 13), áyuksātām (Vyuj-).

Pl. I. agasmahi<sup>8</sup> (Vgam-), aprksmahi (Vprc-, AV.), abhutsmahi (Vbudh-), áviksmahi (Vviš-), asrksmahi (Vsrj-, TS. 1. 4. 453; VS. XX. 22).

2. ástodhvam (for \*á-stos-dhvam from stu- 'praise').

3. akramsata (AV.), ádrksata (V drs-), údhuksata (V duh-), ádhūrsata (dhvr- 'injure'), adhūṣata, ánūṣata, aneṣata ( $\sqrt{n\bar{\iota}}$ -), ábhutsata ( $\sqrt{budh}$ -), amamsata (Vman-), amatsata (Vmad-), ayamsata (Vyam-), ayuksata (Vyuj-), aramsata (AV.), árāsata, alipsata, ávikṣata (Vviś-), avṛṭsata (Vvṛṭ-), avṛṣata (vr- 'choose', AV. III. 35), asaksata (sac- 'accompany'), asrksata (V srj-), astosata, ahāsata, ahūsata (hū- 'call'), ahṛṣata (V hṛ-), aheṣata (V hi-).

# s- Aorist Subjunctive.

523. This mood is quite common in the RV., but decidedly less so in the other Samhitas. Its forms are, however, frequent only in the active, in which all persons are represented except the 1. du. The middle is much less common, about 20 forms occurring altogether; only one of these is found in the dual, and two in the plural. The root regularly takes Guna throughout before the tense sign 10, in the middle as well as the active. The primary endings are frequent, being used almost exclusively in the du. and the 2. pl.

In the middle 3. sing. and pl. the exceptional ending -tai occurs in two

forms in later Samhitas (AV. TS.).

Active. Sing. 1. stoṣāṇi. — 2. darṣasi (dṛ- 'split'); jeṣas (Vji-), vákṣas (Vvah-). — 3. neṣati (Vnī-(, parṣati (pṛ- 'take across'), pāsati ('protect'), matsati (V mad-), yosati (yu- 'separate'), vakṣati (V vah-), saksati (Vsah-, AV.); ákṣat (aś- 'attain', X. 117), kṣeṣat (kṣi- 'dwell'), chantsat (V chand-), jésat (V ji-), dársat (dr- 'split'), dāsat (dā- 'give'), drāsat

2 For \*acchānt-s-ta.

5 With anomalous long vowel.

6 See WHITNEY's note on AV. VI. 302.

7 For \*á-tap-s-thās.

8 With loss of the radical nasal (a taking the place of the sonant nasal).

9 With interchange of the radical vowel and semivowel: see 50, b.

The a of sah is lengthened in the forms

11 Excepting only the 3. du. act. yakṣatām.

Emendation for asrastram of the Mss., AV. IV. 284; see WHITNEY's note.

<sup>3</sup> AVERY 257 adds the form aveşan, which occurs twice in the RV., regarding it doubtless as an s- agrist of  $\sqrt{v\bar{i}}$ . It would as such have the double anomaly of absence of Vrddhi and the ending -an. It is probably 3. pl. impf. of Vvis- in both passages (1.1702; X. 1141). GRASSMANN in X. 1141 regards it sakṣāma and sākṣate. as a rist of \nu \vi-.

<sup>4</sup> Cp. v. Negelein 834.

(drā- 'run'), naksat (naś- 'reach'), nésat ( $\sqrt{n\bar{\imath}}$ -), pákṣat ( $\sqrt{pac}$ -), pársat ('take across'), présat (V prī-), bhakṣat (V bhaj-), bharṣat (V bhṛ-), mátsat (V mad-). vámsat (Vyam-), váksat (Vyaj-), vāsat, vósat (yu- 'separate'), rásat, vámsat ( $\sqrt{van}$ -),  $v\acute{a}ksat$  ( $\sqrt{vah}$ -), valsat (Kh. v.  $15^{16}$ ),  $v\acute{e}sat^1$  ( $\sqrt{v\bar{\iota}}$ -)<sup>2</sup>, saksat (sac-'accompany' and sah- 'overcome'), satsat (Vsad-), sarsat (Vsr-, AV.). stosat, sraksat (Vsrj-, VS. XXI. 46).

Du. 2. dásathas, dhāsathas, párṣathas (pṛ- 'take across'), váksathas

 $(\sqrt{vah}, AV.), varsathas (vr. 'cover').$ 

3.  $p\bar{a}satas$  ('protect'), yaṃsatas ( $\sqrt{yam}$ -), yakṣatas ( $\sqrt{yaj}$ -), yosatas ( $\sqrt{ya}$ 'separate', AV.), vakṣatas ( $\sqrt{vah}$ -). — With  $-t\bar{a}m$ :  $\sqrt{vah}$ -).

Pl. 1.  $j\acute{c}$ sāma (Vji-),  $v\acute{a}$ msāma (Vvan-),  $s\acute{a}$ kṣāma  $^5$  (Vsah-), stosāma.— 2. dhāsatha, nesatha, pársatha ('take across'), mátsatha. — 3. parsan ('take

across'), yamsan ( $\sqrt{yam}$ -),  $r\dot{a}san$ ,  $v\dot{a}ksan$ ,  $\dot{s}\dot{e}san$  ( $\dot{s}\bar{\iota}$ - 'lie').

Middle. Sing. 1. namsai, mámsai (V man-). — 2. dýksase<sup>6</sup>, prksase<sup>6</sup> (Vprc-), mansase (Vman-). — 3. kransate, trāsate, darsate (dr- 'split'), mámsate (V man-), yamsate (V yam-), yaksate (V yaj-), rāsate, vamsate (V van-), sākṣate<sup>5</sup> ( V sah-)<sup>7</sup>. — With ending -tai: māsātai (AV.).

Du. 2. trásāthe (for \*trásaithe). — Pl. 3. námsante (V nam-), mámsante (Vman-). — With ending -tai: mamsatai 8 (TS. VII. 4. 151).

### s- Aorist Injunctive.

524. Injunctive forms are of fairly common occurrence, especially after mā. Judged by the extremely few accented forms occurring, the accent was on the radical syllable. All the forms occurring in the 1. sing, act, are irregular in one way or another: nearly all of them take Guna instead of Vrddhi, while vūsam (AV.) only lengthens the radical vowel (yu- 'separate'). Three first persons from roots in -ā substitute e9 for that vowel, as yeşam from yā-'go'; the same substitution takes place in the 1. pl. gesma (AV.), desma (VS.), and 3. pl. sthesur (AV.).

Active. Sing. I. jeşam 10 ( $\sqrt{ji}$ -, VS. IX. 13 etc.), yūşam (yu- 'separate', AV.), stosam 10; from roots ending in -ā: geşam (gā- 'go', VS. v. 5), yeşam (yā- 'go'), sthesam 9 (sthā- 'stand', VS. II. 8).

2. jes 10; bhāk (V bhaj-), yāt (V yaj-), yaus (yu- 'separate'), hvār (V hvar-, VS. I. 2). — With connecting -ī-: hāsīs (Kh. IV. 85; AA. II. 7).

3.  $dh\bar{a}k$  ( $\sqrt{dah}$ -),  $bh\bar{a}k$  ( $\sqrt{bhaj}$ -),  $bh\bar{a}r$  ( $\sqrt{bhr}$ -), mauk ( $\sqrt{muc}$ -, VS. I. 25),hās 11 (hā- 'leave'). — With connecting -ī-: tāpsīt (VS. XIII. 30), vākṣīt (Vvah-, AV.), hāsīt (TS. VII. 3. 131; AV.), hvārṣīt (Vhvar-, VS. 1. 2).

Du. 2. tāptam (Vtap-, VS. v. 33), yaustam (yu-'separate'), srāstam  $(\sqrt{srj}, AV).$ 

As appearing in immediate juxtaposition with presat (1. 1806), this form appears to be an agrist subjunctive of vi-, not a present injunctive of Vvis- (vėsati).

<sup>2</sup> AVERY 258 gives *śiṣat*, among these forms, as occurring once. He doubtless means ni-sisat (IV. 27) which occurs beside the subjunctives bharat and udirat. But it cannot be an s- aorist (which would be siksat). WHITNEY, Roots, takes it as an aaorist of sis- 'leave', GRASSMANN, Wörterbuch 1392, as an agrist of sas. Cp. above 510.

6 Weak radical vowel instead of Guna.

<sup>3</sup> In 1. 12910 ('accompany').

<sup>4</sup> In v. 306 ('conquer').

<sup>5</sup> With lengthened radical vowel.

<sup>7</sup> AVERY 258 adds hāsate, also WHITNEY, Grammar 893 a; but this form is doubtless a 3. sing. mid. pres. of has- 'hasten', a secondary form of ha- 'leave' according to the aclass; also hāsante (AV. IV. 365). Cp. p. 321,

<sup>8</sup> See Weber's ed. of the TS., p. 310, 15,

<sup>9</sup> Made perhaps from an i- form of roots ending in -ā. Cp. WHITNEY, Grammar 894 c. 10 Formed perhaps under the influence of

the subjunctives jésat and stosat.

<sup>11</sup> Unnecessarily regarded by Delbrück, Verbum p. 60 (80) as from hr- 'take'.

Pl. I. yauşma (yu- 'separate', VS.IV. 22). — With Guṇa only: geṣma ¹ (gā- 'go', AV.), jeṣma ( $\sqrt{ji}$ -), deṣma¹ (dā- 'give', VS. II. 32). — 2. naiṣṭa ( $\sqrt{ni}$ -), yauṣṭa ( $\sqrt{yu}$ - 'separate', AV.), śāpṭa² (TS. III. 3. 9¹). — 3. jaiṣur ( $\sqrt{ji}$ -, AV.), dhāsur, yauṣur (yu- 'separate'), stheṣur¹ (AV. XVI. 4²), hāsur.

Middle. Sing. I. gāsi (gā-'sing'), nikṣi (Vnij-, AV.), patsi (Vpad-, AV.), bhakṣi (Vbhaj-, VII. 41²), meṣi (mī-'diminish', AV.), yamsi (Vyam-), yakṣi

(Vvaj-), vámsi (Vvan-), vrksi (Vvrj-).

2. cyoṣṭhās (V cyu-), chitthās (V chid-, AV.), patthās (V pad-, AV.), bhitthās (TS. IV. I. 9²), maṃsthās (V man-, AV.; VS. XIII. 4I), meṣṭhās (V mī-, AV.), raṃsthās (V ram-, AV.), hāsthās (hā- 'go forth', AV.).

3. kṣeṣṭa (kṣi- 'destroy', AV.), neṣṭa (Vn̄-, AV.), pāṣṭa (pā- 'drink', AV.), maṃṣṭa (Vman-, AV.), māṃṣṭa (Vman-, AV. XI. 28), meṣṭa (mī- 'fail', AV.),

hāsta (hā- 'be left', AV.).

Du. 2. sṛkṣāthām (V sṛj-, VS. xix. 7).

Pl. I. yutsmahi<sup>3</sup> (V yudh-, AV.), hāsmahi (hā- 'be deprived of').

3. dhukṣata (V duh-),  $n\bar{u}$ ṣata, matsata (V mad-), mukṣata (V muc-), sakṣata (V sac- 'accompany').

## s- Aorist Optative.

525. This mood occurs in the middle only in this form of the signatic aorist. The 2.3. sing. always appears with the precative s excepting the one form bhakṣīta in the SV. (I. I. 2. 4<sup>2</sup>).

Sing. I. diṣīya⁴ (dā-'cut'), bhakṣīyá (V bhaj-), masīya⁵ (V man-), mukṣīya,

 $r\bar{a}s\bar{i}ya$ ,  $s\bar{a}ks\bar{i}ya^6$  ( $\sqrt{sah}$ , AV.),  $strs\bar{i}ya$  ( $\sqrt{str}$ , AV.)

2. maņsīsthās (1 man-). — 3. darsīsta (dr- 'tear'), bhaksīta (SV.), maņsīsta (1 man-), mrksīsta (mrc- 'injure').

Du. 2. trásīthām (for \*trās-īyāthām).

Pl. 1. dhukṣīmáhi (V duh-, TS. 1. 6. 43), bhakṣīmáhi (V bhaj-), maṃsīmáhi (V man-), vaṃsīmáhi and vasīmahi (V van-, IX. 728), sakṣīmáhi (V sac-). — 3. maṃsīrata.

## s- Aorist Imperative.

526. No certain regular forms of the imperative occur in the active. Two or three, such as yaustam, naista, might have been classed here, but as they occur with  $m\dot{a}$  only, they have been placed among the injunctives. There are, however, the two transfer forms in the 2. sing. nesa ( $\sqrt{n\bar{\iota}}$ , AV.) and  $pars\bar{a}$  (pr- 'take across'). The only forms of the imperative occurring in the middle are three made from  $r\bar{a}$ - 'give' and one from sah- 'conquer'.

Middle. Sing. 2. sáksva. — 3. rāsatām. — Du. 2. rāsāthām. — Pl. 3.

rāsantām.

# s- Aorist Participle.

527. Only two or three forms of the active participle are found. These are dákṣant- and dhákṣant- from dah- 'burn', and sákṣant- from sah- 'prevail'. In the middle there are no regular forms. There is one doubtful example in which the stem is extended with -a- and accordingly adds the suffix -māna, as in the a- conjugation: dhī-ṣ-a-māṇa- (dhī- 'think').

There are, besides, a dozen stems irregularly formed by adding s to the root with an intermediate -a-, and taking the regular ending  $-\bar{a}na$ . These forms

<sup>&</sup>lt;sup>1</sup> See p. 380, note 9.

<sup>&</sup>lt;sup>2</sup> For śāp-s-ta.

<sup>3</sup> A somewhat doubtful reading: see WHITNEY's note on AV. VII. 522.

<sup>4</sup> With the radical  $\bar{a}$  weakened to i.

<sup>5</sup> Root weakened by loss of nasal (a taking the place of the sonant nasal).

<sup>6</sup> With irregular lengthening of the radical

vowel.
7 See Whitney, AV. Index Verborum 382.

may be accounted as belonging to the s- agrist. All but two of them occur in the RV. They are: arsasana- 'injuring',  $\delta hasana$ - ( $\sqrt{u}h$ -) 'lying in wait', jrayasāná- (Vjri-) 'far-extending', dhiyasāná- (Vdhī-) 'attending', namasāná-(V nam-) 'rendering homage' (AV.), bhiyásāna- (V bhī-) 'fearing' (AV.), mandasāná-(V mand-) 'rejoicing', yamasāná- (V yam-) 'being driven' (with passive sense), rabhasāná- (V rabh-) 'agile', vrdhasāná- (V zrdh-) 'growing', savasāná- (V sū-) 'strong',  $sahas\bar{a}n\dot{a}$ - ( $\sqrt{sah}$ -) 'mighty'.

# A. 2. The is- Aorist.

Delbrück, Verbum p. 179-180. - Avery, Verb-Inflection 259-261. - Whitney. Sanskrit Grammar 898-910; Roots 226-227; AV. Index Verborum 380. - v. Negelein, Zur Sprachgeschichte 85-86.

528. About 80 roots take this form of the sigmatic agrist in the RV. and about a dozen others in the AV.

The -s is here added to the root with the connecting vowel -i. radical vowel as a general rule takes Guna throughout; but in the active a final vowel takes Vrddhi and a medial -a is sometimes lengthened. No roots with final -ā and few with final -ī take this agrist. The terminations are the same as those of the s-aorist, excepting that the z. and 3. sing. act. end in  $-\overline{c}s$  (= is-s) and  $-\overline{c}t$  (= is-t). Active and middle forms, though frequent, are rarely both made from the same root, occurring thus in about fifteen verbs only. This is the only agrist from which a few forms are made in the secondary conjugation.

Besides the indicative, all the moods are represented in this agrist, but no participial forms have been met with.

#### Indicative.

529. In the active all persons are represented except du. 1. 2. and pl. 2.; but in the middle only sing. 2. and 3. occur besides a single form of sing. 1 (Kh.), du. 3. and pl. 3. (VS.).

a. A few irregularities occur in the formation of this tense?. I. The forms atārima (beside the normal átārişma) and avādiran<sup>3</sup> (AV.), are probably to be regarded as irregular forms with abnormal loss of the agristic -s. — 2. The root grabh- 'seize' takes the connecting vowel 73 (as it does in other verbal forms) instead of -i-, as agrabhīsma. — 3. In the sing. 1. act., the ending -īm appears instead of -isam in the three forms ákramīm, vádhīm, and agrabhīm (TS.), doubtless owing to the analogy of the 2. and 3. sing. -īs and -īt4. — 4. The abnormal ending -ait appears in the 3. sing. in asarait5 (AV.) beside asarīt (AV.)6.

The normal forms occurring, if made from kram- 'stride', would be as follows:

Active. Sing. 1. ákramişam. 2. ákramīs. 3. ákramīt. — Du. 3. ákramistām. — Pl. 1. ákramisma. 3. ákramisur.

Middle. Sing. 1. ákramisi (Kh.). 2. ákramisthās. 3. ákramista. — Du. 3. ákramisātām. — Pl. 3. ákramisata (VS.).

The forms which actually occur are the following:

AV.), from a desiderative  $\bar{v}$  ts  $\bar{v}$  (Vrdh-, AV.). the injunctive nudisthās (AV.) and the opta- native aor. asaparyait (AV.): see below 570. tive rucisīya (AV.) and gmisīya (VS.), which syncopates the radical vowel as in the root larity of taking Guna instead of Vrddhi. aor. and the perfect of this verb.

<sup>3</sup> Cp. WHITNEY 904 d.

<sup>&</sup>lt;sup>1</sup> From causatives dhvanayīt, ailayīt (Vil., | 4 Cp. Delbrück, Verbum p. 188.

<sup>5</sup> This abnormal ending also occurs in <sup>2</sup> The weak form of the root appears in the secondary conjugation in the denomi-6 Both these forms also show the irregu-

Active. Sing. 1. akānisam, akārisam, akramisam, acāyisam (AV.), acārisam, abhārisam (V bhr-, AV.), avadhisam (AV.), avādisam (AV.), áśaṃsiṣam, asāniṣam; áśiṣam (aś- 'eat', AV.); rāviṣam. — With ending -īm: akramīm, agrabhīm (TS.); vádhīm.

2. akramīs, adrmhīs (VS. VI. 2), ávadhīs, avarsīs¹, astarīs (Vstṛ-, AV.);

āśīs² (aś- 'eat', AV.), áukṣīs (ukṣ- 'grow'); kramīs, vádhīs.

3. ákārīt, ákramīt, ágrabhīt, ágrahīt (AV.), átārīt, adrmhīt (MS.IV. I 38), anayīt² (Vnī-, AV.), ámandīt, ayāsīt, áyodhīt, arāvīt, ávadhīt, ávarṣīt (Vvrṣ-, AV.), ásaṃsīt, asarīt³ (AV.), asāvīt, astānīt (AV.), ásvanīt; āvīt, āsīt (as-'eat', AV.); jūrvīt (jūrv-'consume'), tārīt, vádhīt. — With ending -ait: asarait⁴ (AV.).

Du. 3. ámanthistām; jánistām.

Pl. I. agrabhīsma, átārisma and atārima5, ávadhisma (VS. IX. 38).

3. atakṣiṣur, átāriṣur, adhanviṣur, ánartiṣur, ánindiṣur, apāviṣur, ámandiṣur, amādiṣur, arājiṣur, arāṇiṣur (ran-'rejoice'), árāviṣur, avādiṣur, asāviṣur; ákṣiṣur<sup>6</sup> (1. 163<sup>10</sup>), āniṣur (Van-, AV., TS.), áviṣur (Vav-). — With -ran: avādiran (AV.).

Middle. Sing. I. aiksisi (Kh. I. I.: Vīks-). — 2. ajanisthās (AV.),

asamisthās (sam- 'labour'), asayisthās, ásramisthās; jánisthās.

3. akrapista (Vkrp-), ájanista, adhāvista, anavista, aprathista, arocista (VS. XXXVII. 15), avasista (vas- 'wear'), ásamista, ásahista; áuhista ( $\overline{u}h$ - 'consider'); krámista, jánista, práthista, mándista, yamista.

Du. 3. ámandiṣātām. — Pl. 3. ágṛbhīṣata (VS. XXI. 60).

## is- Aorist Subjunctive.

530. Active forms of this mood are fairly common, but are almost exclusively limited to the 2. and 3. sing. Middle forms are very rare, occurring only in the pl., where not more than four examples have been noted.

Active. Sing. I. davisāni?. — 2. avisas, kānisas, tārisas, raksisas,

vádhisas, vádisas (AV.), vésisas, samsisas.

3. kárisat, jambhisat, jósisat, tārisat, níndisat (AV.), párisat ('take across'), bódhisat, márdhisat, yācisat, yodhisat, rakşisat, vanisat (AV.), vyathisat (VS. vi. 18), sansisat (TS. v. 6. 86), sanisat, sávisat (sū- 'vivify').

Pl. 3. sanisan<sup>9</sup> (AV. v. 3<sup>5</sup>).

Middle. Pl. 1. yāciṣāmāhe, saniṣāmahe. — 3. vaniṣanta 10 (TS. IV. 7. 141), sániṣanta.

# is- Aorist Injunctive.

531. Forms of the injunctive are commoner than those of the subjunctive. In the active they are found almost exclusively in the 2. 3. sing., 2. du. and 2. 3. pl.; in the middle nearly a dozen forms occur, all but one in the sing.

The forms of this mood have the accent on the root (as in the un-

augmented indicative).

Active. Sing. 1. samsisam, himsisam (VS. 1. 25).

AVERY 259 adds ávarhīs as occurring once.

<sup>2</sup> See Whitney's note on AV. XI. 3<sup>26</sup>.

<sup>3</sup> With Guns instead of Vrddhi of fina

3 With Guna instead of Viddhi of final vowel; cp. Bartholomae, Studien 2, 165.

4 See Whitney's note on AV. vi. 66<sup>2</sup>, where the reading asarīt is better supported; cp. his note on AV. vi. 65<sup>1</sup>.

5 With loss of the aoristic -s.

6 From aks. 'attain' (WHITNEY, Roots 1) a secondary form of Vas.; otherwise a sisaorist from as. 'attain'.

- 7 Cp. v. SCHROEDER, WZKM. 13, 119—122.

  8 This form occurs also in two passages
- of the AV.; in a third (AV.I. 182) sāviṣak appears instead of it. Cp. WHINNEY's note on this passage, and his Grammar 151 a.
- 9 The corresponding passage of the RV. (x. 1283) has vanusanta, and of the TS. (IV. 7. 141) vanisanta.

10 See preceding note.

2. avīs, kramīs (AV.), jīvīs (AV.), tarīs, barhīs, máthīs, mardhīs, moṣīs, yávīs, yodhīs, rakṣīs (AV.), randhīs, lekhīs (VS.V.43), vádhīs, śocīs (VS.XI.45), sávīs, spharīs, hiņsīs (VS. AV.). — With -ais: śarais (y śṛ-, AV.).

3. asīt (as- 'eat'), gārīt (gr- 'swallow'), cārīt, jīvīt (AV.), tārīt, dāsīt (das- 'waste'), barhīt, máthīt, vadhīt (TS.IV. 2.9¹; VS. XIII. 16), vesīt, svānīt, hiṃsīt.

Du. 2. táristam, mardhistam, himsistam (AV. VS.).

Pl. I. śramisma. — 2. grabhīsta, vadhista, himsista (AV. TS.); mathistana (AV.), ránistana (Vran-), vadhistana. — 3. jārisur (jr- 'waste away'), jīvisur (AV.), tārisur (AV.), vadhisur (AV.), vādisur (AV.), himsisur (AV.).

Middle. Sing. I. rādhiṣi (AV.). — 2. kṣaniṣthās² (AV.), nudiṣthās³ (AV.), marṣiṣthās (\forall mṛṣ-), vadhiṣthās (Kh. II. II³), vyathiṣṭhās (AV.). — 3. paniṣta, paviṣta, bādhiṣṭa. — Pl. I. vyathiṣmahi (AV.).

# is- Aorist Optative.

532. This mood is rare, occurring in the middle only and being formed from hardly a dozen roots. Though the ending is accented, the root appears in a weak form in gmiṣīya + (VS.) and ruciṣīya (AV.). The 2. and 3. sing. take the precative -s-.

Middle. Sing. 1. edhisīyá (AV.), gmisīya 3 (VS. 111. 19), janisīya (AV.) 5,

rucisīya³ (AV.). — 2. modisīsṭhās (AV.). — 3. janisīsṭa, vanisīsṭa.

Du. I. sahişīvahi (AV.). — Pl. I. edhişīmáhi (AV.), tārişīmahi, mandişīmahi (VS.IV. 14; TS.I. 2.3¹ etc.), vandişīmáhi, vardhişīmáhi (VS.II. 14, XXXVIII. 21), sahişīmahi (AV.), sāhişīmáhi (Pada text sahişīmáhi).

# is- Aorist Imperative.

533. Forms of this mood are rare, occurring in the active only and being made from six or seven roots at the most. Among these forms, two only are distinctively imperative, aviddhi and avistu; a few others can be distinguished by having the accent on the ending; the rest, being unaccented and used without  $m\dot{a}$ , cannot be distinguished from injunctives.

Sing. 2. aviddhi. — 3. avistu. — Du. 1. avistam, kramistam, gamistam, canistam, cayistam (ci-'gather'), yodhistam (Vyudh-), vadhistam, snathistam. — 3. avistām. — Pl. 2. avitáb; avistana, snathistana.

# A. 3. The sis- Aorist.

Delbrück, Verbum p. 179. — Avery, Verb-Inflection 261. — Whitney, Sanskrit Grammar 911—916; Roots 227. — v. Negelein, Zur Sprachgeschichte 86.

534. This agrist, which is inflected exactly like the *iṣ*- agrist, is formed by only six or seven roots in the Samhitās. Middle forms occur in the optative only.

#### Indicative.

Sing. I. ayāsiṣam. — Du. 3. ayāsiṣṭām (VS. XXVIII. 14). — Pl. 2. áyāsiṣṭā. — 3. agāsiṣur (gā- 'sing'), ayāsiṣur<sup>7</sup>.

# Subjunctive.

Sing. 3. gāsisat (gā- 'sing'), yāsisat.

- with accent on the ending instead of the root.
  - <sup>2</sup> Cp. Brugmann, KZ. 24, 363 f.
  - With weak form of root. 4 Cp. ZIMMER, KZ. 30, 222.
- 5 The Kāṭhaka has the forms janiṣeyam Roots I, from the se and janiṣeya made from a secondary -a-stem (Whitney 907).
- <sup>6</sup> This may be regarded as a form irregularly lacking s = avista.
- T åkṣiṣur is formed from aṣ- 'attain', according to Delerück, Verbum p. 179; according to Whitney, Sanskrit Grammar 913, and Roots I, from the secondary root akṣ-; see above p. 383, note 6.

### Optative.

Middle. Sing. 1. vamsisīya (van- 'win', AV.). — 2. vāsisīsthās 2. — Pl. 1. pyāsiṣīmahi3 (AV.; VS. 11. 14; MS. IV. 910 [p. 181, 9]).

## Injunctive.

Sing. 1. ramsisam 4 (SV.1.4.1.25). — Du. 2. hāsistam (AV.). — 3. hāsistām (AV.). — Pl. 2. hāsis/a (AV.). — 3. hāsisur (AV.).

# Imperative.

Du. 2. yāsistám. — Pl. 2. yāsīsta 5 (1. 16515).

#### B. The sa- Aorist.

Delbrück, Verbum p. 179. — Avery, Verb-Inflection 262. — Whitney, Sanskrit Grammar 916-920; Roots 227. - v. NEGELEIN, Zur Sprachgeschichte 86.

535. In the Samhitas this form of the sigmatic agrist is taken by only nine roots, which end in  $j \leq s$  or h and contain the medial vowels i u or r. The thematic a doubtless came to be employed in these few verbs to avoid a difficult agglomeration of consonants when the endings were added. The inflexion is like that of an imperfect of the  $\acute{a}$ - class of the first conjugation, the -sá- being accented in unaugmented forms. Besides the indicative, only forms of the injunctive and imperative occur, altogether fewer than a dozen. No subjunctive, optative, or participial forms have been noted.

#### Indicative.

536. Neither forms of any person of the dual nor of the 2. pl. occur in the indicative of this type of the s- aorist. The active forms greatly predominate, the middle being represented in the 3. sing. and pl. by only three or four forms altogether.

Active. Sing. 1. avṛkṣam (Vvṛh-). — 2. adhukṣas (Vduh-, VS. 1. 3), arukṣas (Vruh-, AV.); rukṣas (Vruh-, AV.). — 3. ákrukṣat (Vkruś-), aghukṣat (Vguh-), aduksat7 and adhuksat (Vduh-), amrksat (Vmrs-, AV.) aruksat (Vruh-), ásprksat (Vsprś-, AV.; VS. XXVIII. 18). — Pl. I. amrksāma (Vmrj-'wipe'), arukṣāma ( $\sqrt{ruh}$ -, AV.). — 3. ádhukṣan ( $\sqrt{duh}$ -); dukṣan<sup>8</sup> and dhuksán (V duh-).

Middle. Sing. 3. ádhukṣata9; dukṣata8 and dhukṣata. — Pl. 3. amṛkṣanta (|mrj-).

# Injunctive.

Active. Sing. 2. dukṣas, mṛkṣas ( $\sqrt{mṛ\dot{s}}$ -). — 3. dvikṣat ( $\sqrt{dvis}$ -, AV.). — Pl. 2. mrksata (Vmrs-).

Middle. Sing. 3. dukṣata8 and dhukṣata (V duh-), dvikṣata (V dviṣ-, AV.). — Pl. 3. dhukṣánta ( $\sqrt{duh}$ -).

# Imperative.

Active. Du. 2.  $m_r k_s a tam (\sqrt{m_r j})$ . — 3.  $yak_s a tam (\sqrt{yaj})$ . Middle. Sing. 2.  $dhuk s \acute{a} s v a (V duh)$ .

<sup>2</sup> With precative s.

4 Variant for rāsīya of the RV.

7 See above 32 b.

In the Mss. vamšisīya; see WHITNEY's note on AV. IX. 114.

<sup>3</sup> In the Mss. pyāśiṣīmahi; see WHITNEY's note on AV. vii. 815.

<sup>5</sup> With z for i. AVERY 261 gives the form as vāsistá.

<sup>6</sup> Three forms occur accented thus; the root is, however, accented in dhuksata.

<sup>8</sup> See above 32 b. 9 In IX. 1108 the form ádhukşata seems to be a 3. pl.

## IV. The Future System.

Delbrück, Verbum p. 183—184. — Avery, Verb-Inflection 262. — Whitney, Sanskrit Grammar 931—941; Roots 228 f.; AV. Index Verborum 380. — v. Negelein, Zur Sprachgeschichte 86—87.

- 537. The stem is formed by adding -syá¹ or (rather less frequently with connecting -i-) -isyá¹ to the root, which gunates a final or a prosodically short medial vowel. As the subjunctive frequently has a future sense, and even the present indicative may have it, the occasion for the use of actual future forms seldom arises in the RV., which forms a future stem from only fifteen roots, while the AV. does so from more than thirty (about eight of these occurring in the RV. also)². There is only one subjunctive and one conditional form, but some twenty participles occur.
- a. In the following stems the suffix -sya is added direct: kṣi- 'abide': kṣe-ṣyá-³; ji- 'conquer': je-ṣyá-; dah- 'burn': dhak-ṣyá-; yaj- 'sacrifice': yak-ṣyá-; vac- 'speak': vak-ṣyá-; sū- 'bring forth: sū-ṣya-⁴. In the AV. also occur: i- 'go': e-ṣyá-; kṛt- 'cut': kart-ṣya-; kram- 'stride': kram-ṣyá-; gup- 'protect': gop-ṣya-; dā- 'give': dā-ṣyá-; nī- 'lead': ne-ṣya-; mih- 'mingere': mek-ṣyá-⁵; yā- 'go': yā-ṣyá-; yuj- 'join': yok-ṣya-°; rādh- 'succeed': rāt-ṣya-; vah- 'carry': vak-ṣyá-; vṛt- 'turn': -vart-ṣyá-¹; śad- 'fall': śat-ṣya-; sah- 'prevail': sāk-ṣya-²; hā- 'leave': hā-sya-; hu- 'sacrifice': ho-ṣyá-. In the VS. bandh- 'bind': bhant-syá-.
- b. In the following stems the suffix is added with connecting -i-: av- 'favour': av-iṣyá-'; as- 'shoot': as-iṣyá-; kṛ- 'do': kar-iṣyá-; jan- 'beget': jan-iṣya-; bhū- 'be': bhav-iṣyá-; man- 'think': man-iṣyá-; vā- 'weave': vay-iṣyá-¹o; san- 'acquire': san-iṣyá-; sṛ- 'hasten': sar-iṣyá-; stu- 'praise': stav-iṣyá-. From causative stems: dhṛ- 'support': dhāray-iṣyá-; vas- 'clothe oneself': vāsay-iṣyá-

The AV. has the following additional stems: gam-'go': gam-isya-; dhr-'maintain': dhar-isya-; nas-'disappear': nas-isya-; pat-'fly': pat-isya-; mr-'die': mar-isya-; vad-'speak': vad-isya-; vrt-'turn': vart-isya-<sup>11</sup>; svap-'sleep': svap-isya-<sup>12</sup>; han-'slay': han-isya-. From causative stems: dus-'spoil': dūṣay-isya-; vr-'cover': vāray-isya-'shield'.

538. a. Subjunctive. The only subjunctive form occurring is  $kar-isy\acute{a}(-s)$  in IV.  $30^{23.13}$ 

b. Conditional. The only example occurring is formed from bhr- 'bear':  $\dot{a}$ -bhar-isya-t 'he was going to bear off' (II. 30°).

c. Participles. A good many participial forms occur. The following stems are met with:

Active. av-isyánt-<sup>14</sup>, as-isyánt-, e-syánt-(AV.) <sup>15</sup>, kar-isyánt-, kṣe-syánt-, khan-iṣyánt- (TS.), je-syánt- <sup>16</sup> (AV.), dā-syánt- (AV.), dhak-syánt-, pat-iṣyánt- (AV.),

- I On the origin of this suffix see Brug-MANN, Grundriss 2, 747 (p. 1092), who connects the -isya form with the is- aorist; and v. Negelein, Zur Sprachgeschichte 86.
- <sup>2</sup> According to WHITNEY 937 the future is formed from over 60 roots in the TS. but I am uncertain how many of these occur in independent Mantra passages.
- 3 This is the only stem in which -syá is to be read -sia: kṣeṣiántas.
- 4 This stem has the double irregularity of accenting the root and not taking Guna: cp. the perfect sasāva.
- 5 The Mss. read *mekṣāmi* in AV, VII. 1021: cp. WHITNEY's note.

6 Doubtful reading see note 3 p. 387 on yoksye.

- 7 See WHITNEY's note on AV. xv. 67.
- 8 An emendation: see note on sākṣye.
  9 Cp. Delbrück, Verbum p. 184.

<sup>10</sup> Op. cit. p. 183.

- II In the form anvartisye for ann-vartisye; see p. 11, 18.
  - 12 See WHITNEY'S note on AV. XIX. 479.
- 13 The form karisyā (1. 1659) is probably to be explained as the same subjunctive (= karisyās): cp. BR. sv. karisyā.
- 14 Cp. Delbrück, Verbum p. 183.
  15 In praisyán (AV. V. 2214), Pp. pra-esyán, but Whitney = pra-isyan.
- 16 In AV. xv. 201 nearly all the Mss. read jyeşyán (as if from Vjyā-) for jesyán.

bhar-isyánt- (TS.), bhav-isyánt- (AV.VS.), yā-syánt- (AV.), vac- 'speak': vak-syánt-, vay-isyánt-, san-isyánt-, sar-isyánt-, sú-syant-, han-isyánt-.

Middle. kramsyá-māṇa- (AV.), janiṣyá-māṇa- (VS. XVIII. 5), yakṣyá-māṇa-,

stavisvá-māna- (AV.).

### Future Indicative.

539. The future is inflected, in both active and middle, like the present of the a- conjugation. The forms actually met with in the Samhitas would, if made from kr- 'do', be the following:

Active. Sing. 1. kariṣyāmi. 2. kariṣyāsi. 3. kariṣyāti. — Du. 2. kariṣyathas (TS.). 3. karisyatas (AV.). — Pl. 1. karisyámas and karisyámasi (AV.). 2. karisyátha. 3. karisyanti (AV.).

Middle. Sing. 1. karisyé. 2. karisyase. 3. karisyate.

The forms actually occurring are the following:

Active. Sing. I. esyāmi (AV.), karisyāmi (AV.), kartsyāmi (AV.), carisyāmi (VS. I. 5), jesyámi, bhantsyámi (J'bandh-, VS. XXII. 4) , meksyámi (AV.), vaksyāmi (V vac-), stavisyāmi.

2. karisyási, jesyasi (VS. XXIII. 17), bhavisyasi (AV.), marisyasi (AV.), rātsyasi (1 rādh-, AV.), vaksyasi (1 vac-, TS.11.6.125), sanisyasi, hanisyasi (AV.).

3. karisyati, gamisyati (AV.), nasisyati (AV.), nesyati (AV.), patisyati (AV.), bhavisyáti, marisyati (AV.), vadisyati (AV.), sanisyati, sthāsyati (VS. VI. 2), hanisyati (AV.).

Du. 2. karisyathas (TS. IV. 1.92). — 3. marisyatas (AV.), vaksyatas (1 vah-, AV.).

Pl. 1. bharisyāmas (VS. XI. 16), vaksyāmas (1 vac-), svapisyāmasi (AV.).

2. karisyátha, bhavisyatha, sarisyatha (AV.).

3. gopsyanti (Vgup-, AV.), śatsyanti (Vśad-, AV.), hāsyanti ([hā-, AV.). Middle. Sing. 1. dharisyé (AV.), manisye, yoksye<sup>3</sup> (AV.), vartisye<sup>4</sup> (AV.), sāksye<sup>5</sup> (V sah-, AV.). — 2. stavisyase. — 3. janisyate, stavisyate (AV.).

# Periphrastic Future.

540. Of this formation, common in the later language, there seems to be an incipient example in VS.xvIII.59 = TS.v.7.71: anvāgantā yajīiāpatir vo ātra 'the sacrificer is following after you here', a modification of AV. VI. 123<sup>1.2</sup>: anvāgantá yájamānah svasti, which Whitney translates 'the sacrificer follows after wellbeing'6.

# V. Secondary Conjugation.

541. As opposed to the primary conjugation, there are four derivative formations in which the present stem is used throughout the inflexion of the verb and is everywhere accompanied by the specific sense connected with that stem. The forms which occur outside the present system are, however, rare. The four derivative formations are the desiderative, the intensive, the causative, and the denominative.

### 1. The Desiderative.

DELBRÜCK, Verbum p. 184—186. — AVERY, Verb-Inflection 230, 268—270. — WHITNEY, Sanskrit Grammar 1026-1040; Roots 233f. - v. NEGELEIN, Zur Sprachgeschichte 88-90.

542. Though the least frequent of the secondary conjugations, the desiderative is perhaps best dealt with first, as being akin in derivation and

<sup>2</sup> Whitney's emendation for mekṣāmi of the Mss.; see his note on AV. VII. 1021.

4 In anvartisye (AV. XIV. 156) given under borum; see p. 386, note 11.

5 The Mss. in AV. II. 275 read sākṣe. 6 Cp. WHITNEY, Sanskrit Grammar 946.

In AV. III. 95 ROTH and WHITNEY'S edition reads bhartsyami; but Whitney, note (but Paipp. yoksye). on that passage, would emend this to bhantsyami (Vbandh), and SHANKAR PANDIT the root art by WHITNEY, AV. Index Verreads bhatsyāmi.

<sup>3</sup> All the Mss. in AV. XIX. 131 read yokse

meaning to the future, the last of the primary verbal formations treated above (537-540). The desiderative is formed from the root with an accented reduplicative syllable and the suffix -sa, which expresses the desire for the action or condition denoted by the root; e. g. pā- 'drink': pi-pā-sa- 'desire to drink'. Desiderative stems from fewer than sixty roots are met with in the Samhitās.

The characteristic reduplicative vowel is i, which appears in all stems except those formed from roots containing  $\vec{u}$  (which reduplicate with u): and the root generally remains unchanged. Thus  $j\tilde{n}\bar{a}$ - 'know': ji- $j\tilde{n}\bar{a}$ -sa- (AV.):  $iv\bar{x}$ - 'overpower' : il- $iv\bar{x}$ -sa-;  $d\bar{a}$ - 'give' : dl- $d\bar{a}$ -sa-;  $p\bar{a}$ - 'drink' : pi- $p\bar{a}$ -sa-; tij- 'be sharp': ti-tik-sa-; nid- 'blame': ni-nit-sa-; bhid- 'split': bi-bhit-sa-; mis- 'mix': mi-mik-sa-: ris- 'hurt': ri-rik-sa-; nī- 'lead': ni-nī-sa-; prī- 'love': pi-prī-sa-: guh- 'hide' : ju-guk-sa-2; duh- 'milk' : du-duk-sa-2; muc- 'release' : mu-muk-sa-; yudh- 'fight' : yú-yut-sa-; ruh- 'ascend' : rú-ruk-sa-; bhū- 'be' : bú-bhū-sa-; trd-'pierce': ti-trt-sa-; trp- 'delight': ti-trp-sa-; drs- 'see': di-drk-sa-; vrt- 'turn': vi-vrt-sa-; srp- 'creep': si-srp-sa-.

a. A few desideratives reduplicate with a long vowel: tur- (= tī-) 'cross': tā-tūr-ṣa-; bādh- 'oppress': bī-bhat-sa-; man- 'think': mī-mām-sa- (AV.) 'investigate'. On the other hand, two desideratives abbreviate the reduplicative syllable by dropping its consonant; thus yaj- 'sacrifice': i-yak-sa- for \*y/-yak-sa-3; nas-'attain': i-nak-sa-, for \*n/-nak-sa-, perhaps through the influence of iyak-sa-; and the RV. has one desiderative form from ap- 'obtain' in which the reduplication is dropped altogether: ap-santa.

b. The radical vowel is lengthened when i, u, or r is final (the latter becoming [r); thus ci- 'see': ci-kī-ṣa-; ji- 'conquer': j/-gī-ṣa-; yu- 'unite' :  $y \hat{u} - y \bar{u} - s \alpha - \frac{1}{3} s r u$  'hear':  $s \hat{u} - \frac{1}{3} s \alpha - \frac{1}{3} k r$  'make':  $c \hat{u} - k \bar{v} r - s \alpha - \frac{1}{3} k r$  'take': ji-hīr-ṣa- (AV.); dhvṛ- 'injure' : dh dhūr-ṣa- with ū because vowel and semivowel have interchanged.

- a. A few roots with medial a followed by n or m lengthen the vowel; thus man- 'think': mī-māṃ-sa- (AV.); han- 'smite': j/-ghām-sa-; gam-'go': ji-gām-sa- (AV.); two others do so after dropping the nasal, viz. van-'win': vi-vā-sa-; and san- 'gain': si-sā-sa-5.
- c. In nearly a dozen roots, on the other hand, the radical vowel is weakened.
- 1. In a few roots final  $\bar{a}$  is reduced to  $\bar{i}$  and, in one instance, even  $i^6$ ; thus  $g\bar{a}$ - 'go' : ji- $g\bar{i}$ -ga- (SV¹.);  $p\bar{a}$ - 'drink' : pi- $p\bar{i}$ -ga- (RV.) beside pi- $p\bar{a}$ -ga-;  $h\bar{a}$ - 'go forth' :  $ji-h\bar{\imath}$ -sa-7 (AV.);  $dh\bar{a}$ - 'put' : di-dhi-sa- (RV.) beside  $dhi\bar{\imath}$ -sa-.
- 2. Half a dozen roots containing  $\bar{a}$  or a shorten the root by syncopation resulting in contraction with the reduplicative syllable;  $d\bar{a}$ - 'give': dit-sa-, for di- $d[\bar{a}]$ -sa-, beside di- $d\bar{a}$ -sa-;  $dh\bar{a}$ - 'put': dh/t-sa-, for d/-dh- $[\bar{a}]$ -sa-, beside didhi-sa-; dabh- 'harm': di-p-sa-, for di-d[a]bh-sa-; labh- 'take': li-p-sa- (AV.), for li-l[a]bh-sa-; sak- 'be able': si-k-sa-, for si-s[a]k-sa-; sah- 'prevail': si-k-sa-, for si-s[a]k-sa-; similarly initial  $\bar{a}$  in  $\bar{a}p$ - 'obtain': ip-sa-8 (AV.); and in rdk-'thrive': *irt-sa-* (AV.) the initial r is treated as if it were ar-9.
- a. In a few roots the consonants undergo exceptional changes; thus palatals revert to the original guttural in ci- 'note': ci-ki-ṣa-; cit- 'perceive': ci-kit-sa-; ji- 'conquer': ji-gī-ṣa-;

<sup>&</sup>lt;sup>1</sup> Cp. v. NEGELEIN 86.

<sup>&</sup>lt;sup>2</sup> See above 32 b.

<sup>3</sup> Cp. v. Negelein 68, note 2. The i being the reduplicative vowel, cannot be explained in the same way as that of the perfect i-yáj- for \*ya-yáj-, where i- has the nature of Samprasāraņa.

<sup>4</sup> Cp. V'dīv-: dyū-tá- etc., below 573 α.

<sup>5</sup> As in the past participle 574, 2 a.

<sup>6</sup> As in the past participle 574, 3.

<sup>7</sup> In AV. XX. 1272 the Mss. read jihīsate probably for jihīdate.

<sup>&</sup>lt;sup>8</sup> Cp. Brugmann 2, 854, 1027.

<sup>9</sup> v. NEGELEIN (89, note 2) thinks īrtsá- can only be explained from i-irdh-sa-.

han- 'slay': ji-ghām-sa-. In ghas- 'eat' the final s becomes t before the s of the suffix:

ji-ghat-sa-1 (AV.).

β. The desiderative suffix -ra is never added in the RV. with the connecting vowel -i-; but there is one example of this formation in the AV., viz. pat- 'fly' : pi-pat-i-sa-2.

#### Inflexion.

543. The desiderative is inflected regularly like verbs of the a-conjugation in both voices, having the moods and participles of the present tense, as well as an imperfect. No forms outside the present system occur in the RV. with the exception of the perfect from mis-, mi-miks-ur3 etc. (in which, however, the desiderative stem is treated as a root) besides two agrist forms and one passive participle in the AV. 4.

The forms of the present indicative, active and middle, which actually

occur, would if made from vi-vā-sa- 'desire to win', be as follows:

Active. Sing. 1. vivāsāmi. 2. vivāsasi. 3. vivāsati. — Du. 2. vivāsathas. 3. vivāsatas. — Pl. 1. vivāsāmas. 3. vivāsanti.

Middle. Sing. 1. vivāse. 2. vivāsase. 3. vivāsate. — Pl. 1. vivāsāmahe. vivāsante.

544. Forms occurring elsewhere in the present system are the following:

a. Subjunctive. Active. Sing. 3. jighāmsāt (TS.), t/trpsāt, dipsāt (TS. AV.), ninitsāt, vivāsāt. — Pl. 3. iyaksān, titrtsān, vivāsān.

b. Injunctive. Active. Sing. 3. inakṣat, cikitsat, vivāsat. — Middle.

Pl. 3. apsanta, didhisanta, siksanta.

c. Optative. Active. Sing. 1. ditseyam, vivāseyam. — 3. vivāset. — Pl. 1. didhisema, vivāsema. — Middle. Sing. 1. didhiseya.

d. Imperative. Active. Sing. 2. cikitsa, dipsa (AV.), mimikṣa, vivāsa. — 3. cikitsatu (AV.). — Du. 2. mimikşatam, sişāsatam. — 3. mimikşatām. —

Pl. 2. cikitsata (TS.), vivāsata. — 3. didhisantu.

- e. Participles. Active. inakṣani-, iyakṣani-, ipsani- (AV.), irtsani-(AV.), cikitsant-, jighāṃsant-, ditsant-, dipsant-, dudukṣant-, pipīṣant-, bubhūṣant-, yúyutsant-, yúyūşant-, ririkṣant-([/riṣ-), rúrukṣant-([/ruh-), vívāsant-, siṣāsant-, sisrpsant-, sikṣant-. — Middle. iyakṣamāṇa-, īrtsamāṇa- (AV.), jigīṣamāṇa-, mimuksamāna-, lipsamāna- (AV.), šiksamāna- (TS.), šiksrasamāna-; and with -āna: didhisāna-.
- f. Imperfect. Active. Sing. 2. úsiṣāsas. 3. ajighāmsat, asisāsat. Pl. 3. áyuyutsan, ásisāsan; duduksan, bibhitsan.

g. Aorist. Sing. 2. acikitsīs (AV.), īrtsīs (AV.).

h. Passive. No finite form of the passive seems to occur in the Samhitas; of participles, no certain form of the present occurs, mīmāmsyámāna-(AV. IX. 624) 5 being a conjecture; and of the past only one form has been noted: mīmāmsitá- (AV. IX. 624)6.

i. Gerundive. Two regular forms occur: didrks-énya- worthy to be seen' and susrūs-chya- (TS.) 'worthy to be heard'. There are also one or two irregular formations: didrks-éya- 'worthy to be seen' and paprks-énya- 'to

be asked' (unless from aorist stem) 7.

k. Verbal adjective. A considerable number (more than a dozen in the RV.) of verbal adjectives are formed from the desiderative stem with the

occurs in VS. xL. (Īśā Up.).

6WHITNEY 1037 quotes the gerund mimam.

sitvā from K.

7 See below, Gerundive 580.

I See above 44 a, I.

<sup>3</sup> According to GRASSMANN, perf. des. of mih-'mingere'; cp. WHITNEY, Roots, s. v. miks.

<sup>4</sup> In all these forms the stems have lost their distinct desiderative meaning: cp. WHITNEY 1033.

<sup>5</sup> Cp. WHITNEY's note in his translation; <sup>2</sup> The desiderative of jīv-'live', jijīv-i-ṣa-, in his grammar 1039 he quotes rurutsyamāna (Vrudh-) from K. 37, 12 (apa-).

suffix -u. They have the value of a present participle governing a case; thus iyakş-u- 'wishing to sacrifice'; jigīṣ-u- 'wishing to conquer'; didhiṣ-u- 'desiring to win'; dips-ii- 'wishing to injure'; vivakṣ-ii- (AV.) from vac- 'speak'; siṣās-ii-'eager to win' 1.

#### 2. Intensives.

Delbrück, Verbum p. 130—134. — Avery, Verb-Inflection 230, 270—272. — Whitney, Sanskrit Grammar 1000—1025; Roots 232 f. — v. Negelein, Zur Sprachgeschichte 78—80. — LINDNER, Altindische Nominalbildung 10 (p. 48) and 21 c (participles). — Burchardi, Die Intensiva des Sanskrit und Avesta. Teil I. Halle 1892; Teil II. BB. 19, 169 - 225.

- 545. The intensive or, as it is also often called, the frequentative implies intensification or repetition of the sense expressed by the root<sup>2</sup>. It is a common formation, being made from over 90 roots in the Samhitas. The stem is derived from the root by means of a reduplicative syllable, the characteristic feature of which is that it always has a strong form. The reduplicative syllable may be formed in three different ways: I. radical  $\tilde{i}$   $\tilde{u}$ are always reduplicated with a Guna vowel, and  $\tilde{a}$  and r (ar) often with  $\bar{a}$ ; 2. roots containing r or a followed by r l n m more usually reduplicate with a and liquid or nasal; 3. a considerable number of intensives interpose the vowel 3 between the reduplicative syllable and the root.
- I. a. Roots containing  $\tilde{i}$  or  $\tilde{u}$  reduplicate with e or o; thus cit- 'perceive': cékit-; tij- 'be sharp': té-tij-; dis- 'point': dé-dis-; nij- 'wash': né-nij-; nī- 'lead' : ne-nī-; piś- 'adorn' : pe-piś-; mī- 'damage' : me-mī-; rih- 'lick' : rerih-; vij- 'tremble': ve-vij-; vid- 'find': vé-vid-; vis- 'be active': ve-vis-; vī-'enjoy' : ve-vī-; sidh- 'repel' : se-sidh-; gu- 'sound' : jo-gu-; dhū- 'shake' : do-dhu-; nu- 'praise': no-nu-; pruth- 'snort': po-pruth-; bhū- 'be': bo-bhū-; yu- 'join': yó-yu-; yu- 'separate' : yó-yu-; ru- 'cry' : ro-ru-; ru- 'break' : ro-ru-; śuc- 'gleam' : śó-śuc-; sū- 'generate' : so-ṣū-; sku- 'tear' : co-ṣkū-; hū- 'call' : jo-hū-.
- b. More than a dozen roots with medial  $\tilde{a}$  (ending in mutes or sibilants, and one in m), as well as three with final -r, reduplicate with  $\bar{a}$ :  $k\bar{a}s$ -'appear' : cā-kas-; gam- 'go' : jā-gam-; nad- 'sound' : ná-nad-; pat- 'fall' : pāpat-; badh- 'oppress': ba-badh-; raj- 'colour': ra-raj-; randh- 'make subject': rārandh-; rap- 'chatter': rā-rap-; lap- 'prate': lā-lap-; vac- 'speak': vā-vac-; vad- 'speak': vā-vad-; vas- 'be eager': vā-vas-; vās- 'bellow': vā-vas-; svas-'blow':  $\delta \bar{a}$ - $\delta vas$ -; gr- 'wake':  $j\bar{a}$ -gr-; dr- 'split':  $d\bar{a}$ -dr-; dhr- 'hold':  $d\bar{a}$ -dhr-; also cal- 'stir': cā-cal- (AV.).
- 2. All other roots containing r (and dr- and dhr- alternatively) and several with medial  $\alpha$  followed by r l, or a nasal, reduplicate with  $-\alpha r$ , -al or -an, -am. Thus:
- a. kṛ- 'commemorate' : car-kṛ- and car-kir-; kṛṣ- 'drag' : car-kṛṣ-; gṛ-'swallow': jár-gur- and jal-gul-; tr- 'cross': tar-tr- (RV.); dr- 'split': dár-drand dar-dir-; dhr- 'hold': dár-dhr-; brh- 'make strong': bár-brh-; bhr- 'bear' : jar-bhr-3; mrj- 'wipe' : mar-mrj-; mrs- 'touch' : már- mrs-; vrt- 'turn' : varvṛt-; sṛ- 'flow': sar-sṛ-; hṛṣ- 'be excited': jar-hṛṣ-.
- b. car- 'move': car-car- (AV.); cal- 'stir': -cal-cal- (MS.) beside -cā-cal-(AV.); phar- 'scatter' (?): par-phar-; kram- 'stride': can-kram-; gam- 'go': jangam-; jambh- 'chew up' : jañ-jabh-; taṃs- 'shake' : tan-tas-; daṃś- 'bite' : dandas-; nam- 'bend': nan-nam-; yam- 'reach': yam-yam-; stan- 'thunder': tamstan- (AV.).

3 The palatal j in the reduplication is like that of hhr-in the nerfect form ia-bhara (482 d).

<sup>&</sup>lt;sup>1</sup> Grassmann, p. 1727, gives a list of the desiderative adjectives in su occurring in is wanting in the intensives of gr. 'wake', the RV. (about 15); four occur in the AV.: cikitsu-, jighatsu-, dipsu-, bībhatsu-; cp. WHIT-

<sup>2</sup> The specific meaning of the formation cit- 'perceive', nij- 'wash', vis- 'work'.

 $a_{\bullet}$  A few intensives show irregularities in the reduplicative syllable; thus  $\gamma$ - 'go': al-ar- (dissimilation);  $g\bar{a}h$ - 'plunge': jah-gah- (from a root which otherwise has no nasal in inflected forms);  $b\bar{a}dh$ - 'oppress': bad-badh- (only example of a final mute being reduplicated); gur- 'greet' and bhur- 'quiver' reduplicate with a: jar-gur- and jar-bhur-2.

β. In a few roots containing r or r the radical syllable varies; thus gr- 'swallow':

jar-gur- and jal-gul-; car- 'move': car-cur- beside car-car-; tr- 'cross': tar-tur- beside tar-tar-.

3. Over twenty roots with final or penultimate nasal, r, or  $\tilde{z}$ , interpose an  $\tilde{r}$  (or  $\tilde{r}$  if the vowel would be long by position) between the reduplicative syllable and the root:

a. krand- 'cry out': kan-i-krand- and kan-i-krad-; gam- 'go': gan-ī-gam-(but gan-i-gm-at); pan- 'admire': pán-ī-pan-; phan- 'spring': pán-ī-phaṇ-; ścand- 'shine': can-i-ścad-; san- 'gain': san-ī-ṣan-; skand- 'leap': kan-i-ṣkand- and can-i-ṣkad-; syand- 'flow': sán-i-ṣyad-; svan- 'sound': san-i-ṣvan-; han- 'slay': ghan-ī-ghan-.

b. kṛ- 'make': kar-i-kṛ- and car-i-kṛ- (AV.)<sup>3</sup>; tṛ- 'cross': tar-ī-tṛ-; bhṛ- 'bear': bhar-ī-bhṛ-; vṛ- 'cover': var-ī-vṛ-; vṛj- 'twist': vár-ī-vṛj-; vṛt- 'turn':

var-ī-vrt-.

c. tu- 'be strong' :  $t\acute{a}v$ - $\bar{t}$ -tu-;  $dh\bar{u}$ - 'shake' :  $d\acute{a}v$ -i-dhu-; nu- 'praise' :  $n\acute{a}v$ - $\bar{t}$ -nu-; dyut- 'shine' :  $d\acute{a}v$ -i-dyut-.

# a. Primary Form. Present Indicative.

546. With the exception of eight or nine verbs, which take a secondary form (inflected in the middle only and identical in appearance with a passive), the intensive is inflected like the third conjugational class. The only difference is that  $\bar{\imath}$  may be inserted between the root and terminations beginning with consonants; it is common in the  $\bar{\imath}$  and  $\bar{\jmath}$  sing ind. act., and is also sometimes found to occur in the 2. 3. du. ind. and the 2. 3. sing imperative and imperfect active. The forms actually found, if made from the intensive of nij- 'wash', would be the following in the indicative:

Active. Sing. 1. nénej-mi and nénej-ī-mi. 2. nének-si. 3. nének-ti and nénej-ī-ti. — Du. 2. nenej-ī-thas 5. 3. nenik-tás. — Pl. 1. nenij-mas and nenij-

masi (AV.). 3. nénij-ati.

Middle. Sing. 1. nenij-e. 3. nenik-te. — Du. 3. nenij-āte. — Pl. 3. nenij-ate.

The forms actually met with are:

Active. Sing. I. carkarmi, veveşmi (AV.); cākasīmi, jóhavīmi, dardarīmi. — 2. alarşi, jāgarşi (Kh. II. 3), dárdarşi, dárdharşi. — 3. álarti, kánikranti, ganīganti, jaighanti, varīvarti and várvarti<sup>6</sup>; -calcalīti (MS. III. I 3¹); carcarīti (AV.), cākasīti, jarbhurīti, jalgulīti (TS.), jóhavīti, tartarīti, dardarīti, dodhavīti, nánnamīti ¹, nónavīti, pāpatīti, bobhavīti, yaṃyamīti, rārajīti (AV.), rārapīti, róravīti, lālapīti (AV.), vāvadīti, soṣavīti.

Du. 2. tartarīthas 8. — 3. jarbhrtás.

Pl. 1. nonumas and nonumasi (AV.). — 3. jägrati (AV.), dávidyutati, nānadati, bharibhrati, várvṛtati.

Middle. Sing. 1. joguve. — 3. tétikte, dédiste, nánnate9, nenikté,

Though it has in nominal derivatives; see Whitney, Roots, s. v.  $g\bar{a}h$ ; cp. Burchardi, BB. 19, 179; v. Negelein 79.

<sup>2</sup> Cp. p. 390, note 3. 3 In the participle kárikr-at and -cárikr-at

(AV.).
4 This  $\bar{\imath}$  never occurs if the reduplication contains  $\bar{\imath}$ : thus no-nav- $\bar{\imath}$ -ti and nav- $\bar{\imath}$ -no-t, but never \*nav $\bar{\imath}$ -nav- $\bar{\imath}$ -ti. Cp. Delbrück, Verbum p. 131; v. Negelein 79.

5 For \*nenik-thás; the only 2. du. which occurs is tartar-ī-thas for \*tarty-thás.

- 6 For várvart-ti, varīvart-ti; cp. Grassmann, s. v. vrt.
  - 7 See note 9.
  - 8 Cp. note 5.

9 With loss of nasal (a = sonant nasal) for \*nánnan-te(L 1406). Aufrecht, RV², and Max Müller, RV², write námna-te(also Padapāṭha); but the participle nánnamat (viil. 438), Aufrecht nánn-, Max Müller námn-; the 3. sing námnamīti (v. 835) Aufrecht², námnamīti Max Müller²; similarly nánnamāne (x. 82¹) Aufrecht, námnamāne Max Müller (also Pp.)

sarsrte; with -e for -to: cékite, jángahe, joguve, badbadhé<sup>1</sup> and bābadhe, voyure, sarsré. — Du. 3. sarsrāte. — Pl. 3. dédisate.

547. a. Subjunctive. Active. Sing. I. janghánāni. — 2. jāgarāsi² (AV.); janghanas, jalgulas. — 3. caniskadat, cúrkṛṣat, cékitat, jánghanat, jāgarat (AV.), dardirat, davidyutat, parpharat. bárbṛhat, mármṛjat, marmṛśat, saniṣvaṇat. — Du. I. janghanāva. — Pl. I. carkirāma, vevidāma. — 3. carkiran, ('commemorate'), cákaśān² (AV.), pāpatan, śśśucan.

Middle. Du. 3. tantasaite. — Pl. 3. jánghananta, jarhrsanta, nonuvanta,

marmrjanta, śośucanta.

b. Optative. No certain form occurs in the RV.3, and only two or three in other Samhitās: Sing. 3. veviņyāt (AV.). — Pl. 1. jāgryāma (VS. TS. MS.), jāgriyāma (TS. 1. 7. 101).

c. Imperative. Examples of forms of all the 2. and 3. persons are

found excepting the 3. pl., but no middle form has been met with.

Active. Šing. 2. carkṛdhi (AV.) 'remember', jāgṛhi, dardṛhi, dādṛhi, nenigdhi (AV.), barbṛhi+; janghanīhi (AV.), cākaśīhi (VS. TS.), taṃstanīhi (AV.). — With -tāt: carkṛtāt, jāgṛṭāt⁵. — 3. dardartu, marmartu, veveṣṭu (AV.); vāvadītu (AV.), johavītu (AV.). — Du. 2. jāgṛṭam. — 3. jāgṛṭām (AV.). — Pl. 2. jāgṛṭa (AV.), cankramata⁶.

548. Participle. Active. kánikradat-, kárikrat-, ghánighnat-, -cárikrat-(AV.), cákasat-, cókitat-, jánghanat-, járbhurat-, jágrat-, dáridrat- (TS. IV. 5. 10¹), dárdrat-, dávidyutat-, nánnamat-, nánadat-, pánipnat-, pánīphanat-, pépisat-, bóbhuvat- (AV.), mármrjat-, yóyuvat- (yu-'ward off'), rérihat-, róruvat-, vávasat-(vās-'roar'), vévisat-, sósucat-, sésidhat-.

Middle<sup>7</sup>. cékitāna-, jáñjabhāna-(AV.), járbhurāṇa-, járhṛṣāṇa-, dándaś-āna-, nánnamāna-, pɨpiśāna- (AV. TS.), bābadhāna-, mémyāna-, yéywāna-

(yu- 'join'), rórucāna-, sósucāna-, sársrāna-.

a. The participles badbadhāná- and marmṛjāná- (beside mármṛjāna-), though irregularly accented, unmistakably belong to the intensive. kánikrat once (1x. 63<sup>20</sup>) appears as an abbreviated form of kánikrad-at. The participle jinghan-at- syncopates the radical vowel in the gen. sing.: jánghn-at-as; another form of the intensive participle from the same root syncopates the radical vowel throughout: ghánighn-at-; also pánipn-at-. The obscure form  $c\bar{a}kán$  (x. 29<sup>1</sup>) may be the nom. of an intensive participle with anomalous accent for  $c\bar{a}kan-at^8$ .

549. Imperfect. Altogether (including unaugmented forms, some of which are used injunctively) about thirty forms of the imperfect occur, among them only four examples of the middle. In the active all persons are represented except the r. du. and the 2. pl.; but in the middle only the 3. sing. and pl. are met with.

Active. Sing. 1. acākaśam; dediśam. — 2. ajāgar, adardar; dardar. — 3. adardar, adardhar, avarīvar; kániṣkan, dardar, dávidyot, návīnot; ájohavīt, áyoyavīt, ároravīt, ávāvacīt.

Du. 2. adardrtam. — 3. avāvasītām. — Pl. 1. marmrjmā. — 3. acarkrsur (AV.), ajohavur, adardirur, anonavur.

with irregular accent.

<sup>&</sup>lt;sup>2</sup> With double modal sign.

<sup>3</sup> Cp. WHITNEY 1009 a.
4 For barbrh-hi, the final h being dropped after being cerebralized before -dhi: \*barbrz-dhi (58, I b, a; 62, 4 e).

<sup>5</sup> This form occurs once in the AV. as a I. person: cp. WHITNEY 1011 a.

<sup>6</sup> With anomalous connecting -a- for \*cankran-ta,

<sup>7</sup> The participles  $r\bar{a}rah$ - $\bar{a}n\acute{a}$ -,  $r\bar{a}rak$ - $\bar{a}n\acute{a}$ -, and  $j\bar{a}hr$ - $\bar{s}$ - $n\acute{a}$ - (beside  $j\acute{a}rhr$ - $\bar{s}$ - $n\acute{a}$ -) are probably perfect participles, although no other perfect forms with  $\bar{a}$  in the reduplicative syllable occur from these roots (rah-, rak-, hr-s-); cp. Whitney 1013.

<sup>8</sup> I regard it as 3. sing. perf. inj. = \*cākán-t (488). Cp. BARTHOLOMAE, IF. 7, 111, GRASSMANN, under the root kā-; WHITNEY, Sanskrit Grammar 1013 b; Roots 17.

Middle. Sing. 3. ádedista, ánannata<sup>1</sup>. — Pl. 3. marmrjata<sup>2</sup>.

550. a. Perfect. A few perfect forms with intensive reduplication and present sense are met with:

Active. Sing. I. jāgara. — 3. jāgāra, davidhāva (dhū- 'shake'), nināva 3 (nu- 'praise').

The only perfect participle occurring is jāgrvāms.

b. Aorist. The only trace of an aorist being formed from the intensive is carky-s-e 'thinks of', 3. sing. mid., formed like hi-s-e and stu-s-e. It occurs three times in the RV., always with a present sense.

c. Causative. A causative formed from the intensive is once found in the participle varīvarj-ayant-ī- (AV.) 'twisting about' (Vvri-).

## b. Secondary Form.

551. The rare secondary form of the intensive is identical in meaning with the primary. In form it is indistinguishable from a passive, the suffix -yá being added to the primary stem and the inflexion being the same as that of the passive. Altogether about a dozen forms have been met with from nine roots. The only persons represented are the 2. and 3. sing. and 3. pl. indicative; and there is also a present participle. The forms actually occurring are the following:

Present indicative. Sing. 2. coskūyáse. — 3. dediśyáte (AV. VS.), nenīyáte (VS.), marmrjyáte, rerihyáte, vevijyáte, vevīyate. — Pl. 3. tartūryante  $(\sqrt{tr})$ , marmrjyánte.

Participle. carcūryámāna- (['car-), nenīyámāna-, marmyjyámāna-.

### 3. The Causative.

Delbrück, Verbum p. 209-216. - Avery, Verb-Inflection 262-268. - Whitney, Sanskrit Grammar p. 379-386; Roots 235 f. - v. NEGELEIN 44-48.

552. The causative verb expresses that its object is caused to perform the action or to undergo the state denoted by the root; e. g. párām evá parāvátam sapátnīm gamayāmasi (x. 1454) 'we cause our rival to go to the far distance'. It is by far the commonest of the secondary conjugations, being formed from over 200 roots in the Samhitas; but of about 150 causative stems appearing in the RV. at least one-third lack the causative meaning. The stem is formed by adding the suffix -áya to the root, which as a rule is strengthened. Those verbs in which the root, though capable of being strengthened, remains unchanged, have not a causative<sup>4</sup>, but an iterative sense, being akin in formation to denominatives 5 (which sometimes even have the causative accent). The whole group may originally have had this meaning, from which the causative sense was developed till it became the prevalent one<sup>6</sup>. This may perhaps account for an iterative formation, the reduplicated aorist, having specially attached itself to the causative. Both the iterative and the causative form are occasionally made from the same root; e.g. patáya-ti 'flies about' and pātáya-ti 'causes to fly' beside the simple verb páta-ti 'flies'.

<sup>&</sup>lt;sup>1</sup> See p. 391, note 9.

perfect (p. 365, top).

<sup>3</sup> WHITNEY 1018 quotes also dedrāva (dru-'run') from the TS., and yoyāva (yu- 'sepa- 5 Cp. v. NEGELEIN 44. rate'), and leläya (lī- 'be unsteady') from the 6 Cp. Brugmann, KG. 698.

MS. (1. 86); the latter form is irregular in ² ávāvašanta (//vāś-) is probably a plu-accent. Cp. Böhtlingk's Lexicon, s. v. 3. lī.

<sup>4</sup> Cp. WHITNEY 1042 b.

553. The root is strengthened in different ways according to the nature

and position of its vowel.

Înitial or medial *i u r !* (if not long by position) take Guṇa; thus a. cit-'perceive': cet-áya- 'teach'; mih-'mingere': meh-áya- 'cause to rain'; ris-'be hurt': res-áya- 'injure'; vid- 'know': ved-áya- 'cause to know'; vip- 'tremble': vep-áya- 'shake'; vis- 'enter': ves-áya- 'cause to enter'; viṣṭ- 'wrap': veṣṭ-áya- (AV.) 'involve'; snih- 'be moist': sneh-áya- 'destroy';

- b. kup-'be agitated': kop-áya-'shake'; krudh-'be angry': krodh-áya-'enrage'; kṣud-'be agitated': kṣod-aya-'shake'; ghuṣ- 'sound': ghoṣ-áya- 'proclaim'; cud- 'impel': cod-áya-, id.; juṣ- 'enjoy': joṣ-áya- 'caress'; jyut- 'shine': jyot-áya-(AV.) 'enlighten'; tuṣ- 'drip': toṣ-aya- 'bestow abundantly'; dyut- 'shine': dyot-aya- 'illumine'; puṣ- 'thrive': poṣ-aya- 'nourish'; budh- 'be awake': bodh-áya-'waken'; muh- 'be dazed': moh-áya- 'bewilder'; yudh- 'fight': yodh-áya- 'cause to fight'; yup- 'efface': yop-áya-, id.; ruc- 'shine': roc-áya- 'illumine'; rud-'weep': rod-áya- 'cause to wail'; ruh- 'rise': roh-áya- 'raise'; lubh- 'desire eagerly': lobh-áya- 'allure'; śuc- 'flame': śoc-áya- 'set on fire'; śubh- 'shine': śobh-aya- (AV.) 'adorn'; śus- 'grow dry': śos-áya- (AV.) 'make dry';
- c. rd-'dissolve' (intr.): ard-áya-'destroy'; kṛś-'be lean': karś-áya-'emaciate'; tṛṣ- 'be pleased': tarṣ-áya- 'delight'; dṛś- 'see': darś-áya- (AV.) 'show'; nṛṭ-'dance': narṭ-áya- 'cause to dance'; bṛḥ- or vṛḥ- 'tear': barḥ-áya- 'thrust'; mṛṣ- 'injure': marṣ-áya-, id.; mṛṣ- 'wipe': marṣ-áya-, id.; vṛṣ- 'turn': varṣ-aya-(AV.) 'cause to turn'; vṛṭ- 'roll': varṭ-áya- 'cause to revolve'; vṛdḥ- 'grow': varḍh-áya- 'augment'; vṛṣ- 'rain': varṣ-áya- 'cause to rain'; śṛdḥ- 'be bold': śarðh-áya- 'cause to be bold'; hṛṣ- 'be excited': harṣ-áya- 'excite;

d. k!p- 'be adapted': kalp-áya- 'arrange'.

554. The following verbs, mostly lacking the causative meaning, leave the root unchanged: ii- 'be quiet': ii-áya- (AV.) 'cease'; cii- 'observe': cii-áya- 'stimulate' (also cet-áya-); ris- 'be injured': ris-aya- id. (beside res-áya-); rip- 'quiver': rip-áya- 'agitate' (also vep-aya-);

tuj-'be eager': tuj-áya- id.; tur-'overwhelm': tur-áya- id.; tuṣ-'be content': tuṣ-áya- id.; dyut- 'shine': dyut-aya- id. (beside dyot-aya- 'illumine'); ruc-'shine': ruc-aya- id. (beside roc-áya- 'illumine'); śuc- 'shine': śuc-áya- id. (beside śoc-áya- 'illumine'); śubh- 'shine': śubh-áya- id. (also śobh-aya- 'adorn' AV.). The vowel is lengthened in duṣ- 'spoil': dūṣ-áya- id.

krp- 'lament': krp-áya- id.; mrd- 'be gracious': mrl-áya- id.; sprh- 'be eager': sprh-aya- id. In the case of grabh- 'grasp', the root is even weakened: grbh-áya- id.

a. Vowels long by nature or position remain unchanged, but the stem, in this case, usually has the causative sense: ing-'move': ing-áya-'set in motion'; īkṣ-'see': īkṣ-áya- 'cause to see'; īnkh-'swing': īnkh-áya-'shake'; īr-'set in motion': īr-áya- id.; jīv-'live': jīv-áya- 'animate'; dīp-'shine': dīp-áya- 'kindle'; pīd- 'press': pīd-aya- (AV.) 'distress'; vīd- 'be strong' (in vīl-ú-'strong'): vīl-áya- 'make strong'²;

ukṣ- 'grow up': ukṣ-aya- 'strengthen'; kūḍ- (does not occur in the simple form): kūḍ-aya- 'scorch'; śundh- 'purify': śundh-aya- id.; sūḍ- 'make pleasant': sūḍ-áya- id.; sphūrj- 'rumble': sphūrj-áya- id.;

drmh- 'make firm': drmh-aya- (AV.) 'hold fast';

a. Two roots with medial  $\bar{\imath}$  take Guṇa:  $sr\bar{\imath}v$ - 'fail': srev-áya- beside  $sr\bar{\imath}v$ -aya-3 (AV.) 'lead astray';  $h\bar{\imath}d$ - 'be hostile': helaya- in the participle a-helayant- 'not angry'; while

I Cp. v. Negelein 46, note I.

2 Delbrück 189, 4 regards vīļáya- as a denominative.

3 In AV. vi. 732 all the Mss. but one have frīv-.

two others already have it in the root: rej- 'tremble' : rej-áya- 'shake'; med- 'be fat' : med-áya- 'fatten'.

555. An initial or a medial a (if not long by position) is lengthened in some thirty roots: am- 'be injurious':  $\bar{a}m$ -áya- 'be injured': kam- 'desire': kām-áya- 'love'; cai- 'hide oneself': cāt-úya- 'drive away'; chad- 'cover' : chādáya- id.; tan- 'stretch': tān-aya- (AV.) 'make taut'; tap- 'burn': tāp-áya- (AV.) 'cause to burn'; tras- 'be terrified': tras-aya- (AV.) 'terrify'; nas- 'be lost':  $n\bar{a}s$ -áya- 'destroy'; pad- 'go', 'fall' :  $p\bar{a}d$ -áya- 'cause to fall'; phan- 'bound' :  $ph\bar{a}n$ ava- 'cause to bound'; bhaj- 'divide': bhāj-ava- 'cause to share'; bhraś- 'fall' : bhrās-áya- 'cause to fall'; man- 'think' : mān-ava- 2 (AV.) 'esteem'; yat- 'stretch': yāt-áya- 'unite'; yam- 'guide': yām-aya- (Pp. yām-) 'present'; lap- 'prate': lāp-aya-(AV.) 'cause to cry'; vat- 'apprehend': vat-'ya- 'inspire'; van- 'win': van-aya-(AV.) 'conciliate' (Pp. van-); vas- 'dwell, : vas-aya- 'cause to stay'; vas- wear' : vās-áya- 'clothe'; vas- 'shine': vās-aya- 'illumine'; sat-3 'cut in pieces': sāt-áya-(AV.) id.4; śvas-'snort': śvās-aya-(AV.) 'cause to resound'; spaś- 'see': spāś-áya-'show'; svup- 'sleep': svūp-ava- 'send to sleep'.

a. Five or six other causatives optionally retain the a: gam-'go': gam-áya- and gām-aya- (RV1.) 'bring'; das- 'waste away': das-aya- and dās-aya-(AV.) 'exhaust'; dhvan- 'disappear': dhvan-aya- (RV.) and dhvān-aya- (RV.) 'cause to disappear'; pat- 'fall': pat-áya- 'fly about' (in RV. only once, I. 1697, 'cause to fall') and pāt-áya- 'cause to fall'; mad- 'be exhilarated': mad-áya- (AV.) and mād-áya- 'rejoice'; ram- 'rest': ram-áya- and rām-áya- 'cause to rest'.

556. Some twenty-five roots with initial or medial  $\alpha$  (short by position) remain unchanged, as the causative meaning is mostly absent: an-'breathe' : -an-áya- (AV.) 'cause to breathe'; chad- 'seem' : chad-áya- id.; jan- 'beget' : jan-áya- id.; tvar- 'make haste': tvar-áya- (AV.) 'quicken'; dam- 'control' : dam-áya- id.; dhan- 'set in motion' : dhan-áya- id.; dhvas- 'disperse' (intr.) : dhvas-áya- 'scatter' (tr.); nad- 'roar': nad-íya- 'cause to resound'; nam- 'bend' (tr. and intr.): nam-aya-'cause to bend', 'strike down'; pan-'admire': pan-ayaid.; prath-'spread out': prath-dya-id.; mah-'be great': mah-dya-'magnify'; raj-'colour': raj-aya- (AV.) id.; ran- 'rejoice': ran-áya- id. and 'gladden'; vyath-'waver': vyath-áya- 'cause to fall'; s'am- 'be quiet': s'am-áya- (AV.) 'appease'; śnath- 'pierce' : śnath-aya- id.; śrath- 'loosen' : śrath-áya- id.; stan- 'thunder' : stan-áya- id.; svad- 'enjoy', 'sweeten': svad-áya- id.; svan- 'sound': svan-ayaid.; svar-'sound': svar-áya- (AV.) id.5

a. If long by nature or position medial a remains unchanged, the causative sense being more often lacking than present: thus arc- 'shine': arcaya- 'cause to shine';  $k\bar{a}s$ - 'appear':  $k\bar{a}s$ - 'aya- (AV.) 'cause to be viewed'; krand- 'roar': krand-áya- 'cause to roar'; cakṣ- 'see': cakṣ-aya- 'cause to appear'; chand- 'seem': chand-ava- id.; jambh- 'chew up', 'crush': jambh-áya- id.; taṃs-'set in motion': tams-áya-id.; dambh- 'destroy': dambh-áya- id.; bādh- 'oppress' : bādh-aya- (AV.) 'force'; bhaks- 'partake of' : bhaks-áya- id.; mamh- 'bestow' : mamh-áya id.; mand- 'gladden' : mand-áya- 'satisfy' ; yāc- 'ask' : yāc-áya- (AV.) 'cause to be asked for': ramh- 'hasten': ramh-áya- (AV.) id.; randh- 'make subject': randh-áya- id.; rāj- 'rule': rāj-aya- (AV. TS.) 'be king'; rādh- 'succeed' : rādh-aya- (AV.) 'make successful'; vakṣ- 'grow' : vakṣ-aya- 'cause to grow';

reading; cp. WHITNEY's note.

Finite forms of the simple root chad-do not occur; the part. channa- is found in B. root sat- occurs in V.; see WHITNEY, Roots, <sup>2</sup> In AV. xv. 10<sup>2</sup> the reading should be s. v. sat.

mānayet; see Whitney's note. the causative of sap-, is probably a wrong shining.

<sup>4</sup> No form or derivative of the simple

<sup>5</sup> Occurring only in the participle svaráyant-3 In AV. IV. 184 śāpaya, which would be am (AV. XIII. 22), which WHITNEY translates

s'ams-'proclaim': śams-áya-'cause to proclaim'; śrañc-'spread': śvañc-áya-'cause to spread out'; syand- 'flow': syand-aya- id.; sraṃs- 'fall': sraṃs-aya- (AV.) 'cause to fall'.

557. Final i, ŭ, r take Guna or Vrddhi, the latter being commoner.

a. The only example of a causative stem from a root ending in an i-vowel is that of kṣi- 'possess', which takes Guṇa: kṣay-áya- 'cause to dwell securely'.

b. Final ž takes Guṇa or Vṛddhi: cyu- 'waver' : cyāv-áya- 'shake'; dru- 'run' : drav-aya- 'flow' and drāv-áya- 'cause to flow'; bhū- 'become' : bhūv-áya- (AV.) 'cause to become'; yu- 'separate' : yav-aya- and yāv-áya- id.; śru- 'hear' : śrav-áya- and śrāv-áya- 'cause to hear'; śru- 'dissolve' : śrav-áya- and śrāv-aya- (Pp. śrav-) 'cause to move'; sru- 'flow' : srāvaya- (AV.) 'cause to flow'.

- c. Final r usually takes Vṛddhi; thus ghr- 'drip' :  $gh\bar{a}r$ -aya- (AV.) 'cause to drip'; dhr- 'hold' :  $dh\bar{a}r$ -dya- id.; pr- 'pass' :  $p\bar{a}r$ -dya- id.; pr- 'fill' :  $p\bar{a}r$ -dya- (AV.) 'fulfil'; mr- 'die' :  $m\bar{a}r$ -dya- (AV.) 'kill'; vr- 'confine' :  $v\bar{a}r$ -dya- id. Two causatives have the Guṇa as well as the Vṛddhi form: jr- 'waste away' : jar-dya- and  $j\bar{a}r$ -dya- (Pp. jar-) 'wear out', 'cause to grow old'; sr- 'flow' : sar-dya- id. and  $s\bar{a}r$ -aya- 'cause to flow'. One root in r takes Guṇa only: dr- 'pierce' : dar-dya- 'shatter'.
- 558. Roots ending in  $-\bar{a}$  form their causative stem by adding -paya; thus  $k\bar{s}\bar{a}$  'burn':  $k\bar{s}\bar{a}$ -paya- (AV.) id.;  $gl\bar{a}$  'be weary':  $gl\bar{a}$ -paya- (Pp.  $gl\bar{a}p$ -) 'exhaust';  $d\bar{a}$  'give':  $d\bar{a}$ -paya- (AV.) 'cause to give';  $dh\bar{a}$  'put':  $dh\bar{a}$ -paya- 'cause to put';  $dh\bar{a}$  'suck':  $dh\bar{a}$ -paya- 'suckle';  $ml\bar{a}$  'relax' (intr.):  $ml\bar{a}$ -paya- (AV.) 'relax' (tr.);  $v\bar{a}$  'blow':  $v\bar{a}$ -paya- 'fan';  $sth\bar{a}$  'stand':  $sth\bar{a}$ -paya- 'set up';  $sn\bar{a}$  'wash' (intr.):  $sn\bar{a}$ -paya- (bathe' (tr.)². In three roots the  $\bar{a}$  is shortened:  $j\bar{n}\bar{a}$  'know':  $j\bar{n}a$ -paya- (AV.) 'cause to know';  $sr\bar{a}$  'boil': sra-paya- (AV. TS.) 'cook';  $sn\bar{a}$  'wash': sna-paya- (AV.) beside  $sn\bar{a}$ -paya- 'bathe' (tr.).
- a. A few roots ending in other vowels take -paya. Two stems are formed by adding the suffix to the gunated root: kṣi- 'possess': kṣe-paya-'cause to dwell' beside kṣay áya-; r- 'go': arpaya- 'cause to go'. In the VS. two roots in i substitute ā for that vowel before -paya: ji- 'conquer': jā-paya-'cause to win'; śri- 'resort': (ud-)śrā-paya- (VS¹.) 'raise'.
- $\alpha$ . Two roots with initial p and ending in  $-\bar{a}$  do not form their causative stem with -paya, but add the ordinary suffix -aya with interposed y:  $p\bar{a}$  'drink':  $p\bar{y}y$ -aya-, 'cause to drink';  $py\bar{a}$  'overflow':  $(\bar{a}$ - $)py\bar{a}y$ -aya- (AV.) 'fill up'. This seeming irregularity is doubtless due to the original form of the root 3.

#### Inflexion.

- 559. The causative is inflected regularly like the verbs of the a-conjugation in both voices. It is to be noted, however, that in the 1. pl. presthe termination -masi occurs in the RV. and AV. ten times as often as -mas; that in the 2. pl. no forms in -thana are met with; and that in the 3. sing. mid. e never appears for -ate.
- a. The forms of the present indicative active and middle, which actually occur, would if made from kalpáya- be the following:

Active. Sing. 1. kalpayāmi. 2. kalpáyasi. 3. kalpáyati. — Du. 2. kalpáyathas. 3. kalpayatas. — Pl. 1. kalpayāmasi and kalpáyāmas. 2. kalpáyathä. 3. kalpáyanti.

Middle. Sing. 1. kalpáye. 2. kalpáyase. 3. kalpáyate. — Du. 2. kalpáyethe. 3. kalpáyete. — Pl. 1. kalpayāmahe. 3. kalpáyante.

Forms that occur elsewhere in the present system are the following:

This root, of which only three forms occur in the RV., seems to be only a varied spelling for strue 'flow'.

2 The causative stem hā-paya-, from hā-occur in the RV., seems to be only a varied spelling for strue 'flow'.

3 See above 27 a 1 and 4.

- b. Subjunctive. Active. Sing. 1. cetáyāni (TS. III. 2.10²; MS. IV. 5³), randhayāni. 2. codáyāsi, mṛláyāsi, randháyāsi (AV.), vartayāsi (TS. VII. 4.20¹); janáyās (AV.), yāvayīs (AV.), yodháyās. 3. ardayāti (AV.), kalpáyāti, tarpayāti (AV.), pādayāti (AV.), pārayāti, pūrayāti (AV.), māráyāti (AV.), mṛláyāti, rājayāti (TS. II. 4.14²), sūdayāti; kalpayāt (AV.), codáyāt, pāráyāt, marcáyāt, sūdayāt, sāyáyāt (TS. I. 8.6²). Du. 1. īráyāva. 2. dhāpayāthas (AV.), pādayāthas (AV.), vāsayāthas (AV.), sādayāthas (AV.). 3. kūļayātas. Pl. 1. īrayāma, dhārayāma. 2. chadáyātha, vardhayātha (AV.). 3. śrapáyān (TS. IV. I. 5¹). Middle. Sing. 2. kāmáyāse, codáyāse, josáyāse, mādáyāse, yātayāse, mūdayāthās (AV. IV. 25°). 3. codayāte, chandayāte, dhārayāte, mādáyīte, vartayāte; tīnkháyātai (AV.), cetáyātai (TS. I. 1.13²), dhārayātai (AV.), rājayātai (AV.), vārayātai (AV.). Du. I. tīnkhayāvahai, kalpayāvahai, janayāvahai (AV.). 3. mādáyaite. Pl. 2. kāmáyādhve, mādayādhve; mādayādhvai.
- c. Optative. This mood is very rare, only four forms occurring in the RV. and two in the AV. Sing. 2. janayes (Kh. II. 104), dhārayes. 3. mānayet (AV.), vādayet (AA. III. 2.5), vešayet (AV.), sprhayet. Pl. 1. citiyema, marjayema.
- d. Imperative. Forms of this mood are common, nearly 120 occurring in the RV.; of these, however, quite one half are in the 2 sing act. No forms of the 3 sing and du mid are met with in the RV. No impv in -tāt is found in the RV. and only one in the AV: 2 sing dhārayatāt. The forms actually occurring, if made from kalpúya-, would be the following:

Active. Sing. 2. kalpáyā and kalpayatāt (ÁV.). 3. kalpayatu. — Du. 2. kalpáyatam. 3. kalpayatām. — Pl. 2. kalpáyatā. 3. kalpáyantu.

Middle. Sing. 2. kalpáyasva. — Du. 2. kalpáyethām. — Pl. 2. kalpáyadhvam. 3. kalpayantām.

- e. Participles. The active participle in -ant, with fem. in -\(\bar{\tau}\), is common; e. g. jan-áyant-, f. jan-áyant-\(\bar{\tau}\) 'producing'. The middle participle, which is always formed with -m\(\bar{\tau}\)na, is rare. In the RV. are found only maháya-m\(\bar{\tau}\)na- 'glorifying', y\(\bar{\tau}\)táya-m\(\bar{\tau}\)na- 'reaching', vardháya-m\(\bar{\tau}\)na- 'increasing', and in the AV. only k\(\bar{\tau}\)máya-m\(\bar{\tau}\)na- 'desiring'; in the TS. (IV. 2. 62) c\(\bar{\tau}\)táya-m\(\bar{\tau}\)na-.
- f. Imperfect. Forms of this tense, both augmented and unaugmented, are frequent. In the RV. some 130 occur in the active, about two-thirds of which are in the 2. and 3. sing. Middle forms are rare except in the 3. pl. In the active the 1. and 3. du., and 1. and 2. pl. are wanting; in the middle all the 1. persons and the 3. du. are unrepresented. Some 50 unaugmented forms are used as injunctives in the RV.2. The forms actually occurring, if made from janáya-, would be the following:

Active. Sing. 1. ajanayam; janayam. 2. ájanayas; janáyas. 3. ájanayat; janáyat. — Du. 2. ájanayatam. — Pl. 3. ájanayan; janayan.

Middle. Sing. 2. ajanayathās; janáyathās. 3. ájanayata; janayata. — Du. 2. ájanayethām. — Pl. 2. ajanayadhvam. 3. ájanayanta; janáyanta.

560. Outside the present system very few causative forms occur. These are found in the following formations.

- a. Future. Only four forms occur in the RV. and AV. Active. Sing. 1. dūṣayiṣyámi (AV.). 3. dhārayiṣyáti. Middle. Sing. 2. vāsayiṣyáse 'wilt adorn thyself'. 3. vārayiṣyate (AV.) 'will shield'.
- b. Perfect. The only example of a periphrastic perfect occurring in the Samhitas is made from a causative stem: gamayán cakāra (AV.).
- c. Aorist. The reduplicated aorist has attached itself to the causative, probably because the intensive character of the reduplicated form became

In K. the forms yamayatāt and cyāvayatāt occur; and in pl. 2. the unexampled ending dhvāt in vārayadhvāt: WHITNEY 1043 d.

<sup>2</sup> See AVERY 264.

associated with the originally iterative meaning of the causative. But in form it is unconnected with the causative stem, being derived directly from the root; and more than one-third of the verbs which form it in the RV., and about one-fifth in the AV., have no causative stem in -aya. There are, however, eight forms which are actually made from the causative stem: Sing. 1. arp-ip-am (AV.) from ar-paya-; 2. jīhip-as from hā-paya-1 'cause to depart'; atisthip-as and 3. átisthip-at from sthā-paya- 'fasten'; ajijnip-at (TS.) from jñāpaya- 'cause to know'; Pl. 2. ájījap-ata (VS.) from jāpaya- 'cause to conquer' (1/ji-); Sing. 2. act. bībhiṣ-as (TS.) and mid. bībhiṣ-athīs from bhī-ṣaya- 'frighten', anomalous causative of bhī-'fear'.

a. There are besides three is-aorists formed from the causative stem: vyathay-īs (AV.) from vyathaya- 'disturb'; ailay-īt (AV.) from ilaya- 'has quieted down'; dhianay-tt' from dhianaya- 'envelope'.

561. Nominal derivatives. a. The only present passive participle appears in the form bhāj-yá-māna- (AV. XII. 528). There are also a few past participles: ghār-i-ta- (AV.) 'smeared'; cod-i-tá- 'impelled'; -veś-i-ta- (AV.) 'caused to enter'.

b. A few gerundives in -āyya are formed from causative stems: trayay-ล้งขล- 'to be guarded'; panay-ล้งขล- 'admirable'; sprhay-ล้งบล- 'desirable'3.

c. Ten infinitives formed with -dhyai from the causative stem are met with in the RV.: isáyadhyai, īráyadhyai, tamsayúdhyai, nāśayúdhyai, mandayádhyai, mādayádhyai, riṣayádhyai, vartayádhyai, vājayádhyai, syandayádhyai t.

**d.** Four gerunds formed with  $-t\nu\bar{a}$  from causative stems are met with in the AV.: arpay-i-tvá, kalpay-i-tvá, sāday-i-tvá, sramsay-i-tvá.

e. Finally several ordinary nouns are derived from the causative stem with various suffixes; a few verbal nouns in -ana: árp-ana- (AV.) 'thrusting'; -bhi-s-ana- 'frightening'; one or two agent nouns in -tp', f. -tr-i: coday-i-tr-i-'stimulator'; bodhay-i-t/- 'awakener'; a few adjectives in  $-\dot{a}$  as second members of compounds: ati-pārayá- 'putting across'; ni-dhārayá- 'putting down'; vācamīikhayá- 'voice-impelling'; viśvam-ejaya- 'all-stimulating'; an adjective in -ā/u: patay-āli- (AV.) 'flying'; five adjectives in -iṣnú: tāpay-iṣṇi- 'tormenting'; namay-iṣṇu- 'bending'; patay-iṣṇi- 'flying'; pāray-iṣṇi- 'rescuing'; māday-iṣṇu-'intoxicating'; seven adjectives in -itnú: -āmay-itnú- 'making ill'; tanay-itnú-'thundering'; drāvay-itnu-'speeding'; poṣay-itnu-'nourishing'; māday-itnu-'intoxicating'; sūday·itnú- 'streaming sweetness'; stanay·itnú- m. 'thunder'; and three adjectives in -u: dhāray-ú- 'streaming' 5; bhāvay-ú- 'animating'; manday-ú-'rejoicing'.

## 4. The Denominative.

DELBRÜCK, Verbum p. 201-209, 216-218. — AVERY, Verb-Inflection 272-274. — WHITNEY, Sanskrit Grammar 1053—1068. — v. NEGELEIN, Zur Sprachgeschichte 40—44. — Cp. Brugmann, KG. 693—696.

562. The denominative is nearly always formed from a nominal stem with the suffix -ya. The latter is normally accented; but a certain number of unmistakable denominatives, such as mantrá-ya-te 'takes counsel', have the causative accent and thus form a connecting link between the regular denominatives and the causatives<sup>6</sup>. The formation is a frequent one, more than a hundred denominative stems occurring in the RV., and in the AV. about

The stem hā-paya- does not itself other- | BR. and GRASSMANN to be analyzed as dhāra-yú-.

wise occur in V.; cp. p. 396 note 2.

<sup>2</sup> The TS. IV. 6. 92 has instead dhvanayit.

<sup>3</sup> See below 579.

<sup>585, 7.</sup> 

<sup>6</sup> There can be little doubt that the denominative suffix -ya is identical with that 4 Cp. Delbrück, Verbum 211; and below of the causative as well as that of the verbs of the fourth class; cp. WHITNEY 1055 a; 5 WHITNEY, Roots, s. v. dhr; according to v. Negelein 44; Brugmann, KG. 690, 694.

thirty (or about fifty if those which form present participles or derivative nouns only are included). The general meaning of the denominative is that the subject expressed by the inflexion stands in some relation to the noun from which the stem is formed. It may usually be rendered by 'be or act like'; 'regard or treat as'; 'turn into or use as'; 'wish for'.

Denominatives formed with  $-y\alpha$  are best classified according to the final

of the nominal stem to which the suffix is added.

563. Stems in -a, which usually remains unchanged; thus amitra-yá'act like an enemy', 'be hostile'; indra-ya- 'behave like Indra'; ksema-yá- 'take
a rest'; jāra-ya- 'treat like a lover', 'caress'; deva-yá- 'serve the gods';
vusma-yá- 'seek you'; vasna-yá- 'deal with the price', 'bargain'.

With the causative accent: (pary-)ankhá-ya-¹ 'clasp (round)'; arthá-ya-¹ 'have as a desire'; rtá-ya- 'act according to sacred order'; kulāyá-ya- 'build a nest'; nīḍá-ya- 'bring together'; pāḍá-ya- (AV.) 'act as guardian', 'protect'; mantrá-ya- 'take counsel'; mṛgá-ya- 'treat as a wild animal', 'hunt'; vavrá-ya; 'put in hiding', 'shrink from'; vājá-ya- 'act like a steed', 'race' (beside vāja-yá-)-vīrá-ya- 'play the man'; sa-bhāgá-ya- (AV.) 'apportion'².

- a. One or two denominatives are from nominal stems extended with -a: iş-á-ya-'have strength' (iṣ-)³;  $\bar{u}rj$ -á-ya- 'have strength' ( $\bar{u}rj$ -)⁴.
- a. The -a is, however, often lengthened:  $agh\bar{a}-y\dot{a}$  'plan mischief';  $ajir\bar{a}-ya$  'be swift';  $amitr\bar{a}-y\dot{a}$  (AV.) 'be hostile' (Pp.  $-\ddot{a}y\dot{a}$ -);  $a\dot{s}v\bar{a}-y\dot{a}$  'desire horses';  $rt\bar{a}-y\dot{a}$  'observe sacred order' (beside  $rt\dot{a}-ya$ -);  $tilvil\bar{a}-y\dot{a}$  'be fertile';  $tud\bar{a}-y\dot{a}$  (AV.) 'thrust';  $dh\bar{u}p\bar{a}-y\dot{a}$ -5 (MS. AV.) 'be like smoke', 'fume';  $priy\bar{x}-y\dot{a}$ -'become friends';  $math\bar{x}-y\dot{a}$  (AV.) 'shake';  $mus\bar{a}-ya$ -6 (AV.) 'steal';  $yaj\bar{n}\bar{a}-y\dot{a}$ -'sacrifice';  $rathir\bar{a}-y\dot{a}$  'be conveyed in a car';  $randhan\bar{a}-ya$ -7 'make subject';  $vrs\bar{a}-y\dot{a}$  'act like a bull' s';  $sam\bar{a}-y\dot{a}$  'be active' (sama-);  $subh\bar{a}-y\dot{a}$  'be beautiful'9;  $srath\bar{a}-ya$  'make loose' (Pp.  $-\ddot{a}ya$ -) <sup>10</sup>;  $satvan\bar{a}-y\dot{a}$  (AV.) 'act like a warrior';  $sumn\bar{a}-y\dot{a}$  'show benevolence';  $skabh\bar{a}-y\dot{a}$  'make firm'. In most of these examples the Pada text has a short a.
- a. The denominative  $oj\bar{a}$ - $y\acute{a}$  'employ force' is formed from oja-, shortened for  $\acute{o}jas$ -'strength'.
- b. The -a of the nominal stem is sometimes changed to -7: adhvarī-yá'perform the sacrifice' (adhvará-); caranī-yá- 'follow a course' (cárana-),
  'pursue'; tavisī-yá- 'be strong' (tavisá-); putrī-yá- 'desire a son' (putrá-);
  rathī-yá- 'drive in a car' (rátha-); śapathī-yá- (AV.) 'utter a curse' (śapátha-).
  In nearly every instance here the Pada text has ř. Even in the Samhitā text
  the AV. has putri-yá- 'desire a son', and the RV. the denominative participle
  (with shifted accent) ánni-yant- 'desiring food' (ánna-).
- a. For the a of the nominal stem a is substituted in vare-yá- 'play the wooer' (vára-), 'woo'.
- c. The final -a of the nominal stem is sometimes dropped 11: adhvar-yá'perform sacrifice' (beside adhvarī-yá-); kṛpaṇ-yá- 'be eager'; taviṣ-yá- 'be

r Regarded as a causative by GRASSMANN, s. v. ankh.

<sup>&</sup>lt;sup>2</sup> DELBRÜCK 189, I regards the form hástayatas as a denominative; but the accent would be unique: its explanation by BR. and GRASSMANN as a compound, hásta-yatas 'wielded by the hand', is doubtless the correct one.

<sup>3</sup> Cp. Delbrück 189, 2.

<sup>4</sup> GRASSMANN regards this verb as a causati ve: see Wörterbuch, s. v. ūrjáy.

<sup>5</sup> See Whitney's note on AV. IV. 196.

<sup>6</sup> See WHITNEY on AV. IV. 212.

<sup>7</sup> Based on randhana, an assumed derivative of the root randh.

<sup>8</sup> Beside vṛṣan-yá-, from vṛṣa-, the form which vṛṣan- assumes before terminations or before second members of compounds beginning with consonants.

<sup>9</sup> From śubha-, an assumed derivative of śubh- 'shine'.

<sup>10</sup> There is also a causative form śratháya-, from śrath- 'loosen'.

<sup>11</sup> Cp. v. Negelein 40.

mighty' (beside taviṣt-yá-); turaṇ-yá- 'be speedy'; daman-ya-¹ 'overpower'; bhuraṇ-yá- 'be active'; vithur-yá- 'stagger'; saraṇ-yá- 'hasten'. There are several other denominatives which presuppose nouns in -ana: thus dhiṣaṇ-yá- 'pay attention'; riṣaṇ-yá- 'commit faults'; ruvaṇ-ya- 'roar'; huvaṇ-ya- 'call'. The derivation of iṣaṇ-yá- beside iṣaṇa-ya- 'impel' is perhaps similar; but the nominal stem on which this denominative is based may be iṣáṇi- 'impulse' ².

- 564. Stems in  $-\bar{a}$ , which usually remains unchanged:  $gop\bar{a}$ - $y\acute{a}$  'act as herdsman', 'protect';  $jm\bar{a}$ - $y\acute{a}$  'speed to earth';  $ducchun\bar{a}$ - $y\acute{a}$  'desire mischief' i pr $tan\bar{a}$ - $y\acute{a}$  'fight';  $bhandan\bar{a}$ - $y\acute{a}$  'strive for glory';  $man\bar{a}$ - $y\acute{a}$  'feel attachment';  $ra\acute{s}an\bar{a}$ - $y\acute{a}$  (AV.)4 'put on a girdle'. Similar stems are to be assumed in  $rgh\bar{a}$ - $y\acute{a}$  'tremble', and  $hrn\bar{a}$ - $y\acute{a}$  'be wrathful'; and  $dhiy\bar{a}$ - $y\acute{a}$  'pay attention' is based on  $dhiy\bar{a}$ -i thought'.
- a. The  $-\bar{a}$  of the nominal stem is once shortened, if kr/a- $y\dot{a}$  (RVI.) 'mourn'6 is a denominative and different from the causative  $kr/\dot{a}$ - $y\dot{a}$  (554). The  $\bar{a}$  is dropped in prtan- $y\dot{a}$  'fight' beside  $prtan\bar{a}$ - $y\dot{a}$ -.
- a. There are more than a dozen denominatives with  $\bar{a}$  preceding -ya-, without any corresponding noun in  $\check{a}$ ; thus  $as\bar{a}$ -ya-' attain' ?;  $tud\bar{a}$ -ja- (AV.) 'thrust';  $dam\bar{a}$ -ya-' 'tame' ?;  $nas\bar{a}$ -ya-8 (x. 406) 'reach';  $pan\bar{a}$ -ya-' 'boast of';  $vas\bar{a}$ -ya-' 'invest oneself with';  $vas\bar{a}$ -ya-' cause to rain' 9. Seven such denominatives, however, appear beside present bases according to the ninth class in  $-n\bar{a}$ :  $grbh\bar{a}$ -yá-' seize' (grbh- $n\bar{a}$ -);  $math\bar{a}$ -yá-' shake' (math- $n\bar{a}$ -);  $prus\bar{a}$ -yá-' drip' (prus-nant-, VS.);  $mus\bar{a}$ -yá-' steal' (mus-na-);  $srath\bar{a}$ -ya-' loosen' (srath-na-);  $skabh\bar{a}$ -yá-' fasten' (skabh-na-);  $stabh\bar{a}$ -yá- 'support' (stabh-na-).

565. Stems in -i, which is nearly always lengthened (though usually short in the Pada text):  $ar\bar{a}t\bar{i}$ -yá- (RV. VS.) 'be malevolent', but  $ar\bar{a}t\bar{i}$ -yá- (AV. and RV. Pp.);  $kav\bar{\imath}$ -yá- 'be wise';  $jan\bar{\imath}$ -yá- 'seek a wife', but  $jan\bar{\imath}$ -yá- (AV.); dur- $grbh\bar{\imath}$ -ya- 'be hard to grasp';  $mah\bar{\imath}$ -yá- 'be delight:d';  $ray\bar{\imath}$ -yá- 'desire wealth';  $sakh\bar{\imath}$ -yá- 'seek friendship'.

 $\alpha$ . In a few instances the i is either treated as  $\alpha$  or takes Guṇa of which the final element is dropped (-a-ya = -ay-ya): thus i sana-ya- 'set in motion' ( $i s \acute{\alpha} n i$ - 'impulse');  $k \bar{l} r t \acute{\alpha} \cdot ya$ - (AV.) 'make mention of' ( $k \dot{r} r \acute{t} \cdot ya$ - 'resound' ( $d \dot{r} \acute{u} n i$ - 'sounding');  $s u s v a \cdot y \acute{a}$ - and  $s u s v \acute{\alpha} \cdot ya$ - 'flow' ( $s \dot{u} s v \cdot i$ -11' 'pressing'). Perhaps formed in the same way are  $s r u d h \bar{r} \cdot y \acute{a}$ - 'obey' and  $h r n \bar{r} \cdot y \acute{a}$ - 'be angry' 12.

β. pátya- 'be a lord', 'rule', probably in origin a denominative of páti- 'lord', is

treated like a verb of the fourth class as if from a root pat-.

566. Stems in -u, which (except gātu-yá- twice) is always long (though always short in Pp.): asū-yá- 'grumble'; rjū-yá- 'be straight'; kratū-yá- 'exert the intellect'; gātū-yá- and gātu-yá- 'set in motion'; pitū-yá- 'desire nourishment'; valgū-yá- 'treat kindly'; vasū-yá- 'desire wealth'; śatrū-yá- 'play the enemy', 'be hostile'; sukratū-ya- 'show oneself wise'. Moreover, iṣū-ya- 'strive', may be derived from iṣu- 'arrow'; and nouns in -u are presupposed by aṅkū-yá- 'move tortuously', and stabhū-yá- 'stand firm'.

a. In go-, the only stem in -o, the diphthong becomes -av before the denominative suffix: gav-yá- 'desire cows'.

like a bull'.

\* From an assumed adjective derivative damana.

<sup>2</sup> Cp. Delbrück 189, 4.

3 The Pada text wrongly ducchunayá.

8 DELBRÜCK, l. c., regards naśāya- (x. 406)
as a denominative, BR. as causative of naś-.
9 To be distinguished from vṛṣāyá- 'act

10 Cp. v. NEGELEIN 41 (middle).

11 From the reduplicated root su- 'press'.

12 According to Delbrück 205, p. 57, also duhīya- in the forms duhīyat and duhīya (optatives Grassmann, Wörterbuch, and Whitney, Roots, s. v. duh). Cp. 450, 25.

<sup>4</sup> Cp. WHITNEY'S note on AV. XIV. 2<sup>74</sup>. 5 Which perhaps became an independent noun through the influence of the instrumental form in such compounds as *dhiyā-jin*-'growing old in devotion'.

<sup>6</sup> Cp. Grassmann, s. v. krpay. 7 Cp. Delbrück 199 (p. 217, middle).

- 567. Consonant stems usually remain unchanged before the suffix.
- a. The only stem ending in -j is bhisáj- 'physician': bhisaj-yá- 'play the physician', 'heal'.
- b. There is one denominative, *iṣudh-yá-* 'implore', which seems to presuppose a stem in -dh, viz. *iṣudh-¹*, but is probably a denominative from *iṣu-dhi-* (like pátya- 'from páti-) 'put in the arrow', 'aim' <sup>2</sup>.
- c. Denominatives formed from stems in -n are ukṣan-yá- 'act like a bull'; udan-yá- 'irrigate'; brahman-yá- 'be devout' ('act like a brahmán'); vṛṣan-yá- 'act like a bull', 'be lustful'.
- d. A denominative formed from a stem in -ar is vadhar-yá- hurl a bolt (vádhar-). Stems in -ar are further presupposed in rathar-yá- ride in a car'; śrathar-yá- become loose'; sapar-yá- worship'.
- e. The consonant stems most frequently used to form denominatives are those in -as:  $apas-y\acute{a}$  'be active';  $avas-y\acute{a}$  'seek help';  $canas-y\acute{a}$  'be satisfied';  $duvas-y\acute{a}$  'adore';  $namas-y\acute{a}$  'pay homage'; nr- $manas-y\acute{a}$  'be kindly disposed to men';  $manas-y\acute{a}$  'bear in mind';  $vacas-y\acute{a}$  'be audible';  $varivas-y\acute{a}$  'grant space';  $sravas-y\acute{a}$  'hasten'; sa- $canas-y\acute{a}$  'cherish'; su- $manas-y\acute{a}$  'be gracious'; sv- $apas-y\acute{a}$  'act well'. Stems in -as are further presupposed by  $iras-y\acute{a}$  'be angry';  $das'as-y\acute{a}$  'render service to';  $panas-y\acute{a}$  'excite admiration';  $sacas-y\acute{a}$  'receive care'. A few denominatives have further been formed from stems in -a following the analogy of those in -as; thus  $makhas-y\acute{a}$  'be cheerful'  $(makh\acute{a}$ -) and su- $makhas-y\acute{a}$  (TS.) 'be merry';  $m\ddot{a}navas-y\acute{a}$  'act like men'  $(m\ddot{a}nav\acute{a}$ -). The stem  $avis-y\acute{a}$ -, appearing in the participle  $avisy\acute{a}nt$  'helping willingly', apparently a denominative (beside  $avisy\acute{a}$  'desire',  $avisy\acute{a}$  'desirous'), seems to be formed from \*av-is- av-as- 'favour'5.
- f. A few denominatives are formed from stems in -us: taruṣ-yá- 'engage in fight' (tár-us-); vanuṣ-yá- 'plot against' (van-ús- 'eager'); vapuṣ-ya- 'wonder' (váp-us- 'marvellous'). This analogy is followed by uru-ṣ-yá- 'seek wide space' from a stem in -u (urú- 'wide').
- 568. There are a few denominative forms made without a suffix direct from nominal stems, but they nearly always have beside them denominative stems in -ya; thus bhiṣák-ti (VIII. 79²) 'heals' 3. sing. from bhiṣáj- 'act as physician' (also m. 'physician'); a-bhiṣṇak (X. 131⁵), 3. sing. impf. of bhiṣṇaj- 'heal'. Similarly there appear the forms sing. 2. iṣaṇa-s, 3. iṣaṇa-t, pl. 3. iṣaṇa-nta beside iṣaṇ-yá-; pl. 3. kṛpáṇa-nta beside kṛpaṇ-yá-; pl. 1. taruṣe-ma, 3. táruṣa-nte, taruṣa-nta beside taruṣ-yá-; pl. 3 vanuṣa-nta beside vanuṣ-yá-. Possibly the form váṇanvati is a denominative meaning 'is at hand', from a noun \*van-anu-, beside the simple verb van- 'win'6.

#### Inflexion.

569. The denominative is regularly inflected throughout the present system according to the  $\alpha$ -conjugation in both voices. The commonest form is the 3. sing. active and middle.

The forms of the present indicative active and middle that actually occur would, if made from manas-yá-'bear in mind', be the following:

Active. Sing. 1. manasyāmi (AV.). 2. manasyási. 3. manasyáti. — Du. 2. manasyáthas. 3. manasyátas. — Pl. 1. manasyāmasi and manasyámas. 2. manasyatha. 3. manasyánti.

Middle. Sing. 1. manasyé. 2. manasyáse. 3. manasyáte. — Du. 2. manasyéthe. 3. manasyéthe (AV.). — Pl. 1. manasyámahe. 3. manasyánte.

Indo-arische Philologie. I, 4.

<sup>&</sup>lt;sup>1</sup> Cp. Delbrück 194.

<sup>&</sup>lt;sup>2</sup> Cp. Grassmann, s. v. isudhy.

<sup>3</sup> Beside vṛṣāyá-; cp. p. 399, note 8.

<sup>4</sup> According to BR. derived from sravas-

from śru- = sru- 'flow', but GRASSMANN from śru- 'hear'.

<sup>5</sup> Cp. Grassmann, s. v. avisy.

<sup>6</sup> Cp. Delbrück p. 218.

F, ==--

Forms that actually occur elsewhere in the present system are the

following:

a. Subjunctive. Active. Sing. 1. namasyā. — 2. urusyās, kīrtávās (AV.), śravasyás. — 3. apasyát, arātīyát (TS. IV. 1. 103; VS. XI. 80), arātīyát (AV.), urusyāt, caranyāt (AV.), durasyāt (AV.), duvasyāt, prtanyāt, vanusyāt, vareyāt, vasūyāt, śravasyāt, saparyāt. — Du. 3. varivasyātas. — Pl. 3. prtanyān (AV.), saparyán, saranyán. — Middle. Sing. 2. artháyāse, nīláyāse. — 3. ankháyāte.

b. Injunctive. Active. Sing. 2. irasyas, risanyas, ruvanyas. — Pl. 3. turanyan, duvasyan, namasyan, saparyan. — Middle. Sing. 3. panāyata. — Pl. 3. rghāyánta, rtayanta, krpánanta, taruṣanta, dhunayanta, rucayanta.

vanusanta, susváyanta.

c. Optative. Active. Sing. 2. daśasyes. — 3. urusyet, caranyet (TS. 1. 8. 221), daśasyet, duvasyét. — Pl. 1. isayema, taruṣema, saparyéma. — Middle. Sing. 3. manasyéta (AV.).

d. Imperative. Active. Sing. 2. iṣaṇya, uruṣyá, gātuyá, gūrdhaya, gopāyá (AV. TS.), grbhāya, daśasyá, duvasya, namasyá, varivasyá, vājaya (TS. 1. 7. 81), śrathāya, saparya. — 3. urusyatu, gopāyatu<sup>2</sup> (AV.), bhisajyatu (TS. v. 2. 12<sup>2</sup>). — Du. 2. uruṣyátam, gopāyátam, canasyátam, daśasyátam. — 3. urusyátām. — Pl. 2. iṣanyata, urusyata, grbhāyáta (AV.), gopāyata (AV.), daśasyata, duvasyáta, namasyáta, risanyata, saparyata. — 3. urusyantu, gopāyantu (AV.), varivasyantu. — Middle. Sing. 2. arthayasva, vīráyasva (AV. TS.), vṛṣāyasva (AV.). — Pl. 2. tilvilāyádhvam, vīráyadhvam. — 3. dhunayantām.

e. Participle. The present participle active in -ant (with fem. -ant-ī) is very common, while the middle form in -mana, occurs fairly often.

a. Examples of the active are aghāyánt-, ankūyánt-, adhvarīyánt-, amitrayánt-, arātīyánt-, aśvāyánt-, iṣaṇyánt-, iṣáyant- and iṣayánt-, iṣūyánt-, udanyánt-, ūrjáyant-, rghāyánt-, rtáyant-, rtāyánt-, gavyánt-, gopāyánt- (AV.), tavisīyánt-, daśasyánt-, duvasyánt-, devayánt-, namasyánt-, pāláyant- (AV.), putrīyánt-, prtanāyánt-, prtanyánt-, bhandanāyánt-, bhuranyánt-, mathāyánt-, muṣāyánt-, yajñāyánt-, yuṣmayánt-, rathirāyánt-, rathīyánt-, vasūyánt-, vasnayánt-, vājáyant- and vājayánt-, vṛṣanyánt-, śatrūyánt-, śīkāyánt- (VS.) 'dripping', sakhīyánt-, satvanāyánt- (AV.), saparyánt-, sumnāyánt-, susváyant-, hrnāyánt-'angry'.

β. Examples of the middle are rghāyámāna-, rjūyámāna-, ojāyámāna-, kandūyámāna- (TS.), kavīyámāna-, caranīyámāna-, tavisyámāna-, priyāyámāna-(AV.), (á-prati-)manyūyamāna- (AV.), rašanāyámāna-, vṛṣāyámāna-, samanayámāna-, sumakhasyámāna- (TS.), sumanasyámāna-, stabhūyámāna-, svapasyá-

māna-, hṛṇīyámāna- 'angry'.

f. Imperfect. Active. Sing. 2. arandhanāyas. — 3. aprtanyat, áskabhāyat (AV.); uruṣyat, damanyat, dhūpāyat (AV.); abhiṣṇak. — Du. 3. uruşyátām. — Pl. 3. anamasyan, asaparyan; turanyan, vapuşyan, saparyan (TS. II. 2. 124). — Middle. Sing. 3. ápriyāyata. — Du. 2. avīrayethām. — Pl. 3. isanayanta.

570. Outside the present system no denominative form occurs in the RV. except  $\bar{u}nay\bar{\iota}s$  (+AV.), 2. sing. is- aorist (used injunctively with  $m\dot{a}$ )

very frequent go-pā- 'cowherd', of which gup- should be a denominative of go- 'cow' two transition forms according to the a- (v. NEGELEIN 43, note 5) is not clear.

The form bhurájanta (IV. 43<sup>5</sup>) is according to pw. = bhrajanta for bhrajjanta (bhrajj- 'be the denominative must be due the secon-coasted'). Cp. note in OLDENBERG's Rgveda.

This denominative is derived from the twice in the RV.). Cp. p. 358, note 13. How the converted to the result of the resu

from  $\bar{u}naya$ - 'leave unfulfilled' ( $\bar{u}nd$ -). A few other forms occur in the later Samhitās. Thus the AV. has the peculiar form dsaparyait (AV. xiv.  $2^{20}$ )<sup>1</sup>, probably 3. sing. aorist, with -ait for - $\bar{u}t$ <sup>2</sup>. The VS. (II. 31) has the 3. pl. aorist  $d_a - vr s \bar{u} y - is - ata$  'they have accepted'. The TS. has the 2. pl. aor.  $p \bar{u} p a y - is - ta$  'lead into evil' (used injunctively with m d). The TS. (III. 2. 83) has also the future participles  $kand\bar{u} y i s y dnt$ - 'about to scratch', megha y i s y dnt- 'about to be cloudy',  $s \bar{u} k \bar{u} y i s y dnt$ - 'about to drip', with the corresponding perfect participles passive  $kand\bar{u} y i t d$ -,  $s \bar{u} k \bar{u} t d$ -,  $s \bar{u}$ 

## B. Nominal Verb Forms.

571. A large number of nominal formations partake of the verbal character inasmuch as they express time (present, past, or future); or the relations between subject and object, implying transitive or intransitive action, and active, middle, or passive sense. Such formations are participles (including verbal adjectives), infinitives, and gerunds. The participles formed from tense-stems having already been treated 3, only those that are formed directly from the root remain to be dealt with. These are the verbal adjectives which have the value either of past passive participles or of future passive participles (otherwise called gerundives).

## a. Past Passive Participles.

573. When  $-t\acute{a}$  is added direct, the root tends to appear in its weak form. Very frequently, however, the form in which the root is generally stated, if ending in vowels, remains unchanged, while those ending in consonants are usually modified only in so far as is required by the rules of internal Sandhi; thus  $\sqrt{ml\bar{a}}$ :  $ml\bar{a}$ -tá- 'softened';  $\sqrt{y\bar{a}}$ :  $y\bar{a}$ -tá- 'gone';  $\sqrt{r\bar{a}}$ -:  $r\bar{a}$ -tá- 'given';  $\sqrt{ji}$ - : ji-tá- 'conquered';  $\sqrt{sri}$ - : sri-tá- 'leaning on';  $\sqrt{pr\bar{i}}$ - : prī-tá- 'rejoiced'; V bhī-: bhī-tá- 'frightened'; V yu- 1. 'yoke' and 2. 'ward off' :-yu-ta-; V śru-: śru-tá- 'heard'; V stu-: stu-tá- 'praised'; V bhū-: bhū-tá- 'become';  $\sqrt{h\bar{u}}$  :  $h\bar{u}$ - $t\acute{a}$ - 'called';  $\sqrt{kr}$ - : kr- $t\acute{a}$ - 'made';  $\sqrt{bkr}$ - : -bkr-ta- 'borne'; Vvr-: vr- $t\acute{a}$ - 'covered' and 'chosen'; Vmrc-: mrk- $t\acute{a}$ - $^5$  (RV.) 'injured'; Vsic-: sik- $t\acute{a}$ - 'poured out'; Vtij-: tik- $t\acute{a}$ - 'sharp'; Vyuj-: yuk- $t\acute{a}$ - 'yoked'; Vmrj-: mṛṣ-ṭá- 'rubbed'; V sṛṣ-: sṛṣ-ṭá- 'discharged'; V cit-: cit-tá- 'perceived'; V vṛt-: vrt-tá- 'turned'; V mad- 'be exhilarated': mat-tá- (AV.); V idh-: id-dhá- 'kindled'; V krudh -: krud-dhá- 'angry'; V tap -: tap -tá- 'hot'; V rip -: rip -tá- (RV.) 'besmeared';  $\sqrt{dis-i}$ : dis-ta-'shown';  $\sqrt{nas-i}$ : nas-ta-'lost';  $\sqrt{jus-i}$ : jus-ta-(RV'.) 'gladdened' and júṣ-ṭa- 'welcome'; V piṣ-: piṣ-ṭá- 'crushed'; V kas-: vi-kas-ta-'split'; Vguh-: gū-dhá-6 'hidden'; Vtrh-: tr-dhá- 'crushed'; Vdah-: dag-dhá-7 'burnt'; V dih-: dig-dhá- (AV.) 'besmeared'; V duh-: dug-dhá- 'milked'; V drh-

<sup>&</sup>lt;sup>1</sup> Cp. v. Negelein 41; Böhtlingk, ZDMG. | 52, 510 ff.

<sup>&</sup>lt;sup>2</sup> As in the AB. form agrabhaiṣam beside agrabhāt; cp. v. NEGELEIN 41, note 2.

<sup>3</sup> See under declension 311—313, and in the account of the various tenses (present, perfect, aorist, future).

<sup>4</sup> Cp. REICHELT, BB. 27, 95-97.

<sup>5</sup> Only in the compounds  $\acute{a}$ -mṛkia- and mṛki $\acute{a}$ -vāhas-.

<sup>6</sup> In roots in -h which cerebralize the suffix, the vowel is lengthened as compensation for the loss of the cerebral z: cp. p. 51, note 2.

<sup>7</sup> In the RV. only in agni-dagdhá- 'burnt

- : dr-dhá- 'firm'; V druh-: drug-dhá- 'hurtful'; 1 nah-: nad-dhá- 'bound'; 1 muh-: mug-dhá- and mū-dhá- (AV.) 'bewildered'; 1 rih-: rī-dhá- (RV.) 'licked'; 1 ruh-:  $r\bar{u}$ - $dh\acute{a}$ - (AV.) 'ascended';  $\sqrt{sah}$ - :  $s\bar{a}$ - $dh\acute{a}$ - 'overcome'.
- a. Occasional irregularities in the form of the root are not due to the ordinary rules of internal Sandhi. Thus some roots show an interchange of vowel and semi-vowel: thies of internal standin. This solute tools solve an internal solution with the divergence of the play': dyū-tá- (AV.); sīv- 'sew': syū-tá-; mīv- 'push': -mūta- (VS. AV.) instead of \*myū-ta-ta-1; hvy- 'make crooked' has hru-tá- 'crooked', beside the regular -hvy-ta- (RV.); sometimes a long vowel appears in the root: svad- 'sweeten': svāt-tá-; gur- 'greet': gūr-tá-; śy- 'mix': -sīr-ta-, beside śrī-tá- from śrī- 'mix', the usual form of the root; dā-'give', beside the regular form -dā-ta- in tvā-dāta- (RV.) 'given by thee', otherwise always has dat-tú-, formed from dad-, the weak form of the present base.
- 574. Roots which contain the syllables ya, ra, va (initial or medial) are generally weakened by Samprasāraṇa; those which contain a nasal (medial or final), by dropping it; those which end in  $\bar{a}$  or  $y\bar{a}$ , by shortening the former to  $\bar{\imath}$  or i, the latter to  $\bar{\imath}$ . Thus:
- yaj- 'sacrifice': is-tά-; vyadh- 'pierce': vid-dhά-; prach- 'ask': prs-tά-; bhraś- 'fall': bhṛṣ-tá- beside bhraṣ-tá- (AV.); vac- 'speak': uk-tá-; vap- 'strew' : up-tá-; vas- 'shine' : uṣ-ṭá-; vah- 'carry' : ū-ḍhá-; svap- 'sleep' : sup-tá-(AV. VS.).
- a. A shortening akin to Samprasāraņa appears in αν- 'favour' : -ū-ta-; νā- 'weave' : u-tá-; śrā- 'boil' : śṛ-tá- beside śrā-tá-.
- 2. A medial nasal is dropped in añj- 'anoint': ak-tá-; umbh- 'confine' : ub-dhá-; daṃś- 'bite' : daṣ-ṭá- (AV.); baṃh- 'make firm' : -bā-ḍha-; śundh-'purify':  $\int u d dh da$ . Final n and m are dropped (the radical a representing the sonant nasal) in kṣan-'wound':-kṣa-ta-; tan-'stretch':ta-tá-; man-'think':ma-tá-; han- 'smite' : ha-tá-; gam- 'go' : ga-tá-; nam- 'bend' : na-tá-; yam- 'reach' : ya-tá-.
- a. A few roots in -an have ā instead of -an2: khan- 'dig': khā-tá-; jan- 'be born': jā-tá-; van- 'win' :-vā-ta-; san- 'gain' : sā-tá-; while some roots in -am and one in -an, retaining the nasal, have an: dhvan- 'sound': dhvantá- (VS. xxxix. 7); kram- 'stride': kran-tá-(AV.); sam- 'be quiet'; san-ta- (AV.); sram- 'be weary': śran-ta-; dham- 'blow' has the irregular dhmā-tá- and dham-i-tá-.
- 3. Final  $\bar{a}$  is shortened to  $\bar{\imath}$  in  $g\bar{a}$  'sing' :  $g\bar{\imath}$ - $t\acute{a}$  ;  $dh\bar{a}$  'suck' :  $dh\bar{\imath}$ - $t\acute{a}$ -;  $p\bar{a}$ - 'drink' :  $p\bar{i}$ - $t\acute{a}$ - '5; to i in  $d\bar{a}$ - 'bind' : -di-ta-;  $dh\bar{a}$ - 'put' : -dhi-ta- and hi- $t\acute{a}$ -;  $m\bar{a}$ - 'measure' : mi- $t\acute{a}$ -;  $s\acute{a}$ - 'sharpen' :  $s\acute{a}$ - 'bind' : si- $t\acute{a}$ -;  $sth\bar{a}$ - 'stand' : sthi-tá-.

Final  $y\bar{a}$  is shortened to  $\bar{\imath}$  in  $jy\bar{a}$ - 'overpower' :  $j\bar{\imath}$ - $t\acute{a}$ - (AV.);  $vy\bar{a}$ -'envelope' : vī-tá-; śyā- 'coagulate' : śī-tá-.

- a. Internal shortening of  $\bar{a}$  to i appears in  $s\bar{a}s$  'order':  $s\bar{i}s$ - $t\hat{a}$ -; and medial a entirely disappears in ghas- 'eat': -gdha- (TS.) and in the compounded form of dattá- 'given', which becomes -t-ta-: deva-ttá- 'given by the gods'; vy-ā-tta- (AV. VS.), n. 'the opened mouth'; párī-tta- (VS. IX. 9) 'deposited'; -pratī-tta- (AV.) 'given back'. The same syncopated form appears in the compound participle of da- 'divide': áva-tta- (VS.) 'cut off'.
- 575. When -ta is added, as it is in many verbs, with connecting -i-, the root is not weakened (excepting four instances of Samprasāraņa)4. It is thus added to a number of roots ending in consonants and to all secondary verbs.
  - a. The roots to which it is thus regularly added are those that end:
- I. in two consonants: thus uks- 'sprinkle': uks-i-tá-; ubj- 'force': ubj-i-tá- (AV.); nind- 'revile' : nind-i-tá-; raks- 'protect' : raks-i-tá-; sumbh-'beautify': -śumbh-i-ta- (AV.); hims- 'injure': hims-i-tá- (AV.); but taks- 'fashion' has tas-tá-;

I See above 50 b.

<sup>&</sup>lt;sup>2</sup> Representing the long sonant nasal.

roots would be gai-, dhai-, pai-; cp. 27 a.

<sup>4</sup> In grbh-ī-tá- from grabh- 'seize' and grhī-ta-(AV.) from grah-id.; uks-i-tá-from vaks-3 The more correct way of stating these 'increase'; ud-i-tá- from vad- 'speak'; sythi-tá- from śrath- 'slacken'.

- 2. in voiceless aspirates: likh- 'scratch': likh-i-tú- (AV.); grath- 'tie': grath-i-tá-; nath- 'seek aid' : nath-i-tá-; math- 'stir' : math-i-tá-;
  - 3. in cerebral d: īḍ- 'praise' : īḍ-i-tá-; hīḍ- 'be hostile' : hīḍ-i-tá-;
  - 4. in semivowels: car- 'move' : car-i-tá-¹; jīv- 'live' : jīv-i-tá-.
- b. The suffix is also added with -i- to a number of roots ending in simple consonants, especially sibilants, about which no rule can be stated. Such are the following participles arranged according to the final of the root: vāc- 'ask' : yāc-i-tá- (AV.); pat- 'fall' : pat-i-tá- (AV.); rad- 'dig' : rad-i-tá- (AV.); vad- 'speak': ud-i-tá-; vid- 'know': vid-i-tá- (AV.)2; dudh- 'stir up': dudh-i-ta-(RV.); nādh- 'seek aid' : nādh-i-tá-; bādh- 'oppress' : bādh-i-tá-; pan- 'admire' : pan-i-tá-; kup- 'be agitated' : -kup-i-ta-; gup-3 protect' : gup-i-tá- beside gup-tá-(AV.); yup- 'obstruct': yup-i-tá- (AV.); rup- 'break': -rup-i-ta-; drp- 'rave': -drp-i-ta- and -drp-ta-; lap-'prate': lap-i-tá- (AV.); grabh- 'seize': grbh-ī-tá- and grah- 'seize': grh-ī-tá- (AV.); skabh- 'prop': skabh-i-tá-; stabh- 'prop': stabh-i-tá-; dham-'blow': dham-i-tá- (beside dhmā-tá-);

as'- 'eat' : as'-i-ta'-; pis'- 'adorn' : pis'-i-ta'- (AV.) beside pis-ta'-; is- 'send' : iṣ-i-tá-; īṣ- 'move' : -īṣ-i-ta-; tviṣ- 'be stirred' : tviṣ-i-tá-; dhṛṣ- 'dare' : dhṛṣ-i-tábeside dhṛṣ-ṭá-; pruṣ- 'sprinkle' : pruṣ-i-tá-; muṣ- 'steal' : muṣ-i-tá-; hrṣ- 'be excited': hṛṣ-i-tá-; gras- 'devour': gras-i-tá-.

a. The verb hā- 'leave' forms its past participle anomalously (like dā- 'give') from

the reduplicated present base: jah-i-tá- (cp. the pres. part. jáh-at-).

β. In the AV. is once (IX. 638) found a past passive participle extended with the possessive suffix -vant, which gives it the sense of a perfect participle active: ab-i-tavant- (Pp. asitá-vant-) 'having eaten'.

c. Secondary verbs, almost exclusively causatives, add -ita after dropping -aya-; thus arp-aya- 'cause to go': arp-itá- and árp-ita-; īnkh-áya-'cause to quake': īnkh-itá-; cod-áya- 'set in motion': cod-itá-; vīļ-áya- 'make strong': vīļ-itá-; śnath-aya- 'pierce': śnath-itá-; svan-aya- 'resound': -svan-ita-.

The only past passive participle formed from a denominative is bhām-itá-

'enraged', from bhāma- 'wrath'.

- 576. The suffix  $-n\acute{a}$  is always attached directly to the root, which as a rule remains unweakened. Among roots ending in consonants, it is taken by those in d, besides two or three in the palatals c and j; among roots in vowels, it is taken by those ending in the long vowels  $\bar{a}$ ,  $\bar{i}$ ,  $\bar{r}$ , besides
- a. The final of roots in -d is assimilated to the n of the suffix; thus chid-'cut off': chin-ná-; tud- 'push': tun-ná-; tṛd- 'pierce': -tṛṇ-ṇa- (VS. XXXVI. 2); nud-'push': -nun-na- (SV.) beside nut-tá-; pad- 'go': pan-ná- (AV.); bhid- 'split': bhin-ná-; vid- 'find' : vin-ná- (AV.) beside vit-tá-; sad- 'sit' : san-ná- (VS. AV.) beside sat-tá-; skand-'leap': skan-ná-; syand-'move on': syan-ná-; svid-'sweat' : svin-ná-. The original participle of ad- 'eat' survives only (with change of accent) in the neuter noun án-na- 'food'.
- b. The roots in palatals which take -na are: prc-'mix': -prg-na- (RV'). beside prk-tá-; vraśc- 'cut up': vrk-ná-; ruj- 'break': rug-ná-.
- c. Roots in  $-\bar{\alpha}$  remain unchanged or weaken the final to  $\bar{i}$ :  $dr\bar{\alpha}$  'sleep' :  $-dr\bar{a}$ -na- (AV.);  $d\bar{a}$ - 'divide' : di-na-;  $h\bar{a}$ - 'leave' :  $h\bar{\imath}$ -na-; final - $y\bar{a}$  is shortened to  $-\bar{\iota}$ :  $sy\bar{a}$ - 'coagulate' :  $s\bar{\iota}$ - $n\acute{a}$ - (VS.) beside  $s\bar{\iota}$ - $t\acute{a}$ -.
  - d. Roots in -ī and -ū remain unchanged: kṣī- 'destroy' : -kṣī-ṇa- (AV.);

Also ār-i-tá- if derived from a somewhat doubtful root ar- 'praise'; cp. WHITNEY, Roots, s. v.  $\bar{a}r$ .

of mad- 'be exhilarated'.

<sup>3</sup> See p. 402, note 2.

<sup>4</sup> No examples of past participles from desideratives (except mīmāmsitá-, AV.) and 2 mad-i-tá- is probably from the causative intensives seem to occur in the Samhitās.

 $p\bar{\imath}$  'swell' :  $p\bar{\imath}$ - $n\acute{a}$ - (AV.);  $bl\bar{\imath}$ - 'crush' :  $-bl\bar{\imath}$ - $n\alpha$ - (AV.);  $l\bar{\imath}$ - 'cling' :  $-l\bar{\imath}$ - $n\alpha$ - (AV.);  $d\bar{\imath}$ - 'burn' :  $d\bar{\imath}$ - $n\acute{a}$ - (AV.),

e. Roots in  $-\bar{r}$  change that vowel to  $-\bar{r}r$  or (generally when a labial precedes)  $-\bar{u}r$  before -na:  $g\bar{r}$ -'swallow':  $g\bar{v}r$ - $n\dot{a}$ -;  $j\bar{r}$ -'waste away':  $j\bar{v}r$ - $n\dot{a}$ - (AV.) and  $j\bar{u}r$ - $n\dot{a}$ -;  $t\bar{r}$ -'pass':  $t\bar{v}r$ - $n\dot{a}$ -;  $p\bar{r}$ -'fill':  $p\bar{u}r$ - $n\dot{a}$ - beside  $p\bar{u}r$ - $t\dot{a}$ -;  $m\bar{r}$ -'crush':  $m\bar{u}r$ - $n\dot{a}$ - (AV.);  $s\bar{r}$ -'crush':  $s\bar{v}r$ - $n\dot{a}$ - (AV.) beside  $s\bar{u}r$ - $t\dot{a}$ - (RV. I. 174<sup>6</sup>)";  $st\bar{r}$ -'strew':  $st\bar{v}r$ - $n\dot{a}$ - beside -str- $t\dot{a}$ -.

## b. Future Passive Participles (Gerundives).

- 577. Verbal adjectives formed with certain suffixes have acquired the value of future participles passive, expressing that the action of the verb is or ought to be suffered. There are four forms of such gerundives in use in the RV: that derived with the primary suffix -ya, which is common, and those derived with the secondary suffixes -áy-ya, -én-ya, and -tv-a, about a dozen examples of each of which are met with. In the AV. are also found two instances each of gerundives in -tavyà and -antya.
- 578. By far the most frequent form of gerundive is that in -ya, about 40 examples occurring in the RV. and about 60 in the AV. This suffix is nearly always to be read as -ia, which accounts for the treatment of final radical vowels before it. The root, being accented, appears in a strong form, excepting a few instances in which there is the short radical vowel iu or r.
- 1. In the following examples a final short vowel remains unchanged, a -t-2 being interposed: -i-t-ya- 'to be gone'; apa-mi-t-ya- (AV. VI. 1171) 'to be thrown away' (? mi- 'fix') 3; śrii-t-ya- 'to be heard'; -kr-t-ya- 'to be made'; car-kṛ-t-ya- 'to be praised' (kṛ- 'commemorate').
- 2. Otherwise final  $\bar{\imath}$ ,  $\tilde{u}$ , r regularly take Guṇa or Vṛddhi, the final element of which always appears as y, v, r as before a vowel; thus from  $l\bar{\imath}$  'cling': a- $l\acute{a}y$ -ya-4, an epithet of Indra; nu- 'praise':  $n\acute{a}v$ -ya- 'to be praised';  $bh\bar{u}$  'be':  $bh\acute{a}v$ -ya- and  $bh\bar{a}v$ - $y\acute{a}$  'future';  $h\bar{u}$  'call':  $h\acute{a}v$ -ya- 'to be invoked'; vr- 'choose':  $v\acute{a}r$ -ya- 'to be chosen'.
- 3. Final  $-\bar{a}$  coalesces with the initial of -ia to e, between which and -a a phonetic y is interposed; thus  $d\bar{a}$  'give':  $d\dot{e}$ -ya- (=  $d\dot{a}$ -i-y-a-) 'to be given'; khyā- 'see': -khye-ya- (AV.); mā- 'measure': mé-ya- (AV.). In the RV., however, the form  $j\bar{n}\bar{a}$ -ya- once occurs in the compound bala-vi-j $\bar{n}\bar{a}$ -yá- (x. 103<sup>5</sup>) 'to be recognized by his might'.
- 4. A medial vowel either remains unchanged or, if short, may take Guṇa, and  $\alpha$  is sometimes lengthened; thus id-ya- 'to be praised'; gih-ya- 'to be hidden'; -dhr-s-ya- 'to be assailed'; dvds-s-s- (AV.) 'to be hated' (Vdvis-);  $y\delta dh$ -s-s- 'to be fought' (Vudh-); ardh-s- 'to be completed' (Vrdh-); mar-s-s- to be purified' (Vmr-); caks-s-s- 'to be seen'; dabh-s-s- 'to be deceived'; ranh-s- 'to be hastened'; ranh-s- 'to be won'; vand-s- 'praiseworthy'; sans-s-sans- 'to be lauded'; sans-sans- 'sit'; sans-sans- 'from sans- 'sit'; sans-sans- 'to be said' (Vvas-).
- 579. Hardly a dozen gerundives, almost restricted to the RV., are formed with  $-\dot{a}y-ya^5$  (which with one exception is always to be read  $-\dot{a}yia$ ):  $daks-\dot{a}yya$  'to be conciliated';  $pan-\dot{a}yya$  'to be admired';  $vid-\dot{a}yya$  'to be

The form -sīr-ta- is also found in the MS.: Whitney, Roots, s. v. Vsr- 'crush'.

<sup>&</sup>lt;sup>2</sup> Cp. the -t added to roots ending in -t, -u, -r to form nominal stems (308).

<sup>3</sup> The meaning is uncertain: WHITNEY translates the word by 'borrowed'. See his notes in his Translation.

<sup>4</sup> Cp. Grassmann, s. v.

<sup>5</sup> Cp. Lindner, Nominalbildung 22; Delbrück, Verbum 233; Whitney 966 c; Bartholomae, BB. 15, 179 n. 1; BB. 20, 85.

found'; śrav-áyya- 'glorious'; -hnav-áyya- 'to be denied'. A few are formed from secondary verbs; from causatives: trayay-áyya- 'to be guarded' (V trā-) <sup>1</sup>; panay-áyya- 'admirable' (V pan-); sprhay-áyya- 'desirable' (V sprh-); from a desiderative: di-dhi-ṣ-áyya- 'to be conciliated (V dhā-); from an intensive: vi-tan-tas-áyya- 'to be hastened' (V taṃs-). Akin to these gerundives is the anomalous form stuṣé-yya- 'to be praised', derived direct from the infinitive stuṣé 'to praise' <sup>2</sup>,

- 580. More than a dozen gerundives are formed with -en-ya (generally to be read, -enia): īkṣ-énya- 'worthy to be seen', īl-énya- 'praiseworthy', -car-énya- 'to be acted', dṛ-ś-énya- 'worthy to be seen', -dviṣ-enya- 'malignant', ā-bhūṣ-énya- 'to be glorified', yudh-énya- 'to be combatted', vár-enya- 'desirable'. From the aorist stem is formed -yanṣ-énya- 'to be guided' (Vyam-); and perhaps papṛkṣ-énya-³ 'desirable' (V prach-). A few are also derived from secondary verbs; from desideratives: didṛkṣ-énya- 'worthy to be seen' (V dṛṣ-énya- 'to be adorned', vāvṛdh-énya- 'to be glorified'; from a denominative: sapary-énya- 'to be adored'.
- 581. About a dozen gerundives, almost restricted to the RV.4, end in -tv-a (generally to be read as -tu-a), which seems to be the infinitive stem in -tu turned into an adjective by means of the suffix -a: kár-tva- 'to be made', ján-i-tva- and ján-tva- 'to be born', jé-tva- 'to be won', nán-tva- 'to be bent', bháv-ī-tva- 'future', vák-tva- 'to be said', sán-i-tva- 'to be won', só-tva- 'to be pressed', sná-tva- 'suitable for bathing', hán-tva- 'to be slain', hé-tva- 'to be driven on' (Vhi-).
- a. In the AV. there begins to appear a gerundive in -tav-yà. It probably started from the stem of the predicative infinitive in -tav-e, which was turned into an adjective by means of the suffix -ia<sup>5</sup>. The only examples of this formation are jan-i-tav-yà- 'to be born' (AV. IV. 237) and hims-i-tav-yà- 'to be injured' (AV. V. 186).
- b. There are also two examples in the AV. of a new gerundive in -an-iya, which is derived from a verbal noun in -ana with the adjective suffix -iya. These are upa-jiv-aniva 'serving for subsistence' = 'to be subsisted on' (AV. VIII.  $10^{22}$ );  $\bar{a}$ -mantraniva- 'fit for address' ( $\bar{a}$ -mantrana-) = 'worthy to be addressed' (AV. VIII.  $10^{7}$ ) 6.

### c. Infinitive.

A. Ludwig, Der Infinitiv im Veda, Prag 1871. — J. Jolly, Geschichte des Infinitivs im Indogermanischen (München 1873), especially p. 111—137. — Delbrück, Das altindische Verbum (1874), p. 221—228; Altindische Syntax p. 410—425. — AVERY, Verb-Inflection in Sanskrit, JAOS. 10, 275—276 (1876). — Brunnhoffer, Über die durch einfache flectirung der wurzel gebildeten infinitive des Veda, KZ. 30 (1890), 504—513. — Bartholomae, Zur bildung des dat. sing. der a-stämme, BB. 15. 221—247. — v. Negelein, Zur Sprachgeschichte des Veda (1898), 91. — Fritz Wolff, Die infinitive des Indischen und Iranischen. Erster teil: Die ablativisch-genetivischen und die accusativischen infinitive, Gütersloh 1905.

582. The infinitive, all the forms of which are old cases of nouns of action, is very frequently used, occurring in the RV. alone about 700 times. The case-forms which it exhibits are those of the accusative, dative, ablative-genitive, and locative. Only the first two are common, but the dative is by far the commonest, outnumbering the accusative in the proportion of 12 to 1 in the RV. (609 to 49)<sup>7</sup>, and of 3 to 1 in the AV. Infinitives are

<sup>1</sup> Cp. Grassmann, s.v., and Whitney 1051 f.

<sup>&</sup>lt;sup>2</sup> See BRUGMANN, KG. 809.

<sup>3</sup> See Benfey, Vollständige Grammatik

<sup>4</sup> A few of these are also found in B., also an additional one, hô-tva- 'to be sacrificed', in the MS. (I. 93).

<sup>5</sup> Cp. Brugmann, KG. 809.

<sup>6</sup> The gerundive meaning in these two verbal adjectives is probably only incipient. The second is expressly connected with the verbal noun ā-mántraṇa-.

<sup>7</sup> AVERY 231.

<sup>8</sup> WHITNEY 986.

formed chiefly from radical stems or stems in -tu, only a few dative and locative forms being made from other stems. It is somewhat remarkable that the acc. form in -tum which is the only infinitive in the later language, hardly occurs in the RV., being found there only five times , while the dative infinitive, which is more than seven times as frequent as all the rest in the RV., has almost disappeared even in the Brāhmaṇas. The formations which are restricted to the infinitive meaning are the datives in -tavai, -dhyai, and (the very few) in -se, besides a small number of locatives in -sáni. In other forms it is often difficult to draw a strict line of demarcation between the infinitive and ordinary case uses 3.

#### r. Dative Infinitive.

583. This infinitive ends in -e, which when added to the  $\bar{\alpha}$  of a root or stem combines with it to -ai. It has the final meaning of '(in order) to', 'for (the purpose of)'3. This dative is commonly used without an object; hence a dative often appears beside it by attraction instead of an accusative; e. g. asmábhyam dršáye sáryāya pinar dātām ásum (x. 14<sup>12</sup>) 'may they two grant us life again, for the sun, that we may see (it)', i. e. 'that we may see the sun' (= dršáye sáryam). When used with kr- 'make' or verbs of wishing, and when predicative, this infinitive acquires a passive meaning; e. g. agnim sam-idhe cakártha (1.1139) 'thou hast made (= caused) the fire to be kindled'; yád īm uśmási kártave (x. 746) 'what we wish to be done'; brahmadviṣaḥ...hántavá u (x. 1823) 'Brahma-haters (are) to be slain'4.

584. From roots are formed some 60 dative infinitives.

a. About a dozen are made from roots ending in long vowels, chiefly  $-\bar{a}$ , and one in -i. All of these are found only compounded with prefixes, excepting  $bh\bar{u}$ -, which appears once in the simple form. Two of them drop  $\bar{a}$  before the -e<sup>5</sup>. These infinitives are: vi- $khy\acute{a}i$  'to look abroad';  $par\bar{a}$ - $d\acute{a}i$  'to give up'; prati- $m\acute{a}i$  'to imitate' (III.  $60^4$ ); -y\acute{a}i 'to go'; ava- $s\acute{a}i$  (III.  $53^{20}$ ) 'to rest'; srad- $dh\acute{e}$  (I.102<sup>2</sup>) 'to trust' (with the dat. particle  $k\acute{a}m$ ); pra- $m\acute{e}$  (IX.  $70^4$ ) 'to form'; pra- $hy\grave{e}$  (X. 109<sup>3</sup>) 'to send' ( $\sqrt{hi}$ -); -miy-e 'to diminish' ( $\sqrt{mi}$ -); bhuv-e and -bhv-e 'to be' ( $\sqrt{bh\bar{u}}$ -); -tir-e 'to cross' ( $\sqrt{t\bar{r}}$ -); -stir-e ( $\sqrt{st\bar{r}}$ - 'spread').

b. The rest are formed from roots ending in consonants. The uncompounded forms are: tviṣ-é 'to arouse', dṛṣ-é 'to see', bhuj-é 'to enjoy', mah-é 'to be glad', mih-é 'to make water', mud-é 'to rejoice', muṣ-é 'to rob', muh-é 'to be bewildered', yuj-é 'to yoke', yudh-é 'to fight', ruc-é 'to shine', vṛdh-é 'to thrive', śubh-é 'to shine'.

The compounded forms are much more frequent. They are: -áj-e 'to drive', -ídh-e 'to kindle', -krám-e 'to stride', -grábh-e 'to seize', -cákṣ-e 'to see', -tír-e 'to cross', -tíṣ-e 'to procure', -dábh-e 'to injure', -díṣ-e 'to point', -dṛṣ-e 'to see', -dhṛṣ-e 'to be bold' (+ AV. TS.), -nám-e 'to bend', -náṣ-e (+ VS.) 'to attain', -nikṣ-e 'to pierce', -nid-e 'to thrust', -pṛṣ-e 'to fill', -pṛṣ-e 'to ask'; -bádh-e 'to bind' (AV.), -bidhe (TS. I. 2. 3¹) 'to awake', -mṛṣ-e 'to forget', -yákṣ-e 'to speed', -yiṣ-e 'to yoke', -rábh-e 'to seize', -riṣ-e 'to break', -vác-e 'to speak' (Vvac-), -vid-e 'to find', -vidh-e 'to pierce' (Vvyadh-), -viṣ-e 'to seize', -vṛṣ-e 'to put round', -vṛṭ-e 'to turn', -ṣás-e 'to proclaim', -sád-e 'to sit', -sid-e 'to enjoy', -skád-e 'to leap', -skábh-e 'to prop', -spṛṣ-e 'to touch', -syád-e 'to flow', -sváṣ-e 'to embrace'?

I AVERY 230.

<sup>&</sup>lt;sup>2</sup> Whitney 9701; Wolff p. 1.

<sup>3</sup> Cp. WHITNEY 982. On the uses of the infinitive, cp. Brugmann, KG. 805-811.

<sup>4</sup> Cp. WHITNEY 982, a—d.

<sup>5</sup> That is, \$rad-dh\(\epsilon\) and \$pra-m\(\epsilon\), which might, however, be explained as locatives.

6 In VIII. 4x5 the dative, accented \$ti\(\epsilon\)-e, occurring independently, appears to be a substantive.

<sup>7</sup> Cp. the list in LUDWIG p. 56-58.

- a. One infinitive is also formed from a reduplicated root: sisnáthe (III. 31 13) 'to attack'; but according to Grassmann i it is the locative of a substantive meaning 'attack'.
- 585. The remaining dative infinitives are formed from verbal nouns derived with nine different suffixes.
- Some 25 of these are datives of stems in -as2. They are the following: áyas-e (4. 573) 'to go', arhás-e 'to be worthy of', rcás-e 'to praise', rñjás-e 'to strive after', kṣádas-e 3 'to partake of', cákṣas-e 'to see', carás-e 'to fare', javás-e4 (III. 502) 'to speed', jīvás-e 'to live', tujás-e 'to hurl', dohás-e 'to milk'. dháyas-e 'to cherish', dhruvás-e 'to sit firmly', pusyás-e 'to thrive', bháras-e3 'to bear', bhiyás-e 'to fear', bhojás-e 'to enjoy', rājás-e 'to shine', vṛñjás-e 'to turn aside', vrdhás-e 'to further', śobhás-e 'to shine', śriyás-e 'to be resplendent', sáhyas-e<sup>5</sup> 'to conquer', spáras-e 'to help to', spūrdhás-e 'to strive after', harás-e 'to seize'.
- a. Three roots form an infinitive stem with -s only instead of -as: ji-ş-é 'to conquer', upa-prak-s-éo (v. 476) 'to unite', stu-s-é 'to praise'7.
- 2. Some half dozen are formed from stems in -i: is-åy-e<sup>8</sup> (vi. 52<sup>15</sup>) 'to refresh', tuj-áy-e (v. 467) 'to breed', dṛś-áy-e 'to see', mah-áy-e 'to rejoice', yudh-áy-e 'to fight', san-áy-e 'to win'; cit-áy-e9 (VS.) 'to understand'.
- 3. Four or five are formed from stems in -ti: is-tay-e 'to refresh'. pī-táy-e 'to drink', vī-táy-e 'to enjoy', sā-táy-e 'to win'; perhaps also ū-táy-e (nrn) 'to help (his men)'.
- 4. Over 30 dative infinitives are formed from stems in -tu (added to the gunated root, in some instances with connecting vowel), from which acc. and abl. gen. infinitives are also formed:
- a.  $\acute{a}t$ -tav-e 'to eat',  $\acute{a}s$ -tav-e 'to attain',  $\acute{a}s$ -tav-e (VS.; TS. IV. 5. I<sup>2</sup>) 'to shoot', é-tav-e 'to go', ú-tav-e 'to weave' (\(\frac{1}{v}\bar{a}\)-), kár-tav-e 'to make', gán-tav-e and gå-tav-e 'to go', dā-tav-e 'to give', práti-dhā-tav-e 'to place upon', dhā-tav-e 'to suck', pák-tave (AV.) 'to cook', pát-tav-e 'to fall', pá-tav-e 'to drink', bhártav-e 'to bear away', mán-tav-e 'to think', yán-tav-e 'to present', yás-tav-e 'to sacrifice', yá-tav-e 'to go', yó-tav-e 'to ward off', vák-tav-e 'to speak', prá-vantav-e 'to win' (Vvan-), vár-tav-e 'to restrain', vás-tav-e 'to shine', vá-tav-e (AV.) 'to weave', vét-tav-e (AV.) 'to find', vó-lhav-e 'to convey', pári-sak-tav-e 'to overcome', sár-tav-e 'to flow', sú-tav-e 'to bring forth', sé-tav-e (AV.) 'to bind', sótav-e 'to press', stú-tav-e 'to praise', hán-tav-e 'to slay'.
- $\beta$ .  $\dot{a}v$ -i-tav-e 'to refresh',  $c\dot{a}r$ -i-tav-e 'to fare',  $j\bar{\imath}v$ - $\dot{a}$ -tav-e (TS. iv. 2. 65; VS. XVIII. 67) 'to live', sávi-tav-e 'to bring forth', stár-ī-tav-e (AV.) 'to lay low', sráv-i-tav-e 'to flow', háv-i-tav-e 'to call'.
- 5. Over a dozen infinitives are formed from stems in -tava (added like -tu to the gunated root), which are doubly accented.
- a. é-tavái to go' (also áty-, ánv-, etavái), ó-tavái to weave', gán-tavái to go' (also úpa-gantavái), dá-tavái 'to give', pári-dhā-tavái (AV.) 'to envelope', pā-tavái 'to drink', ápa-bhar-tavái 'to be taken away', mán-tavái 'to think', mā-tavái 'to low', sár-tavái 'to flow', sú-tavái (AV.) 'to bring forth'), hántavái 'to slay' 10.

I s. v. śiśnátha.

<sup>2</sup> As a rule the suffix, but in half a dozen instances the root, is accented.

<sup>3</sup> According to Grassmann, 2. sing. middle.

<sup>4</sup> According to Grassmann, dat. of the substantive jávas meaning 'swiftness'.

<sup>5</sup> According to Grassmann, dat. of the comparative sáhyas.

<sup>-</sup>prákse. Cp. OLDENBERG. Rgveda, note on v. 476.

<sup>7</sup> See Delbrück p. 181 (I, 5); cp. above, p. 378, note 1.

<sup>8</sup> Cp. however, Delbrück 207.

<sup>9</sup> Perhaps more probably a substantive, according to BR.: 'for understanding'.

<sup>10</sup> The MS. has kártavái, cp. WHITNEY 6 DELBRÜCK, Verbum, and AVERY accent | 982 d and WOLFF 7 (p. 9).

- β. jiν-i-tavái (AV.) 'to live' (Pp. -ta vái), yám-i-tavái 'to guide', sráv-i-tavái 'to flow'.
- 6. There seems to be only one certain example of a dative infinitive formed from a stem in -tyā: i-tyái 'to go' 1.
- 7. Some 35 dative infinitives almost limited to the RV.2 are formed from stems in  $-dhy\bar{a}$  added to verbal bases ending in a (generally accented), and seem to have the termination -dhyai: iyá-dhyai 'to go' (\[i-\]), irá-dhyai; 'to seek to win', isá-dhyai and isáya-dhyai 'to refresh', Irayá-dhyai 'to set in motion', ksára-dhyai 'to pour out', gáma-dhyai 'to go', gṛṇá-dhyai (AA. v. 2. 110) 'to praise', cará-dhyai 'to fare', jará-dhyai 'to sing', tamsayá-dhyai 'to attract', tará-dhyai to overcome', duhá-dhyai 'to milk', dhiyá-dhyai 'to deposit' (1/dhā-). nāśayá-dhyai 'to cause to disappear', piba-dhyai 'to drink', pṛṇá-dhyai 'to fill', bhára-dhyai 'to bear', mandá-dhyai 'to delight in', mandavá-dhyai 'to rejoice'. mādayá-dhvai 'to delight in', yája-dhyai 'to worship', risayá-dhyai 'to injure oneself', vandá-dhyai 'to praise', vartayá-dhyai 'to cause to turn', váha-dhyai 'to guide', vājayá-dhyai 'to hasten', vāvṛdhá-dhyai (from the perfect) 'to strengthen', vrjá-dhyai 'to turn to', śayá-dhyai 'to lie', śucá-dhyai 'to shine', sacá-dhyai 'to partake', sáha-dhyai 'to overcome', stavá-dhyai 'to praise', syandayá-dhyai 'to flow', huvá-dhyai 'to call'. The TS. has also one of these infinitives ending in -e: gamá-dhye (1. 3. 62).
- 8. Five dative infinitives are formed from stems in -man: trά-man-ε 'to protect', dá-man-e 'to give', dhár-man-e (x. 881) 'to support', bhár-man-e 'to preserve', vid-mán-e5 'to know'.
- g. Three dative infinitives are formed from stems in -van: tur-van-e 'to overcome'  $(\sqrt{t\bar{r}})$ ,  $d\bar{a}$ - $v\acute{a}n$ -e 'to give',  $dh\acute{u}r$ -van-e 'to injure'  $(\sqrt{dhvr})$ .

### 2. Accusative Infinitive.

586. This infinitive is an accusative in sense as well as in form, being used only as the object of a verb. It is primarily employed as a supine with verbs of motion<sup>6</sup> to express purpose. It is formed in two ways.

a. More than a dozen radical stems in the RV. and several others in the AV. form an accusative infinitive with the ending -am<sup>7</sup>.

The root nearly always ends in a consonant and appears in its weak form. It is not always easy to distinguish these infinitives from substantives, but the following include all the more certain forms: sam-idham 'to kindle', vi-crt-am 'to unfasten', pra-tir-am (V tr-) 'to prolong', prati-dham 'to place upon' (AV.), (vi-, sam-)-prcch-am 'to ask', pra-miy-am 'to neglect' (Vmī-), yám-am8 'to guide', yidh-am (AV.) 'to fight', a-rdbh-am 'to reach', a-rith-am 'to mount',  $\bar{a}$ -vis-am 'to enter', subh-am 'to shine',  $\bar{a}$ -sad-am 'to sit down'.

b. Five accusative infinitives from stems in -tu (of which the dative

In x. 1064 bhujyái, occurring beside pustyái, is doubtless a substantive; other dhã-, mī-, tṛ-. cases of the word are also met with: see GRASSMANN, s. v. bhuji. The MS. I. 63 has also dependent on śakéma. sádhyai (from sah+ti); róhisyai, which occurs in the TS.1.3.102 is doubtless a substantive; vowel) and upa-spij-am. Cp. the list in see Delbrück 201 and Whitney 977.

<sup>&</sup>lt;sup>2</sup> This infinitive form occurs once only in the AV. in a Rigvedic passage.

<sup>3</sup> An intensive formation from Vrādh-(64, 1). 4 yajádhyai TS. IV. 6. 33; VS. XVII. 57.

<sup>5</sup> WHITNEY 974 also quotes dár-mane.

<sup>6</sup> Cp. Wolff 32, 40.

<sup>7</sup> The only roots in vowels taking it are

<sup>8</sup> Occurs three times in the RV., always

<sup>9</sup> Perhaps also sam-ôh-am (strong radical Wolff, p. 87—90. There are several quite doubtful examples from the AV., as nihkhid-am (conjecture), pra-tánk-am, sam-rúdham. See WHITNEY's notes in his Translation on AV. IV. 162; V. 187; VII. 505.

form is much commoner) cocur in the RV. and about the same number of others in the AV.: át-tum (AV.) 'to eat', ó-tum 'to weave', kár-tum (AV.) 'to make', ni-kartum (Kh. IV. 525) 'to overcome', khán-i-tum (VS. XI. 10) 'to dig', dá-tum 'to give', drás-tum (AV.) 'to see', prás-tum 'to ask', prá-bhar-tum 'to present', yāc-i-tum (AV.) 'to ask for', anu prá-volhum 'to advance. spárdh-i-tum (AV.) 'to contend with'?.

## 3. Ablative-Genitive Infinitive.

- 587. This infinitive is formed in two ways, like the accusative infinitive, either from a radical stem or from a verbal noun in -tu (from which a dative and an acc. infinitive are also formed)3. The former, therefore, ends in -as, the latter in -tos. As these endings are both ablative and genitive in form, the cases can only be distinguished syntactically. The ablative use is by this criterion shown to preponderate considerably.
- a. The -as form has the ablative sense almost exclusively, as is indicated by its being employed with words governing the ablative, viz. the adnominal prepositions  $rt\acute{e}$  'without',  $pur\acute{a}$  'before', and the verbs  $p\bar{a}$ - 'protect'  $tr\bar{a}$ - 'rescue',  $bh\bar{i}$ - 'fear'. It occurs with the same kind of attraction as appears with the dative infinitive: thus trádhvam kartád ava-pád-as (II. 296) + 'save us from the pit, from falling down (into it)'. There are six such ablatives in the RV.: ā-tr'd-as 'being pierced', ava-pad-as 'falling down', sam-prc-as 'coming in contact', abhi-śris-as 'binding', abhi-śvás-as 'blowing', ati-ṣkád-as 'leaping across'.
- a. There seems also to be at least one example (II. 286) of the genitive use, viz. ni-mis-as . . tie 'I am able to wink', the construction of \( \int \text{ii} \) being the same as with the genitive infinitive in -tos (b  $\alpha$ ). Another instance is perhaps  $\bar{a}$ -prc-as 'to fill' (VIII. 409).

b. Of the infinitives in -tos occurring in the RV. some six are shown by the construction to be ablatives. They are: *é-tos* 'going', gán-tos 'going', jáni-tos 'being born', ní-dhā-tos 'putting down', sár-ī-tos 'being shattered', só-tos

'pressing', hán-tos 'being struck'; perhaps also vás-tos (1. 1743)5.

a. Three infinitives in -tos have the genitive sense, viz. kár-tos 'doing' (with madhyā)6, dā-tos 'giving', and yó-tos 'warding off' (both with īs'-'have power'). In two passages in which is governs the infinitive attraction of the object appears as with the dative infinitive: ise rāyáh suvíryasya dātos (VII. 46) 'he has power over wealth (and) brave sons, over giving (them)', i. e. 'he has power to give wealth and brave sons'; also yásya .. tse .. yótos (VI. 1811) 'whom he can ward off'7.

## 4. Locative Infinitive.

- 588. This form of the infinitive is rare, since thirteen or fourteen examples at the most occur. Several of these are, however, indistinguishable in meaning from ordinary locatives of verbal nouns8.
- a. Five or six of these locatives are formed from radical stems: vy-us-i 'at the dawning', sam-cáks-i 'on beholding', dṛś-i and sam-dṛś-i 'on seeing', budh-i 'at the waking'. As these nearly always govern a genitive, they are preferably to be explained as simple locatives of verbal nouns.

3 Above 585, 4 and 586.

5 See Wolff II. 6 On this word see Wolff 14, who thinks

I See above 585, 4.

<sup>&</sup>lt;sup>2</sup> See the list in Wolff p. 68-71.

<sup>4</sup> Cp. also VIII. 112: purā jatrubhya ā-tr'das before the cartilages being pierced'.

it governs the ablative rather than the genitive.

<sup>7</sup> See Delbrück, Altindische Syntax p. 418,

and cp. Wolff 58. 8 Cp. Delbrück 212 (p. 227) and Whitney

b. One locative infinitive is formed from a stem in -tar: dhar-tár-i 'to

support' and vi-dhar-tár-i 'to bestow'.

c. Eight locatives with a genuine infinitive meaning are formed from stems in -san in the RV. They are: gr-nī-sán-i 'to sing', tar-ī-sán-i 'to cross', ne-sán-i 'to lead', par-sán-i 'to pass', abhi-bhū-sán-i 'to aid', śū-sán-i 'to swell', sak-sán-i 'to abide' (V sac-)2, upa-str-nī-sán-i1 'to spread'.

a. The form  $is \acute{a}n-i$  (II. 29), seems to be derived from is- 'emit' for

is-sán-i³.

### d. Gerund.

589. A considerable number (upwards of 120) of forms ending in -tvi, -tvi, -tvāya, -tyā, -yā occur in the RV. and AV. in the sense of gerunds expressing an action which accompanies or more often precedes that of the finite verb. They are doubtless old cases + (the first most probably a locative, the rest instrumentals) of verbal nouns formed with -tu, -ti, -i, all of which are also employed in the formation of infinitives. The first three are formed from

the simple root, the last two from the compounded root.

590. A. a. Of the gerunds formed from the simple root, those in -tvi are the commonest in the RV., there being fifteen altogether in the RV. They hardly ever occur in any of the other Samhitas. They appear to be old locativeso of stems in -tu, which as a rule is added directly to the root, but in two instances with connecting -i-. They are kṛ-tvī 'having made', khā-tvī (TS. IV. I. I4) 'having dug', ga-tvi 'having gone', gū-dhvi 'having concealed', jani-tví 'having produced', jus-tvī 'liking', pī-tví 'having drunk', pī-tví 'having cleansed', bhū-tvī 'having become', vṛ-tvī 'enclosing', vṛk-tvī 'having overthrown' (Vvrj-), vis-tví 'working' (Vvis-), vrs-tví 'showering', skabhi-tví 'having propped', ha-tvi 'having smitten', hi-tvi 'having abandoned (1/ha-).

b. The gerund in -tvā, an old instrumental of a verbal noun in -tu, is formed by nine roots in the RV. and about thirty more in the AV. Those found in the RV. are: pī-tvā 'having drunk', bhit-tvā 'having shattered', bhū $tv\dot{a}$  'having become',  $mi-tv\dot{a}$  'having formed' ( $\sqrt{m\bar{a}}$ -),  $yuk-tv\dot{a}$  'having yoked', vṛ-tvā 'having covered', śru-tvā 'having heard', ha-tvā 'having slain', hi-tvā 'having abandoned' ( $\sqrt{h\bar{a}}$ -). The forms occurring in the AV. include two formed from secondary verbal stems and three others formed with the connecting vowel - i-. They are: is-tvá 'having sacrificed' (Vyaj-), kalpay-i-tvá 'having shaped', kṛ-tvá 'having made', kṛī-tvá 'trading', ga-tvá 'having gone', grh-ī-tvā 'having seized', jag-dhvā 'having devoured' (V jaks-), ci-tvā 'having gathered',  $c\bar{a}y$ -i- $tv\dot{a}$  'noting',  $t\bar{v}r$ - $tv\dot{a}$  'having crossed' ( $\sqrt{t\bar{r}}$ -), tr- $dhv\dot{a}$  'having shattered' (V tr.h-), dat-tvā 'having given', dr.s-tvā 'having seen', pak-tvā 'having cooked', pū-tvā 'having purified', bad-dhvā 'having bound', bhak-tvā 'sharing', mṛṣ-ṭvā 'having wiped off', rū-dhvā 'having ascended', lab-dhvā 'taking', vit-tvā 'having found', vṛṣ-ṭvā 'cutting off' (V vraśc-)8, sup-tvā 'having slept', stabdhvá 'having established', stu-tvá 'having praised', snā-tvá 'having bathed', sraṃsay-i-tvá 'letting fall', hiṃs-i-tvá 'having injured'. One gerund in -tvā also occurs though compounded with a prefix: praty-arpay-i-tva (AV.) 'having sent

I Formed from the present base.

<sup>&</sup>lt;sup>2</sup> From Vsac-, BR., Delbrück, Verbum 213; from Vsah-, WHITNEY 978.

<sup>3</sup> See Böhtlingk, pw. s. v. isáni, and cp. WHITNEY 978, OLDENBERG, note on II. 29. 4 Cp. v. Negelein, Zur Sprachgeschichte 91. | Translation (RV. has vrk-tva).

<sup>5</sup> Cp. Bartholomae, BB. 15, 227, 239; Brugmann, Grundriss 2, 1090.

<sup>6</sup> BARTHOLOMAE, loc. cit.

<sup>7</sup> tṛṣ-ṭvấ in AV. XIX. 346 is probably to be read tris tvā 'thrice thee'; see WHITNEY's Translation.

<sup>8</sup> See note on AV. VIII. 32 in WHITNEY's

in opposition'. From the Khilas: janay-i-tvā (I.48); from the VS. i-tvā (XXXII. 12), vid-i tvā (XXXII. 18) 'having known', spr-tvā (XXXII. 1) 'pervading'.

c. The rarest gerund in the RV. is that in -tvaya, being formed from only seven roots. It appears to be a late formation, occurring only in the tenth Mandala, excepting one example in the eighth (VIII. 1008) in a hymn which is marked by Arnold' as belonging to the latest period of the RV. Two of, these gerunds (gatvaya and hatvaya) recur in the AV., which, however, has no additional examples of this type. These forms have the appearance of being datives of stems in -tva, but the use of the dative in this sense is in itself unlikely, as that case is otherwise employed to express the final meaning of the infinitive. Hence Bartholomae3 explains the forms as a metrical substitute for a fem. inst. in  $-tv\dot{a}y\bar{a}$  (from the stem  $-tv\bar{a}$ ), or for a loc. of -tva with enclitic  $\bar{a}$  added. There seems to be another possible explanation. Three of the seven forms occurring appear instead of the corresponding forms in -tvā of the older Mandalas. Owing to this close connexion and the lateness as well as the rarity of these forms, we may here have a tentative double formation, under the influence of compound gerunds formed with -ya which end in  $-\bar{a}ya$ , such as  $\bar{a}$ - $d\hat{a}ya$  'taking'.

The forms occurring are kr- $tv\acute{a}ya$  (VS. xi. 59; TS. iv. i. 54) 'having made', ga- $tv\acute{a}ya$  'having gone', jag- $dhv\acute{a}ya$  'having devoured', ta- $tv\acute{a}ya$  (VS. xi. i) 'having stretched', dat- $tv\acute{a}ya$  'having given', drs- $tv\acute{a}ya$  'having seen', bhak- $tv\acute{a}ya$  'having attained', yuk- $tv\acute{a}ya$  'having yoked', vr- $tv\acute{a}ya$  (TS. iv. i. 23; VS. xi. 19) 'having govered', da- $tv\acute{a}ya$  'having glair', da- $tv\acute{a}ya$  (having abandond')

covered', ha-tvāya 'having slain', hi-tvāya 'having abandoned'.

591. B. When the verb is compounded, the suffix is regularly either  $-y\ddot{a}$  or  $-ty\ddot{a}$ . In at least two-thirds of these forms the vowel is long in the RV.<sup>4</sup>

a. Nearly 40 roots in the RV. and about 30 more in the AV., when compounded with verbal prefixes, take the suffix -ya5. Four roots take it also when compounded with nouns or adverbs. The forms occurring in the RV. are in the alphabetical order of the radical initial: α-άε-γα 'bending', pra-árp-ya 'setting in motion', prati-ís-yā 'having sought for', abhi-úp-ya 'having enveloped' (\(\nabla vap-\), vi-k/t-ya 'having cut in pieces', abhi-krám-ya 'approaching', abhi-khyā-ya 'having descried', abhi-gūr-yā 'graciously accepting', sam-grbh-yā 'gathering', prati-grh-yā 'accepting', anu-ghis-yā 'proclaiming aloud', abhi-cákṣ-yā 'regarding', prati-cákṣ-ya 'observing' and vi-cákṣ-ya 'seeing clearly', ni-cấy-yā 'fearing', pari-táp-yā 'stirring up' (heat), vi-túr-yā 'driving forth', ā-dā-ya 'taking' and pari-dā-ya 'handing over', ati-dīv-ya 'playing higher', anu-dr's-ya 'looking along', abhi-pád-ya 'acquiring', pra-prúth-yā 'puffing out', vi-bhíd-yā 'shattering', abhi-bhi-ya 'overcoming', vi-mā-ya 'disposing' and sam-mā-ya 'measuring out', sam-mīl-ya 'closing the eyes', vi-múc-yā 'unyoking', ā-múṣ-yā 'appropriating', anu-mŕs-yā 'grasping',  $\bar{a}$ -yū-yā 'taking to oneself',  $\bar{a}$ -rábh-ya 'grasping' and sam-rábh-yā 'surrounding oneself with', ni-rúdh-yā 'having restrained', abhizýt-ya 'having overcome' and ā-v/t-yā 'causing to roll towards', abhi-vlág-yā 'pursuing', ni-sád-yā 'having sat down', vi-sáh-ya 'having conquered', ava-sá-ya 'having unyoked', sam-hā-ya 'preparing oneself' (hā-'go'). Compounds formed with adverbs are: punar-da-ya 'giving back', mitha-sprdh-ya 'vying together'; and with nouns, karna-grh-ya 'seizing by the ear', pāda-grh-ya 'grasping by the foot', hasta-grh-ya 'grasping by the hand'.

The MS. has also the form sam-īray-i-tvā: Whitney 990 a.

<sup>&</sup>lt;sup>2</sup> Vedic Metre p. 283.

<sup>3</sup> BB. 15, p. 239, 12. 4 Cp. WHITNEY 993 a.

<sup>5</sup> On the gerund in ya cp. NEISSER, BB. 30, 308-311.

<sup>6 -</sup> yน์-ya is also compounded with ni- and

The additional roots thus compounded in the AV. are: ud-ih-ya 'having carried up', ā-krám-ya 'stepping into' and pari-krám-ya 'striding about', sam-gắr-ya 'swallowing up', sam-gắr-ya' 'having grasped'², vi-cchid-ya 'having cut asunder', upa-dád-ya 'putting in' (dā-'give')³, abhi-dhá-ya 'encircling', vi-dhá-ya 'shaking off', parā-ni-ya 'leading away', ā-pád-ya 'arriving at' and pra-pád-ya 'going forward', sam-pá-ya 'drinking up', vi-bháj-ya 'having apportioned', (caus. of \begin{align\*} bhaj-\), sam-bhá-ya 'combining', ni-májj-ya 'having immerged' (\begin{align\*} maj-ná-ya 'having measured off' \approx apa-mij-ya 'having wiped off', sam-rábh-ya 'taking hold together', ā-rih-ya 'ascending', sam-lip-ya 'having torn up's, upa-vis-ya 'sitting down', pari-vis-ya 'attending upon', sam-sí-ya 'sharpening', ā-sád-ya 'sitting upon' and ni-sád-ya 'sitting down', sam-sí-ya 'having poured together', apa-sídh-ya 'driving away', sam-sív-ya 'having sewed', niḥ-sṛ-ya 'having crept out', ati-sṭhá-ya 'excelling', prati-ṣṭhá-ya 'standing firm', ut-thá-ya 'arising'. From the VS.: ni-sír-ya (xvi. 13) 'having broken off', sam-sṛ-ya (xi. 53) 'having mingled', ati-há-ya (xxv. 43) 'having missed'.

b. Roots which end in a short vowel, either originally or after losing a nasal, add  $-ty\bar{\alpha}$  (nearly always in RV.) or -tya instead of  $-y\bar{\alpha}$ , when compounded. The following gerunds are thus formed in the RV.:  $-l-ty\bar{\alpha}$  'having gone' with api-, abhi- and  $\bar{\alpha}$ -, -l-tya with abhi- and prati-;  $\bar{\alpha}$ - $g\dot{\alpha}$ - $ty\bar{\alpha}$  'having come' (Vgam-),  $\bar{\alpha}$ - $d\dot{r}$ - $ty\bar{\alpha}$  'regarding',  $\bar{\alpha}$ - $bh\dot{r}$ - $ty\bar{\alpha}$  'bringing', vi- $h\dot{\alpha}$ - $ty\bar{\alpha}$  'having driven away' (Vhan-); and with adverbial prefixes aram- $k\dot{r}$ - $ty\bar{\alpha}$  'having made ready',  $akhkhal\bar{\iota}$ - $k\dot{r}$ -tya 'shouting'. From the Khilas: aty- $\dot{\alpha}$ -hr-tya (iv.  $5^{29}$ ).

The AV. has the following gerunds from nine additional roots nir-f-tya 'separating' (?)6, abhi-ji-tya 'having conquered', and saṃ-ji-tya 'having wholly conquered', ā-tá-tya' 'having expanded', apa-mi-tya 'having borrowed' (\$\sum\_na\_-\), ud-yá-tya 'lifting up', pra-ā-vṛ-tya 'having enveloped', upa-śrii-tya 'having overheard', ud-dhf-tya 'having taken up' (\$\sum\_na\_-\), i also in composition with a substantive: namas-kf-tya. The VS. has upa-stii-tya (xxi. 46) 'having invoked' and pra-stii-tya (xxi. 46) 'having lauded'.

# VIII. INDECLINABLES.

# r. Prepositions.

GAEDICKE, Der Akkusativ im Veda (Breslau 1880), p. 193—210. — WHITNEY, Sanskrit Grammar 1077—1089, 1123—1130. — DELBRÜCK, Altindische Syntax p. 440—471. — Cp. Benfey, Vollständige Grammatik 241 and 784. — BRUGMANN, KG. p. 457—480. — J. S. Speijer, Vedische und Sanskrit-Syntax, Grundriss I. 6, 87.

592. Two classes of prepositions are to be distinguished. The first class embraces the genuine or adverbial prepositions. These are words with a local sense which, being primarily used to modify the meaning of verbs, came to be connected independently with the cases governed by the verbs thus modified. They show no signs of derivation from inflexional forms or (except tirás and purás) forms made with adverbial suffixes. The second class embraces what may be called adnominal prepositions. These are words which are not compounded with verbs, but govern cases only. As regards form, they almost invariably end in case terminations or adverbial suffixes.

r -grhya also appears compounded with ni-, vi- and prati-.

<sup>&</sup>lt;sup>2</sup> The gerund ā-ghrā-ya (AV. XIX. 8<sup>5</sup>), the reading of the text, is not found in the Mss. and is doubtless wrong; cp. Whitney's Index Verborum.

<sup>3</sup> From the present base of  $Vd\bar{a}$ -, cp. Whitney 992 a.

<sup>4</sup> apa-mā-ya is a conjectural reading.

<sup>5</sup> v. NEGELEIN 92 gives -vidh-ya (\lambda vyadh-) and -sus-ya as occurring in the AV., but they are not to be found in WHITNEY'S Index verborum.

<sup>6</sup> See note on AV. x. 22 in WHITNEY'S Translation,

<sup>7</sup> Conjectural reading in AV. XX. 1363; see Whitney's Index Verborum

## A. Adverbial Prepositions.

593. Of the twenty-two included in this class, eight are never used adnominally, viz. ápa² 'away'; úd 'up', 'out'; ní 'down', 'into'; nís 'out'; párā 'away'; prá 'forth'; ví 'asunder' (often = 'dis-', 'away'); sám³ 'together'4. Three others, for the most part employed adnominally, are restricted in their adverbial use to combination with particular verbs, viz. áccha 'towards', tirás 'across', purás 'before'. The remaining eleven, being employed both adverbially and adnominally, are: áti 'beyond'; ádhi 'upon'; ánu 'after'; antár 'within'; ápi 'on'; aˈ\hi i 'against'; áva 'down'; ā 'near'; upa 'up to'; pári 'around'; práti 'towards'.

a. When combined with verbs 5 these prepositions are not compounded in the principal sentence6. Generally speaking, they immediately precede the verb; but they are also often separated from it, e. g. å tvā višantu (1.57) 'may they enter thee'. Occasionally the preposition follows the verb, e.g. indro gá avrnod ápa (VIII. 633) 'Indra disclosed the cows'. Two prepositions are not infrequently combined with the verb7; no certain instances of three being thus used can be quoted from the RV., though a few such instances occur in the AV.8 On the other hand, a preposition sometimes appears quite alone9; the verb 'to be', or some other verb commonly connected with it, can then be supplied without difficulty; e. g.  $\hat{a}$  th na indra (1. 1011) 'hither, pray, (come) to us, Indra'. Or the preposition appears without the verb in one part of the sentence, but with it in another; e.g. pári mám, pári me prajám, pári nah pāhi yád dhánam (AV. II. 74) 'protect me, protect my projeny, protect what wealth (is) ours'. As the verb normally stands at the end of the sentence, the preposition would naturally come after the object. Hence as a rule it follows the noun governed by the verb (though it is also often found preceding the noun). Primarily used to define the local direction expressed by the verb which governs a case, prepositions gradually became connected with particular cases. In the RV. it is still often uncertain whether the adverbial or the adnominal sense is intended. Thus dāśvāṃsam ilpa gacchatam (I. 473) may mean either 'do ye two go-to the pious man' or 'do ye two go to-the pious man'. When used adnominally the preposition only

T On the relative frequency of these prepositions in the RV. and AV. see WHITNEY, Sanskiit Grammar 1077 a.

<sup>2</sup> On the relation of ápa, ápi, úpa, ni, pári to corresponding Greek prepositions

see J. SCHMIDT, KZ. 26, 21 ff.

3 sám seems in a few passages to have attained an independent prepositional use with the instrumental: sám usádbhih (I. 63), sám pánibhih (II. 168), sám pánibhih (II. 168), sám pánibhih (VIII. 9712), sám jyótik (VS. II. 9), sám äyuşä (TS. I. I. 102); but in all these examples the case perhaps depends on the compound sense of the verb. BR, do not recognize the prepositional use, cp. Delbrück p. 459; on the other hand, see Grassmann s. v. sám and Whitney 1127. sám is used with the inst. in Kh. I. 47.

4 The adverbs avis and pradur in view are used with Vas-, Vbhū- and Vkr- only.

5 Though a certain number of verbs are never actually met with in the RV. and AV. in combination with prepositions (cp. Delbrück p. 433), there can be litte doubt

that practically all verbs except denominatives were capable of combining with prepositions. On the other hand, some verbs occur only in combination with prepositions (Delbrück, loc. cit.).

6 áccha, tirás, purás seem never to be compounded with the verb even in dependent clauses; see Delbrück p. 469 (mid.).

7 When there are two,  $p\bar{d}r\bar{a}$  always immediately precedes the verb;  $\bar{d}$  and  $\bar{a}va$  nearly always; ud, ni,  $pr\bar{a}$  usually. On the other hand, abhi is all but invariably the first of the two; adhi and anu are nearly always so, upa and prati usually; cp. Delbrück 234.

 $^8$  Cp. Delbrück 235. Three prepositions combined with a verb are common in B.; the last is then almost invariably  $\dot{a}$  or  $\dot{a}va$ .

9 On the elliptical imperative use of prepositions cp. PISCHEL, VS. I. 13, 19f.; BRUG-MANN, IF. 18, 128; DELBRÜCK, Vergleichende Syntax 3, 122 f.

defines the local meaning of the case. It cannot be said to 'govern' the case, except perhaps when  $\dot{a}$  'up to' or purás 'before' are connected with the ablative.

594. The fourteen genuine prepositions which are used adnominally are almost entirely restricted to employment with the accusative, locative, and ablative. Six are used with the accusative only, viz. decha, ati. ánu, abhí, práti and tirás; one (ápi) with the locative only; one (áva) with

the ablative only (and that very rarely).

The remaining six take the accusative and one or both of the other two cases: pári takes the ablative also; úpa the locative also; 'ádhi, antár, á, purás take both the locative and the ablative also. The first two of these six belong primarily to the sphere of the accusative, the last four to that of the locative. Thus it appears that the genuine prepositions were at the outset practically associated with these two cases only. The ablative came to be used secondarily with pári in the sense of 'from (around)'; and similarly with locative prepositions, ádhi = 'from (upon)', antár = 'from (within)',  $\dot{a}$  = 'from (on)'. In all these, the sense of the ablative case combined with the original meaning of the preposition to form a new double notion. But in purás 'before' and in  $\dot{a}$ , when it means 'up to', which are both used before the case, the ablative sense has completely disappeared.

The following is a detailed account of the genuine prepositions in their alphabetical order.

### áccha 'towards'.

595. In combination with verbs of motion and of speaking<sup>2</sup>, áccha<sup>3</sup> expresses direction in the sense of '(all the way) to'4. Used adnominally with the same meaning, it takes the accusative, which either precedes or follows. It is rare except in the RV.5 Examples of its use are: prá yātana sákhīmr ácchā (1.165<sup>13</sup>) 'proceed hither to your friends'; úpa prágāt.. ácchā pitáram mātáram ca (I. 16313) 'he has come forward hither to his father and mother'; kám ácchā yuñjāthe rátham (v. 743) 'to (go to) whom do ye two yoke your car?'; ácchā ca tvā ená námasā vádāmasi (VIII. 216) 'and to thee we speak with this devotion'; préyam agād dhisanā barhir accha (TS.I.I.21= MS. I.  $I^2 = K$ . I. 2) 'this bowl has come forward hither to the litter'.

# áti 'beyond'.

596. Adverbially áti is frequently used in the sense of 'beyond', 'over', 'through', with verbs of motion. Whether it is used adnominally with these and cognate verbs is somewhat uncertain. There are, however, a few distinct instances of such use of áti in other connexions with the accusative; e. g. śatám dāsām áti srájah (viii. 563) 'a hundred slaves (beyond =) in addition to garlands'; purvír áti ksápah (x. 772) 'through many nights'; kád asyaláti vratám cakrmā (x. 125) 'what have we done (beyond =) contrary

<sup>2</sup> It is once (VIII. 33<sup>13</sup>) also used with sru- 'hear' in the sense of 'listen to'.

6 The adnominal use survives through the Brāhmanas into the Mahābhārata.

In regard to upa the sense of motion locative in the v. r. sádaneşu áccha for to' seems to be the primary one; for it is sádanāni áccha (RV. IX. 911). used twice as often with the acc., and its position before the loc. is less primitive.

<sup>3</sup> The final a is short only at the end of a Pada and in 1. 3117 and 1x. 1061; otherwise always ácchā.

<sup>4</sup> In the SV. it is once used with the

<sup>5</sup> It is used with over twenty roots in the RV. and with only two in the AV. (WHITNEY 1078). In the TS. it occurs with i-'go' (IV. 1.81; II.2. 123) and with vad- 'speak'  $(IV. 5. 1^2 = VS. XVI. 4).$ 

to his ordinance?'; yớ devớ mártyā $\dot{m}$  áti (AV. xx. 1277) 'the god who (is) beyond mortals'.

## ádhi 'upon'.

597. The general meaning of *ádhi* in its adverbial use is 'upon', e. g. *ádhi gam* 'come upon', then 'find out', 'learn'.

In adnominal use the proper sphere of ádhi is the locative, with which it is almost always connected. Here, however, there is sometimes an uncertainty whether the preposition belongs to the verb or the noun; e. g. nákasya prsihé ádhi tisthati (I. 1255) 'he stands upon the ridge of the firmament'. When referring to a person ádhi means 'beside', 'with' (from the notion of wielding sway over); e. g. yán, nāsatyā, parāváti yád vā sthó ádhi turváse (I. 47') 'when, O Nāsatyas, ye are at a distance or with Turvaśa'.

- a. From the locative the use of ádhi extended to the ablative, with which it is less frequently connected. It then primarily has the compound sense 'from upon'; e. g. átah ... á gahi divó vā rocanád ádhi (1.69) 'thence come, or from the bright realm of heaven'. Often, however, the simple ablative meaning alone remains; e. g. hŕdayād ádhi (x. 163³) 'from the heart'; púruṣād ádhi (VS.XXXII.2) 'from Puruṣā'. A somewhat extended sense is occasionally found; e. g. yám ... kánva īdhá rtād ádhi (1.36¹¹) 'whom Kanva kindled (proceeding from =) in accordance with sacred order'; mā panir bhūr asmád ádhi (1.33³) 'be not niggardly with regard to us'.
- b. From the locative the use of ádhi further spread to the accusative, though in a very limited way, to express the sphere on or over which an action extends; e. g. pṛthi pṛátīkam ádhy édhe agnlḥ (VII.36¹) 'Agni has been kindled over the broad surface'. Otherwise, when taking the accusative in the sense of 'upon' with verbs of motion, ádhi nearly always belongs to the verb.
- a. In the RV. only, ádhi is used seven times with the (following) instrumental singular or plural of snú- 'height', to express motion along and over = 'across'; e. g. cakrám ... ádhi ṣnúnā bṛhatā vārtamānam (IV. 28²) 'the wheel rolling across the mighty height'. This is probably to be explained as the instrumental of the space (by =) through which motion takes place (e. g. vāto antárikseṇa yāti 'the wind goes through the air', I. 161<sup>14</sup>), the preposition that regularly means 'upon' being added to define the action as taking place 'over' as well as 'along'. The VS. has the regular locative of snú- with ádhi: pṛthivyā ádhi snúṣu (xVII. 14) 'on the heights of the earth'.

### ánu 'after'.

**598.** In its adverbial use *ánu* primarily means 'after', e. g. *ánu i-* 'go after', 'follow'; from this fundamental sense are developed various modifications such as 'along', 'through'.

In its adnominal use ánu takes the accusative only. When the influence of the verb is still felt, it means 'after', 'along', 'throughout'; e. g. párā me yanti dhītáyo gắvo ná gắvyūtīr ánu (I.25<sup>16</sup>) 'my prayers go abroad like kine (seeking) after pastures'; úpa prá yanti dhītáyah rtásya pathyā ánu (III. 12<sup>7</sup>) 'forth go my prayers along the paths of sacred order'; yát páñca mánuṣām ánu nṛmṇám (VIII. 9<sup>2</sup>) 'the might which (exists) throughout the five peoples'; similarly pṛthivim ánu (VS. XIII. 6) 'throughout the earth', vánaspátīmr ánu (VS. XIII. 7) 'in all trees', pradiśó 'nu (VS. XXXII. 4) 'throughout the regions'.

When used in closer connexion with nouns anu expresses:

a. sequence in time: 'after' or (with plurals) 'throughout'; e.g. párvām ánu práyatim (I. 1265) 'after the first presentment'; ánu dyắn 'throughout the days' = 'day after day'.

b. conformity: 'after' = 'in accordance with'; e. g. svám ánu vratám (I. 128') 'according to his own ordinance'; amítān ánu (VS.IV. 28) 'after the

manner of immortals'; ánu júsam (TS. I. I. 13<sup>2</sup> = VS. II. 17) 'for (= to suit) thy enjoyment'. This is the commoner independent use.

### antár 'between'.

500. In its adverbial use, which is not frequent, antar means 'between'. 'within', 'into'; e. g. antás car- 'move between or within'; antáh pás- 'look into'; antar gā- 'go between', 'separate'; antar-vidvān 'knowing (the difference)

between', 'distinguishing'.

The fundamental and by for the most frequent adnominal use of antar is connected with the locative in the sense of 'within', 'among'; e.g. antáh samudré 'within the ocean'; apsú-antár 'within the waters'; antár devésu 'among the gods'; gárbhe antáh (VS. XXXII. 4) 'within the womb'; mātrtamāsu. antáh (TS. 1. 8.  $12^2 = VS. x. 7$ ) 'in the best of mothers'.

a. From the locative its use extends in a few instances to the ablative in the sense of 'from within'; e. g. antár ásmanah 'from within the rock': esá yayau paramád antáh ádreh (IX. 878) 'it has come from the highest stone'.

b. From the locative its use further extends, in several instances, to the accusative, in the sense of 'between' (expressing both motion and rest). generally in connexion with duals or two classes of objects; e. g. mahán sadhásthe dhruvá á nísatto 'ntár dyávā (III. 64) 'the great one who has sat down in the firm seat between the two worlds'; indra it somapā ekah... antár deván mártyāms ca (VIII. 24) 'Indra is the one Soma-drinker (between =) among gods and mortals'1.

# άpi 'upon'.

**600.** In its adverbial use with verbs of motion *dpi* generally means 'into', e. g. ápi gam- 'go into', 'enter'; but this sense assumes various modifications which may be expressed by 'on', 'over', 'up'; e.g. ápi dhā- 'put upon', 'close up'; ápi nah- 'tie up'; ápi-ripta- 'smeared over' = 'blind'.

In its adnominal use, which is rare, ápi is connected with the locative only. It then has the sense of 'on'; e.g. ayám, agne, tvé ápi yám yajūám cakrmá vayám (II. 58) 'this (is), O Agni, the sacrifice which we have

offered on thee'2.

#### abhi 'towards'.

601. In its adverbial use abhi means 'towards' with verbs of motion, e. g. abhi dru- 'run towards'; it further commonly makes verbs of action transitive, e.g. krand- 'roar': abhi krand- 'roar at'; it also sometimes, especially with bhū- 'be', comes to have the sense of superiority: abhi bhū- 'overcome'.

The adnominal use of abhi is fairly frequent, though in many individual instances difficult to distinguish from its adverbial use. It is connected with the accusative only, in the sense of 'to'; e.g. 'id īrṣva nāri, abhi jīvalokam (x. 188) 'Arise, O woman, to the world of the living'. The sense of 'over' (implying dominion), abstracted from one of its secondary adverbial uses, is occasionally found; e. g. víśvā váś carsanír abhí (1. 865) 'who (is) over all men'.

In the later language antar is not infrequently used with the genitive (as well as the locative). An example of this occurs as early as VS. XL. 5 (= Īśā Upaniṣad 5): BRUGMANN, KG. 588, 5. tád antár asya sárvasya, tád u sárvasya asya bāhyatáh 'it is within this all and it is without this all'.

<sup>&</sup>lt;sup>2</sup> The adverb ápi begins to be employed

### áva 'down'.

602. In its adverbial use, áva generally means 'down'. e. g. áva gam-'come down'; but is has also the extended sense of 'away', 'off', e. g. áva sṛj- 'discharge'.

In its adnominal use, which is very rare and doubtful, it is connected with the ablative in the sense of 'down from'. In the following two examples, especially the second, the case seems to be directly dependent on the preposition: vrstim .áva divá invatam (vii. 64°) 'send rain down from heaven'; yé te pánthāno áva diváh (AV. vii. 55°) 'which (are) thy paths down from the sky'.

### a 'near'.

603. The adverbial use of  $\hat{a}$  with verbs expressing either physical or mental motion is very common in the sense of 'near', 'hither', 'towards', 'to', 'upon'; e. g.  $\hat{a}$  aj- 'drive hither';  $\hat{a}$  krand- 'cry to';  $\hat{a}$  dhī- 'think upon', 'attend to'. Less commonly, when used with verbs expressing rest or occurrence, it means 'in' or 'at'; e. g.  $\hat{a}$  kṣi- 'dwell in',  $\hat{a}$  jan- 'be born at' a place.

When used adnominally,  $\dot{a}$  regularly follows the case, excepting only one sense of the ablative. It is primarily and most commonly connected with the locative, when it has the sense of 'on', 'in', 'at', 'to'; e.g. upástha  $\dot{a}$  'on the lap'; dadhlis tvā bhígavo mánusesu  $\dot{a}$  (I. 586) 'the Bhrgus brought thee to men'.

- a. From the locative its use extended to the ablative, with which it is used fairly often. It is generally used after this case, when it primarily has the compound sense of 'from on' (cp. ádhi); e. g. parvatád á 'from (on) the mountain'. It also means, secondarily, 'away from'; e. g. yás cid dhi tvā bahibhya á sutávām āvivāsati (1. 849) 'who entices thee away from many (others) with his Soma draught'. This secondary meaning is sometimes further extended to express preference; e. g. yás te sákhibhya á váram (1. 44) 'who is a boon to thee (in distinction) from friends', i. e. 'who is better to thee than friends'.
- a. In about a dozen instances in the RV.,  $\dot{a}$  is used before the ablative to express 'up to'; e. g. yatí giríbhya  $\dot{a}$  samudrát (VII. 95²) 'going from the mountains up to the sea';  $\dot{a}$  nimricah (I. 161°) 'till sunset'3. This reversal of meaning is probably due to the reversal of the natural order of the words: samudrád  $\dot{a}$  'from the sea' thus becoming  $\dot{a}$  samudrát 'to the sea'.
- b. The use of  $\dot{a}$  is further extended to the accusative, with which it is least frequently connected, generally meaning 'to', 'upon', to express the goal with verbs of motion; e. g. antár  $\bar{\imath}yase$ . yuṣmāmś ca devān viśa ā ca mártān (IV. 2³) 'thou goest mediating to you, the gods, and to the people, the mortals'; mātárā sidatām barhir ā (I. 1427) 'may the two mothers seat themselves upon the litter'; éhy ā naḥ (AV. II. 5⁴) 'come hither to us'; devānām vakṣi priyām ā sadhāstham (TS. v. I. III = VS. XXIX. I) 'bring (it) to the dear abode of the gods'. In closer connexion with nouns, ā is used to express purpose in the phrases jóṣam ā 'for enjoyment', and vāram ā 'for pleasure'.

## úpa 'up to'.

604. In its adverbial use iipa is in sense akin to abhi and a, expressing 'near to'; e. g. iipa gam- 'go near to'. The fundamental meaning of close

T Cp. Delbrück p. 451. with the old sense of 'from' as well as 2 With very few exceptions this is the only use of  $\dot{a}$  to be found in B.; in C. also  $\ddot{a}$  is found only before the ablative, but tive in this sense; see Grassmann s. v.  $\dot{a}$ .

contiguity is often coupled with the idea of subordination or inferiority; e.g. hpa sad-'sit down close to', 'approach reverentially'; upa ās-'sit under',' adore'.

In its adnominal use iipa is most frequently connected with the accusative (which it more often precedes than follows) in the sense of 'to'; e.g. iipa jipa jipa

shipper'.

- a. It is also used (about half as frequently in the RV.) before the locative in the sense of 'beside', 'upon', 'at': yh 'ipa shrye (I. 23'7) 'who (are) beside the sun'; 'ipa dyávi '(upon =) up to the sky' (from below); ipa jmánn ipa vetasé áva tara (VS. XVII. 6 = MS. II. 10') 'descend upon the earth, upon the reed'.
- a. Quite exceptionally (only three times)  $\acute{u}pa$  occurs in the RV. with the (following) instrumental. In two passages it expresses sequence of time in the phrase  $\acute{u}pa$   $\acute{q}y\acute{u}b\acute{h}ts$  (v. 533; VIII. 408) 'day by day'. Once it expresses conformity:  $y\acute{a}smai$   $v\acute{i}synus$   $tr\acute{i}ni$   $pad\acute{a}$   $vicakram\acute{a}$   $\acute{u}pa$   $mitr\acute{a}sya$   $dh\acute{a}rmabh\acute{t}$  (Vāl. IV<sup>3</sup>) 'for whom Viṣnu strode forth his three steps in accordance with the ordinances of Mitra'. These abnormal senses of  $\acute{u}fa$  are parallel to those of  $\acute{a}nu$  (598 a, b), and the construction to that of  $\acute{a}dhi$  (597 a).

## tirás 'across'.

605. Adverbially *tirás* is used in the sense of 'aside', but only with the two verbs  $dh\bar{a}$ - 'put' and  $bh\bar{u}$ - 'be', in the Samhitās'; thus *tiró dhā*- 'put aside', 'conceal'; *tiró bhā*- 'disappear'; e. g. *ajakāváṃ tiró dadhe* (VII. 50') 'I put away the scorpion'; *má tiró 'bhūt* (AV. VIII. 17) 'may it not disappear'.

Adnominally tirás is used fairly often in the RV., and a few times in the AV., in the sense of 'across', 'over', 'through', 'past', with (nearly always before) the accusative<sup>2</sup>; e. g. á yé tanvánti rasmibhis tiráh samudrám (1.198) 'who spread with their rays across the ocean'; náyanti duritá tiráh (1.413) 'they lead him through (so as to escape) dangers'; tiró viśvām árcato yāhy arván (x.8916) 'come hither past (leaving behind) all singers'.

a. Figuratively tirás occasionally means 'contrary to'; e. g. devánām cit tiró vásam (x. 1714) 'even against the will of the gods'; yó no .. tirás cittáni fighāmsati (vII.  $59^8$ ) 'who desires to slay us contrary to expectations' (= 'unawares'), yó no .. tiráh satyáni .. fighāmsāt (TS. IV. 3. 133) 'who may desire to slay us contrary to oaths'.

# pári 'around'.

606. In its adverbial use  $p\acute{ari}$  generally means 'around', e. g.  $p\acute{ari}$  i-'go around'; figuratively it also means 'completely', e. g.  $p\acute{ari}$  vid-'know fully' (cp.  $\pi \acute{e} \rho i$   $o i \acute{o} \acute{e}$ ).

Its adnominal use starts from the accusative, with which case it is, however, not very commonly connected. Here, too, it is not always certain that the preposition does not belong to the verb. It nearly always immediately precedes the accusative in the sense of 'around', 'about'; e. g. pári dyẩm anyád īyate (1.30<sup>19</sup>) 'the other (wheel) goes around the sky'. The following is one of the two instances in which pári comes after the accusative<sup>3</sup>: havāmahe śraddhām madhyámdinam pári (x.151<sup>5</sup>) 'we invoke Śraddhā (about =) at noon' 4.

a. Its use then extends to the ablative, with which it is much more frequently connected. Here it has primarily the compound sense of 'from around'; e. g. divás pári (I. 476) 'from the sky (which is) around'; támasas pári (I. 5010) 'from the surrounding darkness'. The original meaning (as in

2 It is found at least once in the AV. 3 Cp. Grassmann, s. v. pári, 784 (bottom). (XII. 339) and occasionally in the SB. in the 4 Like the German preposition 'um'.

In the SB. and later tirás is used with sense of 'away from' = 'without the know-kr-'do' also.

ádhi) then disappears, leaving only the ablative sense 'from'; e. g. tvám adbhyás tvám ásmanas pári .. jāvase (II. 11) 'thou art born from the waters, from the rock'.

## purás 'before'.

607. Adverbially purás is combined with kr- 'do', and dhā- 'put' only, in the sense of 'in front'; e. g. indrah krnotu prasavé rathám puráh (1.1029) 'may Indra place (our) car in front in the enterprise'; indram visve deváso dadhire puráh (1. 1311) 'the all-gods placed Indra in the forefront'.

Adnominally purás occurs about nine times in the RV., in the sense of 'before' and connected with the accusative, the ablative, and the locative; e. g. ásadan mātáram puráh (x. 1891) 'he has sat down before his mother': ná gardabhám purť ásvān navanti (III. 5323) 'they do not place the ass before the horse' (áśvāt); yáh sŕñjaye puró . . samidhyáte (IV. 154) 'who is kindled before Srñjaya'.

# práti 'against'.

608. Used adverbially práti means 'towards', 'against', e. g. práti i- 'go towards or against'; práti mā- 'counterfeit', 'imitate'. From this sense the notion of equality was developed, as in práti as- 'be a match for'; e. g. índra, nákis tvā práty asty eṣām, vísvā jātāny abhy àsi táni (VI. 255) 'O Indra, none of them is equal to thee; thou art superior to all these beings'. The verb as- often being omitted, práti appears to be used like an adjective; e.g. indram ná mahná prthiví caná práti (1.551) 'not even the earth (is) equal to Indra in greatness'. The preposition further comes to express adverbially the sense of 'back'; e. g. práti ūh- 'thrust back'; práti brū- 'reply'.

Adnominally práti is used with the accusative only, altogether about a dozen times in the RV. With verbs of motion 2 or of calling it means 'towards', 'to' (though here there is sometimes a doubt whether it does not rather belong to the verb); e. g. práti tyám cárum adhvarám gopītháya prá huyase (1. 191) 'thou art summoned to the beloved sacrifice to drink the milk'. With verbs of protecting it means 'against' = 'from'; e. g. ágne rákṣā no ámhasah, práti sma, deva, rísatah (VII. 1513) 'O Agni, protect us from distress, against injurers, O god'. Sometimes it means 'over against', 'opposite'; e. g. ábodhy agníh . . práti . . āyatím usásam (v. 11) 'Agni has awakened in face of the coming Dawn'. It expresses conformity in the phrase práti váram 'according to desire' (cp. ánu b, úpa a,  $\alpha$ ).

a. In the phrase práti vástoh 'at dawn', occurring three times in the RV., the preposition seems to take the ablative, but vástoh may here be meant for an adverbial form 3.

# B. Adnominal Prepositions.

609. This class of words which is never compounded with verbs, but only governs oblique cases (with the exception of the dative), cannot be clearly distinguished from adverbs such as ūrdhvám (which from B. onwards is also used as a preposition with the ablative in the sense of 'above' and 'after'). It is to be noted that several of them govern the genitive and the instrumental, cases practically never connected with the genuine prepositions in the Samhitas. The following is an account of these words arranged in their alphabetical order4.

Both abhi and práti primarily express | with verbs of motion: here it expresses apdirection 'towards', but the former tends to imply superiority or attack ('at'), the latter comparison and equality or repulsion ('back').

<sup>2</sup> In B. práti is regularly used after the content of the co

accusative, though apparently never connected parás, sácā, sanitúr, sanutár, samáyā, sumád,

### adhás 'below'.

610. With the accusative adhás occurs only once in the RV., in the sense of 'below': tisráh prthivír adhó astu (VII. 10411) 'may he be below the three earths'. It is also found once with the ablative (or genitive) in the same sense: adháh .. padóh (x.1662) 'below (my) feet'. The latter use also occurs once in the SV. and once in the AV.: ye te pantha adhi diváh (SV. 1. 2. 2. 38) 'thy paths which are below the sky'; adhás te ásmano manyim ipāsvāmasi yó gurúh (AV. vi. 422) 'we cast thy fury under a stone that (is) heavy'.

antará 'between'.

611. This word occurs five times in the RV. with a following accusative in the sense of 'between', e. g. antará dámpatī 'between husband and wife'. It also occurs a few times in the AV. and VS. before duals; e.g. antará dyávāpythiví 'between heaven and earth'.

#### abhitas 'around'.

612. This adverb is employed in a few passages of the RV. and AV. in the sense of 'around' with the accusative; e. g. sáro ná pūrnám abhíto vádantah (VII. 1037) 'talking as round a brimful lake'; yé devá rāṣṭrabhŕto 'bhíto vánti súryam (AV. XIII. 135) 'the kingdom-bearing gods who go around the sun'.

### avás 'down from'.

613. In the RV. avás occurs four times with the ablative (cp. áva) in the sense of 'down from'; e.g. aváh sáryasya brhatáh púrīsāt (x.2721) 'down from the vast misty region of the sun'. It is further employed four or five times with the instrumental; e. g. avó divá patáyantam patangúm (1. 1635) 'a bird flying down from heaven'. The latter use seems to be analogous to that of ádhi with the instrumental (597  $\alpha$ ).

# upári 'above'.

614. This adverb occurs three times in the RV. after the accusative in the sense of 'above', 'beyond'; e. g. tisráh prthivír upári (1. 348) 'above the three earths'. It is also found once with the instrumental in the combination bhúmyopári, i. e. bhúmyā upári (x. 753) 'beyond the earth'. It is, however, more likely that here we have an irregular euphonic combination for bhanva[h] upári and that the case governed by the preposition is the genitive. This would account for the frequent use of upári with the genitive in the later language, while the instrumental would be unique.

# rté 'without'.

615. This word 2 is used fairly often in the RV., and occasionally in the later Samhitas, before or after the ablative (sometimes separated from it) in the sense of 'without'; e. g. ná rté tvát krivate kím caná (x. 1129) 'without thee nothing is done'; yébhyo ná 'rté pávate dháma kím caná (TS. iv. 6. 14 = VS. XVII. 14) 'without whom no dwelling is purified'.

smád) disappear in C., there is nevertheless in the later language a large increase in | p. 65 (top). their numbers, greatly supplemented by the periphrastic use of nouns and by the pre- other words representing old case-forms, positional gerunds. Cp. Speijer, Vedische used prepositionally (arvak etc.), cp. Whitund Sanskrit-Syntax 89-93.

I See GRASSMANN, s. v. upári; cp. above

<sup>2</sup> In origin an old locative. On some NEY 1128.

## parás 'beyond'.

616. In the RV. paris is used with the accusative, instrumental, ablative, and locative; but in the later Samhitās it seems to be found with the ablative only.

a. It takes the accusative six or seven times in the sense of 'beyond', not only locally, but also to express superiority or excess; e. g. áti sáryam paráh śakuná iva paptima (IX. 107<sup>20</sup>) 'we have flown away like birds beyond the sun'; nahí deð ná mártyo mahás táva krátum paráh (I. 19<sup>2</sup>) 'for neither

god nor mortal (goes) beyond the might of thee, the great'.

b. It idemployed nearly three times as frequently with the instrumental, for the most part in the sense of 'beyond'; e. g. par's mátrayā (vii. 99¹) 'beyond measure'. In some passages this sense is somewhat modified. Thus the word twice means 'over' (as opposed to avás); e. g. yás te aṃślir aváś ca yáli paráli srucā (x. 17¹³) 'thy juice which (fell) down from and over the ladle'. Twice, moreover, it expresses 'without'; e. g. par's māyābhis (v. 44²) 'without wiles'.

c. With the locative it occurs only once in the sense of 'beyond': yé trimśáti tráyas paró deváso barhír ásadan (VIII. 281) 'the gods who, three in

excess of thirty, have seated themselves upon the litter'.

d. It is found in three passages of the RV., as well as a few times in the AV. and the VS., with the ablative in the senses of 'beyond', far 'from', and 'away from'; e. g. paró diváh (AV. IX.  $4^{21}$ ) 'beyond the sky'; asmāt. paráh (VIII.  $27^{18}$ ) 'far from him'; tvát paráh (AV. XII.  $3^{39}$ ) 'apart from thee'; parò májavató 'tīhi (VS.III. 61) 'go away beyond (Mount) Mūjavat'. The last example may probably be an instance of the accusative with parás = 'beyond (the tribe of) the Mūjavants'.

## purástād 'in front of'.

617. This adverb is used two or three times in the Saṃhitās with the genitive in the sense of 'before', 'in front of'; e. g.  $s\acute{a}middhasya$  purástāt (III. 8²) 'in front of the kindled one';  $v\acute{a}jah$  purástād utá madhyató naḥ (TS. IV. 7. 12² = VS. XVIII. 34) 'strength be before us and in the midst of us'.

# purå 'before' (time).

In the RV. purá is used some twenty times, and in the later Samhitās occasionally, before or after the ablative. It has primarily the sense of 'before' (of time); e. g. purá nú jarásah (VIII. 67<sup>20</sup>) 'before old age'; purá krūrásya visŕpah (TS. I. I. 9<sup>3</sup> = VS. I. 28) 'before the departure of the cruel (foe)'. This sense is, however, often modified to express exclusion, sometimes equivalent to 'without', 'except', 'in preference to', e. g. purá sambādhád abhy á vavṛtsva (II. 16<sup>8</sup>) 'turn to us before (= so as to save us from) distress'; purá mát (AV. XII. 3<sup>46</sup>) 'except me'.

bahirdha 'outside'.

618. This adverb<sup>2</sup> is once used in the VS. with the ablative in the sense of 'outside', 'from': idám ahám taptám vắr bahirdhắ yajñắn nissrjāmi (VS. v. 11) 'this heated water I eject from the sacrifice'.

#### sácā 'with'.

619. The use of sácā is almost restricted to the RV., where it is common before and after the locative, meaning 'in association with', 'beside', 'at',

2 It is used fairly often in B. and S. The

The word mujavant- occurs in the plural simple form bahis 'outside' (used also with as the name of a tribe in AV. v. 225 etc. abl.) is frequent in B. and later.

'in'; e.g. indra id dháryoh sácā (1.72) 'Indra with his two bays'; mādáyasva suté sácā (1.818) 'rejoice at the pressed libation'; námucāv āsuré sácā (VS. xx. 68) 'along with the demoniac Namuci'.

## sanitúr 'apart from'.

620. This adverb is used two or three times 2 in the RV. after the accusative in the sense of 'beside', 'apart from'; e. g. pútim sanitur (V. 123) 'without a lord'.

### sanutár 'far from'.

621. Allied to the preceding word, sanutár appears once in the RV. with the ablative in the sense of 'far away from': kṣétrād apaśyam sanutás' cárantam (v. 24) 'far from the field I saw him wandering'.

### sahá 'with'.

622. This adverb is common in the RV. as well as the later Samhitas, before and after the instrumental in the sense of 'with'; e. g. sahá ŕsibhih (I. 2324) 'together with the seers'; jarávunā sahá (VS. VIII. 28) 'with the afterbirth'; sahā pātyā (TS. I. I. 102) 'with (my) husband'; mānasā sahā (AV. I. 12) 'together with divine mind'.

### sākám 'with'.

623. In the same sense as, but less frequently than, sahá, the adverb sākám³ is used before and after the instrumental; e. g. sākám sáryasya raśmibhih (I. 477) 'together with the rays of the sun'; sākúm gan mánasā vajňám (VS. XXVII. 31) 'may he come with thought to the sacrifice'; sākám jaráyunā pata (AV. 1. 116) 'fly with the afterbirth'.

#### sumád 'with'.

624. This word occurs four times as an adverb4 in the RV. with the sense of 'together'. It is found once governing the instrumental in the sense of 'with': jāyā pátim vahati vagninā sumát (x. 323) 'the wife weds the husband with a shout of joy'.

#### smád 'with'.

625. Besides being used adverbially some half dozen times in the RV. with the sense of 'together', 'at the same time', smád' also occurs about as often with the instrumental, meaning 'with'; e. g. smát sūrībhih (1. 5115) 'together with the princes'.

#### 2. Adverbs.

GRASSMANN, Wörterbuch 1737-1740. - WHITNEY, Sanskrit Grammar 1097-1117.

626. Adverbs are most conveniently grouped as those which are formed with adverbial suffixes and those which are formed with case-endings. The former class may be best described according to the suffixes alphabetically arranged, the latter according to the ordinary sequence of the cases.

<sup>2</sup> Cp. BR. and Grassmann, s. v.

I Though not found in the AV., sácā survives in the TB. (I. 2. 18).

<sup>3</sup> On other adverbs of similar meaning, with case-endings (samáyā, sarátham) used of six or seven compounds. prepositionally, see WHITNEY 1127.

<sup>4</sup> sumád also appears as the first member of a compound in sumád-amsu-, sumád-gana-, sumád-ratha-.

<sup>5</sup> smád also appears as the first member

# A. Adverbial suffixes.

627. -as forms adverbs chiefly of a local or temporal meaning; thus tir-ás 'across', par-ás 'beyond', pur-ás 'before', sa-div-as and sa-dy-ás 'to-day', 'at once'; sz-ás 'to-morrow', hy-ás 'yesterday'; also mith-ás 'wrongly'.

628. -tas expresses the ablative sense of 'from'. It forms adverbs:

- a. from pronouns; e. g. á-tas 'hence', amil-tas 'from there', kil-tas 'whence', til-tas 'thence', vil-tas 'whence', and, with accent on the suffix, i-tás 'from hence', mat-tis (AV.) 'from me'.
- b. from adjectives and substantives; e. g. anyá-tas 'from another place', dak'sina-tás 'from the right', sarvá-tas 'from all sides'; agra-tás 'in front', hṛt-tás 'from the heart', etc.; the suffix is added to a locative case-form in patsu-tás 'at the feet', beside pat-tás 'from the feet'.
- c. from prepositions: *ánti-tas* 'from near', *abhí-tas* 'around', *pari-tas* (AV.) 'round about'.
- a. These adverbs in -tar are sometimes used as equivalents of ablatives; e. g. áto bhúyas 'more than that'; tútah sashhát (AV.) 'from that sixth'. On the other hand, the ablative sense is sometimes effaced, the locative meaning taking its place; e. g. agratás 'in front'.
- 629. -tāt (an old ablative of ta- 'this') has an ablative or a locative meaning. It is attached to adverbial case-forms and adverbial or adnominal prepositions; thus 'idak-tāt' 'from above', prāk-tāt' 'from the front'; ārāt-tāt' 'from afar', uttarāt-tāt' 'from the north', parākāt-tāt' 'from a distance'; paścā-tāt' 'from behind'; adhás-tāt' 'below', avás-tāt' 'below', parās-tāt' 'beyond', purās-tāt' 'in or from the front', and with inserted s (probably due to the influence of the preceding forms) upári-s-tāt' '(from) above'.

630. -ti in án-ti 'near', 1-ti 'thus'; probably also in á-ti 'beyond', prá-ti 'towards'.

- 631. -tra or -trá has a local sense, and is mostly attached to pronominal stems or stems allied to pronouns in sense; thus á-tra 'here', amútra (AV.) 'there', kú-tra 'where'; tá-tra 'there', yá-tra 'where'; anyá-tra 'elsewhere', ubhayá-tra 'in both places', viśvá-tra 'everywhere'; asma-trá 'among us', sa-trá 'in one place', 'together'; dakṣiṇa-trá 'on the right side', puru-trá 'in many places', bahu-trá 'amongst many'; deva-trá 'among the gods', pāka-trá in simplicity', puruṣa-trá 'among men', martya-trá 'among mortals', sayu-trá 'on a couch'.
- a. These adverbs in -trå are sometimes used as equivalents of locatives; e. g. yátrådhi 'in which', hásta å dakṣiṇa-trå 'in the right hand'. This locative sense also sometimes expresses the goal; e. g. pathó devatrå..yånān (x.737) 'roads that go to the gods'.
- 632. -thā forms adverbs of manner, especially from pronominal stems; thus á-thā (more usually with shortened vowel, átha) 'then', i-t-thá 'thus', imá-thā 'in this manner', ka-thá 'how'; tá-thā 'thus', yá-thā 'in which manner'; anyá-thā 'otherwise', viśvá-thā 'in every way'; ārdhvá-thā 'upwards', pūrvá-thā 'formerly', pratná-thā 'as of old'; rtu-thá 'regularly', nāmá-thā (AV.) 'by name'; evá-thā 'just so'.

a. -thám occurs beside -thā in i-t-thám 'thus', and ka-thám 'how?'.

633.  $-d\bar{a}$  forms adverbs of time almost exclusively from pronominal roots; thus  $i-d\hat{a}$  'now',  $ka-d\hat{a}^2$  'when?',  $ta-d\hat{a}$  'then',  $ya-d\hat{a}$  'at what time';  $s\hat{a}-d\bar{a}$  'always':  $sarva-d\hat{a}$  (AV.) 'always'.

a. -dam occurs beside  $-d\bar{a}$  in  $s\acute{a}$ -dam 'always'; and  $-d\acute{a}$ - $n\bar{\imath}m$ , an extended form of  $-d\bar{a}$ , appears in i- $d\acute{a}$ - $n\bar{\imath}m$  'now', ta- $d\acute{a}$ - $n\bar{\imath}m$  'then', visva- $d\acute{a}$ - $n\bar{\imath}m$  'always'.

In the RV.  $t\hat{a}t$  itself is once used independently in the sense of in this way'. When followed by  $can\hat{a}$  = 'never'.

b. di-, which occurs only in  $y\dot{a}$ -di 'if', is perhaps related to  $-d\bar{a}$ .

634. -dhā forms adverbs from numerals or words of cognate meaning, with the sense of '(so many) times', 'in (so many) ways', '-fold'; thus ekadhā (AV.) 'singly', dvi-dhā 'in two ways', tri-dhā and tre-dhā 'triply', catur-dhā 'fourfold', so-dhā 'in six ways', dvādaśa-dhā (AV.) 'twelvefold'; kati-dhā 'how many times?', tati-dhā (AV.) 'in so many parts', paru-dhā 'variously', bahu-dhā 'in many ways', viśvā-dhā 'in every way', śaśva-dhā 'again and again'; priya-dhā (TS.) 'kindly', pre-dhā (MS.) 'kindly', bahir-dhā (VS.) 'oūtward', mitra-dhā (AV.) 'in a friendly manner'; á-dhā and (with shortened final) á-dha 'then', a-d-dhā ('thus' =) 'truly'; sáma-dhā (Kh. I. II 4) 'in the same way'.

a.  $s\alpha$ - $dh\alpha$ -, occurring as the first member of several compounds, in the sense of ('in one way' =) 'together', is probably formed with the same suffix, the final vowel being shortened'; in independent use it appears as  $s\alpha h\dot{\alpha}$  'with's. With the same original suffix appear to be formed other adverbs in  $-h\alpha$ ; thus i- $h\dot{\alpha}$  'here' (Prākrit  $idh\alpha$ ),  $k\dot{u}$ - $h\alpha$  'where?',  $vi\dot{s}v\dot{\alpha}$ - $h\alpha$ 6 and  $vi\dot{s}v\dot{\alpha}$ - $h\bar{\alpha}$ 7 'always', sama- $h\alpha$  'in some way or other'.

635. -va, expressing similarity of manner, forms two adverbs: i-va 'like', 'as'<sup>8</sup>; e-vá, often with lengthened final, e-vá 'thus'. -vám appears beside -va in e-vám 'thus', which occurs once in the RV. (x.1513) instead of evá, and a few times in the AV. with vid- 'know'; it is also found in the SV. (1.3.1.110): ná ki evám yáthā tvám 'there is nothing such as thou'.

636. -vát forms adverbs meaning 'like' from substantives and adjectives; e. g. aṅgiras-vát 'like Aṅgiras', manu-vát 'as Manu (did)'; purāṇa-vát, pūrva-vát, pratna-vát 'as of old'. In origin it is the accusative neuter (with adverbial shift of accent) of the suffix -vant, which is used to form adjectives of a similar meaning (e. g. tvá-vant- 'like thee').

637. -śás is used to form adverbs of measure or manner with a distributive sense, often from numerals or words implying number; thus śata-śás (AV.) 'by hundreds', sahasra-śás 'by thousands'; śreni-śás 'in rows'; similarly rtu-śás 'season by season', deva-śás 'to each of the gods', parva-śás 'joint by joint', manma-śás 'each as he is minded'.

638. -s forms two or three multiplicative adverbs: dvi-s 'twice', tri-s 'thrice', and probably catúr for \*catúr-s (cp. Zend cathrus') 'four times'. The same suffix forms a few other adverbs: adhá-s 'below' (cp. ádha-ra 'inferior'), avá-s 'downwards' (from áva 'down'), -dyú-s (from dyú- 'day') in anye-dyú-s (AV.) 'next day' and ubhaya-dyú-s (AV.) 'on both days'; perhaps also in āvi-s 'openly' and bahi-s 'outside' 10.

639. -hi forms a few adverbs of time from pronominal roots; thus  $k\acute{a}r$ -hi 'when?',  $t\acute{a}r$ -hi 'then?'<sup>11</sup>. The first part of these words seems already to contain an adverbial suffix -r<sup>12</sup> (thus  $k\acute{a}$ -r = Lat.  $c\ddot{u}r$ )<sup>13</sup>.

640. There are also some miscellaneous adverbs consisting of isolated

<sup>1</sup> Cp. Brugmann, KG. 585.

<sup>&</sup>lt;sup>2</sup> The final vowel of purudhā and viśvádhā appears shortened before a double consonant in the RV.

<sup>3</sup> Cp. sama·ha.

<sup>4</sup> As in ádha, purudhá, viśvádha.

<sup>5</sup> See above 58, 2 a (p. 52).

<sup>6</sup> Just as viśvádha beside viśvádhā; but cp. Brugmann, KG. 582.

<sup>7</sup> On the other hand viśvahā 'always' is = viśvā ahā 'all days' ('alle Tage') with a single accent, like a compound; see GRASS-MANN, s. v.

<sup>8</sup> In the late parts of the RV. and in the AV. *iva* has often to be read as *va*; cp. ARNOLD, Vedic Metre 129, but see OLDENBERG, ZDMG. 61, 830.

<sup>9</sup> See Meringer, IF. 18, 257; cp. Richter, IF. 9, 238; Schulze, KZ. 28, 546.

<sup>10</sup> Cp. Brugmann, KG. 584.

<sup>11</sup> amúr-hi, etár-hi, yár-hi also occur in B.

<sup>12</sup> Cp. avá-r, which occurs once beside the usual avá-s.

<sup>13</sup> Cp. BRUGMANN, KG. 583.

words or small groups, mostly of obscure origin, formed with other suffixes. The latter in alphabetical order are:

 $-\alpha$ : kv- $\alpha$  (always ki- $\alpha$ ) 'where?' and  $\alpha$ -dy- $\alpha$ ' 'to-day'.

-ar: pin-ar 'again' and sasy-ár 'secretly'.

 $-\bar{a}$ : antar- $\hat{a}$  'between', pur- $\hat{a}$  'before'; perhaps also in  $n\hat{a}n\bar{a}$  'variously', which may be  $= nd - n\bar{d}$  'so and so' from the pronominal root  $n\alpha^{-2}$ .

zit: dakṣiṇ-it 'with the right hand'; and -vit in cikit-vit 'with deliberation'.

-u: jat-u 'ever', mith-u 'wrongly', muh-u 'suddenly'; anu-sth-u 'at once' ('standing after', from  $\sqrt{sth\bar{a}}$ , cp. su-sth-ii 'in good state').

-ur: mih-ur 'suddenly'.

 $-k:jv\dot{v}-k$  'long'. In several other adverbs -k with more or less probability represents the final of a root; thus ninik 'secretly' (probably from \*nini-acadj. 'secret'), madrik 'towards me' (contracted from madriak, neut. adv. of madriac- adj. 'turned to me');  $\bar{a}nu$ - $s\dot{a}k$  'in succession' ('following after':  $\sqrt{sac}$ -); āvu-sák 'with the cooperation of men' (sac- 'follow'); uśá-dhak 'with eager consumption' ('eagerly burning':  $\sqrt{dah}$ -).

-tár: prā-tár 'early' and sanu-tár 'away' (621).

-túr : sani-túr 'away' (620).

-nám: nū-nám 'now' and nānā-nám 'variously' (642 d).

### B. Adverbial Case-forms.

641. A large number of case-forms of nominal and pronominal stems, often not otherwise in use, are employed as adverbs. They become such when no longer felt to be case-forms3. Forms of all the cases appear with adverbial function.

Nominative. Examples of this case are prathamám 'firstly', dvitíyam 'secondly'; e. g. divás pári prathamám jajñe agnír, asmád dvitíyam pári jātávedāh (x. 451) 'Agni was first born from heaven, secondly he, Jātavedas, (was born) from us'. Such adverbs are to be explained as originally used in apposition to the verbal action: 'as the first thing, Agni was born'. A masculine form has become stereotyped in ki-s as an interrogative adverb; its negative forms ná-kis and má-kis are often used in the sense of 'never' or simply 'not'.

642. Accusative. Adverbs of this form are to be explained from various meanings of the accusative. The following are examples of nominal

forms representing:

a. the cognate accusative: rcā kapotam nudata pranodam (x. 1655) 'by song expel the pigeon as expulsion'; citrám bhanty usásah (vi. 652) 'the Dawns shine brightly' (= 'a bright scil. shining'); marmrjma te tanvam bhari kṛtvaḥ (III. 184) 'we adorned thy form many times' (originally 'makings'); similarly dhṛṣṇủ 'boldly', purủ 'much', 'very', bhủyas 'more'; and the comparative in -taram added to verbal prefixes; e. g. vi-tarám vi kramasva (IV. 1811) 'stride out more widely'; sam-tarám sám śiśādhi (AV. vn. 161) 'quicken still further'; prá tám naya pra-tarám (x. 459) 'lead him forward still further'; úd enam ut-tarám naya (AV. vi. 51) 'lead him up still higher'; so also ava-tarám, paras-tarám, parā-tarám 'further away', and the fem. accusatives sam-tarám and paras-tarám (AV.).

<sup>&</sup>lt;sup>1</sup> Cp. Reichelt, BB. 25, 244.

<sup>3</sup> On the distinction between case function <sup>2</sup> Cp. op. cit. 839; Persson, IF. 2, 200 ff., and adverbial use see Brugmann, KG. 571.

<sup>&#</sup>x27;auf diese (oder) jene Weise'; BARTHOLOMAE, IF. 10, 10-12, originally 'separatim'.

b. the appositional accusative; thus osá-m 'quickly' (lit. 'burningly'). káma-m 'according to desire'; náma 'by name', rūpá-m 'in form', satyá-m 'trulv'.

c. the accusative of direction; e.g.  $\alpha gra-m$  (i-) '(go) to the front of',

'before'; ásta-m (gam-) '(go) home'.

d. the accusative of distance and time; e.g. dūrá-m 'a long way off'. 'far': nákta-m 'by night', sāyá-m 'in the evening', cirá-m '(for a) long (time)', nítya-m 'constantly', párva-m 'formerly'.

a. There are also some adverbs derived from obsolete nominal stems, which would seem for the most part to have belonged originally to the sphere of the cognate accusative; thus ara-m'sufficiently' (from \*ara-'fitting'), ala-m (AV.) id.; trīstrī-m'in silence',  $n\bar{a}n\bar{a}n\acute{a}-m$  (from  $n\acute{a}n\bar{\imath}$ ) 'variously',  $n\ddot{u}n\acute{a}-m$  (from  $n\acute{u}$ ) 'now';  $s\bar{a}k\acute{a}-m$  'together' (from \*s $\bar{a}k\acute{a}-m$ 

'accompaniment': sac- 'follow' 2.

β. Finally a number of accusative adverbs are formed from pronominal stems: thus adás 'there', 'thither'; id 'just', 'even'; idám 'here', 'now'; īm 'ever' (e.g. yá īm 'whoever'); ká-d, an interrogative particle; ká-m, a particle emphasizing a preceding dative or (unaccented) the particles nu, su, hi; ki-m 'why?'; -kī-m 'ever' (in mā-kīm 'never'); kuv-id 'whether?'; ci-d 'even'; tá-d 'then'; yá-d 'if', 'when', 'that'; sî-m 'ever' (yát sĩm 'whenever'); sumá-d and smá-d 'together'.

- 643. Instrumental. With the ending of this case (sometimes plural) are formed adverbs from substantives, adjectives, and pronouns, the latter two groups being at first probably used with the ellipse of a substantive. Various senses of the instrumental case are expressed by these adverbs. Usually they imply manner or accompanying circumstances; e. g. táras-ā 'with speed'; sáhas-ā 'forcibly'; távisī-bhis 'with might'; návyas-ā 'anew'; ená 'in this (way)', 'thus'. Not infrequently they express extension of space or time; e.g. ágrena 'in front'; aktú-bhis 'by night'; dív-ā 'by day' (but div-á 'through the sky'); dosá 'in the evening'.
- a. The substantive instrumentals are chiefly formed from feminine stems in  $-\bar{a}$  not otherwise in use, but corresponding mostly to masculines or neuters in -a; thus a-datray $\dot{a}$  'without (receiving) a gift' ( $d\dot{a}tra$ - 'gift');  $\bar{a}say\dot{a}$  'before the face of', 'openly' (\* $\dot{a}s\bar{a}$ - =  $\bar{a}s$ - 'face');  $rtay\dot{a}$  'in the right way' (\* $rt\dot{a}$ - =  $rt\dot{a}$ -);  $naktay\dot{a}$  'by night' (\* $n\dot{a}kt\bar{a}$ - =  $n\dot{a}kta$ -);  $sumnay\dot{a}$  'piously' (\*sumnā- = sumnā-); svapnayā (AV.) 'in a dream' (\*svapnā- = svapna-).
- $\alpha$ . Several of these feminines are instrumentals from stems in  $-t\bar{a}$  and identical in form with the stem; thus tirascá-tā 'through'; devá tā 'among the gods'; bāhú-tā 'with the arms'; sasvár-tā 'in secret'; dvi-tā 'in two ways' may have a similar origin (dvi-tā- 'two')3. We have perhaps also old instrumentals of feminine stems in  $-\bar{a}$  in  $t\bar{a}d\bar{i}tn\bar{a}$  'then' = 'at that time'; and in výthā 'according to choice', 'at will' (\*výthā ·choice', from výthā ·choose').
  β. In a few examples the instrumental seems more probably to be that of a radical
- stem with adverbial shift of accent rather than from a stem in  $-\bar{a}$ ; thus gith  $\bar{a}$  'in secret', rather inst. of gith hiding' hiding' han of a stem \*gith  $-\bar{a}$ -5; similarly mr;  $\bar{a}$  'in vain' (\*mr)'; 'neglect': inst. mr;  $\bar{a}$ ); sac- $\bar{a}$  'together' (\*sac- 'accompaniment': inst. sac- $\bar{a}$ ). In a-sth $\bar{a}$  (RV1.), perhaps meaning 'at once', we seem to have an instrumental adverb from a radical astem a-sth $\hat{a}$ - ('no standing') = 'without delay'.
- b. The adjective instrumentals end either in  $-\bar{a}$  (plural -ais) or  $-y\bar{a}$ . The former are derived from a- stems and a few consonant stems in -c; the latter are anomalous feminines from u- stems and one or two z- stems:
- α.  $ap\bar{a}k\dot{a}$  'afar' ( $\acute{a}p\bar{a}ka$  'far');  $\bar{\imath}rm\dot{a}$  'quickly' ( $\bar{\imath}rm\dot{a}$ -);  $ucc\dot{a}$  and  $ucc\dot{a}is$  'on high' (uccá-); daksiná 'to the right' (dáksina-); parācáis 'for away' (\*parācá-); paścá 'behind' (\*paścá-); madhyá 'in the midst' (mádhya-); śúnais 'slowly'

<sup>&</sup>lt;sup>1</sup> Cp. Gray, IF. 11, 307 ff.; Foy, IF. 12,

<sup>&</sup>lt;sup>2</sup> For some other adverbs of obscure origin, which were originally accusatives, the next stanza guhā bhavantam. see WHITNEY IIII f.

<sup>3</sup> Cp. Benfey, SV. Glossary, and GRASS-MANN, Wörterbuch, s. v.

<sup>4</sup> The normal inst. of which would be guh-ā.

<sup>5</sup> Cp. RV. 1. 676 guhá guham gas and in

(\*śána-) and śánakais id.; sánā t 'from of old' (sána-); samaná 'in the same way' (sámana-); tiraśc-á 'across'; nīc-á 'downwards'; prāc-á 'forwards'.

- β. anu-sthu-y- $\hat{a}^2$  'at once' (anu-sthú 'following', adv. from sthā- 'stand');  $\bar{a}suy-\dot{a}$  'swiftly' ( $\bar{a}suy$ -);  $dhrsnuy-\dot{a}$  'boldly' ( $dhrsnuy-\dot{a}$  'falsely' (mithu, adv. from mith- 'be hostile'); raghu-y-á 'rapidly' (raghú-); sādhu-y-á 'straight' (sādhi-); also urviy-ā (for urvy-ā) 'far', from urvi f. of uri- 'wide'; and víśvy-à 'everywhore', from \*víśvī-, irregular f. of víśva- 'all', beside the regular inst. f. viśvayā, which itself seems once (VIII. 682) to be used adverbially.
- c. Pronominal instrumentals are formed from several stems in -a and one in -u. Some appear in the masculine (or neuter) form of -v or the feminine of  $-y\bar{a}$ ; so  $an\hat{a}$  thus'  $(an\hat{a}$  that');  $am\hat{a}$  'at home' (ama this');  $a-y\hat{a}$ 'thus' (a- 'this'); ená 'thus' (ena- 'this'); ka-yá 'how?' (ká- 'who?'); ubhayá 'in both ways' (ubháya-'both'). From amú-'that' is formed the adverb amu-y-á 'in that way', with the anomalous interposition of y3. To the influence of the latter word is probably due the form kuhayá 'where?' (RV'.) beside the usual kúha 'where?'.
- 644. a. Dative. The adverbial use of this case is rare. Examples are: aparáya 'for the future' (from ápara- 'later'); várāya 'according to wish' (vára- 'choice').
- b. Ablative. This case is on the whole used adverbially fairly often. It is, however, seldom formed from substantives, as arát 'from a distance',  $\bar{a}s\dot{a}t$  'from near'; or from pronouns, as  $\dot{a}t$  'then',  $t\dot{a}t$  'thus',  $y\dot{a}t$  'as far as'. It is most commonly formed from adjectives; thus dūrát 'from afar'; nīcát 'from below'; paścát 'from behind'; sākṣát 'visibly'; and with shifted accent: adharāt 'below' (ádhara-); apākāt 'from afar' (ápāka-); amāt 'from near' (áma-); uttarát 'from the north' (úttara-); sanát and sanakát 'from of old' (sána-).
- c. Genitive. The adverbial use of this case is very rare. Examples are aktús 'by night' and vástos 'in the morning'.
- d. Locative. Several forms of this case have an adverbial meaning; thus agre 'in front'; abhi-svaré 'behind' (lit. 'within call'); astam-īké 'at home'; āké 'near'; āré 5 'afar'; rté 'without'; dūré 'afar'; and in the plural aparisu 'in future'.

## 3. Particles.

WHITNEY, Sanskrit Grammar 122, 132—133. — Delbrück, Altindische Syntax p. 240-267. - Cp. Brugmann, KG. 817-855.

645. Other adverbial words, the derivation of which is obscure and the meaning of which is abstract or general, may be classed as particles. They form three groups, the emphatic, the conjunctional, and the negative, the first being the most numerous. The emphatic particles, as throwing stress on a preceding word, are either enclitic or incapable of beginning a sentence; the conjunctional particles, except utá, are of a similar nature; but the negatives, having a strongly antithetical meaning, generally occupy an emphatic position in the sentence.

646. The emphatic particles may usually be translated by such words as 'just', 'indeed', or rendered merely by stress on the word they follow.

does not shift to the final syllable.

<sup>2</sup> These anomalous forms are due perhaps to the influence of the pronominal amu-y-ā.

In the last three adverbs the accent | perhaps due to the influence of the numerous adverbs in -yā from stems in -a, amii- being an isolated pronominal u- stem.

<sup>4</sup> sanāt occurs also AA. v. 2. 2 15. 5 On āré, ārất, rté cp. Neisser, BB. 19,

<sup>3</sup> The anomalous interposition of y is 140.

They are angá; áha<sup>1</sup>, gha, ha (the last two less emphatic than áha); smã; svid (generally following an interrogative) = 'pray'; vái, nearly always following the first word of a sentence. Three particles which emphasize the preceding word more strongly in the sense of 'certainly', 'in truth', are kila (+ AV.), khálu (RVI., not in AV.), bhála (RVI. AVI.). In the RV. th usually emphasises exhortations = 'pray', but sometimes also statements = 'surely': once (vi. 295) it seems to mean 'but', which is its sense in its single occurrence in the AV. The particle nd, when it means 'as it were', 'like', was in origin probably an emphatic particle = 'truly'2.

647. There are several conjunctional particles, some of which are compounded.  $\tilde{u}^3$  'now', 'again', is commonly used deictically and anaphorically after pronouns and verbs. Both u-ti and ca mean 'and'. ca when compounded with the negative particle as caná originally meant 'not even', but the negative sense generally disappears and caná turns the interrogative pronoun into an indefinite, as kás canú 'some one'4. ca when compounded with id, that is céd, means 'if'. nu 'now' generally follows the first word of the sentence. The disjunctive particle is vā 'or'. hi (generally following the first word of a sentence) expresses the reason for an assertion = 'for', 'because'; it is also used with imperatives, when it means 'then'. It occurs once in the RV. (vi.  $48^2$ ) compounded with the negative  $n\acute{a}$ , but without change of meaning: hiná 'for'.

648. The negative particle which denies assertions is nú 'not'. Its compound  $n\acute{e}d$  (=  $n\acute{a}$   $\acute{i}d$ ) expresses an emphatic 'not'; it is, however, usually employed in the final sense of 'in order that not', 'lest'. Its compound ná-kis often means 'never', and ná-kīm, in the only two stanzas in which it occurs (VIII. 78<sup>1.5</sup>), has the same sense. The negative also occurs twice (x. 54<sup>2</sup>; 84<sup>3</sup>) compounded with nú as nanú, which expresses a strong negative = 'not at all', 'never'. When it is compounded with hi as nahi, the latter word retains the meaning of both particles: 'for not'.

mā 'not' is the prohibitive particle regularly used with the injunctive 5. It is compounded with the petrified nom. -kis and acc. -kIm to  $m\dot{a}$ -kis and må-kīm. The former frequently and the latter in its only two occurrences mean 'never'.

# a. Adverbial words occurring in compounds only.

649. A limited number of words of an adverbial character have either entirely lost or, in a few instances, nearly lost their independent character, being found in combination with half a dozen particular verbs or as the first member of nominal compounds. In two or three examples the original independence of such words can still be traced.

650. A few mostly onomatopoetic reduplicative words appear only compounded with the roots kr- 'do' and  $bh\bar{u}$ - 'be', the prefixed form generally ending in -ā, once in -ī: thus akhkhalī-kṛtya6 (VII. 1033) 'croaking', alalā-

the negative = 'not (precisely)': see WHITNEY 1122 h; cp. BB. 22, 194 ff.

<sup>3</sup> On the Sandhi of u, see above 71, 1b.

<sup>4</sup> Cp. Delbrück, op. cit. p. 544.

<sup>5</sup> It is not used with the ordinary sub- kārá-, designations of a disease.

Another frequent particle of the same junctive, nor the imperative, nor the optameaning, id, has already been mentioned tive except in the form bhujema; see among the pronominal accusative adverbs. Delerück p. 361 (top). In the Khilas it 2 Greek val, Lat. nae, cp. Lith. nei 'as it occurs two or three times with the 2. impv.; were' (cp. Brugmann, KG. 839); this sense pasya (III. 1517), tistha (IV. 525), and once at of ná is generally explained as derived from least with the subj.: vadāti (1.95): MS. vádeti.

<sup>6</sup> This is the only instance of the prefix ending in -ī instead of -ā in the RV. In the AV. -ī appears before forms of ky- in the nominal compounds vātī-kṛta- and vātī-

bhávant- (IV. 186) 'sounding merrily'; jañjanā-bhávant- (VIII. 438) 'sparkling'; kikirá krnu (VI. 537) 'tear to tatters'; masmasá-karam (AV. v. 238) 'I have crushed', masmasá kuru (VS. xi. 80) and mṛsmṛsá kuru (MS. ii. 77) 'crush', malmalābhávant- (MS. II. 1319; TS. I. 4. 341) 'glittering', bharbhará-bhavat (MS. II. 21: B.) 'became confounded'; bibibā-bhávant- (MS. 1. 65: B.) 'crackling'.

651. The adverb  $\bar{a}vis$  'openly', 'in view', is found in combination with the veros as-, b/-v- and kr- only. With the latter it means 'make visible'. e. g. āvis karta (1.869) 'make manifest'. With the two former, which are sometimes omitted, it means 'become visible', 'appear'; e. g. āvis sānti (VIII. 823) 'being manifest'; āvir agnir abhavat (1. 1432) 'Agni became manifest'.

prā-dúr, lit. 'out of doors', begins to appear in the AV. in combination

with 1/bhū-, meaning 'become manifest', 'appear'.

652. The word śrád, which originally probably meant 'heart' i, is often found in combination with dha-'place', in the sense of 'put faith in', 'credit', nearly always, however, separated from the verb by other words, e. g. śrád asmai dhatta (II. 125) 'believe in him'; śrád asmai, naro, vácase dadhātana (VS. VIII. 5) 'give credence, O men, to this utterance'. It also appears in the substantive srad-dhā- 'faith'. The word is once also found with  $\sqrt{kr}$ - in the sense of 'entrust': śrád víśvā vāryā kṛdhi (VIII.752) 'entrust all boons (to us)'.

653. The interjection hin is compounded with kr- 'make' in the sense of 'utter the sound hin', 'murmur'; thus gaur .. hinn akṛṇot (1. 16428) 'the cow lowed'; hin-kṛṇvatī (t. 16427) 'lowing'; hin-kṛtāya svāhā (VS. XXII. 7) 'hail to the sound hin'; tásmā usá hín-krnoti (AV. IX. 645) 'for him the dawn

utters hin'.

654. A few substantives, after assuming an adverbial character, are found compounded with participial forms. dsta-m 'home', which still appears as a noun in the RV., though commonly used adverbially in the accusative with verbs of motion, is combined like a verbal prefix with participles of i-'go' in the AV .: astam-yánt- 'setting', astam-esyánt- 'about to set', ástam-ita-(AV. XVII. 1<sup>23</sup>)<sup>2</sup> 'set'. 'The noun námas- 'obeisance' is similarly compounded in the gerund with kr -'make' in the AV.: namas-kftya3. In the RV. itself names of parts of the body, with no tendency otherwise to adverbial use, are thus compounded with the gerund of grah- 'seize': karna-grhya 'seizing by the ear', pāda-gŕhya 'seizing by the foot', hasta-gŕhya 'grasping the hand'4. The transition to this use was probably supplied by nouns compounded with past participles, as sáhas-kṛta- 'produced by force'.

655. There are besides a few monosyllabic adverbial particles which occur as prefixes compounded with nominal forms only. By far the most frequent of these is the negative prefix, which appears in the form of an- before vowels and a- before consonants. It is compounded with innumerable substantives and adjectives, but rarely with adverbs, as a-kútrā 'to the wrong place', a-punár ('not again' =) 'once for all'; án-eva (AV').

'not so'.

656. sá-, as a prefix expressive of accompaniment, is employed as a reduced form of the verbal prefix sam<sup>5</sup>, and interchanges with saha-; e. g. sá-cetas- 'accompanied by wisdom', 'wise', beside sahá-cchandas- 'accompanied with songs'.

logisches Wörterbuch der altindischen Sprache, Amsterdam 1888—89, s. v. *śraddhā*.

For some other later nominal compounds | of this kind see WHITNEY 1092 c.

<sup>3</sup> This is the regular form in the later | 5 Cp. above 250.

I See UHLENBECK, Kurzgefasstes Etymo- | language, but the independent form namas krtvā is occasionally found; cp. Brhaddevatā, I. I, critical note in my edition.

<sup>4</sup> Cp. WHITNEY 990 b and above 591 a (p. 413, bottom) and 591 b.

- 657. dus- (appearing also, according to the euphonic combination, as dur-, duś-, duṣ-)1, means 'ill', 'hard to'; e. g. dur-gá- '(place) difficult of access', dur-yij- 'ill-yoked', dur-mati- 'ill-will'; dus-cyavaná- 'hard to shake'; dus-krtá-'ill-done'; dus-sáha- 'irresistible'.
- 658. su- 'well', 'easy to' is compounded with a much larger number of words than dus-2; e. g. su-kára- 'easy to accomplish'; su-kŕt- 'acting well', su-gá- 'easy of access', su-mati- 'good-will', su-vij- 'well-yoked'. It is, however, still found in a state of transition in the RV., where it occurs independently more than 200 times3, being then connected in sense with the verb only4; e. g. asmán sú jigyúsah krtam (1. 177) 'make us well victorious' 5.

### 4. Interjections.

- 659. A certain number of words having the nature of interjections occur in the Samhitas. They are of two kinds, being either exclamations or imitative sounds.
- a. The exclamations are bát (RV.) 'truly', bata (RV.) 'alas!', hánta 'come' used exhortatively with the subjunctive, and haye 'come', before vocatives, híruk 'away!', hurúk (RV.) 'away!', hái (AV.) 'ho!'. Perhaps uvé  $(x. 86^7)^6$ .
- b. Interjections of the onomatopoetic type are: kikirá (RV.) used with kṛ- 'make the sound kikirā' = 'tear to tatters'; kikkiļā (TS.) used in invocations (TS. III. 4. 21); ciścá (RV.) 'whiz!' (of an arrow) used with kr. 'make a whizzing sound'; phát (AV. VS.) 'crash!', phát (AV. xx. 1353) 'splash!'; bấ (TS. = AV.) 'dash!'; bhúk (AV. xx. 1351) 'bang!', śál (AV. xx. 1352) 'clap!

compound: su-ápāyati; but this is doubtless an error for sú | ápa | ayati. See WHIT-3 In the AV. it is still used independently, | NEY's note on this passage in his Translation of the AV.

6 See Neisser, BB. 30, 303; cp. above

<sup>&</sup>lt;sup>1</sup> See Grassmann, Wörterbuch, columns | sv ápāyati 'may he go well away' as a 614--619.

<sup>2</sup> Op. cit., columns 1526-1560.

but only 14 times.

<sup>4</sup> See Grassmann, op. cit., s. v. sú.

<sup>5</sup> The Pada text of AV. XIX. 49<sup>10</sup> treats p. 337, note 7.

# ADDENDA AND CORRIGENDA.

It should be noted, in addition to what is said at the end of \$ 1 (p. 2), that when the abbreviations 'VS.' etc. indicate the occurrence of a form in a later Veda, they only mean that the form in question is not found in the RV., while it may occur in parallel passages of one or more of the other Samhitas also. The symbols '+VS.' etc. are intended to draw attention to the fact that the form indicated occurs in a later Samhita as well as in the RV. - In the enumeration of words, stems, inflected forms, and suffixes, initial alphabetical order is the principle followed. But it is occasionally varied for clearness of grouping. Thus the arrangement, in the case of compounds, is sometimes according to the final member (e.g. 308, 375 A, 591 a) or, in the case of roots, according to the medial or final vowel (e.g. 421, 483). The principle is also departed from when examples only of very frequent forms are given. Thus the nom. forms of present participles are arranged in the order of the conjugational classes (314); the nom. and other cases of the a-declension are given according to frequency of occurrence (372). Adverbs are classed according to the alphabetical order of the suffixes (626-640) or the sequence of the cases (641-644). - The principle of giving the meanings of words has been followed throughout the work. But this has been modified in two ways in the enumeration of inflected forms. In declension the meaning is given only with the first occurrence of a case-form of any word found in the same paragraph (e.g. 372). It seemed impossible to follow the same method in lists of inflected verbal forms. For, owing to the modifications of sense due to context and compounding with prepositions, the meaning could not be satisfactorily stated by giving it with the first occurrence of forms from the same root. The meaning has therefore been stated with the root only or when forms from different roots might be confused (e.g. 444, 445). But as the index gives the meaning of every root and enumerates all paragraphs containing forms from that root, the general sense of all such forms may easily be ascertained. — As regards references, figures without an added 'p.' always indicate paragraphs when books are divided into paragraphs; e. g. 'Delbrück, Verbum 184 (p. 166-169)'; otherwise they refer to the page. When pages have to be referred to they are for the convenience of the reader often divided into quarters; thus LANMAN 3723 means the third quarter of p. 372 in Lanman's Noun-Inflection.

P. 23, line 19 for original read original. — P. 51, note 2, for \*guadhá read \*guadha. — P. 56, l. 27, for AV. read Av. and for 'weak read weak. — P. 58, l. 4 from below, for cak[an]anta read cāk[an]antu. — P. 60, l. 2, for appears read appears as. — P. 61, l. 7, for become read becomes; l. 34, for (a-yās read a-yās; l. 36, for fall') read 'fall'. — P. 66, § 72, 2 b: cp. ### II. GENERAL INDEX

Ablative: sing. masc. formed in two, neuter in three ways from der. u-stems 389. Accusative: pl. masc. and fem. formed in two ways from der. u-stems 389; appositional 642b; cognate 642 a; of direction 642 c; of distance and time 642 d. Accentuation 83-111; aorist 505 (root aor.), 507 ( $\alpha$ -aor.), 535 (sa-aor.); augment 96; causative 552; denominative 562; double 85 a, 91 (p. 96), 105 a; lack of 85b; irregular monosyllabic 94, 1 a, 368 n. 14 (rad. ā-stems), 362 n. 7  $(r \hat{a} y$ -), 364 c  $(dy \hat{a} v$ -, dyú-), 376, p. 272 n. 10 14 (strž-); normal nominal 384 b (der.  $\vec{u}$ -stems), 382 b (radical  $\bar{u}$ -stems); shift of 22, 29 38 d, 58 d, 107 (case-forms as adverbs), 299, 319, and 389 (inst. as adv.), 311 (participles as substantives), 314 (nom. neut. of participles as adv.), 374 (inst. adverbs p. 264 mid.), p. 273 n. 1 (fem. of a-stems), 94, 2—4 (oxytones), 377,3 a and 378 (der. *ī*-stems), 380 (d**e**r. *i*stems), 388c (der. u-stems), 94, I (monosyllabic stems), 334 b (áp-), 364 c (div-), 93 a a (cardinals); systems of 84.

Adjectives: fem. of 299 (añcstems), 326 a n. 13 (an-stems), 330 a (van-stems), 332 note9 (in-stems), 345 (vāms-stems), 347 (vāms-stems), 375 a, p. 270 (ya-stems), 377, I (various stems), 388 a (ustems).

Adverbs: two classes 626; formed from nouns 442 α, 643a, 643b, from pronouns 642 d β, 643c, from numerals 634; multiplicative 638; miscellaneous 640; of manner 632; of time 639; with

the case-ending of the abl. 644 b, of the acc. 642, 642 a, 642 d  $\beta$ , of the dat. 644 a, of the gen. 644 c, of the instr. 372 (p. 257), 374 (p. 264), 374 (f. pl. p. 267), of the loc. 643, 644 d, of the nom. 641. Alternative nominal stems 253, 318 a 4, 328 c. 332 a Amredita compounds 257, 6, 258, 319 (p. 198 note 5); accentuation of 88; Sandhi in 57 b  $\gamma$ , 78, I c.

Anudātta accent 83, 84. Anunāsika for final n 77 1 b, 77, 2 d.

Anusvāra for m 75, 2, 3, for n 77, 2 a b c; in the intensive reduplicative syllable 60b. Aoristic s: added to present stem 521 a 2; lost 520 a 4, 529 a.

Archaic Sandhi in compounds S1.

Aspirates: two in the same syllable avoided 32, 40 a. Assimilation: of \$53, 57, 78; of final consonants 74; of final \$\lambda\$ to \$l\$ and palatals 76, 1, 2; of final media to following nasal 74 a; final \$m\$ to following mutes 75, 2, to \$\lambda\$ low 10 75, 4.

Attraction with the dative and ablative infinitive 583, 587. Augment 413; lengthened 413; dropped 413 b; irregular Sandhi of 413 a.

Breathing h: represents sonant aspirates, guttural, palatal, cerebral, dental, labial 58; when final becomes k or f 66 b 6 d, 351 b.

Case-endings, normal 295 c. Case-forms: as adverbs (treated in the order of the cases) 641—644; strong and weak 295 d, 297, 298, 301, 313, 315, 323, 325, 326 b, 328 b, 330 b, 334 a, 336 a, 338, 339 a, 341 a, 343 a, 344 (p. 230 note o), 345, 347, 349 a, 351 a, 354 a, 356, 363, 380 a.

Causative stem: nominal derivatives in -ana, -tp, -a, -ālu, -iṣṇu, -itnu, -u 561e; formed with suffix -paya 558, the p of which sometimes retained in the reduplicated aorist 513 a 2.

forms after the r of prepositions 47 A a; after r, r, s, in the second member of nominal compounds 47 A b, St, 2 e; in a following word 47 A c; of initial t 78, 2 b. Cerebrals: their origin 42, unexplained 43 c, 47 B c; Prakvitic 42 b, 47 B: re-

Prakritic 42 b, 47 B; representing old palatals 43; for final \$66 b 6 \$\beta\$, \$\eta\$ and \$\delta\$ for \$\pi\$ 42 d; \$\eta\$ for palatal \$\delta\$.

Compounds: characteristic features 241, consisting of phrases 293, 3, gender 241 a, Sandhi 81, suffixes 256, tmesis p. 143 (bottom), 260; first member consisting of adverbs 247, 274 b, 278 c, 289 b, nouns with caseendings 242, 248, 275, 277, 278 a, 280, 287, 355 (p. 242 note 9), 368 (p. 252 notes 2, 3, 13, p. 253 note 6), particles 251, 278 c, 284, 289 c, prepositions 249, 274a, 278d, 283, 298a, 292,1, alternative stems 244, 245, present stems 292, 2 a, b; last member consisting of alternative stems 253, or present stems 272.

Conjugation: irregularities of the a-class 42I a, of the d-class 429 a, of the yaclass 438, of the ya-class (passive) 444 a, of the root class 450 a, of the redu-

plicated class 457 a, of the infixing nasal class 463, 1, of the nu-class 469 a, of the nā-class 475 a.

Consonants lost: 81, 2 a, in final group 66 c, 521 a; mute between nasal and mute 62, 3c; / between two consonants 62, 3 b, s between two mutes 355 note 9, 520 a 4, m or n in the inst. of -man stems 328b. Contraction: in secondary Sandhi 70, 3; in the perfect 483 a 2; in declension 344 (p. 229, 230, 232, 233), 374 (gen. pl. of *kanyā*).

Dative: sing. masc. formed in two, neut. in three ways, in der. *u-* stems 389.

Denominative: with causative accent 563; formed from stems in -a 563, in -ā 564, in -i 565, in -u 566, in -o 566 a, in consonants 567; formed without a suffix 568; inflexion 569; participles 569 e.

Dentals: cerebralized 42 a, c, 47 A; replace cerebral and labial 44 a 3β; s cerebralized 57, palatalized 53 a 1, 3, 54, changed to t 44 a, 522, unchanged before r or γ 57, I α, 2 a α, unchanged in Amredita compounds 57, 2bγ; n replaces m 46 d β, 66, 4 α; n before p 77, 2 a, before 1 77, 2 e. Dissimilation 43 b 1, b 2 p. 55

note 8, 351 notes 5 and 6, 469 a 1, 545, 2 α (p. 391 top). Dissyllabic pronunciation 363 a (gám etc.), 364 a (dydm), 372 (gen. pl. of Gradation of vowels 51; in  $\alpha$ -stems).

Doubling of final n 77. Dravidian influence 42.

Dvandvas: accentuation 262. 267 note 7; gender 264, 266; plural 265; singular 266.

Elision: of final a before e and o 70, 2 a, after e and o 72, of a before ending of gen. loc. du. 372 (p. 260 top); of final m 70, 3 b, 75, followed by contraction 372 notes 2 and 4 (p. 256): of y and v 72, 1 b, 73; of r 79, 1 b; of s 78, 1 b. Enclitics 85 b 1.

Endings: in declension 295c,
